THE 1970's IN EASTLAND

as seen by H. T. WILSON, president Eastland National Bank

and Eastland Industrial Foundation. Economic growth will continue its upward trend slowly, but steadily. Our overall economy is sound, and has enough solid base to allow for growth without being overly inflated as is the situation in many areas of our

country today. We are on the frontier of industrialization, because of our location, favorable labor, and transportation.

Our farm and ranch lands will continue to produce more per acre with the employmenet of modern equipment and management techniques.

Each of us at the Eastland post office is proud to be a part of the postal service. We feel that giving each and every patron of this office the best possible postal service is our responsibility our challenge during the 1970s. We are happy to accept this responsibility.

Since it is impossable for any city to operate without problems, we feel sure Eastland will have problems in

Some will be the good problems: too many people for the available housing; too many cars for the available parking spaces. Some will be a different kind of problem: right now, we are having sewage disposal trouble; we are be hind schedule on street main-

But the city will make every effort to handle each problem and to try, day by day, to make Eastland the town its people want.

The word for 1970 is maintenance.

We plan to do some new paving of streets this year, but we will emphasize sealcoating existing streets. We plan to make some changes in our sewage disposal program and bring it up to date and we plan to get the sanitary landfill (burying of solid waste) underway.
