To every man who buys trucks, there are certain features in the new 11/2-ton Chevrolet that recommend it especially for modern hauling.

The rear axle is larger, heavier and more durable. The rear brakes are larger, and all four brakes are completely enclosed. Chevrolet's 50horsepower valve-in-head six-cylinder engine combines modern performance with unexcelled economy. Dual wheels, along with six truck-type cord tires, are optional equipment at slight entra cost. In addition, the new heavyduty truck elutch, the 4-speed transmission and the heavier, stronger frame are factors of outstanding impertance to the modern truck user.
