 ringing greater comfort, and enjoyment, into people's lives - introducing people to new pleasures, helping them to get the most for their .
Besides being fascinating, it is satisfying! My intimate experience with advertisers has shown me that, except for rare exceptions, the be sincere and honest

The law of advertising is simple once one understands its working - the more people know about the merit of a product, the more people buy it. The greater the volume of sales, the less the cost to manufacture. Savings in making mean either lower prices to the consumer or greater value put back into the merchandise.

As an advertising man I cea sincerely affirm that it pays to read
advertisements in the ne spapers - for news of new things, for bargains and savings.

There are thousands of other men - and women - devoting their lives to advertising writing, who will tell you the same thing THEY KNOW!

## Revolution

## On Main Street

Give a thought to Main Street as you scan today's headlines! All the world's excitement isn't in Europe.

For, in our town... and towns like ours clear across the country . . . there's a daily revolution going on. Changes in dress styles and food prices ... the rise of a hat crown ... the fall of furniture prices - these matters vitally affect our daily living... And the news is ably, fully covered in advertisements. Here, in concise, meaty form, makers of the world's goods tell you what's new, what's good . . . and how to make your dollars S-T-R-E-T-C-H.

Smart people who like to be up-to-the-minute in living and current events, follow advertisements as closely as headlines. They know what's doing in Europe and America . . . but they also know where money buys most!
