To Wed, Must Ask Rubinfoff

Determined to marry, Ruby Rubinfoff and orchestra leader Robert Klamann hurried out of the Pittsburgh marriage license bureau, where they are shown above, to obtain consent of Papa Dave Rubinfoff, famed violinist, now on a western concert tour. Officials refused a license because Ruby lacks a year of being 21.

Nanking Officials Are Ready to Quit City Upon Notice

German residents of the capital met to prepare for possible evacuation in event the Japanese drove westward toward Nanking. Part of the Nanking Red Cross hospital was evacuated. However, the move was made only to overcome overcrowding of the hospital.

Walter Woodul Again Is Acting Governor

AUSTIN, Nov. 16.—Lt. Gov. Walter Woodul again became acting governor of Texas today as he returned to Houston and Gov. Allred remained in Mexico. Allred is expected to cross the Rio Grande sometime today, but may not reach his office until tomorrow.

Closing of Gaps On Highways Planned

AUSTIN, Nov. 16.—Texas highway commissioners today concluded their November session, hearing a number of county delegations on road projects. Bids will be taken Nov. 23 on projects estimated to cost \$1,800,000.

Man's Best Friend Also Worst Enemy

ALBANY, N. Y.—A dog may be a man's best friend, but he is also his worst enemy, as far as animals go. So says Deputy State Conservation Commissioner John T. Gibbs, who asserts that dogs are responsible for more injuries to human beings than all other animals put together.

First to Receive Driving Test Is Highest Tuesday

First to receive the new automobile driving license examination under examiners of the Department of Public Safety at Eastland Tuesday morning was B. M. Brashears, who made the highest grade among the early applicants.

Examiner Milton Thomas and T. O. Dillard stated Brashears' oral and actual driving examination resulted in a grade of 95 for the Eastland resident. Average of others was 80.

Two Toothaches Delay Business of The Administration

WASHINGTON, Nov. 16.—President Roosevelt cancelled all his appointments today upon advice of his personal physician because of a painfully infected tooth.

Ex-San Antonio Cop Is Shot to Death

SAN ANTONIO, Nov. 16.—Arthur Sinclair, former San Antonio policeman, was shot to death early today in an altercation at a beer parlor. Claude Henry, expugilist, surrendered to officers and said he shot Sinclair in self defense.

Scrap Iron Being Shipped to Mexico

EL PASO, Nov. 16.—Three thousand tons of discarded metal valued at more than \$18,000 and comprising everything from alarm clocks to steam rollers are shipped from El Paso each month, but scarcely any of it reaches those industries that thrive on war.

Club Is Formed to Protect Bachelors

BREMERTON, Wash.—With the slogan, "protect our bachelors," 25 men formed the Benevolent Brotherhood of Bremerton Bachelors.

53 Fail to Pass the Drivers Examination

AUSTIN, Nov. 16.—53 of the 1,029 motorists tested by state highway patrolmen failed to get drivers license cards on the first day of state tests, it was announced today.

Farm Income In September Higher Than Last Year

AUSTIN, Texas.—Farm cash income in Texas during September was estimated \$101,000,000, compared with \$87,000,000 during September last year, an increase of more than 15 per cent, according to Dr. F. A. Buechel, assistant director of the Bureau of Business Research at the University of Texas.

"The wide variations in the indexes, shown in the table below, as between the different crop reporting districts during September, and also as between the same district this year and a year ago are attributable to the marked differences in production of the main sources of cash income, and to the changes in prices of major crops and of live stock enterprises compared with last year, and with the base period, 1923-32," Dr. Buechel said.

"Sales Tax Gas" Is Made By a High School Chemist

ANNISTON, Ala.—A high school student here is using aluminum sales tax tokens to generate gas that has carried penny balloons released by him hundreds of miles.

Black to Oppose Anti-Lynching Bill

WASHINGTON, Nov. 16.—Sen. Tom Connally of Texas told the senate today that he knew Justice Hugo L. Black would vote to declare the anti-lynching bill unconstitutional, when and if it gets to the supreme court.

Census of Jobless Is Begun Today

WASHINGTON, Nov. 16.—The federal government began today a census of the unemployed, which is expected to prove factual data for the "permanent cure of unemployment."

Land of Honey Is Beckoning 'Tramp' Keeper of Aviary

PEMBROKE, N. Y.—John N. DeMuth, credited with being the first migrating bee keeper, is making his sixth trip to the orange groves of Florida with his bees colonies, confident that the losses of the "poorest honey harvest in Western New York since 1913" will be recouped.

Won Toss and Is Constable

Shaking a sturdy night stick in front of a shiny new badge, Mrs. Mary Saffel sternly bids lawbreakers "Beware!" as she assumes job of constable in Clayton Township, Perry County, Ohio.

Townsend Club's Speaker Is Named

Dr. Shook, regarded by many as one of the most authoritative Townsend plan speakers, will address the Eastland Townsend club Friday night at 7:30 in the county courtroom.

A. H. Henderson Is Speaker at Club

History of the production of oil was related Monday by A. H. Henderson of Olden at the Eastland Rotary club luncheon at the Cornelle hotel.

Train's Forming Begun For Fans

Organizers Tuesday began securing pledges of fans to ride a special train to Sweetwater Friday for the game that evening against Eastland Mavericks.

Third Rank Work Is Set For Pythians

Third rank work is tentatively set for the meeting of Knights of Pythias in Castle hall tonight at 7:30, it was announced today.

Engineman Injured Slightly In Crash

SWEETWATER, Nov. 16.—G. J. E. Bethany, engine foreman, was suffering today only with a broken heel and cuts on one leg after being imprisoned for 40 minutes in wreckage of his locomotive and a truck.

Excavation Started On Dormitory at John Tarleton

STEPHENVILLE.—Excavations for a \$43,000 girls' dormitory on the John Tarleton College campus has been begun. College officials announce that the building will be ready for occupancy next fall.

With the completion of the new hall, the entire southeast block on Tarleton's Military Drive will be devoted to women's dormitories. The new building will be red brick, colonial style, on almost exact replica of the Lotta Moody hall completed in 1936.

Pipeline Companies To Drop Contests On Intangible Taxes

AUSTIN, Nov. 16.—Attorney General William McCraw said today he had been assured by oil pipeline companies that they are prepared to drop all pending contests of the state intangible tax law, as the result of a U. S. Supreme Court ruling yesterday favorable to the state.

Westex Oil Men's Board to Convene

Local directors of the West Central Texas Oil and Gas association have been notified by J. C. Hunter, Abilene, president of a called meeting of the board at Albany Wednesday night.

North Star Club Compiling Record

Records for the past year were to be compiled this afternoon by members of the North Star Home Demonstration club at a meeting, Miss Ruth Ramey, county home agent, announced.

Eleven Killed In Belgian Plane Crash

OSTEND, Belgium, Nov. 16.—Eleven persons, including eight passengers, were killed when a Belgian airliner crashed into a factory chimney and burned near here today.

Woman Is Killed In Accident On Monday

FORT WORTH, Nov. 16.—15-year-old Nolene Modling of Quannah, was in a Fort Worth hospital today unaware that her father was near death at Wichita Falls from injuries suffered in an automobile accident 10 miles south of that city.

Day Labor Irks, Says Ickes' Son

A job totin' steel with a Youngtown, O., engineering firm is not exactly to the liking of Robert H. Ickes, foster son of the secretary of interior, he admitted when pictured above after long hours as a day laborer. Young Ickes wants to be a newspaperman, dislikes politics. He also has tried PWA work, as clerk on a sewer construction job.

Railroads Granted Rights to Construct A Connecting Line

WASHINGTON, Nov. 16.—The Interstate Commerce Commission today authorized the Kansas City, Mexico and Orient Railway and the Pecos and Northern Texas Railway to construct a connecting link between their lines near Sweetwater.

Welding Machine Job Proves Fatal

CISCO, Nov. 16.—Richard (Dick) Schaefer, about 42, prominent Cisco garage owner, was electrocuted Monday at his Schaefer Bros. shop on South D avenue, when he came in contact with the live electrode of an electric welding machine while attaching the ground electrode to a steel plow for welding. He received the full force of the current through his body and efforts to bystanders to resuscitate him were unavailing.

May Team Preps For Friday Game

The Eastland Mavericks Monday afternoon began preparations for the game Friday night at Sweetwater against the Mustangs. Officials reported the team is in fairly satisfactory shape, although Tommy Samuels and "Boob" Daniels are injured and will not likely play in the Friday engagement.

Tax Collecting Itinerary Given

C. H. O'Brien, tax assessor-collector for Eastland county, announced Tuesday a schedule for the collection of state and county taxes.

Woman Is Killed In Accident On Monday

FORT WORTH, Nov. 16.—15-year-old Nolene Modling of Quannah, was in a Fort Worth hospital today unaware that her father was near death at Wichita Falls from injuries suffered in an automobile accident 10 miles south of that city.

CONGRESS HAS A NEW THREAT TO PROGRAM

WASHINGTON, Nov. 16.—A new threat to success of the special session of Congress developed today in a Senate wrangle over consideration of the anti-lynching bill. It was feared a filibuster by southern opponents of the measure might arise.

House Agricultural Subcommittee on Cotton Today

The House agricultural subcommittee on cotton today decided on a production control plan, based on acreage limitations instead of marketing quotas as asked by Secretary of Agriculture Henry Wallace.

Chairman Fred Vinson of the House Ways and Means Tax Subcommittee, Said That Sub-

committee, said that three business tax revisions, tentatively made by the committee, will save taxpayers \$93,000,000 a year.

Welding Machine Job Proves Fatal

CISCO, Nov. 16.—Richard (Dick) Schaefer, about 42, prominent Cisco garage owner, was electrocuted Monday at his Schaefer Bros. shop on South D avenue, when he came in contact with the live electrode of an electric welding machine while attaching the ground electrode to a steel plow for welding. He received the full force of the current through his body and efforts to bystanders to resuscitate him were unavailing.

May Team Preps For Friday Game

The Eastland Mavericks Monday afternoon began preparations for the game Friday night at Sweetwater against the Mustangs. Officials reported the team is in fairly satisfactory shape, although Tommy Samuels and "Boob" Daniels are injured and will not likely play in the Friday engagement.

Tax Collecting Itinerary Given

C. H. O'Brien, tax assessor-collector for Eastland county, announced Tuesday a schedule for the collection of state and county taxes.

New York Voters Democracy to Work

The changes have been rung often enough on the fact that Tammany Hall, for the first time in history, has taken two lickings in a row. What needs to be examined now is the background for the phenomenon.

For it is not enough merely to say that Mayor LaGuardia is a sensational campaigner gifted with a more than ordinary large amount of political "it." Nor is it enough to bring up the fact that his candidacy bore the unofficial blessing of President Roosevelt, or to add that the people of New York had grown tired of Tammany's perennial misrule.

These things don't explain it. Tammany misrule is an old story. National administrations before now have smiled benignly on reform mayors, only to see them go down to defeat. Reform mayors before now have been good campaigners without profiting by it.

The explanation must lie deeper. The very atmosphere of politics seems to have changed. A new spirit is abroad in the land. The people are desperately anxious to have governments that are in tune with the needs and aspirations of ordinary folk, and they are sick to death of governments that represent invisible selfish interest.

How did this come about? Probably you would not be very far wrong if you ascribed it chiefly to the fact that the great depression was one of the most potent educational influences in American history.

Before the depression New York had mayors like Hylan and Walker—and liked them very well. The "better element," of course, made the usual protests, but nobody listened. Like every other American city the mass of people in New York got just the sort of city government they deserved.

Things were booming, politicians were expected to be a shady lot, and there was a general impression that if the common man just stopped worrying about things his lot would go on improving automatically until the millennium dawned.

Then came the depression. People began to realize that progress is not an automatic thing, that democracy won't work properly unless the voters take the trouble to make it work, and that a politician who is put into office by selfish interests can't logically be expected to refrain from serving those interests after he is elected.

The old slipshod, care-free sort of politics that seemed to work all right in boom times stood revealed as an unbearably expensive luxury in bad times. It became obvious that the ordinary man's liberties need defending, and that the ordinary man can defend them only by using his ballot wisely.

So politics is existing in an entirely different atmosphere now than was the case a decade ago. Once again, people are willing to take the trouble to make democracy work. That is the encouraging thing about the New York election.

THE BADGE OF LEADERSHIP

SIDELIGHTS OF INDUSTRY

Looking Beneath the Surface
Modern methods of oil-well drilling, and of oil production as well, enable engineers to determine with reasonable exactitude just how much oil is available from a given field. At a matter of fact, so great is the progress of the past 17 years or so, that it is now comparatively a simple task to estimate the amount of oil in a field.

Drilling exploratory wells is one way to obtain the measurement. Pressure existing a mile or more beneath the earth's surface tells the engineer what help he may expect from nature in lifting the oil; also what sub-surface conditions may be encountered. Exploratory drilling once was as much a hit-or-miss proposition as was oil prospecting. Now both are sciences, not exact, perhaps, but with much of the guesswork eliminated.

Geophysical surveying with seismograph and gravimeter determines the area of the field. Improved coring practice discloses the thickness of oil-bearing formations. Analysis of well samples reveals the percentage of pore space filled with oil. These data, with a report on the quantity and quality of oil already produced, provide sufficient evidence for the engineer to reach a fairly accurate conclusion as to the field's future yield.

These evidences of progress in eliminating guesswork tend to increase the confidence of oil men in their growing ability to find oil wherever it may be and whenever it is wanted. Once in a while they make errors, but by and large they are using science to better advantage than did their predecessors—and they aren't depending on luck!

FRECKLES and HIS FRIENDS—By Blosser

IT REALLY HAPPENED IN FOOTBALL!

BEFORE the "Praying Colonels," of little Centre College, Danville, Ky., gained national fame by defeating Harvard in 1921, they met West Virginia at Charleston, West Va. "Uncle Charley" Moran, better known as a big league baseball umpire, was coach.

In the second half, Murphy, a Centre substitute, ran onto the field, clad not in a football uniform, but in a flimsy track suit and track shoes with cleats replacing spikes. One play was called and Murphy charged in with his better-protected teammates. On the second play, he whizzed down the field, caught a forty-yard pass from Bo McMillin and galloped across the goal line for the touchdowns that gave Centre a 14-0 victory.

the old field is encouraging repressuring operations with water, air and gas in other fields. Production engineers again are taking notes from Bradford's book, and fields which were discovered long after Bradford and quit producing long before, soon may be back in production. Incidentally repressuring is one more satisfactory answer to declining production, and another hopeful phase in the oil conservation problem.

Too Much Gush About Gushers
"Gushers" represent the more dramatic and romantic in petroleum industry operations, but as an actual matter of fact the bulk of the world's oil supply comes from wells which no longer "gush." Average production of the 340,990 wells in the United States, for instance, is only 8.1 barrels a day. This is called "steady" production, and is the type of production upon which thousands of oil-field workers, refinery employes, farmers, royalty owners and others depend for their livelihood.

There are other wells, known to oil men as "strippers," whose average production is small but steady. In Pennsylvania, where there are 82,000 oil wells, the average production per well is only about one-half barrel per day.

Speaking of Transportation
There may be enough motor vehicles in the United States to take every resident for a ride simultaneously but if the petroleum industry were forced to depend upon any one medium of transportation to move its products from well to refinery and from refinery to market, there would be a shortage within comparatively a few days. So huge is the demand for, and so great the consumption of petroleum products, that the industry must use virtually every available medium of transportation to get its products into the hands of consumers. Oil companies operate or use thousands of miles of pipeline, conveying crude oil, gasoline and natural gas. They are among the largest railroad customers, themselves owning more than 100,000 tank cars. Petroleum water tonnage comprises more than 30 per cent of the country's water-borne traffic. Oil barges ply every navigable stream while oil tankships carry the American flag on all seven seas. Petroleum tank trucks travel every main highway, their operators establishing a precedent for courteous and safe driving.

What's in a Barrel of Crude Oil?
None can answer that question completely and satisfactorily, for a barrel of oil really is a treasure trove still being fathomed by scientific research. Even today pages would be needed to list the products derived from crude, a product which, in itself, has little use.

The touch of the technologist's magic has transformed the barrel of crude into something quite different from the day it was produced to obtain a few gallons of kerosene, or a can full of lubricating oil. In 1936, for instance, the 42-gallon barrel of crude yielded more than 18 gallons of gasoline and naphtha, two gallons of kerosene, 16 gallons of oil and fuel oil, better than one gallon of lubricating oil, and a number of other products, many of them used by every person in today's civilized world.

Tires from Wells
A dustless type of carbon black, made from petroleum sources, is an essential ingredient of modern rubber tires. The product is made largely by burning waste petroleum gases, and it puts into tires the quality of long mileage. Carbon black finds industrial uses also in the manufacture of printing ink, paints, lacquers, enamels, etc. New uses are being sought.

Longview M Direct Cen The Unem

LONGVIEW, Texas, Nov. 10.—H. Harrison, vice president and general manager of the Longview Chamber of Commerce, today issued a statement regarding the unemployment problem in this city. Harrison stated that the unemployment problem in this city is a direct result of the depression and that the Chamber of Commerce is doing its best to help the unemployed. He stated that the Chamber of Commerce is holding a series of meetings to discuss the problem and to find ways to help the unemployed. He also stated that the Chamber of Commerce is working to get the state to explain the unemployment problem to the public and to get the state to take action to help the unemployed.

PROVED TO TREAT

Doubly proved—in every cold-clinic, and by every more homes than any other medicine. VapoRub keeps right on working. VapoRub relieves irritation, relieves coughing, helps break up phlegm, relieves the worst of the cold is over.

JILL

BY MARY RAYMOND

Copyright, 1937, NEA Service, Inc.

trying to save Jill from prison. I guess with all her looks and money, she'll get by with a few years in prison. When she comes out, she won't be so highhat, I imagine."

There was no help here. Patty admitted to herself that Ardath had the upper hand. There were times when Ardath could look so sweet and appealing. She could picture Ardath with that innocent look she had at times, looking up at a jury through a mist of tears, swearing she was being made a victim to save Jill. There was nothing else to do. No one else who could help. In a flash it came to her. There was the old woman with the red scarf Jill had given her.

She must find her. Her testimony and the scarf would clear Jill. But nobody on 67th street had seen an old woman wearing a red scarf. "Beggars don't come on this street," some of the women told Patty. "Some of us may be poor, but we're all respectable, and able to take care of ourselves. We've heard of such a story? An old lady, begging at that time of morning?"

Patty turned away. Well, of course Jill hadn't said the old lady was a beggar. But she had kept the money Jill had given her, which amounted to the same thing. And these cold mornings, she would be sure to wear that red woolen scarf. She had covered every place in the block. No, there was the apartment next door to Alan's, occupied by an elderly artist. She would go back to him, and tell her story once more. If he couldn't help, she would ask the police to keep a lookout for an old woman wearing a red scarf. Beyond that—Jill wouldn't think beyond that.

Once more, Patty rang the bell of the apartment that belonged to Alan's. And again the friendly face of the elderly man appeared. "Still looking for the young man?" he queried, before Patty could speak. "I'm afraid I've no news. I haven't seen him since he left today. And nobody has come to his apartment."

"No," Patty answered. "I'm not looking for him now. I'm trying to find an old woman." "An old woman?" The elderly man smiled. "So it's an old woman instead of a young man you want to find?"

Patty smiled wanly back at him. Of course, she did sound crazy. But somehow she must convince

him she was not. "Someone—a girl friend of mine is in great trouble," Patty said. "This young man and an old woman who was begging in front the day my friend came here are the only two people who could help her."

"We have no beggars," the man began stiffly. "I've heard that before," Patty answered. "Just the same there was an old woman in front of this building, and my friend gave her some money and a red woolen scarf."

"A red scarf?" the man exclaimed. "Oh, of course. Will you come in?"

They were walking down a hall. And now the man was throwing a door wide.

Seated near a glowing fire, knitting briskly, was an ancient-looking old woman. About her shoulders was a cheery red scarf. "Nanna," began the man sternly, "did you take some money from a young man when you went out for a breath of air early yesterday morning? And where did you get that scarf?"

The old woman's bright eyes twinkled. "Did she repent her bargain and want the pretty scarf back? Or maybe she didn't know it was a begg bill she was giving me?"

The man shook his head in mock disapproval. "You'd never know that you were the mother of a respectable painter. Shameless. Taking money. No wonder this young lady was out searching for a beggar."

"She looked at her watch and said, 'It's six o'clock,' the old woman broke in merrily. "And I said, 'You don't have to tell me the time. I know by the sun.' So pretty she was. So ashamed she would have been, if I gave the money back."

Patty sat down weakly. "Please excuse me. But I feel a little faint. After I recover a bit, I want you and your son to go with me to the police. The girl who gave you the red scarf is in trouble. The police claim she was somewhere else at 6 o'clock yesterday morning."

"They do, do they?" began the old woman. "Those police! Well, I guess this will prove something. Are those the girls—what do you say in your English—instant?"

She took the red scarf from her shoulders and handed it to Patty. Inside were the letters, embroidered on a silk marking band, "J. W."

(To Be Concluded)

"OUT OUR WAY" By Williams

CHEANEY

We are having nice rains for the grain that has been sowed and its looking fine. Some are still sowing for pasture.

Thrashing all done and some are selling their peanuts at 90 cents a bushel, as most are all first class.

Wiloy Powers and wife and son, Jack of Desdemona spent Sunday at Cheaney.

Mr. H. L. Quinn and son-in-law, of Ranger was at Cheaney Tuesday evening on business.

Mr. J. M. Robinson and Ronnie Peterson of Ranger was at Cheaney Monday buying cattle and hogs.

Ch. A. Neger, wife and son, Charley was at Ranger Tuesday on business.

Austin Minchew at Breckenridge spent the night at Cheaney Monday night. He is making preparations to go to Muskogee hospital in Oklahoma, for treatment of hernia.

Miss Bertha Yardley was a Ranger caller Tuesday. Went to see her mother who is still in the hospital and is improving slowly.

Mr. J. U. Elrod and some were at Ranger Tuesday selling tomatoes they had raised this fall.

Misses Florence and Lynda Jane Rodgers spent a week in Abilene with their sister, Mrs. Jimmie High came home Saturday.

Mr. and Mrs. J. R. Blackwell were selling produce in Ranger, Monday evening.

Mr. Sam Powers of Hobbs, N. Mexico spent the night at Cheaney Wednesday night on his way to Desdemona to look after his interests down there.

Leroy Thomas of Lubbock was at Cheaney Monday night. He is working at a gin in or near Lubbock. Mrs. Merle Hoffer went back with him.

Mr. Crick Wheeler and wife is to start to Phoenix, Ariz., Friday or Saturday. They have sold their farm and are going to make their home there. The faculty and pupils of Duster, Comanche county.

Will H. Mayer, 2818 Salado Street, Austin, Texas. I enclose 25 cents in coin securely wrapped for a copy of "Conservative Scrap Book." Name Address

SISTER MARY'S KITCHEN

By Mrs. Gaynor Maddox
NEA Service Staff Writer
The white of an egg is a wonderfully valuable source of protein and the yolk is rich in essential vitamins and minerals. With meat prices high, eggs can roll right into family favor and prove themselves staunch allies in the fight for more reasonable food costs. An egg, remember, is all food. There is no waste to it.

Eggs in Tomato Nests with Spaghetti
(5 servings)
Two cups spaghetti, 4 cups boiling water, 1 teaspoon salt, 5 medium size tomatoes, 2 tablespoons grated cheese, 4 tablespoons butter, 1 teaspoon salt, 1-4 cup fine cut crumfs, 5 eggs.

Break the spaghetti into 2 inch lengths and cook in the 4 cups of rapidly boiling, salted water for about 20 minutes, or until tender. Drain, blanch and pour spaghetti into a well greased heat resistant glass casserole, 1-2 quart size. Cut a thin slice from the stem end of each tomato and scoop out enough pulp so an egg can be placed in the tomato. Add the tomato pulp, cheese and butter, cut in small bits, to the spaghetti. Sprinkle salt and buttered crumbs over each tomato. Make 5 wells in the spaghetti and place a tomato in each. Break an egg into each tomato, and sprinkle each egg with salt to season. Bake uncovered in a moderate oven until the spaghetti is hot and the egg whites are firm. Serve in the same dish. The hot baking dish keeps foods hot for second servings. Bake 20 minutes in a moderate oven (350 degrees F.).

Creole Eggs
(4 to 6 servings)
Six eggs, 3 tablespoons butter.

Mr. George Hamilton and wife and Mrs. Tommie Blackwell of Ranger was at Cheaney Armistice day, visiting Mr. and Mrs. Jess Blackwell.

Peanut haulers of DeLeon, Gorman, Ranger and Desdemona are hauling the nuts away in a hurry. Also peanut hay.

Mr. Sam Yancy of Salem and Miss Verna Rodgers of Cheaney were married Friday afternoon.

We have just learned that Mrs. R. L. Yardley who has been in the Ranger hospital, came home Friday and was doing fairly well. Her many friends are proud she is able to come home.

WASHINGTON WITH RODNEY DUTCHER

BY RODNEY DUTCHER
NEA Service Staff Correspondent

WASHINGTON — Sulfanilamide elixir, supposed to have been responsible for the deaths of 60 persons at last count, drew wide public attention because so many people who took it died so quickly, resulting in a melodramatic race to get remaining supplies off the drugstore shelves.

But other drug preparations have killed more people than this one, though less conspicuously, officials of the Food and Drug Administration assert. And they couple the reflection with the question of whether the once-celebrated "Tugwell Bill" would have prevented the recent series of deaths. The particular sulfanilamide preparation which proved so deadly in the present case was distributed through regular channels, put out by an established firm, and administered by conscientious physicians.

Dr. E. Kennerly Marshall, Jr., professor of pharmacology at the Johns Hopkins University, says passage of the Tugwell bill would have saved those who, in the present instance, died after taking the "elixir." Food and Drug Administration officials say the measure in its original form "probably" would have averted these tragedies as well as others.

But the original Tugwell bill prepared by these government experts to protect consumers against dangerous or worthless drugs, cosmetics and foods, has long since been pulverized by lobbyists and their congressional sympathizers. And under present laws, the only charge that could be brought against the elixir manufacturers would be a technical one of "misbranding," which involves a \$200 fine in case the violation should be established.

SHERIFF PETE SMITH, a flame-thrower man-topper from 'way down in the redlands of Oklahoma, is in line this fall for a big award of All-America reward money.

Because Smith, an Oklahoma senior end standing 6 feet 2 and weighing 190 pounds, always gets his man. If necessary, he gets three or four blockers and his man.

Ask Morris White, Tulsa's great little desperado whom none of the rough police officers of Texas Christian, Rice, or Arkansas has been able to subdue for two seasons. Sheriff Pete and his efficient 195-pound deputy, Waddy Young, the Sooners' other end, put White behind the bars. Although White, who is as slippery as oiled slobbers, tried all his dodges, he gained only 28 yards while losing 34. Twice when he tried to sweep the Sheriff's end, Smith expertly rode the crest of Tulsa blockers and handcuffed him.

Smith also tore through to block the try for the point after the first Tulsa touchdown. He ripped through to cover a Tulsa fumble that set up an Oklahoma touchdown two plays later.

SHERIFF SMITH'S finest work was against the Cornhuskers on the same Nebraska field where two weeks earlier Bill Jones' men had beaten Minnesota. Oklahoma led the series-prised Huskers in the mud, 5-0. Moreover, the play-by-play showed that Oklahoma had the ball in Nebraska territory exactly 13 times while the Huskers never got inside the Oklahoma 40.

After the skirmish, Johnny Howell, Nebraska's senior quarterback and a pretty tough bandit himself, said: "Smith is the toughest end I ever faced to crack, tougher than any Minnesota or Pitt end." And Howell has played against the Golden Gophers, three autumns and opposed the Panthers twice.

With Rice on Oklahoma's seven late in the final period, Coach Tom Stidham sent Sheriff Smith, who had been sticking up fuel on the bench, back in to

LET'S KNOW TEXAS - TEXANS
WILL H. MAYER
AUSTIN, TEXAS
A beautiful book with brilliant cover showing Texas Capitol surrounded by six flags, size 2x12 pages, indexed, classified by subjects, with numerous historical pictures ready to be pasted in the book. This makes a lovely gift for children. Is adapted for school or home use and stimulates interest in Texas history and love for Honor and State.

party view) to 35 favoring a continuation of conciliatory efforts (the "conservative or 'peace party' attitude). Probably this fairly represents the division of sentiment in Texas at that time.

Q. Were there any general discussions of Texas statehood in efforts to agree upon policies as to Texas independence?

A. The only conventions (more properly called consultations) at which independent statehood for Texas was discussed, immediately prior to 1835, were at San Felipe in 1832 and again in 1833, at both of which both "radical" and "conservative" views were expressed, at times in emphatic and bitter terms, the differences being merely as to policies. There were also mass meetings throughout Texas at which excitement ran high, but there was little or no sentiment for separation from Mexico prior to the threatened invasion of 1835.

Q. Were any "conservatives"

Port of Corpus Christi Receives 4-Millionth Bale

CORPUS CHRISTI.—The port of Corpus Christi recently received its fourth-million bale of cotton and is now well on its way toward its fifth-million bale.

The four-million mark was passed on Aug. 27, when more than 19,000 bales were received in the single day's shipping. Since that time the port has raised its total cotton shipments to approximately 4,250,000 bales. Half a million bales have been received since the port's new fiscal year started on July 1, prior to which 3,737,697 bales had been received. The port of Corpus Christi was opened on Sept. 14, 1926.

Bulk of the receipts during the past 10 years have moved in foreign trade, with nearly 3,500,000 bales having been shipped from Corpus Christi to European and Asiatic countries. The bulk of cotton from this port goes to Great Britain and Japan. China also receives a large portion of the cotton, and most of the United Kingdom's supply is received at the ports of Liverpool and Manchester. A great portion of the South Texas cotton is also shipped to the Continental European ports of Antwerp, the Havre, Bremen and numerous Mediterranean ports.

From Sept. 14, 1926, to June 30, 1934, a total of 319,559 bales were shipped from Corpus Christi in coastwise and intercoastal traffic to Atlantic and Pacific seaboard ports. Slightly more than 100,000 bales were shipped by rail during that period.

Corpus Christi's home county of Nueces, the greatest cotton-growing county in the nation, produced a total of 91,110 bales of cotton during the past season. The county averaged one-third of a bale per acre to hold its three-year title as the nation's greatest cotton-producing center.

Home Temperature Is Important Now

AUSTIN.—"With colder weather on its way to Texas, it's time to think about home temperatures during the winter months," states Dr. Geo. W. Cox, state health officer.

"There is evidence that thousands of homes are constantly overheated during the winter. In fact, many families tolerate an indoor temperature during the colder months to which they would do and strenuously object in the summer. Such persons are not only uneconomical with their fuel supply, but are endangering their health as well," Dr. Cox continued.

"People living in homes with overheated temperatures become soft, the system is weakened and is at a decided disadvantage in defending itself against the sudden change from a too great intramural heat to the penetrating cold.

"Consequently colds, bronchial troubles and pneumonia, taking advantage of the situation, step in and do much unnecessary, and not infrequently, fatal damage. You will agree that this is entirely too high a price to pay for a few extra degrees of unneeded heat.

"We all know families who are starting on their annual scourge of colds and sore throats. But this does not alter their affinity for super-heat. They ignore the fact that 68 to 70 degrees is the best temperature. A thermometer kept within that range, plus proper humidity, is a definite safeguard. We need that safeguard. What does your thermometer read?"

U. of T. Library Is Becoming One of Best In Country

AUSTIN, Texas.—The library of the University of Texas will over 531,000 volumes is well on its way to becoming one of the great libraries of the country, according to Donald Cony, University Librarian. On August 31, 1934, the University Library contained 531,454 volumes.

"With the beginning of the University year," Mr. Cony said, "the University Library gives every promise of passing the 550,000 volume mark by September 1, 1935. Already the largest and most important library in the South, with the continued support of the Legislature and citizens of the State, he able to hold its place in this respect without difficulty. Continued growth of the library is necessary to support the expanding program of research at the University, and to provide study materials for the rapidly increasing undergraduate student body."

The library purchased 17,785 volumes in 1933-34, a 26 per cent increase as compared with the 14,054 volumes acquired by purchase in 1932-33.

"It is gratifying to observe that the number of gifts increased from 3,500 in 1933-34 to 5,111 in 1934-35, an increase of 43 per cent," Mr. Cony continued. "No library ever becomes great through purchases alone. It is only through the continued and generous support of its friends that it acquires many scarce or expensive books."

The total addition to the library for 1933-34 were 22,327 volumes as compared to 18,782 for the preceding year. No small proportion of this increase was due to the generous grant of the General Education Board of New York City to the University of \$66,000 for the five-year period beginning February 1, 1935.

Tattoos In Many Languages to Be An Aid to Identification

MARSHFIELD, Ore.—Claiming to be the only man in the world who "cannot be lost," T. D. Rockwell, of Portland, carries his name tattooed in 34 languages on his legs.

Rockwell said he conceived the idea of the tattooed names to provide him identification for cashing checks no matter what part of the world he traveled in.

Languages include Russian, Italian, Spanish, Japanese, as well as the symbols of the Morse telegraph code, the Continental code and the Braille system. Rockwell said he had several Indian languages he planned to add to his investment—which, he said, already has cost him \$50.

Evidently hiding under false colors is the Los Angeles thief who took a red wig, four blond wigs, a platinum and brown wig and a brown toupee from a hair store.

Dolores, of Lorraine, were guests Monday and Friday, of Mrs. Ritchie's sister, Miss Faye Hock. Mrs. F. M. Purser and Mrs. Jack Hayes of Big Spring were here Sunday for a visit with Mrs. Purser's mother, Mrs. R. E. Webster.

Some New Faces in the Cheering Section

Kingman Reef To Get Colony

SEATTLE.—The battered old sailing vessel, Margaret F. Sterling, long destined to a watery grave, is being refinished and will serve as a station ship for Pan-American Airways, at Kingman Reef, 1,000 miles southwest of Honolulu.

Giant clipper ships, winging their way between San Francisco and New Zealand, will use the windjammer as a supply base. Diesel engines, propelling twin screws, are to be installed aboard the schooner as auxiliary power, but she will proudly billow her sails to the wings in the voyage to the reef, an uninhabited coral atoll, about 7 miles long and 5 miles wide.

The ship will be equipped with a short-wave wireless set, radio beam apparatus and powerful electric searchlights to direct flights of the big clipper ships.

And the name, Margaret F. Sterling which she has borne since being shot down the greased ways in Victoria, B. C., in 1919, will give way to Four Winds.

Just before a new-Douglas fir mast, 108 feet long, was lifted over the side of the vessel's deck to be fitted, her master, Capt. Halvor Mikkelsen, placed a new 10-cent piece in the heel of the big stick.

"That'll keep away the jinx," he said.

The clippers will hop from San

Roving Blacksmith Finds Business Is Good In Panhandle

By United Press
AMARILLO, Texas.—When the horse shoeing business began to slack off several years ago, R. J. Beeler of Amarillo packed his bag and became a wandering blacksmith. Today, claiming to be the only horseshoer left in the Texas panhandle, he travels from Clovis, N. M., to Pampa, Texas, and says that business is fine.

Starting in the trade when he was 11, Beeler estimated that he had shod 326,000 head of horses and mules in the past 25 years. From 1912 to 1925, he averaged shoeing 10 to 12 head a day.

"At one time I shod horses for a \$1 a head, but in recent years, because of the smaller number of horses and because there are few horseshoers left, the price is now \$3."

Beeler said the hardest thing about shoeing a horse is getting the hoof level at the right angle.

"All horses take different types of shoes. When a person thinks of the many different types of gait, such as a rack, slow gait,

Francisco to Honolulu, 2,410 miles; from Honolulu to Kingman Reef, 1,100 miles; from Kingman Reef to Tutuila Island of the Samoan group, 1,600 miles, and from Tutuila to Auckland, N. Z., 1,800 miles.

center right and left, trot, running walk, fox trot and others, and the different types of horses, such as the trotter, running horse, hurdler, hunters, polo horses and the work horses, it is not hard to understand that the business of shoeing horses is really a specialist's job."

THIS CURIOUS WORLD

The WATER AREA OF CONTINENTAL UNITED STATES, EXCLUSIVE OF THE GREAT LAKES, AMOUNTS TO 53,013 SQUARE MILES.

LARGE DIAMONDS ARE "FINGER-PRINTED." FLAWS ARE CATALOGUED SO CAREFULLY THAT A STONE CAN BE RECOGNIZED EVEN IF IT HAS BEEN RECUT.

SCIENTISTS usually are the first to report earthquakes, but the Manila earthquake was the exception to the rule. An extensive telegraph set-up, carrying Chinese-Japanese war stories, actually scooped the seismograph stations.

The specialist says there are no two horses with feet exactly alike. So the profession of a real horseshoer is a skilled job.

PERSEVERANCE FAILS BURG-LAR

By United Press
VANCOOVER—A meager \$2 was the reward for the astonishing patience and perseverance of Irwin Miller, arrested for breaking into a ballroom here. Evidence of his painstaking nature was a door panel, removed by boring 50 holes in it with a brace and bit.

Snake Venom Will Aid Paralysis War

By United Press
PHILADELPHIA.—Snake venom and vegetable compounds will be enlisted in the war against dread infantile paralysis, in experiments by Dr. John A. Kolmer, Philadelphia scientist.

Otto Vogt von Sickingen, scientist and explorer, will lead an expedition into Brazil soon to collect necessary venom and vegetable compounds.

CAPE COD 'TURKEY'

Dipping into brown swells that champed hungrily at the frosted strakes of his dory, the Cape Codder crouched to his cold work with wet, streaming lines till a catch of fish had been made. Good cod was his Thanksgiving "turkey." With dull skies sinking heavily upon him and the first ghostly shafts of a nor'easter hissing from a smoky horizon, he would lift his crinkled eyes shoreward, thankful for the fish that meant both food and feast.

Sometimes, it seems, we come by our blessings too easily. We take the gifts a more progressive civilization has brought us with a complacency that robs us of deeper thrills. And the thrills are there, with but a slight exercise of imagination.

Try a slow exploration through the advertising in this newspaper. Behind each advertisement is a story. Behind each story is a service or a product that may mean pleasanter living for you. Behind it all is the stirring life of the world in action—for here the producers of the world are offering you their wares.

EXTRA EXTRA EXTRA
