

CORRIGAN AND IRISH HAVE A GREAT DAY

By United Press
NEW YORK, Aug. 5.—It was a great day for the Irish. They laughed and they cried, they craned their necks and swore Douglas Corrigan was the finest boy that ever hopped an ocean, and resented any remarks about his nine-year-old plane being a "snake."

It was a great day for the 31-year-old Californian, who flew to Dublin "by mistake," and then came home for the daffiest reception in the history of the big town.

As he rode up Broadway with his brother, Henry, and his uncle, the Rev. S. Fraser Langford, Corrigan plucked a strand of ticker tape from his shoulders and grinned.

RUSSIA TAKES A STERN HAND IN DISPUTE

Soviet Russia took a stern attitude toward Japan today in the Siberian border dispute.

Maxim Litvinov, foreign commissar, in effect rejected a Japanese proposal for negotiations. He refused a Japanese suggestion that Soviet troops be withdrawn from the disputed area.

Instead, Litvinov declared Japan must withdraw her troops and then negotiate.

The attitude of Tokyo was conciliatory and officials thought a break could be averted.

Even as the talks progressed a new fight started on the border and an artillery engagement was in progress.

At the Yangtze, the river again threatened to halt the Japanese drive by floods. Despite the rise of water the Japanese pushed on.

In Europe, the tension between Germany and Czechoslovakia was unabated. Germany threatened to fire on Czech airplanes if they crossed the border.

The threat was an aftermath of an incident in which Germany charged Czech planes had scouted over her territory.

Michigan May Vote to Keep Gas Tax for Highways

DETROIT — A constitutional amendment to require the use of all state gasoline tax and motor vehicle registration revenues for highways exclusively will be voted upon at the election in Michigan in November. The measure to place the amendment in the basic law of the state was initiated by petition of the voters.

More than 209,000 voters signed the petitions, about 20 percent more than the number of signatures required. The petitions have been filed with Secretary of state Case, who is now required to submit the question to the voters at the fall election.

The amendment has the support of the State Highway Department and 21 associations, and it is expected that the people will vote favorably on it.

With the people of Michigan voting on this amendment, there will be at least four states this November where the people will have the opportunity of voting on amendments dedicating all motor vehicle tax revenues to highways.

The other three states include New Hampshire, California and Alabama. While the legislatures of two other states, Indiana and Nevada, have voted favorably on similar amendments, it is necessary for the vote to be confirmed by the next legislature, so that it will be another year before the people of these two states have the opportunity to ratify their amendments.

Strong public sentiment has developed throughout the nation against the practice of diverting highway funds to non-highway purposes, a practice which sprang up during the depression years. Although the public officials and legislatures of some states are taking steps to refer the continuance of this practice to the people, in a majority of states constitutional amendments cannot be initiated directly by the people.

In Michigan, however, and in a few other states, the people themselves can initiate statutory and constitutional measures, and can adopt them independently of the legislature.

Nation Sees Little Relief from Heat

By United Press
WASHINGTON, Aug. 5.—The U. S. Senate appeared headed toward a record number of election contests today as the result of questionable 1938 campaign tactics.

The campaign expenditures committee already has found "deplorable" tactics in Tennessee, which held its primary yesterday, and Kentucky, which votes tomorrow.

The weatherman gave indefinite promises of relief today when he said scorching temperatures, which entered the 12th day in some sections, may fall to normal Saturday if a cool mass of air from the Pacific Coast continues eastward.

Three persons died of heat prostration in New York City. Twelve deaths were reported in the northern part of the state.

The plains states as well as the Upper Mississippi Valley had higher temperatures in store for them.

Two relief workers were killed by lightning in a storm yesterday at Cleveland.

Man Is Ingenious Without Being Wise

The hope that closer intercommunication among countries and peoples would bring better understanding and more peaceable relations among them doesn't seem to be working out very well.

We invent the airplane, bringing cities closer together in point of time, and what does it mean? Better bombing.

We invent the cable and telegraph and telephone lines so that any country may know instantaneously what is going on in any other country. And what do we get? In half the world we get iron-clad control of communications by governments, and the news poisoned at the source.

We invent radio, by which the human voice can instantaneously enter any home in the world from far countries. And what do we get? We get poisonous propaganda from abroad and floogie-floogie-floy-floy at home.

Now Miss Lidia Zamenhof, daughter of the inventor of Esperanto, an artificially-created language, comes through with still another disillusionment.

Esperanto was devised in the hope that by creating a language universally understood, the barriers of differing tongues would be banished; and universal understanding would be promoted.

But what happens? Both Mussolini and Stalin, Miss Zamenhof says, have seized on Esperanto as a medium for flooding neighboring countries with military and social propaganda.

Maybe "trickling" would be a better word than "flooding," in view of the small number of people who know Esperanto. But it is a small straw added to the long list of evidence that ingenuity is not enough.

The world's desperate need today is not more tools, but more knowledge of how to use wisely the tools it has.

International Etiquet

Did you read about it? The exchange of speeches when Russia's new Ambassador to Germany presented his credentials to Hitler was utterly devoid of the customary expressions of burning affection and mutual devotion. There was almost a touch of chill in the air. The whole thing was completely lacking in sentimentality. The two didn't even kiss.

Things are coming to a pretty pass. Before you know it these modern diplomats won't even be bothering with touching gloves first; they won't even be waiting for the bell.

A device has been invented which rolls the dice automatically when you whistle. A thing like that's no good these dog days unless it does the whistling, too.

PHOTO-FLASHES

GOING, GOING—Marineland, Fla.—The only two porpoises in captivity are shown in their pool at Marineland, Florida's giant new aquarium which was recently opened.

CHECK YOUR HEART—Yes, before looking over this bevy of charming bathing girls, be sure and check your heart at the door.

MAN-MADE "EARTHQUAKE"—TUMBLES OLD SCHOOL INTO RUINS—Pasadena, Calif.—Pillars of old Benjamin Franklin High School here caught by the camera hanging in mid-air a split second before they crashed to earth in a thunder of broken masonry, during wrecking operations recently. The building was erected in 1903.
