NO. 65

## BUSINESS IS TO REACH NEW PEAK THIS YEAR

AUSTIN, Feb. 3.—As 1941 gets well under way, Texas business is experiencing a boom that, a University of Texas economist predicts, will take it to an all-time peak before many months.

Dr. F. A. Buechel, statistician for the University's Bureau of Business Research, computes the index of general business activity for December at 106.3, or 5.6 points above December a year ago.

This level places business 6.3 points above the average month of 1930.

Factors contributing to this composite index are employment, up 5 points; payrolls, up 6 points; freight loadings, up 5 points; runs of crude oil to refinery stills, up 14 points; department store sales, down 2 points; electric power consumption, up 8 points.

Dr. Buechel said rising payrolls and increasing farm cash income were largely responsible for the high business tone, and these coupled with defense expenditure of the federal government in Texas would soon push business activity to a new high level.

Other business factors tabulated by the Bureau revealed 1940 was much more prosperous than 1939:

Charters: 1,282, capitalized at \$25,138,000, compared with 1,419 capitalized \$22,445,000 in 1939.

Failures: 287, with liabilities of \$6,952,000 compared to 299 with liabilities of \$4,675,000.

Building permits: up 10.3 per cent over 1939. For December, permits were up 77.9 per cent over December, 1939.

Fatal receipts: up 5.3 per cent over 1939.

Purchases of savings bonds: up 11.5 per cent over 1939.

Electric power consumption: up 2.2 per cent over 1939.

Cement: production up 1.3 per cent over 1939.

Automobile sales: up 19.7 per cent over 1939.

## Banquet Dates Set By Neighbor Cities

The Chamber of Commerce has received announcements and invitations for the president and secretary to attend the annual banquets of the Abilene and Brownwood Chambers of Commerce.

The Abilene banquet will be held at the Wooten Hotel, Abilene, Monday evening, Jan. 10, at 7 o'clock and the Brownwood banquet will be on Thursday, Feb. 13, at 7:30.

Maj. Gen. Claude V. Birkhead will be toastmaster of the Brownwood banquet, Maj. Gen. Walter H. Krueger will be the principal speaker and Lt. Gen. H. J. Brees will be guest of honor.

## Texas Has Become a Big Milk State New Survey of the Nation Reveals

NEW YORK.—Texas' important position in the dairy industry is vividly depicted in a new handbook issued by the Milk Industry Foundation. According to the book, Milk Facts, 1,443,000 cows valued at \$64,834,000 produced \$42,267,000 in cash farm milk income for Texas farmers in 1939. Production of farm milk in the state for the year totaled 1,966,000,000 quarts; creamery butter 37,575,000 pounds; cheddar cheese 14,362,000 pounds; ice cream 9,988,000 gallons.

The United States is one of the ranking milk using nations in the world with per capita consumption of fluid milk totaling 153 quarts a year, pictographs show. Milk and its products comprise over 25 per cent of the 1500 pounds of the principal foods consumed each year by the average American, the book says, with 45 million quarts of milk delivered daily to homes and stores.

Pictorial charts and figures show the importance of the milk industry to the country's economic picture and illustrate how milk costs less in the U. S. in minutes of labor. Diagrammatic charts illustrate how the annual milk supply of some 51 billion quarts is utilized.

Fluid or fresh milk for cities and villages providing the farmer's highest cash return, accounts for 29.9 per cent of the country's yearly production. Creamery butter takes 31.6 per cent, farm butter 9.2 per cent, while 11.7 per cent of the milk is used as fluid milk on farms where produced. In making cheese 6.3

## Claims Germans Aid Free French

Many German officers, formerly in the French Foreign Legion, are now serving with the "Free French" forces. So said Norman Kerry, star of the silent movies, when, as pictured above, he recently returned to the U. S. after nine years in France. He served in the Foreign Legion under Dutch name of Hendrich Van Der Kerry, won a decoration in fighting near Luxemburg.

## Relative of "Law West of Pecos" Is Colorful Figure

AUSTIN, Tex.—Few Texas legislators have as colorful a background as Woodrow W. Bean, 23, a distant relative of the late Judge Roy Bean, Langtry's "Law West of the Pecos."

Young Bean was born on a ranch near Sierra Blanca, 100 miles west of Langtry, where his father established a homestead 41 years ago. The father, James B. Bean, was a cousin of Roy Bean. James Bean, former Texas Ranger and border customs patrolman, died in 1920.

Woodrow Bean and a brother now operate the ranch that their father established, and the dark-haired, laughing young legislator frequently wears his boots to legislative sessions.

The Bean children, Woodrow, two brothers, and a sister, all were educated at Fort Worth's Masonic Home, and Woodrow was a member of that school's famous football team in 1933-35. He played with such later college stars as Allie White, Bob Cook and Paul Smith of Texas Christian University.

Representative Bean won his first political race. A week before the democratic primary at which he was elected, young Bean was married. After attending Masonic Home, he studied at Southern Methodist University.

## ARMORED UNITS GO TO SCHOOL AT FORT KNOX

By United Press  
FORT KNOX, Ky., Feb. 3.—Described as the cradle of the army's streamlined version of modern warfare, this one-time isolated army post in the heart of Old Kentucky is a teeming city of 25,000 soldiers and officers today.

The "modern" Fort Knox began on July 10, 1940, when the War Department ordered creation of an armored force and placed Major Gen. Adna R. Chaffee, a long-standing and ardent advocate of mechanized warfare, in charge.

On Jan. 31, the first class of 2,854 officers and men was graduated from the armored force school. The graduates were taught the methods of modern mechanized warfare and trained in tank operation, mechanics and specialized skills.

The 1st Armored Division has an authorized strength of 10,000 enlisted men and 2,500 vehicles of all types, including tanks, trucks, scout cars, mortar carriers, motorcycles, wreckers, trailers, ambulances.

Expenditures of more than \$7,000,000 in the past six months indicate the extent of the present expansion program of the mechanized forces. Godwin Field, airport at Fort Knox, was constructed at a cost of nearly \$1,000,000.

Training isn't what it used to be either. Two months after organization of the division, units were engaging in maneuvers, executing simulated attacks, and defending vital areas from "enemy" attacks.

The officers of the new fighting force are on their toes every waking moment, learning new methods, developing new tactics and technique and training men to the new ways of streamlined warfare.

The army admits that its armored division is similar in principle to the German panzer division but it hasn't blindly copied the German setup.

Major-Gen. Charles L. Scott, acting chief of the armored force during a recent illness of Gen. Chaffee, revealed that the army has been "busy with our own developments in mechanization for a number of years and the soundness of these developments has merely been proved by the fact that a similar German organization has attained success on modern battlefields."

"We may liken the armored unit to a spearhead directed at a soft, vital spot in the enemy's armor. When drawn forward into this vital spot, the sustained power behind the spearhead is the might of normal troops of all arms," explained Gen. Scott.

Present plans call for an armored force of 85,000 trained men. The armored force school here is so arranged that when one group of soldiers finishes one phase of instruction it moves to another section of the school and a new unit moves in.

Tank operation studies are held in two shifts, 72 hours a week. One shift operates from 6 a. m. to noon and the other from 1 p. m. to 7 p. m.

At the head of the armored school is Col. S. C. Henry, brilliant organizer and teacher. Plans call for the annual training of 21,244 enlisted men and 1,440 officers by 1942, according to Col. Henry.

## Breckenridge Wins Oil Belt Tourney

Breckenridge High School won the Oil Belt Basketball tournament Saturday night at Breckenridge after being defeated in the first round by Stephenville by a score of 29 to 11. Ranger lost to Brownwood in the first round by a score of 32 to 34 and then lost to Breckenridge in the second round 25 to 22.

Stephenville, after defeating Breckenridge, won from Brownwood 36 to 25 and lost to Mineral Wells 26 to 23. Mineral Wells and Breckenridge then met in the finals and Mineral Wells won by a score of 34 to 26.

Cisco did not enter a team in the tournament and Mineral Wells drew a bye in the first round to go into the semi-finals. James Townzen of Ranger was named on the all-tournament team and was presented an award for being one of the five outstanding players in the tournament.

## The Skies Get a New Star

Mrs. Ogilvie Druce, 76, who was the first woman ever to fly in a plane, pins the Women Flyers of America's official wings on Constance Moore, left, at the organization's Edgemere, L. I., airport. The Hollywood star says she will now realize her life's ambition in learning to fly.

## County Breeders Enter Jerseys In Ft. Worth Show

Fifteen Eastland County Jerseys have been entered for exhibition in the Fort Worth Fat Stock Show which will be held in March of this year. Most of these animals are owned by 4-H club boys and will be shown in the open classes, club classes, club groups, get of sire, produce of dam, and county herd classes, according to A. C. Pratt, assistant county agent. The primary object in showing these animals at this show is to have Eastland County represented in one of the major State shows. The results of showing Jerseys in the Fat Stock Show have been very satisfactory in former years and it is hoped that this year will continue to be the same.

Heading the list of show animals from the county this year will be It's Dreaming Pioneer No. 377801, a very noble bull sired by an imported sire and out of an imported dam, which has recently been purchased by the Eastland Chamber of Commerce for use in improving the dairy cattle in the county.

Another example not so much out of the usual is this: A widower who supports in his household his aged mother and his child 17 years of age is the head of a family, and as such is entitled to an exemption of \$2,000 and a credit of \$800 for two dependents.

## Rare Volume About Music Goes To Home

FARMINGTON, Conn.—One of the two known copies of what is believed to be the first instruction book on harmony published in the United States has been restored to the town of Farmington where it was published in 1779.

The book, titled "Select Harmony," was given to the Farmington Village Library by the Connecticut Historical Society, possessors of the only other known copy.

Etched copper plates, it is believed, were used to print the hymns used by the deacons when they "lined" them music for singing in the church. It was recalled that the "lining," or setting of the pitch, was arbitrarily decided by the deacon. One deacon's pitching was opposed by some members of the congregation.

One man, more courageous, or more musical, than the others sang the way he wanted. He was arrested and convicted of disturbing the peace.

## Cases Are Set For Trial On Feb. 5th

The following cases have been assigned by Judge Geo. L. Davenport of the 91st district court for trial on February 5th:

State of Texas vs. Lola Harrell et ux.

State of Texas vs. Pete Theous et ux.

State of Texas vs. W. W. Moore et ux.

## Cause of Death of Showgirl Is Sought

HOLLYWOOD, Feb. 3.—Officials today sought to discover an all but naked showgirl, who plunged to her death from the yacht of Arthur Hamburger, one of Southern California's wealthiest men, early yesterday.

## Your Federal Income Tax

Who Is Head of a Family?

For income tax purposes there can be only one head of a family. In addition to being the chief financial support, the head of a family must be related by blood, marriage, or adoption to his dependents, and he must have a legal or moral obligation to exercise family control over them and provide for their care. As such he is entitled to the same exemption allowed a married person—\$2,000.

There are some unusual cases under this classification. A single person, who supports and maintains in one household one or more individuals who are closely connected with him by blood, by marriage, or by adoption, and whose right to exercise family control and provide for them is based upon a legal or moral obligation, is the head of a family, and as such is entitled to the exemption allowed a married person—\$2,000. In addition he may claim a credit of \$400 for each dependent.

Another example not so much out of the usual is this: A widower who supports in his household his aged mother and his child 17 years of age is the head of a family, and as such is entitled to an exemption of \$2,000 and a credit of \$800 for two dependents.

Not infrequently a case like this is reported: It involves the support of an indigent adult by a single person who is morally and legally obligated to provide a home for this individual. In such a case the exemption as the head of a family may be allowed—the circumstances of each case are considered in making the determination. If the individual so supported is not financially dependent, even though the taxpayer maintains a common home and furnishes the chief support, the latter may not claim the exemption.

A taxpayer who supports in his home his minor children over whom he exercises family control is classified as the head of a family, even though the children may have an income of their own sufficient for their maintenance. If he does not support them, by reason of their own income, but does exercise family control, he cannot be classified as the head of a family.

## Former Ranger Man Killed in Accident

J. Harold (Hal) Avent, 40, of Cisco, formerly of Ranger and Brownwood, piano player in an orchestra, was killed in an automobile accident in Brownwood Sunday afternoon when his car was wrecked on the Brownwood-Rising Star highway after striking a hog.

Avent was enroute to Brownwood at the time of the accident. Survivors include his parents, Mr. and Mrs. J. C. Avent of Houston, two brothers and a sister. Funeral services were to be held in Brownwood Monday afternoon.

## Texas Youth Hurt While With RAF Is Honored at Austin

AUSTIN, Feb. 3.—Ira Lee Sullivan, Hillsboro youth, wounded while flying with Britain's Royal Air Force, was commended today by the Texas House of Representatives for "superior patriotism and gallantry."

## Duchess's Face Is Lifted, Paper Says

NEW YORK, Feb. 3.—The New York Daily News stated, in a copyrighted article today, that the Duchess of Windsor had her face lifted sometime between Christmas Day and New Years Day.

THE WEATHER  
WEST TEXAS—Fair tonight and Tuesday. Little change in temperature.

## JURORS FOR 91ST COURT ARE PICKED

The following have been selected as petit jurors to serve during the second week of the February term of 91st district court, and are summoned to appear Monday, February 10th:

Raymond Gray, Rising Star; L. L. Gattis, Seranton; Edwin George, Ranger; E. M. Anderson, Eastland; Dick Woods, Gorman; H. N. Baldersee, Cisco; C. W. Blacklock, Ranger; Luther Cunningham, Gorman; C. A. Howell, Olden; W. F. Adams, Eastland; W. H. Jackson, Strawn; Eugene Fenner, Eastland; Ben Williams, Nimrod; J. E. Armstrong, Cisco; L. N. Williams, Desdemona; C. M. Carroll, Rising Star; D. L. Donoway, Cisco; Lewis Bargesley, Eastland; Dixon Boggs, Rising Star; A. J. Rogers, Ranger; M. R. Snoddy, Seranton; M. L. Brown, Pioneer; F. J. Harrelson, Cisco; C. L. Bigby, Eastland; D. L. Allen, Nimrod; J. R. Cox, Okra; R. L. Smith, Eastland; H. E. Reed, Rising Star; Roscoe Abbott, Cisco; Joe McNeely, Gorman; J. F. Boland, Seranton; H. E. Lucas, Gorman; J. B. Eberhardt, Rising Star; M. B. Chancellor, Cisco; M. E. Crossley, Rising Star; B. W. Courtney, Gorman; W. L. Baum, Cisco; W. F. Deaton, Ranger; Wayne Caton, Eastland; I. L. Pippen, Cisco.

## Chances of Death In Auto Mishap Are Greater Today

AUSTIN.—Your chances of being killed in a Texas traffic collision are greater today than they were a year ago. Col. Homer Garrison, Jr., state police director, said today.

The number of fatal accidents increased 6.37 per cent in 1940, but deaths increased 10.99 per cent, he pointed out. "This condition involves many factors," he said, "but it can safely be said that increased speed is the basic cause. With greater speed, and consequently greater force of impact, we find an increasing number of fatal collisions in which more than one person is killed."

Fatal collisions in 1940 increased 9.60 per cent in cities, 3.13 per cent in small towns, 5.24 per cent on highways, and 7.11 per cent on country roads. Fatality increases were: cities, 11.64 per cent; small towns, 9 per cent; highways, 7.09 per cent; and country roads, 27.65 per cent. Half of the increase in country road fatalities was accounted for by the Hidalgo County truck-train collision which killed 29 persons.

Total fatal accidents increased from 1,389 in 1939 to 1,487 in 1940, while fatalities rose from 1,583 to 1,757.

## Color of Fire from Bombs Tell British Experts the Nature of Target

WASHINGTON.—Great Britain's aviators who carry out assaults on German territory, are able to tell fairly accurately what they hit by the color of fires set by their bombs, military experts here report.

Royal Air Force communicators have placed special emphasis on the color of fires observed after a bombing raid. For instance, after a recent bombing raid on Bremen, the official communique reported 18 red fires and two many white fires to count.

According to experts here, the red fires indicated oil tanks and the white fires denoted ammunition dumps that were hit.

A double check system is used to enable intelligence officers to determine with a fair degree of accuracy just what has been hit. Aviators were instructed to report factually the color of flames that arose when the objective was hit by bombs, and not to give their personal opinions.

Reports of the colors are made in regular reports, and are turned over to intelligence officers who correlate various reports of attacks on the same vicinity. Using the reports as a guide, and checking them against various establishments known to be located in a given area, intelligence units are able to state what was struck and what was missed.

The color of flames, experts said, depends on temperature and the chemicals in the objective.

If a white flame arises, a dump of smokeless powder, such as bulk TNT and picric acid—main Ger-

## BRITISH SMASH ONWARD IN ERITREA AFTER THE FALL OF NEW POSITION

### Would Place Ban on Naval Strikes

Strikes would be barred and closed union shops would be outlawed in any plant engaged in naval defense work if Congress okays the drastic bill recently introduced in the House by Representative Carl Vinson, above, of Georgia, chairman of the Naval Affairs Committee.

### Garnier Declines To Address the House

AUSTIN, Feb. 3.—John Nance Garnier, who began his political career in the Texas House of Representatives, later becoming a congressman, speaker of the house and vice president of the United States, today declined an invitation to address the Texas Legislature.

Garnier, in explaining his reason for declining, stated that he had made a policy against any public speeches of any kind.

### Sabotage Measure Offered In House

AUSTIN, Feb. 3.—Bills to punish sabotage, to levy a highway use tax and to require drug stores to make detailed reports on liquor sales were introduced today in the legislature.

One bill was passed and 20 new ones were introduced, including one by Rep. Lon E. Alsup of Carthage to punish sabotage or treasonable conspiracy by a fine of \$10,000 or a 10 year sentence in the penitentiary.

### Youth Is Buried At Colony Sunday

Funeral services for Bill Eugene England, 17, who died in Ranger Friday night, were conducted from the Colony School Sunday afternoon at 2 o'clock, with Rev. H. B. Johnson, pastor of the First Christian Church of Ranger conducting the services. Interment was in the Colony cemetery.

The youth was born in Ranger Feb. 22, 1924 and had lived in and near the town all his life.

Survivors include his mother, Mrs. Myrtle Skinner, two uncles, William Skinner of Littlefield and Fred Skinner, Gober, Texas, and two aunts, Mrs. Eula Thornton, Paris, and Mrs. Josie Byrom, of Oklahoma.

Active pall bearers were Billie Brown, John Hatcock, Henry Limbecker, Noel Whitley, Royce Wheat, Johnny Wheat, Garland Satterwhite and G. W. Moore.

Funeral arrangements were by Killingsworth's.

The British Army has smashed half way across Eritrea, it was reported today, and is pressing its campaigns along all fronts against the Italians in East Africa.

The hard-hitting forces occupied Barentu yesterday, it was revealed in a communique today, after following up the capture of Agordat, an important rail center on the route of Asmara and Massawa.

Italian troops which defended Barentu retreated toward Tole and it was believed that they might be trapped without a feasible way to escape from the mountainous Eritrean wilderness. Some 8,000 fascists were believed to be involved in the fall of Barentu and the retreat toward Tole.

On the Libyan front the British consolidated preparations for an attack against Benghazi, the last Italian stronghold in Eastern Libya remaining in Italian hands.

The British admiralty reported that Italian prisoners lost their lives when a German or Italian plane attacked a merchant ship on which they were being transported on the Mediterranean Sea.

British planes smashed at German invasion bases in Northwest-Eritrea before dawn as continued patrols were made up, designed to impede the German preparation for an all-out offensive against the British Isles. German bombs fell on London in Nazi hit-and-run attacks today.

Meanwhile the Germans were encouraging the French opposition party and a full-fledged Franco-German crisis appeared to be in the making.

The Greeks reported that Italian counter-attacks had ended. All other fronts were quiet today.

### British Aid Bill Passes First Test In House Today

WASHINGTON, Feb. 3.—The British Aid Bill won its first test in the House of Representatives today when the members of the House approved, by a voice vote, a rule for three days general debate.

The debate on the measure began immediately with a plea for passage of the measure by Rep. Sol Bloom of New York, democratic chairman of the House Foreign Affairs Committee.

Bloom described the measure as the "best way to safeguard our land and our liberty."

### Court Upholds The Wage and Hour Bill

WASHINGTON, Feb. 3.—The United States Supreme Court today upheld the constitutionality of their age-hour law, the latest and one of the most bitterly contested of the new deal reforms.

## Think Fast, Uncle Sam, Think Fast!

There is always time to be right. The United States is today in much the position of Captain Flagg in "What Price Glory" when Sergeant Quirt flung at him the exultant and challenging "Think fast, Captain Flagg, think fast!"

On the "lease-lend" bill we must think fast. But that does not mean that we should not think at all. There is time to be right.

Nothing, either in speed or clarity, is gained by savage verbal pyrotechnics assailing all who would alter the bill as interventionists already wading in blood up to the hips.

There are perfectly earnest, sincere men and women on both sides of this argument, and to impugn their sincerity is not the best tactic for their opponents to adopt. This is serious, far too serious to permit sacrificing accuracy on the altar of a wisecrack—as Senator Wheeler did when he referred to "plowing under every fourth American boy." It is far too serious to answer every criticism of the bill with a piercing shriek of "Appeaser! Appeaser!"

Coldly, wisely, and quickly, the American people must approach the problem laid before them here. This is definite, practical. It is of no service to salve conscience by mentally and verbally backing aid to Britain, and then opposing in action and in detail every proposal to make that aid more effective. It is of no service to wish we could render aid without risk of war—it is crystal clear that the only course entailing no present risk is to cut off aid completely. Few would wish to go so far. On the other hand, as new means of extending aid are devised, and that aid becomes a greater and greater factor in the struggle, the risk of being involved increases. This weighing of more effective aid against greater present risk, this weighing of less effective aid against greater future risk, every man must do for himself.

Debate, as long as it sticks strictly to the subject, as long as it contributes to clearer understanding of the issue, is good. For instance, there seems excellent grounds for limiting the extended presidential powers to a definite time, subject then to renewal. That makes it clearer that Congress is delegating its own powers temporarily, but retaining them permanently.

But filibustering, senseless delays, personal abuse, the calling of purple names, serve no good end.

We do not want to set this course unthinking and driven, in European style. We want to think, think fast, then act!

They took seven stitches in the head of a Miami swimmer because he failed to use it.

Foreign names are barred for Jap bars and tea houses. We wonder if they still eat off of china.

## Unknown Man Is Hero of Bardia Lecturer States

By United Press  
AMARILLO, Tex.—A comparatively unknown Englishman by the plain name of Charles E. Glubb may well take major credit for the fall of Bardia.

That statement was made by Count Byron de Proreok, internationally prominent archaeologist, explorer and author, who believes that Glubb may emerge after the war as a more renowned person than Lawrence of Arabia.

Proreok, who spoke recently at West Texas State Teachers College, said Glubb marked the route and led the Anzaes and British Tommies through the desert to attack the Italian garrison of Bardia from the rear. It was this surprise attack, more than anything else, Proreok said, that brought

about the fall of the Fascist desert base. "The Italians couldn't conceive," he said, "that the British forces could penetrate the desolate country lying south of their fortified city. Yet Glubb led those forces through the desert with all the ease of a tourist guide in the larger cities of this country."

Glubb has lived most of his life in Africa and the Near East, Proreok said, and is highly respected by the natives.

"He is doing the same work accomplished by Lawrence in the last war, and doing it better," the count said. "He is much more human than Lawrence; his association with the Arabs has not made him the silent, brooding figure that Lawrence became."

The handsome Frenchman predicted a full-sized revolt in Ethiopia—even before the first indication of rebellion struck this nation's news wires.

"The Ethiopians are a proud

people and their resentment against their conquerors has reached the explosion point," he said.

Other comments by Proreok: Of Marshal Graziani, commander of all Italian forces in Libya—"I have met Graziani often and respect him as a desert fighter against natives. But he has none of the understanding of native beliefs and customs that such British leaders possess. Not knowing how to handle the natives, he uses force. In the Ethiopian campaign he punished troublesome villages by taking their chiefs up in an airplane and dropping their bodies in the town square. That's why they call him 'The Butcher.'"

Of General "Electric Whiskers" Bergonzoli—"Bergonzoli has brilliant red whiskers that stand straight out from his face when he is mad—which is most of the time."

Of a possible peace move by Italy—"Even the decent element in Italy—the intellectuals, mili-

## Ranger NYA Team Is Victor Over Colony Independents 36-30

The NYA boys' basketball team took a close game from a Colony Independent team by the margin of 36-30 last Friday night.

The game was very rough and fouls were called on each team, none of the players left the game from that cause.

For the victors, Adams and Boldt collected 12 and 11 points, respectively, while Poyner was high for Colony with 11.

The NYA led at the half time period by a score of 14-13. The referee was Sharp.

NYA	Fouls	fg	ft	tp
Adams	1	6	0	12
Perrin	2	1	4	6
Boldt	2	5	1	11
Dunlap	1	0	1	1

## Doctor Says Women Have Longer Life

By United Press  
DETROIT—Do men live longer than women?

Dr. Arthur B. Elliott, cago, says no. Scotching t old theory about the "surv the sexes," Dr. Elliott tol bers of the Michigan State cal Society at a convention that women are less em intense than men and, quently, have a better ch survival.

"Women live longer higher percentage die of not connected with their pressure," said Dr. Elliott.

dog catcher is past in Health Officer Sumner M. is an effort to erase the attached in the public mind job, has changed the title catcher to "Canine Contr ficer."

# "MEAT FOR OUR ARMIES? WE HAVE IT!" Say West Texans

OVER 21 million cattle, sheep and goats roam the Texas ranches and farms. Ample meat, plenty of warm wool for American boys in the ranks.

Texas Electric Service Company is proud to serve a great section of this stock-producing area—West Texas.

Proud to furnish vital power for great ranch communities and busy packing plants... Proud to have a part in helping Texas furnish our army-navy's meat supply.

Just as Uncle Sam knows he can depend upon Texas for ample meat supply, so is the nation's electric power already prepared to play its part in the defense program.

## ELECTRIC POWER HAS ALSO DONE ITS JOB

Electric power is ready now to supply vital power for army camps, landing fields, airplane factories, munition and chemical works, power for refineries, pumping oil wells or busy packing plants—every new and present industry for defense.

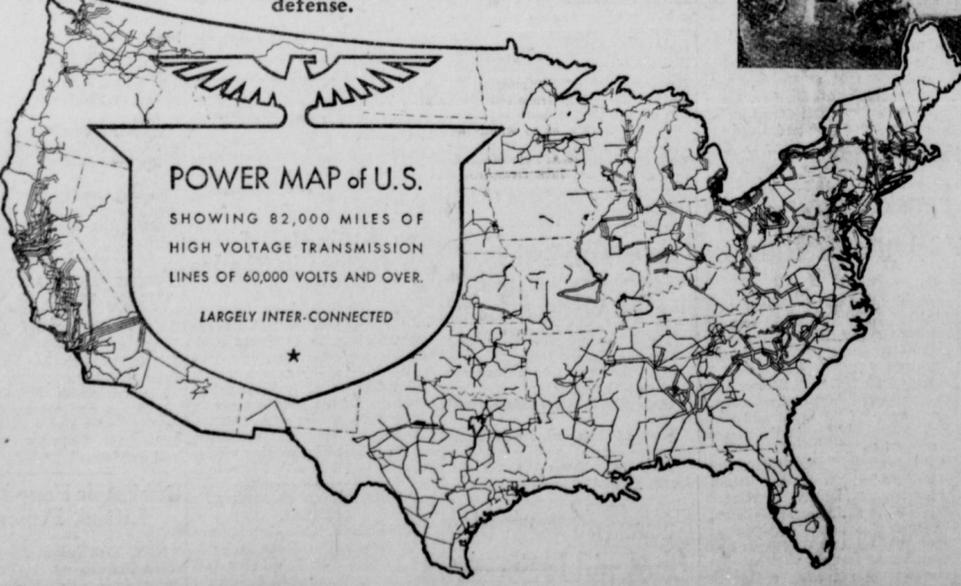

We are proud that Uncle Sam finds us prepared.

Our Company, along with other interconnected electric power systems of the nation, represents an industry with investments of fourteen billions—a sum equal to America's present appropriations for national defense.

We are grateful that we planned ahead, that little, if any, of Uncle Sam's vital defense money need be set aside now for increasing the nation's electric power facilities. National defense money can be spent for meat and wool, tanks and ships, shelter and planes—the vital things needed for national defense.

Americans can well give thanks that electric power is already prepared.

## MRS. ERNEST HALKIAS HONORS DAUGHTER WITH BIRTHDAY FETE

The Halkias home was a scene of celebration Thursday afternoon when a group of small friends met to honor Mary on her birthday. Music, singing and readings was enjoyed by the young guests.

Centering the dining table was a large sugar plum tree and the huge birthday cake which held 10 lighted candles. "Happy Birthday" was sung by the guests on entering the room. A shower of lovely gifts was presented the honoree.

Ice cream and cake with little heart shaped mints were served to Larene Ferguson, Joy Collins, Jan Spalding, Earlann Williams, Joyce Lou Armstrong, Jackie Williams, Beth Hurt, Betty Jo Coghlan, Doris Ann Calloway, Betty Sue Brinkley, Mary Katherine Hoffmann, Annetta Loy Frish, Gwynn Hibbert, Naomi Woods, Juanita Duffield, Betty Jean Roberts, Dorothy Marie Sims, Don Hart, Conner Van Hoy, Jack Horn, Lewis Crossley Jr., Billy Jack Johnson, Deard Gene Jennings, Charles Perry, Tommy Matlock, Leon Nabors, John Hancock, Wayne Crossley, Billy Floy Hunt, Joe Wayne Lanier, Charles Lucas Jr., G. W. McBee, Dick Crossley, Virgil Rountree, Pat Crawford, Johnny Collins.

Mrs. Halkias was assisted by Mrs. Lewis Crossley, Mrs. Wm. A. Phelps, and Mrs. Ocie Hunt.

## MARTHA DORCAS CLASS REPORT

The Martha Dorcas Class of the First Methodist Church met with the president, Mrs. Ed Sparr, presiding, at the Sunday morning session. Mrs. I. J. Killough led the morning prayer.

Mrs. H. H. Durham brought the devotional prefacing the lesson which was taught by Mrs. W. P. Leslie.

Present: Meses. W. P. Leslie, Robert Ferrell, Ed T. Cox Jr., W. H. Mullings, Herman Hague, Ed Sparr, Roy Stokes, Clyde McBee, F. E. Burkhead, Geo. Cross, W. B. Harris, John Jackson, Jim Watzon, Frank Roberson, I. J. Killough, A. Edmondson, Annie Cook, Charles Fields, M. B. Griffin, Clint Jones, C. H. Parrish, W. A. Martin, Fred Davenport, Fred Hale, W. H. Davidson, Frank Castleberry, Gene Dulin, a visitor.

## It's a Good Trick if It Works

## Jaycees Meet At 7:30 P. M. Tonight

The Junior Chamber of Commerce will meet tonight at 7:30 at the Tesco Club, when routine matters pertaining to the club activities will be taken up.

It had been hoped that a representative of the Vocational Rehabilitation Division of the State Department of Education would be present for the meeting tonight, but the officials at Austin have advised that this representative will be unable to be here before Tuesday.

C. G. Fairchild of Fort Worth, area supervisor for the Vocational Rehabilitation Division of the State Department of Education, who handles adult cases only, will be in the city Tuesday at which time he will take up the matter of the Handycap-Hanky work being sponsored by Mrs. A. H. Johnson and the Junior Chamber of Commerce.

## Wild Hogs Routed By An Army Camp

**By United Press**  
MINERAL WELLS, Texas—The prospects of "army life" was too much for a couple of wild hogs living near Camp Wolters, so they moved to the Fort Worth zoo.

The two came from a ranch near the \$6,000,000 replacement project here. Lem Lamkin, ranch owner, knew that the army planned to build a firing range a few yards from where the hogs lived. He called game warden Roscoe Parks who caught the animals and gave them to the zoo in Fort Worth where they are now resting far from the hub-dub of army activity.

In colonial Texas, alligators were a real menace along the Gulf coast, workers in the University of Texas Library have found. Alligators often caught dogs at river banks, and eyewitnesses have recorded several instances of their catching and eating men and women, some even as they slept in their tents at night.

## Mr. Bonura of the Cabbage Patch

Zeki Bonura looks over big cabbages on his farm near New Orleans. Bonura's draft board has ordered him to report for physical examination. The board chairman says the Chicago Cubs' first baseman could ask for deferment until harvest time, but the slugger has not requested it and has not listed any dependents.

## Explorer Claims No One Has Really Reached North Pole

**MOLINE, Ill.**—Although several explorers have been honored for their exploits in attempting to find and reach the exact location of the North Pole, none actually ever reached it according to Commander Donald B. MacMillan, noted explorer.

Speaking before the Moline Elks club here, he denied that any explorer has stood on the exact north axis point of the earth, and expressed doubt that any man ever will. Peary came closest to the Pole and is therefore given credit for its discovery.

"It is too small," MacMillan said. "It is the exact point on the very top of the world which doesn't go around. It is like the very center of a hub cap—that point which does not move when the wheel turns around."

The Arctic explorer was one of the few men who lived through

**CHILDREN'S COLDS**  
FOR DIRECT RELIEF from coughing, phlegm, irritation, clogged air passages, misery of colds—rub throat, chest, and back with Vicks VapoRub. Its poultice-and-vapor action brings relief without dosing.

ALSO, FOR HEAD COLD "sniffles" mix a spoonful of VapoRub in hot water. Then have the child breathe in the steaming vapors.

## Mammoth Cave Has A New Labyrinth

**By United Press**  
WASHINGTON—A vast, untrodden labyrinth of Mammoth Cave in Kentucky, discovered by adventurous guides two years ago, has been surveyed by National Park Service scientists to prepare it for visits by the public.

The new caverns, containing fantastic crystalline formations, were discovered in the upper reaches of treacherous Roaring river. It will be open to the public next year.

Exploration of the caves was a laborious process since it first required 18 hours to enter and leave the labyrinth by the route followed by the discoverers. Boring and blasting operations to open a 201-foot entry shaft through solid rock were begun last May.

The shaft was completed late in December, allowing workers and scientists to enter the caves readily to make surveys and construct trails. The recent government investigations were to devise methods of preserving ancient geologic formations and guarding the safety of visitors.

The five-mile labyrinth contains an intricate system of avenues decorated with gypsum crystal formations which, the scientists say, surpasses anything of the kind known to man. It also contains a massive tavorite dam, believed to be the largest in the world.

Mammoth Cave, the National

## Eagles Fight Over a Fish Then Leave It

**By United Press**  
MUSKEGON, Mich.—Witnesses here watched three eagles engage in "aerial combat for a small fish they forgot finally to eat.
