

## POLITICAL WRITER SAYS ELECTION SYSTEM OF TEXAS NEEDS FIXING

By Harry Benge Crozier

AUSTIN, Texas.—It will always be interesting to speculate about many votes were lost to Mar Dies in the recent senatorial election because "scientific sampling" was being used in Texas. I counted him out before the polls. You can speculate about the effect of the scientific sampling on Jerry's vote. But there is no need to speculate on the fact that two dozens of other candidates were less than a splinter of the block of votes. It isn't even fair to say that a man's family will vote for him when he isn't going where in an election.

This bringing of public opinion to the laboratory for scrutiny to reduce it to a definitely known quantity is fascinating. It is helpful even in the guiding of a state's and a nation's policy. But it contributes nothing at all to a high hurdle to a runner in a state election. If not a right evil it is scarcely good citizenship.

There are a good many things wrong with the Texas election system. It needs a good going over. Perhaps the legislature would do well to hold a special session devoted to just two purposes; the purging of the primary election code and the redistricting of the state for law makers. If the opinion poll works in its present form it could be put to good service in a new and revised edition. Why not provide for legislation of scientific sampling of public opinion before a primary starts. One of the practical features of the Texas primary system is that it encourages an individual person to be the first to over his own tremendous strength.

It is a literal truth that in the dozen years in Texas men have come practically out of the work to run for office and up a tremendous vote that they had as politically important. Under a system that put them before instead of after the election would be fewer "dark horses" but more better horses more whole horses.

The old convention scheme was down in Texas. It would more shameful contrivance in an election than it was a century ago when it was a rumble down the Texas trail road now is as shameless as work and as great a reason on the people. It would be mighty wholesome public opinion would turn being the corpse in a dining laboratory and just for a take on the habiliments he surgeon and do a little opening on its own account for good of Texas.

## Free Milk Plan Is Urged On The U. S.

By United Press

BIRMINGHAM, Ala.—W. D. Dobbins, a Birmingham real estate man, is steadily building support for a plan under which every child in the country, under 14 would receive a free quart of milk each day.

The Dobbins proposal, which he hopes to have introduced in Congress as soon as some difficulties are ironed out, provides for an initial federal appropriation of \$600,000,000 to start operation of the plan—which he characterizes as a defense move.

He points out that 38 per cent of the first 1,000,000 draftees were declared unfit for military duty, largely because of malnutrition. Also cited are figures showing that 26 per cent of the nation's 45,000,000 school children are undernourished and liable to serious mental or physical illness.

He would have the Department of Agriculture issue "white stamps" similar to food and cotton stamps now being used, with which those under 14 could purchase not more than one quart of milk a day.

His slogan is "A quart of milk a day per child will make the cheeks of American children rosy, the pastures green and the farmers prosperous." Much of his support has come from agricultural organizations in the South and Middle West. He says, and they agree, that the expenditure under his plan would do at least 80 per cent of the good done in 1941 by the \$1,300,000,000 being spent for aid to farmers.

Sen. John H. Bankhead, D., Ala., has expressed approval of the plan, but that "it would be necessary to draw some kind of line between the needy and the affluent" children, all of whom would get the free milk under the original plan.

Other members of the state's congressional delegation, as well as out-of-state congressmen, have endorsed the proposal. Commenting on recent legislation to provide milk cheaply to school children, Dobbins said, "It's fine to provide milk for needy children after they get in school, but the greatest need for milk is from the cradle to the time children are old enough to go to school. It's then that their bones need the milk most."

## Here's Howitzers

Lightweight guns with a heavy punch are these 75-millimeter howitzers lined up at General Electric plant in Erie, Pa., being finished up for the U. S. Army. They hurl a 14-pound shell 9000 feet.

## Trucks Are Needed To Haul Vegetables

MINERAL WELLS, July 8.—A call for tractors to handle fruit and vegetables in this area was issued by the Chamber of Commerce in Mineral Wells, Monday. Paul Ord, manager of the organization stated that fruit and vegetables were going to waste for the lack of buyers and tractors to take the products to market. The building of Camp Wolters here and other defense projects in the South have called into service most available tractors, and men who formerly handled the fruit, vegetable, and watermelon crops here are now using their trucks in construction work, Ord stated.

Local growers have expressed the belief that a sufficient number of trucks are available to handle the crops, if they knew of the shortage of transportation in this area; and growers have requested the Chamber of Commerce to aid in publicizing the truck shortage. A bumper crop of vegetables, peaches and watermelons are now ready for a receptive market, growers reported.

## Town Rations Water To Aid In Defense

By United Press  
SELLERSVILLE, Pa.—A system of rationing water has been put into effect in Sellersville so that a factory making defense products can have a sufficient water supply.

A prolonged drought caused the borough's water supply basin to recede nearly 2 feet in a month. Household use of water was restricted so that the U. S. Guage Co., could obtain the 235,000 gallons it needs daily. The company makes gauges for airplanes, submarines and ships.

## Alameda Club Will Meet Next Thursday

The Alameda Home Demonstration Club will hold its regular meeting at the home of Mrs. A. H. Dean Thursday afternoon, July 10, at 2 o'clock. Visitors at the meeting will be welcome and all members have been urged to attend, if possible.

## Abilene Girls To Play Here Tonight

The Abilene girl team will pinch hit for Sweetwater at the local field tonight. Owing to illness of some of their players, the Sweetwater team is unable to fill their engagement with Eastland and a last minute substitute was found in Abilene.

This team is very anxious to wipe out the defeat they took in the opening game here. Abilene was the one that gave the local girls the toughest opposition in the Graham tournament last summer and is a much better team than their first showing would indicate. Gertie Snodgrass will very likely be on the mound and Belcher they have one of the best catchers to be found in this part of the state.

## ORE SLEUTHING GIVES DEFENSE VITAL METALS

By H. R. TATARIAN

United Press Staff Correspondent  
WASHINGTON.—U. S. Bureau of Mines officials report that a corps of 500 technicians and engineers is making "unhoped for" progress in the nationwide search for new sources of strategic metals and minerals needed in defense production.

In less than two years of exploratory work, they said, the experts not only have made detailed surveys of known mineral reserves but have discovered as well numerous new deposits of some of the most essential metals for the defense program. Much of the exploratory work has dealt with deposits of antimony, chromite, manganese, mercury, nickel, tin and tungsten found chiefly in Arizona, Arkansas, California, Idaho, Montana, Nevada, New Mexico, Oregon, South Dakota, Utah, Virginia and Washington.

Officials emphasized that the chief purpose of the nationwide study was to grade known metal reserves so plans for processing subcommercial grade ores could be made in advance of more pressing needs.

Surprising Discoveries Made  
But in several instances the work of the engineers was marked by the discovery of unsuspected ore deposits.

One of the most important of the chance discoveries was made in the Yellow Pine District of Central Idaho, where an extensive deposit of scheelite of high commercial value was found in the course of testing low-grade antimony.

Scheelite is a source of tungsten, so important a metal in defense that it has been placed under full priority control by the Office of Production Management. Tungsten-content steel is used almost exclusively in construction of machine tools because it retains its cutting qualities under extreme temperatures.

The survey of the low-grade antimony in the Idaho field was taken solely as a means of determining the amount available, but in its midst the engineers discovered one strata containing more than 50 per cent metallic antimony—more than valuable enough for ordinary commercial use. Antimony is needed in making bearings and in hardening the lead in bullets and high caliber rifle shells.

## Representative Of Air Line Visits In Ranger On Monday

Representing Southwest Feeder Airlines, Inc., W. H. McPhail visited Ranger Monday and met with representatives of the Chamber of Commerce and various members of the business firms of this city. McPhail explained the proposed operation of this new feeder airline and answered questions regarding the service that this air transportation would bring to the business interests and population of this community.

Southwest Feeder Airlines has at present an application for a Certificate of Public Convenience and Necessity before the Civil Aeronautics Board in Washington to operate a system of feeder airline routes to carry mail passengers and property. Such a feeder operation will bring direct air service to the local communities and will connect them with various terminal points which are already served by the larger trunk lines spanning the country. McPhail explained that his company would operate passenger air travel at a rate of less than 4c per mile, which puts air travel well within the average income. With this faster mail and express service, direct communication and shipping transportation is greatly speeded up, with the natural accompaniment of increased efficiency and saving in business transactions.

This city has been included as a point on the proposed system. McPhail pointed out that his company desired the cooperation of all the interests here in securing this airline transportation for Ranger. In preparing its case before the Civil Aeronautics Board, Southwest Feeder Airlines regards it as pertinent to include all specific information and data concerning the business interests and economic characteristics of this locality. This information is being compiled by the Chamber of Commerce.

The economic need for such improved transportation must be established beyond the possibility of doubt, and Southwest Feeder Airlines invites all business firms and interested parties to consider what direct air service to all points in the nation will mean to them, and how they can most benefit from the service it proposes to extend to them. Those interested in bringing the proposed service to Ranger, or who have contributing economic data, should contact the Chamber of Commerce or address Southwest Feeder Airlines, Inc., Sinclair Building, Fort Worth, Texas.

## Richard Whitney Is Granted a Parole

NEW YORK, July 8.—Richard Whitney, former president of the New York Stock Exchange, was granted a parole today from Sing Sing prison, after serving three and a half years of a five to 10 year sentence.

## Nazi Push Past Russia's Buffer

German troops have successfully bucked the buffer of territory occupied by Russia as a safety measure since beginning of World War II. Now penetrating or pushing past this zone, the Nazis face stiffer resistance from Red troops on their native Russian soil.

## Representative Of Air Line Visits In Ranger On Monday

## Santee River To Do Its Bit For National Defense

By United Press  
MONCK'S CORNER, S. C.—A slumbering river giant that meanders across South Carolina to the sea will soon contribute its mighty strength to the national defense program.

The river is the Santee, which reportedly has the largest flow of any stream flowing into the Atlantic south of the St. Lawrence. The huge task of diverting the Santee into 250-square mile reservoirs, which sprawl over five South Carolina lowland counties, is nearing completion.

The Santee will provide its first hydro-electric power in October—when the current electricity shortage in the Southeast is slated to reach its peak. By next March, the great slow-flowing river will reach its capacity output—700,000,000 kilowatt hours per year.

Cost 50 Million  
The Federal government has poured \$50,000,000 into the Santee-Cooper projects which is administered by the South Carolina Public Service Authority.

Using WPA labor, the authority has thrown up 56 miles of earthen dams and dikes to create two artificial reservoirs—Santee lake and Pinopolis lake—which will bottle and control the tremendous power generated by the river as it flows toward the sea. Santee lake covers 119,000 acres, and Pinopolis 70,000.

The basin area was cleared of timber and other obstructions at a cost of \$10,000,000. For construction of the giant power house and other facilities of the project, PWA made available a loan-grant totaling \$40,025,000.

Jobs for 12500  
The project has provided work for 12,500 men. One of the final construction phases before actual diversion of the river was started, was the construction of an 8-mile spillway dam—the world's longest—across the river.

Another important phase of the project was the construction of America's highest singlelift navigation lock—to boost river craft from a down stream canal to the reservoir level, which is 75 feet higher. This is expected to be an important link in the planned water route from Charleston to Columbia and Camden.

Completion of the project is expected to bring a boom to the area tributary to the Santee basins—an area inhabited by 2,000,000 persons dwelling in small but potentially important industrial cities.

The drainage area of the Santee and its lesser parallel, the Cooper, exceeds 15,000 square miles.

## Alameda Club Will Meet Next Thursday

NEW YORK, July 8.—Richard Whitney, former president of the New York Stock Exchange, was granted a parole today from Sing Sing prison, after serving three and a half years of a five to 10 year sentence.

## TWO CHARGES OF INTENT TO MURDER FILED

Charges of assault with intent to murder were being filed Monday by District Attorney Earl Conner against two men following an altercation at the Eastland airport Sunday. The parties charged, Justice of the Peace E. E. Wood stated, were in the act of making bond which was set at \$2,000 each.

According to information furnished the officers by witnesses, two Fort Worth men, one of them piloting his own plane, and the other—his instructor—who came along for the trip, landed at the Eastland airport before noon Sunday morning.

The owner of the plane left the airport and came to town, returning later with some friends whom he was going to take up for a ride. Up in the air about 1,000 feet the engine began to sputter and it was determined that the gasoline tank was empty.

The pilot who had been flying only a few weeks, was forced to make a landing, which he did without mishap.

Then he and the instructor set out to find out what had become of the gasoline, their search took them to a residence where the family that lived there was away. They found two men hiding in the house, who, when accused of stealing the gasoline, one of them admitted the theft and offered to pay for it. The plane owner refused the offer and said, "I am going to take you to the officers."

At this a fight started and the men in the house produced guns, one a shotgun and the other a rifle. In the final outcome the two were overpowered, their guns taken away from them and they were brought to Eastland and turned over to the officers.

The entire affair will be turned over to the grand jury, which is now in recess, for investigation, District Attorney Conner, said.

## Arsenal Is Alert For Saboteurs

By United Press

RAVENNA, O.—Army officers have announced plans to photograph and fingerprint 14,000 employees at the government's \$39,000,000 arsenal as a precaution against saboteurs and spies. "Criminals beware!" was the terse comment from Col. R. S. Chavin, arsenal commanding officer, as he announced the anti-sabotage precautions.

"A complete photographic and fingerprint record will be made and checked at Washington in the case of every employee," Col. Chavin said. "We are primarily concerned with safeguards against espionage and sabotage."

More than 7,000 laborers at the arsenal had been dismissed May 21 by the Hunkin-Conkey Co., contractors building the sprawling shell-loading project, after some 5,000 of their number staged a "wildcat" strike to enforce wage increase demands.

Most of the men were rehired and work was resumed with settlement of the strike after the arsenal's 14,000 employees were idle for five days.

## Abilene Girls To Play Here Tonight

The Abilene girl team will pinch hit for Sweetwater at the local field tonight. Owing to illness of some of their players, the Sweetwater team is unable to fill their engagement with Eastland and a last minute substitute was found in Abilene.

## GERMANS ADMIT BLITZ HAS BOGGED DOWN ON THE RUSSIAN BORDER

Janesapippin

If starlet Jane Frazee fills leading role in new film "Hellzapoppin" as well as she fills that crazy quilt bathing suit, she'll do all right in pictures.

## GERMANY HAD PLANNED BASE UPON ICELAND

WASHINGTON, D. C., July 8.—President Roosevelt took over military protection of Iceland yesterday, after a report reached him that the German general staff was considering attacking the island to obtain a base from which to control the North Atlantic shipping lanes, a usually well-informed source disclosed today.

United States naval forces are gradually supplanting the British garrison defending the independent island republic, which is but 180 miles from Greenland, 800 miles from the Norwegian wing of Germany's war front, and 2,500 miles from New York.

It had been reliably reported that Germany planned to seize the island, which the British have occupied since shortly after the fall of Denmark in the late spring of 1940, and to convert it into a naval base from which German raiders and submarines could prey upon shipping from the North American continent en route to Britain.

It is over these waterways that a majority of the war materials now being sent to Britain travel, and control of Iceland would give Germany a firm grip on the northern trade routes between the United States and Great Britain.

## All-Star Game Has Crowd of 58,000

DETROIT, July 8.—A crowd of 58,000 jammed the Detroit baseball stadium today for the ninth annual all-star baseball game between the National and American leagues.

The weather was cool and cloudy.

The score at the end of five and a half innings was American, League 1, National League 1.

Adolf Hitler's Russian blitzkrieg had bogged down today, before the withering fire of the Russian Red Army, which is conducting a strategic counter-attack along most of the long, 1,200 mile front.

The German communique admitted that the Nazi troops had made but few advances and said that only on the Southern sector, or Bessarabian Front, were the troops denting the Stalin Line defenses.

The official German News Agency, DNB, claimed that the Russian resistance west of the Dniester River had been beaten down, while Budapest claimed that the river had been crossed by Axis forces.

Despite the estimated high losses, Moscow indicated that the Nazis are striking with fresh power on the Leningrad sector of the Central Front. German attempts to head uproad to Moscow and Leningrad were repulsed today by Red Army counter attacks, the Moscow communique claimed today.

Both sides emphasized fierce fighting with the outcome apparently dependent upon ability to bring more and more reserves into the conflict.

German advances on the Bessarabian Front, with the cooperation of Rumanian and Hungarian troops, is partly discounted by the fighting further north on the main Ukrainian Sector, defending Kiev.

Great Britain's Royal Air Force pounded the German war industries and other targets as never before in day and night raids, following up a record-breaking night bombing attack on eight German cities. The Royal Air Force sent its biggest daylight force of bombers and fighters roaring over enemy territory again today.

The British suffered heavier air losses, totaling 15 planes, last night and today. The Germans claimed that they had downed 28 British planes in the last 24 hours. The higher number of losses indicated an increasing British striking force or it might have meant that the German air strength was being pulled back from the Russian front in an attempt to cope with the increasing air blows Britain has been dealing upon the industrial sections of Germany.

## Seven Eastland County Draftees To Sam Houston

Seven Eastland county boys and one Great Bend, Kansas boy, United States army draftees, left Eastland at 9:30 o'clock Tuesday morning for Fort Sam Houston, Texas.

These young men, who registered Oct. 16, 1940, were: E. Thomas Dabney, Eastland; Elton Henry Langford, Carbon; Fritz James Dabney, Eastland; Bruce Delmarter Starr, Cisco; Clark Frederick Roberts, Cisco; Thomas Landrum Gilmore, Ranger; Doy Thurman Reynolds; and Billie Howard Smartt, Great Bend, Kansas.

## German Colonists Killed In Battle In Panama Village

PANAMA CITY, Panama, July 8.—Twelve German colonists were reported today to have been killed in a gun battle with Panamanian police, in the village of Cotito, about 20 miles from the Costa Rican frontier.

## Public Enemy No. 2 Enters Guilty Plea

DALLAS, July 8.—Bond of \$10,000 was set today for Turner Hudson, who the Federal Bureau of Investigation had called "Public Enemy No. 2."

Hudson entered a plea of guilty to a Dyer Act charge filed upon him July 1, after he had been shot and wounded in a running gun battle with officers.

## Youth for Defense

The armed forces of the United States are being given a dip in the fountain of youth.

No longer will it be policy to induct into the services doddering oldsters from 28 to 36, to say nothing of 45. The Army, the Navy, the Air Corps need youth.

Modern war demands that, just as war has always demanded it. The quick reflex, the lasting stamina—those are youth's, and youth's alone. Further, today's training in the United States is for future emergency—how far in the future, no man knows. The younger the trainee, the longer his experience remains of value to the nation.

Every generation must make its own world. It is the young who have the greatest stake in what kind of a world it shall be, for it is they who must live longest in it.

Thus, while it seems shameful in a way that they should have to face the chance of being cut down in war before they have had a chance to probe deeply into the world's beauties (and its ugliness) it is also they who hold the long stake.

Some have argued that it is older men who should be sent out to the wars, since they have already drunk deeply at life's fountains and have so much less to lose. But it is by that very token that they cannot be entrusted with the future. To Marshal Petain, stumbling down the last remaining years of life, it makes less difference that France is only a painful and perverted stump of a nation, with nothing free and good to which it can look forward. A few years of tolerable comfort is all such a one is apt to ask.

That is not good enough for those who have a full life to live out. To exist as an atom of that death in life which is all any totalitarian country can offer, is not good enough. Freedom was made for youth, and it is fitting that youth should be called upon to defend its own.

In Germany, even the Nazi horror sprang from the ranks of youth. This was possible only in a youth already denied hope by economic collapse and political confusion. The only power in the world able to halt the drive of desperation born in German youth 20 years ago is the power of other youth that is yet free, activated not by despair and hatred, but by creative vision and hope.

The bridegroom who in June was ranting at dictators may wake up in July to find he married one.

Many a belle finds out that married life is just one wringer after another.

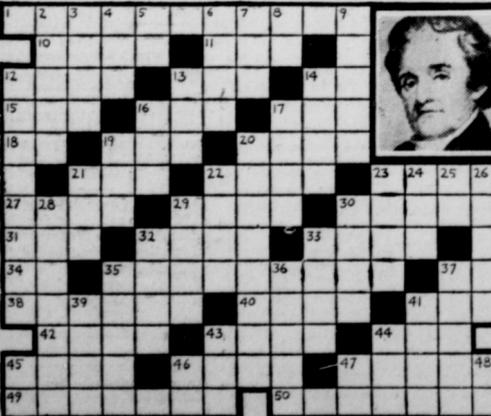

To use a couple of bowling terms, we wish they would spare us some of these strikes.

Just since June 15 we've discovered that there's no decrease in the sighs of taxes.

## They're at It Again!

## Cooking Mind of Men Is 'Single-Track'

By United Press  
EAST LANSING, Mich.—A man can cook equally as well as a woman, but his mind runs on a single track when he's near a kitchen, Michigan State College authorities report.

State's home economic department teachers, rated among the nation's best, say that a man invades the pot and pan sanctuary only to "whip out a specialty." The tedious business of preparing a meal—the shopping and peeling and cleaning—he invariably leaves to the "little woman," the educators say.

Prof. Marie Dye, dean of the home economics department, attributes this passion for a single concoction to the fact that cooking is relatively a new field for men and that it gives them a chance to use their imagination.

## HONOR SYSTEM FAILS

By United Press  
BERKELEY, Cal.—The University of California, after adequate trial, has abandoned the "honor system" of examinations which were conducted without professors being present. The student body president replied that "creating would never be eliminated until you cut out stiff competition for grades."

## OUT OUR WAY BY WILLIAMS

## RED RYDER By Hamlin

## ANOTHER MAN'S WIFE

BY DONNA ASHWORTH

YESTERDAY, a dance at the Farmington Country Club is an event for Ann. She has a grand time with Ken, meets new friends. Late in the evening a crowd arrives from Richmond. An elderly man sees Ann, rushes toward her, calling her "Jean." "I think I must be your father!"

**MARSHALL'S DAUGHTER**

CHAPTER VIII

It was the morning after the spring opening of the Country Club. Ann and Sally sat eating late breakfast.

"It was too exciting, Sally," Ann was bubbling as she sat drinking her coffee, looking much like a little girl in her crisp blue nurse dress, a blue ribbon around her head.

"Exciting! I'd say," Sally exclaimed with eager eyes. "Give me the details."

"Well, those people came in. I didn't know who they were, of course, and when we went into the ballroom, this man rushed toward me as we stood in the doorway. He is terribly good-looking. I can hardly wait for him to get here. He's handsome, with some gray in his hair, just like I used to dream my father would look, and he dashed over to me, calling me Jean. You know that was my mother's name, so they said at the home, and the note that she left was signed that way. And there he was, telling me I was crazy, asking Ken, 'I he were crazy, seeing a ghost.'"

"I told him I was Jean Ann Marshall, so what, and he says he's my father."

"Was everybody impressed? The Marshalls, it seems, have everything and always have had, and I gathered from the conversation that Father—doesn't that sound nice—was a sort of black sheep, went to New York and fell violently in love with my mother, who was a chorus girl. He married her, and when he brought her down here, his family were so snooty that she ran away. His mother must have been like Ken's mother, I guess." Ann's words tumbled out, as she hurried through her story.

"Mother was going to have me, but didn't tell them, she hated them so, and her husband, too, for not making them take her in, or something, and when I was born, she didn't tell them until long afterward. She wrote Father a letter telling him that he had a daughter whom she had named Jean Ann Marshall, but that he would never find her."

"He never saw my mother again and he had no way of tracing the child, so she had a complete revenge for everything. He mar-

ried again, later, and has two sons. The second wife is dead now.

"You ought to marry him, Sally. Wouldn't that be nice? You could be my stepmother, and you wouldn't have to work any more. I'll see what I can do. And he's coming. There's the bell now. Oh . . ."

SHE was on her feet, hurrying out, returning in a moment accompanied by a stranger.

"You're as beautiful in the daylight as you are at night," John Marshall said as he walked beside her. "My dear, I can't believe it is all true, but there isn't any question in my mind."

"It doesn't seem possible," answered Ann, her voice shaking a little. Yes, she would like this man for a father, or for a friend. "You don't know what it means to always want a family and never have one. It's just too wonderful."

"And this is Sally. She's pretending to be my aunt, though she isn't, and you mustn't ever tell anybody the difference. Sally will have to be on my mother's side—I've been most indefinite up to now, but now that the family tree has branches on one side, I'll have to begin to grow them on the other. But Sally is a piece of background I never had, and the finest person in the world. Sally, this is Mr. John Marshall, my father. I hope it is true that I can say that."

"I know it is true," John Marshall said. "I have talked to the people at the orphanage in New York. Everything tallies, even to the time that your mother wrote me, the name and all."

John Marshall sat down, but he couldn't keep his eyes off Ann. He drank the coffee which Sally served him, but all the time he was staring at his new-found daughter. "You're the image of your mother. I thought she was the most beautiful woman in the world. . . . Now I've found you. What are you doing down here? I was too excited to ask last night."

"The same thing my mother did, getting ready to marry a man out of my social level," Ann admitted. "I'm going to marry Ken Richards in June. I wanted to meet his friends, get acquainted."

"So I'm here, trying to be a lady, so that Ken's mother will accept me, that's the main idea. She laughed a little. "I'm telling you all my secrets, but they must not be told in Farmington. Ken made me promise that."

"He didn't have the courage that you had in bringing my mother

to your home 25 years ago. I'm afraid of his mother's people here, so we're playing a game of pretend for them. They don't know about that part gone."

"But it will be all right. You're my daughter, and does count here, as well as Richmond. You'll come over of course, you and Sally? boys are never home."

"The house needs a woman, it, too, though I am well taken care of. Aunt Marge the colored housekeeper, has there for years and years, looks after everything, but would be much nicer if you were there."

"Richmond," Ann spoke dully. "Things are just too big. I can't get used to it. I think I'd better stay here. I'm going to marry Ken so and I want to see him as I can. But we can come and forth. Sally and I will do it."

"Now I'm really Ann Marshall who has a family, a father, brothers and probably aunts and cousins. If you only knew I've dreamed of that." He was shining.

"Last night it happened like I'd dreamed it would. It was much more wonderful cause"—she met the eyes man beside her—"you're a nice, and like I'd dreamed father would be, too. . . ."

"ANN, darling!" The front slammed. There was sound of hurrying feet and Richards came dashing to the house.

"Isn't it great? Good morning, Mr. Marshall. Hello, Sally, everybody in town is talking you. I'll bet Mother has dozen telephone calls. And excited. There isn't anybody she thinks as highly of as does of the Marshalls. . . ."

"Oh."

Ann looked at him through that there was suddenly a little and there was something mocking about the set of his mouth.

"My name was Marshall before . . ."

"It isn't just the name honey; it's your being John Marshall's daughter. . . . It makes me really somebody."

"I'm just the same person I was yesterday," Ann admitted. "Except I'm happy now."

"But you don't understand. Mother has decided to accept you. She wants you to come to (To Be Continued)

# YOUR CHEAP ELECTRICITY

## MAKES SUMMER MORE LIVABLE

Have you ever counted the many ways that your economical electric service contributes to your comfort and happiness in hot weather? There are dozens of them, but just a few pennies a day for electricity is what it costs you to enjoy these modern conveniences that help banish many of the discomforts of hot days and nights.

Your favorite electric dealer will be glad to show you appliances which make summer more livable. If you are building or remodeling your home, make provision for electrical equipment that will bring you years of comfort and convenience.

**Electric Cooling Equipment** drives away summer heat and gives you cool, pleasant days and restful nights, even in the hottest weather.

**Electric Cooking** eliminates one of the unpleasant features of hot weather, because your kitchen stays cooler and you spend less time in watching food cook.

**Electric Refrigeration** makes summer meals more appetizing by providing you with cold foods and refreshing beverages, while actually saving you money.

**Electric Washers and ironers**, electric cleaners, mixers and other labor-saving and time-saving appliances save you from hours of hot, tiresome work.

**Yard Lights** supply a flood of illumination so that you can enjoy summer evenings outdoors, playing games, entertaining friends or just working around the yard.

**The Radio** helps pass away the summer hours, bringing you news and entertainment that takes your thoughts away from hot weather.

OUT OUR WAY

BY WILLIAMS

Ore Sleuthing—

(Continued from page 1)

deposits in Oregon and Montana assured the bureau that the nation's reserve of this metal, needed in making durable and rustless alloys, was far greater than previously realized.

The engineers reported that great supplies of manganese, indispensable in smelting iron ore, were found in Nevada, Utah, Arizona, Arkansas, California, New Mexico, Washington, Montana and Colorado. Most of the deposits, they said, were far below commercial grade, but could be used in event regular sources are depleted.

Surface exploration in the Bottle Creek district of Nevada resulted in the discovery of a mercury deposit of commercial grade. The bureau said work was under way on mercury properties at Coso Hot Springs, Cal., and in Pike county, Ark., although in neither place were operations considered sufficiently advanced to permit conclusions.

Mercury Uses Vital Mercury is essential in preparation of medicines and in making a special type of poisonous paint for ship bottoms which keeps the barnacle menace at a minimum.

The bureau reported it was currently exploring deposits in Montana and on Yakobi Island, Alaska, for traces of nickel, essential in making marine boilers, armor plate, and rustless marine instruments. Nickel also is under full priority control.

Considerable effort also is being made in exploration for tin, a metal almost non-existent in the United States but needed greatly for construction of bearings for high-speed machines and in making of metal cans for food storage. The experts said exploratory work was in progress on a tin deposit near Spokane, Wash.

UNION NEWS

Most of the farmers have their grain threshed.

Mr. and Mrs. W. C. McGough and daughter Glen, of West Texas, are visiting her parents, Mr. and Mrs. L. R. Nabors of this community.

W. W. Terry, who is in the City-County Hospital in Ranger, is not improving much.

Mrs. Jack Mace and daughter, Norma Ann of Brownwood are visiting her mother, Mrs. W. W. Terry.

Mr. and Mrs. Bud Fox have had Mrs. Fox's two sisters of Carbon as their visitors this week.

George Fox and family of Olden visited his mother, Mrs. W. U. Fox, Friday night.

The following were visitors in the W. W. Terry home Sunday: Mr. and Mrs. Harley Terry and daughters of Dickens, Mrs. Ellen Richardson of Ranger, and Mrs. Ada Jones of Eastland.

Rita Jones spent Monday night and Tuesday with her grandparents, Mr. and Mrs. R. F. Jones of Eastland.

Mr. and Mrs. R. L. Alford have finished working on their house and have moved home.

Norma Jean Lullen of Ranger has been visiting Jean and Ruby Fox.

Rozell Fox visited Juanita Fox Tuesday.

Mrs. Josie Gullet and Mrs. Jack Gullet of Kermit visited Mrs. W. U. Fox last Friday.

Several from this community have been attending the Church of God revival at Olden.

Mr. and Mrs. P. O. Woods are having their house painted this week.

Mr. and Mrs. Oliver Canet were shopping in Eastland Saturday.

Planning to Win the War After the War, Group Looks at Defense Let Down Problems

BY PETER EDSON NEA Service Staff Correspondent

WASHINGTON.—One imp that probably preys on people's minds more than the concern over what's going to happen to the United States in this war, is the worry of what's going to become of us after the darn thing is over.

Edson

You might think that consideration of this problem would draw a big crowd in Washington, or anywhere. But not more than 20 people turned up for the hearings. Maybe, after all, nobody cares what happens to the country after the war is over.

But a couple of rather important witnesses didn't think so. There was W. L. Batt, a director of OPM's production division and one of the two or three swingiest, all-out defenders among the dollar-a-year men in Washington.

Batt is practically lyrical on the subject. "If we tackle this problem of post-war demobilization of industry and manpower with an energy comparable to that which we are now devoting to the opposite process," he says, "we can build an economy and a standard of living the likes of which the world has never dreamed."

OUR DEMOCRACY

by Mat

HOME-LOVING PEOPLE ARE FREEDOM-LOVING PEOPLE. DICTATORS KNOW THIS, SO THEY TAKE LITTLE CHILDREN OUT OF THEIR HOMES FOR TRAINING BY THE STATE, AND THEY TEAR DOWN THE SANCTITY OF MARRIAGE AND MOTHERHOOD.

HOME-LOVING AND FREEDOM-LOVING HAVE AN EVER BROADENING BASE IN OUR DEMOCRACY, FOR THE NUMBER OF FAMILY UNITS PER THOUSAND OF POPULATION HAS INCREASED 15% IN 20 YEARS.

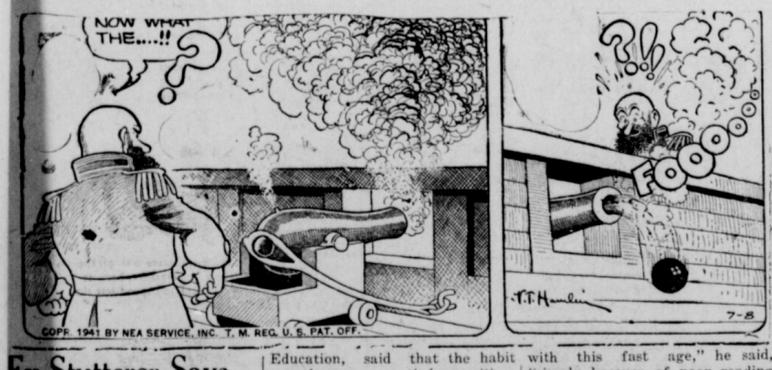

FRECKELS AND HIS FRIENDS

Study Is Directed To Personality CAMBRIDGE, Mass.—Scientific knowledge of human personality is a vital need in modern society, according to Dr. Arlie V. Bock, director of the Harvard University hygiene department.

### New Folk Dance Is To Be Taught

According to Maurice S. Orr, area supervisor of recreation, a new folk dance, "Herr Schemidt," will be directed at the American Legion "Night Recreation Program" tonight. This dance is fast becoming popular. In addition all the old folk dances will be directed. Also on the program for tonight are several special numbers. Connie Canaras, talented young dancer will render a number. She will be accompanied at the piano by Johnnie Lou Hart. Jesse Crawson, an NYA boy of Ranger who is a very popular piano player, will play.

### Material To Make Baskets Is Received

Maurice S. Orr, area supervisor of recreation, announces today that a new supply of reed for the making of baskets, serving trays, and such has been received. Mr. Bernard, who is the crafts director in charge asks that all ladies who are interested in making the above mentioned articles, come to the Craft Shop and take advantage of the reed. This material is furnished the participants at actual cost. Everyone is invited to come down and inspect the many beautiful articles that can be made in basketry weaving.

### Congress Approves New Loans By FHA

The Federal Housing Administration Title II applications on new and existing construction has been continued another three years from July 1st, congress having appropriated \$1,000,000,000 to take care of these Title II loans, according to information received by A. C. Simmons, local representative for a company handling FHA home building and buying projects. It goes to show, states Mr. Simmons, that with all the many billions appropriated by congress for defense, all thought of projects for the welfare of the people in the ordinary business of the day have not been overlooked by the administration.

### Peanut Stand Pays For Education

By United Press  
COMMERCE, Texas — Sales from a popcorn and peanut machine have enabled one youth to complete his education at East Texas State Teachers' College and are now paying for a second college education. Purchasing the machine four years ago, Vernon Farrow of Gilmer operated the goober stand during afternoons and evenings. On graduation last spring, he turned the entire business over to his brother, Jack, a freshman, who is now operating the business to pay for his education.

terms, we wish they would discovered that there's no

Devery Davis of Dallas spent the last week-end in Eastland visiting friends. Mr. and Mrs. Davis and Mr. and Mrs. Roy Pentecost left Saturday for Carlsbad Cavern. Mrs. W. B. Dunn of Fort Worth arrived this afternoon to visit in the C. L. Karkalis home. Mrs. Dunn is an aunt of Mr. Karkalis.

### THIS CURIOUS WORLD

By William Ferguson

**The BIGGEST BOMBS**  
DROPPED IN THE PRESENT WAR ARE LOGS. AS COMPARED TO THE GREAT ARIZONA METEORITE, IT WOULD HAVE WIPED BERLIN OR LONDON OFF THE MAP.

**WOOD IBIS**  
IS THE ONLY STORK COMMON TO THE UNITED STATES.

**QWINKODY**  
HAVE YOU AN "ODD" WE CAN QUOTE?

**THE SPANISH WORD FOR FEMININE "MASCULINE" IS MASCULINE, SAYS HENRY SEVIER, DAVIS, CALIF.**

### THE PAY OFF

BY HARRY GRAYSON  
NEA Service Sports Editor

**CUBS** finally have found a spot for Dizzy Dean and his \$105,000 worth of bum arm. It is in the third base coach's box, where the Once Great Man can help the customers forget Charley Grimm, who became quite a card through clever clowning. Dean can cut up a bit himself, though he may not be as subtle as Old Cholly. Grimm went to Milwaukee as vice president and manager in a new Chicago tie-up, and it wouldn't surprise some people on the North Side if the switch was a prelude to his return to Wrigley Field as head man. Grimm was tremendously popular. There was regret all along the line when he was kicked out three years ago. Jimmy Wilson, on the other hand, has not caught on too well in Chicago. Though he was the 40-year-old hero of the world series last fall, Wilson, the manager, suffers in comparison with the colorful Jimmy Dykes of the American League side. The Cubs dropped \$230,000 last year, which is precisely what the White Sox made. Things aren't any brighter for the Cubs this trip, and that is when Philip K. Wrigley usually thinks about making a change.

**WASHINGTON** continues to rule the waves. Of the nine crews in the varsity race at Poughkeepsie, six were coached by Washington graduates. The non-Washington drill-masters were Hube Glendon of Columbia, Ned Ten Eyck of Syracuse and Allen Walz of Wisconsin. Yale obtained the jump on Harvard years back by importing Ed Leader of Washington, and the Crimson didn't catch up until they brought in Tom Bolles from the same institution. Pennsylvania, little Marietta on the Ohio and other school sporting shells are guided by Washington men. There must be something in that Husky stroke.

**IN** his first picture, "Kid Tinsel," Billy Conn launches a one-man campaign to make actors look like fighters.

**BOB DUNKAR**, an Indiana pitcher, is trying out with Brooklyn and, as someone remarked, he should have a good sinker to go with a name like that.

### Draft Doesn't Hit U. T. Summer School

AUSTIN, Tex.—University of Texas officials, expecting a drop in summer school enrollment because of the military draft, got a mild surprise. Enrollment declined 404 from last summer, but 212 of that number were women. Total summer school enrollment was 4,616. That includes only 192 fewer men than in 1940, but 212 fewer women. Graduate school enrollment is 1,424, a decline of 369 from last summer.

### 300 Youths Given Drivers Licenses

AUSTIN, Tex.—More than 300 Texas youths between 14 and 16 years of age have been granted driver's licenses under authority of county judges, it was announced today by State Police Director Homer Garrison, Jr. Colonel Garrison said the latest tally showed 304 such licenses issued, as provided by the new drivers' license law, and that the number is increasing rapidly. Those from Eastland County who obtained their first licenses were: Emerson Junior Hallenbeck, Route 2, Eastland; Orval Lee Russell, 1125 Sinclair, Ranger; Harvey Leonard Todd, 602 1-2 W. Commerce, Eastland; Doris Jean Sterling, 402 W. 11th, Cisco; David Lee Jameson II, 302 S. Austin, Ranger.

### Californians Like Eggs From Texas A Sales Record Shows

AUSTIN, Texas—Californians like Texas eggs, it seems. One out of every fourth Texas-laid egg "exported" to other states goes to California, a University of Texas Bureau of Business Research report shows. Out of the equivalent of 288 carloads of shell eggs shipped to other states during May, 78 went to California, the report reveals. New York and New Jersey each took 29 cars, Illinois 22. Egg shipments continue to rise, gaining 82 per cent over May, 1940, bureau officials said.

### Whipping Post Is Urged For Minor Crime Punishment

By United Press  
HUNDRED, W. Va.—Dr. E. W. Rose, 79-year-old newly elected mayor of Hundred, believes a whipping post is just the thing needed to preserve law and order in this tiny community. "It would put a stop to all this drinking and petty stealing," the mayor said. "When you put a fellow in jail you feed him well and that doesn't stop stealing and drinking. Take a fellow out and whip him and then you'll stop it."

### Train Didn't Stop At Mexican Border So He Is In Jail

DALLAS, Tex.—The trouble was, Gregorio Rodriguez told immigration officers who arrested him for illegal entry into the United States, that the train didn't stop at the border. Rodriguez explained that he had hopped a train in Mexico, expecting to travel within his own country, but that the train failed to stop when it reached the border. He said his trip across the line was entirely unforeseen and involuntary. The officers lodged him in the county jail. If we have gasless Sundays, perhaps the back-seat driver could be accommodated if the family bought a tandem bicycle.

# Building

## bring sales volume to every line of business..

Did you think that the only ones who profit financially from building a new home were the builders? They do profit considerably, but so do the workmen, and the lumber supply companies and their employees—in fact, everyone, who has any direct contact with the building, profits. They all have money to spend for their needs.

Of course, the home furnishers and landscape gardeners and decorators make direct sales to the homeowner who owns the new home. But the businesses that profit the most are those who sell merchandise and services to the workmen, the architect, the furniture store delivery man, and all the others who take part in helping to build and furnish a new home. In turn the butcher, the baker, the grocer, and the laundress are able to buy new clothes from the man who lives in the new home.

That is business.

You can prepare to get your fair share of all this business by planning an intelligent and thorough advertising campaign. Advertise in the Eastland Telegram.

For help in planning a campaign that will bring you maximum results for minimum expenditure, consult the Advertising Department of
