## Expect the Unexpected

It is fun to predict the future, especially if anybody takes your prediction seriously enough to read it. But it is unsafe, and a good many experts have already found this out to their embarrassment.

Therefore, this will be an editorial without a single prediction. We don't know what is going to happen in the next six months, or six years. And neither does anybody else.

If prediction of the results of a war were possible with any accuracy, it would really be unnecessary to fight the war. The factors making for victory would be so clearly and clearly stacked on one side that there would be no point in fighting at all. It is the fact that the result is uncertain that makes it necessary to fight it out to see who was right.

Americans tend to go on the easy assumption that the United States cannot possibly lose the war. That is quite a different thing from a firm faith and belief that we can win if we fight hard enough, that we must win if it takes our last cent, our last drop of blood.

The bland assumption that we are so big, so powerful, that we can't possibly lose, no matter what we do or do not do, is a fearful state of mind for people to get into. Obviously the Japanese think they can win; otherwise they would not have launched the war. The talk that it was all a desperate attempt to plunge the Japanese people into some strange form of Oriental suicide, is all nonsense. The Japanese military lords have laid their plans craftily, and, weighing their force against ours, they think they can win. Up to now, they have scarcely lost a trick; their raid on Hawaii, their campaigns in the Philippines and in Malaya, have been carried on with military efficiency, no matter what one thinks of their morality. They suggest that the Japanese belief in victory is not based entirely in opium smoke.

This is not talking defeatism. This is merely saying that future events are unknown; that in the nature of war things happen which no one expected; that there is nothing about the latent power or situation of any land, our own included that guarantees victory without the stern, efficient, determined fighting that alone brings victory.

We must have faith in ultimate victory that will carry us through whatever disappointments and setbacks await us (and they await all nations who engage in a major war). And we must have the courage to back up that faith in action, steadily, unrelentingly, until victory is achieved.

Mike Jacobs donated \$500 toward a bomber. We know of one bomber that hasn't done so bad by Mike Jacobs.

## MacArthur!

## Scrap Metal From Oil Industry Is Now Being Sought

DALLAS, Texas. — A drive to collect all the scrap metal and rubber of the Texas petroleum industry was launched today by the Texas Mid-Continent Oil & Gas Association. The committee will work with the operators as well as field superintendents and farm bosses to locate all scrap on the leases, in yards or at plants, and make these materials available for appraisal and purchase by scrap dealers and oil supply firms.

The campaign by sending their own scrap buyers to purchase the materials and send them at once to their own plants for reprocessing into oil field goods, he added. "In this way," Mr. Gibbons said, "oil field scrap can go back at once into manufacture of new pipe and other supplies vitally needed by our industry to meet war-time demands. The situation of some of the companies making oil field goods is already serious, with only a single day's supply of the necessary scrap on hand. Texas operators have hundreds of tons of scrap materials on their leases and in their yards and around their refineries. It is a patriotic service to the Nation as well as to our own industry to make these available for re-use. We are sure the Texas petroleum industry will co-operate to the fullest."

government's request to collect for re-use all the old iron, steel, aluminum and rubber which we have on hand," Mr. Gibbons said. "A chairman will be named at once for each important oil-producing county, with a committee made up of leading oilmen from each field in that county. The committee will work with the operators as well as field superintendents and farm bosses to locate all scrap on the leases, in yards or at plants, and make these materials available for appraisal and purchase by scrap dealers and oil supply firms."

## Nickel-In-Slot Gadget Inspires A Trainer For Army

CAMP BOWIE, Tex. (UP) — The same nickel-in-the-slot type machine that permits the firing of a beam of light at a moving figure—Hitler walking in a woods is popular—has been the inspiration for a valuable piece of army equipment.

Soldiers of a tank destroyer unit at Camp Bowie have created a device employing the photo-electric eye to use in an indoor range. So successful has it been in aiding the training of gun crews that Capt. Henry W. Moursund, commander of the tank destroyer units, plans to send data to other such army groups in camps elsewhere in the nation.

Soldiers were talking idly one day about the amusement machines when one suggested that the light beam principle would be useful in army camps for marksmanship practice. The upshot of the conversation was that one of the machines was obtained, the electric-gun device taken from it and mounted on a 37mm gun carriage in place of the barrel. Carefully and tediously, the combination real weapon-play gun was sighted for accuracy.

Twenty-five feet away the target—the figure of a man revolving through a woods—was set up, and gunners began their first practice in the essential art of speedily sighting a moving target. Firing a line of light instead of an explosive shell, gunners may determine precisely the degree of their accuracy. When the light strikes the photo-electric coil in the target's shoulder, a bell rings to show a bulls-eye for the gunner.

Speed and accuracy are factors in scoring hits on the moving target. Currently the device is set up to provide training in traverse manipulation of the gun. Master Sergeant Edward Windebank, Houston, who directed soldiers in the construction, now plans to mount the box containing the target on a small wagon with eccentric wheels so adjustment for elevation will be a factor.

Movement of the target can be regulated in three speeds. At its fastest rate, with the target only 25 feet distant, the men have calculated the movement to be equivalent to a tank moving at 100 miles an hour 1,000 yards away. Official training schedules call for one company to use the indoor range daily, with each gun crew getting one hour's practice. Actually, the soldiers crowd the recreation room, where the device

## Lawyers Pledge Aid For Civil Rights

By United Press  
JEFFERSON CITY, Mo.—Private citizens and soldiers alike can be assured the lawyers of Missouri will go to bat to protect their rights. Members of the state bar association, at the annual meeting has been set up, in off hours to continue the shooting. Even so, after-hours practice is supervised and records kept on all scoring. "Success of the arrangement has been most gratifying," said Capt. Moursund. "The men have become crack shots."

of the organization's standing committee's pledged themselves to offer free counsel in cases where citizens' civil liberties were in jeopardy. The national defense committee reported that organizations of lawyers would be set up in each county to give free legal aid to defense councils and other official defense groups and to protect rights of soldiers. The civil liberties committee declared its members would aid any citizen who came to them with a bona fide case of infringement of his civil liberties. Mother and daughter have a tougher time than a public accountant keeping their figures straight.

# Industry Recruits Own Army of Civilian Guards to Help Uncle Sam Foil Axis Spies and Saboteurs

## They Carry Out Plans Of FBI And Other Government Agencies

By ELEANOR RAGSDALE  
NEA Service Staff Correspondent  
WASHINGTON, January 24

**WANTED**  
Tough, active, fearless, guards and lots of 'em. To keep sharp eyes peeled in America's defense plants for saboteurs and spies.

THE above might be the sign hung out by hundreds of American war industries, power plants and airports, now that the United States is hard at war with Japan and the rest of the Axis. For the Number One problem in the nation's campaign against those war-twins, espionage and sabotage, is finding enough capable men to help carry out to the letter the carefully laid plans of the Federal Bureau of Investigation, the Army and Navy and the Office of Civilian Defense.

**GUARDS CAN'T BE TOO OLD**  
THERE are ex-service men and ex-policemen to hire, but they mustn't be too old. They must be alert enough and tough enough to use their guns—instead of running to the telephone, as a guard in one of the government agencies is reported to have done recently when he saw someone rifling an important file. They must be paid good wages to hold them against the pull of a higher industrial pay. Police forces, assembly lines, merchant marine, and the armed forces are all competing for the nation's active manpower. The railroad police are guarding the great trestles that carry overladen trains over the steel arteries. The regular police are recruiting hundreds of volunteer auxiliaries to help them with air raid and blackout patrol, and the guarding of reservoirs, gas mains, turbines, stations and factories. The army is detaching precious men to keep watch on military objectives.

"Tough, active, fearless guards..."

This new photo, just approved by the War Department, shows part of the "Lightning" P-38 assembly lines at the Lockheed Aircraft Corporation, Burbank, Calif. Protection of plants like this all over the country calls for more eyes and ears than the FBI, the Army and Navy have to spare. Hence, industry recruits thousands of civilian guards.

more subtle sabotage, such as applying a slow corrosive to the gas masks which would render them ineffective after a few weeks. **ARMY DEMANDS SPECIAL PRECAUTIONS** WHILE the FBI would only tell you what you should do, and leave it up to your combined common sense, self interest and patriotism to read you into compliance, the Army has a more cogent argument. It could say in effect, "Unless you put our recommendations into effect to a reasonable extent, we will cancel your army contract." The next step would be to call a meeting of plant executives, and edness tests and scrutinize your power plant. After surfeiting the entrances and key places to be guarded, they would advise what measures should be taken to put an FBI spokesman says the de- your plant in the best possible shape to resist bombs, arson, or yond our fondest hopes."

SERIAL STORY

TAMBAY GOLD

BY SAMUEL HOPKINS ADAMS

COPYRIGHT, 1941, NEA SERVICE, INC.

THE STORY: Mom Baumer sets up "Frederic" lunch wagon at run-down Tambay Plantation...

Angel did. It was right up his alley. "It's a pity there wasn't a man on the place that night..."

place so that I'll leave and never come back. Never!" He said very quietly: "Then it must never happen again, Cousin..."

THREE-CORNERED FEUD

CHAPTER XV

WHEN we came out I said to Juddy, "Does Angel know you've been married?"

"No." "Why not?" "What difference does it make?" she said.

I sure didn't. Shortly before Commencement a bunch of Chi Rho Gamma alumni came over for a weekend conference...

"RIGHT here at Tambay," he went on. "Several years ago. There had been a particularly brutal murder on one of the plantations..."

"It isn't Oliver's doing," Wat said. "The Student Council got onto it and put Angel on the carpet. Maurice Sears is alumni representative on the council..."

Everything was sweet and lovely till a whiskey old gazabo who looked as if he had been left over from the class of 1840 brought up the lynching.

"Who were the rescue party, Doc?" I said. "Ask Maurice Sears," he said. "Juddy left Angel and went over to Sears..."

COMMENCEMENT came and from the praying Negro's neck, and faced around with their pistols in their hands...

"There was one when I was in college, too," he said. "Tambay Tree was green then." Doc Oliver tried to shush him...

"Great-uncle Rantoul Maurice. He's right much of an old fire-eater and afraid of nothing on earth."

Angel landed himself a nice-paying job, being a summer resort mash-athlete—what they call a couple of hundred miles to the west...

I tried to switch the talk, but Angel crabbied it. He put on that cherub grin and said, "Ask Brother Sears." Maurice Sears darkened up...

"No, you couldn't. Am I yet—Or, I'll never understand you people! But, Maurice, I'll tell you one thing. If that ever happens again at Tambay I'll hate it!"

he had officially admitted the apparently permanent loss of positions on the peninsula. It was presumed that if Japanese pressure grows too severe...

REDS MARCHING

(Continued from page 1)

pore and Rangoon, and their defenses have become stiffer as the climatic battles develop to determine whether the enemy can finally break through.

present counter-offensive had carried 250 miles northwest of Moscow and to within about 100 miles of the old Latvian border...

Despite their already great numerical superiority—the entire 14th Japanese Army has been ashore for some days—the Japanese continue to land fresh forces in Subic Bay and along the western Bataan coast...

In any event, the gravity of the Japanese offensive in North America appeared to be in some danger as a result of Axis counterattacks directed by Nazi Gen. Erwin Rommel.

This drive, made since January 1, threatened to split the German front at Leningrad from the central front but, more important, it showed that the northern arm of the Russian pincers had advanced to a point northwest of Smolensk.

These landings, it was evident, constitute a flanking threat to MacArthur's main east-west positions which are presumed to run across the peninsula beginning on the east coast in the vicinity of Balanga.

Rommel struck back into the Agedabia sector after receiving aerial reinforcements, and has engaged the British on a triangular battlefield about 40 miles across the base, Agedabia, Antelat and Saunna were the corners of the triangle, south of Benghazi, and it appeared that the Germans were attempting to break up British attack preparations rather than beginning a big-scale counter-offensive.

had battered its way to within possibly 60 miles of Smolensk and if the pincers can now be closed the Axis forces on the central sector will be lucky if they are able to escape a huge trap and set up new lines on the Dnieper-Dvina front.

The Japanese moved warships up along the coast to support their landing efforts with bombardment of the U. S. defensive positions—probably strongly employed artillery batteries for the most part. They also were employ-

## Society, Club and Church Notes

**MEETING IN EASTLAND**  
Mrs. W. F. Hoag and children, Evelyn and Billy, of Odessa, are dining at the home of Mr. and Mrs. Earl Thorne.

**YEAR CLUB**  
The 50 Year Pioneer Women's Club will meet in the home of Mrs. T. M. Johnson Tuesday, January 27, it was announced this week.

**EASTLAND VISITOR**  
Miss Carrie McInnis of Llano, Texas is visiting Mrs. Anna Townend.

**LAS LEALAS HEAR PROGRAM ON SAFETY AND HEALTH**  
Las Leal Club held their regular meeting Thursday with a program on Safety and Health. Mrs. W. W. Chalker was hostess for the meeting.

Mrs. C. W. Geue gave a report of the Clubhouse board during the business meeting, and the club voted to contribute to the Frances Fisk Art Students Loan Fund.

**DISCUSSION OF EXRAY**  
A discussion of Exray in the infant world was given by Mrs. Maxey who illustrated her slides.

**PRESENTED AND SANG A GROUP OF SAFETY AND HEALTH SONGS**  
Mrs. C. W. Geue gave a review of Wm. G. Heiser's book, "Toughen America!"

**DAUGHTER VISITING JUDGE AND MRS. DAVENPORT**  
Mrs. A. E. Lindquist of New York City will arrive in Eastland Tuesday to spend several weeks with her parents, Judge and Mrs. L. Davenport.

**FOR HAWAII**  
Grubbs, son of Mrs. Frona, left this week for Los Angeles, California, and from there to Hawaii, where he is employed by the Hawaiian Construction Company.

**CLUB MORALE**  
The Music Study Club will be holding a "Welfare" party on Wednesday for the first time. The party will be held at the Clubhouse beginning at 7 p. m.

Hollis Bennett will bring a review of Edna Ferber's "The Sign of the Cross" during the program. A program of music will be given by the Dragoo Studio.

**BILL PAYING WITH A SMILE**  
By United Press  
HALSTEAD, Kan.—The Halstead Municipal Gas company in a campaign to collect old accounts, cut all January bills in half for consumers whose bills were paid up to that date.

## Music Study Club National Defense Program Thursday

The Music Study Club's National Defense Committee, headed by Mrs. Art Johnson, sponsored a program Thursday evening at the Service Club in the recreation center at Camp Wolters.

Presented on the program were Dorothy and Heidi Thorne, who did a novel song and dance number, with Mrs. Olney Black as the accompanist. She also accompanied all the others on the program for the evening.

Miss Maxine Francis, daughter of Mr. and Mrs. Earl Francis, who has been living in California for the past several years, was visiting here and was presented in a dance number on the program.

A duet baton twirling act was presented by Miss Johnnie Lou Hart and Miss Lois Larner. Miss Larner also did a lighted baton act. Patsy Ruth Huchingson gave a vocal solo.

## State Officer To Visit The Local Knights Of Pythias

Bryan D. Beck of Corpus Christi, Grand Chancellor of Texas Knights of Pythias, will spend Monday and Tuesday in Eastland and Tuesday night will meet with the Eastland Knights of Pythias Lodge, this being their regular meeting night.

Newly elected officers of the Eastland lodge will be installed at Tuesday night's meeting. These officers are as follows:

Clyde S. Karkalits, Chancellor; L. G. Powell, vice-Chancellor; Clyde Fisher, Prelate; S. L. Bourland, Master-at-Arms; C. S. Eldridge, Inner Guard; Pat Fisher, Outer Guard.

## Fifteen Hundred Cookies Is Goal

"Fifteen hundred cookies" is the goal set in the Cookie Drive started by the Music Study Club National Defense Committee, it was announced this week by the chairman, Mrs. Art Johnson, for the soldiers at Camp Wolters. The Committee puts out a call to the housewives and cookie bakers of Eastland to help in this drive to have this many cookies on hand by February 2, when they will be taken to the camp.

A full program has been planned for the night of February 2 in the Service Club at Camp Wolters presented by the Club National Defense Committee. The cookies will be served at that time.

All in Eastland who wish to do their bit in this drive are urged to do so.

It's easy to go to the head of your class if you're in a class by yourself.

## Political Announcements

This newspaper is authorized to publish the following announcements of candidates for public offices, subject to the action of the Democratic primaries:

**For District Clerk JOHN WHITE**  
Criminal District Attorney EARL CONNER, JR.  
For Commissioner Precinct No. 1 HENRY V. DAVENPORT  
For County Treasurer: MRS. RUTH (GARLAND) BRANTON.  
For County School Superintendent T. C. WILLIAMS  
For County Judge: W. S. ADAMSON  
For Sheriff: LOSS WOODS

## Everything Okay

Recovered from injuries received when he was hit by a truck months ago, Fritz Kreisler takes up his violin again and declares: "I feel like my old self... everything will be okay."

## Triumph of Jesus Over Temptations Gives Men Strength to Conquer Evil

Text: Matthew 4:1-11  
BY WILLIAM E. GILROY, D. D., Editor of Advance  
The story of the temptation of Jesus, about which much mystery has been attached, is easy of comprehension if we approach it with sufficient directness. Remember the true humanity of Jesus and keep in mind the characteristic temptations which have assailed those who were capable of great achievement and to whom was entrusted great power.

WE have here three temptations recorded—temptations coming at the outset of the ministry of Jesus, and at a time following a period of fasting when He was peculiarly subject to temptation. It would be a mistake to think of temptation in the life of Jesus as confined entirely to this early experience. As a matter of fact, we see the crucial temptation that came at the very end of His earthly life, when He prayed earnestly that the cup might pass and was tempted to renounce His mission, a temptation over which He triumphed in the prayer, "Not my will, but thine be done."

This early temptation, however, had a significance no temptation in an intervening period could have had. The decision in this hour of trial meant the complete acceptance of His mission and the vanquishing of the tempter.

In almost every life there is some great temptation the overcoming of which means a signal victory and the determination of one's character and course.

The three temptations of Jesus have a symbolic aspect, and they correspond to the temptations which come to the greatest and strongest. The temptation in His hour of hunger to turn stones into bread was the temptation to use His power for material and personal ends. It is the temptation to which many great men have succumbed, and their failure to overcome the temptation has meant the giving of their lives for self and self-aggrandizement instead of for God and humanity.

THE modern hangings, of course, are mock ones and this year's scheduled victim was Senator James J. Davis, but when he was unable to attend, the society picked on Leroy Miller, local radio entertainer.

## Horse Thieves Are Still Being Hanged

PHILADELPHIA.—The Union Society for the Detection of Horse Thieves and the Recovery of Stolen Property holds an annual luncheon—and a hanging.

This Montgomery County organization is 130 years old and numbers 300 members. Until 40 years ago when the automobile began chasing the horse off the road, it was a serious organization.

The modern hangings, of course, are mock ones and this year's scheduled victim was Senator James J. Davis, but when he was unable to attend, the society picked on Leroy Miller, local radio entertainer.

Guest of honor at this year's hanging was Harold G. Hoffman, former governor of New Jersey. He was met at the railroad station by a stagecoach provided by the society to take him to the Melrose Riding Academy, Melrose Park, scene of the celebration. On the way, Miller held up the coach and stole one of the horses. The society's "riding committee" set out in pursuit and soon apprehended him.

Judge Vincent A. Carroll, of Philadelphia, dispensing with the usual trial on account of the cold weather, declared the prisoner guilty. Just as the noose was put about his neck and thrown over a beam, somebody announced lunch and the execution was forgotten.

The society still uses a gavel and a book of minutes dating from the days when it was engaged in running down horse thieves.

## MODERN MENUS

BY MRS. GAYNOR MADDOX  
NEA Service Staff Writer  
AMID the U. S. O. meetings and war work, the prudent home-maker should give thought to her own family's health.  
Salads are a daily must for health. With winter curtailing the number of available raw fruits and vegetables, canned foods can be used to advantage as salad ingredients. They make excellent protective dishes.

**GRAPEFRUIT CRANBERRY SALAD (Serves 6)**  
One No. 300 can grapefruit, 1 No. 300 can cranberry sauce, lettuce, French dressing.  
Drain grapefruit from juice and chill thoroughly. Unfold cranberry sauce from can onto a plate; cut in six slices. Cut each slice with a star cookie cutter. Mari-nate grapefruit segments in French dressing. Arrange cranberry star segments on crisp lettuce and chic-ory.

**CHERRY AND CELERY SALAD (Serves 6)**  
One No. 2 can sour-pitted cher-ries, 1 package cherry-flavored gelatin dessert, ¼ teaspoon salt, ½ cup chopped celery, 1 small head lettuce, whipped evaporated milk or cream.  
Drain cherries; save juice. Pour 1 cup boiling or hot water, accord- ing to directions on package, over gelatin dessert; stir until thor- oughly dissolved. Add cherry

juice and salt; chill. When mix- ture begins to thicken, fold in cherries and celery; pour into large mold or individual molds; chill until firm. Serve on lettuce and garnish with whipped evap- orated milk or cream.

**STUFFED TOMATO-SAUERKRAUT SALAD (Serves 6 to 8)**  
Six to 8 medium-sized firm to- matoes, 1 No. 2½ can sauerkraut, 6 tablespoons olive or salad oil, 2 tablespoons lemon juice, 1 table- spoon sugar, ¼ teaspoon salt, ¼ teaspoon paprika, lettuce.  
Peel tomatoes, remove core from stem ends; scoop out centers. Drain sauerkraut. Mix together salad oil, lemon juice, sugar, salt, and paprika in bowl, beat with rotary beater. Pour dressing over sauerkraut; toss with fork until well mixed. Fill tomatoes with sauerkraut mixture and set in re- frigerator for 20 to 30 minutes before serving. Serve on crisp lettuce with thoroughly chilled ad- ditional sauerkraut mixture.

## Typical Sailor Is Blue Eyed And 23

NORFOLK, Va. (UP)—Offi- cials of the Fifth Naval District reveal that the typical American sailor has a high school education, is unmarried and is 23 years old.

He prefers playing baseball to any other sport and is one of the first to be found enrolling in the various specialist schools.

And, when he has done his hitch, usually goes back to his home town, applies the trade he has learned, settles down, marries and forgets about the sea—except on occasions.

They are the pride of the Navy, these typical American sailors, say officials.
