Conscience and Country

Once again the problem of the conscientious objector dramatically forces itself upon an America at war. Lew Ayres, popular and accomplished actor, goes to an Oregon camp to cut timber and clear underbrush rather than man a gun in the hour of his country's greatest peril.

Ayres' porfession of faith reads as the word of a sineere man who has long pondered what he well realizes may ruin his career. We have no reason to doubt his sincerity. Americans, however, may well doubt his reason-

"In my opinion, we will never stop wars until we individually cease fighting them and that is what I intendto do," Ayres explained. The first part of that statement may be true, but how apply it to the Japanese airmen who bombed Pearl Harbor? How apply it to the German panzer troops who overran Poland and amde people of that nation a "subject" race?

Would Ayres have retired to his California mountaintop home, lifted not a finger come invasion and cheerfully been assimilated into Nippon's co-prosperity sphere or Hiter's New Order? These ideologies certainly must be as repulsive to Ayres as is war itself.

Some may come to the defense of the actor with Samuel Johnson's "patriotism is the last refuge of a scoundrel," or George Bernard Shaw's "you'll never have a quiet world until you knock patriotism out of the human race." But, in By MRS. W. C. To You .. FROM THE FOUNDER OF THE J.C. PENNEY COMPANY

TREMENDOUS TASK LIES AHEAD OF US!

Today America is at war. Now, in wartime, because of the tremendous job ahead of us, we must learh again to work hard and to live simply—to put into the preserving of America what we once put into the building of it — to return to the old ways of Thrift and Savings that were the general rule at the beginning of this century.

We feel that the Penney Company is peculiarly well equipped to make a substantial contribution toward the Thrift and Savings of the nation - because the Penney Company knows from long experience what thrift is all about.

Thrift is nothing new to the Penney Company - it is our stock in trade. When the Penney business was founded, in 1902, hard work, and spartan living were the general rule. Our first little store in Kemmerer, Wyoming was dedicated to Thrift, and all through the years, as our business has grown, Thrift has continued to be our guiding principle.

THRIFT AND SAVINGS ARE A BIG PART OF THE JOB

The Penney Co.'s practice of Thrift and Savings is evidenced in everything we do: We buy for cash and sell for cash; we make no deliveries; we eliminate all costly frills and extravagances; we operate on an extremely small margin of profit per transaction; we buy at the source in the most economical quantities; we save at every turn! All this means that now when Thrift and Savings mean more than ever, it will pay you, it will save precious dollars for you, always to shop first at Penney's.

WE REDEDICATE OURSELVES, TODAY, ON OUR 40th Anniversary, to the service of America

We rededicate ourselves to Thrift and Savings. We rededicate our 1600 stores, which now stretch from coast to coast, to the great job of helping American families to

NEW YORK - Handicapping ighway transportation with uneccessary rules and extreme restrictions would interfere seriousy with the nation's war efforts, Proffessor Harry E. Stocker of the New York University, nationally known transportion authority, warns in a study just issued on the "Inherent Advantages of Motor Transportation."

"England took the false step when under peace time conditions she relegated highway transportation to an inconspicuous posi tion in the economics of the British Isles," Proffessor Stocker declared. "After the war began, she recognized her mistake and acted to utilize the inherent advantages of motor transportation to help win the war.

" When the inherent technical and economics advantages of moor transpotation are interfered with by unfair legislation, there a loss to the nation not alone n higher costs for transportation and restriction or destruction of superior service, but also in the ack of facilities for modernized mechanized warfare.

"To throttle highway transportation by unneccessary and extreme rules, regulations, priarities and prohibitions, might prove to be of the greatest dis-services which would be imposed upon the national defense efforts."
