

SAMPLE OF BALLOT FOR THE ELECTION

The following is a sample of the ballot to be used in the Democratic Primary election, to be held Saturday:

- For United States Senator: W. Lee O'Daniel, Tarrant County. James V. Alfred, Harris county. Dan Moody, Travis county. Floyd E. Ryan, Harris county. For Governor: Coke R. Stevenson, Kimble county. Alex M. Ferguson, Grayson county. Gene S. Porter, Bell county. Hal H. Collins, Palo Pinto county. Hope Wheeler, Tarrant county. Charles Lavergne Somerville, Dallas county. For Lieutenant Governor: John Lee Smith, Throckmorton county. Vernon Lemens, Ellis county. Virgil E. Arnold, Harris county. Arthur R. Miller, Dallas county. Harold Beck, Bowie county. Alton M. Mead, Cameron county. J. Dixie Smith, Harris county. Doss Hardin, Dallas county. Boyce House, Tarrant county. For Comptroller Public Accounts: George H. Sheppard, Nolan county. Clifford E. Butler, Harris county. For State Treasurers: Gordon Smith, Travis county. W. Gregory Hatcher, Dallas county. Jesse James, Travis county. Larry Mills, Dallas county. Harry McKee, Travis county. For Commissioner of the General Land Office: Nell Day, Eastland county. Bascom Giles, Travis county. For Attorney General: Gerald C. Mann, Dallas county. Jim F. Hair, Travis county. For Superintendent of Public Instruction: Charles J. Tergerson, Harris county. L. A. Woods, McLennan county. For Commissioner of Agriculture: J. E. McDonald, Ellis county. W. W. King, Sabine county. W. N. Bill Corry, Tarrant county. For Chief Justice, Supreme Court: James P. Alexander, McLennan county. For Judge of Court of Criminal Appeals: Harry N. Graves, Williamson county. Walter H. Strength, Harrison county. For Congress, 17th district: Sam Russell. For Associate Justice of Court of Civil Appeals, 11th Judicial Dist.: Clyde Grissom. For Representative, 107th Florial District: Cleve Callaway, Omar Burckett. For Representative, 106th District: L. H. Flewellen, June K. Hendricks, W. O. Coffey. For District Clerk: John White. For Criminal District Attorney: Earl Conner, Jr. Allen D.D. abney, Jr.

Morton Valley H D Club Met On Last Tuesday

The Morton Valley Home Demonstration Club met Tuesday, July 21, at the Morton Valley school house with the president, Mrs. Cecile Eubank, presiding. The meeting opened with the club prayer repeated in unison. During recreation period, a game was played with Mrs. Cluit Jones winning the prize. Roll call was answered with "Stitches for hems". Mrs. Josie K. Nix gave the council report. She stated the clubs in the county would have an all day recreation meeting in the Eastland Park, Wednesday, August 12. Each club is to present a stunt. Mrs. Clint Jones discussed "colors and helmets". The club voted to meet once each month. The next meeting will be September 1. Present: Mmes. Cecile Eubank, D. D. Franklin, Josie K. Nix, Clint Jones, W. E. Tankersley and Thad Henderson.

Motor Carriers To Have To Cut Miles

WASHINGTON, D. C., July 24.—The Office of Defense Transportation has amended its regulations covering private and contract truck carriers to provide, after Aug. 1, for a 25 per cent reduction in mileage, compared with the corresponding month of last year.

Jundice Reported Among Armed Forces

WASHINGTON, D. C., July 24 Secretary of War Henry L. Stimson told his press conference today 28,585 cases of jaundice had developed among army men between Jan. 1 and July 4, apparently resulting from the use of yellow fever vaccine.

- For Tax Assessor-Collector: Clyde S. Karkalits. For County Treasurer: Mrs. Ruth (Garland) Branton. For County Judge: P. L. (Lewis) Crossley, W. S. Adamson. For County School Superintendent: Homer Smith. C. S. (Clabe) Eldridge, T. C. Williams. For County Clerk: R. V. (Rip) Galloway. For Sheriff: John C. Barber, John S. Hart, Loss Woods. For County Surveyor: T. H. Landon. For County Chairman: Oscar Lyerla. For Commissioner, Prec. No. 1: H. V. Davenport. For Justice of Peace, Prec. No. 1: J. W. Cooper. E. E. Wood. For Constable, Prec. No. 1: H. M. Carleton. For Justice Peace, Precinct 2: Charles Bobo. R. H. (Bob) Hansford. For Constable, Precinct 2: Luke Hardin, G. J. Moore, Lon Tankersley.

GERMANS CLAIM ROSTOV HAS FALLEN, BUT RED ARMY FIGHTS BITTERLY

Informal Dress Brought By War And Summertime

HOUSTON, Tex.—The war and summertime are bringing informality in dress to Harris County employees.

County Tax-Assessor Collector posted a notice that girls may come to work without stockings. Most of them already were going hoseless because of the high price of silk and nylon.

County Clerk D. W. Miller also authorized the men working in his office to wear slack suits if they liked. Many of Miller's employees already abandoned neckties and long-sleeved shirts.

H. L. Washburn, the county auditor, set the pace for heat sufferers by appearing at his office during business hours in a low-neck, short-sleeved sports shirt.

The courthouse girls who formerly spent a good portion of their salaries on stockings, which snagged freely upon the building's ancient furniture, now are glamorizing with suntan and suntan lotion.

Burning Stubble Causes Erosion

COLLEGE STATION, Tex.—Burning wheat stubble may subject the soil to serious wind erosion and result in loss of AAA payments, the State AAA Committee advised Texas wheat growers this week.

Reports have reached the committee that stubble burning is being practiced extensively in some areas, Charlie L. Thomas, committee man and wheat grower from Pampa, declared.

AAA regulations provide that if a farmer permits his land to become a serious wind or water erosion hazard, the County AAA committee may withhold payments on the farm, Thomas explained. Burning wheat stubble lays the land open for wind erosion damage.

"Dry weather this winter might result in serious wind erosion damage on fields which have been burned over," he continued.

Weather conditions during harvest last year required that an abnormally heavy stubble and matted wheat stalks be left on the ground, Thomas said, so that some farmers found they could not work the land at all without burning. Good harvest conditions this year resulted in a normal stubble which can be plowed under.

Thomas reminded farmers of the tremendous wind erosion damage their land suffered in past years. He urged them to consider the costs they would bear in damaged land and loss of AAA payments if the stubble burning resulted in creating a wind erosion hazard.

Building Material Shortage Is Seen As Being Serious

DALLAS, Tex.—With orders for new Army construction in the Southwest now coming in at the unprecedented rate of \$5,000,000 each day, or at about five times the normal building rate for all purposes in this section, a strong appeal to the public and all public agencies to halt all non-war building has been issued by Col. Stanley L. Scott, of Dallas, United States Army Division Engineer, Southwestern Division.

"Shortages of lumber, nails, copper wire, concrete pipe, metal pipe, metal articles, sand, gravel, asphalt, Portland cement, steel, and other building materials are threatening to delay the training and equipping of the Army. Postponement of all non-war construction for the next three critical months is essential if the Army's construction schedules are to be met," he adds.

Marshal Timoshenko Apparently Intends To Make Big Stand Along Supply Routes From Near East To Moscow Over Which Oil And American Materials Are Shipped

Appeal Is Made To Keep Beef Supply In Smaller Cities

WASHINGTON, D. C.—Price Administrator Leon Henderson today appealed to the livestock and meat packing industry to maintain a supply of meats in all normal trade channels rather than to concentrate shipments to large cities where price ceilings are relatively high.

Arms Production Is Ahead Of 1942

WASHINGTON, D. C., July 24.—The joint United States-Canadian War Production Board reported today that the annual rate of munitions production in the country for the second quarter of 1942 was nearly four times that of 1941. Canadian production in the second quarter of this year was reported to be three times the rate at which it was manufactured in 1941.

A & M Officers Are Well Grounded In War Tactics

COLLEGE STATION, Tex.—Army officers graduated from Texas A & M College in the future not only will be well grounded in established military tactics but plans are now underway to train them in commando practices, according to Col. Maurice D. Welty, Inf., U. S. A., professor of military science and tactics and commandant at the college.

Lieut. Col. C. L. Capton, Inf., senior instructor in the infantry unit, R. O. T. C., has been placed in charge of the commando training and, with the cooperation of the college landscape art department, has designed a cross country course which should fit a soldier for most any hazard he might find in combat.

Log hurdles, 10-foot high fences to be sealed, barb wire entanglements, natural obstacles such as trees and thick underbrush, ascension bars, low bridges spanning creeks, other water hazards, culvert pipes some of which will have to be traversed on hands and knees and others on stomachs in snake fashion, swinging ropes to cross gullies and streams all of which will go toward physical training intended to toughen as well as train men who may be assigned to commando commands after graduation, have been incorporated into Col. Capton's plans. Students taking the military science courses, will be required to take the commando training as part of their regular drill periods. Work is to begin on the course soon and it is expected that it will be in operation before the end of the present semester.

New Parity Base Urged By Grange

WASHINGTON, D. C., July 24.—Albert S. Goss, master of the National Grange, today urged President Roosevelt to scrap the present farm parity system and to create a new parity base which will take into consideration labor and industry as well as farmers.

Stevenson Predicts 800,000 Vote Total

AUSTIN, July 24.—"At least 800,000" votes will be cast in tomorrow's Democratic Primary election in Texas, Gov. Coke Stevenson predicted today.

The Soviet Red Army battled for the Northern Caucasus today, but the Nazi high command claimed capture of the gateway city of Rostov on the north bank of the River Don.

Soviet Marshal Semyon Timoshenko appeared to be making his main stand, as indicated by Moscow dispatches Thursday, south of the Don. Waves of Axis assault troops were thrown back in heavy fighting along the river northeast of Rostov, where the Germans said that operations were in progress on both banks.

Loss of Rostov would be a heavy blow to the Russians, but it had been obvious that Timoshenko had decided against a last-ditch battle there and had succeeded in withdrawing his main forces for protection of supply routes for oil and for the defense of Stalingrad.

These forces apparently were striking back with the aid of reinforcements, American-built bombers and "tank busters" which Moscow said stemmed the enemy onslaught with large casualties.

On the southern end of the twin Axis drives toward the Near East supply routes, the British Imperial forces in Egypt were reported to be holding to their gains which they made in heavy fighting this week on all three sectors west of El Alamein.

The European air front was busy again during the last 24 hours, with the Royal Air Force attacking the German Ruhr and Rhine industrial sectors and shooting down seven of about 40 enemy planes that attacked England last night. But there still was no new indication that the Allies were pre-in Europe to aid the hard-pressed Russians.

Soil Resources Are Important For War Effort

COLLEGE STATION, Tex.—Only by full utilization of our great natural resources in the soil can we maintain full employment, full production and real prosperity, Fred Rennels, assistant administrative officer of the AAA in Texas, said in a talk at the Southwestern Chamber of Commerce Institute in Dallas. In discussing the relationship between agriculture and industry Rennels pointed out that industrial changes have required agricultural changes. He cited particularly the production of soy beans, which are used in so many ways by industry.

The farm lands of America can produce in abundance the food and fiber needed to supply everybody in America—and still we will have land left over which should be devoted to productive uses," Rennels said. "It is on the land that the farmers will grow the many crops which will be used by industry to supply the additional needs of the people. It is on the land that we must produce the crops to help feed and clothe those parts of the world which cannot produce enough for themselves."

The speaker discussed the uses to which a number of agricultural crops are put by industry, mentioning, besides soy beans, wheat, cotton, peanuts, milk, flaxseed, hemp, potatoes, rye, and sugar.

Injunction Permit Granted By Biddle

WASHINGTON, D. C.—Attorney General Francis Biddle announced today that he has authorized the filing of an injunction suit under the anti-trust laws to prevent James C. Petrillo and his American Federation of Musicians from prohibiting union members from making transcriptions and recordings for radio stations and other non-private uses.

THE WEATHER West Texas—Warmer in northeast and southwest portions. Cooler in extreme northwest portion tonight. Little temperature change elsewhere.

NEW TECHNIQUE FOR FIRE BOMB IS NOW GIVEN

New instructions, calling for a jet instead of a spray in fire bomb fighting were issued today by R. E. Smith, Director, Eighth Civilian Defense Region, including New Mexico, Texas, Oklahoma, Arkansas and Louisiana today. These instructions came as a result of exhaustive research by technicians of OCD and the chemical Warfare Service, U. S. Army, and represent one of a number of improvements in protective methods which have been adopted by OCD. "The new device differs in three important points from that formerly issued," said Mr. Smith. "We now recommend the use of a jet or solid stream of water on the bomb itself, rather than a spray of water; the value of sand for fighting incendiaries is minimized; and speed is urged in attacking the bomb with a jet as soon as it falls, rather than waiting for the permit reacting to be completed or for a burster charge to go off. This method has also been adopted in Britain and New Zealand. "We fully appreciate the fact"

Houston Now Has Dollar A Year Men

HOUSTON, Tex.—Now Houston has its dollar-a-year men. At the request of Sheriff Neal Polk, the commissioners court gave commission to 18 special deputy sheriffs, who will be paid \$1 a year by the county as watchmen and guards at railroads and war plants. Their main salaries will be paid by owners of the property they protect.

Roosevelt-Farley Fued Is Renewed

WASHINGTON, D. C.—A political fued between President Roosevelt and James A. Farley is blazing today with the New York Democratic gubernatorial nomination as the preliminary prize. The real contest is for control of the state's delegates to the 1944 presidential nomination convention.

Advertising Is Used To Stimulate Scrap Collection

DALLAS, Tex.—Nation-wide advertising is being used with daily and weekly newspapers, the farm press, trade papers, magazines and radio to stimulate the flow of scrap metals into war production. The industries of America are financing the \$2,000,000 advertising campaign and the Bureau of Conservation of the War Production Board is assisting in the concentrated drive for scrap material. "This campaign," said John L. Dellinger, regional conservation manager, "was undertaken by a group of the nation's leading industries, in cooperation with the Conservation Division of the W. P. B., and is closely integrated with the W.P.B.'s new national salvage program. The committee includes member companies of the American Iron and Steel Institute, which is concerned with assuring a continual flow of scrap metal into its plants, but is also using its advertisements to stimulate the flow of other needed materials. The immediate response of industry in setting up machinery for the campaign was particularly gratifying, in so far as it helped us to clear the tracks for an all-out drive to bring in the scrap." Although the current advertising campaign is designed to stimulate the immediate flow of scrap into war production, conservation officials emphasize that the overall scrap and salvage program is a continuing campaign throughout the war and it is essential that every ounce of scrap should be gathered for war production purposes. A dated drive does not mean that collection for that material will end at the time the drive ends; the scrap program and the war program are identical and inter-related.

FBI To Investigate Lynching Of Negro

WASHINGTON, D. C., July 24.—Attorney General Francis Biddle today ordered the Federal Bureau of Investigation to investigate the lynching of William Vinson, negro, by a mob at Texarkana on July 20.

Private Makes Big War Bond Purchase

O! Man! Froman!

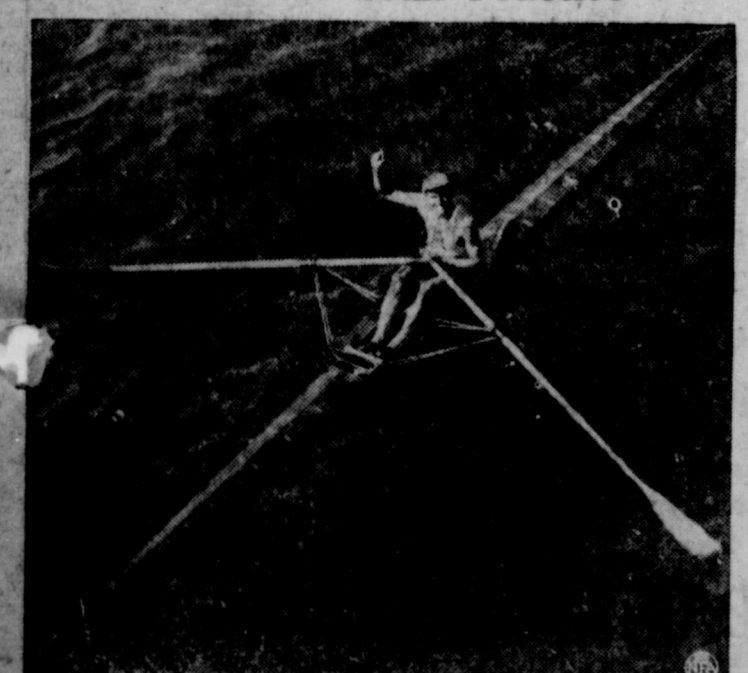

New photo shows television holds no terrors for songstress Jane Froman.

Recover Power Used In Testing Airplane Engines

SCHENECTADY, N. Y. (UP)—Thrifty use of gas turbines and airplane engines on the test block is pouring millions of kilowatt-hours back into war production. The acute need for every unit of power to drive machine tools makes the two developments important in the war effort, it is asserted by industrial engineers at a large local war plant. One system recovers power from the testing of airplane engines and is in wide use in their manufacture. The first power-recovery testing system was developed for Pratt & Whitney Aircraft. Natural and processed gas, the energy of which would otherwise be wasted, is harnessed by a specially designed turbine. During the 12 hours usually required to test an airplane engine, great quantities of high-octane gasoline are used. The testing under the new method produces correspondingly large amounts of power. One airplane engine factory in the Middle West, for example, recovers enough power from testing operations to supply more than half the amount necessary to operate the entire plant at maximum capacity. Instead of merely churning the air, the engines under test now turn over generators. Systems for recovering power from gas are used in petroleum refineries, manufacturers of carbon black and other users of natural gas.

Needs No Scull Practice

In his last competition before entering Navy Air Corps, Joe Angyal captures National Single Sculls Championship on Schuylkill river in Philadelphia. New Yorker also won lightweight single sculls dash and 145-pound senior single sculls.

After Election

Almost daily informed Washington correspondents report new phases of war effort which are being handicapped by politics and selfishness.

The tendency on the part of both administrative and legislative agencies is to "let it wait until after election."

For example, there is the tax program. The Treasury asked for a minimum of \$8,700,000,000. The House is providing \$6,250,000,000.

The missing \$2,450,000,000 is needed to help finance the war. Also, experts generally agree, at least this sum should be taken from the public to help avert inflation.

Congress is expected to provide the amount in a supplemental tax bill. Now? Oh, no. After election.

We can't possibly acquire or make enough rubber to supply our most pressing war needs from mid-1943 to around the middle of 1944. Unless tires now being worn out in pleasure driving are saved for war use, we are going to find ourselves in trouble.

Informed opinion is that civilian tires are going to be requisitioned—perhaps all, perhaps those in excess of five per motorist. Now—while they still have a lot of wear in them? Oh, no. After election.

If tires are not to be taken, the next best way to save them in part is thought to be nationwide gasoline rationing to restrict their use. That is seriously considered. Now? How about waiting until after election?

President Roosevelt outlined the essentials of a successful price control policy to avert inflation, and gave Leon Henderson the job. Two vital points were wage control and farm price control. It is becoming increasingly apparent that, to a limited extent at least, a reluctant Washington is going to be forced to do something about these. Now? No—after election.

The idea of politicians seems to be that by catering to pressure groups, between now and November, the politicians can be re-elected.

We doubt that it will work that way. We have a feeling that with American men on and near the fighting fronts, and other millions on their way, the people are more interested in winning this war than in preserving the old, soft ways of living.

Hitler isn't waiting until after our elections. Hirohito isn't waiting. Only our politicians are waiting.

If they continue to wait until after election, and if because of their procrastination this war is prolonged and thousands more of Americans are killed, we wonder how much they will enjoy the privilege of staying in Washington.

A lot of women have been tried and found wanting—everything money can buy.

The Payoff

BY HARRY GRAYSON
NEA Service Sports Editor.

OUR college kids are getting bigger and better and tougher. Statistics compiled at the conclusion of the first course in physical preparedness at Purdue more than a year ago, indicating that a distinct improvement in physical well being could be obtained, have been more than borne out by the results of the work in subsequent terms.

Purdue's pioneering and comprehensive course served as the model for similar efforts at many other institutions. In the original course, the average percentage of improvement in measurable events was 16.9. The cumulative effects of continued training has been more than evident since that time.

The average number of pull-ups of which students were capable at the start of the fall term last September was 4.89. By the end of the term, the number had risen to 7.96, and added work during the spring term pushed the average up to 9.65. Starting with a 15.77 average in the fall term, there was a rise to 23.15 in push-ups at the end of the first 16 weeks and to 27.5 at the end of 32. Jump and reach averaged 18.89 inches at the start of the fall term, reached 20.60 in January and shot up to 22.17 at the end of the spring term in May.

PURDUE'S physical education plant, indoor and outdoor, is in full use 47 hours per week.

Physical training was first offered on a more or less experimental elective basis with an enrollment of 223. It quickly grew into a full-fledged, compulsory credit course for all men above the freshman level.

Out of the male enrollment for the present summer term, 2067 go through their courses three hours weekly under the supervision of 14 staff members and 100 student assistants. Starting at 7 o'clock every morning, classes proceed almost without a break until noon on Saturday. It was necessary to schedule classes three nights a week in order to handle the large enrollment.

The first and last two weeks are devoted to pre-tests and post-tests on such measurable events as pull-ups, push-ups, jump and reach and the mile walk. Intervening weeks are divided into three main divisions—swimming, recreational and conditioning—each of four weeks' duration.

Local Athletes

Are Aiding In Cadet Training

ATHENS, Ga. —Texans who carried the Lone Star banner to the front in college and scholastic sports now are helping train the U. S. Navy's future pilots for a more vital victory in the greatest fight of all time.

Fifty-five Texas stars of recent and present vintage are Naval officers here in the athletic department at the new U. S. Navy Pre-Flight School. They were hand-picked to direct the cadets through a stiff three-months conditioning course, aimed at turning out physically-fit, competitive, alert youths for the actual flight training.

While the approximate 200 officers and instructors here at this southern school, one of the four established recently by the Navy, come from all sections of the country, the Texans are by far the largest single group. Virtually went through an indoctrination course at the U. S. Naval Academy before being assigned to active duty here.

The officer directory reads like a cross-section of "who's who" in Texas athletics, including men who were crack performers and leaders on Texas teams that captured championships on gridiron court, diamond, water, track and field.

Ten were active coaches in Texas colleges and universities before they entered Naval service. Thirty were coaching in the highly organized Texas Interscholastic League. Some such as Lt. Comdr. Ben Lee Boynton, athletic director and prominent Dallas sports figure, and Ensign Fred Wolcott, the great hurdler from Rice Institute, were engaged in business. A few, such as Ensign Bill Davis, recently of Texas Tech and the Chicago Cardinals, were professional athletes.

A review of their records is a picture of the sports deeds of the past two decades that have made Texas teams nationally famous. Practically every college and university is represented. Southern Methodist and Texas Tech have nine alumni each on the athletic staff. Texas Christian has seven; Baylor, five; Austin College, four with the others spread among the remaining institutions.

Included among Texans are Darrel Tully of Eastland and Bill Tipton, former coach of the Ranger Bulldogs. They are listed on the roster as follows:

"Ensign-Darrel D. Tully, East Texas State Teachers, 1939, coached at Dallas Tech High School and East Texas State Demonstration School, at Commerce".

"Assisting in the athletic direction, Lt. (j.g.) Lester B. Tipton, end on SMU's Rose Bowl Team. Another here from that eleven is Lt. (j.g.) F. C. Baccus, who has the post of head basketball coach."

Many employees are like certain processed coffee: 98 per cent of the active ingredients have been removed from the bean.

Confederate Home Will Be Opened To Visiting Veterans

AUSTIN, Tex. —The almost vacant buildings at the State Confederate Home will be opened to care for visiting Confederate veterans who stop in Austin on their way to attend the annual reunion of the Texas division, U. C. V., at Camp Ben McCulloch.

The visitors are expected to reach Austin the afternoon of July 29. All they need do is telephone 4882 and means will be sent to take them to the Home.

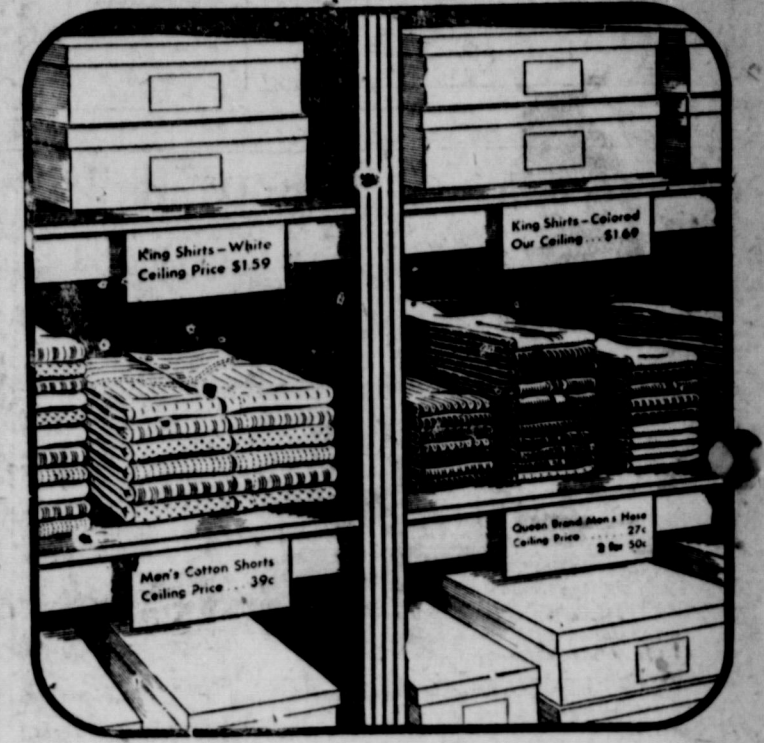

That night there will be a reception from 7 to 8 p. m. and the next morning they will be taken to the camp grounds near Kyle, Texas. Friday they will be brought back to Austin for a banquet in their honor.

Among those to be entertained at the home are the staff of Gen. T. C. Crenshaw of Houston, commander of the Texas division.

The veterans at a former meeting decided to ask that Confederate Pensions be advanced to \$50 a month. Present payment is \$25 but the few remaining veterans would not greatly increase the cost to the state.

It doesn't pay to be so busy doing so many things that you forget what you are supposed to be doing.

How to Display Ceiling Prices

Ceiling prices may be shown for a group of related items, such as shirts, having the same maximum price and stocked in one place in the store.

She's in the Army Now!

— and happy about the whole thing!

"They also serve who only stand and wait" is cold comfort for the American woman of 1942 whose fighting spirit and love for her country make her look with longing eyes toward the battlefield where her brother, husband, son or sweetheart is stationed.

Her chance to help is here! Besides her hours at the Red Cross, her production work at a factory bench, her job as Air Raid Warden or seller of War Bonds, she carries a little white ration book in her purse—badge of an American housewife who is re-arranging her menus to include less sugar, conserving gasoline by walking instead of riding and stands ready to accept with a cheerful smile any other restrictions that are necessary to bring Victory. Hats off to the lady—she's in the Army now!

For latest war developments on the home and fighting fronts, read the ads and articles in your home newspaper—

Local Athletes

BY PETER EDSON
NEA Service Washington Correspondent

SOME fascinating reports are being peddled around Washington about fearless American explorers, deep in the heart of—no, not Texas—deep in the heart of Brazil, looking for raw native rubber. They're supposed to be so deep in the heart of the Amazon country that shotguns have to be thrown in to them to be used for hunting their food. This jungle is so wild that the rubber explorers have to live off what they can shoot, it being too far inland for food supplies to be transported to them.

Edson

The anticipated happy ending to these stories will be that the fearless explorers, way back in some jungle never visited by white man before, will find a beautiful Shangri-La of rubber trees, supplying enough rubber to make tires for everyone. So optimistic are some theorists about this possibility that preliminary requests have been drawn up for priorities on 60,000 tin-cups to gather the rubber as it drips from the trees.

But wait a minute. There are still a few realists remarking pointedly that if this country is so remote, it might be a bit difficult to get the rubber out, even if the explorers do find it, which the skeptics seriously doubt they will. And this tin-cup priority business is typical of some of the fuzzy thinking still going on in high places. Brazilians have been gathering what little rubber they can find in gourd, for years, and there is no priority on gourds in the Amazon.

REALISTS in the raw rubber supply business doubt that there is enough native rubber in all Latin America to supply more than 30,000 tons, or less than one-half of 1 per cent of U. S. needs this year. Consequently, it is downright deceptive to lead anyone to hope that there is any immediate or eventual solution to the rubber shortage in the woods of the western hemisphere. Department of Commerce statistics show that the best yield of Brazilian rubber ever obtained was \$5,000 tons a year when the price was \$1.50 a pound. Top price today is 39 cents, and there is no enthusiasm for going out and getting it at that price. Such rubber as is produced in Brazil has three possible outlets, under present world shipping conditions: Brazilian manufacturers can grab it for home consumption, it can be exported to the United States, it can go out the back way, through Bolivia to the Argentine. Brazilian rubber export figures for the month of May, 1942, latest figures obtainable, tell this story. Total production of Brazilian rubber that month was 2000 tons. Of that, 1150 tons went to Brazilian rubber manufacturers, 250 tons came to the United States and the rest went to Argentina. Argentine buyers got over twice as much as the United States did, and the Argentine is the most active competitor this country has, all over South America.

In the face of this situation, the pressure from some government sources on Uncle Jesse Jones and his Rubber Reserve Corporation, to finance a lot of rubber plantations in Latin America, is said to be terrific. It takes eight years to get production from a newly planted rubber plantation. In the face of certain U. S. synthetic production within two years, in the face of restoration of the Dutch East Indies and Malayan supply at the end of the year, no one but a sap would be interested in taking this gamble.

Boll worm control experiment conducted by the Bureau of Entomology and Plant Quarantine on the W. F. Neale Farms, in 1941, near Waco, Texas.

Agricultural Teachers To Meet July 28 And 29

STEPHENVILLE, Tex. Plans have been completed by J. B. Payne, Supervisor, Area IV, Division of Vocational Agriculture, and the faculty of the Division of Agriculture, John Tarleton Agriculture College, for the Area VI annual conference of Vocational Agriculture teachers, which will be held at John Tarleton Agriculture College, July 28th and 29th.

New Technique-

(Continued from Page 1.) that the public has been thoroughly educated to the spray technique, but our experiments and study of recent British experience have made it absolutely necessary to change our thinking in this regard. The jet method is much quicker and more effective. We now know that it will save of essential food, feed and fiber commodities vital to the war effort.

more lives and more property in the event of a raid. That is the only sound criterion for judging the matter. 'It has been found that in the old procedure undue emphasis was placed on the danger of the small magnesium bomb and not enough on the danger of fire,' Smith said.

OUT OUR WAY

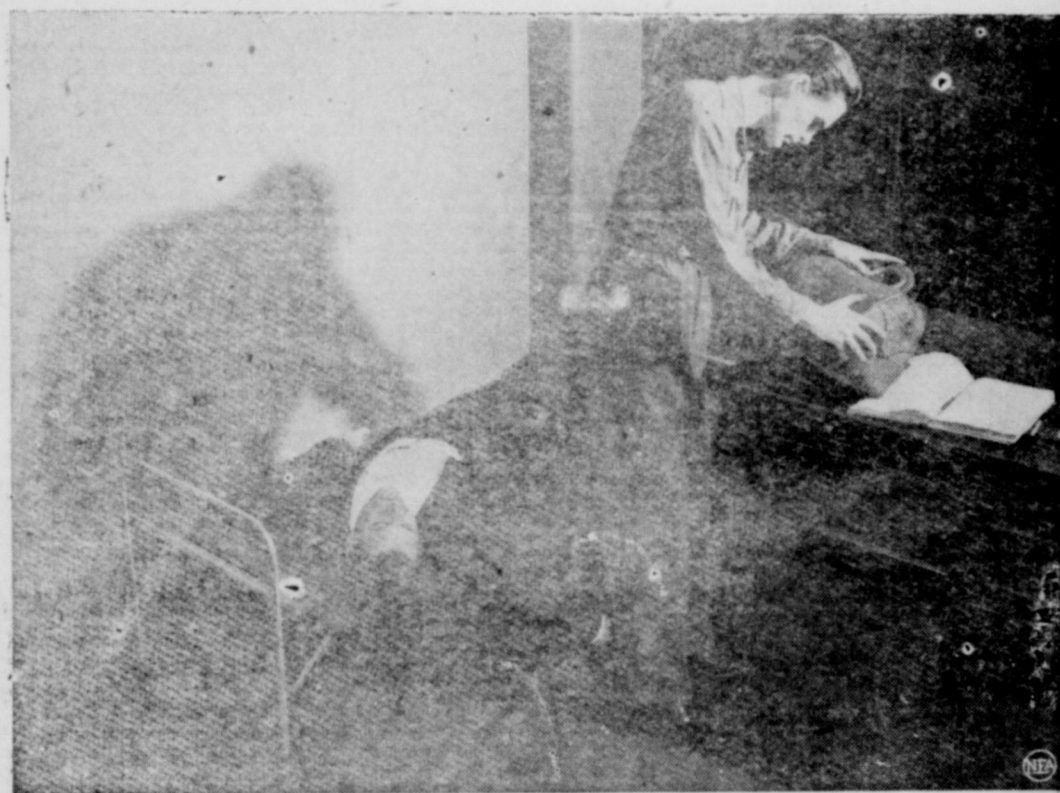

SERIAL STORY

SPORTING BLOOD

BY HARRY HARRISON KROLL

COPYRIGHT, 1942, NEA SERVICE, INC.

Hunter put Junior Ballard on the bed. . . There was a soft leather satchel lying on the floor. Hunter picked it up, saw the spot was a smear of blood. There was blood on the boy, too.

CHAPTER I HUNTER DENT tried to keep his tanned, lean face from showing anger. Strickland Ballard, his boss, chuckled triumphantly. 'You are aware, of course, that everything produced on an employer's time by one of his employees automatically becomes the employer's property? That is the law, sir.'

George Fox and family of Olden, visited his mother, Mrs. W. Fox Sunday. Uncle Joe Fox of Camp Blanding, Florida, Olden is seriously ill in the City County Hospital at Ranier. We hope him a speedy recovery. Mrs. Robert Oldford and family of Eastland spent Friday with her mother, Mrs. Lulu Taylor, they visited Uncle Joe Fox at the hospital.

Mrs. Jack Nace visited Babo Nabor's Tuesday evening. Mrs. Loret Woods, Rozelle Jean and Jimmie Fox spent Thursday with Mrs. G. A. Fox at Olden.

Mr. J. W. Fox and daughters, have been attending the Church of God meeting at Eastland. Miss Lizzie Taylor of Eastland spent Saturday night and Sunday with her sister Mrs. Walter Fox. Mr. Oliver Camet has been sick, but is better.

Mrs. Ed Fox and Jean and Jimmie Fox attended the Murry reunion at Carbon, Sunday. Mr. and Mrs. Henrie Fox and Juanita Fox were shopping in Eastland Saturday.

Imagination was given to man to compensate him for what he is not, and a sense of humor was provided to console him for what he is.

F.S.A. Locates Aera Office For 34 Counties Here

Since the new fiscal year is starting and the appropriation of the Farm Security Administration has been materially reduced by Congress, it was necessary that the Farm Security Administration seriously curtail their activities in the field.

"Since there was," to quote Mr. C. T. Watson, State Director "almost one third of the field personnel taken out of the state" and in order for the personnel of the S. A. Office which are assigned to this area and in view of the fact that they have to travel by bus, Eastland, has been selected as being the most centrally located town for their location and headquarters for three offices.

The personnel of these offices is: Mr. H. L. Gantz, Area Specialist; Miss Audrey W. Russell, Area HM Auditor; Mr. Chas. M. Richey, District RR Supervisor, District XIII; Mr. Carl P. Emmett, District RR Supervisor, District XI and the secretary to both District RR Supervisors, Mrs.

Maud Reed. Later it was intended that a land appraiser, as well as a district engineer for the tenant purchase program, join this staff and be located in Eastland. There are 34 counties in the area specialists district, and in the district of Chas. M. Richey there are 21 counties and 13 counties in Carl P. Emmett's district.

Goudy To Design Last Type Face

By HARRY L. CARLSON
United Press Staff Correspondent
LOS ANGELES, — Frederic William Goudy, hailed as one of the greatest typographic artisans of all ages, is now working on his last type design.

White-haired and 77 years old, he envisages the end of his long career. In the three decades and

more that he has devoted to his trade, the master craftsman has designed 113 faces of type.

Asked the name of his final contribution to the printing craft, he said, "I'm going to call it the 'Goudy 30' explaining that in printing '30' long has been the symbol for 'the end'.

Goudy yet doesn't know just how his '30' will turn out and described it only as Roman type with a Gothic influence. Judging from his 113 past performances, it should be something of simplicity and beauty.

Printers credit Goudy's influence with shearing type of the curlicues, scroll work and flourishes, which typographers prior

to his time thought necessary.

"They should be designed to help the reader, not to display the skill of the designer," he said. Likes "Medieval"

The dean of type designers has a favorite of the hundred odd types he has designed—the face described as "Medieval," inspired by an old manuscript which he Romanized.

"I've never been seduced by the modernistic trend," he relates. "I've always been a traditionalist. I've taken the best of the old designs and improved them to the best of my ability."

Goudy views his contribution to one of the world's oldest crafts from a matter-of-fact standpoint. He speaks with pride, not only of his life work, but of his accomplishments during his spare time.

"Only two per cent of the people of the United States are maroons," says a sociologist. Well, they certainly do get around, don't they?

MOVES TO EASTLAND

R. C. Jones, wife and two children, have moved to Eastland from Cisco and are residing at 1320 S. Seaman street.

Thousands Say TAKE SWAMP ROOT TO AVOID GETTING UP AT NIGHT

Kidney sufferers find fast relief with famous Doctor's tonic that helps wash away painful acid sediment. Feel better... sleep like a top!
Thousands get fast, wonderful relief from uricache or getting up nights due to sluggish kidneys with the remarkable comochic and intestinal liquid tonic called Swamp Root. For Swamp Root acts to flush out sediment from your kidneys. It is soothing, irritates bladder membranes.
Originally created by a well-known practicing physician, Dr. Kilmer, Swamp Root is a combination of 14 herbs, roots, vegetable, sodas and other natural ingredients. No harsh elements or habit-forming drugs. Just good ingredients that quickly relieve bladder pain, backache, run-down feeling due to tired kidneys. And you can't miss its marvelous tonic effect!
Try Swamp Root free! Thousands have found relief with only a sample bottle. So send your name and address to Kilmer & Co., Inc., Stamford, Conn., for a sample bottle free and postpaid. Take as directed. Offer limited. Send today. All druggists sell it. Kilmer's Swamp Root.

ATTEND MEETING IN CISCO

A special meeting of Knights Templar, Masonic Lodge, was held in Cisco this week, and those attending from Eastland were C. L. Karkalits, Earl Conner Jr., Cincinnati Eldridge, D. J. Finney and Judge W. B. Patterson.
