Varicolored powdered sands, rocks or grasses are sprinkled by hand to produce the paintings, which play a part in Navajo ceremonies traditionally performed to aid in curing the sick, or to seek good fortune for the hale.

**County Livestock Show** The Eastland County Livestock Show-coming up the

latter part of this month — is an event which has done much to earn its right to existence. Of course, its main purpose is to deepen interest in live-stock and related vocations, with emphasis on livestock

improvement. In so doing, of course, it impresses the coming genera-tion—the farmers and ranchers of tomorrow — along with the oldsters who are engaged in the industry. That, ob-

viously, is building for the future. But there is something else about it which also is especially important:

It brings folks together in a common interest-and in a spirit of good fellowship. All of us know that such a situation is favorable indeed for the welfare of a community or a county. It leads to a sentiment conducive to co-operation on other projects as

well as the task at hand. So let's back the county show. It will be of lasting bene-

fit to the entire area. With all working together toward its success, it can be made a memorable one. Lend it a hand!
