Willard Griffin and Obie Duncan are retiring directors. When the association was organized a year ago, five directors were named, but it was decided to increase the number to six this year and have the

two-year terms overlap. During the annual business meeting Thursday at the White Elephant Restaurant, President Wilson presided, and James Smith was speaker. Smith discussed the associ ation's recently-organized collection plan and urged mem-bers to avail themselves cd this service. He also displayed a new type of "reminders" to be used by credit merchants. These are available through the association.

Griffin and Duncan were cited for their works as direct-ors during the formative first year of the credit group.

Noted Baylor Researcher Will Be Cancer Meet Speaker Thursday

Telegram

The public is cordially ed to hear Dr. James W. Finney speak on cancer at the an nual meeting and election of officers May 17 at 7:30 p.m. in the annex of the Eastland First Christian Church.

Dr. Finney, assistant chief of cancer research for Baylor University Medical Center, Dallas, will present a 20 25 minute program of the research program demonstrating the procedure from the inception of the program leading to the ultimate application to the cancer patient. Color slides will be used as illustrations.

He received a BA degree in Bacteriology and a minor in organic chemistry from the University of Texas in 1955 and a MA in Microbiology and minor in Physiology with training in immuno-chemistry and radation, 1955-57. He has done Microbiology research at the A Hospitals in McKinney and Dallas, and at present he is an Microbiology nstructor in **Baylor** University Dental School

He has worked with on the studies in tumor autoimmunity; research in host reistance to tumors; methods of induction and demonstration of ients.

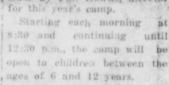

Dr. Finney is one as a cure for certain cancers. The hydrogen peroxide used in the treatment is the same sort of solution women use to bleach their hair. For the cancer therapy, it is "infused" in the mor for about 40 minutes, and during the last five minutes, radiation from an X-ray mach ine also is sent into the maligancy

T h e hydrogen peroxide is simply the means used or increasing the

oxygen in cancer sites. The Dallas team borrowed an idea from the "intraarterial in fusion" method that recently has come into use for sending high doses of drugs into a tumor. This method uses a small pump for pushing the drug

through long tubs into the patients cancer. It is being used in Fort Worth as well as sevaral other places.

Eleven Eastland firms have signed-up to participate in the chamber of commerce's "trim that window" contest now un-

The Eastland merchants may begin asking themselves, "where do you begin?" Well, the experts offer

many suggestions, and these coupled with the individual merchant's needs and means, usually result in a most satisfactory end result.

One of the suggestions offered by the Retail Advertising and Sales Promotion Bureau concerns "space"—the op-en vision created by large plate

across the street. Color is another problem in present design that can spell the difference between failure

and success. Colors should be carefully selected so as to feature the merchandise displayed rather than to divert attention.

The question always arises as to "whether modern or traditional". The experts sug-gest a functional, "changeable" design, that can be alteredwithout a complete renovation every year or so.
