### You Don't Need Much Advice-

but it is valuable now and then. For example, when you go to buy a policy of insurance, don't select any kind of a policy or any kind of an agent. There is a big difference. You will likely never use your insurance any way but if you do your agent will be the key man in any settlement you make with the insurance company. It is sound advice to buy only from local agents who have long records of successful performance in adjusting insurance claims.
