No. 62

MOORE EASTLAND

by Dirgil E. Moore

Travis Hilliard, the well-liked, slow talking, fast thinking superintendent of schools at Olden, was the perfect man to present Olden's water case at this week's City Commission meet-

Hilliard presented the facts he had in a soft voice and it was obvious that here was a man commissioners could enjoy working with, despite the seriousness of the incident. He didn't pull his punches, but he didn't resort to low blows

Humor is a wonderful thing and night's meeting easier for everyone. Hilliard brought the house down when he said, "It should be obvious to thinking men, regardless of what c'garet they might smoke . . ." His finishing remarks couldn't be heard because of the

Another time Hilliard was debating an issue with Mayor Cyrus Frost. Memory was the thing in question, and finally the school man came up with this opinion: "Out there, Mr. Mayor, when they put down several hundred dollars they are pretty sure of what they mean."

Mayor Frost, who is quite a humorist himself, ended the chit-chat with the Olden delegation with a bit of smile-talk himself.

"We've run out of facts, "His Honor stated half-seriously, "and now we're hunting for something to argue about.

After that, in good old American fashion, the vote was called for.

Willie Speaker, the shoe shine a great New York Yankee fan. He has enjoyed the Yankees' dominance of major league baseball for these many years, so it was certain he would come in for some bad times this season, Wednesday morning he received a brand new pair of white soxs marked, "White of white soxs marked, Soxs Win Crown."

Understand some Olden folks thought our story said that the City adopted a plan where their rates would increase in two more years. That was what Mayor Frost recommended, but his motion failed. There is no time limit involved, as we un-

Jerry Sitton, the Cisco scribe, came up with these enrollment figures for area schools: Cisco, 1,057; Eastland, 743; Ranger, 728; Rising Star, 331; Baird, 339; Cross Plains, 538; and Moran, 134.

Anyone doubting that Coleman will field a strong team this year should realize that the Bluecats have given up just 12 points in these games while scoring 64 points themselves. Cisco is the top offensive team. Remembering the days of old, the Loboes have run up top-heavy scores against two opponents, getting 94 points in two games.

Some days it doesn't pay to get up. We've been spying on James Reid lately and decided that he must be using muscle for bait to catch all of those fish. So the old fishing crew went out and got some muscle. We took them home, put them in a jar and opened the refrigerator. The wife caught us there and wasn't going to let up put them in the freezer. We insisted it wouldn't hurt any-(Continued On Page Three)

RHODES' ROUND-UP

Pep Rally Set For Tonight On Square

rings arrived last week and a this week. You may have to stand ring presentation was held Thurs-up, as the seating accommodations day afternoon. There was a program and then the Seniors received their rings. It was all quite an exciting affair which will be kept by most of us in pictures made for us by the Eastland Telegram and Moderne Studios, The student body attended the presentation as well as a large number of parents. We certainly were happy to have such a nice group of visitors and we certainly invite them to the school activities.

Now that school is well under way, activity has begun in most fields of school activity. The girls had a Tri-Hi-Y meeting last Tuesday night to get their activities lined up for the coming year. The boys plan to start the Hi-Y just as soon as possible. Work on the annual has begun and we hope to make a fine showing on it thi year. Individual pictures were nade today in the schools.

At DeLeon last Friday night, the Eastland Mavericks used some good offense and an improved defense to stiffle the DeLeon Bearcats. The Mavericks looked very improved even from last week's game, I feel that this is just a taste of the action that Eastland fans will get from these boys this year.

The Eastland Maverick band did another fine job at the De-Leon game. The half-time activity was very good, but I imagine that Eastland people are just glad to ee an Eastland band being able to march in a straight line for he first time in many a moon. am sure that you will enjoy the half-time show that the band will present at Cross Plains this Friday. The band, Mr. Hewett, and I certainly appreciate the backing you, the citizens of Eastland, have given the band so far, and we hope to have your continued support. man at Siebert's Barber Shop, is To have a good band, a town needs to support it. People are beginning to help this year and look at the band.

> I was certainly glad to see such a fine crowd at DeLeon last Friday night. When a town with the same rated school can go somewhere and have more fans than the home team, that town is doing

Interest Rate On Savings Bonds Is Raised by U. S.

Guy Parker, Eastland County Savings Bond chairman, today alled attention to the fact that a one-half percent increase in interest rates on old and new Series E and H Savings Bonds has gained final okay.
"Forty million people automat-

ically benefit from the recent egislation passed by Congress," hold outstanding bonds in the amount of \$42.6 billion. For the first time, the hike in rates applies to old series E and H Savings Bonds as well as those being Reservations for ought currently. So, it will be to the advantage of most bond own- Contest Winner ers to hold onto their old bonds, thus automatically receiving the Are Completed benefit of the increase."

The new law does two things: (1) it provides that all Savings Bonds bought on and after June draw 3% percent interest when held to maturity, and (2) it increases by at least one-half of regardless of their age, for the lene will be provided. period from June 1, 1959 to their maturity. In addition, the Treasboth old and new.

"I cannot emphasize too strong-(Continued on Page Two)

GUY PARKER

The Senior rings made it. The as many as possible at Cross Plains

are not the best in the world but

you may see a good ballgame.

On the line of football, the film of the Highlights of 1958 Southwest conference play was shown last Monday to the student body. Everyone seemed to enjoy it. Some, like myself, could remember a few of the plays from beeing them last year and this made it even more interesting.

Tonight there will be a pep rally on the south side of the square at 6:45. Everyone is invited to come down and yell.

I suppose that I've told all I an remember from this week. See you next Thursday.

WITH REVOLUTIONARY TORSION-SPRING

SUSPENSION

THAT GIVES ASTONISHING NEW

SHOCKPROOF ACTION !!!!

Chevy's done the next best thing to paving every road in America!

First they threw out the front axle suspension. Then they built wide-base coil rear springs into most light-duty models, variable-rate leaf springs into heavies. That made it-a ride you have to feel to believe. A ride that lets you move faster to get more work done in a day's time.

Brawnier bulldozer build!

Frames are stronger, cabs 67% more rigid. Front wheels and tires are precision-balanced. And that new suspension cushions jars and road shock that used to spell slow death for the truck's body and sheet metal.

Easier to hop in and out of too. Many models are a whole 7 inches lower outside. Yet there's more head room inside, plus more width for shoulders and hips. More real comfort!

Big in the power department!

saving 6's. With high-torque Workmas ter V8 performance in heavyweights. With new 6-cylinder or V8 power

4-wheel-drive models and tanand high-styled Suburban Carryalls. It's the handsomest, hardest work-ing Chevy fleet ever to report for duty.

This Sunday Go To Church

Why we built two cars for 1960 . . .

as different as night and day

On October 2-for the first time in Chevrolet's 49-year history-you will be able to walk into your dealer's showroom and see two totally different kinds of cars.

One is the conventional 1960 Chevrolet, brand new in appearance and more beautifully refined and luxurious than you can imagine.

The other is unlike any car we or anybody else ever built—the revolutionary Corvair, with the engine in the rear where it belongs in a compact car. We'd like to tell you why we built two such different cars, how we built them-and for whom we built them.

Why two kinds of cars? Because America itself has been going through some big changes in the past few years. Our cities have been straining at their seams. Traffic is jam-packed. Parking space is at a premium.

And our suburbs have spread like wildfire. People are living farther from their work, driving more miles on crowded streets. There is new leisure time-but more things to do. There's a new standard of living-and more need for two cars in the family garage.

In short, America's automobile needs have become so complex that no one kind of car can satisfy them completely. That is why we at Chevrolet, keeping tab on these trends, have had a revolutionary compact car in the planning stages for more than nine years.

Thus, when we decided three years ago to prepare for production of such a car we were ready to build it the way it should be built. There was no need for a hasty "crash" program that would create only a sawed-off version of a conventional car.

That is why the two cars you will see in your dealer's showroom October 2 will be two entirely different kinds of cars. One is the conventional '60 Chevrolet-brand new in beauty, with new space inside, new spirit under the hood, a new

feeling of sumptuousness and luxury never before attained by any car in its field. There is great V8 power linked with new thrift, plus Chevrolet's superb 6-cylinder engine. It is a traditional car that comes even closer to perfection-in silence, in room, in ease of control, in velvety ride-than any other car we have ever made.

The other is the Corvair, a compact car that is astonishingly different from anything ever built in this country. It has to be-because this is a sixpassenger compact car, with a really remarkable performance . . . a car designed specifically to American standards of comfort, to American traffic needs.

The engine is in the rear. Among the basic advantages resulting from this engine location are better traction on a compact 108-inch wheelbase and a practically flat floor. But to be placed in the rear, the engine had to be ultra light and ultra short. So Corvair's engine is totally newmostly aluminum and air cooled; it weighs about 40 per cent less than conventional engines. It is a "flat" horizontally opposed six-so it is only three cylinders long . . . and that

leaves a lot more room for passengers. Another weight saving: like modern airplanes, the Corvair has no frame; the body-shell supplies it great structural strength . . . it's a welded unit that is virtually rattle-free.

The ride is fantastic. But to get it we had to design independent suspension at every wheel; conventional springing would give a compact car a choppy ride. Right now we'll make one prediction: no other U.S. compact car will ride so comfortably, hold the road so firmly and handle so beautifully.

Now there are two kinds of cars from Chevrolet-because it takes two kinds of cars to serve America's needs today. If you love luxury - the utmost in luxury-and if you want generous interior space, breath-taking performance, automatic drives and power assists-then the conventional '60 Chevrolet may be your choice.

If easy parking, traffic agility and utmost economy are high on your list -then you should seriously consider the Corvair. But the best thing to do is to look these two new cars over at your Chevrolet dealer's . . . take them out for a drive. It may be that the only logical choice for your family between two cars like this is-both. They make a perfect pair.

Insurance is a Life-Time Affair-

. and is so considered by those who figure safety as a business and protection as an investment. The fact that a person has carried insurance for many years and never had a claim does not mean that he has lost his money premiums. Rather has he gained them because he invested in safety, got protection and lost none of his property. If we buy insurance for what it really is at least a part of our financial problems will solve themselves.
