Feedlots' numbers off during 1985

The number of cattle moving through feedlots in the area served by Southwestern Public Service Company during 1985 was down from the record 1984 total, according to the annual Fed Cattle Survey conducted by the electric utility.

The survey showed that feedlots in the territory fed 5,077,338 head in 1985, down from 5,259,779 fed during 1984.

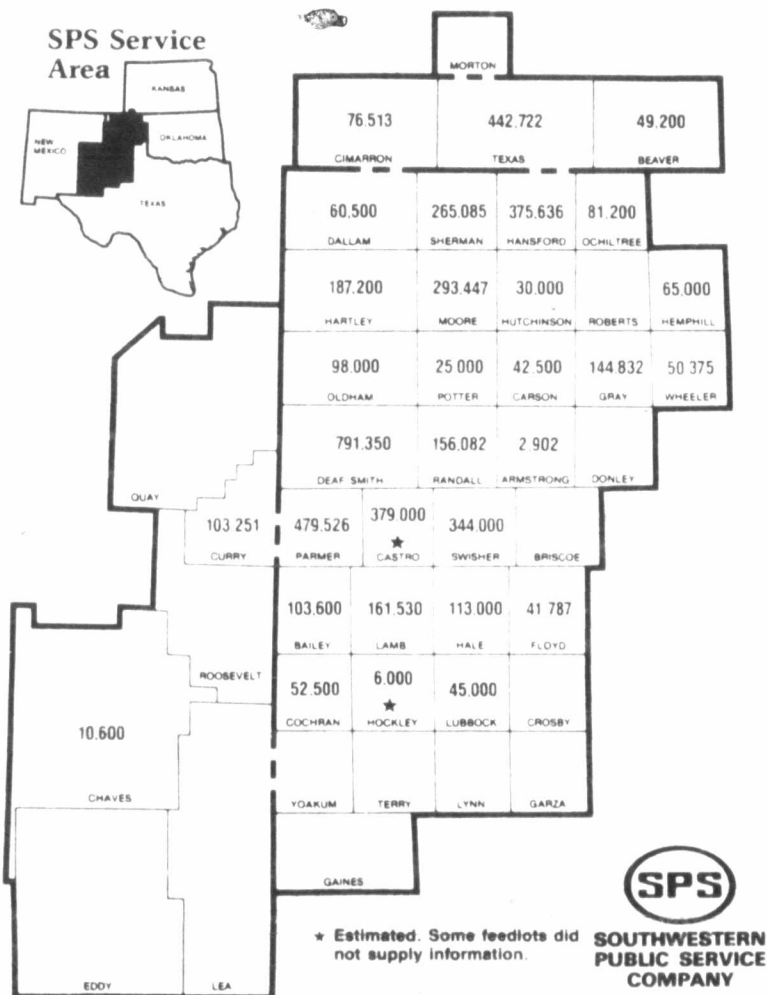

The number of cattle slaughtered in packing plants in the SPS service area was off by 125,545, with 4,778,838 slaughtered last year.

SPS serves a 52,000 square mile area in parts of the Panhandle and South Plains of Texas, eastern and southeastern New Mexico, the Panhandle of Oklahoma and southwestern Kansas. It does the survey of each feedlot and packing plant in its service area each year. Feedlots are located in 30 of the counties and the service area includes 14 beef packing plants. Total one-time capacity of the feedlots surveyed in 1985 was 2,619,775, up from 2,557,000 in 1984. The packing plants had an annual slaughter capacity of 4,945,953.

"Requests for Southwestern's Fed Cattle Survey come from all across the nation, said Seth Thomason, SPS manager. "The survey is an excellent way for us to tell others about our area's capabilities in the beef industry. By providing this information, we hope

1986 Fed Cattle Survey

In Southwestern Public Service Area, 5,077,338 Cattle Were Fed in 1985

to help stimulate further development in the agricultural sector."

Charts of the number of feedlots surveyed, number of feedlots with 1,000-head capacity or above, growth of the feedlot industry and one-time

feedlot capacity are included in the report.

Copies of the report and survey are available at Southwestern Public Service Company offices and from Thomason at SPS headquarters in Amarillo.

U.S. succeeds in bid for new trade talks

TOKYO (AP) — Leaders of the world's most powerful democracies ended their three-day summit meeting today, calling for a new round of world trade talks and adopting a major revision in world monetary policy.

As the annual session closed, the dollar plunged to another post-World War II low against the yen, a disappointment to Japanese businessmen whose exports become less competitive against a falling dollar.

In the final communique of their 12th economic summit, the leaders of the seven industrial democracies failed to resolve a continuing dispute over European agricultural subsidies but patted themselves on the back for the recent decline in oil prices while recognizing the need for long-term stability in the market.

The final day's meeting was marred by the explosion of smoke bombs packed with firecrackers in subway and train stations around Tokyo. The incident was interpreted as a harassing tactic by Japanese radicals intent on embarrassing the largest, most intensive security force ever assembled to protect a summit.

No one was injured, and no serious damage was reported, but rush-hour traffic and mass transit were snarled for a time in this city of 11 million as people returned to work at the end of a three-day holiday.

The issue of terrorism, which has dominated the summit, was underscored by a threat from Palestinian radical Abu Abbas, in a broadcast report, to target America for terrorist attacks.

"Let him try," President Reagan declared, responding to reporters' questions.

The Reagan administration won an important victory in getting its summit partners to back preliminary talks in September aimed at a new round of international trade talks — talks aimed at lowering barriers that restrict U.S. sales abroad.

Administration officials have seen the new round as crucial in their efforts to head off building protectionist pressures in Congress. Preparations for a new round marks a change from last year's economic summit in Bonn, when the U.S. effort to launch the trade talks was torpedoed by France.

This year, continued skepticism toward the new round on the part of France and an increasingly bitter trade war between the United States and the European Community nations over agricultural products seemed as recently as Monday as likely to kill chances of the new round.

However, at the last minute, France and other Western European nations signaled their approval for a new round, said sources, who spoke on the condition of anonymity.

In a shift in monetary policy engineered by Treasury Secretary James A. Baker III, the leaders agreed to try to stabilize currency exchange rates through a system of economic checks and balances.

While welcoming recent coordination of monetary policy by the so-called Group of Five finance ministers and central

bankers, Japanese Prime Minister Yasuhiro Nakasone read a statement saying the leaders agreed "that additional measures should be taken to ensure that procedures for effective coordination of international economic policy are strengthened further."

The plan, designed to avoid wild fluctuations on currency markets, would affect the U.S. dollar, the yen, the West German mark, French franc and the British pound.

Italy and Canada, the two summit partners not now included in the Group of Five, or "G-5," monetary powers, were granted limited membership in order to coordinate overall monetary and economic policies among the seven summit partners.

Each nation would provide the others with a set of economic forecasts and expectations that would be used as economic "indicators" of stable performance. The new Group of Seven is to meet at least once a year and, when actual performance misses the mark by a wide margin, will jointly review strategy.

The leaders welcomed the so-called "Baker Plan" to help developing countries deal with their burgeoning debts and called for "building on the United States initiative."

In calling for a new round of multinational trade talks, the leaders proposed to expand the General Agreement on Tariffs and Trade from its current emphasis on reducing barriers that limit international product sales.

Chamber exceeds membership goal

Pampa Chamber of Commerce's 1986 Triple I Brand Roundup has ended, with Chamber officials saying it will go down in history as one of the most successful membership drives in the organization's history.

With several crew members still needing to check in, the Chamber has 90 new members, 30 over the goal, and in excess of \$13,000 in investments following Friday's check-in.

"This goal could never have been achieved without the efforts and work of 56 dedicated crew members," said an elated Bill Duncan, Chamber president.

"I would like to thank each of them for their help and, in particular, express my appreciation to our Membership co-chairmen Jimmy Clark and Brian Vining for their efforts — not only in this drive, but for their work throughout the year," Duncan added.

"With the success of the 1986 Triple I Brand Roundup and with the members continuing to make their investments when they are due for the rest of the year, our budget should be in the black on Sept. 30 at the end of the Chamber's fiscal year," he said.

The individual contest was won by J. J. Ryzman with 4,878 points. Ryzman single-handedly secured more than \$2,300 in investments, Duncan said.

For his efforts, Delta Airlines will fly Ryzman and his wife to Epcot Center at Orlando, Fla., free of charge. Delta is providing the transportation as a gesture of community support for Pampa, Duncan said.

Verl Hagaman with 2,358 points and Roy Sparkman with 2,135 points came in second and third respectively.

Ryzman will receive a plaque and become the second member of the Gold Medal Club for getting more than \$1,500 in investments during the drive. Hagaman and Sparkman will become Silver Medal Club members for the second year in a row for gaining more than \$1,000 in investments.

In the range crew competition, Range Boss Bob Hart's City Slickers came in first with 6,720 points. Hart and his crew — Ryzman, Phyllis Jeffers and Danny Parkerson — will each receive \$100 in cash.

Second place honors went to Range Boss Bill Duncan's Rustlers with 4,413 points. Duncan, Hagaman, Ron Wood and Lyn Moulton will each receive \$50 for their efforts. Range Boss Roy Sparkman's Over-the-Hill Gang composed of Sparkman, Jerry Sims, Robert Wilson and Larry Gilbert will each get \$25 for coming in third with 3,040 points.

Kathy Pratt, Margie Gray, Brian Vining,

Janelle Cochran, Brent Stephens, Duane Harp, Dena Whisler, Dr. Joe Lowry, Reed Echols, Joyce Simon and Charles Buzzard will each receive dinner for two at any Chamber member restaurant for having the most points for their respective teams.

Pampa's financial institutions provided the \$1,000 in cash to pay for the money prizes.

Finance Director Dona Cornutt expressed her appreciation to the institutions for their support of the Chamber in the drive as well as the support they give to all Chamber projects throughout the year.

Cornutt also expressed appreciation for the efforts of the Membership Committee co-chairmen, the Range Bosses and the crew members.

"Our drive was so successful that we made history in the fact that the Chamber's membership is now over 800 for the first time," she said.

"As a life-long Pampian, I am pleased that we are carrying on the tradition of our forefathers in that we take care of our own and know that the citizens of Pampa will always do whatever is necessary to make our community a better place," Cornutt stated.

"The success of this drive is just another example of that tradition," she concluded.

Local construction up over \$3 million

By LARRY HOLLIS
Staff Writer

Construction valuation of buildings issued permits by the city is standing at nearly \$2.9 million more than the last fiscal year and approximately \$3.1 million higher for the calendar year.

Based on reports from the Department of Building Inspection, valuation for 129 buildings issued permits in the current fiscal year to date is \$6,900,591.39, compared to \$4,014,831 for 166 buildings issued permits in the previous fiscal year period.

The fiscal year begins Oct. 1 and ends Sept. 30.

For the calendar year, beginning Jan. 1, the city has issued 74 building permits with a valuation listed at \$4,786,422. In April, 1985,

the calendar year total was \$1,643,475.

The city issued 22 building permits last month, reported department head David McKinney. Valuation was \$1,818,422, with the department collecting fees of \$1,461.50.

In the previous April, 21 buildings were issued permits, with valuation listed at \$322,500. Fees totaled \$894.50.

For the current fiscal period, the department has collected \$10,266 in building permit fees, slightly higher than the \$10,047 for the same 1984-1985 period. For the current calendar year, fees total \$5,942.75.

Leading the construction is the new Lamar Full Gospel Assembly complex, listed with two other commercial buildings having a total valuation of \$1,474,172.

Other buildings issued permits in April include one single family dwelling with a valuation of \$72,000; three relocations or demolitions, \$1,750; four mobile homes, \$33,000; two garages, \$3,000; five alterations or additions to dwellings, \$39,500; two alterations or additions to commercial buildings, \$195,000; and two miscellaneous, no valuation listed.

The city issued 21 electrical permits last month, collecting \$312.93 in fees. In April, 1985, 15 permits were issued for \$96 in fees, McKinney reported.

For the current fiscal year period, 120 electrical permits have been issued and \$2,110.07 in fees collected. In the same period for the previous fiscal year, 119 permits were issued for fees of \$2,465.54. Sixty-seven electrical

permits have been issued in the first four months of the current calendar year, with fees totaling \$1,000.73.

Thirty-six plumbing permits were issued in April for fees of \$491.38, up from the 30 permits and fees of \$291.70 reported for the previous April.

For the fiscal year to date, 233 plumbing permits have been issued with \$4,399.27 in fees collected. In the comparable fiscal year period for 1984-1985, department personnel issued 218 permits and collected fees of \$3,284.67. For the current calendar year, 67 plumbing permits have been issued for \$2,790.23 in fees.

The city issued 13 mechanical permits last month, collecting

Condon seeks 'few good residents'

Town's bid for new residents gets big response from cities

CONDON, Ore. (AP) — Folks from Japan to Virginia are filling the mailboxes at City Hall, the chamber of commerce and the local newspaper as they respond to this farm town's ads for "a few good residents."

The northern Oregon town made news last month when its chamber of commerce, worried about a population that has shrunk from nearly 1,000 to about 700, put ads in the Los Angeles Times and The Oregonian of Portland.

Nearly 200 calls and letters had been received by Monday, said Max Stinchfield, editor of the Condon Times-Journal.

"It's been unbelievable," said city administrator Bonnie Parker. "The phones have been crazy as well as the mail. It's pretty neat to see that people are interested in living here."

As time goes by, the responses are coming from farther away, Ms. Parker said. One arrived Monday from Korea.

The ads read: "Upbeat Eastern Oregon community is

looking for a few good residents. Safety, inexpensive housing, good schools and services, recreation opportunities."

Some of the responses were as concise as the ad.

Replied Al Seidner of Desert Hot Springs, Calif.: "Have good income. Have car, and fishing rod. Can move."

Most letters have come from the Northwest and California. Others came from big cities like Chicago, Philadelphia and Houston, or small ones like Gillette, Wyo.; Manassas, Va.; and Merrimack, N.H.

"There are a lot of people in this world looking for a way to get out of the big cities," Ms. Parker said. "Most of the people who have contacted us are retired people living in smoggy, unsafe, congested communities, and they would like very much to get into a country setting."

They've asked lots of questions about Condon.

Some say they long to return to a rural community like the ones they grew up in.

DAILY RECORD

service tomorrow

INGRAM, Audie A. - 2 p.m., Carmichael-Whately Colonial Chapel.
HOLT, William Robert - 10 a.m., Masonic Cemetery, Piedmont, Mo.
FINLEY, Beulah Frances - 3 p.m., First Baptist Church, Floydada.

obituaries

MAYME OMEGA TIBBS

Services are pending with Carmichael-Whately Funeral Directors for Mayme Omega Tibbs, 71, who died today.

She moved to Pampa in 1966 from Cheyenne, Wyo. She had been a sales clerk with J. C. Penney's for 20 years.

Survivors include six daughters, Nancy Pettengill, Golden Shores, Ariz.; Virginia Laycock and Lisa Vinson, both of Pampa, Pat Clements, Graham, Marsha Barrett, White Deer, and Jane Evans, Lubbock; two sons, David White, Tulare, Calif., and Jimmy White, Golden Shores, Ariz.; two sisters, Eula Young, Fresno, Calif., and Margie Johnson, Carson City, Nev.; three brothers, Don Able, Fresno, Calif., DeWitt Able, Silver Springs, Ore., and Bill Able, Hot Springs, Ark.; 25 grandchildren and 16 great-grandchildren.

G. CLAY CROSSLAND

Services for G. Clay Crossland, 70, are pending with Carmichael-Whately Funeral Directors.

Mr. Crossland died Monday at Fort Worth. He moved to Pampa in 1959 from Muleshoe. He married Mable Stevenson on May 10, 1940, at Dumas. He was a member of the Mary Ellen and Harvester Church of Christ and the Pampa Masonic Lodge No. 966 AF&AM.

Survivors include his wife, Mable, of the home; two sons, Marshall Crossland, Basalt, Colo., and Gary Crossland, Fort Worth; four brothers, Clyde Crossland, San Diego, Calif.; Tarzan Crossland, Irving, Don Crossland, Portland, Ore., and E. H. Crossland of Oklahoma; five sisters, Vay Aschenbeck, Davis, Okla., Raye Wirtz, Guymon, Okla., and Sammie Jordan, Billie Lee Howell and Nora Lee Crossland, all of Brownfield; four grandchildren and two great-grandchildren.

VIOLA MAE ELSHEIMER

Services are pending with Carmichael-Whately Funeral Directors for Viola Mae Elsheimer, 86, Mrs. Elsheimer died Monday.

She moved to Pampa in 1938 from Kansas. She married C. L. Elsheimer on Sept. 16, 1916, at Independence, Kan. She was a member of the Fellowship Baptist Church.

Survivors include her husband, C. L., of the home; two daughters, Vernia Liebau, Rockport, Texas, and Betty Hammerschmidt, De Ridder, La.; three sons, Gerald R. Elsheimer and Kenneth L. Elsheimer, both of Pampa, and Charles L. Elsheimer, Drumright, Okla.; a sister, Lottie Smith, Wichita, Kan.; a brother, Mode Howell, Elk City, Kan.; 13 grandchildren, 26 great-grandchildren and three great-great-grandchildren.

BEULAH FRANCES FINLEY

FLOYDADA - Services for Beulah Frances "Pansey" Finley, 69, mother of a Pampa resident, will be at 3 p.m. Wednesday at the Floydada First Baptist Church with Rev. Hal Farnsworth, pastor, officiating.

Burial will be in Floydada Cemetery under the direction of Moore-Rose Funeral Home.

Mrs. Finley died Monday in Lubbock. Born in Johnstown, she moved to Floyd County in 1924. She married Arnold Wayne Finley in 1936 at Floydada. She was a housewife and a member of the First Baptist Church.

Survivors include her husband; a son, Jerry Finley, Levelland; two daughters, Pat Conklin, Pampa, and Kaye Tipton, Plainview; two sisters, Lanell Wilkes, Medford, Ore., and Edith Saul, Mineral Wells; her twin brother, G. H. Shirey, Torrance, Calif.; and seven grandchildren.

AUDIE A. INGRAM

Services for Audie A. Ingram, 78, will be at 2 p.m. Wednesday at Carmichael-Whately Colonial Chapel. Officiating will be Bishop Dale Thorum of the Pampa Ward of the Church of Jesus Christ of Latter-day Saints.

Burial will be in Fairview Cemetery under the direction of Carmichael-Whately Funeral Directors.

Mrs. Ingram died Saturday. Survivors include a son, three sisters, three brothers, four grandchildren and two great-grandchildren.

The family requests memorials be made to the American Heart Association or the American Cancer Society.

WILLIAM ROBERT HOLT

Graveside services for William Robert Holt, 78, will be at 10 a.m. Wednesday in the Masonic Cemetery at Piedmont, Mo., with Rev. Clyde Eisgiggs, pastor of First Baptist Church at Patterson, Mo., officiating.

Arrangements are under the direction of Smith-Fox Funeral Home of Panhandle.

Mr. Holt died Saturday. Survivors include his wife, a daughter, two sisters and a grandchild.

Candidates for governor get quick campaign starts

AUSTIN (AP) — With their primary election victories only two days old, former Gov. Bill Clements and Democratic Gov. Mark White already are on the attack.

Smiling and calling himself the underdog, Clements launched his November election campaign on Monday by saying White must win to preserve his national political standing.

"This incumbent has on the line his national political ambitions. He has a real burden to carry here, that if he's going to realize his political ambitions, he's going to have to win this election," Clements said.

"He knows full well that those stars in his eyes will go out like a light switch if he doesn't win this election," Clements added. "It's going to be a hot summer."

White was vacationing in Van Horn.

His campaign staff released a prepared statement in which the governor said he was eager for the return match with the Republican he ousted in 1982.

"The voters in November will have one of the clearest choices ever in the history of Texas," White said, emphasizing public school reforms and highway improvements enacted during his administration.

"In four years, during a time of

increasing revenues, my predecessor left state government with absolutely nothing to show for it. This administration, on the other hand, has been preparing for the future," White said.

White said his efforts also led to enactment of a statewide water conservation plan and a health care program for the poor.

"I'm proud of what we've been able to accomplish for the people of Texas during the last few years," he said.

Both White and Clements won their party primaries Saturday without runoffs to set up their November rematch.

White earned 53.78 percent of the vote in a six-way Democratic race, while Clements reaped 58.44 percent of the GOP vote.

But Clements said his campaign was starting immediately because he believes it to be an uphill battle.

"This is going to be a very, very tough race. I recognize that I am the underdog," Clements said.

Clements predicted that the Democrats will turn out 1.8 million voters in the fall, meaning a record number of Texans must vote Republican for him to regain the office White captured in 1982.

However, he insisted that the low Democratic primary turnout indicates Republicans and Democrats now face "for any practical purposes a heads-up

situation" for general election votes.

"It was an all-time record (primary turnout) for us. We're moving in the right direction," he said.

Clements also said he expected campaign help from President Reagan and Vice President George Bush, and possibly former president Gerald Ford.

"If we do everything right, and if we turn out our vote and set an all-time record, we're going to barely win," he added. "I think the time and the circumstances and the temper of Texas is such that it will happen. I'm optimistic."

Clements said he expects to spend between \$5 million and \$6 million on this campaign. He spent more than \$2 million to win the GOP nomination over U.S. Rep. Tom Loeffler and former congressman Kent Hance.

A millionaire oilman, Clements said he had no plans to spend his personal funds on the race or to match the nearly \$13 million spent in 1982.

The former governor also said he was eager to debate White, who refused to debate any of his five Democratic primary rivals.

"I anticipate we will be on the same podium on many occasions," Clements said. "I don't think he can dodge this time around. I look forward to that."

Court removes execution barrier

WASHINGTON (AP) — With what one dissenter called "glib nonchalance," the Supreme Court has removed a potential barrier to carrying out executions of hundreds of death row inmates nationwide.

The justices, in a 6-3 ruling welcomed by law enforcement officials, said Monday that death penalty opponents may be excluded from juries deciding the

guilt or innocence of defendants who face possible death sentences.

The decision also affects thousands of other convicted murderers not sentenced to die who hoped for new trials on grounds juries lacking death penalty opponents are unfairly prone to return guilty verdicts.

The court said the right to a fair trial is not violated when poten-

tial jurors are barred from saying they could never impose a death sentence.

In a dissenting opinion, Justice Thurgood Marshall accused the court of "a glib nonchalance ill-suited to the gravity of the issue presented."

He said, "Such a blatant disregard for the rights of a capital defendant offends logic, fairness and the Constitution."

Stanford University law school Professor Samuel R. Gross said the ruling placed expediency above the rights of the accused.

Excluding death penalty opponents helps "diminish the impartiality" of jurors in weighing guilt or innocence, Gross said.

Henry Schwarzschild, director of the American Civil Liberties Union's capital punishment project, called the decision "very distressing and disappointing."

The ruling overturned a federal appeals court decision in an Arkansas case that said barring anti-death penalty jurors leads unfairly to a "conviction-prone" jury.

Justice William H. Rehnquist, writing for the majority, expressed "serious doubts about the value" of studies supporting the conviction-prone theory.

But even if the studies are right, Rehnquist said, the Constitution does not ban the exclusion of opponents of capital punishment.

David Lee of the Oklahoma attorney general's staff said the decision affects as many as 1,000 of the approximately 1,700 death row inmates nationwide, and means states can avoid retrials for up to 7,000 convicted murderers.

Derailment near Tulia spills sulphuric acid

TULIA, Texas (AP) — An employee of the Texas Water Resources Commission says railway workers averted a dangerous situation by quickly damming sulfuric acid spilled from four derailed tanker cars.

The cars derailed early Monday near the Panhandle town of Tulia when a freight train of the strikebound Santa Fe Railway Co. hit an empty tank car, a company spokesman said.

James Hart, dispatcher for the Tulia police department, said cleanup crews managed to dike up the acid that had run into a creek bed and that no evacuation was necessary.

Mike Gates, a spokesman for the Texas Water Resources Commission, said, "Had the winds been blowing from a different direction or had there been more moisture, we could have wound up with a totally different situation."

Gates said Santa Fe officials were "right on top of the spill" and immediately erected earthen

dikes to contain the spilled acid.

The train's crew members suffered bumps and bruises in the 12:15 a.m. collision about 60 miles southwest of Amarillo, said Robert Gehrt, director of public relations for Santa Fe Railway in Chicago.

FBI officials in Dallas say Santa Fe officials there have told officials it was an accident, although Gehrt initially had said vandals might have moved the empty car in front of the train.

"We are not directly blaming that incident on vandalism," company spokesman Richard Hall said Monday, adding that high winds might have pushed the empty car onto the rail line.

Monday was the third day of a strike against the railroad by thousands of engineers, conductors and other workers. No talks are scheduled.

Art Hanford, a spokesman for the Cleveland-based United Transportation Union, one of the striking unions, said he had no knowledge of the derailment.

Weather focus

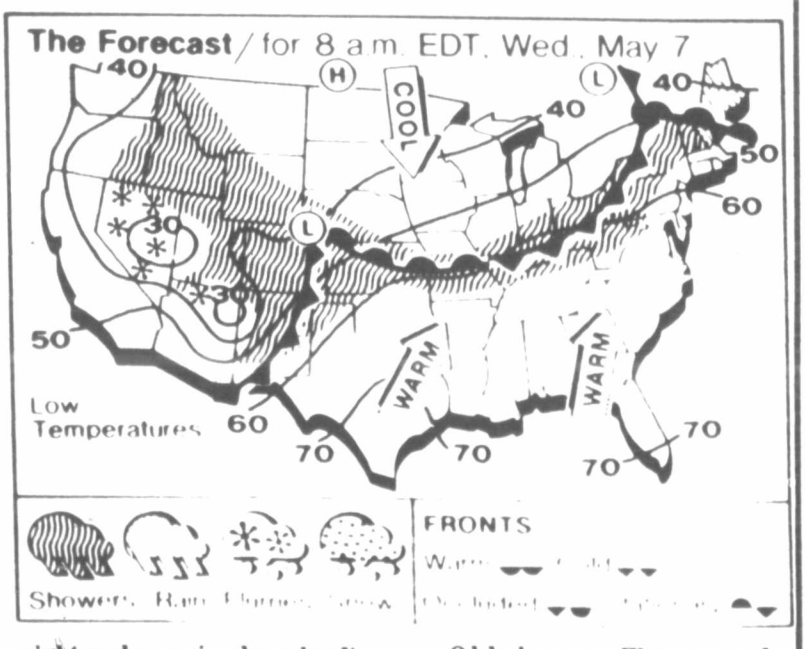

LOCAL FORECAST
 Fair and hot Wednesday with the highs in the upper 80s. Lows in the 60s. Southerly winds at 10-15 mph. High Monday, 88; low today, 54.

REGIONAL FORECASTS
 North Texas- Cloudy mornings, partly sunny afternoons through Wednesday. Mostly fair evenings. Widely scattered thunderstorms late Wednesday western third. Continued windy, warm and humid with afternoon highs lower 90s west to mid 80s east. Lows upper 60s to lower 70s.
 West Texas- Partly cloudy tonight and sunny Wednesday. Isolated to widely scattered late afternoon and evening thunderstorms through Wednesday. A little cooler north Wednesday. Lows tonight upper 50s mountains, 60s most areas except near 70 south. Highs Wednesday 80s mountains, far west and Panhandle to 90s elsewhere.
 South Texas- Partly cloudy and warm through Wednesday. Highs in the 80s central and east and in the 90s west. Lows in the 70s.

EXTENDED FORECASTS
 Thursday through Saturday

North Texas: A chance of thunderstorms mainly west and central Thursday through Saturday, otherwise warm and humid. Lowest temperatures will be in the 60s. Highest readings in the 80s.

South Texas: Some late

night and morning low cloudiness. Otherwise, partly cloudy. Warm and breezy afternoons, mild at night. Widely scattered afternoon or evening showers or thunder-showers mainly South Central and Southeast Texas. Daytime highs in the 80s and 90s. Overnight lows in the 60s and 70s.

West Texas: Partly cloudy with a gradual cooling trend Thursday through Saturday. Scattered afternoon and evening thunderstorms Thursday and Friday and all but far west Saturday. Highs Panhandle near 80 cooling to mid 70s Saturday. Lows mid 50s, cooling to low 50s Saturday.

BORDER STATES

Oklahoma- Warm and humid through Wednesday with widely scattered thunderstorms west and north tonight and most sections Wednesday. Low tonight mid-60s to near 70 except upper 50s Panhandle. High Wednesday low 80s to low 90s.

New Mexico- A few showers possible late tonight northwest with fair skies over the rest of the state. Colder with widely scattered showers west and north Wednesday, fair skies and windy east and south. Lows tonight 30s and 40s mountains and northwest with 40s and 50s elsewhere. Highs Wednesday 60s and 70s mountains and north to the 80s lower elevations south.

New England personal income fastest-growing of any region

WASHINGTON (AP) — New England, enjoying a boom in high-tech industry, had the fastest personal income growth of any region last year, with the poorest performance coming in states dependent on energy production, the government reports.

Nationwide, Americans' personal income climbed 5.3 percent to an average of \$13,451 for every person in the country last year, the Commerce Department said Monday.

The increase was substantially below the giant 9.3 percent rise enjoyed in 1984 and reflected the

fact that the economy performed much more sluggishly last year. Still, the advance kept incomes growing faster than the inflation rate, which was 3.8 percent in 1985.

As in the past, Alaska had the highest per capita income of any state, \$17,756, while Mississippi ranked last with an average income of \$9,035.

New England outperformed the rest of the country with a 6.6 percent jump in incomes, which pushed per capita earnings there to \$15,387 — 14 percent above the national average.

New England's gain was credited to the lowest unemploy-

ment rates of any area in the country because of strong growth in computer production and defense work.

The biggest income growth for a single state was in Nebraska, but much of the 9 percent advance came from huge government farm commodity purchases. Without this boost, Nebraska would have had income growth of 5.6 percent last year, close to the national average.

Following Nebraska were the New England states of Vermont, up 7.1 percent; Massachusetts, up 7 percent; and New Hampshire, up 6.9 percent.

\$320 in fees. For the current fiscal year and calendar year periods to date, 15 mechanical permits have been issued for \$1,446 in fees. The city began issuing mechanical permits in March under new regulations.

Total of all fees and fines collected by the department in April were \$5,249.81. For the current fiscal year period, the department has collected \$29,919.34 in fees and fines, with \$17,122.71

listed for the calendar year. For the previous fiscal year period, totals were \$20,495.71.

In April department personnel conducted 27 building inspections, 19 electrical, 58 plumbing, 10 mechanical and 72 miscellaneous.

Fiscal year totals for inspections are 218 building, 177 electrical, 359 plumbing, 12 mechanical and 796 miscellaneous.

TEXAS/REGIONAL

Clements launches campaign; Railroad Commission decided

DALLAS (AP)—It's been called "Rocky II:" the gubernatorial rematch between Democratic Gov. Mark White and Republican Bill Clements, the incumbent whom White beat in 1982's upset.

Clements, on the comeback trail, launched his November election campaign by saying White must win the November election to keep his national political ambitions alive.

"This incumbent ... has a real burden to carry here, that if he's going to realize his political ambitions, he's going to have to win this election," Clements said.

Mark McKinnon, White's campaign press secretary, referred to White's upset of Clements four years ago and said, "We're ready for 'Rocky II.'"

With 100 percent of the vote counted, White received 588,365 votes, or 53.8 percent, followed by Andrew Briscoe III with 247,448 votes, or 22.6 percent; Don Crowder, 120,632, or 11 percent; Bobby Locke with 58,971, or 5.4 percent; Sheila Bilyeu, 39,406, or 3.6 percent, and Ron Slover with 39,065, or 3.6 percent.

In the Republican race, Clements got 317,469 votes, or 58.4 percent; Tom Loeffler had 117,521 votes or 21.6 percent, and Kent Hance had 108,182

or 19.9 percent.

In other races, Lt. Gov. Bill Hobby and Agriculture Commissioner Jim Hightower won renominations easily. Fellow Democrats Attorney General Jim Mattox and Land Commissioner Garry Mauro were unopposed.

Former minister David Davidson of Austin will face Kingwood lawyer Aaron Bullock in a runoff for the Republican nomination for lieutenant governor.

Bill Powers, executive vice president of the Texas Poultry Association in Austin, won the Republican nomination for Agriculture Commissioner.

Final vote tallies Monday ended the "Chinese water torture" for potential runoff election candidates to the Texas Railroad Commission.

Results from the secretary of state's office showed P.S. "Sam" Ervin, a Dallas oil and gas consultant, edging out John Poulund of Dallas by less than 5,000 votes to grab a runoff position against state Sen. John Sharp for the Democratic nomination to the Railroad Commission.

In the Republican race for the job, state Rep. Milton Fox of Houston beat Ed Emmett by less than 3,000 votes to grab the runoff spot against

John Thomas Henderson, an Austin real estate developer.

"It's been kind of like Chinese water torture, sitting around waiting to know," Fox said. "This runnerup spot is more desirable than it may look to the casual observer."

Fox, an engineer, said now he hopes to make his qualifications better known.

Ervin could not be reached for comment. There was no answer at his Dallas office Monday.

The final results in the GOP primary showed Henderson had 116,041 votes, or 29.9 percent, to Fox's 100,071 votes, or 25.8 percent. Emmett was third with 97,369 votes, or 25.1 percent.

In the Democratic primary, Sharp had 414,023 votes, or 45.2 percent, to Ervin's 187,889 votes, or 20.5 percent. Poulund had 183,410 votes, or 20 percent.

In Supreme Court races, Sears McGee, an 18-year veteran of the high court, ran third in the Democratic primary. A June 7 runoff will match state Sen. Oscar Mauzy against Shirley Butts, an appeals court judge seeking to become the first woman ever elected to the Supreme Court.

Appointed Supreme Court Justice Raul Gonzalez and former state Rep. Jay Gibson of Odessa will be

in a runoff for the Democratic nomination for Place 4, and Supreme Court Justice Robert Campbell and appeals court justice Jim Brady of Austin will meet in a runoff for the Democratic nomination in Place 2.

Republican John L. Bates, a Waco lawyer, won his party's nomination in Place 4 and Appeals Court Judge Charles Ben Howell of Dallas got the nod in Place 1.

A Republican runoff for attorney general pits former Williamson County District Attorney Ed Walsh and State District Judge Roy Barrera, Jr. of San Antonio.

Kemp dance hall operator M.D. Anderson Jr. will face Tyler high school teacher Grady T. Yarbrough in a Republican runoff for land commissioner.

Comptroller Bob Bullock and Treasurers Ann Richards, both Democrats, had no opposition from either party.

Of 27 congressional races, incumbents faced opposition in only eight races and all won re-nomination.

Pete Snelson, who spent 20 years in the Texas Senate, won the Democratic nomination for the seat vacated by Loeffler.

Three Hispanics lead statewide races in first primary

AUSTIN (AP) — Gov. Mark White will face "unmitigated disaster" in the November general election if Democratic voters turn their backs on two Mexican Americans in statewide June 7 runoff races, says the chairman of Mexican American Democrats.

"All bets are off" if Texas Supreme Court Justice Raul Gonzalez and George "Jorge" Mar-

tiniz are not nominated by Democrats, "and the Republicans will reap the harvest," Ruben Bonilla said Monday.

In complete returns, three Mexican Americans — Gonzalez, Martinez, a candidate for the Court of Criminal Appeals, and Republican Roy Barrera Jr. — led their races in Saturday's primary elections.

Each candidate is seeking to

become the first Mexican American elected to statewide office in Texas.

Barrera, a San Antonio district judge, was first in the GOP race for attorney general with 210,099 votes, or 45.99 percent. On June 7, he will face Ed Walsh, a former Democratic district attorney in Williamson County, who got 158,625, or 34.72 percent.

Gonzalez, an appointee to the court, polled 390,544 votes, or 41.14 percent, and former state Rep. Jay Gibson of Odessa was second with 271,797 votes, or 28.63 percent.

Martinez, a Dallas lawyer, led Denton lawyer M.P. "Rusty" Duncan III 259,671 to 245,270 votes, or 29.08 to 27.46 percent, for the criminal court.

"The Republicans obviously are going to nominate Barrera,"

said Bonilla. "And because of Barrera's extraordinary showing, it has become incumbent for Democrats to jump on the bandwagons for Gonzalez and Martinez today with unqualified endorsements and support."

"It becomes obvious that to win in November Democrats must have a very strong following and mandate from Mexican Americans ... and the high turnout necessary for Gov. Mark White's re-election depends largely on the visibility and electability of Mexican Americans statewide," Bonilla said.

"It would be unmitigated disaster for the governor and Democrats if Gonzalez and Martinez were rejected while Roy Barrera is embraced (by Republicans)," Bonilla said in a telephone interview.

Bonilla said Gonzalez, the first Mexican American to sit on the Supreme Court — as an appointee of White's — "ran a magnificent campaign on a shoestring budget."

But now, he said, "It's time for the business community to step forward and lend support to Gonzalez, Martinez and MAD to ensure that the Democratic leadership remains in office for another four years."

Bonilla said despite a crossover vote by some Mexican American Democrats for Barrera, "this does mean we will abandon" Attorney General Jim Mattox. "He (Mattox) will still win and will have the overwhelming support of the Mexican-American electorate," Bonilla said.

He described Saturday's prim-

ary as a "magnificent day" for Hispanics, but Gonzalez said, "I wouldn't go that far. I've been pounding the pavement seven days a week, and I'm ready to leave and get back to work and to my family."

"What would be even better would be 50.1 percent of the vote."

Off beat By Cathy Spaulding

The pain of motherhood

Five women gathered around the coffee table. Mothers' Day was only five days away, but none of them seemed too thrilled about Motherhood.

Brenda came in late and apologized as she started spooning mashed peaches into her baby's mouth.

"I'm sorry, but it just seemed to take hours to get Amy ready," she said. "I just finished getting her sleeper on when, wouldn't you know it, she decided she wanted her diaper changed. So it took another ten minutes to take care of that mess."

"I wouldn't mind it so much if she hadn't have kept me up until 3 a.m. last night," she continued. "First we thought it was teething problems, so Bobby went to get some apricot brandy to rub on her gums. When that didn't shut her up, we thought it was something worse, colic or something."

She sneered at the baby, who was looking back at her with unrepentant eyes and a tiny pink tongue poking from the peach mess.

"Child you're going to be the death of me yet," Brenda sighed.

"Wait till they get into school," remarked Mona, who was pouring herself yet another cup of coffee. "Andy, my first grader, saw fit to throw a temper tantrum right in the middle of K-Mart the other day just because I wouldn't buy him a new Go-bot. The one that he had didn't do all those fancy things that the cartoons on TV does, so he threw the damn thing clear across the porch. Then he blames me for not getting him a new one."

"Then LuAnn decided to bake me a cake," she continued. "Well, I was so infuriated at the mess she left that I took that painted wooden spatula she made me in Brownies — the one that says *Moms R Love* — and whacked her butt with it. About an hour later she marched in the bathroom, looked me in the eye, and broke that spatula right in two over her knee. I was so upset, I cried until 3 a.m."

She looked over at the tired woman who was staring at her cigarette: "Maybe when they get to be older, they'll be like your kids. So smart, and intelligent and popular. I hear your daughter's at the top of her class and I hear she could be head cheerleader again next year."

"Oh, you're Linda's mother! She and I go to school together," Brenda perked up.

"My name is Betty, if you don't mind," the tired woman snapped.

Then she took a breath: "I'm sorry. It's just that you don't have to live with these teen wonders. Bryan must be the only seventh grader who reads Albert Camus and designs his own computer systems. He knows that and his teachers know that, but he still can't muster a grade above 72."

"And Linda. You know what America's Sweetheart pulled last week? The night before the prom, she said she was going to Claire's to study for a test, then she came stumbling into the house at 3 a.m., stone cold drunk. When I confronted her with it, she just looked at me and said, 'what are you gonna do, ground me for the night.'"

Betty took a drag from her cigarette and forced a nervous puff out the side of her mouth.

"I admit, I partied some when I was young, but at least I showed some respect for my mama."

"Love them when you have them," Carol said. "For four years after high school, Terri didn't speak to me, not a 'hello' or a 'go to hell' or anything. Then a few months ago, she came home. Her husband walked out on her, I guess, and she lost her job in Odessa. Damn oil business. When she's not out seeking another job, she sits at home staring out the window. Stays up until 3 a.m. wondering when it's all going to end. And I don't know what to tell her."

Tears welled in her eyes.

"I just wanted to hold her and wipe away all the pain and disappointment I caused her all these years."

Mattie leaned back in her chair.

"Ladies, I'm 83 years old and believe me, I've been through everything you're going through now," she said. "The weariness, the anger, the confusion, the guilt. And I've seen it passed on through three generations."

"My pastor says that mothers are a living sacrifice for their children and maybe he's right," she said. "We all know that there's a lot more to Mothers' Day than just lace and lilies and home-made cards. And we owe it to ourselves to celebrate that."

She held up her beer schooner for a toast.

"So here's to us, ladies. I don't know whether it's to our credit or our downfall, but through it all, we never let them know it hurts."

Mattox: executions can proceed

AUSTIN (AP) — The U.S. Supreme Court decision allowing death penalty opponents to be barred from capital murder case juries means Texas executions should proceed at a quicker pace, Attorney General Jim Mattox says.

Among others, the decision applies to the case of Jay Kelly Pinkerton, who is scheduled to die by lethal injection on May 15, Mattox said.

The high court, voting 6-3 on Monday, decided an Arkansas case which had raised questions about dismissal of such jurors. Texas and 37 other states had filed written arguments on Arkansas' behalf.

In its ruling, the Supreme Court said the Constitution doesn't pro-

hibit removal for cause of prospective capital murder case jurors who state they oppose the death penalty.

That argument had been raised in appeals filed by several convicted murderers in Texas, said Assistant Attorney General Paula Offenhauser.

"The question has been raised in virtually every request for a stay of execution that has been filed," she said, including Pinkerton's.

Pinkerton was sentenced to die for the 1979 mutilation murder of Sarah Donn Lawrence in Amarillo. An apprentice meat cutter, Pinkerton also was convicted of the mutilation slaying of Sherry Welch in Amarillo.

Pinkerton had faced an August

1985 execution, but he was granted a last-minute stay by the Supreme Court pending the outcome of the Arkansas case.

"The Pinkerton case is the most immediate to be affected by today's Supreme Court decision," Mattox said.

EVER STRIVING FOR TOP O' TEXAS
TO BE AN EVEN BETTER PLACE TO LIVE

Let Peace Begin With Me

This newspaper is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessings. Only when man understands freedom and is free to control himself and all he possesses can he develop to his utmost capabilities.

We believe that freedom is a gift from God and not a political grant from government, and that men have the right to take moral action to preserve their life and property for themselves and others.

Freedom is neither license nor anarchy. It is control and sovereignty of oneself, no more, no less. It is, thus, consistent with the coveting commandment.

Wally Simmons
Managing Editor

Opinion

Ruling a victory for press freedom

The recent Supreme Court decision placing the burden of proof on plaintiffs in libel suits is obviously a victory for news organizations across the country, particularly smaller organizations that don't have the financial resources of a CBS or a Time Inc., to risk going to court. But the court's decision, in our opinion, is more than a victory for the press; it's a victory for the American people.

Those filing libel suits, some no doubt with legitimate grievances, won't see it that way, of course. Now it will be more difficult to win damages in cases where conflicting or inconclusive evidence leaves the jury in doubt on the issue of truth of fact. No amount of high-minded talk about the value of a free press will suffice to make amends. But the more basic issue involved in the court's decision, in the words of Justice Sandra Day O'Connor, is "to insure that true free speech on matters of public concern is not deterred."

The rationale for the courts' commitment to vigorous public discussion and communication is that self-censorship by newspapers and broadcasters, growing out of a fear of libel suits for innocent error, has the same effect as official censorship. We are deterred from doing our job, that of providing our readers and listeners with information essential to self-government. The court's ruling will have the effect of making such self-censorship less likely.

Nearly two centuries ago, James Madison conceded that press freedom is sometimes carried to excess, unfortunately, but that a remedy for such excess had not been discovered. "Perhaps it is an evil inseparable from the good with which it is allied," Madison observed. "Perhaps it is a shoot which cannot be stripped from the stalk without wounding vitally the plant from which it is torn. However desirable those measures might be which might correct without enslaving the press, they have never yet been devised in America."

Stockman close to truth

David Stockman's book detailing his view of life in the Reagan administration has been attacked by both the Right and the Left. That's unfortunate because — despite his petty, self-serving, and unsubstantiated attacks on the character of his fellow Reaganites — it's an important and useful book about politics, specifically the politics of the welfare state.

I see it as something other than an attack on one group of politicians to the exclusion of another group of politicians. It is, rather, an attack on all politicians. What Mr. Stockman has said is that we have now come to a point in our history where, in matters of economics and politics, politics dictates economic policy decisions. The Reagan administration, Stockman contends, acted as if it could not, and should not, make the reversal of that equation a top priority.

In a recent Newsweek interview, Stockman summarized the legacy of the so-called "Reagan revolution" by saying, "We challenged everything...and it caused the system to have a referendum about what it thought of itself...we come to the conclusion — even though the free-market idea got plenty of hearing — that we wanted a quasi-protectionist policy...that is important for the country to find out." The "we" in Mr. Stockman's statement to Newsweek is open to interpretation. I'm inclined to believe that a broad interpretation is warranted: "we" means everybody.

As much as I would prefer not to think so, I'm afraid that David Stockman is, at least for the moment, absolutely right in the substantive argument he tries to make in his book. He concludes that the desire to have government protect us from the vicissitudes of economic life has become so deeply engrained in the fabric of American life that it resists rational criticism. When this desire is honored in the formulation of federal economic policy — as it most surely has been for the past fifty years — it feeds on itself and retards economic growth.

To excise this cancer from our economic and political system requires radical measures — specifically the inflicting of short-term economic

pain through deep program budget cuts. But doing this entails enormous political risks. The Reagan administration, Stockman claims, was so mesmerized by the idea that painless supply-side tax cuts would generate enough economic expansion to satisfy every pig at the public trough, with enough left over to improve the living standard of those who actually produced the goods and paid the taxes, that they refused to take on the pigs and substantially cut spending. In a word, for fear that the pigs would squeal, the Reagan team backed away from forcefully attacking the expenditure side of the budget.

Stockman's book hit the bookstores at about the same time President Reagan, Vice-President Bush, and the Governors of Texas and Oklahoma were expressing concern about the impact of falling oil prices on certain elements of the U.S. oil industry. While the timing was coincidental, it couldn't have been more perfect as an illustration of what Stockman has been trying to say. What these august politicians have been saying is that while they love the free-market system, they are not adverse to a little interference with the way it works from time to time.

President Reagan, for example, has announced that he would endorse some extra tax benefits for owners of high-cost stripper wells to help them keep the wells pumping oil in the face of falling prices. Mr. Stockman has reluctantly concluded that we seem to want a "quasi-protectionist" economic system. What the President and the oil politicians seem fully prepared to say, in response to pleas from oil producers, is that they are willing to use government to give them their "quasi-protectionist" economic system.

Why are pleas for special favor made? More importantly, why are they honored? I suggest that it's the result of a convergence of three ancient forces: willful economic ignorance, self-interest, and the lust for power.

The market has always been able to handle self-interest and diffuse power. In an open market — a market in which there are no legal barriers to entry — self-interest can only be real-

ized through the production of goods and services that others are free to accept or reject in this environment whatever power one may acquire is, at best, fleeting so long as buyers are free to accept or reject what the seller has to offer. Adam Smith taught us this two hundred years ago. In the market arena, as English playwright and poet Ben Jonson (1572-1637) observed, "of all the things that men might do, attempting to earn money is the least mischievous."

In the political arena, economic self-interest is realized by employing the coercive power of government to take from some and give to others. In this world the outcome is always zero-sum: what one group gains, others must lose. Once that game begins it can never end by its own accord because — and this is central to the issue — it confers power upon politicians and upon those who are willing to finance politicians. Its end must be perpetual sub-optimal economic performance and political conflict. Everything is distorted — even respect for honesty: the oil men refuse to admit that they are seeking political support for their own economic self-interests, rather they claim they are only seeking what is best for "national security."

The willful economic ignorance which clothes the desire for a "quasi-protectionist" system is the widely held conviction that markets don't really work the way they are supposed to anyway, so government has no choice except to step in (be invited in?) to correct the errors of the market place. The current widely held myth is that OPEC has forced prices down to capture monopoly power in the future. One moment's reflection would show that to do this would bankrupt OPEC long before it could accomplish its end. But it's not convenient to analyze the issue in that way if politicians can be persuaded with less effort. Unfortunately, politicians can be persuaded.

The tragedy, Dave Stockman argues, is that the Reagan administration has failed to change the old ways of doing business. That's why he calls his book "The Triumph of Politics." Like it or not, the evidence is that Stockman is closer to the truth than many would like to believe.

Lewis Grizzard

War against salad bars

At long last, I am getting some assistance in my on-going crusade against what I consider to be a dastardly affront to the American consumer, the salad bar.

In a recent edition of *The Wall Street Journal*, there was a front-page article indicating that salad bars can be a health hazard. In my opinion, they are also an insult to the average American eater (who wants to go to the trouble and expense of dining out and then have to get up and make his or her own salad?).

The *Journal* points out that because salad bars usually feature a number of perishable food and because you don't know who's been handling the food before you get up to make your salad, there is a chance you could wind up with food poisoning as a result of a visit to a salad bar.

The *Journal* also points out that people can sneeze on the lettuce, stick their fingers in the blue cheese dressing and drop a hair or two on the feastings as well.

There are even worse things that can happen. I quote from the *Journal's* article: "Jack Williams, a Los Angeles County health official, was piling lettuce on his plate one day when he saw

a youngster pick his nose and then use the same hand to pluck a cherry tomato and fling it back."

Grr-oss. What happened to the salad bar in this country is what happens to a great many fads. It got out of hand.

Wendy's has a salad bar, Burger King has a salad bar and likely it won't end there. I am awaiting the day chiropractors put a salad bar in their offices.

Picking up germs at a salad bar isn't the only risk the customer takes when he or she approaches a salad bar, either.

Some restaurants do put a "sneeze shield" on their salad bars, but the problem there is you have to bend over the shield and then reach way in the back, which is where most restaurants put all the good stuff, like the cherry tomatoes.

A person could severely injure his or her back attempting to make a move only a contortionist could pull off without fear of winding up in traction. Some to think of it, perhaps chiropractors are the ones who have been behind this salad bar idea all along. Here is what we, as Americans,

should do to get rid of salad bars forever.

When you have finished giving your order and the waitress or waiter says, "Help yourself to the salad bar," you reply, "Are you out of your mind? I worked all day. My wife-husband worked all day. We decided to treat ourselves by going out to dinner."

"We want to sit here at this table, have a couple of drinks, and then eat dinner."

"We don't want to have to mix our own drinks. We don't want to have to prepare our entree, and we do not — under any circumstances — want to get up and go to the trouble of fighting the mob at

the salad bar."

"We demand someone prepare our salad for us. We will tell them exactly what we want on our salad, we expect them to be brought here to our table promptly, and we expect them to be served with a smile. Understand, bean-sprout-breath?"

If everyone were that forceful, we could rid our country of salad bars and make it a much better place in which to live, raise a family and dine out.

Move quickly before one more nose-picker has the opportunity to get his hands on our tomatoes.

(c) 1986 by Cowles Syndicate, Inc.

Bits of history

In 1789, the first inaugural ball was held in New York to honor President and Mrs. George Washington.

In 1825, Italian composer Antonio Salieri died.

In 1833, composer Johannes Brahms was born in Hamburg, Germany.

In 1840, composer Peter Ilich Tchaikovsky was born in the Ural region of Russia.

In 1915, a German torpedo sank the British liner Lusitania off the Irish coast. Nearly 1,200 lives were lost.

In 1939, Germany and Italy announced a military and political alliance known as the Rome-Berlin Axis.

In 1960, Leonid Brezhnev replaced Marshal Kliment Voroshilov as president of the Supreme Soviet.

THREATENS AMERICA — Abu Abbas threatens to strike within the United States because of its "war against us (the Palestinians) on behalf of Israel" during an interview aired by NBC news Monday. Abbas, who masterminded the hijacking of the Achille Lauro cruise ship last year, also called President Reagan his "enemy No. 1."

Reagan undaunted by terrorist threat as radicals flex muscles

By BARRY SCHWEID
AP Diplomatic Writer

TOKYO (AP) — President Reagan today said he does not feel threatened by a Palestinian militant who labeled him "enemy No. 1," even as Japanese radicals flaunted their ability to raise tensions at the seven-nation economic summit talks by setting off a noisy smoke bombs in subway and train stations.

The president's defiant rejection of a warning by Abu Abbas, head of a faction of the Palestine Liberation Front, that he would strike against America and the series of bombings underscored the dominant role of terrorism at the three-day meeting of the leaders of seven industrial democracies.

Reagan had steered the six

other summiteers to approve a hard-hitting declaration condemning Libya and calling for a package of measures to contain and punish terrorists. Its approval was hailed by Secretary of

An AP News Analysis

State George P. Shultz as a triumph of unity and a message to Libya's Col. Moammar Khadafi that "You've had it pal; you're isolated."

In an interview with NBC at an undisclosed location, the Palestinian renegade vowed his group would begin launching attacks in the United States.

"America is now conducting the war against us on behalf of Israel," he said. "We therefore have to respond against America

in America itself." He then described Reagan as "enemy No. 1."

Abbas is the man Atty. Gen. Edwin Meese II labeled the mastermind of the hijacking of the Achille Lauro cruise ship last October in which a wheelchair-bound American passenger was shot and thrown overboard. His assertion did not appear to daunt Reagan, who was asked about it by reporters at picture-taking sessions.

"He's going to strike out," Reagan assured them.

Asked at another session about Abbas' threat, Reagan paused, narrowed his eyes and replied: "Let him try."

"You're not scared?" a television reporter asked. "No," Reagan said.

Senate committee ready to vote on major tax overhaul

WASHINGTON (AP) — The Senate Finance Committee, making quick work of a flurry of minor amendments, is ready to consider some major changes that could determine whether Congress overhauls the income tax this year.

"I find the committee enthused about the bill," Chairman Bob Packwood, R-Ore., told reporters at the end of a long session Monday night. He declined to say whether he has the necessary 11 votes to get the bill through the committee, although success seemed clearly within reach.

The committee plowed through more than a dozen amendments Monday, voting, for example, to extend for two years some energy

tax credits for business and to penalize American workers who remain in Libya in defiance of President Reagan's executive order.

Each amendment offered was accompanied by a plan to pay for it, so that the overall bill would not worsen the deficit.

Sen. Daniel Patrick Moynihan, D-N.Y., is trying to preserve the tax deduction now allowed for state and local sales taxes. He is offering an amendment to do that, and to pay for it by scaling back the corporate tax-rate reduction in Packwood's bill.

"I would not look kindly on that," Packwood said.

Another significant amendment would attempt to salvage at

least a portion of the tax-deferred Individual Retirement Accounts for millions of workers who are covered by company pensions. Packwood's bill would continue IRAs only for those without company plans.

The bill would radically change the income tax, cutting rates for most individuals and corporations while reducing or eliminating various deductions and exemptions.

More than 6 million of the working poor would be removed from the income-tax rolls entirely.

In addition to cutting individual tax rates, the proposal would nearly double the personal exemption to \$2,000 and increase the standard deductions significantly.

The deduction for state and local taxes on income and property would be retained, although the writeoff for sales taxes would be killed. The plan also would keep the deduction for mortgage interest on two homes.

Specialist operates on Soviet nuclear victims

LOS ANGELES (AP) — Three more bone-marrow transplant specialists and thousands of pounds of medical supplies and equipment have been flown to Moscow to assist in treating victims of the Soviet nuclear plant disaster.

Occidental Petroleum Corp., whose chairman, Armand Hammer, helped arrange the assistance, said the three specialists will meet with Dr. Robert Gale, the UCLA physician who has begun operating on the Chernobyl victims.

"Dr. Gale is receiving full cooperation from the Soviet doctors and the Ministry of Health," Hammer said Monday, adding that he has been in touch with Gale by telephone daily since Gale left last week.

Gale and the other bone-marrow specialists are expected to play an important role in saving radiation victims. Heavy doses of radiation destroys bone marrow, reducing the body's disease-fighting system and production of healthy blood, ultimately causing death.

Bone marrow transplants were developed primarily to help victims with such diseases as leukemia.

The decision by the Soviet government to admit Gale, head of the International Bone Marrow Registry, was that country's first major acceptance of outside help

in coping with the radiation leak from its Chernobyl nuclear power plant near Kiev. It has steadfastly refused offers of help from foreign governments including the United States.

The cost of Gale's mission is being underwritten by Occidental, although the Los Angeles-based oil company said Moscow plans to repay it.

Occidental gave no indication of the number of radiation victims, and spokesman Frank Ashley said he couldn't elaborate.

Gale began operating on Soviet patients over the weekend, the company said.

The 40-year-old Gale is an associate professor of medicine at the University of California at Los Angeles.

FDA examining safety of heavy vitamin use

WASHINGTON (AP) — More than 10 years after being battered on the issue, the Food and Drug Administration is cautiously looking again at the question of whether "super vitamins" should be regulated as drugs.

An FDA official said Monday the agency is encouraging doctors to record their patients' vitamin use and to report overdoses and side effects on the forms they use to report dangerous reactions to drugs.

"We're looking for clear documentation of toxicity associated with vitamin and mineral use to help us with the regulatory process," said Dr. Allan Forbes, the FDA's nutrition and food sciences director. "We urge physicians across the United States to

join with us in this important effort."

A trade group representing vitamin manufacturers later said the group "would be strongly supportive" of efforts to gather more information about the effect of diet supplements, saying the figures would bolster their position if they are objectively analyzed.

But J.B. Cordaro, president of the Council for Responsible Nutrition, added he feared the FDA was "out to prove a predetermined conclusion." He noted that the call for more information was accompanied by disclaimers that not enough was known about long-term effects to take action.

In the early 1970s, the FDA issued regulations banning the

non-prescription sale of superpotent Vitamin A and D products because of a potential health risk.

The FDA also proposed that vitamins and minerals containing more than 150 percent of the recommended daily allowance (RDA) for the substance involved be regulated as drugs.

The FDA was forced to back off by thousands of complaints from the public, 15 lawsuits and a special provision passed by Congress. The congressional order required vitamins to be treated as foods rather than drugs unless the agency can prove they are unsafe.

The distinction is critical. Drugs are tested for safety and

effectiveness before sale is allowed; foods are regulated only for purity.

The congressional order is still in effect. But Forbes noted the results of the physician reports could be enough to satisfy the requirement for proof.

The new look at vitamins was not initiated by FDA. The agency instead joined an effort by a group of scientists and dietitians who said they were concerned about the growing trend of people taking megadoses of certain vitamins in hopes of preventing or treating illness.

"We in the scientific community are concerned with the increasing notion that supplements can be used to prevent serious diseases" such as cancer and osteoporosis, said Dr. David Heber, chief of clinical nutrition at the University of California at Los Angeles School of Medicine.

"Americans should get their nutrients from food instead of pills," Heber said. "Large supplement doses of single nutrients won't prevent disease, but instead will upset absorption of other nutrients."

Pravda says non-nuclear explosion caused accident at Chernobyl plant

MOSCOW (AP) — The Communist Party newspaper Pravda today gave Soviets their first detailed account of the Chernobyl disaster, saying a non-nuclear explosion 10 days ago blew apart the building housing a reactor and shot flames nearly 100 feet high.

Pravda said the situation remained "complicated" because water and chemicals were useless in extinguishing the fire, but did not say specifically whether

the reactor fire 80 miles north of Kiev still was burning.

Western scientists have said the reactors' graphite cores, each about 20 feet long and totaling about 1,000 tons per reactor, are like pieces of charcoal that can smolder for a long time.

The Pravda account was the first detailed report on the accident to the Soviet public. Some officials traveling abroad have provided additional information but domestically the government has issued only brief reports.

It followed a government statement Monday that gave the broadest description of the affected area and the first indication from the Kremlin that radioactivity had spread beyond an 18-mile evacuation zone.

The statement also indicated contamination threatened a river that feeds a major reservoir north of Kiev, the Ukrainian capital of 2.4 million people.

Pravda said there was a partial discharge of radioactivity in the accident, but did not report the level or current emission readings. It did not explain the cause of the explosion, but said it was not a nuclear one.

"An explosion destroyed structural elements of the building housing the reactor and a fire broke out," it said. "That happened at night. After the explosion the engine room coating took fire. The firemen were fighting the blaze at a height of 30 meters (100 feet)."

"Their boots stuck in bitumen that melted because of high

temperature, soot and smoke made it difficult to breathe, but the brave, bold men kept fighting the blaze courageously," it said.

It did not say whether firemen were among those reported injured in the disaster.

Boris Yeltsin, the Moscow Communist Party chief, said in West Germany on Monday that foreign experts will be allowed to inspect the nuclear plant when it is safe to do so.

The government says two people were killed and 197 injured in the accident, but other governments believe the toll is higher. Yeltsin said Sunday that about 20 of those injured are in serious condition and up to 20 more could be added to the serious list.

The head of the Vienna-based International Atomic Energy Agency, Hans Blix, arrived Monday for talks with Soviet officials about the accident.

"But I'd Never Made Funeral Arrangements..."

"When the doctors explained Bob's illness to me, I knew I had to prepare. And with so little time — confused, upset — with no idea what was involved in making funeral arrangements.

"Thank goodness for my sister. She brought me a helpful booklet from the funeral director our family knew. It explained what I needed to know, the vital information and papers I would need, a check-

list of decisions to be made — everything necessary to get through that trying time.

"The loss of Bob was no less painful — but Sis, along with the helpful guidance of the funeral director, made it all a little more bearable."

European rocket prospering with U.S. setbacks

PARIS (AP) — While the U.S. space program is suffering through a string of failures that began with the January space shuttle explosion, Europe's Ariane rocket program is booked nearly solid through 1989 with contracts worth \$1.23 billion.

"We are currently the only commercial company able to put satellites into orbit," said Charles Bigot, director of Arianspace.

Arianspace, the commercial arm of the European Space Agency, has been competing with America's NASA for commercial satellite contracts since 1982.

To accommodate the current boom, the Ariane program has added three more launches to its traditional five launches per year through 1989.

AWARD ENTRY - Clean Pampa, Inc., recently sent in its contest entry for a Governor's Community Achievement Award sponsored by Keep Texas Beautiful, Inc. From left are Kathy Massick, new executive coordinator; Jo Potter, former executive coordinator, and Barb Kell, chairman of the local Governor's Award Committee. The entry contains information concerning the

organizations goals, projects and accomplishments along with information on city, civic clubs, schools and other community involvement in combating litter and trash problems in Pampa. Pampa is entered in the 25,001 to 60,000 population category, with a chance to win a \$60,000 for landscaping improvements for highway entrances into the city. (Staff photo)

Dear Abby

Antibiotics have surprising result for women on the pill
By Abigail Van Buren

DEAR ABBY: Please warn women who rely on birth control pills that if they take antibiotics, the effectiveness of the pill may be greatly reduced.

My grandson and his lovely wife are soon to be parents — thanks to the antibiotics she had taken for a brief time due to an infection in her ear! She was more than a little surprised to learn she was pregnant. Thank heavens, they can afford this unplanned pregnancy — many young couples can't.

Please print this for others who do not know the facts of life (no pun intended).

INDIANA GRANNY-TO-BE
DEAR GRANNY: It's inconceivable (pun intended) that a physician would fail to mention this fact to a patient of child-bearing age. Thanks, Granny, for a valuable letter.

DEAR ABBY: A myth in a good cause is still a myth. In a recent column on the importance of one vote, one of your readers stated, "In 1960, one vote change in each

precinct in Illinois would have defeated John F. Kennedy." Good story — but not true.

Kennedy received 303 electoral votes in 1960. He needed 268 to win. Illinois had 27 votes. Had Kennedy lost Illinois, he still would have had 276 electoral votes — and still would have been elected president.

Best from your friends at the Chicago Tribune.

RANDY CURWEN, CHICAGO

DEAR ABBY: I have a message for "Smart and Confused," who felt superior. Feeling superior is not all that rare. I also have always felt superior to most of my contemporaries. Oddly enough, I kept running into people who felt exactly the same way. To paraphrase Ambrose Bierce: "An egoist is someone who thinks more of himself than he does of me."

Feeling superior is an arrested state of development. Compassion, not intelligence, is the greatest human attribute. An ounce of kindness is worth a pound of cleverness. It's nice to be intelligent, but it's intelligent to be nice.
GARY ENGLE, BELTON, MO.

Annual golf tourney benefits cancer society

PANHANDLE — Carson County's unit of the American Cancer Society is to sponsor a golf tournament May 10 at the Panhandle Country Club with all proceeds going to the Cancer Society.

Two tee-offs are planned, one at 8:30 a.m. and the other at 1:30 p.m. Coffee and donuts are to be served in the morning. Hamburgers and homemade pie will be available from noon until 8 p.m.

Prizes include two round-trip tickets to New Orleans and to round-trip tickets to Albuquerque, both donated by Southwest Airlines. A pewter piece, "Motherhood" has been donated by Kenneth Wyatt. Also donated as prizes are a gold ladies watch from Barnes Jewelers, a weekend for two at the Fifth Seasons Inn West, Sunday brunch for two at the Sheraton Inn. Meat for hamburgers was donated by Harold's Farmers Market and Coca-Cola has donated drinks and t-shirts. A first low gross gift certificate for \$40 will be awarded to the winning team of the morning and afternoon, and

Electrical safety awareness month

Watch for power lines

Anyone working outside around the home this time of year should be careful to stay clear of power lines, says Hermilo Martinez, manager of safety for Southwestern Public Service Company (SPS).

Appropriately, May is National Electrical Safety Awareness Month because people are spending more time outside, near power lines and electrical facilities, Martinez says.

"The slightest touch of a power line can be enough to seriously injure or kill," he says. "Sometimes people forget to think about those lines when they're trimming trees, moving a ladder or putting up a rooftop antenna."

Those who live in neighborhoods with underground electric-

al distribution lines should be careful when digging, too, Martinez says.

Spring storms pose another potential hazard, he says. "High winds can damage poles and lines. Anyone who sees a power line sagging or hanging broken should stay away from it, keep others away, and call us immediately. And be sure not to touch anything the line is touching, like a chain-link fence, which also could have become energized and dangerous," he says.

Martinez adds that parents should teach their children the dangers of carelessness around electricity, especially since school soon will be out for the summer.

"Kids will be spending more

time on their own, away from the house," he says. "They need to know to stay out of substations and to not climb utility poles or trees near overhead lines."

In this part of the country there can be a lot of irrigation pipe and it should be handled with care, Martinez says.

"Irrigation pipe can be an excellent conductor of electricity," he says. "If someone lifts a tall section of pipe to move it or to chase out a rabbit, he could hit an overhead line and get electrocuted. All you have to remember is to look up and stay clear."

SPSP offers many programs and materials about electrical safety to the general public, schools, employers, civic clubs and other groups. SPS offices have more information.

Clarification

In the Sunday Lifestyles article concerning American Cancer Society memorial envelopes to be included in May bank statements, First National Bank of Pampa was inadvertently omitted from information provided to *The Pampa News*. Organization starts hotline for Hispanic citizenship in Texas

SAN ANTONIO, Texas (AP)—A national Hispanic organization has targeted Texas Hispanics for a campaign to beef up citizenship among non-citizen legal residents.

The National Association of Latino Elected and Appointed Officials announced Monday a new citizenship hotline would be available in Texas.

A similar hotline has been opened up in Los Angeles, Miami and Chicago.

The Texas hotline will focus on San Antonio, the Rio Grande Valley, Houston, El Paso and Dallas-Fort Worth, officials said.

There are almost 300,000 Hispanic non-citizen legal residents in Texas out of the state's 1.6 million Hispanic adults, officials said.

"Decisions of the future for Texas and the entire country require full participation and representation of Hispanics," said state Rep. Al Luna, chairman of the Hispanic Caucus of the Texas Legislature.

"Our strongest voice in government is our vote," he said.

Harry Pachon, executive director of NALEO, said for too

long, the Immigration and Naturalization Service (INS) has "put more emphasis on the 'I' than the 'N.'"

The hotline will be manned by bilingual personnel in Washington, he said. The number is 1-800-44-NALEO.

"People calling (the hotline) will receive basic information on citizenship and get referred to community organizations where they can take classes," he said.

However, Pachon said of the 2,000 calls received from hotlines in Los Angeles and Florida, 99 percent are from legal residents.

"The Mexican national, unlike nationals of other countries, has historically taken longer than others to seek citizenship," said Leonel Castillo, former INS commissioner.

Castillo said some studies show Mexican nationals wait an average of 30 years beyond their eligibility to seek citizenship.

In the meantime, these residents, who are in the United States legally, are paying taxes and serving in the military. But they are not voting or enjoying other benefits of citizenship, said

Castillo at a news conference.

"The Southwest has become a melting pot and this project will help make a better stew," Castillo said.

San Antonio Mayor Henry Cisneros said many Hispanics fail to seek citizenship through some oversight or lack of information.

His own grandparents, he said, lived many years in the United States without obtaining citizenship.

"Perhaps because they thought they might return to Mexico or because of loyalty to the mother country," he said, adding that they were politically active here.

Margarita Huanes, executive director of the San Antonio Literacy Council, said she has taught citizenship classes for years.

Mrs. Huanes said she was an undocumented alien at one time "because I didn't know I was."

"Life for non-citizens in San Antonio and elsewhere is going to become difficult — perhaps as difficult as the undocumented alien," she said.

Crockett school students and faculty use suicide prevention

AUSTIN (AP)—The deaths of two Crockett High School students since February have resulted in the establishment of the first districtwide program here aimed at preventing suicides and building awareness of the problem.

In February, a Crockett ninth-grader committed suicide by stabbing herself in the chest, according to a Travis County medical examiner's report. An 11th-grader died Monday of a single gunshot wound to the head. His death is under investigation, but suicide is suspected, a spokesman for the medical examiner's office said Friday.

Vivian Ward, a counselor at the school, said little extra counseling was provided after the death of the first student. "It caught us by surprise, so we didn't do a lot."

Crockett principal Robert Enos said that since the second death, the school has been relying on techniques developed by Betty Phillips, supervisor of psychological services for the Austin district, to provide students with extra counseling.

Ward said she and the nine other Crockett counselors have worked with students individually and in groups.

"Kids need to talk about their feelings," she said, adding that the school's faculty and staff also have been shaken by the incidents. "All of us are feeling so frustrated. But we are learning from this and we will be stronger after this."

Two suicides in one school in the same year would be unusual, particularly so close together, said Ward.

"I have been here 18 years, since Crockett opened, and we might have one a year, but not every year. We probably haven't had more than three or four in the past 18 years," she said.

Records from the Travis County medical examiner's office show that five youths age 18 and younger have taken their own lives since Sept. 1, near the start of the school year. Three were Anglo males, one was a black male and one was an Anglo female.

The Austin suicide-prevention program is similar to other programs that now are being developed across the country, Phillips said.

She said the program, which started in November, advises counselors on how to help stu-

dents come to terms with suicides and trains administrators, teachers and counselors to detect potentially suicidal students.

Two in-service training sessions on the subject have been held for teachers and counselors, and two university professors known as regional experts on suicide prevention have conducted seminars for principals and other administrators.

Phillips said teachers and counselors believe they have been able to prevent some suicides, Phillips said.

When an Austin student is identified as potentially suicidal, a counselor immediately notifies teachers to watch him closely. Parents are notified and urged to obtain outside counseling for the student.

If parents are uncooperative, a child welfare agency is called in

to provide counseling for the child. Some students are referred to a hospital, such as the Travis State Hospital or Shoal Creek, for treatment, Phillips said.

Crockett students said Friday that discussions of suicide have been helpful and educational.

"Until now, I didn't know any of the signs," said senior Leslie Callahan.

"Talking about it has made kids more aware" said senior Barbara Garza. "We now know the warning signals but we learned you can't always detect them all at once."

Phillips said teen-age suicide ranks second to accidents among causes of death of American youths. "And some accidents are thought to be suicides" that are undetected, she said. "During the last five years it has increased dramatically."

National, Texas Democratic officials pleased at LaRouche candidates' defeat

DALLAS (AP)—Lyndon LaRouche disciples lost all their major races in Saturday's Texas primary, and national Democratic Party officials predicted other states will follow Texas' lead in educating voters about LaRouche.

National Democratic officials were interested in the Texas primary because it was the first since the Illinois primary. In that election, LaRouche followers won Democratic nominations for lieutenant governor and secretary of state.

They said they would watch Texas closely for any new gains by followers of the three-time presidential candidate and former communist, who believes the British monarchy is behind a drug smuggling ring and that Henry Kissinger promotes genocide in Africa.

Terry Michael, press spokesman for the Democratic National Committee, said the Texas party did "a solid job of educating vo-

ters about the LaRouche candidates."

"We're optimistic that voters in other states will follow the lead of Texas Democrats and continue to reject these bizarre cultists," he said.

But one LaRouche follower escaped rejection in a major election. In the race for chairman of the Bexar County Democratic Party, a runoff will pit Donald Varella, a LaRouche supporter who drew the most votes of five candidates for the job, against Jane Hibler, who was endorsed by San Antonio Mayor Henry Cisneros and was the second highest vote-getter.

Michael said national party officials are confident that Ms. Hibler will win the June 7 runoff election.

Outgoing Democratic Party Chairman Marilyn Jones said party officials believe Varella won because he was the only candidate with a Hispanic name, and Bexar County has a large

Hispanic population.

But Harley Schlanger, Southwest coordinator of the LaRouche effort, disagreed saying, "It's clear there are a lot of people interested in what we're saying."

In all the state's major races, LaRouche candidates fell to solid defeat.

The nine LaRouche Democrats and one Republican seeking contested congressional seats lost, and the only LaRouche candidate for statewide office — Noel Cowling of Dublin — was trounced 4-to-1 by State Agriculture Commissioner Jim Hightower in the Democratic primary.

In two Houston-area congressional districts, traditionally Republican strongholds, LaRouche candidates were unopposed for the Democratic nomination. But Democratic officials said they are certain the Republicans in those districts will win in November.

Livestock prices down from earlier predictions

By DON KENDALL
AP Farm Writer

WASHINGTON (AP) — Cattle and hog producers have reduced red meat production this year, but the government's dairy herd buyout program and continued expansion by poultry producers are helping dampen market price increases, Agriculture Department analysts say.

As a result, the USDA's price forecasts for 1986 livestock prices have been scaled back 2 percent to 6 percent from predictions made just two months ago.

Department economists said Monday in a new outlook report that market prices of U.S. choice-grade steers are projected to average \$57 to \$62 per 100 pounds of live weight in 1986, about the same as the 1985 average of \$58.37 per hundredweight.

The new 1986 forecast was down from the March prediction of \$60 to \$66 per hundredweight for steers on the Omaha, Neb., market, which is used as the national standard.

Hogs sold for slaughter were forecast at an average of \$42 to \$46 per hundredweight this year, close to the 1985 average of \$44.77 at the major Midwest markets. In March, the agency's hog forecast for 1986 was \$43 to \$49 per hundredweight.

The report said the slaughter of milk cows under the USDA's whole-herd buyout program will provide more beef than otherwise would have been the case. About 1.55 million cows, heifers and calves are expected to move to market over the next year and a half, with about two-thirds of the animals scheduled this spring and summer.

The government is buying additional red meat for domestic feeding programs and for export to help offset the cow slaughter.

"The market was already burdened with large beef supplies and low prices, due to a slower-than-expected marketing pace and continued record heavy slaughter weights," the report said.

Despite those factors, 1986 beef production and the total supply of red meat are expected to decline below year-earlier levels, the report said. However, continued expansion in poultry output will partly offset the decline for red meat.

Overall, total consumption of red meat and poultry may decline 2 to 3 pounds per person from last year's record 214 pounds.

"Large meat supplies will continue to limit price advances, particularly for the more expensive red meats," the report said.

Consumer beef prices dropped 3 percent in 1985 but may rise 2 percent to 3 percent this year, the report said.

"Increased poultry production likely will hold down price gains for beef as beef supplies decline over the next couple of years," the report said. "Consumers will continue to have large quantities of the already lower-priced poultry."

Pork production may drop about 2 percent in 1986, and the smaller supply is expected to make pork more expensive at retail stores.

WASHINGTON (AP) — A former secretary of agriculture says a recent study released by the Rural Electrification Administration showing that most of its low-interest loans have gone to finance projects in non-rural areas was "a cheap shot in the administration's war against the rural electric program."

Bob Bergland, executive vice president of the National Rural Electric Cooperative Association, told nearly 2,000 rural electric leaders from 25 states Monday that the study is an "attempt to twist facts to rationalize the abolition of REA."

Since it was established in the 1930s, the REA, an agency of the Agriculture Department, has lent billions of dollars to electrify the nation's sparsely populated countryside. The report, released in March by the agency, said that today more than 80 percent of REA's low-interest loans "are financing high and medium density projects in the suburbs of major metropolitan areas, particularly in the Sun Belt, the Gulf Coast and Mid-Atlantic states."

Bergland, who was secretary of agriculture in the Carter administration, said the study leaves the impression that the majority of rural electric systems have many more consumers per mile of line than they actually do, supporting administration proposals to phase out REA.

The release of the study, he said, is a tactic designed to stir controversy among rural electric systems, to divide and conquer.

Bergland said the White House last year agreed with the Senate GOP leadership and his association to a plan for reducing REA loan levels for electric systems. The agreement included a provision that the REA would not be phased out.

"We've lived up to our part of the bargain, and we expect them to live up to theirs," he said. "We're willing to do our fair share to help reduce federal budget deficits, but we cannot and will not stand by idly and watch the administration dismantle the Rural Electrification

Administration." Bergland also criticized the administration's proposal for selling federal power facilities as "the president's little garage sale" to give the government a one-time financial boost and "forego billions and billions in revenues for years to come."

The meeting was billed a four-day legislative conference by rural electric co-ops who are in town to help lobby Congress. One group, the South Dakota Rural Defense Committee, brought thousands of petitions with more than 100,000 signatures protesting the administration's plan to

sell the federal hydropower system and eliminate REA programs.

WASHINGTON (AP) — The latest Agriculture Department statistics continue to show a build-up in the production of dairy products from year-earlier

levels. In March, the department said Monday, butter output was about 120 million pounds, up 13 percent from a year earlier. Production of American-type cheese, at 264 million pounds, was up 14 percent, and non-fat dry milk rose 23 percent to 128 million pounds.

Navy officials recommend a return to use of blimps

WASHINGTON (AP)—A Navy board has given its blessing to returning the blimp to active duty, a move that would harness updated versions of a World War II standby and pit it against the latest in Soviet missile technology, Navy sources say.

The Chief of Naval Operations' executive board has recommended to Navy Secretary John F. Lehman that he seek funds to begin building a new fleet of

airships in fiscal 1988, said Navy officials who asked not to be named.

The board, during a meeting a week ago, concluded a newly designed, modern blimp could serve as a useful and relatively cheap "radar platform" that could travel with surface ships and warn them against low-flying cruise missiles, the sources said.

The board is contemplating between 20 and 50 blimps and is

urging Lehman to go to bat for the program during upcoming internal budget fights, the officials added.

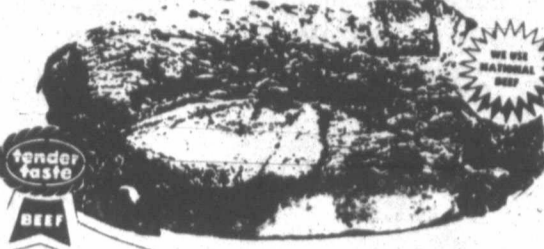

Lehman has not made a final decision, however, and the outlook for his response is clouded by the new Gramm-Rudman balanced-budget law and congressional opposition to increased Pentagon spending, the officials said.

The Navy refused Monday to

discuss the matter.

A vice president of the Goodyear Aerospace Corp., Fred Nebiker, says modern Navy blimps would probably cruise at an altitude of 5,000 feet to 10,000 feet and be capable of being re-supplied and refueled at sea. Such airships could replace helicopters and airplanes that now perform such surveillance missions but whose flight time is limited.

FOOTBALL AWARD WINNERS — Receiving football awards at the annual PHS athletic banquet Monday night were (l-r) Mike Lopez, Michael Parker, Gary Jernigan, David McGrath, Joel Furina and David Carter. (Staff Photo)

Athletes honored at banquet

David Carter was named the Football Fighting Heart Award winner while Paul Simpson and Sandee Stokes were named Hustling Harvesters in boys' and girls' basketball respectively during the Pampa High Athletic Awards Banquet Monday night at M.K. Brown Auditorium.

Carter, a 180-pound senior, was an all-district defensive pick last season. Both Simpson and Stokes were the point guards on the Harvester basketball teams. Simpson also won the basketball free throw award, shooting 86 percent from the line. Stokes, along with Courtney Brown, was also named the girls' outstanding track performer.

For the first time, the Pampa High coaching staff picked the best all-around athlete in both boys' and girls' sports. The athlete chosen must be a senior and competing in two or more sports. Tying for all-around honors in boys' sports were Gary Jernigan, football and track, and Mike Lopez, football and baseball. Coaches decided to hold off on naming the all-around girl athletes until the Lady Harves-

ters return from the Class 4A track meet.

Dr. Frank Kelley, football team physician for the Harvesters, received a special award for his years of service.

Listed below are the various award winners in all sports except for baseball. The Harvesters still have two more baseball games to play and coaches decided to wait until the season was over before picking the award winners.

Best All-Around Athlete — (tie) Boys: Gary Jernigan and Mike Lopez.
Outstanding Cross Country Athlete — Willie Jacobs.
Volleyball Most Valuable Player — Irene Perez.
Volleyball Hustling Harvester — Amy Voyles.
Football Offensive Award — David McGrath, line, and Gary Jernigan, back.
Football Defensive Award — Mike Lopez, back, and Michael Parker, line.
Football Most Improved Player — Joel Furina.
Football Fighting Heart Award Winner — David Carter.

Girls' Basketball Free Throw Award — Hope Henson.
Girls' Basketball Rebound Award — Melissa Nichols.
Girls' Basketball Hustling Harvester — Sandee Stokes.
Boys' Basketball Free Throw Award — Paul Simpson.
Boys' Basketball Rebound Award — (tie) Lonnie Mills and Petie Davis.
Boys' Basketball Most Valuable Player — (tie) Donovan Lewis and Petie Davis.
Boys' Basketball Hustling Harvester — Paul Simpson.
Girls' Golf Most Valuable Player — Jessica Baker.
Boys' Golf Most Valuable Player — Dyrnan Crosier.
Girls' Tennis Most Valuable Player — Stephanie Trollinger and Kellye Welborn.
Boys' Tennis Most Valuable Player — Reagan Eddins.
Boys' Track Most Dedicated Performer — Willie Jacobs.
Boys' Track Most Dedicated Performer — (tie) Mark Williams and Lance Ripple.
Boys' Track Outstanding Performer — Gary Jernigan.

Borger names Rankin

BORGER, Texas (AP) — Jill Rankin Schneider, assistant women's basketball coach with the University of Texas, has been named head basketball coach for the Borger High School girl's team.

Ms. Schneider, who was hired Monday, has been at Texas since 1981. She was in charge of recruiting for last year's national champions.

She is a native of Phillips, Texas, and was an All-American at Wayland Baptist University. She was co-captain of the U.S. Olympics Women's Basketball Team in 1980.

Among the basketball award winners at the Pampa High School athletic banquet Monday night were Hope Henson and Paul Simpson, both the top free throw shooters on the boys' and girls' teams this season. (Staff Photo)

Hough activated

ARLINGTON, Texas (AP) — The Texas Rangers announced Monday night that they have activated veteran pitcher Charlie Hough and have released pitcher Dave Rozema.

Hough will start Tuesday night's game against Detroit. Rozema was 0-0 with a 5.91 ERA in six relief appearances with the Rangers this season.

Hough has been sidelined since he broke the little finger on his right hand in an off-field accident March 24. He was 14-16 with a 3.31 ERA in 34 starts for the Rangers in 1985.

High school baseball

LAREDO, Texas (AP) — Here is the Laredo Morning Times-Texas High School Baseball Coaches' Association poll of teams across the state through Sunday:

Bucks even up series

PHILADELPHIA (AP) — If playing in pain is a badge of honor in professional sports, the Milwaukee Bucks' Sidney Moncrief has to be adorned with a chestful of medals today.

The 6-foot-4½ all-star guard, limped up and down the court Monday night inspiring the Bucks to a 109-104 victory over the Philadelphia 76ers.

The triumph enabled Milwaukee to tie its best-of-seven Eastern Conference semifinal playoff series at two games apiece.

Milwaukee regained the home court advantage it lost when the Bucks split with the Sixers in the first two games of the series at Milwaukee.

The Bucks, Central Division champions, and the 76ers, runner-up in the Atlantic Division, meet in Game 5 at Milwaukee Wednesday night. The sixth game will be played in Philadelphia on Friday night.

In tonight's playoff games, Atlanta is at Boston, Denver at Houston and Dallas at the Los Angeles Lakers. The Celtics lead 3-1, while the Nuggets-Rockets

and Lakers-Mavericks series are tied 2-2.

Moncrief scored just 13 points and handed out four assists, but the confidence and inspiration he gave his teammates counted more.

If this had been anything but a playoff game the Bucks had to win to keep from falling behind 3-1, Moncrief never would have played.

"Moncrief is hurting badly," Milwaukee Coach Don Nelson said. "I'm just happy to have him on one leg. Anything we get out of him is a plus."

"Every step he takes is painful. You wonder just how much he can endure. The answer is, I think, a lot."

Moncrief talked about the left heel injury he suffered in the Bucks' preliminary round three-game sweep of the New Jersey Nets.

"It's like walking on hot coals," Moncrief said. "But you've got to play with that."

"In the playoffs, you can't let up even when you're in pain."

It was a close game throughout with the score tied at 27 after a

quarter and 60 at halftime.

Milwaukee's Paul Pressey didn't score in the first half, but he collected 17 in the second, including nine in the final period when the Bucks put the game away. Rickey Pierce scored 19, including eight in the last quarter.

Hawks-Celtics
 After winning 106-94 Sunday for its first victory over Boston in 10 meetings this season, Atlanta now faces a more formidable task — breaking the Celtics' 35-game home winning streak.

"The next step is to make sure we're not too happy with finally beating Boston," said Atlanta forward Dominique Wilkins, who scored 37 points in the Game 4 victory.

Mavericks-Lakers
 Dallas is in position to continue a streak of 17 years without a team repeating as NBA champion.

The Mavericks evened the best-of-seven series against defending champion Los Angeles with a 120-118 victory on Sunday.

Aggies share baseball crown

COLLEGE STATION, Texas (AP) — The Texas Aggie baseball team went into last weekend's games with long odds and little hope of winning any part of the Southwest Conference title.

They came away with a share of the league crown with the Texas Longhorns. Aggie Coach Mark Johnson has seen it happen before, as an assistant coach at Arizona in 1976.

Johnson reminded his team last Tuesday that Arizona lost to Texas State seven times that season before beating the Sun Devils in the NCAA College World Series championship game.

The Aggies earned a share of the title Sunday when Houston defeated the Longhorns 5-3, and 4-2 in a season-ending doubleheader and the Aggies won a pair from Texas Christian.

The final games left Texas and Texas A&M tied for the title with 16-5 records, breaking a string of seven consecutive outright titles by Texas.

The Aggies also shared in the SWC basketball championship

and won the football title.

"It feels great," Johnson said. "We'd talked about it being a long shot and we said stranger things have happened."

"It would have been tragic if we hadn't taken care of business and Houston had beaten Texas."

Texas will play Baylor and the Aggies face Arkansas in the opening games of the SWC tournament May 16-17 in College Station. The winner gets an automatic invitation to the NCAA playoffs.

The Aggies, 39-21, were swept by the Longhorns in a weekend series April 25-26.

"But we never gave up," said senior Mike Scanlin, the Aggies' leading hitter. "We bounced back from an emotional sweep in Austin. We came in determined to sweep TCU and hope for the best."

Scanlin leads the Aggies with a .333 average and has a school record 18 home runs. Scanlin has stolen 21 bases in 24 attempts this season and has 41 career thefts and 41 career homers.

A&M's pitching staff has been solidified this season by a pair of pitchers who were at other schools last season.

Senior Dale Barry, 9-1, with a 2.23 earned run average, transferred to A&M last year when Texas-El Paso dropped baseball. Junior Pat Wernig, 6-2, 3.07, came to the Aggies after Oklahoma City University dropped the sport.

A&M's sweep of TCU alone would not have resulted in an Aggie title. It took a rare Houston doubleheader victory.

Texas had beaten the Cougars 11 straight games over the past four seasons.

"It would be nice if we could send Houston a card or something," Scanlin said.

GAME WINNER — The Indians' Pat Tabler strokes the game-winning hit Monday night against the Kansas City Royals. The win was Cleveland's eighth in a row and kept the Indians in first place in the American League East Division. (AP Laserphoto)

Surprising Indians still in first

By BEN WALKER
AP Baseball Writer

Pat Tabler and the Cleveland Indians gave the Kansas City Royals a lesson in new math, and it added up to another victory for baseball's most surprising team. Tabler, doing what he does better than anybody else, bounced a bases-loaded single off the chest of Kansas City second baseman Frank White in the 10th inning Monday night that gave Cleveland a 5-4 triumph. The Indians extended their winning streak to eight games and remained in first place in the American League East, 12 percentage points ahead of the New York Yankees. Tabler, with a career mark of 24-for-38 with the bases loaded, got his chance after Royals reliever Dan Quisenberry intentionally walked Brook Jacoby with one out and runners on first and third. "You've got to load up the bases to set up the double play," said Cleveland starter Don Schulz, who was long gone by the time the situation arose. "But with Tabler up there, the game's over. The guy's about 99 for 100

with the bases loaded." In other AL games, New York defeated Chicago 4-1; Toronto bopped Oakland 10-6; Detroit pounded Texas 10-3; Boston beat California 3-0; and Milwaukee downed Seattle 3-1. **Blue Jays 10, A's 6** Lloyd Moseby and Ernie Whitt hit two-run homers, sparking a 12-hit attack that led Toronto over Oakland. The defending AL East champion Blue Jays won their second straight game, the first time they've won consecutive games since April 11. Jose Canseco hit his eighth homer, a two-run shot that helped give the visiting A's a 4-0 lead in the second inning. Canseco has hit safely in 10 of his last 11 games. **Tigers 10, Rangers 3** Lance Parrish hit a pair of two-run homers and Dan Petry won his first game since April 14 as Detroit ripped Texas. Parrish, batting only .163 entering the game, capped a six-run uprising in the fourth inning with a homer off rookie Jose Guzman,

1-5. Parrish hit his fifth homer of the season in the eighth. Petry, 2-2, gave up seven hits over eight innings. **Yankees 4, White Sox 1** Joe Niekro and Dave Righetti combined on a four-hitter and New York's Rickey Henderson broke a 1-1 tie in the seventh inning with a home run. The Yankees played without Manager Lou Piniella, who was serving the first game of his two-game suspension imposed for bumping an umpire. Coach Joe Altobelli ran the team in Piniella's absence. Niekro, 4-0, gave up four hits over 7 2-3 innings. Righetti finished up with hitless relief for his sixth save. **Red Sox 3, Angels 0** Bruce Hurst scattered eight hits for the first shutout by a Boston pitcher this season. Hurst, 2-2, struck out five and walked none. He allowed seven singles through the first five innings, and allowed a leadoff double in the ninth to Brian Downing, who had three of California's hits. The host Red Sox have won seven of their last eight games. **Brewers 3, Mariners 1** Milwaukee got only three hits off Mark Langston, but Paul Molitor had two of them — an RBI single in the fifth inning and his first home run of the season in the eighth. Langston, 1-3, did not yield a hit until Molitor and Randy Ready got run-scoring singles in the fifth after a pair of walks.

Berry to turn professional

NEW YORK (AP) — Despite all the accolades Walter Berry received this season, he said it was the criticism, not the praise, that influenced his decision to enter the pro ranks. "This year was a great one for me, and still I was criticized that I was not top-notch material," said the 6-foot-8 forward from St. John's, who was selected Player of the Year by The Associated Press. "If my stock would go down a great deal next year, if I had a poor season, they would forget about everything and then where would I be? So this is why I feel I have to go now." Berry, who said only two weeks ago that he would return to the Redmen for his senior year, became eligible for the NBA's June 17 draft by submitting his name in a letter postmarked last Saturday. The league said it required a letter postmarked by midnight Saturday requesting eligibility, and not a public announcement. "All I know in my heart is that I

want to play (in the NBA)," Berry said of his change of mind. "No matter where I get picked I've got to live with it. Right now, all I want to do is get on a team." But some NBA officials question whether Berry, who averaged 23 points, 11.1 rebounds and set a school record with 76 blocked shots this season, is prepared for the pros. "He's not ready to play at our level yet," NBA superscout Marty Blake said last month. "He's better stay in school, work on his outside shot, handling the ball, shooting the jumper. Walter is an inside player right now. He can't do that in pro ball." On Monday, Blake, interviewed by telephone from his Atlanta office, declined to discuss Berry specifically or any of the other undergraduates until the NBA formally announces their eligibility later this week. But when asked to rank the best forwards, Blake mentioned Len Bias of Maryland, Chuck Person of Auburn, Kenny Walker of Ken-

tucky and Brad Sellers of Ohio State. He said he wouldn't include Berry, regardless of whether he was formally eligible. In deciding to turn pro early, Berry joined center William Bedford of Memphis State, center-forward Chris Washburn of North Carolina State, guard Dwayne "Pearl" Washington of Syracuse, forward John Williams of Louisiana State and forward Michael Graham, who last played for the 1984 Georgetown University championship team. "You hate to lose a player like Walter," St. John's Coach Lou Carnesecca said, "but this is progress, this is life. Every player wants to go into the big leagues." Carnesecca said Berry "wrestled with this decision for a few days. We put all the cards on the table and presented him with all the information we could and he made a decision. He's a great player and it's good for me to see one of my kids so highly thought of. He'll be an excellent pro."

Caprock High boasts top marksmen

AMARILLO, Texas (AP) — No state champion is crowned in Texas for rifle shooting, but if it were, Amarillo Caprock High School would be quick to lay claim to it. The Caprock small-bore rifle team recently completed the best season in its history. The Longhorns placed first in seven of the 12 meets in which they competed and won their final six matches. Along the way, Caprock beat the best teams in Texas and New Mexico. "We beat everybody that was anybody," said Col. John Regal, the coach of the team. "If there was a state champion, we'd be there. I think the other teams in the state would agree too." The sport is not sponsored by the University Interscholastic League and does not have state championship competition. The Caprock team is sponsored by the school's Junior ROTC Marine Corps program. The Longhorns have one of the city's two small-bore rifle teams. Tascosa has the other one, sponsored by the school's Junior ROTC Navy program. Small-bore rifle shooting on the high school level usually consists of a test of accuracy in three shooting positions prone, standing (also known as off-hand) and kneeling. A fourth, sitting, is sometimes added. The sport is governed by the National Rifle Association. The competitors shoot a series of 10 rounds in each position during standard competition. A possible 300 points can be scored

if the rifleman can achieve a bulls eye with each shot. Each team is allowed to use four shooters in match competition and 1,200 points is a perfect team score. In past years, Caprock has taken its lumps against teams from El Paso and Fort Worth, both traditional hotbeds for small-bore rifle shooting. Most schools in those cities sponsor small-bore rifle shooting as a varsity sport. This is the first year Caprock has been successful against the traditional powers. "They beat us badly until this year," said Regal, a 20-year Marine Corps veteran who retired from active duty in 1981. "But we came on so strong at the end of the year. We had such good shooters." The Longhorns' success didn't go unnoticed among experts of the sport. Many colleges sponsor small-bore rifle shooting as a varsity sport, and it is also an Olympic sport. "Every member of the first team was offered a scholarship at UT-Arlington," Regal said. "Eastern New Mexico doesn't give scholarships but they offered to waive the out-of-state tuition. They are definitely college-level shooters." The seven regular members this season were sophomore Chad Hassell, who was honored last week as the school's high shooter in four-position competition; senior Brad Early; junior Scott Casey; senior Dale Hazelwood; sophomore Kristina Rhyne, the only female member;

senior Matt Garrison; and sophomore Jared Reed. While the level of skill of this year's Caprock team was the primary reason behind its success, improved equipment has also helped, Regal said. The Amarillo Independent School District bought five 22-caliber Anschutz international match rifles for Caprock last year. The rifles are the finest made for the sport, costing \$900 each. The U.S. Olympic team uses the same rifle. "The rifle doesn't do it all, but it sure does help," he said. "If you've got good equipment, you feel better about shooting. And they'll last forever. They're not like shoulder pads." Regal admits he would enjoy more recognition for his team, but he said he realizes the sport has certain limitations that discourage wide-range interest. "It's a sport that doesn't get much recognition because we've never really had a good team in Amarillo," Regal, a city native, said. "And it's not really a spectator sport. They're spectators galleries at some ranges, but it's hard to keep up with what's going on without being on the range." Four of the Longhorns' top seven shooters will return next year, including Hassell and Casey, the top two. Because of this, Regal said the team has a strong chance to improve on its performance next year. "We've got a young team and we're excited about it," he said. "We have a few holes to fill, but we'll be tough to beat."

Former big league manager dies

WAXAHACHIE, Texas (AP) — Funeral services will be held Wednesday morning for Paul Richards, who worked for both Texas major league baseball teams and who was remembered as one of the game's best judges of talent. Richards collapsed and died Sunday after finishing a round of golf at the Waxahachie Country Club, where he had a house next to the No. 2 green. He was 77. Funeral services will be Wednesday morning at Hillcrest Burial Park here. "No matter how much baseball changes, it will still need the human element and Paul was one of the most innovative," said Roland Hemond, who was vice president of the Chicago White Sox when Richards returned to the club in 1976. "It's too bad the kind of knowledge he had couldn't be stored in a capsule for use for all the present and future generations of baseball," Hemond said. Richards began his professional baseball career in 1926, when he got \$1,000 to sign with the Brooklyn Dodgers as an infielder. He became a catcher in 1930 with a Dodger farm club in Macon, Ga. Although he played three games for the Dodgers in 1932 before spending two seasons with the New York Giants and a year with the Philadelphia Athletics, Richards drifted back into the minors and decided his future was not as a player. "I didn't think I could hit well enough to get back in the majors as a player, and as I was very much interested in baseball and studied it as much as I could, I thought if I could become a manager, I might get to the big leagues again," he recalled. Richards was a player-coach with the Detroit Tigers, his favorite team as a child, from 1942 through 1946. He led American League catchers in fielding in 1943. He had his best season in 1945, batting a career-high .256 when the Tigers won the World Series. After the 1946 season, Richards managed in the minor leagues until the White Sox hired him in the early 50s. He was best known for turning perennial cellar dwel-

lers there and in Baltimore into pennant contenders. Through the efforts of Richards and General Manager Frank Lane, the White Sox established a strong farm system that produced players like Nellie Fox and Luis Aparicio who helped the White Sox win the 1959 American League pennant. In 1955, he accepted the dual post of manager-general manager with the Orioles. The team had moved to Baltimore the previous year from St. Louis, where as the Browns it was traditionally one of baseball's worst teams. "He was the catalyst of our franchise," said Jack Dunn, Orioles' vice president, who once was an assistant general manager to Richards. Within three years, the Orioles were playing .500 ball, and in

1960, the team spent a month in first place before finishing second to the Yankees. Richards was named manager of the year in the AL. Orioles Manager Earl Weaver said Richards "was a man you could learn the game from. He was a man who never gave up on a person. I tried to learn all I could from him. Not everything he did I believed in, but there's no doubt he had a big impact on me." Richards left the Orioles after the 1961 season to become general manager of the new National League franchise in Houston, the Colt 45s, but was dismissed after the team was purchased by Roy Hofheinz. After a brief time as a scout with the Philadelphia Phillies, he was general manager of the Atlanta Braves.

Babe Ruth League opens season

The Babe Ruth League opened its baseball season Monday night at Optimist Park. Citizens Bank defeated Dyers BBQ, 24-7. Winning pitcher was Chuck Falls. Dwight Nickelberry took the loss. The second game between Rot-

ary and Keyes Pharmacy ended in a 9-9 tie. Jason Brantley pitched for Rotary and Mark Woffle pitched for Keyes. The game will resume at the end of the season if the outcome would make a difference in the standings.

WELCOME TO WORK — Commuters at Tokyo's Yotsuya Station were greeted by an army of police on their first day back to work following last week's holidays. The extra security followed simultaneous small explosions at several subway stations during the Tuesday morning rush hour involving an estimated six million commuters.

Primary elections today in Ohio, North Carolina, Indiana

COLUMBUS, Ohio (AP)—James A. Rhodes faces his first hurdle today in a bid for a historic fifth term as governor, opposed by two Republican challengers who believe his place is in the history books, not the Statehouse.

If Rhodes wins the primary and ousts Democratic Gov. Richard Celeste in November, he will be 77 when he takes the oath of office in January, the oldest person to do so in Ohio history. But Rhodes dismisses the age issue and, asked why he is running again, gives a sense that politics is almost an addiction.

"What do you expect me to do, die?" he says.

Primaries are also being held today in North Carolina, where a vacant Senate seat has sparked a bitter ideological fight between Republicans, and in Indiana, where the Democratic-endorsed candidate for Senate is opposed by a backer of extremist Lyndon LaRouche.

In North Carolina, the retirement of conservative GOP Sen. John East because of ill health prompted a heated Republican contest between moderate Rep. Jim Broyhill and archconservative David Funderburk, a disciple

of Sen. Jesse Helms and the right-wing National Congressional Club. Polls show Broyhill with a substantial lead.

Democrats must choose among 10 candidates, with former Gov. Terry Sanford leading the pack but not assured of winning a majority to avoid a runoff.

Indiana's first-term GOP Sen. Dan Quayle is unopposed in the primary. Democratic Party officials picked business professor Jill L. Long to oppose him, but she must overcome low name recognition and housewife Georgia D. Irey, who espouses such LaRouche beliefs as that Henry Kissinger is a

Soviet agent and the Queen of England a drug trafficker.

Rhodes, the GOP standard-bearer in 1962, 1966, 1974 and 1978, has faced vigorous opposition this year from state Sens. Paul Gillmor and Paul Pfeifer, who contend he has passed his prime and should relinquish his hold on the state party.

Public Notices

The Pampa Independent School District, Pampa, Texas will receive sealed bids in the School Administration Office until 5:00 P.M., May 29, 1986 for the sale of:

1. 1986 Chevrolet 48 passenger school bus
 2. 1986 International 66 passenger school bus
 3. 1970 International 66 passenger school bus
 4. 1975 International 48 passenger school bus
- Bids shall be addressed to Pampa ISD, 321 W. Albert, Pampa, Tx. 79066, ATTENTION: Tommy Cathey, "SCHOOL BUS BID". Specifications and additional information may be secured from the Administrative Office or by calling 1-806-665-2378 Ext. 23.

The Pampa Independent School District reserves the right to reject any or all bids and to waive any or all formalities or technicalities.

Noisy smoke bombs explode in commuter stations as summit ends

TOKYO (AP) — A string of noisy smoke bombs, possibly set by radicals trying to disrupt the Tokyo summit, exploded in nearly a score of railroad and subway stations today. No injuries were reported but some 350,000 commuters were delayed getting to work.

A police spokesman said the crude bombs were "possibly the work of radicals" who vowed to "crush" the 12th annual gathering of seven industrial democracies on grounds it was an im-

perialist scheme to start world war.

At least 17 of the devices exploded, including one planted near a subway kiosk five minutes' walk from the Akasaka Palace, the main summit meeting place, and another outside a hotel serving as headquarters for all of the delegations except the Americans.

Several duds reportedly were found, one of them in another station within sight of the palace.

A police spokesman, asking not

to be named, said the devices were made with smoke bombs, Chinese firecrackers and timers, and concealed in station trash cans and toilets.

Early reports said the bombs, which exploded during a 32-minute period at the height of the morning rush after a three-day weekend holiday, generated considerable confusion in some stations and inconvenienced an estimated 40,000 commuters.

Officials suspended service for 50 minutes on one subway line.

Church member arrested in death of minister

HOUSTON (AP) — A young associate minister about to receive his first pastorage was gunned down in his office at a downtown church and a church parishioner has been charged in the clergyman's death, police said.

A gunman walked into the fifth floor office of Eric Anderson, 32, associated pastor at the church, Monday afternoon and shot him once in the chest with a pistol.

The gunman fled the building. Authorities later arrested Neal Wayne Higginbotham, 29, at his

home where he lived with his mother. The arrest came without incident after the suspect talked on a telephone with next door neighbor Tracy Villarreal.

"He said 'I'm scared' and I said talk to me about it, tell me what's the matter," Ms. Villarreal said. "He said he had shot someone. I said 'where's the gun Neal' and he said 'it's right here beside me.'"

Ms. Villarreal said she talked with the suspect until police arrived. Authorities said Higginbotham's only comment when he

was arrested was "O my God." The victim was rushed to Hermann Hospital but was pronounced dead shortly after arrival. Police held Higginbotham without bond.

Anderson was scheduled to move to Huntsville, 75 miles north of Houston, this summer to accept his first pastorage.

Associate pastor Frederick Marsh said he saw the suspect leaving the building Monday afternoon.

"I saw him on the way out," Marsh said.

Market vacillates

By JOHN CUNIFF
AP Business Analyst

NEW YORK (AP) — If the stock market is vacillating, it probably isn't for some of the reasons you may have heard in the past few days.

Reasons proliferate in the stock market. Like the bread on the retailer's shelf they change from day to day, the notion being that customers desire and expect fresh goods.

But it probably cannot be proved that the market rose or fell because of the Soviet Union's nuclear accident or the economic summit in Tokyo, or because investors were on the sidelines or tired or optimistic.

Those possibilities exist, of course, but proving it would be as difficult as scanning a rogue's gallery of a thousand photos and picking out the culprit just minutes after the crime was committed in poor light.

But when the market vacillates or drifts over a week or so, as it has, analysts maintain they can see a clear correlation with uncertainty over the state of the economy six months into the future.

While the consensus forecast seems to be for an upturn later this year, a lot of investors thought it already would be here. And adding to their concern is the almost daily publication of rather weak economic indicators.

There is uncertainty, too, about what Congress will do with a tax bill, if anything. And how do you determine whether tax cuts, in the minds of investors, will offset the elimination of tax

breaks?

Where are interest rates headed? Many analysts say rates will continue to fall because the Federal Reserve intends to maintain liquidity. But others call attention to Fed Chairman Paul Volcker's recent statement that rates have fallen enough.

Attention is given to a recent report by purchasing agents that spoke of declines in production and employment. Bad news, some say.

Others disagree, commenting that the agents merely repeated the obvious. The real news, say these interpreters, is that the agents found orders "relatively strong," suggesting an upturn to come.

Are lower oil prices good for the economy? A lot of theories say they are, but a near-term rise in unemployment and lower earnings for oil-related companies is causing some would-be investors to keep their pocketbooks closed.

What happened to the clearcut perspective that existed a few weeks ago, when investors were talking about a market that couldn't be stopped? Nothing much, except that it has run up against a bit of uncertainty.

Until the uncertainty clears, say a good many of those who claim to know, the market isn't likely to break out of its trading range, which seems to be on either side of 1,800 points on the Dow Jones Industrial Average.

Meanwhile, those who think the economy is going to get better will be banging heads with those who are losing the faith.

U.S. monitors increase watch for radioactive rain

WASHINGTON (AP) — Government officials have ordered stepped-up monitoring to watch for radioactive rain from the Chernobyl nuclear accident, some of which has probably fallen on the United States already, officials say.

The discovery of radioactivity "barely above" normal background levels in the air off the Pacific Northwest coast over the

weekend means — since it was carried by the west-to-east jet stream — that rain in the Midwest and on the West Coast likely carried at least some particles to the ground.

But in briefing reporters Monday, officials were careful to note they had no ground-level measurements of extra radioactivity.

Referring to the Midwest

storms, Lester Machta, director of the air resources laboratory of the National Oceanic and Atmospheric Administration, told reporters, "My guess is that radioactivity will be detected there."

Sophisticated equipment might be needed to detect it in the West Coast rainfall, he said.

Machta, a member of the inter-agency task force keeping track

of the aftermath of the Soviet nuclear plant accident, said background radiation in the atmosphere where instrument-laden planes flew was probably "zero or one" picocurie per cubic meter. But 2.5 picocuries were found at 30,000 feet about 150 miles off the Pacific Northwest coast and 12 picocuries were found at 18,000 feet in the Gulf of Alaska about 400 miles off Canada.

A picocurie is about two atomic disintegrations per minute. It wasn't immediately known just what isotopes were disintegrating or what doses humans would get at those altitudes, said Machta and Sheldon Meyers, head of radiation programs at the Environmental Protection Agency and another member of the task force.

In drinking water, EPA permits 15 picocuries per liter, about a quart, of alpha-particle

radioactivity.

Other radioactivity, carried by slower moving winds at lower altitudes, can be expected to reach North America as the days go by, the task force said.

In anticipation of finding radioactivity in the United States, the EPA's Meyers instructed the agency's 68 radioactivity monitoring stations to take daily samples of rainfall, if it rains, instead of the monthly samples previously scheduled.

Asked what doses could be expected in rainfall, Lee M. Thomas, EPA administrator and head of the task force, said that could not be predicted until measurements turned up radioactivity in the water.

Also, the stations will step up milk sampling from monthly to twice a week.

Asked if he expected to issue any advisories on avoiding cer-

tain foods, as some European countries have done with milk and some vegetables, Thomas said, as he has before, "We don't anticipate having to do any of that."

State Department spokesman Charles Redman said U.S. experts believe there is no reason for significant health concern for official American personnel in Moscow and Warsaw. He said this was a preliminary assessment based on the findings of American medical and technical personnel.

He said there are no indications that Americans traveling in Europe would face health risks as a result of the Chernobyl incident. Exceptions are the Kiev area and travel by women of child-bearing age and children in certain areas of Poland. Travel advisories for both areas were announced last week.

Radiation is in air, ground, buildings

BOSTON (AP) — Radiation falls from the sky and rises from the ground. Granite buildings emit it, as do the elements in human bodies. Like the wind and the rain, radiation is an inescapable part of our environment.

On Monday, fallout from the Soviet nuclear power plant disaster was believed to have hit the West Coast and Midwest during rainfall, said Lester Machta, head of the division of the Air Resources Laboratory of the National Oceanic and Atmospheric Administration and a member of an interagency task force dealing with the Chernobyl reactor fire.

He said there was no detection of extra radioactivity at ground level.

During a typical year, most people receive as much radiation from natural sources as from things like nuclear reactors and X-rays. Even extra radiation that fell in West Europe after the Chernobyl disaster was relatively small.

One common source is cosmic rays from space. The atmosphere protects people from most cosmic radiation, but exposure increases with elevation. Residents of mile-high Denver, for example, soak up more than New Yorkers do.

"I would like to tell people that as they flew back from Europe, they received more radiation exposure than probably anybody outside the Kiev area close to the reactor received," said Nobel laureate Rosalyn Yalow of the Bronx Veterans Administration Hospital in New York City.

Yalow, who won the Nobel Prize in medicine in 1977 for development of the radioimmunoassay, which uses radioactive isotopes to measure hormone levels, said people flying at 39,000 feet get one millirem of radiation an hour — assuming there are no sunspots, which increase it.

"Airline crews who fly across the ocean on the average receive as much or more radiation exposure as do nuclear power workers," she said.

Absorbed radiation is measured in units called rem and millirem. A millirem is one-thousandth of a rem.

Generally, people receive about 100 millirem of radiation a year from natural sources. U.S. guidelines for employees at nuclear power plants limit radiation exposure to 3,000 millirem per three-month period.

The sources are divided about equally between cosmic rays, material in the soil and rocks and radioactive elements like potassium-40 in the body.

However, the exposure differs from place to place, depending on the altitude and variations in the natural sources of radiation in the Earth. For instance, people living on the Atlantic seaboard get about 65 millirem a year from natural sources, while in Denver they receive about 150.

Another source of radiation is diagnostic X-rays. The average annual dose from medical X-rays is 77 millirem, while dental X-rays add one more.

Some radiation is left over from nuclear weapons tests in the atmosphere in the 1950s. This adds four or five millirem a year.

Power plants and other nuclear operations contribute less than 1

millirem a year for the average American.

If radiation exposure is high enough, it can cause cancer and genetic damage. But cancer takes time. Thirty or 40 years may elapse before a high dose of radiation causes this disease. No one knows whether ubiquitous low-level radiation does any

harm.

"We can't be sure it doesn't have some effect," said Dr. Warren K. Sinclair, president of the National Council on Radiation Protection and Measurement. "But we've lived with it for a long time, and it's certain that we can't see its effects if, indeed, it has any."

Students write to Reagan about raid

BORGER, Texas (AP) — President Reagan had the support of most Americans when the United States bombed Libya, and Becky Fish's fourth-grade class at Gateway Elementary School is no exception.

The students wrote letters to Reagan as part of a current events project, and most supported the air raid on Libya.

Ms. Fish, a social studies teacher at the school, said the use of Borger News-Herald clippings as part of her current events program prompted the children to write letters to the president.

Mike Ramsey wrote: "I am only in the fourth grade, but I am deeply concerned in the affairs between the United States and Libya."

Janna Poston wrote: "...I have watched the TV and have seen all that has been going on with us and Libya. I think that what we have done is right. Even though I don't like war, something should be done to stop Libyan terrorists."

Some of the students asked about the drop in oil prices and what the president might do to help.
