Learn To Protect Yourself

Another "American Revolution"? Another "civil war" in our country? Yes, probably, unless the direction of current events can be radically changed...

Who Will Take To Drugs?

Is there any way teachers or parents can predict with any degree of reliability whether a youngster will fool around with drugs? At least one study indicates that there is...

Generally overlooked in the arguments for and against amnesty for deserters and draft dodgers is that the flight of these birds was a lucky break for the country.

It weeded out thousands of misfits and saddled them onto the countries which took them in and may now have to keep on living with our runagates.

Letting them come back would be an insult to the kind Providence that shed us of them, and about the same silly as putting rotten apples back in the sack.

I see where the Montana house of representatives has passed a resolution declaring taxpayers and small businessmen to be endangered species, like coyotes, eagles, and whooping cranes.

Incidentally, the study knocks a hole in the belief that the parents drink and the kids smoke.

Heavy marijuana users are also heavy drinkers and the study finds no evidence that marijuana is supplanting alcohol among the younger generation.

BRUCE BIOSSAT Fully Independent FBI Is a No-No

By BRUCE BIOSSAT

WASHINGTON (NEA) — In kicking up the fuss which led to withdrawal of L. Patrick Gray's name as FBI director the Senate touched only the fringe of the problems tied to the desired objective of independence for the agency.

No one in this capital is arguing that the FBI can function as an independent investigative and intelligence-gathering body if it hands over material from its raw files as Gray did to a president's aides — particularly when the White House itself is directly affected by an inquiry.

Gray's candid admission that he did this in the Watergate bugging case probably sealed his doom as President Nixon's nominee to be director.

Yet there is very little really probing discussion here as to what independence should really mean for the FBI. Proposals to have the director

serve a fixed term, rather than at the whim of a president, don't go to the heart of the matter. In its capacity to affect the lives of individual Americans, the FBI may be fairly depicted as the most powerful agency in the federal government. It represents more than two-fifths of the Justice Department's manpower and budget, and administers upwards of 160 statutes having to do with national security, crime, and certain kinds of civil activity (anti-trust, for instance).

Its files contain the fingerprints of nearly half the U.S. population. Its dossiers on individuals, a sizable proportion compiled in the process of checking people for federal jobs, number in the millions.

It is the repository for the most advanced crime-detecting technology in the world, and through its academy, provides training for key police personnel in countless U.S. cities. Its varied, complex files permit a cross-checking of criminal information which most city police departments find indispensable.

Besides its major role in national security and counter-espionage, the FBI is empowered (or interprets its power) to look into any kind of transgression of the law which involves crossing state lines — including organized crime, racketeering, labor-management corruption, bank robbery, gambling. It acts in crimes committed on the high seas and in the air (hijacking).

Though much of its authority is statutory, its power in the security field was conferred upon it by decree by President Franklin D. Roosevelt in 1939 as World War II unfolded.

It is not incorrect to say that as the nation grows, so do its problems of law enforcement and security, and so does the FBI. Soon it will occupy a huge new building all its own.

By its very nature as an investigative and intelligence collecting organization, the FBI does most of its work out of public view.

To place such massive, secretly-used authority at the self-serving discretion of political manipulators is clearly unthinkable. But independence, sought not to mean freedom from any check at all.

In the first place, despite the mystique of totally professional independence surrounding the FBI leadership of the late J. Edgar Hoover, history indicates that the FBI does sometimes cast its weight in "causes." It assisted President Eisenhower's attorney general in flushing out alleged Communists from the regime of his predecessor, Harry Truman. It has lent heavy aid to the various security committees of Congress, which generally shared Hoover's rigid notions of the internal Communist threat.

Second and most important, the FBI simply represents too much power to be employed with rein. The record shows Congress cannot watchdog it. What is needed is some sort of permanent panel of highly-regarded, public-minded citizens — with shifting personnel to provide constantly fresh outlook.

Your Health Weight Loss Best for Diabetics

By Lawrence Lamb, M.D.

Dear Dr. Lamb — I am enclosing a clipping which states that after much delay and resistance the Food and Drug Administration has warned physicians about prescribing diabetic drugs for adult patients except as a last resort. The clipping says the drugs appear to increase the risk of fatal heart disease.

As I read each one of these reports that have been occurring recently, I have become more concerned. The doctor I go to prescribes an oral diabetic medicine for me. Under the circumstances, wouldn't it be better to stop taking such a drug? It would seem to me that control is more harmful than the disease. With all of the many contradictions in today's medicine, it sure leaves me frustrated in knowing what is best. I would very much appreciate your views. I am sure there are many others with the same apprehension as myself.

Dear Reader — Treating diabetes is difficult and each individual case is different. Ordinarily your own doctor should be the best able to advise you on what medicine you should use. However, I must say in view of the Food and Drug Administration's position and the various research reports that have been made available on this particular topic, that I think it is probably best not to use oral diabetic medicine. Most individuals who are using these medicines to control diabetes can usually control it by dietary means alone. This usually requires weight reduction, since many individuals using these medicines are moderately or significantly overweight. Many studies show that adequate dietary management that induces satisfactory weight reduction is just as effective in lowering the blood sugar as the oral diabetic pills. In most instances anyway.

So why don't you talk to your doctor about your concern and ask if it isn't possible to manage your diabetes satisfactorily with a dietary program. But if you are one of those individuals who are slightly overweight you should be prepared to go along with his suggestions and really carry out a satisfactory weight control program.

Dear Dr. Lamb — I am expecting my 10th baby, and so far we have nine sons. Could you tell me what the chances are of getting another son? Also, do you know the record for all boys in one family?

Dear Reader — The chances are very high. The sex of the baby is determined by whether a male sperm cell or a female sperm-cell unites with the woman's ovum. Some men produce more male than female sperm.

This is usually the case in a family where the children are all boys. Since that is probably the truth about your husband, the likelihood is that the next pregnancy will again result in a boy.

Of course, you can never be absolutely certain because it only takes one sperm cell out of the millions that are produced at one time to induce a pregnancy.

H. L. Hunt Writes

PROFIT MOTIVE WORKS BEST

The profit-motive system is the secret of why capitalist countries no longer have famines. Lack of the profit motive is why communist countries cannot feed themselves. Marxist propaganda which has been fought poorly or not at all by most businessmen, has succeeded after 100 years in slandering and defaming the profit-motive system to the point where good citizens are going to have to come to the rescue.

When you hear or read that profits are up 30 per cent in some business, then about what the report does not tell you because the reporter wants to make you think badly of profits. Some leftwing Senators have been fussing about profits in some industry going up 40 per cent or 50 per cent. They don't tell you that the industry in question made 2 cents on the dollar of sales the previous year and the 50 per cent increase raised it to 3 cents on the dollar.

The idea is to make you think that the industry made 50 per cent profit, instead of the actual 3 per cent profit that it made. The fact is that during the two years of 1970 and 1971 all businesses averaged less than 2 per cent profit after taxes. Before taxes, the income averaged 3.7 per cent on each dollar of sales for 1970 and 3.8 per cent for 1971.

Most people, when questioned, think profits run to 20 per cent, 30 per cent or 50 per cent of sales. Not so. Profits prompt people to create new and better products and services for all of us to enjoy. On a level of 2 per cent, we are threatening to kill the goose that lays the golden eggs. If we do, we are sicker than any goose ever was. Good citizens can organize themselves and save our Republic and the profit-motive system.

The darkest hour in any man's life is when he sits down to plan how he can get money without earning it. — Sikston, Mo. Standard

Hypermarches Is Coming!

Europeans may steal a march on the United States — a "hypermarche" to be exact. According to international retail consultant Paul K. Halstead, a hypermarche — the word can be roughly translated as "supermarket" — could whip any American shopping center in a race to face competition.

A hypermarche is a self-service mass merchandising operation of about 100,000 square feet that combines a large supermarket and general merchandise under one roof.

What distinguishes a hypermarche from the

God gives every bird its food, but he does not throw it into the nest. — Josiah Holland
