TIME TO CHAT — Delegates to the 15th annual Council of the Episcopal Diocese of Northwest Texas take time to chat during a break in sessions Saturday morning. From left are Rev. Sam Hulsey, rector of St. Matthew's Episcopal Church in Pampa; Mrs. Margaret Anderson, contact officer from New York City; Bishop Willis R. Henton, Amarillo diocese, head; and Bishop John E. Hines, Presiding Bishop of the Episcopal Church of the United States, New York. (Photo by Terry Hanna)

OKAY SEE CHANGE

Episcopal Delegates Oppose Proposals On Women, Vote

By RAY BAXTER
Ordination of women to the priesthood, granting 16-year old communicants a congregational vote and moving Bishop Willis Henton to Lubbock were termed the most salient points of business voted on by delegates to the 15th annual Council of the Episcopal Diocese of Northwest Texas meeting in Pampa.

The body of delegates passed a resolution asking the forthcoming Episcopal General Convention at Louisville, Ky. to delay action on opening the priesthood to women.

The most hard-fought issue was the vote for 16-year olds. Despite a clear explanation prior to action on the resolution that it involved only a voice in local congregational matters and not as delegates to any convocation of the Episcopal Church, a move to table the measure carried.

Then came a period of deliberation on the fate of the resolution culminating in an effort to reintroduce it as special business. This failed for want of the required two-thirds majority of the delegates present.

A number of those opposing the 16-year old vote stated they were not against the principle but felt the resolution, technically, was out of order.

There was no opposition to the resolution from the committee on structure requesting the bishop to change the See City from Amarillo to Lubbock. The measure was passed in a manner that permits Bishop Henton to accomplish the move at his discretion. He had made it clear in his charge Friday afternoon that he was amenable to the move.

Large Crowd Expected For Beef Luncheon

A near-capacity crowd is expected at the Pampa Chamber of Commerce Salute to the Beef Industry luncheon Monday in the Coronado Inn Starlight Room.

Chamber officials said Saturday a few tickets were left and would be available up until 10 a.m. tomorrow.

Rex McAnelly, president of the Southwestern T-Bone Club and manager of Moody Farms feedlot, east of Pampa, will speak on problems faced by the beef industry today.

New York Congressman B.S. Rosenthal (D), one of the backers of the meat price rollback and beef price ceiling, wired chamber officials Friday he could not accept an invitation to attend the luncheon because of legislative commitments.

Jerald Sims will preside at the luncheon and Foster Whaley, chairman of the Agriculture and Livestock Committee, will be in charge of the program.

The luncheon will feature a home-grown and processed steak. An interesting meat display will be provided by Ideal Food Stores. Following the luncheon some \$80 worth of beef will be given as door prizes to the three persons whose tickets are drawn, compliment of Ideal Foods.

Flooding Subsides On River

By The Associated Press
National Guardsmen used amphibious landing craft to evacuate stubborn farmers from the flooded Mississippi Delta Saturday as sunny skies promised some relief to America's water-soaked heartland.

More than 12 million acres of land have been inundated by the spring flooding along the Mississippi and Missouri rivers and their tributaries. Damage estimates top \$200 million and at least 10 deaths have been attributed to the floods. Thousands are homeless.

Most of the flood-ravaged valley from the Great Lakes to the Gulf of Mexico experienced sunny and dry weather Saturday, and the National Weather Service in Chicago said the rainfall in the next month would be below normal.

But the forecast brought little comfort to the cottonlands of the Mississippi Delta, where some 50 determined farm families had scraped up dirt levees in a weeks-long battle to hold back the rising waters that have covered some two million acres north of Vicksburg, Miss.

Saturday they began surrendering to higher ground with the National Guard's help.

Six "ducks," amphibious personnel carriers from the 135th Transportation Company of Biloxi, were used to evacuate the families from a four-county area along the Yazoo River Basin.

The Mississippi River at St. Louis was reported at 43.2 feet Saturday, some 13.2 over flood stage, and a crest of 43.5 feet was expected by Sunday.

The Missouri River was at 34.8 feet Saturday, about 9.8 feet above flood stage but down a half-foot since Friday.

The dry, sunny forecast means there is time for some of it water to drain out before any more rain is expected," a forecaster said.

He said there would be "little evaporation to speak of."

Watergate Disclosures Create Entangled Webs For Officials

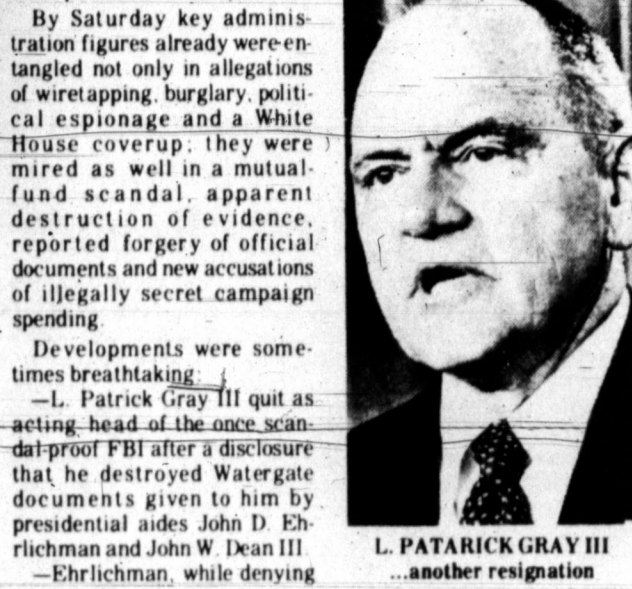

WASHINGTON (AP) — A week of multiplying disclosures in the Watergate affair claimed two resignations and bolstered prospects of indictments and contempt citations against some presidential associates.

By Saturday key administration figures already were entangled not only in allegations of wiretapping, burglary, political espionage and a White House coverup, they were mired as well in a mutual-fund scandal, apparent destruction of evidence, reported forgery of official documents and new accusations of illegally secret campaign spending.

Developments were sometimes breathtaking.

—L. Patrick Gray III quit as acting head of the once scandal-proof FBI after a disclosure that he destroyed Watergate documents given to him by presidential aides John D. Ehrlichman and John W. Dean III.

—Ehrlichman, while denying

L. PATRICK GRAY III
...another resignation

48 PERSONS INJURED Navy Munitions Train Explodes In California

SACRAMENTO, Calif. (AP) — A Navy munitions train exploded in a railway yard Saturday, spewing flames, shrapnel and debris over a square-mile area and injuring at least 48 persons.

There were no immediate reports of deaths or missing persons. The injuries treated at hospitals were described as mostly minor cuts from flying glass and debris. Four were hospitalized in "semi-serious condition" with eye injuries. Damage was estimated in the millions.

About 100 individual explosions occurred in a two-hour period, but less frequent flurries of explosions — some heard 40 miles away — were still being reported more than eight hours after the first big blasts Saturday morning.

Officials said the explosions started in the major rail center at Roseville, 15 miles northeast of here, among 21 carloads of 250-pound bombs and other military explosives and spread to two civilian propane tanker cars.

Authorities first reported 750-pound bombs were involved. The cause of the explosions was not immediately determined.

A small town of about eight commercial buildings was leveled by the explosions. Fire spread by flaming, flying debris damaged or destroyed many of an estimated 600 railroad cars in the Southern Pacific switching yard, the largest such rail center in California.

Two thousand people were evacuated from homes in a three-mile radius of the yard; 100 miles northeast of San Francisco, which is a major switching facility for both East-West and North-South rail traffic.

Gunboats Disgorge Troops

PHNOM PENH, Cambodia (AP) — Cambodian navy gunboats landed a heavily armed assault group Saturday on the Mekong River's eastern shore two miles across from Phnom Penh to reinforce government troops fighting to retake the village of Aerei Ksath, military sources reported.

The sources said the reinforcements, of undisclosed number, hit the shore under cover from Cambodian air force planes firing on antigovernment forces dug in along the bank. There was no immediate report of casualties.

For the first time in the four days since antigovernment forces made their presence known on the east bank across from the capital, no American warplanes were sighted. Waves of U.S. B52 bombers and Cambodian gunboats plying the Mekong attacked the antigovernment positions repeatedly Friday.

On other fronts, the military high command said Communist Vietnamese attacked the Mekong River village of RoKar Kong, 25 miles north of the capital on the western bank, killing five government soldiers and wounding six others. The command said its forces killed nine antigovernment soldiers in the assault.

To the south, the besieged provincial capital of Takeo, 39 miles from Phnom Penh, was shelled by 42 rounds from light and heavy mortars. Three civilians were wounded, the government reported.

TO KEEP PROMISES Legislators Face Session Deadline

AUSTIN (AP) — Texas legislators have just another month to do what they promised voters they could do at election time back in 1972.

Midnight May 28 is the mandatory end of this regular session of the 63rd legislature—and from every indication it will be a long month.

Both houses passed their separate versions of a 1974-75 spending bill the past week, the House finally acting after seven days and nights of debate.

The ultimate general appropriations bill still must be written by five senators and five representatives to be named the coming week.

The passage of the spending bills caused a general sigh of relief for those fearing new taxes but there was little encouragement to those keeping account of this legislature's overall accomplishments.

Out of more than 2,500 bills introduced in the Senate and House, this legislature has taken final action on less than 70 of them.

The 1971 legislature passed 1,067 bills in its 140-day session. If the 63rd legislature keeps up the legislative pace set by previous legislatures, it has a lot of work to do in the next 25 working days—or face a special session or more.

What's more, Texas voters are beginning to wonder if the accomplishments of this legislature are an indication what this same group of senators and representatives will do when they meet in 1974 to rewrite or revise the state constitution.

School Board To Get Report On New Plans

Members of the Pampa school board will conduct an open breakfast session at 7 a.m. Tuesday at Coronado Inn to hear reports on plans relative to the 1973-74 school year.

These reports will come from the heads of committees on educational needs, building and equipment, building modification and maintenance, personnel assignments and establishing a zone for Sam Houston school.

Also on the agenda for discussion will be the status of summer project plans.

At the request of the school architect, Herbert Brasher, members of the board will meet with him at 8 a.m. Thursday at the new building to house the area vocational school. This will be board members' inspection of the facility prior to formal acceptance and approval.

TO FULL-TIME BASIS Forces Gathering On DST Changes

WASHINGTON (AP) — It's time, say 32 congressmen, to install daylight saving all year long. No, says a lady in Kentucky, it's time to quit confusing the sun.

Congressional mail inspected by The Associated Press is split about half pro and con on the issue raised by Rep. Craig Hosmer, R-Calif., and 31 house colleagues. They propose extending Daylight Saving Time on a full-time basis instead of its current half-time run each year under the 1966 Uniform Time Act.

A Florida couple wrote "it's great that somebody is finally doing something to keep nature's lights on longer."

But a West Virginia woman wrote: "Only playboys have to say 6 a.m. is 7 a.m. to get up."

From Clinton, Iowa, a man writes: "In view of the current energy crisis, it makes good sense to use as much natural light as possible during business hours and conserve what electric power we can."

A Berea, Ky., woman wrote: "Please don't let them do this. We live on a farm and it puts a hardship on us. You have moved the clock up one hour already. The sun is confused as to when it should come up."

KEEPING AHEAD OF TIME

With Daylight Saving Time again making its appearance, Evelyn Cash, 18, daughter of Mr. and Mrs. Duane Cash, 117 Garland, sets her clock ahead one hour in preparation for the event. Residents should have turned their clocks and watches ahead one hour at 2 o'clock this morning. Or prior to going to bed or after getting up. Or whenever.

(Photo by Terry Hanna)

Lawyers suing the Nixon campaign asked a federal judge in Washington to cite Stans for contempt for failing to deliver secret campaign documents promised last November. Stans' lawyer promptly gave two batches of records to court officials, calling the delay a "misunderstanding." The contempt motion is pending.

—Government auditors urged Kleindienst to prosecute former Nixon campaign treasurer Hugh Sloan on allegations he made illegal secret payments to create phony demonstrations of public support for Nixon's course in the Indochina war.

The development may imperil the government's prosecution of Ellsberg, who is accused of stealing the Pentagon's secret history of the Vietnam war and giving it to newspapers.

Legislators Face Session Deadline

Obituaries JACK EVANS Funeral services for Jack Evans, 53, Lefors, will be conducted at 3 p.m. today in the Allison School Auditorium with the Rev. A. Ralston, pastor of Allison Baptist Church, officiating. Burial will be in Wheeler Cemetery under direction of Wright Funeral Home of Wheeler. Mr. Evans died at his sister's home west of Canadian at 10 p.m. Friday after a long illness. Born in Wheeler, he moved to Allison as a child and had ranches near Lefors for 22 years. He was veteran of World War II. He is survived by his wife, Joyce Arlene; three sons, Larry, Bell, Calif., Scott, Canadian, and Ricky, Lubbock; his father, A. B. Allison, six brothers, John Henry, Portales, N. M., Horace, Allison, Oris, Los Angeles, Joe, Bell Gardens, Calif., Clint, Miami, and Rondal, Canadian, four sisters, Mrs. Fannie Bradstreet, Allison, Mrs. Ollie Brock, Amarillo, Mrs. Bonita Wright, Canadian, and Mrs. Estelle Montgomery, Pampa, and four grandchildren. MRS. DAISY STRASBAUGH Mrs. Daisy Strasbaugh, 80, of Kiowa, Kan., died Friday at 5 p.m. at Highland General Hospital. Funeral services will be announced from the Fisher Funeral Home of Kiowa. Local arrangements are being made by Carmichael-Whitley Funeral Directors, Inc. Mrs. Strasbaugh, a longtime resident of Kiowa, came to Pampa in December, 1972. She was born Dec. 22, 1892, near Medicine Lodge, Kan. Survivors include a daughter, Mrs. Norma Rhoades, Pampa, a son, Norman Strasbaugh of Spring Valley, Calif.; two brothers, Ernest Colborn, St. John, Kan., and Frank Colborn, Fathayer, Kan.; a sister, Mrs. Marjorie Ozbun, Arkansas City, Kan.; and 11 grandchildren and four great grandchildren.

Fewer Deaths AUSTIN, Tex. (AP) — Traffic deaths for 1973 are 3 per cent below last year's level, the Texas Department of Public Safety said Saturday. The Department said 960 persons have been killed on the state's highways this year, compared to 989 by this time in 1972.

AS THE SUN SETS — This oil pumpjack keeps vigil as the sun sets on another spring day. Unlike people, it isn't bothered by whether or not the sun sets at the correct time. It doesn't pay any attention to Daylight Saving Time as it keeps working. DST arrived at 2 a.m. today. Or 3 a.m. or whatever. Anyway, residents need to set clocks and watches ahead one hour. (Photo by Terry Hanna)

Credit Union Chapter Hears Reports

A report on the recent state Credit Union League meeting in Dallas highlighted the recent bimonthly meeting of the Top O' Texas Chapter of the Texas Credit Union League. Meeting at Harvester Pitt Bar-B-Que in Pampa, 81 members representing eight area credit unions heard the report by Ray Fisher, Pampa Municipal, delegate to the state meeting. Fisher, speaking on board management relationships with the credit union, discussed ways to improve the organizations through membership campaigns, services to members, youth movements, marketing programs, counseling members, consumer education, member communication and social responsibilities. He emphasized that credit union should always maintain their philosophy and insure its public image through friendliness. Mrs. Edna Chapin, Skel-Tex, gave a brief report on current state credit union movement and possible legislation concerning state chartered credit unions. Fred Blackwell, chapter president, urged each local union in the chapter to invite him to visit board meetings during his term.

Schools Set Band Concert

All Pampa public school bands will be featured in a concert Tuesday at 7:30 p.m. in the Pampa High School Field House. All the bands will present a variety of music. Directors for the concert will be Harris Brinson, Pampa High School; Joe DiCosimo, Robert E. Lee; Buzz Green, Pampa Junior High; and Darrell Garrison, the combined bands of the seven elementary schools. Admission for the concert is 50 cents for adults and 25 cents for school students.

Band Boosters Slate Supper

The Pampa Band Boosters will sponsor a spaghetti supper from 5:30 to 8 p.m. Wednesday in the Pampa High School cafeteria. Proceeds from the supper will be used to help fund the band's trip to Atlanta, Ga., from May 9-14. Tickets are \$1 each and may be purchased from any band member or by calling the PHS Band Room at 669-2681.

Retiring Teacher Hailed At Appreciation Banquet

Mrs. Jarvis (Mabel Alice) Johnson, who is retiring after 15 years in the Pampa school system, was honored recently at a teacher appreciation banquet presented by the Horace Mann Elementary School Parent-Teacher Association. When her youngest son started school, Mrs. Johnson returned to school and received her bachelor degree in 1958 from West Texas State University. She commuted nights and summers to obtain her master degree in 1967 from WTSU. For 14 of her 15 teaching years, she has worked with the first grade students, her favorite. Enjoying her teaching experience, Mrs. Johnson said she knows she will miss it. She added that when fall comes, she will probably have a yen to return to the school.

A LOVE OF CHILDREN — Mrs. Jarvis Johnson, teacher at Horace Mann Elementary School, aids one of her students, Dwayne Hale, son of Mr. and Mrs. Jerry Hale, 640 N. Wells, to understand a point of discussion during class. A teacher for 15 years in the Pampa school system, Mrs. Johnson will retire at the end of this school year. (Photo by Terry Hanna)

Church Gets Miracle Image, Members Say

ALVIN, Tex. (AP) — Several members of the Esmina Pentecostal Holy Church in this Southeast Texas town believe an image of Christ has become part of an oil painting above the church's baptistry. "We were having a baptismal service at 4 p.m. Easter Sunday," said Pauline Huerta. "The church was packed. Suddenly, a bright light shone in front of the picture. Everyone got up and went to the front and started praying. Then Jesus showed on the picture." Visitors to the church say the 5-by-7 foot painting of a river and mountains does include a hazy image over the river which looks like a man in a white robe. Church members claim the image was not in the picture before Easter Sunday. "I have sat in the front row every Sunday for the nine months since we got this picture," Mrs. Huerta said. "I never saw it before. We are not religious fanatics. This is real."

The picture was painted for the church by Mrs. Fairy Lanier of Alvin, who insists she did not paint an image on the painting. "But you can see it there now," she said. "It kind of makes you shiver." The Rev. Thomas Trevino Jr., pastor of the church for the past 13 years, agrees with the church members. "I believe very strongly in miracles," he said.

Law Officers Plan Meeting At Boys Ranch

Law enforcement officers from the Texas Panhandle and the tri-state area will meet at Cal-Farley's Boys Ranch Tuesday, May 8, for their annual convention of the United Peace Officers of America. Registration will begin at 9 a.m. followed by a program featuring Justin Wilson, humorist, of New Orleans, La. At noon, a barbeque luncheon will be provided by the officers, followed by a business meeting and election of new officers for the UPOA. Present officers are Sheriff T. L. Baker of Potter County, president; Judge Clarence Williams, Panhandle, treasurer; and Sheriff Joe Thomas of Hartley County, secretary. Sheriff Baker urges officers and families who attend to make a tour of the Ranch facilities following the noon meal. Ranch buses will be on hand and boys of the Ranch will be guides. The United Peace Officers of America was founded to help the school needs of the Ranch and the officers have continued their help to the boys with many projects since 1955.

Celanese Corp. Has Corporate Office Change

NEW YORK — John W. Brooks, chairman and chief executive officer of Celanese Corp., announced Saturday the formation of a new three-man corporate office which will be responsible for the development of strategies to enhance the present Celanese businesses and ensure the long-term profitable growth of the corporation. In addition to Brooks, the corporate office includes Peter H. Conze, who was elected a vice chairman of the corporation, and John D. Macomber, newly elected president of Celanese. In succeeding Brooks as president, Macomber becomes chief administrative officer, responsible for corporate staff functions, with special emphasis on strategic planning.

Kiwanis Hears Gospel Singing

Singing of gospel songs by a women's trio from the Pampa Chapel Church comprised the program at the Friday luncheon of the Pampa Kiwanis Club in First United Methodist Church. Members of the trio were Mrs. Edwin Waterbury, Miss Cayla Waterbury and Mrs. Paul Simmons. The program was introduced by the Rev. Edwin Waterbury, pastor of the Pampa Chapel Church.

Freddie Hart Sets Performance Here

The Pampa Jaycees will present the Freddie Hart Show at 7:30 p.m. Tuesday at the M. K. Brown Memorial Auditorium. Recipient of Billboard's seller of the year award, Hart will perform many of his songs, including the million-selling and award-winning hit, "Easy Loving."

FREDDIE HART to appear here.

The single and the title album received such honors as single of the year, album of the year, best male vocalist and entertainer of the year in the country-western recording field. "Easy Loving" was also named song of the year. Born in Lothrop, Ala., Hart has traveled widely around the country. At the age of five, he received a makeshift guitar from an uncle and began to practice on it during spare moments squeezed from his chores as one of 15 children in a sharecropping family. Leaving home when he was 9, he hitchhiked around the country and joined the Marines when he was only 14. He received his honorable discharge at 17 after traveling in Southeast Asia and the Pacific. Developing an interest in country music, he hit the road, doing odd jobs, singing and writing songs.

K&F Selects New Directors And Officers

Three new directors were elected at the final meeting of Top O' Texas Knife & Fork Club. Those elected were Travis Lively, Allan Wise and E. E. Shelhamer. The three retiring directors are Ray Duncan, John Rankin and Hugh Peoples. Dr. James F. Malone was elected to serve as president for the coming year, and Bill Hite was elected vice president. Clotilde Thompson will serve as secretary-treasurer. Holdover directors are Mrs. Hazel Poole, Dr. W. Calvin Jones and Mrs. Marjorie Gaut. Dr. R. M. Bellamy was appointed to complete the unexpired term of Paul Keim. Ben Franklin, representing the Associated Clubs, met with the group to discuss speakers for the coming season, and selections were made subject to later confirmation.

Church Plans Drug Seminar

A seminar on drug abuse will be conducted at Harrah United Methodist Church, 639 S. Barnes, tonight by J. J. Ryzman, detective with the Pampa police department. The program, scheduled for 5:30, will replace the regular service for the evening, according to the Rev. Billy Wilson, pastor. Det. Ryzman will set up a display of the various drugs figuring in today's drug problems, lecture briefly, then conduct a question and answer period. This program is open to the public, Rev. Wilson said.

Melanie Describes a 'Rest Period'

By MARY CAMPBELL
AP Newsfeatures Writer
NEW YORK (AP) — Melanie, who has been known for some protest songs and antiwar songs, says the energy has gone out of the campaign for social change.

"There's a real decline in energy as far as protest in any way goes. All the groups have been fighting to change things that are really wrong. There was a movement and everybody had incredible energy — determined that these things should be changed. It's like they fought some secret battle somewhere and nobody knows where or how but we lost and came back somehow defeated. There is an after depression. I think we're in for a time of low energy for awhile.

"Even in words and music, it is getting much less — we've got to be free and much more. I love you, I need you. Mine are going that way, too. I only write what is happening around me. I don't start movements. They happen around me and those are the things I write about. Somehow I'm in on the beginning and the end.

"There is like a rest period going on. I hope something is going to go on again. There's a lack of energy or caring about so many things now. I'll never write another 'Lay Down' — not unless it starts happening around me again. I was so sure the world was going to change. It just sort of fell down."

Melanie says that she doesn't think women songwriters are taken as seriously as men writers. "That starts with the record business. They're so used to the idea that men sell the most records. For so long the 13-year-old girls bought the cute little boy records. They got the idea boys are going to make you money and girls aren't unless they're sexy."

"I think a lot of girl performer-writers are doing more in sexually-exploiting themselves than they were maybe five years ago when it wasn't absolutely necessary for a girl to be pretty to make it in music. Look at Carly Simon's no-bra album cover and Joni Mitchell's with no clothes off. Even in my own last album cover, I didn't mean there to be a slightly sexy tone.

MELANIE

but it turned out that way I think there is a self-conscious thing that happened. We're getting right back into a thing where a girl has to show a little of the old body to keep the people buying."

Musically, Melanie likes best her two most recent LPs. "I felt that 'Gather Me' was the best up until that point. I feel that 'Stone Ground Words' is better, musically especially."

"Before, I used to make albums and that was the end of it. I'm very involved in it now, in the arrangements and mixes and everything." The last two have been on Neighborhood Records. Now that she can put out an album when she feels she is ready instead of having to keep to a schedule, she probably will do one a year, because that is the speed at which she says she writes songs.

Her first recording was in 1968, a single for Columbia, "Beautiful People." Most of her albums have been on Buddah.

The best-known song probably is "What Have They Done to My Song?" "I guess a lot of people get taken and they identified with that song. It wasn't an antiwar song, it is much more a personal relationship kind of song."

"I never had a hit with it at all. The New Seekers did. Ray Charles did it. That was the best. He really made that song his own."

"It's becoming what they call a standard. It's very odd when I think of the songs I think are good. There are a lot of cuts on some of my albums that I feel

are really special and I never hear them."

About being a cult figure, Melanie says, "I guess I was at one point — when the festivals were going on and I was at every one of them. People were lighting candles during 'Candles in the Rain' and there seemed to be a lot of ceremony around things I did. I didn't feel anything negative about it."

Earlier this year, Melanie gave a concert at Carnegie Hall on her 26th birthday and all during the evening fans still placed gifts at her feet and at the end of the concert some lighted candles they had brought with them.

Writing, for her, is like a digestive process, Melanie says. "It takes me a long time to digest. I sit and wait and wait and eventually something will make sense to me. I'll be able to write it down, even if it's only one little sentence that is true. Sometimes it takes a long time for those little sentences."

"When I read Kurt Vonnegut I notice he has thousands of those little sentences that I wait for. I wonder how long it takes him to write a book. That is just beautiful. I'll think, and it is just stuck in the middle of a paragraph somewhere. Some people read for a plot and they miss some of those great sentences."

Melanie says she has changed during the years she has been recording. Not only does she listen to her voice on some of her early work and wonder why anybody bought it, but her songwriting has changed and her personality.

"I can't really categorize the change in song writing but it is a direction that your mind takes. It's an approach to what you're dealing with that has changed, not that I'm dealing with different things. My relationship to those things has changed."

"I'm not nearly as bitter as I used to be. I'm much more tolerant of things that are going on around me."

Bermuda ZIP Codes To Help Police Get To Emergencies

HAMILTON, Bermuda (AP) — ZIP codes are coming to Bermuda — all 22 square miles of it — to speed the mails and help police and firemen respond to emergencies.

Houses here have no numbers. The postman knows you. But should he become ill, and a replacement can't be found who knows you too, the post office announces over the radio that mail won't be delivered that

day in your neighborhood. If you want your mail, you must go to the post office to get it.

Mail delivery is slow because of Bermuda's growing population — now 55,000 — and the accompanying increase in mail volume.

The island's 174 postal personnel now handle nearly 16 million pieces of mail a year. Around 5.8 million pieces are distributed within the island. The rest comes from or goes to foreign points.

"I mailed a letter to an associate whose post office box is just across the way from mine in the main post office," one businessman said. "It took three days to reach him."

It takes about an hour to drive from one end of this island in the Atlantic to the other, but it sometimes takes a week for a letter to go the same route.

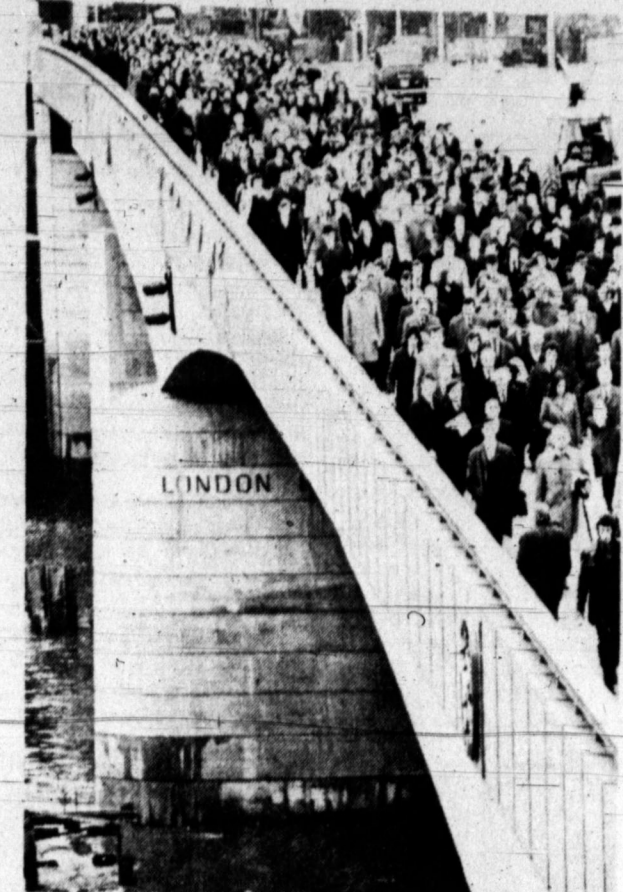

But Postmaster General Sydney Corbett says ZIP codes should speed things up.

He explains it this way: The number of codes will be 241. The average number of dwellings in each of these zones will number about 65. The first number in the five-digit code will represent one of Bermuda's nine parishes, or counties. The second digit will show the zone within the parish. The remaining digits will narrow it down to the dwelling — in other words the street and house number.

"This system will greatly assist not only the postal service in primary and secondary sorting of mail, but will be of considerable benefit to many sections of the community, assisting in the positive location of a property by emergency services and so on," Corbett says.

The post office is drawing up maps and literature to explain ZIP codes to the islanders.

Because Iceland forbids the cutting of its few trees, most Christmas greens must be imported.

LONDON BRIDGE seems to have enough pedestrian traffic to be falling down, but the new 105-foot-wide span also has dual three-lane-vehicle traffic. This is the fourth London Bridge on this site over the Thames.

Lions Clubs Achieve One Million Members

OAK BROOK, ILLINOIS — Bernard A. "Barney" Gill (left), of Virginia Beach, Va., has been recognized as the one millionth member of the International Association of Lions Clubs, according to Lions President George Friedrichs, Anney, France, Lions International is the world's largest service organization with more than 35,000 clubs in 148 countries and geographical territories around the world. It is the first service association to reach one million members. In special ceremonies conducted at the Association's Oak Brook, Ill., headquarters, Gill received a special plaque

from Phil W. Sterker, of Basalt, Colo., Chairman of the Membership Club Service Committee of the International Board of Directors. Gill, 45, a retired Army Lieutenant Colonel and Viet Nam veteran, is Executive Director of the United-Drug Abuse Council, Inc., a planning and coordinating agency for all drug related problems in the Tidewater region of Virginia. He resides in Virginia Beach with his wife, Nancy, and their five children and is a member of the Virginia Beach Oceana Lions Club.

SHOWBEAT

By DICK KLEINER

HOLLYWOOD — (NEA) — What's new in entertainment? Everybody keeps talking about new things but the newest development may be something very old.

Would you believe Buffalo Bill's Wild West Show and Congress of Rough Riders of the World? You'd better believe it because it's back again.

Monte Montana Jr., the son of the old cowboy star, has put the grand old show back together — and the revival seems to be catching on. It's been a long and difficult struggle for Montana.

He had the idea somewhere around 1960. He figured it might be just the thing for this pseudo-sophisticated era to see the old show with its cowboys and Indians and all its horsey hoopla.

He quickly realized there was a lot he didn't know about producing, promoting and packaging a live show. So he set about to learn.

He worked in advertising agencies and with promotion people, pigeon-holing the show itself until he acquired the knowledge he felt was essential.

In 1968, he tried to stage the show. He failed. He tried again in 1970 and promptly got slapped with a lawsuit. The plaintiff was the Ringling Brothers circus because they claimed the rights to the Buffalo Bill name.

Montana won the suit but it cost him everything to do so. He had to begin all over again.

Last summer he put the show on again and this time it clicked. It played for a month in North Platte, Neb., and was a huge hit. This year, he'll go back to Nebraska again (July 21-Aug. 26) and then go on tour, probably to New Zealand and Australia.

The show, he says, is not a precise duplicate of the

Yup, It's Wild West Showtime

SAVAJO MEDICINE MAN Jones Benally keeps all hoops in motion at once in dance, according to Indian legend, that lengthens life.

original Buffalo Bill Show. That one, so important in show business history, flourished in the 1890s and early 1900s.

Montana owns an early Edison film, taken somewhere in New Jersey in 1898, which shows the Buffalo Bill Show in action.

"Today's audience wouldn't stand for it," he says. "It's nothing but a few cowboys riding around." The new version is an at-

tempt to capture the flavor of the original in a contemporary style. It has 80 people — cowboys, cowgirls, Indians, trick riders and ropers (Montana, a trick rider and roper, occasionally fills in). It's jazzed up with lights, flags, color and plenty of action.

Montana has traveled all over the world in his many attempts to get the old show going again, and he says the American West is still a source of worldwide interest.

"Even in countries that are anti-American," he says, "the people aren't anti-cowboys-and-Indians. For some reason, they seem to separate contemporary America and the American West."

One of his biggest problems is finding performers. He says that today's youngsters grow up with cars, rather than horses, and with footballs, instead of ropes. They just aren't oriented toward trick riding and roping.

"But there does seem to be some rebirth of interest in horses," he says, "particularly in the Midwest."

Eventually, his hope is that Buffalo Bill's Wild West Show and Congress of Rough Riders of the World will be a touring show and stay on the road 10 months of the year, like the circus.

There is also a television special in the works and Montana would love to have John Wayne as the host. (NEWSPAPER ENTERPRISE ASSN.)

'A Splendid Little War' (6)

By Don Oakley and Ed Kudley

War has commenced between the United States and Spain. Proceed at once to Philippine Islands. Commence operations at once, particularly against the Spanish fleet. You must capture vessels or destroy. Use utmost endeavors.

The message sped from the Navy Department to Commodore, soon to be Admiral, George Dewey at Hong Kong. The Asiatic squadron was ready. The protected (armored) cruisers *Olympia*, *Baltimore*, *Raleigh* and *Boston*, the unprotected cruiser *Concord* and three smaller vessels set out across the China Sea. On the night of Apr. 30, 1898, they slipped past Corregidor.

Admiral Patricio Montojo y Pasarun, fully confident of defeat, had placed his 10 antiquated and outgunned ships before the Cavite navy yard to spare Manila from stray American shells.

As dawn broke on May 1, the American ships in column formation approached the enemy. "You may fire when ready, Gridley," the calm Dewey said to the *Olympia's* captain.

Five times the American line passed before the Spaniards, guns blazing, each time narrowing the distance. The return fire was heavy but ineffective. Smoke from the black powder the guns were using soon obscured the scene of battle.

A garbled report to the flagship revealed that the American guns were down to 15 rounds. Dewey broke off the engagement to assess the situation and to allow the crews to take breakfast. He learned that only 15 rounds had been expended per gun.

At 11:16 a.m., Dewey resumed the attack against what was left of the Spanish fleet and

shore batteries. By noon the last Spanish flags came down.

It was one of the most lopsided victories in naval history. American casualties were two officers and six men slightly injured and one dead—from a heart attack. The Spanish had lost 167 dead and 214 wounded.

In seven hours, Dewey had destroyed half of Spain's naval strength and ended 400 years of empire in the Pacific. The nation was dazzled when the news finally came. But as Washington soon realized, Dewey had no power to follow up the victory on the Philippines, where an insurrection led by Filipino patriot Emilio Aguinaldo was taking place.

NEXT: On to Cuba

Social Security Q & A OF TURBULENT SPRING

Have you a question about social security? Address it to Howard L. Weatherly, Branch Manager, Social Security Administration, 1541 N. Hobart, Pampa, Texas 79065. You will receive an answer in this column or by mail.

By HOWARD L. WEATHERLY
Q. Does the \$2100 retirement test apply to students drawing social security? I work part time as a janitor at the college I attend for \$160 per month. During June, July and August I work for a company in town and earn \$650 per month. Will I be entitled to receive benefits this year? My monthly benefit is \$90 and I haven't been entitled up to now.

A. Benefits of \$90 per month are \$1060 per year. You won't be entitled to receive benefits for June, July and August, but since your earnings won't exceed \$175 per month while you are working at your school, you will be entitled to receive nine of your social security checks for the year.

store for 21 years ending in 1972. I have now taken a job with the state where I am not covered by social security. Can I keep up my social security by paying into it myself?

A. The law does not permit voluntary contributions of social security taxes. You must work in covered employment or self-employment to make contributions. Because you have worked under social security for at least ten years, you are guaranteed a retirement benefit at age 62 or later and you are protected for survivor benefits in the event of your death and for Medicare at age 65.

You are also insured for disability benefits for five years following your last covered employment.

Labyrinth
Africa's 2,700-mile Zaire River, until recently known as the Congo, has 4,000 islands, some so large, wooded and close together that boatmen may become lost in a maze of channels.

WORRY CLINIC

Rev. Merfin's popular radio "talk show" on WMBI has already flooded us with requests for more data about the Scientific Marriage Foundation. To date, the SMF has a negligible divorce rate despite 10,000 married folks in the past 17 years.

CASE W-500: Robert Merfin is a jolly pastor who also handles a WMBI radio show in Chicago every morning.

Recently he invited me to be his guest from 8 to 8:30 A.M. and described our Scientific Marriage Foundation.

"Dr. Crane," he inquired, "how does your SMF match congenial people?"

So I told his radio audience that we use an IBM computer machine, setting 10 dials to make sure we match applicants who are compatible in their basic habits, attitudes and religious outlook.

For example, since men dislike writing letters, they usually restrict us to a 200-mile radius.

So we set one dial at 200 miles. Another involves religion, since we match Catholic with Catholic, Jew with Jew, but may vary moderately among Protestants.

Thus, if we have a lovely girl who perfectly matches a man on 9 basic factors but is a Presbyterian, whereas he is a Methodist or Baptist, we still introduce them.

And I explained that about 3,000 leading Rabbis, Priests and Ministers, have volunteered to interview all our applicants at the grass roots level (which makes us unique in America).

Our splendid Board includes top-notch clergy of the various faiths, including Rabbi Samuel Silver (Connecticut), Bishop Gerald Kennedy (California), Monsignor Henry Ward (Indiana), Dr. Peale (New York) et al.

Among those 10 basic dial settings we also include age, height (for we usually introduce a taller man to a shorter girl), as well as personal habits.

And I warned the radio listeners that, of 50,000 male applicants, only ONE had ever asked to be introduced to a girl who smokes!

For men may play around with smoking females but they seldom want to marry such!

And we also include marital status, for many men want to marry a single girl, while others don't object to a widow, if she has no children.

But occasionally we have a splendid male applicant who asks to be matched with a widow who has young children. Such a man may be 38 or 40, and thus disinterested in the diaper stage of kiddies but still eager to help a lovely woman rear youngsters who may be of school age.

At the end of our interview, Rev. Merfin asked me what I thought was the criterion for gauging a zooming, virile church vs. one that has gone to "seed" and is losing attendance.

To which I mentioned the old adage that is still true: "You must first fill the pulpit if you wish to fill the pews!"

And that means, pick a clergyman who knows how to hold the fascinated attention of his congregation via superb oratory.

"It takes a livewire in the pulpit to electrify an audience," I added.

Moreover, the thriving churches of the future can be gauged by seeing which ones now use school buses to bring kiddies to their Sunday Schools. Churches without such buses, at least in the smaller cities and towns, are in the first stages of decay.

So send for the "SMF Marriage Questionnaire," enclosing a long stamped, return envelope, plus 25 cents, for it gives unmarried folks a wide range from which to select their possible congenial mates.

That's why the SMF divorce rate is far below one per cent, even after 17 years!

(Always write to Dr. Crane in care of The Worry Clinic, Hopkins Bldg., Houston, Texas 77030. Enclose a long stamped, addressed envelope and 25 cents to cover typing and printing costs when you send for one of his booklets.)

No Great Loss Seen Despite Wet Weather

By JIM BRIGANCE
Associated Press Writer
Most Texans may be surprised to learn the Weather Service says the long stretch of wet, cool weather this winter and spring, coupled with wild, unruly turbulence, is only normal.

And, answering widespread farmer complaints that it's too wet to plow, Texas Agriculture Commissioner John White declares: "We've never lost money in a wet year."

White says there has probably been \$100 million in cattle and crop losses because of the cold winter and wet spring, but adds, "We're not out of business yet. We're a little nervous but it will work out. Wet years turn out to be pretty good. It's these dry years that scare you to death."

The folks at the regional office of the National Weather Service in Fort Worth say what we're experiencing now and will be through May is the long term average—the "normal" spring in Texas.

Maybe it doesn't seem that way because of the attention-grabbing drama of crashing thunder, swirling water, hail, howling winds and all of the other stage props of a spring in Texas.

Calm, dryness, heat, boiling sun and cloudless skies are invidious but nonetheless departures from Texas' normal spring, says Jeter Pruett, supervisor at the Fort Worth regional weather office.

Pruett says a jet stream hanging over Texas has ushered in a great deal of major storm activity from the Pacific Northwest.

Nonetheless, he says, "the long run shows that we're now getting back to normal weather, particularly in North and Northeast Texas. April and May are always the wettest months. We haven't had outstanding or significantly more rainfall than is normal—but more so than the past few years. But they were the unusual periods because of their dryness."

Pruett says spring is a potentially hazardous period in Texas as warm air of the new season continually clashes with cold air of the fading winter.

"It's also difficult to forecast because of its variability," he adds.

Pruett doesn't cotton well to the sun spot theory—that being that sun spots cause everything from war to winter heat waves.

"Because of their unusual na-

ture... there's a lot we don't know about sun spots... well, you can make a case for them causing most anything you want to. In reality, though, we're just returning to what is normal for Texas in spring," he said.

White says spring has jacked up onion prices in the Rio Grande Valley where the crop has been slim because rains have caused seed stems, not onions. "They're getting tremendous prices for onions down there. I don't know how much we'll have to replant this year. We're running three to four weeks behind on cotton in North Texas but, really, we're not late. It just means pushing the time between land preparation and cultivating and planting closer together."

"Cattlemen are pretty stoic, you know. They don't whine and complain about the weather or too awful much. They know you can't do anything about it. They're madder about the beef boycott than anything else," White said.

Spring is coming in like a lion but winter was pretty much of a tiger, too.

Galveston, which rarely sees snow, got two loads of it this year.

The bayou country between Galveston and Beaumont saw more ice and snow than they've seen in years.

The Texas Panhandle staggered under one vicious snowstorm after another all year long. Freeze warnings were issued there April 26.

Rainfall in Dallas County is about 10-inches over what it was through the end of April last year. About 95 per cent of county's cotton land has yet to be planted. The fields are just too wet.

"Well," says White, "there's no doubt there's been an interruption of the schedule. But it will pay off later in the year."

Fuel Executives Suggest Conservation Of Energy

By Max B. Skelton
AP Oil Writer

HOUSTON (AP) — Oil and gas executives support President Nixon's call for industry-consumer emphasis on energy conservation.

Nixon's energy message said the nation must develop a national energy conservation ethic.

The President suggested industry design products which use energy more efficiently. He also suggested workers and consumers turn off lights, tune up automobiles, and reduce the use of air conditioning and heating.

Eight days before the Nixon message went to Congress, Harry Bridges, president of Shell Oil Co., quantified the possible effects of such energy conservation measures.

In a speech in Denver, Colo., Bridges also listed such measures as more mini-cars, better insulation of existing and new homes and commercial buildings, and an increase in the load factor of commercial airliners.

"Our estimates are that the potential saving of energy through these measures could amount to the equivalent of three million barrels of crude oil a day by 1980 and seven million barrels a day by 1990," Bridges said.

"Such energy savings would cut imports from overseas by about one-fourth in 1980 and by about one-third in 1990."

In February, John E. Swearingen, chairman of Standard Oil Co. (Indiana), said voluntary conservation of energy must be encouraged.

"The potential savings from small reductions in per capita energy consumption are very great, and economies can be achieved in homes, in transportation, in agriculture, business and industry, and in government," Swearingen said.

"Fair market prices for fuels, plus programs to promote public awareness of the importance of economy measures, could result in substantial energy conservation with little adverse effect on the economy."

Richard L. O'Shields, president of Panhandle Eastern Pipe Line Co., discussed the emergency of energy shortages and a program of corrective action in a March speech in Dallas, Tex.

"Conservation of current energy consumption should be promoted vigorously by both government and industry," O'Shields said.

"A small improvement in the efficiency of energy usage could result in a significant savings in total energy consumption without material effect on the economy."

Frank N. Ikard, president of the American Petroleum Institute, long has advocated energy conservation measures and expresses hope the Nixon message will trigger vigorous educational campaigns to encourage everyone to look for ways in which energy can be used more efficiently.

"But, important as these activities are, they are not a panacea," he said. "They cannot be considered a substitute for expanded exploration and pro-

duction of all energy resources. This is because more energy, not less, will be required in the future if America is to achieve its social, economic, and environmental goals."

Bridges said industry can point out the potential but the decisions to achieve the savings must be made by society itself.

"These are obviously matters of public policy, but the oil industry itself can make a definite contribution," Bridges said.

"For instance, at Shell last year we set a goal of reducing energy consumption in our refineries by 10 per cent by 1976."

EXPANDED TERRITORY — Bill Bonner, left, former Pampa, discusses a new trade area in the Texas-Panhandle, Oklahoma and Kansas with Walter Beal, president of Beal Equipment Company, Odessa.

Former Pampa Named Vice President Of Sales

ODESSA — Bill Bonner, formerly of Pampa, has been named a vice president in charge of a new northern sales region for Beal Equipment Co., based here.

The firm is celebrating its 20th anniversary this month, kicking off a major expansion program that will take in the Texas Panhandle, Oklahoma and Kansas.

Previous company activities have been in far West Texas, New Mexico and Arizona.

A Pampa firm will have a major part in the expansion program. Midwest Chemical and Processing Co., located on Price Rd., will manufacture the water-treating chemicals, corrosion inhibitors and paraffin dispersants that will be a part of Beal's greater line of products.

For the present, Bonner will make his headquarters at the Midwest plant in Pampa.

NOT BITING
KIDDERMINSTER, England (AP) — To find their angling champion, 200 national ambulance servicemen fished a stretch of canal in Worcestershire in a competition. But after five hours, nobody had caught anything. Later, a local fisherman reported all the canal's fish had been moved to other waters three weeks earlier. Another contest has been arranged.

By IRVING DESFOR
AP Newsfeatures

Photography's ability to be shared and to provide intense personal satisfaction is clearly apparent in the achievements of Volunteer Service Photographers Inc. I've participated in its activities for about 20 years but must be jolted periodically into realizing that it's unique and newsworthy and that its dedicated service of rehabilitation through photography is not just a routine mission.

VSP was founded in 1941 in New York by professional photographer Josephine U. Herrick as a community volunteer enterprise to enlist photography's services in our country's war effort. In the three decades since, it helped wounded veterans of World War II, Korea and Vietnam in their hospital recovery periods. Between wars — and currently — VSP's programs have expanded into youth and senior citizens centers, a prison hospital and rehabilitation centers for the emotionally disturbed, handicapped and drug addicted.

When Miss Herrick died last year, the little group she started 30 years before had grown to a hard core of 100 active volunteers bringing photo enthusiasm to 45 institutions or groups in the New York area.

It was found that photography's greatest therapeutic value was achieved when the patient or student engages in a "do-it-yourself" activity. A definite amount of mental and physical stimulation is involved in handling a camera and a roll of film, in processing negatives, in making prints or in handling

INVOLVED IN PHOTOGRAPHY, despite their handicaps, three members of Goldwater Hospital camera club, on New York's Welfare Island, discuss camera settings with Volunteer Service Photographers Inc. volunteer Sylvia Solomon. From left to right: Tom Walsh, Mrs. Solomon, Nancy and Tom Brown. Their photo hobby provides vital physical exercise and a sense of personal achievement.

a set of oil colors and a brush to produce a hand-colored photograph.

Therefore, through the years, VSP's basic instructional services haven't changed its teaching of taking, processing and printing black-and-white photographs and hand coloring black-and-white prints. These basics maintain VSP's major objective: to impart a sense of personal achievement. It applies to hospitalized servicemen, the chronically ill or handicapped and to the young or elderly whether they're acquiring an interesting hobby or

learning a useful skill.

VSP's efforts are humanized when you visit Goldwater Hospital on New York's Welfare Island and meet volunteer Sylvia Solomon and patients Tom and Nancy Brown. Mrs. Solomon, a past VSP president, has been teaching at the hospital for 25 years. Tom and Nancy are polio victims who met at the hospital's VSP classes. Their mutual interest in photography developed to more than sharing a crippling disease and a hobby. They got married.

It isn't easy for Tom and Nancy to take pictures. Tom can't walk and his left hand is the one he has some control over. His camera requires the firm support of a platform attached to his wheelchair and must have a left-hand film advance. He designed a special, screw-and-bolt contraption for focusing.

Nancy has limited use of her fingers but can get around on her feet. Her camera, mounted on a tripod, has a cable release. It's placed in her mouth and she takes pictures by tongue pressure.

Tom and Nancy photograph staff and patient activities and their enlargements decorate the hospital walls and corridors. Tom is head of Goldwater Hospital's Community Board and has been photographically involved in numerous projects. One was recording special medical techniques devised for patients to illustrate reports at medical meetings. Another was making photo posters, which encouraged patient participation in blood-donor and get-out-the-vote drives. Other projects are aimed at improving Welfare Island roads and towards drug addict rehabilitation.

Focusing on teacher/volunteer Sylvia Solomon and student/patients Tom and Nancy Brown helps bring the whole VSP program into sharper focus. It's a self-help program for people who need it, supported by working volunteers, contributions from sympathetic people and gifts of equipment and material from enlightened firms in the photographic industry.

Rehabilitation through photography works. It's being accomplished in one area in the country.

WASHINGTON (AP) — President Nixon now is pushing to keep on the books the wage-price control law that he battled in Congress three years ago with the claim he didn't want the power and never would use it.

Congress is expected to complete action on a one-year extension of the law when it returns from its Easter recess Monday.

Unless it acts, the President's power to control wages and prices will expire at midnight Monday, meaning that his largely voluntary system of economic restraints would have to be abandoned.

The Economic Stabilization Act was born in the inflationary boom of late 1969 and early 1970, but Nixon resisted pressure from the Democratic-controlled Congress to impose any kind of controls on wages, prices and rents until Aug. 15, 1971, when the White House dramatically reversed its economic policy.

Congress passed the legislation to give Nixon standby powers to control wages, prices and rents in mid-August of 1970. But the White House made it clear

in February that it had no intention of using them.

But less than six months later, Nixon finally used the powers that Congress had given him.

In freezing wages, prices and rents in August of 1971, Nixon thus conceded that his old policies had not worked to bring inflation under control and cut the jobless rate. He asked for an extension of the Economic Stabilization Act to April 30, 1973 and the power to control interest rates as well.

Congress approved the extension pretty much as Nixon requested, including the interest-rate provision, which Nixon has not yet used.

The wage-price freeze dramatically slowed the rate of inflation during the 90 days it prevailed. But it did not halt all price increases. Raw agricultural products were exempt, for example.

Afterwards, when the administration moved to the mandatory control system known as Phase 2, prices began accelerating again.

During the 14 months of Phase 2 ending in January, consumer prices went up by

more than 3.5 per cent.

The biggest challenge to the program was the sharp increase in food prices.

The administration began to counter seriously the food price problem when it announced the largely voluntary Phase 3 program on Jan. 11. It took steps to increase supplies by making far-reaching changes in government agricultural policy.

The original law provided that the President could stabilize wages, prices and rents at not less than their May 25, 1970 levels. The law was being seriously debated in Congress at that time.

When Nixon requested the latest extension to April 30, 1974, he asked that Congress grant a simple extension without trying to mandate controls of its own. The measure got through the Senate in about the form that Nixon wanted, but the House Banking Committee adopted amendments that would have forced Nixon to roll back prices to their March 16, 1973 levels. The President threatened to veto if this provision was finally approved.

The House killed the rollback provisions just before Congress

recessed for the Easter Break, leaving the final version to a conference committee.

Several provisions of the bill are opposed by the White House, but administration officials generally indicate they can live with the amendments tacked on by Congress.

The administration is most worried about a requirement that would force companies to make public disclosures of financial data when they raise prices by 1.5 per cent or more.

The White House has indicated that it plans to take no

further action on wage-price controls until Congress completes action on the extension.

"It would be foolish if we lightened controls now and then woke up on May 1 to find out that we had no controls at all," one high official said.

How long the economic stabilization law will remain on the books is an open question, even with a one-year extension. In his latest economic report to Congress, delivered in January, Nixon said that 1973 can be a year in which the way is clear for ending wage-price controls.

A weekly public service feature from the Texas State Department of Health

Accent on Health

J.E. PEAVY, M.D., Commissioner of Health

Was that chicken fried steak you thought so delicious when you ordered it from your favorite restaurant the last time you ate out really chicken fried steak, or a breaded meat patty?

How about that "farm fresh catfish" you saw on the menu that almost made your mouth water? And would you have bought that ham at the grocery store if you had known that ten per cent of the weight you paid for was actually water?

What about the frankfurters you bought, did you know there was a chance they might have contained chicken instead of red meat?

These and other questions are more frequently raised by consumers in Texas each year, and when they inquire or complain to their local public health department or to the State Health Department, food and drug inspectors go into action.

These inspectors traditionally have been involved in keeping adulterated foods, drugs and cosmetics off the market. More often than ever before, state food and drug inspectors are being asked to check on deceptive and false labeling and advertising of food products offered for sale at grocery stores and restaurants.

Such misleading advertising and food labeling is a violation of the Texas Food, Drug and Cosmetic Act of 1961. That act establishes the criteria for determining what is an adulterated or misbranded food, and any false advertising or misrepresentation that might be used to induce sale of the product.

The State Health Department has received the full cooperation of the majority of establishments contacted thus far.

There are a few items in Texas that perennially give more problems than others. The chicken fried steak is one. Occasionally, the meat is actually a breaded meat patty. Catfish is another. The meat could actually be codfish.

In some instances when a restaurant menu advertises "hamburger" or "hamburger steak," the meat may be a ground meat patty containing cereal. This amounts to false advertising — most often unknowingly on the part of the retailer.

A growing problem is with the advertising of "farm raised catfish," when the fish is not farm raised. The term "farm raised" applies to commercially raised fish by growers who are licensed by the Texas Parks and Wildlife Department.

A smoked or cooked cured "ham," "pork shoulder," "pork shoulder picnic," "pork shoulder butt," or similar products labeled as such under Texas law must not exceed the weight of the fresh, uncooked article.

Products that do not conform to that legal definition become

Youth Center Wrap Up

Swim Lessons
The final classes for May are now being offered to be given in the in-door heated Center pool. All classes for children will meet after school is out in the afternoons either from 4-5 p.m. or 5-6 p.m. All classes are open to the general public and to Center members.

Each of the classes last an hour each day and runs for 10 meeting days. Instructor for the courses is Mrs. Ruth Carter, our resident Water Safety Instructor. Lessons are free to Center members or \$4 to the general public. Please come by the Center front office and sign your children up early to insure them a place in a class. All classes are limited in number.

First Baptist No. 3-7-0 and 15-4 while the Mobeetie Outcasts took First Baptist No. 27-0 and 7-0.

In the mixed league first place Harold Barrett Ford defeated First Baptist 7-0 and 15-6; Carlson-Craddock bumped First National Bank 15-8 and 15-4 while First Methodist Church won its first game of the year over First Baptist Church 15-4, 10-15 and 15-11.

Baton Lessons
The Center will offer baton lessons for young people this summer beginning June 4 Rhonda Dennis, noted high school batonist, will conduct the classes. Classes will be offered beginners and more advanced twirlers. Classes will begin on June 4 at 1:30 p.m. and run on each Monday, Wednesday and Friday for six weeks through July 13.

All young people both boys and girls are invited to enroll in these classes. To participate you need only be a Center member and own or purchase a balanced baton.

Memberships
The Center's participation in its program is through a membership plan which is open to the general public. The memberships are divided into two categories - limited and unlimited.

The limited membership is the regular Youth Center membership that we have been selling for 12 years. This plan entitles you to use of the swimming pool, dressing rooms, gym and recreation hall.

The unlimited plan gives you all of the above features, but allows you to use the new health facility. The health facility houses the exercise machines, handball and racquetball courts, weights, reducing machines and sauna.

The individual limited membership is sold to persons who are 8 years of age or older. The cost is \$5 for six months or \$8 per year. For a family the cost is \$12 for six months or \$20 a year.

The unlimited membership for an individual is \$65 for six months or \$118 a year. For a husband-wife combination membership the cost is only \$90 for six months and \$170 a year.

We do have an installment plan for a six month membership. For full details call the health facility at 665-4381.

Volleyball Results
The second round of volleyball competition started this week with current leaders posting victories. First place Blink's Bike Barn defeated Lee Tex Machine 15-6 and 15-4 in the women's league while First Baptist No. 1 bumped First Baptist No. 2 15-8 and 15-12.

In the men's league first place First Baptist No. 1 defeated

THE SAVAGE CELLS

How Cancer Cells Divide

(Second in a Series.)
By DAVID HENDIN
NEA Science Editor

NEW YORK—(NEA)—One of the most interesting phenomena of the diseases called cancer is the way they spread in an individual's body. But this is also one of the areas least studied and understood by the cancer fighters.

According to a stylishly mod Philadelphia scientist who was born in Israel, understanding the way cancer spreads, or metastasizes, may be the fastest way of harnessing the diseases until total prevention—if, indeed, it is possible—can be accomplished.

Metastasis, says Dr. Isaiah J. Fidler of the University of Pennsylvania, is the ultimate of malignancy. One of the prime reasons a benign tumor is benign is that it does not spread.

"The first thing a physician wants to know whether his patient has a benign or malignant tumor because this will tell him the nature of the threat to the patient's life," says Fidler.

"A benign tumor is usually encapsulated, never invades, never metastasizes. But a malignant one is the opposite: It grows quickly, is poorly encapsulated, invades and it metastasizes."

"The most important thing in the practical research of

metastasis is when a patient presents himself to the physician this has already occurred. To prevent this spreading to begin with is more important than taking care of it after it spreads," Fidler says.

And this is the 36-year-old scientist's goal. He hopes someday to develop a method that will prevent the spread of cancer cells throughout the body. Once this is done, the curing of cancer becomes strictly mechanical.

"As soon as you can stop metastasis the crunch is gone. The surgeon's knife then becomes the most effective tool," says Dr. Martin Lewis, professor of pathology at Memorial University of Newfoundland, Canada.

"As of right now," says Fidler, "there is no way a doctor can remove a malignant tumor and say 'we got it all, and be 100 per cent sure. He can say only that there has been no evidence of invasion.'"

Fidler's data show that the presence of cancerous tumor cells in the blood of a patient does not mean metastasis has already taken place, because metastasis only occurs once the cell is

system for at least 24 hours — we could prevent their spread," Fidler says.

In a related experiment he found that ironically it may be the body's immune response that helps some of the spreading cancer cells to clump and thus survive. By lowering the immunity response in test mice, he was able to reduce new cancer growths.

He stresses, however, that he is talking about a very specific, low level of immune response.

When Fidler injected 50,000 single cancer cells into the bloodstream of a mouse, upon autopsy he found an average of 11 metastatic nodules in the animal's lungs. Thus clumped cells were shown to have a better chance to survive and become established as secondary tumor sites.

In a related experiment, Fidler further established the fact that the spreading of cancer within one's body is not a random phenomenon, but depends on inherent qualities of the tumor cells themselves.

He has bred a strain of cancer cells in which each succeeding generation is more potent, with regard to metastasis, than its parent. When he injected 25,000 live cancer cells into mice he found an average of 40 lung cancer nodules when dissecting the mice three weeks later. Cancer cells taken from these resultant tumors were re-injected into other mice. The second generation yielded 117 lung cancer nodules. The third generation yielded 327, the fourth 428, the fifth nearly 600 and so on.

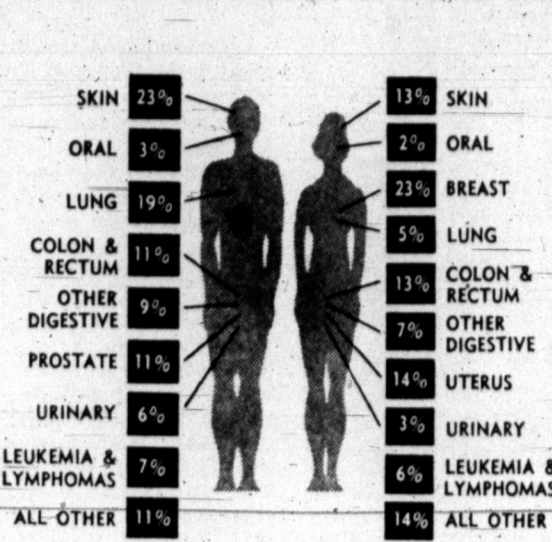

"This experiment demonstrated that, we were able to specifically select, within the same tumor, lines possessing an increasing ability to metastasize. It proves that metastasis is not a random phenomenon, but depends on inherent qualities of the tumor cell itself," Fidler said in a recent interview in Nogales, Ariz., where the American Cancer Society held its annual seminar for science journalists.

The Israeli stresses that much more research must be done in the neglected field of the unique properties of cancer cell surfaces.

"The ultimate treatment for the prevention of metastasis could center not on chemotherapy where drugs kill tumor cells, but on alteration of tumor cell behavior."

"If we could prevent the arrest of tumor cells in blood vessels — keep them circulating throughout the

Viewpoints Determine Economics

By JOHN CUNIFF
AP Business Analyst

NEW YORK (AP)—Whether you believe that these are among the best of economic times or the worst, depends upon your point of view. The division of viewpoints is becoming more apparent daily.

James McLane, deputy director of the Cost of Living Council, believes in a positive outlook. Writing in the National Association of Manufacturers' "Reports," he plugs optimism. Optimism permits him to reflect that "Wage increases are no longer being eaten up by sizeable price increases," unaware that a page or so before, the NAM's own economist, George Hagedorn, notes that farm products prices rose 25.1 per cent in a year.

"Workers will not have to sing that old catch-up song," says McLane, alluding to the increase in buying power during the past year, an increase which labor leaders say has ended abruptly and must be corrected by pay raises.

A deep gulch now separates the administration view that price stability is a goal obtainable in months from that of business economists who are increasingly taking a less firm position.

Under ideal circumstances, they point out, greater supplies of food could be expected to satisfy demand and bring about lower prices late this year. But weather has been far from ideal, and fall shortages could develop.

Moreover, union leaders are hardly in a mood to remain pacified. Last year they settled for average increases well below the rates of 1970 and 1971. This year they feel compelled to resume their demands.

If they succeed, the result will be higher prices for a great number of manufactured products. Gains in productivity, or output per manhour, would decline if wages rise sharply, and that means inflation.

If you are in the stock market you hardly know to whom you should listen. There is considerable wonderment among many investors as they watch profits soar and stock prices fall. Many investors clearly don't believe the economy is gaining every day.

For the first three months of the year, compared with the like period a year earlier, automobile and automotive parts companies showed an 88 per cent profit gain. Overall, 490 manufacturers averaged a gain of 31 per cent.

But — you can find many analysts, some close to the White House, who fear that the statistics provide merely an illusion of strength and that the economic giant is really suffering internally for its excesses.

Like a human being who over-extends himself, it is feared that a letdown is bound to follow. The heavy consumer buying of automobiles now, for example, could be at the expense of next year's sales.

Analyzing the results of their surveys during the past few weeks and months, consumer samplers arrive at a curious finding. Incomes are high but spirits are falling.

DR. ISIAH J. FIDLER believes that understanding the way cancer spreads within the body may be the fastest way of harnessing the disease until total prevention becomes possible.

arrested and established as a new tumor in another part of the body (frequently the lungs because of the large number of tiny blood vessels there).

Fidler, who is both veterinarian and pathologist and once wrote a "Pet Doctor" column for an Israeli newspaper, believes that the spread of cancer can be explained by differences in cell surfaces. He is not yet sure just what the difference is, but he suggests that somehow it causes the cell to lodge in the body and reproduce. Fidler hopes to alter the surfaces of cells so cancer cells which have left the primary tumor cannot arrest in other parts of the body.

Today In History

By THE ASSOCIATED PRESS
Today is Sunday, April 29, the 119th day of 1973. There are 246 days left in the year.

Today's highlight in history: On this date in 1945, American soldiers fighting in Germany liberated 32,000 Nazi victims at the concentration camp at Dachau.

On this date: In 1429, Joan of Arc entered Orleans and defeated the English.

In 1862, New Orleans fell to Union forces during the Civil War.

In 1879, electric street lights were first used in the United States in Cleveland, Ohio.

In 1894, a band of jobless men known as Jacob Coxey's Army swarmed into Washington to seek relief from Congress.

In 1913, a Hoboken, N.J., man,

Gideon Sunback, patented the zipper.

In 1965, Australia decided to send troops to South Vietnam to aid the effort to prevent a Communist takeover.

Ten years ago: The Soviet delegate to a 17-nation disarmament conference in Geneva called the meeting a waste of time, due to a deadlock over nuclear testing.

Five years ago: Former President Dwight D. Eisenhower was hospitalized at March Air Force Base in California after suffering his third heart attack since 1955.

One year ago: A North Vietnamese tank force in South Vietnam outflanked South Vietnamese defenders at Quang Tri.

Today's birthdays: Emperor Hirohito of Japan is 72. Band leader Duke Ellington is 74.

ELECTRONIC TV ANTENNA

This electronic miracle turns your ordinary house wiring system into a SUPER POWER TV ANTENNA. Brings in every channel sharp and clear without an expensive roof antenna or unsightly "rabbit ears." Attaches in seconds. Plugs into nearest wall outlet. No more ghosts, fuzzy images or jumping pictures... now you can have truly outstanding TV reception. Great for FM radios, too. Instructions included.

Reception Honors BPW Girls Of The Month

SUSAN BARRETT
September

SUSAN HIGGINBOTHAM
October

Tuesday Evening, the eight Pampa High School students pictured and five new club members were honored by the Pampa Business and Professional Women's Club at a reception in the Pioneer Natural Gas Company's Blue Flame Room.

Mrs. Judy Dennis and Miss Anna Pierce were guests. The honorees and their talents were the focus of the evening's program. In a skit, they illustrated some do's and don'ts in applying for a job and concluded with a dialogue on "Being a Professional."

Each month, September through April, one outstanding senior student in Vocational Office Education served as BPW "Girl of the Month." They were Susan Barrett, Susan Elaine Higginbotham, Ruby Moultrie, Becky Cockrell, Melody Kilcrease, Sherry Lynn Bridwell, Echo Ennis and Judy Lankford.

Miss Barrett is the daughter of Mr. and Mrs. Raymond Barrett, who live southwest of Pampa. She is employed part-time at the United Methodist Church superintendent's office through the VOE program. Her grade point average is 91.80. She plans to attend Frank Phillips College and major in Business Administration.

Miss Higginbotham, daughter of Mrs. Edna Day, 1208 Bond Street, has a grade point average of 91.64. She is employed at Merchants Fast Motor Lines as part of the VOE program. Her activities include VOE club and Truteen Service League. She plans to enter West Texas State University this fall.

Miss Moultrie also plans to continue her education at West Texas State University. She is a member of PHS concert choir and pep squad. Her grade point average is 91.86. She is the daughter of Mrs. Artie Moultrie, 906 S. Wilcox.

Miss Cockrell works at Zales Jewelry Store as part of the VOE program. Her grade point average is 88.67. She enjoys water sports and is VOE club secretary and senior director of Truteens. Her parents are Mr. and Mrs. Floyd Cockrell, 630 N. Sumner.

Miss Kilcrease is president of Truteen Service League and a VOE club member. Her grade point average is 86.79. She is employed part-time by Cabot Corporation, Carbon Black Division. Her parents are Mr. and Mrs. George Kilcrease, Jr., of 2125 N. Dwight Street. She plans to do office work after graduation from high school.

Miss Bridwell is the daughter of Mr. and Mrs. Ross Bridwell, who reside at 906 Twiford. She is

employed part-time at Gattis Shoe Store. Her grade point average is 87.95. Miss Bridwell plans to become a secretary following graduation from Pampa High School.

Miss Ennis plans to attend a data processing school after completing her work at PHS. She will go to the Electronic Computer Programming Institute in Dallas where she will learn to be a programmer. Her grade point average is 86.20. She is the daughter of Mr. and Mrs. C.L. Ennis, Jr. of 429 Pitts Street.

Miss Lankford is the daughter of Mr. and Mrs. Jack Lankford, 2626 Navajo Road. Her hobbies range from piano playing to motorcycle riding. She has a grade point average of 88.16. She plans to sharpen her skills by taking additional business courses after graduation from high school.

Sharing the spotlight on the evening's program were new club members including Mmes. Lillie Mae Fowler, Tommy M. Stall, M.F. Ludemon, Wilfred L. Stubblefield, and J.D. Brown. Mrs. Earl Eaton, vice president, conducted the induction ritual and presented each with membership guides.

The program was concluded with an award ceremony when Miss Elsie Cunningham, Scholarship and Awards

chairman, presented the annual BPW achievement award in Business to Miss Susan Barrett. Mrs. J.D. Brown was recipient of the BPW membership pin presented by Miss Anna Pierce.

Hostesses for the reception which followed were Mrs. Rufe Thompson and Mrs. R.A. Cunningham. Mrs. H.E. Crocker and Mrs. Jaunita Suttle served at the refreshment table.

Mrs. Thompson has served as the "Girl of the Month" chairman for two terms. She came to Pampa in 1920 to teach in the Pampa Schools. In 1947, she joined the Pampa BPW club and has chaired most of its committees and served as secretary and treasurer at two different times.

Mrs. Cunningham is currently serving as BPW "Woman of the Year" and as membership chairman. A member since 1938, she has been actively involved in various club projects, served as vice president and chairman of several federation committees.

President, Mrs. D.C. Ash announced that Mrs. L.B. Cornelius won first place in the District Nine Speak-off contest and reminded members of several upcoming events.

The annual BPW Mother's Day Breakfast is scheduled at Pampa Country Club, Sunday, May 6 at 7:45 a.m.

Pampa Author Is Director

MRS. NACE
Director

To foster and further the writing efforts of the members, all of whom are selling writers, is the purpose of the Panhandle Pen Women, organized in 1920. Each meeting covers a full day and includes a writing workshop, a round-table report session, a writing contest, and a speaker, usually from outside the organization.

The writing and submission of the work of members, with sales as the purpose of submissions.

Sales of outstanding books by members, a banquet by Amarillo Friends of the

Library, which honored the year's writing and selling, and the speakers for the meetings, were a few of this year's highlights.

Officers are Mrs. Pauline Robertson, Amarillo, president, Mrs. Ann Brown, Canyon, vice president, Mrs. Mary Caballero, Canyon, secretary, Mrs.

Glenna Wilson, Canyon, Treasurer, Mrs. Nova Bair, Amarillo, publicity chairman, and Mmes. Anita Lowe, Canyon, Evelyn Nace, Pampa, Mildred Spear, Amarillo, and Julia Van Bebbler, Pampa, directors. President elect of the 55-member organization is Pauline Robertson.

Cowbells Is Newly Organized Club

Consisting of 46 members, the Top O' Texas Cowbells was organized on September 14, 1972 and will be chartered December 1973.

The club meets the first Monday of each month at different locations. The purpose of the club is to promote the welfare of the beef industry in this area and to assist the Texas Cowbells in their activities.

The club provides each Home Economics Department of schools with educational material concerning cuts, cookery and facts about beef and to promote beef in any way that they can through distribution of beef promotional material. The Cowbells had a TV program on KGNC April 14.

On November 30, the group had a night meeting to which

husbands were invited, a cake auction was held to raise money, and sponsoring a dinner are among the year's activities.

Serving as president is Mrs. F. Jake Hess of McLean, vice president, Mrs. Garner Schoenhals, Canadian, secretary, Mrs. Leslie Darsey, McLean, treasurer, Mrs. Paul Darsey, McLean, publicity chairman, Mrs. Harold O'Neal and Mrs. Paul Dauer, Panhandle, and beef promotion, Mrs. A.W. Thorne, Canadian.

"Unity In Diversity" Is Century Club Topics

The Twentieth Century Club works for the mutual improvement of its members in literature, art, science and the vital interests of the day. In supporting the General Federation theme this year, "Respect, Reverence, Responsibility," and Top of Texas theme, "America Rediscovered," the Twentieth Century chose the theme "Unity in Diversity."

Their course of study features the departments of International affairs and clubs, Texas Heritage, public affairs, education, home life, conservation, and the arts.

The club supports Texas Headquarters Maintenance Fund, Endowment Fund, Penny Music, Penny Art, Latin American Scholarship, Big Thicket, and Wichita Falls State Hospital.

Other projects include the Lolo B. Mundy Scholarship

MRS. ROSE
20th Century President

Loan Fund, a scholarship for a Pampa senior, United Fund, American Cancer Society, National

Foundation, and the American Heart Association.

They provide a Christmas basket for a Pampa family, promote the White Deer Land Museum, Lovett Memorial Library, Genesis House, Senior Citizens, Quivira Girl Scouts, and Community Concerts.

Activities include a rummage sale, fashion show, brunch for presidents of Twentieth Century Clubs, tour of Amarillo Art Museum, spring luncheon, and the programs, "Living Americanism," "The Returnee," "Winds of War," "The Ancient Vanished Ones," "Trends in Education," "International Women," "Do Your Own Thing," and "Reflections on Unity."

President is Mrs. Rex Rose, vice president, Miss Elsie Cunningham, secretary, Mrs. Lloyd Hamilton, treasurer, Mrs. Richard Stowers, publicity chairman, Mrs. Fred Neslage, parliamentarian, Mrs. David McGahey, Federation Counselor, Mrs. W.R. Campbell, and president elect, Mrs. C.E. Steele.

Works Of Art Exhibited

The public is invited to attend an art exhibit by students of Mrs. Alva G. Satterwhite on April 28-May 4, at Lovett Memorial Library. The exhibit will be open any time during regular library hours.

There will be an open house on Sunday, April 29, from 2 to 5 p.m., when the public will have an opportunity to meet the teacher and her students.

Various media have been employed by the students, including oil paints, acrylics, pastels, water colors and pencil drawings.

Participating teachers include Grade School: Jon Beanland, Still life of fruit; Jill Lewis, A clown; Terry Riggs, Sailboat by the sea, and Mickey Barbaree, Still life of marigolds.

Junior High: Steve Nichols, Sunrise landscape; High School: Kim Hoover, Blue landscape; Jerry Bohlander, Abstract landscape; and Lonnie Starbuck, Spanish guitar.

Adults: Mrs. Richard (Alvadee) Fleming, Family portraits; Mrs. William (Nellie) Clark, Western landscapes; Mrs. Robert (Lenora) Preston, Football players in action; Mrs. Kathryn Ward, Landscape of an old house; and Miss Marguerita Hernandez, Spanish still life and self-portrait.

DRINKERY BECAME

EATERY
FRANKFORT, Ky. (AP) — A brewery built in a cave 167 years ago has been converted into a Frankfort restaurant. It is called "The Cave."

Listed on this page are additional pictures and stories from the special edition, "It's A Woman's World."

ATTENTION!

If your club or organization is not represented in this issue of "It's A Woman's World," we are sorry. Letters went out to all known 1972-73 presidents. Only those who responded are included in the 1973 "It's A Woman's World." Next year please let us hear from others.

Cotillion Sponsors Annual Antique Show

Heading the Twentieth Century Cotillion as president is Mrs. S. Gene Hall. The club meets the first and third Tuesdays at 1 p.m. in homes.

The mutual improvement of members in literature, art, science and the vital interests of the day, is the main purpose of Cotillion. Also to provide a time for fellowship with others in the community is another

Each year the club carries out the Opportunity Plan, Inc., Senior Citizens Program, American Field Service, and the Fine Arts Association.

The Antique Show held each spring is a means of raising money for the Opportunity Plan. This is not only a good money making project but it brings people to Pampa, gives the members an opportunity to work together, and at the same time it serves to help others.

Other highlights are the presidents coffee and the spring luncheon.

Serving as vice-president and president elect is Mrs. Jim Hughes, secretary, Mrs. Gene Hanks, treasurer, Mrs. Don Morrison, parliamentarian, Mrs. Ben Sturgeon, publicity chairman, Mrs. Jerry Kotara, chairman antique show, Mrs. Dean Copeland, and co-chairman, Mrs. E.P. Maglaughlin.

FINDS BUS WITH PLANE

LA PLATA, Argentina (AP) — Jose Perez's microbus was stolen. When police couldn't find it he rented a small airplane to press the search. Spotting the brightly colored vehicle, he landed the plane at a nearby airport and arrived at the scene in a taxi with pistol drawn. Two youths, about to drive away, were arrested and a gang of car thieves uncovered.

Culture Club Supports Indians

The Twentieth Century Forum was organized in 1929 and chartered in 1931 with the purpose of the mutual improvement of its members through the study of literature, art, science and the vital interests of the day. The Club meets the second and fourth Tuesdays, October through May in the homes of its members and carries on such projects as the \$300 scholarship to graduating senior, the money is raised by a rummage sale.

The members give assistance to local students, give entertainment for Senior Citizens, and are in cooperation with other federated clubs in civic improvement projects.

Highlights of the year's activities include a brunch honoring presidents of 20th century clubs, guest day, Christmas program, spring luncheon, installation of officers, and a party for scholarship recipient.

Heading the club as president is Mrs. David E. Holt, vice president, Mrs. McHenry Lane, secretary, Mrs. John L. Young, treasurer, Mrs. Larry Cross,

reporter, Mrs. Jack Ward, parliamentarian, Mrs. John Warner, program chairman, Mrs. Aubrey Steele. The club consists of 14 members.

MRS. GRIFFITH

Forum Members Study The Arts

The Twentieth Century Culture Club was organized in 1931 and meets the second and fourth Tuesdays in members homes.

It's object shall be the development of the members individually and as a club group in the appreciation and enjoyment of any subject of interest and importance in past and present.

The projects are to cooperate with community projects, to aid the Papago Indians, to help Lovett Library, and to give a scholarship to deserving students.

Highlights of the years activities include a Christmas gift of money to the Papago Indians, a guest day tea in November when Mrs. Ivan Hull presented "Highlights of Williamsburg," a Christmas party in the Johnny Donaldson home, and a luncheon in May in the E.E. Shelhamer home when new officers are installed.

Mrs. M.K. Griffith serves as president, Mrs. Ross Buzzard, vice president, Mrs. J.M. Stallings, secretary, Mrs. Myron Marx Jr., treasurer, Mrs. N.D. Steele, publicity chairman, Mrs. L.J. Zachry, parliamentarian.

Scouting Scoops

MRS. G.J. BOYD

Another view of a busy, busy Girl Scout troop... the following report was made by troop 83 leader, Mrs. Walter Hill.

Troop 83 has had a big year this year. Our big project was to finish the decorating of the Scout House on Scott and Finley Streets. Last year we sold candy and this year candies (for proceeds for the project). We painted, made new curtains, laid new linoleum, put lamp shades on the lights. And with the money left over, with the help of a cupcake sale, we decided to go to Amarillo.

And so we did just that! Friday, April 20, we visited KVII-TV and talked to most of the newsmen. We also got autographs. From there we went to Thompson Park for a picnic lunch and to feed the ducks. We took in the zoo and the crazy swinging bridges. We went to Western Plaza to take in the Easter festivities and visit the pet shop.

Everyone was hungry so we went to Shakey's for Pizza. Wouldn't you know we were invited to sing and we sang "Join the Girls Scouts, wear your greenies. All you have to do is clean latrines." A mealtime song, you'll agree.

On to the Ice Capades. And what a time we had. Back home to Pampa and an overnight at the Optimist Clubhouse. At midnight we had a Court of Awards in our pajamas. Mothers picked up the girls at 9 o'clock Saturday morning.

We plan to have a Spring Court of Honor and a salad supper.

Things we have done this year include: a Christmas party, a Halloween party, Easter baskets for East Ridge Rest Home, a bicycle trip to Hoover.

The troop has earned Active Citizen, Cyclists, Health Aid, Skating and Cooking badges. We will finish Troop Camper at the Junior Camporee.

A weiner roast is planned for our Keep America Beautiful Day. Everyone is excited.

Maybe we will be 100 per cent at Day Camp.

Members of Troop 83 are: Jolene Hill, Linda Atwood, Katrina Whitmarsh, Veronica Rameriz, Rhonda Futch, Teresa Kirk, Pam Spangler, Karen Motley, Lisa Collins and Margie Ray.

As you can tell, this leader enjoys her troop. They learn as they earn their badges and also have fun which, incidentally, doesn't hurt. By keeping the troop interested with service projects, everyone wants to do worthwhile things with parties, the social part is important in Scouting also, their leader has kept this troop on their toes. This is a perfect example of Scouting where troop and leader share and both benefit as a result.

Blushing Accents

Get rid of the winter pales by experimenting with color highlights. Never just apply two dabs of color to the cheeks. The look is artificial. Instead apply color to the forehead, nose, cheekbones and chin and blend carefully for a natural look.

MR. AND MRS. SCOTT EPPERSON
...nee Donna Christine Best

Best-Epperson Vows Said In New Mexico

Miss Donna Christine Best became the bride of Scott Epperson, both of Houston, at 3 p.m. Saturday, April 21, in the Taylor Street Church of Christ in Hobbs, N.M.

Parents of the bride are Mr. and Mrs. James A. Klein of San Angelo and Mr. and Mrs. W.C. Epperson of Pampa are parents of the bridegroom.

Lynn Money officiated for the double-ring ceremony.

THE BRIDE
The bride was given in marriage by her father. She was attired in a floor-length pink and white eyelet embroidered gown, which she designed and created. Her mantilla of imported illusion, fell from a white bow headpiece and she carried a cascade of daisies and white and pink sweetheart roses.

The bride wore a string of pearls belonging to the bridegroom's mother, and carried a handkerchief belonging to Mrs. Hattie Klein, her grandmother. She wore a blue garter and a lucky birthdate penny in her shoe.

Mrs. John Epperson of Houston, was matron of honor wearing a blue floor-length gown and carrying a nosegay of pink carnations and sweetheart roses.

Serving as his brother's best man, was John Epperson of Houston.

RECEPTION
Immediately following the ceremony, a reception was held in Fellowship Hall of the church. The table was covered with a pink cloth overlaid with white and centered with an arrangement of white and pink carnations. The two-tiered wedding cake was decorated with white and pink roses.

Miss Betty Ann Epperson, sister of the bridegroom, assisted at the punch service and Mrs. Faye Branham, sister of the bride, served cake.

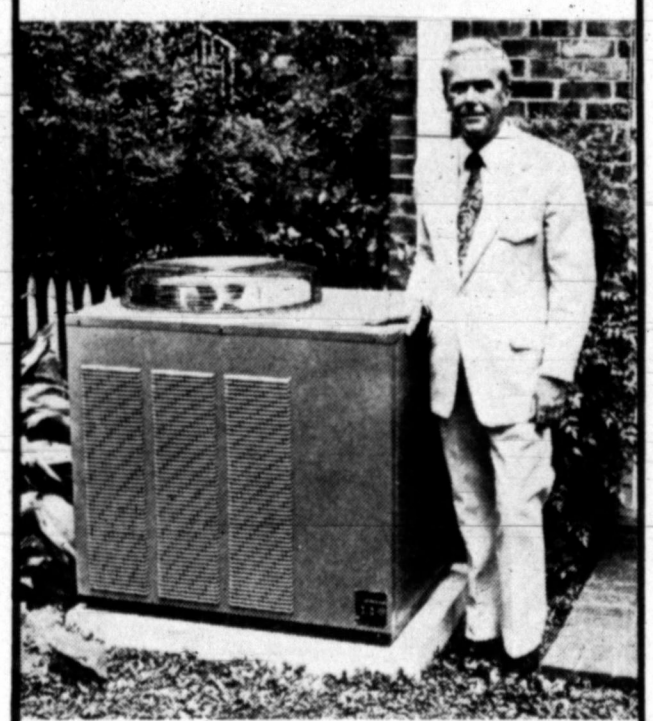

Following a trip to Colorado, the couple will reside in Pampa.

AFFILIATIONS
The bride is a graduate of San Angelo Lake View High in Houston and previously worked for the Houston Post Employees Credit Union.

The bridegroom is a graduate of Pampa High School, attended West Texas State University, and served overseas with the US Army. He is presently employed in Pampa.

OUT-OF-TOWN GUESTS
Out-of-town guests included Mr. and Mrs. W.C. Epperson, Miss Betty Ann Epperson, and Mr. and Mrs. Elmer Balch, all of Pampa, Mr. and Mrs. John Epperson, Houston; Mr. and Mrs. James A. Klein, Mr. and Mrs. Van Branham, and Mrs. Hattie Klein, all of San Angelo.

Cheap air conditioning is no bargain.

Servel Gas Air Conditioning is a Bargain.

The bargain comes in smaller utility bills, fewer maintenance calls and the longer life of a Servel system.

But you'll never buy one cheap.

The Servel goal has always been: "Build it like the Swiss. That's why the units are precision-made. And that's why they contain more stainless steel than any other air conditioner on the market. They're built to last and to perform dependably. This and the economy of natural-gas energy saves you every month.

Quality construction is the reason you pay more for Servel initially. Because quality doesn't come cheap. Long, economical operation is the reason you'll save in the long run. Because quality pays off.

Most people can afford quality when they know all the facts. Especially when they're concerned with a cool, restful, healthy home environment - when home has a permanent meaning.

Think long and hard before you invest in central air conditioning.

Then install Servel.

SERVEL "The World's Most Respected Name in Air Conditioning."

Our Capsule Policy

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces can he develop to his utmost capability.

The News believes each and every person would get more satisfaction in the long run if he were permitted to spend what he earns on a volunteer basis rather than having part of it distributed involuntarily.

Alaska Oil Questions

Alaska's oil-rich North Slope is going to be tapped. The question is not so much when but how. That is, should the oil be piped across Alaska to the southern port of Valdez, and thence by tanker to the West Coast, as the oil companies want, or should it be transported wholly through pipelines across Alaska and Canada to the Midwest? The answer will be up to Congress, and the forces on both sides are gearing up their arguments. Not surprisingly, a number of midwestern senators and representatives favor the Canada route. What is surprising is that numerous environmentalists do, too. It is almost as if Canada did not have an environment to be concerned about, or a sovereign government that might have a say in the matter. Points in favor of the Canada line include the facts that (1) it would avoid areas of high earthquake hazard, (2) would avoid a marine leg, (3) would interfere less with caribou migrations and (4) might be combined with a gas line in a single corridor. Also, it's argued that the Midwest needs oil more than the West Coast and that much of the oil delivered to the West Coast would only end up being shipped overseas, probably to Japan. The administration, however, through Secretary of the Interior Rogers C.B. Morton, has advised Congress that a trans-Alaska pipeline would best serve U.S. interests and that a Canadian route is "not desirable."

These are: (1) a majority of the equity interest in the line would have to be Canadian, (2) the management would have to be Canadian, (3) a major portion (at least 50 per cent) of the capacity of the line would have to be reserved for the transportation of the Canadian-owned oil to Canadian markets and (4) at all times preference would be given to Canadian-owned and controlled groups during the construction of the project and in supplying materials. These are the major arguments pro and con that will have to be considered by Congress. Whatever the decision may be, it can be said now with certainty that it is not going to satisfy everyone.

Watch Your Language

It's interesting how language changes almost it seems from day to day, or at least between one edition of a dictionary and the next. Take the word "decimate." Strictly speaking, if any army is decimated in battle it has lost one-tenth of its men. In common usage, however, the word has long meant almost total obliteration, whether of troops or of some other aggregation of living things, and that is one definition given in the Second Edition of Webster's International, published in 1934. But even recognizing that no living language can remain static, it still comes as a bit of a jolt to see the word now being used to describe destruction in general. For example, a recent article about the virtues of large cars versus small cars stated that the latter "would be decimated" in a crash. Surprisingly, Webster's Third, published in 1966, has already given its blessing to this usage, citing as a sample sentence the act that inflation has "decimated" buying power. To language purists, the whole thing is well, decimating.

WORLD ALMANAC FACTS

In the northern and western United States poverty tends to be concentrated in the cities, while in the South most poverty is rural. The World Almanac notes among whites less than half the poor are children, while among blacks well over half are children. Women are less likely than men to begin their lives in poverty, but in old age, they are far more likely to be poor.

Nixon Staff Not At All In Harmony

By BRUCE BLOSSAT WASHINGTON (NEA) — The impression now being given the country is that the Watergate affair is "breaking wide open" and "we are steadily getting closer to the truth. Actually, the situation is mixed. In some ways, the reality of what happened seems more clouded than ever.

The reason is simple. It is incontestable that a great many people involved in the whole espionage-sabotage pattern have lied (some under oath). Without being irresponsible, the observer can suggest that some may still be lying.

The visible evidence of falsehood is the rash of changed stories issuing from several individuals. First on this list, of course, was James McCord, convicted participant in the 1972 bugging of the Democrats' Watergate headquarters.

Reliable sources say Jeb Stuart Magruder, top aide to the President's re-election committee, has recently told a grand jury a version of events differing from his original.

Even former Attorney General John Mitchell, who has filled the air with scoffing denials regarding Watergate, now is reported by the New York Times to have altered his story privately — to the point of saying he did take part in meetings where bugging was discussed, but rejected the idea.

Drawn into the matter in a new way by the apparently altered testimony of Magruder, the President's legal counsel, John Dean, seems ready — according to his friends speaking anonymously — to tell a new story.

Yet, while all this widens the roster of openly named individuals, it obscures even as it reveals. Dean, for instance, issued a statement — unauthorized by the White House and unknown to it at the time — saying he would not be a "scapegoat" in the affair, and a friend says he will implicate people "above and below" himself when he talks.

Mitchell's unpredictable wife, Martha, has repeatedly said she would not let her husband be made a scapegoat and would blow the cover off others involved if anyone tries to cast him in that role.

Consequently, the new developments, though indeed "major," as the President labeled them, do not really have about them the clean aura of "here is the truth at last." Many "revelations" have instead the sound of self-service in an atmosphere reeking of "every man for himself."

To the extent this is so, and the signs are plausible ones, the fast-breaking changes appear to support earlier judgments given to me (and reported here) that Mr. Nixon's key echelons are an unharmonious lot, riddled with mutual animosities, competing against each other fiercely in their jockeying for favorable positions.

One further factor supportive of this judgment, a thing which shines like a beacon and yet curiously has not been given notice, is the huge volume of information (much of it evidently accurate) given to investigative reporters by unnamed sources in or close to the White House, the re-election committee, and other administration places.

We do not know what motives guide these sources. But the fact that they talk to key newsmen in prima facie evidence that the President's house is an arena of bitter internal warfare.

Irrefutable evidence that this agitation is wholly partisan clutter and the Democrats really don't mean it is the following: —The Democrats have decisive majorities in the Senate and House and firmly control the committees that write tax legislation. That is particularly true of the Ways and Means Committee where the party lineup is 15 Democrats, 10 Republicans. All the Democrats have to do to make good their vociferous rhetoric is to write a tax bill and report it out.

They haven't made a move to do that — and there is virtually no likelihood they will, at least not this year. They may mildly do something next year, but don't hold your breath. And you can put it down as a virtual certainty that, if anything is done, it will be neither drastic nor sweeping.

Neither Ways and Means chairman Wilbur Mills, D-Ark., nor Senate Finance Committee chairman Russell Long, D-La., is thinking in those terms. Mills is chiefly interested in simplifying tax forms. The Democrats' chicanery on the tax issue was glaringly demonstrated during the Kennedy-Muskie talkathon in the Senate.

They and the ten other tub-thumpers inveighed

Inside Washington

Tax Clamor Bared As Phantom Issue

By ROBERT S. ALLEN

WASHINGTON — Amid all the furious furor and uproar over Watergate, one intriguing fact stands out — unnoticed but strikingly significant. This is the complete silence that now envelops the once equally torrid Democratic issue of tax reform.

Not long ago as shrilly in the limelight as Watergate, there hasn't been a peep about it for weeks. And there probably won't be until 1974 — and another election year.

Yet throughout the hour-and-a-half of supercharged partisan vituperating, not one word was said about the indisputable and ruling facts. That the Democrats are securely in control of Congress, that the Ways and Means Committee and the Senate Finance Committee, with jurisdiction over tax legislation, are securely in Democratic hands, and that neither these key panels nor any Democratic leader has done anything of any consequence to bring about tax reform — except to berate the Republican administration.

Chairman Mills did hold several months of desultory hearings, at many of which he was not even present. The Senate Finance Committee has done nothing at all — and chairman Long has no intention of doing anything until, and if, the House acts.

Which definitely won't be this year. But you would never know that from the carping and yowling of the Kennedy-Muskie avil chorus.

To hear them, all the virtue and do-gooding is on the Democratic side, and all the sinning and transgressing on the Republican side. With unabashed "objective" prejudice, they have it all figured out — to their advantage.

More Double Talk — It always pays to closely scrutinize the record of politicians. Graphically illustrative is the two-timing now going on on the dynamite-loaded question of aid to Hanoi. Careful examination of the record shows prominent politicians on both sides of that thorny fence. Examples: — Sen. George McGovern, Congressional Record, May 14, 1965. "I applaud the effort outlined in that (President Johnson's) speech for regional economic development of Southeast Asia. ... Asked if he approved President Johnson's 1968 offer of \$1 billion aid for North Vietnam, McGovern replied, 'Absolutely, absolutely.'"

But in Dallas, Tex., on Feb. 22, 1973, the South Dakota radical was tooling a different tune. "Where is the logic in leaving young men who would not fight in jail or exile, while sending billions of dollars in aid to a country what was our enemy until a few days ago. The President seems to be saying that we must reward our enemies but we cannot forgive our own sons who thought the war was a mistake."

Not what we have, but what we use, not what we see, but what we choose, these are the things that mar or bless the sum of human happiness. — Joseph Fort Newton, American clergyman.

Your Health

Heart Attacks Kill One in Four

By Lawrence Lamb, M.D.

Dear Dr. Lamb—It was with a great deal of interest and appreciation that I and my deceased husband read your columns concerning fatty deposits in the arteries and low fat diets. He had hardening of the arteries and his legs had to be operated on. The results were wonderful and the specialist told my husband his health was very good. Five months later, he had a massive heart attack. Several days later he died. To me, he was still young, only in his early 50s, and had never had any chest pains. He had had several electrocardiograms while in the hospital for the leg operations, and nothing ever showed up.

His death certificate had cardiac arrest and myocardial infarction as the cause of his passing away. After suffering the attack, and during the few days he was in the hospital, he was so alert and normal except for being weak. I was with him a few minutes before he died. At that time he was so restless, he could not lie still. He twisted and turned constantly, all the while talking to me, then he complained of a huge knot in his chest and felt backwards and his lips turned into his mouth as though something was pulling on them. I had to leave the room then and later was told he had died.

For me and my children, could you explain what all of these medical terms and the restlessness means. We will be so thankful if you will.

Dear Reader—It is always a sorrowing to lose someone close to you. Although your story is a personal one, one out of four of all the deaths in the United States are caused by heart attacks. Atherosclerosis often affects many arteries in the body. This is why even successful heart transplants and artificial hearts would often be of limited value.

The atherosclerotic process in the legs is the same process which caused the heart attack and can also cause strokes. Without proper circulation he had difficulties with the muscles in his leg. The atherosclerotic blockage of the coronary arteries interferes with the circulation to the heart muscle in the same manner. Often the first symptom or sign is sudden death.

The electrocardiogram (ECG) is frequently normal before the heart attack occurs. Atherosclerosis is in the arteries to the heart. It won't affect the heart muscle or its electrical activity (ECG) until it becomes sufficiently advanced to block the circulation to part of the heart muscle. Then there will usually be changes in the ECG.

The fatty deposits in the arteries to the heart muscle build up or a clot forms and blocks the opening. Cardiac arrest is a general term used when the heart stops beating entirely, or when it fibrillates or twitches (ventricular fibrillation) at a rapid rate with no normal rhythmic pumping action. In either case effective circulation stops immediately.

Rearview Mirror

By TEX DEWEESE Editor Of The News

WE PRINTED here last Sunday a letter from Donald W. Whisenhut, of the History Department at Thiel College, Greenville, Pa., seeking information about a Mr. Art Names who operated a traveling tent show in the Texas Panhandle back in the 1930s. Mr. Whisenhut, it seems, is writing a biography of Mr. Names.

Well, as they say over in the classified advertising department, this column brings results. There happened to be someone right here in Pampa who was a member of the Art Names stock company.

She is Mrs. Geraldine Shultz, 632 N. Wells, widow of the late B.R. (Bunny) Shultz who died in 1962.

Mrs. Shultz called to say she read about Mr. Whisenhut's request for word about Mr. Names and his tent show and that she had written to him.

Mr. and Mrs. Shultz both were members of the stock company and were married on the show at Seiling, Okla., in 1933.

Mr. Shultz was the company's leading man in the stage plays and Mrs. Shultz played supporting roles, she explained. They remained with the show four years until 1937.

"Mr. Names was like a father to Bunny," Mrs. Shultz told us. The Shultz family came to Pampa in 1945 and Bunny Shultz was a director and performer in Lions Club annual stage shows every year up until the time of his death.

Mrs. Shultz says she has forwarded to Mr. Whisenhut the names of other members of the stock company now residing in Oklahoma. She said they would be able to add information for the Art Names biography.

APPARENTLY, Oklahomans are not too familiar with history of the Texas Panhandle. — Miss Vanessa Arthur, daughter of Mr. and Mrs. Bill Arthur, 604 E. 17th St., is a student at the University of Tulsa, Okla.

She writes as follows: "I am working on a paper concerning the history of the Texas Panhandle in one of my history classes at the University of Tulsa.

"Needless to say, information in that area is hard to come by here in Oklahoma. Miss Arthur asked if we could supply some history facts she needed. We could and did.

But this gives rise to the thought those Oklahoma history professors ought to jazz up their university libraries with some history about Texas.

Do you suppose that annual Texas-Oklahoma football rivalry in the Cotton Bowl has reached the point where Texas history has been wiped out as far as Oklahoma is concerned?"

NOTE TO Ed Schneider who has been inquiring about the City Hall Cat's recent absence: The City Hall Cat is a "scary" cat" right now and has been for the past couple of weeks.

The Cat tells us the windstorms, hail storms and tornado alerts of the past few weeks, have caused him to hole up with a plentiful supply of catnip and he plans to stay holed up until things quiet down.

The letter is signed: Yores for the Economy with Zipp, Harry A. Nelson, Poor Farmer. Then Mr. Nelson adds this: "P.S. — I received only \$521.21 for my Bull at Amarillo. Need a Billion. No Bull Had to give him away. Too old. No Zipp. No Sex Education."

You might want to run through his letter again. It seems something new comes out from between the lines each time you read it. And, most certainly you have noticed Mr. Nelson has some kind of hang-up on the letter "k."

Your Horoscope

By Jeane Dixon

SUNDAY, APRIL 20

Your birthday today: With your spirit strong, material prosperity becomes more available in this exciting, busy year. Today's natives are able to carry great personal responsibility, have talent for speaking or singing.

ARIES [March 21-April 19]: Do the minimum your community expects of you for weekend customs. Distant contacts await your opinion and news.

TAURUS [April 20-May 20]: Seek a rest, or at least a slower pace. Later hours may turn into a battle of willpower if you are to succeed in your projects.

GEMINI [May 21-June 20]: Deal first with the nearest, most accessible problems, one at a time, with as little appearance of haste as possible.

CANCER [June 21-July 22]: Coming to terms with your equals is challenging enough. Older people have special needs for which you may have some answers.

LEO [July 23-Aug. 22]: Family and community ventures thrive—your contributions count and encourage others to participate.

VIRGO [Aug. 23-Sept. 22]: Stand aside the mainstream of events, rest with your familiar people as you watch the passing scene.

LIBRA [Sept. 23-Oct. 22]: Great history is not expected to be made this Sunday. Relax, let everybody be himself in peace, pursue quiet pastimes.

SCORPIO [Oct. 23-Nov. 21]: Intuition leads to serious planning, a possible abrupt step upward. Think while you drift thru social amenities.

SAGITTARIUS [Nov. 22-Dec. 21]: Make this a quiet Sunday, a rest in all aspects. There's a change of pace and conditions coming.

CAPRICORN [Dec. 22-Jan. 19]: Lighter forms of recreation, hobbies, games are the most you should attempt. Later hours offer a tender moment in your most intense relationship.

AQUARIUS [Jan. 20-Feb. 18]: This is a good time to give up illusions and realize some matters are beyond personal control.

PISCES [Feb. 19-March 20]: Simple affirmative action works best. There's little room for compromise and no gain in making extra demands.

MONDAY, APRIL 30

Your birthday today: Brings a scramble to get free of limitations and into shape to change next year's life style. Your evaluation of most people changes this year, so relationships move at a steep pace or dwindle as you grow apart. Today's natives are imaginative, passionate, generous—if given half a chance.

Aries [March 21-April 19]: New ideas are readily applied, with associates trying to be helpful even when the ideas are a bit too new for their comfort.

Taurus [April 20-May 20]: Community service, charity, the day's issues stir you to action. Your personal charm is on the rise; use it to coax reluctant people into cooperation.

Gemini [May 21-June 20]: The favor of influential people is more accessible. It's a great day for social expression, parties, and wild stories.

Cancer [June 21-July 22]: You find out now that something is already set although others have gotten used to the idea already.

Leo [July 23-Aug. 22]: In the midst of well-scheduled routines a stray thought casts new light on all ar-

Panhellenic Plans Party For College-Bound Girls

"Keys to College" is the theme of the Panhellenic Coke Party scheduled at 3 p.m. today at the home of Panhellenic president, Mrs. Richard Stowers, 2015 Charles.

All graduating senior girls planning to attend college are cordially invited to the coke party. Dress for the very casual get together is jeans or pants.

Active and alumnae members of national sororities will informally talk about four specific areas of sorority life. These areas include scholarship, student activities—campus life, service—philanthropies, and social life—rush.

To make sure information about each girl is available to the sororities, Panhellenic requests a card be filled out for the master file. Such a card is necessary before a girl can be recommended from Pampa. Each girl will need her SAT and ACT scores, her grade point average for the four years of high school, her rank in class, and her honors and activities.

Every active sorority chapter requests that a picture accompany a recommendation and each girl should bring at least eight wallet size pictures with her to be placed in the master file.

Mrs. Don Case, Panhellenic vice-president, is in charge of this master file. Girls unable to bring these pictures to the coke party may contact Mrs. Case later. Girls unable to attend the coke party may also obtain a card for the master file from Mrs. Case.

Area senior girls are also invited to attend, particularly those residing in the eastern portion of the panhandle.

"We in Panhellenic certainly hope that senior girls going to college will visit with us at the coke party and find out what sororities are and the advantages of sorority life on campus," said Mrs. Stowers.

Mrs. E. L. Henderson, Delta Delta Delta, is in charge of refreshments. Mr. James Raley, Alpha Chi Omega, is in charge of invitations, and Mrs. David Tucker, Kappa Alpha Theta, assisted with invitations.

SEGOVIA IS 80

NEW YORK (AP)—Guitarist Andres Segovia marked his 80th birthday on Feb. 21 with the first of two New York concerts this season.

Segovia also this season celebrated the 45th anniversary of his first New York recital, at Town Hall, Jan. 8, 1928.

MAKING PLANS TO ATTEND the Panhellenic Coke Party scheduled for 3 p.m. today are from left, Meredith Dingman and Lea Lunsford. Pointing out that dress is very casual is Mrs. James Raley, invitations chairman. The party will be held at the home of Panhellenic president, Mrs. Richard Stowers, at 2015 Charles.

50 WINNER — Greg Sargent of Borger, breaking the tape at right in the picture, won the seventh grade division in the 50-yard dash at yesterday's Junior High District Track Meet at Randy Matson Track in Pampa. Neither of Pampa's junior high's enter teams in the seventh grade division.

(Photo by Terry Hanna)

Borger Takes First Place In Jr. High Meet

Borger took first place in the ninth grade division of the District track meet conducted in Pampa yesterday at Randy Matson Track. Lee Jr High of Pampa came in fourth and Pampa Junior High finished sixth.

In the eighth grade competition, La Plata of Hereford placed first and PJH eighth came in second. Lee finished in third place in the eighth grade competition.

In the seventh grade Perryton took first. Neither Pampa junior high school competes in organized competition in the seventh grade.

David Caldwell of PJH was the big star for Pampa in the

eighth-grade division. He set a record in the shot, the 100-yard dash and was on the record-setting 550-yard relay team. He also ran on the winning 880 relay team which finished one tenth of the record mark.

Caldwell's toss of 54' 11" in the shot beat the old mark of 51' 5". His 10.4 in the preliminaries of the 100 broke the existing mark of 10.5.

The 440 relay team of Barton, Brown, Moore and Caldwell won with a time of 47.2—9 seconds better than the old time of 47.9. The team ran the same time in the preliminaries and the finals.

MEET RESULTS

NINTH GRADE

Lewis' Last Second Shot Gives Pacers Disputed Win

LOUISVILLE, Ky. (AP) — Freddie Lewis scored on a driving jump shot with 17 seconds left in overtime to give the Indiana Pacers a disputed 111-107 victory over the Kentucky Colonels and a 1-0 lead in their best-of-seven series for the American Basketball Association championship.

Kentucky had contended it won the game in regulation time on a shot by guard Jimmy O'Brien, making the score 102-100, but the referees ruled the shot came after the 30-second clock had expired.

Lewis, who finished with 29 points, added two free throws, with one second left to cap the scoring.

Dan Issel of Kentucky led all scorers with 33 points.

Kentucky had rallied from a 19-point first-quarter deficit to go ahead midway in the third period and the Colonels kept the lead most of the rest of the way.

O'Brien's disputed shot came with 35 seconds remaining in regulation time, a jumper from the left corner.

However, after a five-minute conference at the scorer's table, the shot was disallowed.

Kentucky insisted that a previous shot had hit the rim, which would have started the 30-second clock again. But a replay of the shot showed that the ball had hit the backboard but not the rim.

Indiana zoomed to a 38-19 lead in the first quarter by outscoring the Colonels 18-2 in the last five minutes of the period.

Issel was the only effective Kentucky scorer in the early going, hitting 15 of his team's first 24 points.

The Colonels narrowed the gap to 44-37 midway in the second quarter but Indiana came back to widen their halftime margin to 65-51.

Kentucky scored the first 17 points of the third period to take a 68-65 lead.

The Colonels, Eastern Division champions, held the lead just about all the way until Roger Brown boomed in a three-point basket with 1:09 left in regulation time to lift the Pacers into the 100-100 tie.

Indiana never trailed in overtime.

Kentucky had announced it was playing the game under protest before O'Brien's disputed shot. The team contested a three-second call which nullified a basket by Colonels' center Artis Gilmore.

Indiana pivotman Mel Daniels had 20 points and 14 rebounds while Issel topped the rebounders with 20.

Gilmore contributed 16 rebounds while Louie Dampier had 19 points for Kentucky.

United States, Russia Collide Again Today

LOS ANGELES (AP) — The United States and Russia collide in a six-game basketball series starting Sunday, but it won't be a replay of the controversial gold medal game of last summer's Olympics.

"If we felt we had to prove ourselves," says Soviet Coach Vladimir Kandrashin, whose Olympic team won a disputed 51-50 decision over the Americans at Munich, "we would have brought along our most experienced team."

Still, the USSR national team bears greater resemblance to its Olympic squad than does the Bob Cousy-coached collection of U.S. collegiate stars.

Cousy's team, which plays the Russians again Monday night in San Diego and four more times during the eight-game Soviet trip, will be strengthened by Bill Walton, UCLA's 6-foot-11 giant who didn't try out for the Olympic team.

Walton, a junior who has been national collegiate player of the year the past two seasons for the champion Bruins, has said he intends to play in only the first two games.

Besides Walton's skills, Cousy has Providence's All-American guard, Ernie DiGregorio, and two Olympic veterans, 6-3 guard Tom Henderson from Hawaii and 6-9 forward Bobby Jones from North Carolina. Olympians Jim Brewer, 6-9, Minnesota, and Doug Collins, Illinois State All-American guard, were picked for the team but won't play. Brewer said he doesn't want to miss classes and Collins has an ankle injury.

There were those who called the U.S. Olympic team less than representative, especially without Walton, and Cousy, responding to the question of how well he expected his team to do, said:

"I think we'll have a very representative team. If we don't hold our own, you have the coach to blame."

The Russians won seven out of eight games in a 1971 tour of the United States but Coach Kandrashin says he is pessimistic this time.

"We left three of our Olympic players at home because we wanted to give younger players a chance," he said. "This is the height of the American basketball season. Your team should be better."

Cousy, ex-Boston Celtic great who coaches the Kansas City-Omaha team in the National Basketball Association, said the U.S. Olympic team was beaten when it played a deliberate game against Russia, but the Americans will accelerate play as well as press on defense.

"Good—perhaps we will learn something," Kandrashin said. His assistant, Sergei Bashkin, said the Soviets understand the

distress of the Americans last summer "but we do not think there is a taint on our victory at all."

The International Basketball Federation gave the Russians a three-second reprieve after the Americans had thought the game was over at 50-49. The Russians scored to hand the Americans their first defeat ever in Olympic basketball.

Pampa Gets 12-2 Win Over Borger

The Pampa Harvesters, after waiting 14 days to get a baseball game in, beat the Borger Bulldogs Friday by the score of 12-2 in Borger. The win made Pampa 2-3 in District 3-AAAA play while the Bulldogs dropped to 1-6.

Pampa had two big innings, the second and the sixth, in getting the win. The Harvesters made seven runs in the top of the second inning and five more in the sixth.

Borger got one run in the first and one more in the bottom of the fourth to account for its runs.

Trailing by one run going into the top of the second inning, the Harvesters sent 11 men to bat in that frame. Although able to get only two hits in the inning, Pampa was able to put seven runs across for way more than the needed margin of victory.

Left-fielder Mike Robbins led the inning off and got on by an error on the Borger second-sacker, Pampa catcher Bobby Hendricks came up next and singled, advancing Robbins to second.

Five of the next six Pampa batters, Bill Simon, Rick Musgrave, pitcher Dennis Edmondson, Ricky Bigham and Toddy Black got on base. All of the players mentioned above scored for Pampa.

The Borger pitcher walked four of the Pampa players and gave up hits to two, Hendricks and Bigham, before he was finally able to get out of the inning.

In the top of the sixth Black led off for Pampa and was struck out. First baseman Terry Moore then singled to get on.

Robbins came up next and was walked, moving Moore to

Dodgers Win

PITTSBURGH (AP) — Los Angeles scored single runs in the third, fifth and sixth innings and Don Sutton scattered six hits as the Dodgers handed the Pittsburgh Pirates their third consecutive National League baseball setback 3-2 Saturday.

The Pirates scored in the first on Dave Cash's single and two Los Angeles errors but the Dodgers tied in against Nelson Briles in the third when Dave Lopes singled, stole second and came around on an error by shortstop Gene Alley.

Los Angeles went in front in the fifth on singles by Ron Cey, Lopes and Bill Russell and pushed across the decisive run an inning later when Willie Davis singled, stole second, continued to third on catcher Milt May's throwing error and scored on Joe Ferguson's single.

Aggies' Emory Bellard Is Just Looking For Right Trigger Puller

COLLEGE STATION, Tex. (AP) — Texas A&M Coach Emory Bellard has a new offense to keep rival coaches awake at night. Now all he needs is a quarterback to pull

the trigger.

The Aggies trotted out a fine assortment of talent during their spring training finale last Saturday, but none of it took the snap from center.

Senior Tim Trimmier and sophomore Jim Hartman appeared too slow of foot to properly handle the new-twist triple option which is being dubbed the "T-Bone."

Bellard, of course, worked closely with Texas Coach Darrell Royal when the Longhorns made the Wishbone-T a household name in the college coaching ranks. The formation features a fullback close to the line of scrimmage.

What Bellard has done is pull

the halfbacks on level with the fullback. However, they're spread two yards wider than the halfbacks in the Wishbone.

"We want to get the ball to the halfbacks a little more," Bellard says. "We want to take away some of the defenses have been using against the Wishbone."

The Aggies would seem in deep trouble with a new offense and no quarterback. However, Bellard has four quarterbacks coming in from the freshman ranks who could start plus a sleeper in Mike Jay, who played for the Quantico Marines the past two years.

"We have some fine quarterback prospects coming in," says Bellard.

They include All-State David Chipman, the bluechipper from Odessa Permian, and Joe McReynolds, an Oklahoma prize.

Bellard won't field a freshman team this year.

"They can play as high as they are man enough to play," Bellard says. He used 13 freshmen on the varsity last year.

He says of the incoming freshman crop "They just may be better than last year's group."

The most impressive runner in the final spring game was fullback Alvin Bowers, who galloped for 143 yards. Wide receiver Carl Roaches and tight end Richard Osborne made sensational catches.

For the Aggies, the talent is there. All they need is a trail boss.

Golf Tips from the Old Masters

HIT FROM WAIST DOWN FOR STRAIGHT SHOTS

The key to hitting straight golf shots is to deliver the clubhead straight into the back of the ball along the target line — not across it.

Few golfers do this better than Tommy Bolt. Bolt achieves his remarkable consistency by hitting the ball "from the waist down."

Most high handicap golfers start the downswing with the shoulders, which produces an outside-in swing path and causes a slice. Bolt and other master golfers start down with their legs and hips sliding to the left. Their legs and hips turn naturally as they move into the shot, but they do not allow the upper body to spin. A spinning upper body drags the clubface across the ball in a slicing motion.

Bolt's shoulders are virtually parallel to his target line at the moment of impact, allowing his hands to deliver the clubhead squarely into the back of the ball.

Dolphin Swim Club Has Awards Banquet

The Pampa Dolphin Swim Club's annual banquet was held at Furr's Cafeteria Friday, April 27th. Twenty-seven swimmers attended with their parents and guests. The annual banquet completes the meet competition for the swim club during the school year 1972-73.

Presentation of trophies was made by Mrs. Ruth Steger. The principal awards of the evening were made to the two most improved swimmers. These awards are based on improved individual times in all meets and time trials entered by the swimmers throughout the year.

Winner of the trophy in the girls division was Kristen Douglass and the winner in the boys division was Scott Martin.

The runner-up in the girls division was Pam Mills and the runner-up in the boys division was Clay Douglass.

Trophies were also presented to each individual swimmer who obtained an "A" time in any swimming event. Winners of these awards were: David Holland in the 50 yard free style and 100 yard breast stroke; Richard Steger in the 50 yard breast stroke; John Carter in the 50 yard breast stroke; Chris Alexander in the 100 yard breast stroke; and Tamera Glasscock in the 50 yard back stroke.

Dolphin T-shirts were also awarded to seven members of

the swim club based on attendance and participation throughout the year.

The members of the swim club who received Dolphin T-shirts were: Reid Steger, Richard Steger, Scott Smith, Cary Smith, David Holland, Kristen Douglass and Clay Douglass.

Ted Brown of Pampa, who swims for the Amarillo Aquatic Club, was also honored by the Pampa Dolphin Swim Club for two "AA" times which he attained during 1972-73.

He was presented a trophy for a "AA" time in the 500 yard free style and a trophy for a "AA" time in the 200 yard free style.

A representative of the West Texas State University Physical Education Department presented two films on swim strokes and techniques.

The swim club will continue active workouts throughout the remainder of the year and through the summer. Beginning in September, a full schedule of swim meets will again be entered by the swimmers.

Anyone interested in joining the swim club for the summer program in preparation for fall meets should contact Mrs. Ruth Steger, who can give you full information and details regarding the Pampa Dolphin Swim Club.

Butz Tells '74 Wheat Allotment

A 1974 national wheat allotment of 58.0 million acres and a national wheat marketing quota of 1,692 million bushels were proclaimed April 13, by Secretary of Agriculture, Earl L. Butz.

The proclamation for the 1974 wheat crop is required to be made prior to April 15 in order to conform with permanent legislation (The Agricultural Adjustment Act of 1938, as amended) which becomes effective at the time the Agricultural Act of 1970 expires.

Marketing quotas, to be put into effect, must be approved by producer referendum which cannot be conducted later than Aug. 1. Such quotas, if approved, would limit wheat acreage which a producer could plant for market without a penalty.

The secretary is required to determine a national marketing quota for wheat for any marketing year if he determines that the total supply of wheat for such marketing year will, in the absence of a marketing quota program, likely be excessive. Without marketing quotas, the estimated carryover is likely to be higher than desirable at the end of the 1974-75 marketing year.

The agricultural Act of 1970 extended its wheat program through the 1973-crop year and specifically suspended marketing quotas for wheat producers for the duration of the Act.

No announcement is being made at this time on the loan level, State and county allotments, domestic allocation percentage or diversion percentages. Should no new legislation be enacted, these provisions will be announced prior to the referendum.

In 1970, a similar situation arose. A marketing quota referendum for the 1971 crop of wheat was proclaimed April 14, 1970. Congressional resolutions stated the holding of a referendum, and on November 30, 1970, the Agricultural Act of 1970 was enacted.

What Big Profits?

Small Farmers Still Hoe Tough Row

By TOM TIEDE

BURBANK, Ohio — (NEA) — For most of his 41 years Winston Wyckoff has lived in the quiet anonymity of an 800-acre farm south of Cleveland. Growing crops, milking cows, feeding cattle. Now suddenly, he says, "I'm a damn celebrity." You know it's a serious matter when Winston Wyckoff says damn. Damn is his usual expletive. Or dagnabit. But these are hectic times when, sigh, only damn will do.

Celebrity? In one recent week Wyckoff was interviewed personally by three newspapermen, placed for several minutes on one area television station, telephoned by several other media representatives, and invited to an open-line radio program. Sighs Wyckoff: "I haven't even had time to do the chores."

But bother the chores right now! For the first time in his life Farmer Wyckoff has the attention, if not necessarily the sympathy, of the public. After years of wondering if "anybody out there" knew or cared he was alive, he now knows they do — loudly. And he's not a man to let the opportunity slip. A lifelong cattleman, board chairman of the Ohio Beef Market Program, a respected executive of several farm organizations, he says he's going to take this chance to educate the public — whether the public likes it or not.

Lesson one: "Farmers have to make a profit like anybody else."

Lesson two: Never mind lesson two, lesson one says it all.

Wyckoff, 41, is not a cattle baron. He's a small farm operator — 600 head a year — in a state that does not mature enough livestock to feed its own population. But when it comes to the controversy over rising meat prices, Wyckoff believes he's wholly significant. He says it's never very easy to be a small farmer, but current activities could make it almost impossible. Food boycotts and angry government reactions, he says, will not seriously affect the corporation growers of America, "but they might help put people like me out of business."

Wyckoff's argument is a familiar one. He feels that as his costs rise so should his charges. But whenever they do, as they have in recent weeks, he is denounced as greedy, greedy?

"I've got 800 acres of farm, 560 of them tillable. I work all day, almost every day. I've got to fight the weather, disease and everything else. For this I hope to get two or three per cent return on my farm. Sometimes I don't. Sometimes I lose money and have to go to the bank to get enough money to start again."

Truth is, the small farmer has been (is) taken for granted. Wyckoff's argument may be familiar but it is disturbingly correct. He simply cannot continue to produce his product unless he passes his rising costs on down the line to the consumer.

And prices have been rising dramatically for farmers. The cost of machinery

INSTANT CELEBRITY, cattle-raiser Winston Wyckoff now has public attention, if not sympathy.

alone has leaped out of sight — a combine, as example, sells for \$25,000, a tractor \$13,000 and a feed loader for at least \$8,000. Labor costs, in some areas, have grown by half since the middle 1960s (meat trucking wages in Ohio have increased 70 per cent since 1965). A silo on the Wyckoff farm which cost \$8,000 to build a few years ago now costs \$10,300. The man's taxes alone, \$5,000 a year, are almost half the salary of the average American family. Even fertilizer is outrageously high: "I spent \$9,500 last year for 150 tons of the stuff."

Besides this there is the continually awesome risk involved in the business. One Ohio cattleman, Wally Nelson, says he recently bought a load of feeder calves for an average \$400 apiece — and 50 of them died, a \$9,000 loss. Other cattlemen complain that the market fluctuates so much that "a guy who sells today may make a profit but a guy who sells tomorrow may not."

Nelson, for one, says he recently sold cattle at market for \$30 to \$40 (a hundred-weight) profit — but in 1968 and 1969 he sold similar cattle at approximately that much loss. "All of us little guys owe our souls to the banks," says one cattleman: "You never can call yourself your own man."

And even those small farmers who are relatively successful — that is, "have more good years than bad" — are usually cash poor.

Charles Rupp, one of Ohio's largest cattle feeders (1,800 head a year), says he earns around \$30,000 a year on a three-quarter million investment; and if something went wrong during a given year, say a strong housewife boycott, he says he could easily wind up that much in the hole. Thus obviously, says Rupp, "I don't think too highly of a woman shopper in Los Angeles messing around with my margin."

Rupp believes, as does Wyckoff, that the boycotts and threats of boycotts are unfair. They say people should not expect to pay 1960's prices for 1970 meat. Besides, they believe the average consumer isn't really so stung at today's mar-

ket. Wyckoff carries around a chart which indicates that in 1961 the average disposable income in the nation was \$1,468 a year, of which 23 per cent went for food. "But in 1972," he adds, "the average disposable income was \$3,767, of which only 15 per cent was for food." Put another way, says Wally Nelson: "In 1951 the average consumer could buy 1.7 pounds of beef with one hour's work — in 1972 he could buy 3.3 pounds with the same work time. That's a pretty healthy statistic."

Moreover, the men insist the average consumer is paying part of their grocery bill these days for nonfarm products. "I've got a wife and I know this. She buys everything from pantyhose to encyclopedias at the super-

market. Then she comes home, looks at her bill, and wonders why the cost of 'food' keeps going up."

In short, Winston Wyckoff and fellows believe that consumers can afford the food increases more than most farmers can afford food cuts. The average family income in America is now more than \$11,000 a year — up more than 61 per cent from 1965. New car sales this year (expected to be 11.2 million) may set a record. Sixteen million TV sets (half of them color) will be sold before December. 250,000 new pleasure boats are being manufactured this year.

Grumps one Ohio cattleman: "People are living high. Spending more. Cars cost more, clothes cost more, even booze costs more."

Panhandle Water

By FELIX W. RYALS

Every day more people become aware of people in our midst who call themselves environmentalists. We are going to become, I am afraid, more painfully aware of these people as each month goes by. They know their subject, they are well-financed and they have the ear of our national politicians.

In February of this year, Dr. Wyman H. Cooper, Regional Counsel for the Environmental Protection Agency, was one of the principal speakers for the Texas Water Conservation Association annual meeting in Austin. Most of his listeners were so wrapped up in the progress of the Texas Water Plan that most of what Dr. Cooper had to say was hardly noticed. What he said is going to have great impact on all of us and because of its future significance we are carrying a portion of his address.

The most comprehensive program ever enacted to clean up the Nation's water became law on October 18, 1972. Known as the Federal Water Pollution Control Act Amendments of 1972, the new law mandates a sweeping Federal-State campaign to prevent, reduce and eliminate water pollution.

The law proclaims two general goals for the United States:

(1) To achieve where possible by July 1, 1983, water that is clean enough for swimming and other recreational uses, and clean enough for the protection and propagation of fish,

shell-fish and wildlife. (2) And by 1985, to have no discharges of pollutants into the Nation's waters.

Those are goals. They reflect deep national concern about the condition of the Nation's waters and a strong commitment to end water pollution.

Moreover, the goals set the stage for a coordinated series of specific actions that must be taken — with strict deadlines and strong enforcement provisions — by Federal, State and Local governments and by industries.

The new law builds upon and improves earlier Federal water pollution control legislation. While the States retain primary responsibility to prevent, reduce and eliminate water pollution, they must now do so within the framework of a new national program. And if the States do not or cannot fulfill their obligations under the law, the Federal government, through the U.S. Environmental Protection Agency (EPA), is empowered and directed to take action.

For the first time, the law extends the federal pollution control program to all U.S. waters; previously, only interstate waters were covered by Federal legislation.

Also, for the first time, the law authorizes the Federal government to seek an immediate court injunction against polluters when water pollution presents "an imminent and substantial endangerment" to public health, or when it endangers someone's livelihood.

The law also increases Federal aid to help local governments build sewage treatment facilities, makes financial aid available to small businesses to help them control water pollution and provides streamlined and more stringent enforcement tools than ever before.

Here are some specifics:

The law sets deadlines for actions to control water pollution from industrial sources:

Industries discharging pollutants into the Nation's waters must use the "best practicable" water pollution control technology by July 1, 1977, and the "best available" technology by July 1, 1983.

EPA will issue guidelines for "best practicable" and "best available" technologies for various industries by October, 1973. The guidelines can be adjusted by several factors, including the cost of pollution control, the age of the industrial facility, the process used and the environmental impact (other than on water quality) of the controls. EPA will also identify pollution control measures for completely eliminating industrial discharges.

By May, 1974, new sources of industrial pollution must use the "best available demonstrated control technology." This will be defined by EPA in the form of "standards of performance" for various industries no later than May, 1974.

Farmers Union Hails Disaster Loan Victory

Protest petitions, court action, and political pressure paid off for farmers this week when the Farmers Home Administration announced the reopening of the Disaster Loan Program.

Hundreds of farmers in over two hundred Texas counties who suffered crop losses as a result of drought between January 1 and June 19 of 1972 are now eligible to apply for the \$5,000 Disaster Loan at a low interest rate with a forgiveness provision.

Texas Farmers Union president Jay Naman of Waco hailed the announcement of the program reopening as a "great victory for farmers." Naman said that farmers were successful in accomplishing the reopening of the important program because of their organized efforts using political pressure and court action.

"Hundreds of family farmers who were stricken by disaster last year will now have a new lease on life and will be able to get the financing that they need to continue farming," Naman said.

BLOWOUTS BIG ACCIDENT CAUSE

LONDON (AP) — Tire blowouts lead to one in six of all accidents causing injury and death on Britain's motorways, according to a report by the British government's Transport and Road Research Laboratory.

The report said private autos and light goods vehicles represented the "major part of the problem." They accounted for 82 per cent of all burst tires and 66 per cent of all resulting vehicle involvements.

By County Extension Agents Richard Guggisberg and Audette Vaughn 4-H CONGRESS

The first Texas 4-H Congress will be held July 10, 11, and 12, at the Shamrock Hilton Hotel in Houston, Texas.

The major educational program thrust will be centered on the topic of "Values in Our Society." The program format gives the Congress delegates the opportunity to meet and exchange ideas with outstanding adults as well as other young people from across the state.

Gray County will be able to have one delegate. The delegate should be between 15 and 19 years old. All interested 4-H members should contact the agents at the County Extension Office by May 5.

few irate housewives and a few overpaid labor leaders had to demand the farmers sell them finished beef at cost of less than cost.

The only reason the per capita consumption has jumped from 65 pounds twenty years ago to 118 today is because of the tremendous pay increases. None of these pay increases has been based on productivity.

The American farmers and ranchers have been the wonder of the world by increasing their productivity per man hour at unbelievable rates. Thirty to forty years ago, the average farmer produced enough for himself and six to seven other people. Today he produces enough for himself and 48 to 52 people. This is what you call increased productivity.

Compare this with that new automobile you got regardless of brand. You don't get one out of the garage until you start bringing it back. Dealers, without exception, will tell you the trouble is labor.

A salute to the Agricultural Industry will be made at the Coronado Inn, Monday noon, April 30 by the Chamber of Commerce.

Rex McAnelly will give a program in honor of the Beef Industry.

Postal Employees Noting Week With New Stamps

Pampa postal employees join their fellows across the nation tomorrow in inaugurating Postal Week.

Highlight of the week dedicated to "People Serving You" will be the issue of a commemorative strip of stamps depicting 10 different facets of postal service.

A unique feature of this stamp issue is the thumbnail sketch on the back — or glue — side of the colorful little squares.

Homemade Repellent

Some north woods sportsmen use a homemade insect repellent they claim keeps away the most ferocious mosquitoes. They blend onions, peppers and garlic into a thick paste and apply it liberally to the neck and face.

According to Pampa Postmaster Carl English, the local postal service is beginning its 81st year serving this Top O' Texas city.

During that period, there have been a total of 15 postmasters and acting postmasters.

Just prior to occupying the present federal building at Foster and Ballard Sts., the Post Office was located on W. Kingsmill, where Field's Mens and Boys Wear now operates.

Traffic became so heavy in that location that city fathers, for a time, considered making that block of Kingsmill a one-way street.

However, the new facility was begun before traffic became truly critical.

While the cornerstone of the present building says "1933," the formal dedication of the

completed structure and the beginning of service in it was in 1935.

There have been many changes in 80 years, Postmaster English observed, "but I still feel despite necessary rate increases through the years, it is the best service bargain for the money that the American way of life holds."

Postmasters who have served, in addition to English, were Thomas Lane, John F. Johnson, Bruce Waterfield, Victoria von Brunow, Claudine Barnes, William A. Crawford, David E. Cecil, Curry H. Walker, S.G. Suratt, W.B. Weathered, O.K. Gaylor, Lynn Boyd and R.W. McPhillips.

— And to be absolutely accurate, the record should read: 13 postmasters and two postmistresses.

POSTAL VETERAN — Harley Knutson delivers the mail. Snapped at one of his stops on his northwest Pampa route, Knutson represents some of the longest years of service served in the local post office. He is also president of the local letter carriers organization. (Photo by Terry Hanna)

New Incentive Program At Reformatory Effective

By JOHN BOSLOUGH Associated Press Writer

BUENA VISTA, Colo. (AP) — Patrick McDermott's room has posters on the wall, purple drapes at the window, a bookcase and a typewriter. The room also has bars in the window and a heavy steel door.

McDermott, 25, is an inmate at the Colorado State Reformatory, but because of a unique incentive program initiated a little over a year ago, he is better off than most prisoners.

McDermott's recent request to remain at the reformatory 60 days beyond his normal parole release date so he can complete a college-level course in newspaper advertising and layout design is an indication of how well the program has been received by reformatory inmates.

"It's a jail but at least when you're in here you feel like you're accomplishing something," said McDermott, who is the editor of the reformatory weekly newspaper, The Spotlight. "I guess as far as prisons go they've got some real innovations here."

The main innovation at the reformatory is the incentive program, a system based on four levels within the institution.

McDermott lives in the east wing, the top incentive level, and is one of the elite of the institution. He has earned privileges ranging from total freedom of dress and a key to his private cell to unlimited access to the wing's recreation room and a chance for an occasional furlough from prison life.

Moreover, usually only east wing residents can become eligible for parole.

Inmates in the west wing, the lowest incentive level at the opposite end both figuratively and literally, lead a different life.

The west cell block is dreary and the cells are austere. The residents have virtually no recreation privileges and many restrictions. For the most part, west wing residents have not been here more than a few weeks and have not had a chance to apply for residence in the institution's north wing, the second incentive level.

Warden C. Winston Tankley, who is largely responsible for the changes, says the incentive program is basically one of behavior modification, using reward and punishment as the tools, but with emphasis on reward.

The basic reward under the program is the incentive committee's acceptance of the resident's application to move from one housing level to the next. As an inmate progresses from the west wing to the north, south and, finally, to the east wing, he moves from a traditional prison society to one in which an effort is made to approximate life in free society as nearly as possible.

The incentive committee makes a decision to permit a resident to move based on his progress in his work training program, his behavior within his housing unit, positive attitude changes and his progress toward initial goals established for him when he first entered the reformatory.

"The status associated with living in various wings is one of the keys to the system's success," said Associate Warden Nick Evans. "And the most effective disciplinary technique is to move a person backwards from, say, the south wing to the north wing."

In a sense, the Colorado State Penitentiary at Canon City is the "lowest incentive level since an inmate can be moved from the reformatory to the state prison if he is unable to fit into the program or is keeping others from adjusting, Evans said.

The difference between state prison and reformatory inmates is that most of the reformatory inmates have indefinite or open-ended, sentences while prison inmates have definite terms. Whether a person is sent to the reformatory or the prison is usually up to the sentencing judge and is not dependent upon the man's age.

The average age of reformatory "residents," as inmates are officially called, is just over 22 although there are several in their 40s and 50s. About 50 per cent have been convicted of some sort of theft other than robbery with drug-related crimes second at about 20 per cent.

Staff members and inmates agree that there has been a positive change of attitude on both sides since the incentive program's inception on Nov. 1, 1971.

"For the first time residents and staff members are talking to one another," Evans said. "The relationship between staff members and residents has improved so much that we've been

able to reduce the security staff from 59 to 19."

Evans said it is not unusual for a staff member to take an inmate home for dinner or for a hike on the slopes of Mt. Princeton, which soars a mile and a half above the reformatory.

It takes an inmate at least four and a half months to move from the west wing to the east wing but once in the top housing level, he can accumulate furlough time at the rate of 24 hours a month.

Because the program, which was designed by a staff committee under Tankley's direction, is relatively new, there are no accurate figures on its effect on keeping those paroled from being returned.

"But so far, less than 1 per cent of those who have gone all the way through the program and have been released have been sent back," says research and planning officer Ed Sampson.

BULRUSHES ADOPTED LONDON (AP) — Two small clusters of lesser reed-mace, a rare type of bulrush, are being saved from bulldozers clearing the site for a new reservoir at Empingham — in Rutland, England's smallest county.

They are being replanted in the bed of a nearby stream.

1 Card of Thanks

(BILL) WILLIAM HENRY FRICKE

We wish to express our deepest appreciation to all our friends for their thoughtful consideration for the food and flowers and their kindness during our time of sorrow. May God bless all of you. Our heartfelt thanks to all and to Dr. Falkenstein and Staff at Highland General Hospital. Mrs. Bill Fricke and Family.

GLADYS V. MUNN'S We wish to thank our neighbors, friends and anyone who in any way acted in love and sympathy during the recent loss of our beloved Wife and Mother. Mr. H.B. Munn and Family.

Both East's diamond signal and West's diamond continuation were very bad plays. South had tried to use Blackwood and West's five-club call had made it impossible for North to show eyes in the catch-as-catch-can system he was using.

Hence it was very likely that South held two singletons and a club shift was indicated.

However, West should not have doubled and East should have gone to seven clubs. Seven clubs would only be down one with a spade lead.

At the other table South played in and made a safe and, sane five hearts so a seven-club call would have produced a nice profit against even the best defense.

Instead of bidding four no-trump, your partner has bid four spades. What do you do now?

Answer Monday

READY FOR RUSH — Paul Cain studies a sheet of the new commemorative stamps to be released tomorrow to kick off Postal Week. It is expected that the strips of ten stamps in high colors will attract both the collectors and those just wanting a memento of the occasion. The stamps depict ten scenes of postal services rendered. (Photo by Terry Hanna)

Modern Science Used Against Huge Termites

PORT HEDLAND, Australia (AP) — A mining company has called in the mighty atom to thwart armies of outside termites that are devouring a million wooden railroad ties.

The termite species, Mastotermes darwiniensis, is unique to the northern areas of Australia. The soldier termites are up to three-quarters of an inch long and the workers slightly smaller.

Stan Bramwell, railroad superintendant for the Mount Newman Mining Co. Ltd., notes that the insects are especially attracted to West Australian kurri wood.

"It's like a cocktail to them," Bramwell said.

The iron-mining company has begun an experimental program to detect the termites chewing up the ties on its railroad between Port Hedland and the mine site at Mt. Whaleback, 250 miles to the south.

The Atomic Energy Commission is developing a device that will measure the density of the ties. If the density reading is below normal, engineers will have a warning of possible termite infestation.

The company is also experimenting with different woods and antitermite treatments.

Of the 162,000 licensed cabs in the United States, only 40,000 to 50,000 still cruise streets in major cities.

As a silent assassin, gliding through the dark night on muffled wings, the great horned owl has no peers.

SPECIAL NOTICE

to our customers in The Top O' Texas

PIGGLY WIGGLY WILL BE CLOSED ALL DAY SUN. & MON. TO SLASH PRICES ALL OVER THE STORE

We are determined to give you the most value for your food dollar!

You have told us you want to lower your cost of food! To help fight inflation, we are introducing a new merchandising program which will give you more value for your food dollar...Everyday low, "VALU-PRICES" and weekly special "X-TRA VALUES".

To help streamline our operation, Piggly Wiggly will discontinue S&H Green Stamps

effective Saturday night April 28, 1973.

We will be closed all day Sunday and Monday so our employees can reduce prices in every department. There will be no reduction in store cleanliness, friendly service or the quality of the products we handle...only A LOWER PRICE TAG ON THOUSANDS OF ITEMS!

GREEN STAMP SAVER BOOK
So that you may complete the necessary books to get items you are saving for, Piggly Wiggly will sell full or part books at our courtesy booths at the rate of 20% per 100 stamps until June 2, 1973.

GET READY FOR OUR VALU-PRICED LOW PRICES!
