What's ahead for Social Security: Benefits, rates going up, up and away

By Bruce Blossat
NEA Washington Correspondent

WASHINGTON — (NEA) — The Social Security cash benefit increase of 5.6 per cent set to take effect next July 1 does not upset the new, "automatic" cost of living increase features voted in the law's major revisions of late 1972, but simply covers a time gap left before those changes can take effect.

The recently approved interim benefit boost is expected to add \$1.4 billion to President Nixon's budget outlays for the fiscal year which just began this month.

It will also cost taxpayers more in payroll deductions than was planned for calendar 1974. Though tax rates are not hikes, the "interim" law provides that next year the tax base — the amount of a worker's earnings from which deductions will be taken — will rise to \$12,600 instead of the scheduled \$12,000. This year the maximum is \$10,800.

This means that, while in 1973 the most which can be deducted from a worker's paychecks is \$631.80 for the year, in 1974 that maximum can total \$737.10.

In terms of benefits, the new congressional action means that starting July 1, 1974, average retirement payments under Social Security for a worker and his wife will rise to \$293 a month, from the present \$277.

The newest revisions, all part of an attempt to help beneficiaries keep up with racing inflation, also establish that a retired worker may earn \$2,400 a year instead of the present \$2,100 annually, without any loss of retirement benefits.

Meantime, even as these alterations were commanding attention, the important "automatic increase" machinery of the major 1972 law was beginning to grind.

Its workings are thoroughly explained in NEA's 1973 revision of its basic Social Security-Medicare book. This edition is extraordinarily significant, containing as it does the most sweeping changes since Medicare was adopted in the mid-1960s.

Under the automatic features, the second quarter of 1973, just concluded, serves as the first base period for calculating cost of living increases which are hereafter to be reflected in systematic rises in benefit payments.

Government officials will be closely watching the living cost curve. If by June, 1974, it has risen 3 per cent or more above the 1973 base period, then benefit action must follow.

In such circumstances, Congress has until Nov. 1, 1974 to vote an increase in cash benefits watching the cost of living rise. Should Congress not act by that deadline, the benefit hike would be put into effect anyway by Jan. 1, 1975, under order from the secretary of Health, Education, and Welfare.

Thereafter, the process would be continuously repeated. In June, 1975, the cost of living levels will be compared with the second quarter of 1974, and so on. It is figured that in any given checking period the rise might be less than 3 per cent, but that such an advance is almost certain to occur in any two-year span. Thus beneficiaries can look for higher payments at least

every two years, and probably more often they will come annually.

For a time, the 1972 law provides no new boost in the tax rate, which went up from 5.2 per cent to 5.85 per cent of a worker's paycheck this past January. It is not slated to rise again until the years 1978-80, when the schedule is to be 6.05 per cent. Other rises will follow later.

To finance most of these anticipated steady benefit rises, the 1972 law contemplates regular enlargement of the tax base. In other words, if it is now to be \$12,600 in 1974, it should rise again in calendar 1975 and the years thereafter.

The theory is that workers average annual earnings will be moving upward at about 5 per cent a year, and that they can thus afford payroll deductions from higher and higher income amounts.

The same reason, the 1972 law provides for steady increases in the amounts retired workers can earn without any loss in their cash benefits. Right now that sum is fixed at \$2,100 a year, and Social Security estimates were that it would climb to \$2,280 by calendar 1975. The newly adopted interim law already outdates that figure, however, since it provides that in 1974 it will go to \$2,400. The 1975 calculation obviously is going to be higher.

Just as NEA's 1973 edition of the Social Security-Medicare book details these features, it also sets forth many other substantial modifications of the basic social security law. They include:

— Full explanation of the general cash benefit increases

which took effect in January, 1973.

— Details of the higher benefits due many widows under the 1972 revisions.

— Facts about the extension of Medicare coverage this July to persons drawing disability payments under Social Security for at least two years. It is the first time Medicare has applied to persons under age 65.

— Other new applicants of Medicare taking effect this July.

— Notice of the fact that starting this past January special minimum benefit payments of \$170 per month can go to persons who have worked under Social Security for 30 years or more. The size of that minimum declines as the years of work under Social Security slip below 30, until a base figure (now \$84.50 per month but just revised to \$89.30 under the interim legislation) is reached.

All of the important 1972 changes have made Social Security and Medicare more complicated than ever before, and the 1973 interim boosts have not simplified things for beneficiaries. NEA's 1973 edition in this field is specifically designed to explain this now very tangled law to the rising millions of eligible Americans. The book provides many tables to help broaden understanding.

Battin' Around

By C.R. BATTEN

"A bill recently introduced in the Senate proposes to prop up the housing market, increase domestic employment, vitalize the economy of the Pacific Northwest, improve the balance of payments and reduce the general price level as well as that of lumber products," according to the Monthly Economic Letter of the First National City Bank of New York (April, 1973).

All that would be accomplished by the Timber Export Administration Act of 1973, simply by cutting off all timber exports by 1977. "Despite its good intentions," continues the Economic Newsletter, "its passage would lead to a worsening in all of the areas it promises to improve."

The high demand, shortages and high prices of softwood lumber have been well publicized in the past few months. In March, 2100 home builders and lumber dealers traveled to Washington to ask Congress and the administration to "do something" about the timber supply problem, including log exports.

Preservationists who object to the federally-owned forests providing their share of the nation's timber needs are attempting to divert the issue from one of improved forest management to one of timber exports that supposedly drain the domestic supply.

Even the timber industry is divided on the issue. Its national association took the position that exports from federal lands should be banned while exports of privately owned timber should be allowed to continue.

The U.S. imports three times as much timber as it exports. Last year, 22.5 per cent of our lumber consumption was supplied by Canadian producers.

The key assumptions of those who seek to prohibit exports, according to the economic letter, are that "... an export embargo would result in a shift in foreign demand... away from U.S. logs to U.S.-milled

lumber products, substitution of domestic output for Canadian imports in the U.S. market, and an overall increase in the lumber supply."

But the Bank predicts that it would not work out that way. Most of the exports go to Japan, in the form of logs. Eighty-six per cent of the exports originate in Oregon and Washington, where "... the processing industry is already at, or somewhat in excess of, production levels considered to be full capacity. At least two years would be needed to build new facilities." Much of the Canadian lumber now imported to the U.S. would be diverted to Japan, if U.S. exports were banned.

"The United States enjoys a comparative advantage over the Canadians because it now exports raw logs that yield the Japanese a higher-valued product than does the semi-processed log (from Canada). If the bill were passed, that comparative advantage would swing to the Canadians."

Furthermore, the bank predicts that the shift of Japanese demand to Canadian lumber would result "... a sharp increase in Canadian lumber prices-including that portion imported by the United States."

The U.S. lumber industry would be blocked out of Japan. "The United States would be inviting a major trading partner with which it had just experienced the greatest trade deficit in the nation's history to shop elsewhere," according to the letter.

The Economic Letter also points out that the yield of forest products per acre has climbed as a result of the export markets. In the ten years beginning in 1961 (the year before Japan began buying U.S. logs), Washington's forest harvest increased in volume by 46 per cent, though the acreage harvested remained about the same.

"The bill before the Senate could put a permanent damper on the high productivity of the Northwest forests," says the City Bank.

Relations With Russia Influencing Weaponry

By PHIL NEWSOM
UPI Foreign News Analyst
It may seem curious to many that the closer relations with the Soviet Union become, the more the United States finds it necessary to spend on new and improved weaponry.

Soviet Party Leader Leonid I. Brezhnev after his summit meeting with President Nixon, and by Henry Kissinger in amplifying the communique signed by the two leaders at the conclusion of their meeting. Brezhnev's visit, said Agnew, has brought "all mankind closer to our shared goals of a true and lasting peace."

Soviet-American relations have improved because of the U.S. position of strength.

"This must remain a part of our policy," he said. Rejecting unilateral reductions in the military field, he added:

"We cannot do those things that the Soviet Union will not do."

WORRY CLINIC

By
 George W. Crane, Ph.D., M.D.

Miss Harrah shows the value of studying your professor as much as your textbook! Scrapbook this case and take it to college with you! For it isn't superior I.Q. but better study habits that usually win you an "A" vs. a "C" while on campus!

CASE X-559: Miss Harrah taught Latin at Ft. Wayne (Indiana) Central High School for two generations. She was a dedicated YWCA worker, too, for that's how my mother first met her when they were students at Indiana State University at Terre Haute. My brother John and I both took 4 years of Latin, so my mother made sure we enrolled in Miss Harrah's courses. John is a Harvard economist who later taught at Northwestern University and then headed the Social Sciences Division at Iowa Wesleyan. "Miss Harrah never liked to see students whispering in her class," John reminisced at a recent family gathering. "So I used that fact to get an 'A' in all her Latin courses. "For I often was unprepared over the entire Latin lesson but knew one or two paragraphs perfectly. "Just as we got down to the paragraphs I could translate with ease, I'd lean over and start whispering to a girl in the next seat. "Immediately Miss Harrah would spot me and call out: 'John Crane, you may translate the next section.' "Well, that's exactly what I wanted, so I'd rattle off the English translation of the Latin without a flaw. "And that little trick worked all through my Latin classes with Miss Harrah, so I always rated an 'A' in her courses."

And after the first written exam, notice if he sticks to basic fundamentals or asks piddling questions about details. (2) Find out in advance the name of your class textbook and get a copy before the first class session! Then see who its author. Read the preface and skim through the entire book quickly, thumbing the pages to get a general idea of its scope, plus illustrations, charts and tables of data. This gives you a better perspective. The "A" students obtain this running head start, whereas those who will get a "D," wait for a week to buy their text and thus remain far behind the rest of the semester. (3) Since competition is much keener in college, for those of lower I.Q. have dropped out previously, you are in brilliant company where your classmates are now just as alert as you are. But in grammar and high school, students of high I.Q. could coast a bit and still beat their less alert classmates. Not so in college! So make a rigid daily agenda of your duties and study hours; then follow it precisely! (4) Typewrite your themes, for professors get irate at the illegible handwriting of many students and then knock off 5 or 10 points. A "B" paper may thus be lucky to get a "C," if handwritten! (5) Don't cut class, for the professor usually stresses in his lectures what he will ask on the final exam! Send for my booklet "How to Improve Memory and Study More Efficiently," enclosing a long stamped, return envelope, plus 25 cents. Take it to college with you!

HOW MAKE "A"
 Often high school graduates will ask me how to make top grades when they go on to college. "Dr. Crane," they will inquire, "we understand that the competition is much keener at college, so how can we be sure to win good marks?" Here are some of the practical suggestions to follow: (1) Study the professor as intently as your textbook! If he has written any scientific articles for technical journals, read them so you can quote back at him some of his own ideas.

Crossroads Report

Dear Editor: I see where Washington is considering a plan to relieve the gasoline shortage by adding 10 cents a gallon to the tax on go-juice. Which might not do much to increase the fuel supply but should help some to finance another fat pay raise for poor congressmen.

I see where Mr. Klassen, our head postmaster, is aiming at increasing letter postage to 10 cents at a little later point in time. Which should enable the P.O. "Service" to hire two or three dozen more Planners. Planners, of course, are people who think up things like higher rates and new holiday gimmicks to frustrate the peonish postal patron class.

I see where Senator Fulbright, the Arkansas lawyer who went to school in England for a little while and sort of switched from hillbilly to Anglophilicity, has called on Mr. Nixon and Mr. Agnew to resign.

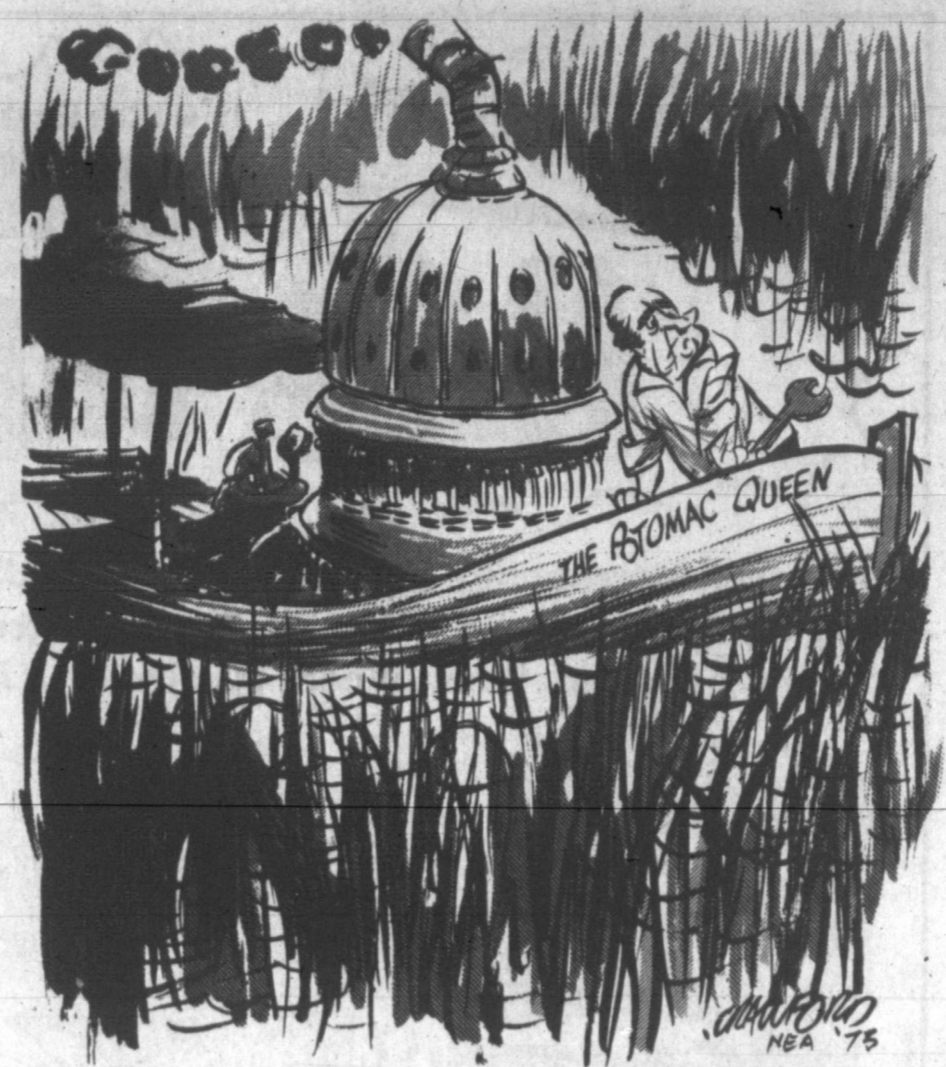

I see where some Watergate suspects are reported to have been granted immunity from jail in cases where they agree to tattle on some associate the investigators think it will be more politically profitable to prosecute.

The consecrated protectors of our environment figure they will have all cars off the streets of Los Angeles and some other cities by 1977, and I expect they will have the auto completely outlawed by 1984.

Which some say will bring back the bicycle. But riding a bicycle is work. Therefore, it seems more logical that outstement of the auto will bring back the horse.

The oldtime Post Office brag was that neither rain nor snow, etc., could stay the postal couriers from swift completion of their appointed rounds.

But it seems that some other natural or artifice hindrance has developed which is having much better luck at interfering with our proud couriers' swiftness. Most enterprises are able to improve their efficiency and performance with experience, higher wages and technical development, but this doesn't seem to work with publicly-owned endeavors like the post office and Congress.

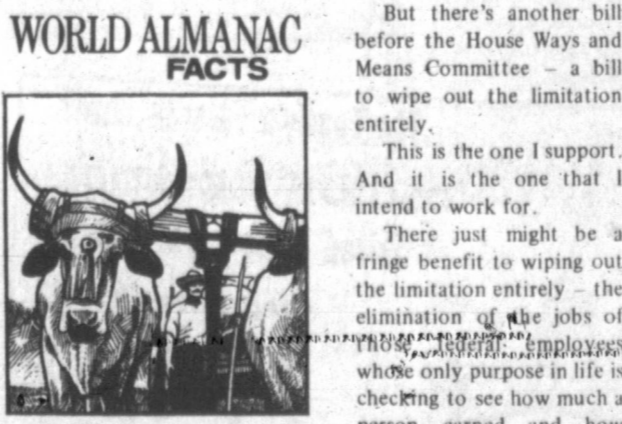

Social Insecurity And That \$2,100 Limitation

WASHINGTON - If this country is to be true to the thousands of Americans on Social Security, the Congress must remove the arbitrary limit on the amount a retiree can earn and still collect. Under current law, an elderly citizen earning more than \$2,100 a year is penalized. And the more you earn over the \$2,100 limit, the more you are penalized.

H. L. Hunt Writes

OUR BICENTENNIAL Three years from now the United States of America will be two hundred years old. This should be an occasion not only for rejoicing and commemoration, but for a renewed dedication to the principles of freedom, limited government and personal independence and self-reliance on which this nation was built.

So, when 65 comes and this man is forced to retire, he must learn to live on Social Security and the \$2,100 a year more he's allowed to work, or continue to work fulltime and penalize himself with a reduced benefit. Fortunately, there are several bills before Congress now to correct this inequity.

Today the 40-hour work week is an accepted standard for workers in the United States and many other nations. The animal-loving Costa Ricans have made laws restricting horses, mules and oxen from working more than 48 hours per week, The World Almanac notes.

Rearview Mirror By TEX DEWESE Editor Of The News

MYSTERY At City Hall. That sign, "Yankee, Go Home!" showed up again on the blackboard in the City Commission Room the other day. The City Hall Cat reports evidence that the anonymous sign writer is aiming his dart at the fellow who writes this column.

After trying for five or six years, you'd think the sign writer would give up and go home himself. AND HERE comes the unkindest cut of all. In the mailbag the other day was a letter addressed to "Miss" Dallas DeWeese.

It was from the Presbyterian Lay Committee, Inc. and contained an advance copy of the "Highlights of the 18th General Assembly" to appear in the July issue of The Presbyterian Layman.

THE PAMPA school board set some kind of a record last Tuesday night insofar as the length of its meetings is concerned. Board members convened at 7:30 p.m. and adjourned one hour and 40 minutes later at 9:10 p.m.

Two "heavy" items on the tail end of the agenda were postponed until July 30. They were the "budget work session" and the "executive session" to discuss resignations and recommendations.

Reason for the postponement was charged to the absence of one of the board members who was out of town. So, the budget work session and the executive personnel session moves to a 7 o'clock breakfast meeting on July 30.

Dear Dr. Lamb - In answer to your request from anyone who has worn the stretch gloves, I am glad to say I have worn them for several months now and I can't get along without them at night. They have given me more relief than all the medical treatments I ever tried, and that means pills and all kinds of liniments I could get.

Libertarian And Topless

A person is entitled to use his own property as he sees fit so long as he injures no one else. That is something that The News has said for years. But what about the woman in Ft. Collins, Colo., who "went topless" in her own yard? Here is a classic test of the practicality of our philosophy.

Well, we have met some who call themselves Libertarian who would say that the law has no justifiable cause of action to prevent a person from sunbathing on her own property even though she does it in a manner that reasonably could be construed either as a visual offense to some or as an attractive nuisance to others.

However, we believe The News' long-stated policy - that a person is entitled to use his own property as he sees fit so long as he (or she) does not injure anyone else - is a perfect solution to the case. The crucial, qualifying clause is contained in the word "so long as he does not injure anyone else."

Flame Of Progress

The American free enterprise system is the greatest social and economic engine of human progress ever seen on the face of the Earth. Within the laboratories of some of the nation's major industries, basic research and development work is carried on that at this very moment is creating the technology and knowledge which will fundamentally change, for the better, the condition of human life.

Electric utility research being done to develop the new breeder reactor for generating electricity could lead the way to production of adequate power supplies with minimum impact on the environment for hundreds of years. The company that coordinates the management, progress and operation of a major portion of the nation's telephone system is now devoting some \$400 million a year to basic research and development work. In its Bell Laboratories research facilities just 25 years ago, a small semiconductor device now known as the transistor was created and demonstrated its ability to amplify a speech signal about 20 times. It is particularly significant that research undertaken to meet an industry's needs to provide more and better communications service for its customers resulted in a discovery that has contributed immeasurably to the ease, enjoyment and productivity of people's lives through the world. The transistor and the technology which followed it led to the development of the computer that has so vastly extended the capacity and range of human thought.

Which some say will bring back the bicycle. But riding a bicycle is work. Therefore, it seems more logical that outstement of the auto will bring back the horse.

College Notes

YORK, Neb. — Freddy Lee Wilbon of Pampa has been accepted as a freshman at York College. The son of Mr. and Mrs. L.C. Wilbon of 528 Crawford, he will pursue studies in liberal arts.

York College is a private two-year liberal arts college supported primarily by member of Churches of Christ.

Curricular offerings foster an understanding of human and creative spirit, an insight into contemporary situations, and an appreciation of American heritage.

SEWANEES, Tenn. — Jane R. Shaw, 1429 Russell, student at Pampa High School, is one of 27 high school students talented in science who are attending the Sewanee Summer Secondary School Student Institute at the University of South through July 28.

The program is funded by the National Science Foundation through its science training program.

All students accepted scored high on nationally standardized examinations, have distinguished high school records, and have been involved in activities outside of required high school work.

LUBBOCK — The second term of summer session of Texas Tech University will begin today with the opening of residence halls to new occupants at 10 a.m.

Registration will be conducted from 7:30 a.m. to 6 p.m. Monday in the Municipal Coliseum, with classes scheduled to start at 7:20 a.m. Tuesday, July 17.

Final examinations for the first term were Thursday and Friday, July 12-13.

LUBBOCK — Charles C. Snuggs, son of Mr. and Mrs. John Snuggs, 705 Powell, received his law degree from Texas Tech recently.

Snuggs was a 1965 graduate of Pampa High School and a 1970 graduate of Texas Tech.

He is associated with the Wagonseller - Cobb law firm of Lubbock.

He is married to the former Gracie Sexton, daughter of Mr. and Mrs. Carl Sexton, 409 Doucette. She is also a 1970 graduate of Texas Tech and is employed by IBM in Lubbock.

ATLANTA, Ga. — John Harvey Karr, 1110 N. Somerville, was one of 36 students at Emory University's School of Business Administration named to dean's list for the spring quarter.

AMARILLO — Ten Pampa students are currently enrolled in special education courses at West Texas State University in Canyon.

Those students are Mrs. Donna Andersson, 1718 Duncan; David Egerton, 2128 Coffee; Jackie Erney, 2229 Evergreen; Margie Forsha, 2111 Chestnut; and Mrs. Lyndall Harwood, 2236 N. Sumner.

Others are Mrs. Hannah Henderson; Mrs. Wilma Hogan, 732 Bradley; Nadine Mercer, 1811 Christine; Mrs. Jean Milum, 2145 Dogwood; and Beth Watson, 2320 Aspen.

Special education endorsements may be gained in four areas at WTSU. They are mental retardation, teaching emotionally disturbed, language and learning disabilities and early childhood education for teachers of exceptional children.

AMARILLO — A workshop in occupational safety leading to U.S. Labor Department certification is being offered at West Texas State University during the second session of summer school.

Registration for second term begins Monday, July 16.

The course's intent is to prepare individuals to recognize, avoid and prevent hazardous situations or conditions in their employment.

The class will meet from

By LIBBY SHOTWELL, Executive Secretary ARC
Learn to Swim Program continues at the Country Club Pool, the Youth Center Pool and the City Pool with Tom Watson, WSI, at the Country Club Pool.

Tom completed two classes last week with the following receiving their cards in beginner swimming: Laurie Comer, Treca Hawkins, Dick Hughes, Austin Lafferty, Willy Neslage, John Tarpley and Chris Comer.

The following received their advanced cards: Elizabeth Bassett, Tom Bassett, Shelly Duenkel, Cheryl Kessel, Kay Quattlebaum, Penny Summers and Joe Reed. Congratulations to all of these children.

Evangeline Turner, WSI, completed an advanced beginner class and a beginner class at the Youth Center Pool with the following receiving their cards: Cindy King, Bobby Brantwein, Melinda Hogan, Rocky Goodwin, Paula McCabe, Joey Cufal, John Ferguson, David Blakemore, Rocky Dunnam, Tena Cotham, Tina Buckley, David Johnson and Kim Campbell.

In the beginner class the following received their cards: Kelsey Coday, Randie Miller, Angela Nagy, Kelly Martin, David Fatheree, Mark Blakemore, Teri Sober, Butch Sober, Brian Goodman, Becky Sebastian, Danny Sebastian and Sharie Scott.

Ruth Carter, assisted by Lola Hughes, both WSI, completed a class in beginner swimming and in swimmer class. Those completing their beginner class were Todd Clement, Debbie Black, Alan McCrea, Aaron Anderwald, Misty Neef, Jana Walton, Stan Organ, Jackie McAndrews and Teresa Glover.

Those receiving their swimmer cards were: Mark Cufal, Kirk Cotham, Jane Spotts and Tony Hardin.

The WSI will complete their classes Friday and parents and friends are invited to come to the pool and watch them display their skills.

Mrs. Oran Carter is in charge of the swim program at the City Pool with Barry George, WSI, in charge of the adult classes at night.

Mrs. Carter has been assisted by Mrs. Ralph Esson and Jerry G. Davis. George has been helped by Mrs. Lois Dittmeyer and Mrs. Jack Hilton.

Classes will begin Monday at the City Pool for the last session. Instructors at the City Pool will be Paula Homer, Mrs. Betty Bailey and Mrs. Carter. There are some places in the 9 to 10 a.m. beginner classes and a few places in the junior and senior class taught by Mrs. Bailey.

Women of 1973

Perils of Pauline (alias Helen) at Watergate

By HELEN HENNESSY
NEA Women's Editor

WASHINGTON — (NEA) — As a colleague and I buckled ourselves in for our first class flight from New York to D.C., we heard the stewardess tell a gentleman up front that drinks were \$1.50 each. That startled us into sobriety, for the trip.

When we told the cab driver that our destination was Watergate, the reply was a snicker. But it could have been worse. Someone who was recently in our nation's capital said that some drivers were offering to pass by Watergate for one dollar over the fare to a destination. At least we couldn't be charged extra when we were staying at the Watergate Hotel, not passing by.

At a small dinner party on the night before the "Women of the Year" awards, Tony Randall sat at my left. Playing "Felix" to the hilt he took hold of my arm and peremptorily said, "Please put out your cigarette."

Unnerved at being grabbed, I simply said, "No, I will not," and changed my seat.

Mrs. Shotwell told of the annual reports of the chapter to the National Red Cross.

Speaking of bugs, a plastic souvenir of this design is currently a hot item at the newstand in Washington's Watergate Hotel.

hasty reaction but couldn't go back on it. After all it was ladies' night wasn't it? And the evening went smoothly regardless of my risen hackles.

When we got "home" to Watergate, I thought, "Well worse things have happened here." And went to sleep. That was Pauline's Peril Number 1.

Two of us decided to take a cab to Alexandria to have lunch on Le Bateau—a cruise down the Potomac. Well the boat—or Le Bateau—we learned doesn't budge from its mooring on Mondays. So on to Georgetown for lunch and look-see in the shops—which may still cost me \$85 for a wall sculpture I haven't torn myself away from yet. Peril Number 2.

When buying the newspaper that final morning, the owner of the stationers at Watergate said, "You must have this, too," placing a squishy object in my hand. It was a rubbery, plastic black-widow type spider. "It's the Watergate Bug," he said.

It was time for Pauline to leave our nation's capital. (NEWSPAPER ENTERPRISE #658.)

The Almanac

By United Press International
Today is Sunday, July 15, the 196th day of 1973 with 169 to follow.

The moon is in its full phase.

The morning stars are Mars, Jupiter and Saturn.

The evening stars are Mercury and Venus.

Those born on this date are under the sign of Cancer.

Dutch painter Rembrandt was born July 15, 1606.

On this day in history:
In 1912, the United States, led by all-around athlete Jim Thorpe, won the Olympic Games in Stockholm, Sweden.

In 1945, Italy declared war on its former Axis partner, Japan.

In 1964, Arizona Sen. Barry Goldwater was nominated as the Republican presidential candidate. He was soundly beaten in November by Lyndon Johnson.

In 1971, President Richard Nixon disclosed plans to make an unprecedented visit to Communist China. He made the weeklong visit in February, 1972.

A thought for the day:
American writer Mark Twain said, "Truth is the most valuable thing we have. Let's economize it."

Our agents plan business insurance as if they owned your business.

Area Girl Scouts Attend Camp Quivira

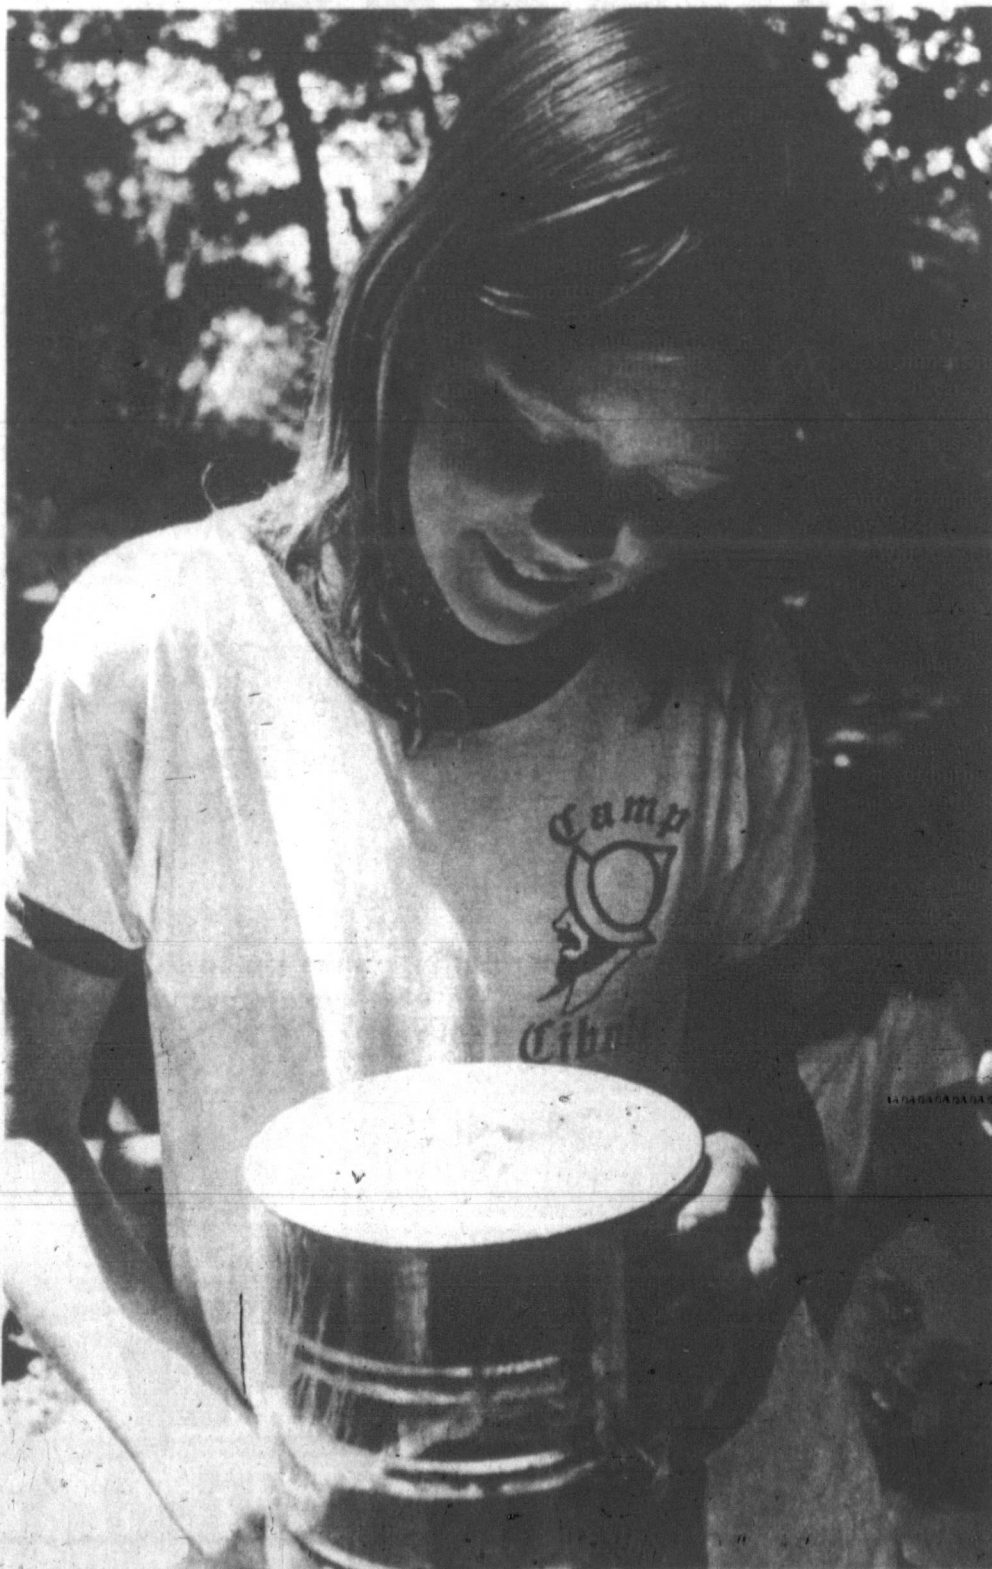

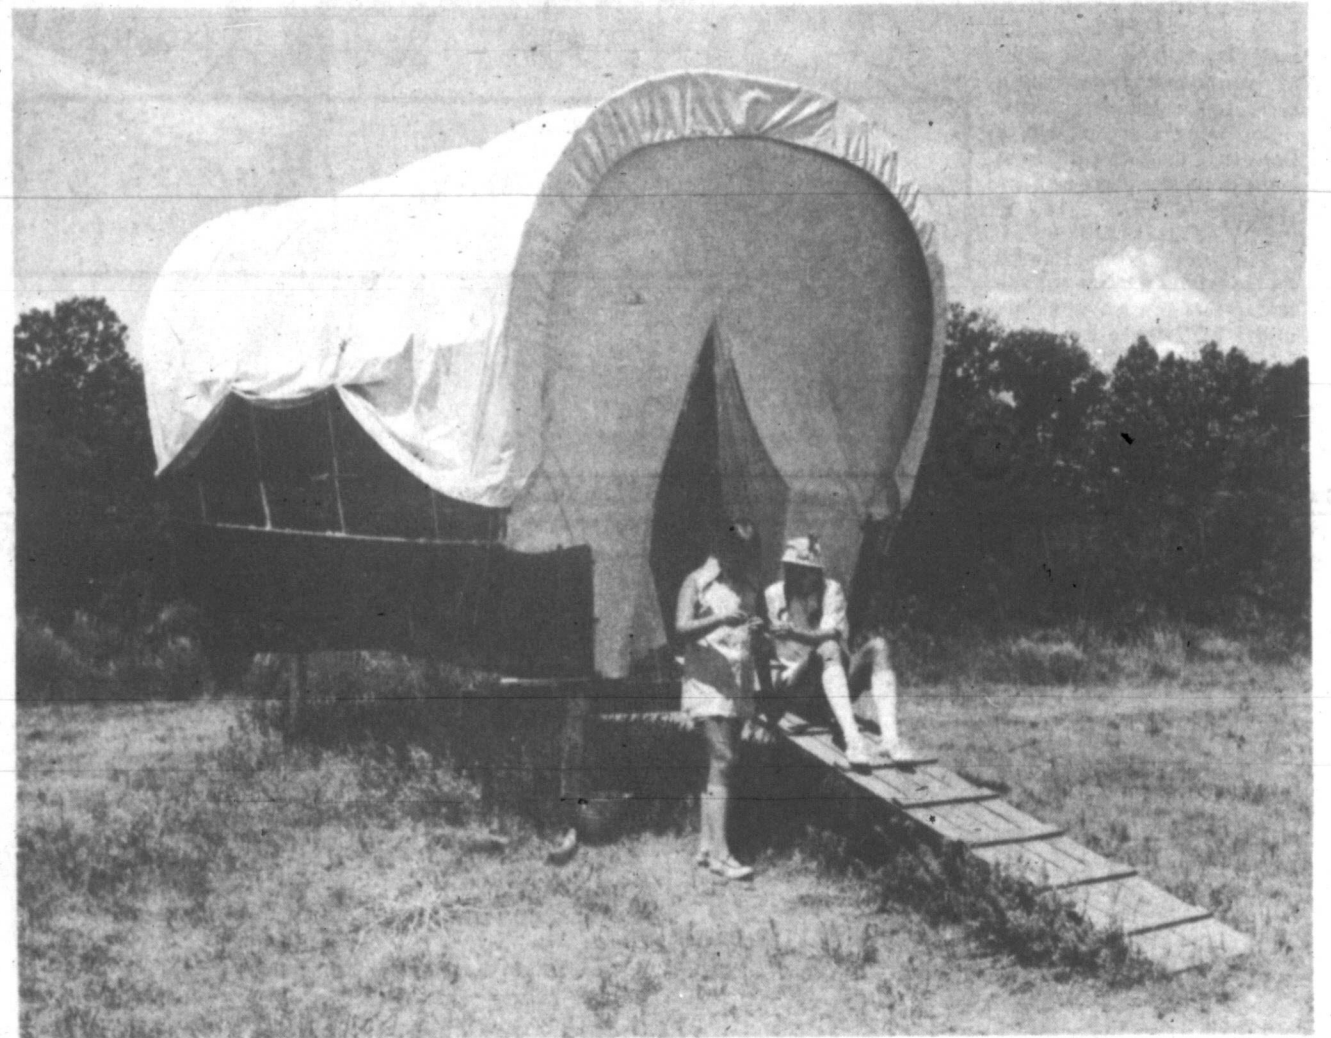

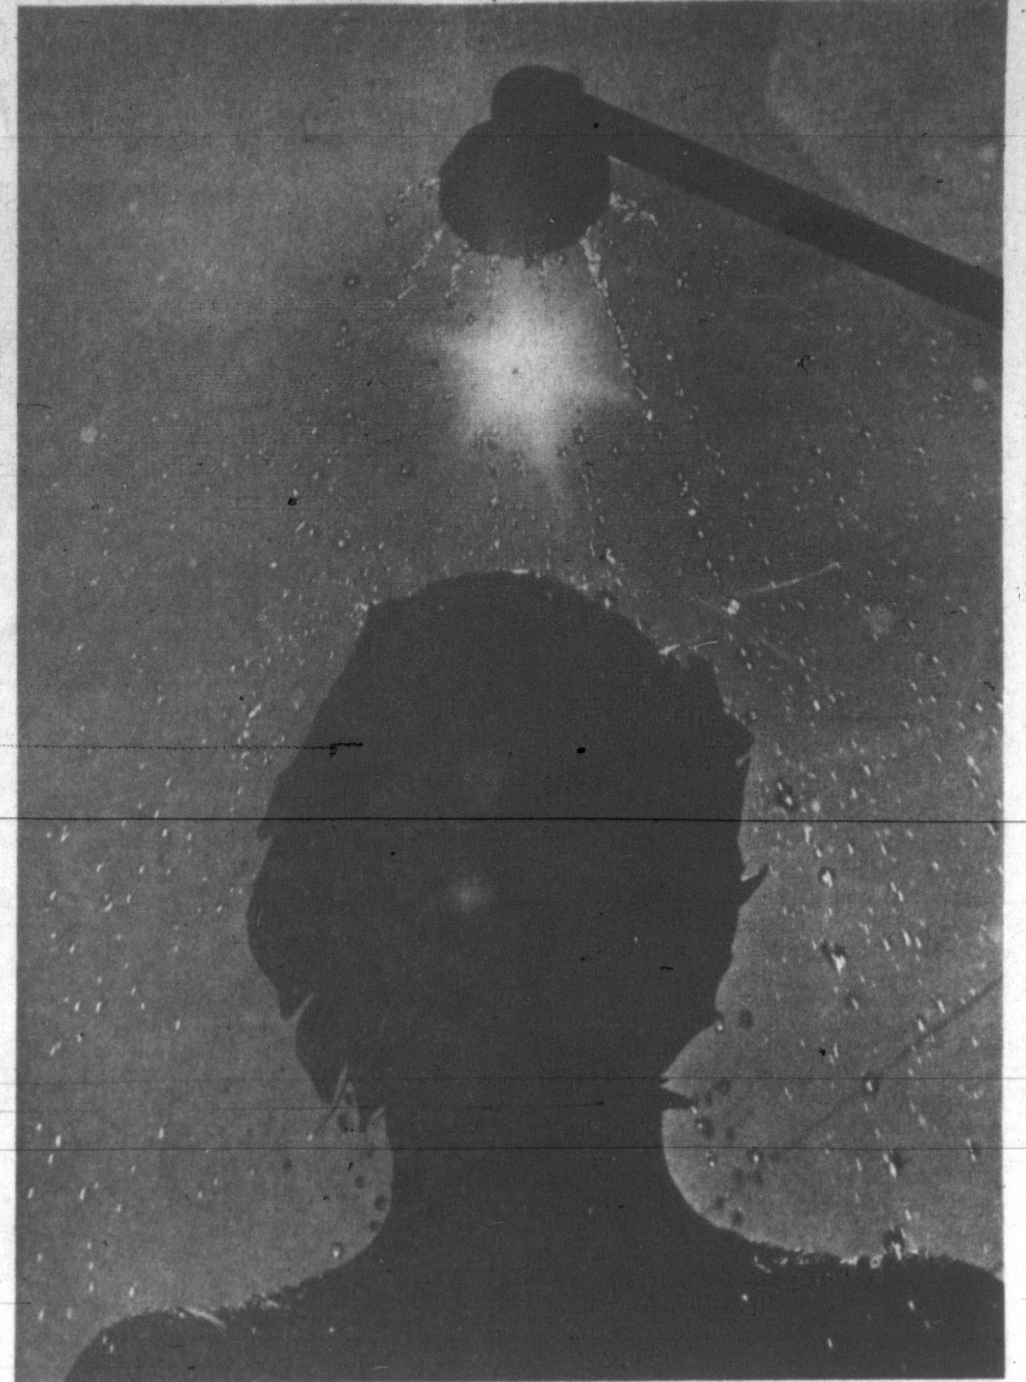

Sleeping in platform tents, tents and wagons, 102 girl scouts gathered at Camp Quivira near Clarendon to have two weeks of outdoor camping and fun.

Getting up before 7 a.m. each day, the Girl Scouts, ranging in age from 8 to 15, could participate in swimming lessons, junior lifesaving, senior lifesaving, hiking, archery, arts and crafts, loom weaving, soap and candle making, horse riding, camping, ice cream making and various other activities.

Maintaining a ratio of one leader to every eight girls, the two-week camp cost \$25 per week per camper.

Much of the work at the camp is donated, as evidenced by Mrs. Ted Thompson, a Licensed Practical Nurse from Clinton, who is donating her time to bandage up the nicks, cuts, scrapes, mosquito bites and any other ailments common to camping among the girls.

Starting July 9, the camp last two weeks.

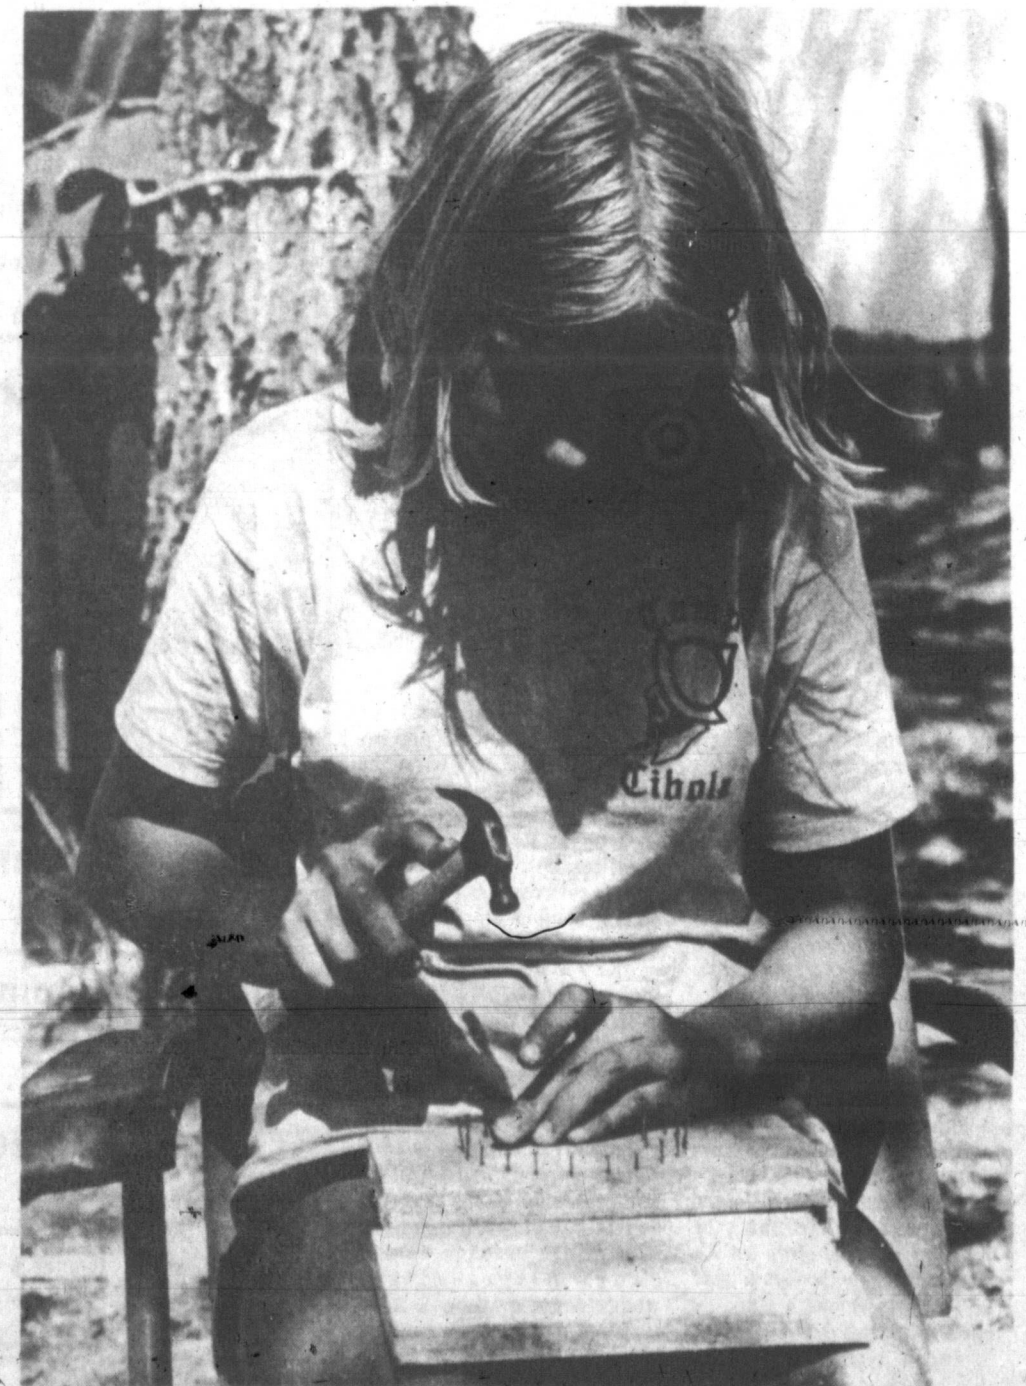

(Counterclockwise from top Left) **KELLE STAUS**, 11, daughter of Mr. and Mrs. Jim Staus of 701 Lowry stands at the top of the water slide before she begins to slide into the swimming pool.

CHARLA BATES, 10, daughter of June Luster of 1004 Prairie Drive carries the ice cream mix to one of the holes where they are making hay hole ice cream.

TERESA KIRK, 13, daughter of Mrs. Betty Kirk of 734 E. Malone pounds nails into the boards for the nail string picture designs.

UNIT LEADER Vanesa White of Borger helps Darla Campbell, 11, also of Borger, as they sit in the front of their wagon home for the week.

MELINDA COLLINSWORTH, 12, daughter of Mr. and Mrs. Ralph B. Collinsworth of 112 N. Sumner is silhouetted against the morning sun as she takes a shower prior to entering the pool for swimming lessons.

Vanderburg-Johnson Vows Said Saturday In Dallas

Miss Jana Denese Vanderburg became the bride of Joey Daniel Johnson in the First Baptist Church, Dallas, Saturday evening July 14. Rev. Joe D. Johnson, father of the bridegroom, officiated for the ceremony.

Mrs. W. F. Vanderburg, Dallas and the late Rev. W. F. Vanderburg, are parents of the bride. She is the granddaughter of the late Mr. and Mrs. Ben Barrett, pioneer residents of Pampa. Rev. and Mrs. Joe D. Johnson of Dallas, are parents of the bridegroom.

THE BRIDE

The bride was given in marriage by her brother-in-law, Bill Walters. She was attired in a formal gown of candlelight organza. Her veil of bridal illusion was floor-length and for something old, she wore her grandmother Barrett's gold wedding band.

ATTENDANTS

Mrs. Bill Cottle, Houston, was matron of honor. Bridesmaids were Kathy Johnson, sister of the bridegroom, Dinah McGuire, Debbie Franklin, and Lisa Johnson, niece of the bride. Beth Johnson was flower girl and Douglas Christy served as ring bearer.

Best man was Steven Keierleber and groomsmen were Ronnie Martin, Jerome Smith, Mark Toulouse, and Guy White.

RECEPTION

A reception was held in Coleman Hall. Judy Johnson, cousin of the bridegroom, registered guests. The bride's sisters, Mrs. Debbie Walters and Mrs. Paula Johnson, presided at the bride's table. Malanie Fox and Brenda Toon presided at the bridegroom's table. The bride's chosen colors of green and yellow were carried out in table decorations.

Following a wedding trip to Galveston, the couple will be at home in Dallas, where both are employed.

AFFILIATIONS

The bride attended Howard Payne Baptist College and the bridegroom is a May graduate of HPBC, where he was a member of Alpha Phi Omega.

Children's Summer Shoes

COLLEGE STATION — Barefoot children — and kids in lightweight play shoes — indicate arrival of summer.

"Many kicked off their school shoes at the first sign of warm weather," notes Marilyn Brown, consumer education — clothing and textiles specialist, Texas Agricultural Extension Service, Texas A&M University System.

Parents shouldn't be alarmed if a child chooses to go shoeless — there's nothing wrong with going barefoot, she continued.

"In fact, walking without shoes allows the toes to extend and grip the ground.

"It's an excellent foot exercise on soft grass, sand or carpet — where there's no danger of stepping on broken glass, nails, pins or sharp stones."

Turning to footwear, the specialist cited sneakers as a popular type of lightweight plays shoes. "They're softer and more elastic than leather.

"Actually, sneakers may be one of the best shoes available for healthy feet. A healthy foot doesn't require support," Miss Brown explained.

"In addition, footwear flexibility allows foot muscles freedom to develop."

However, if the child spends a lot of time playing on cement playgrounds and sidewalks, choose a thick-soled basketball or professional-type tennis shoe.

"Thick, resilient soles help young feet take the pounding that hard surfaces 'dish out.'"

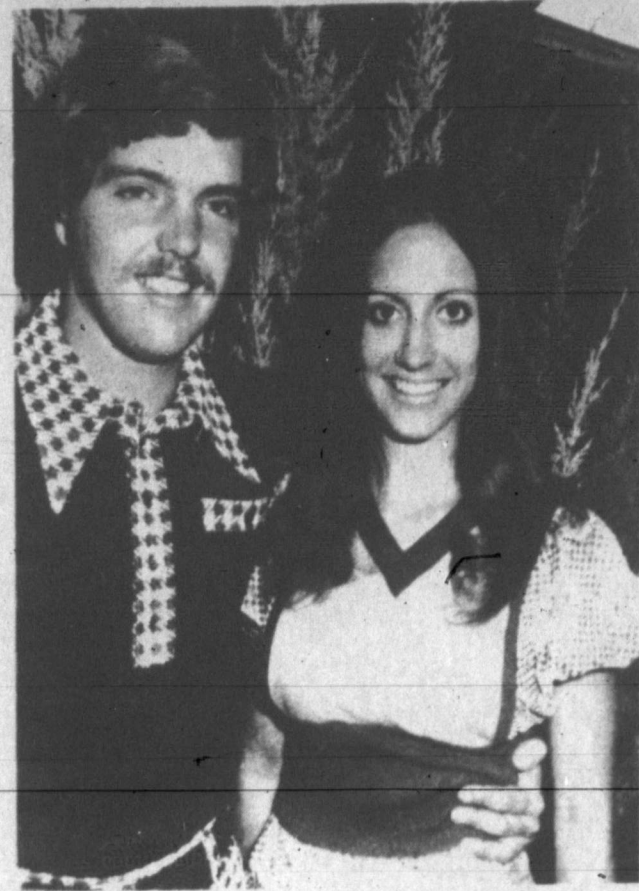

On the other hand, rubber soles don't let the feet "breathe" — and fungi that cause athlete's foot thrive in warm, dark, damp shoes.

"To help reduce the chances of this foot ailment, provide clean, absorbent cotton socks to wear with sneakers.

"Also, rubber soles puncture easier than leather ones," the specialist added.

Fiji hotel
NEW YORK (UPI) — A new 250-room hotel, the Fiji Inter-Continental Island Inn, will be built on Momi Bay, Fiji, Paul C. Sheeline, president of Intercontinental Hotels Corp., announced.

To Be Married

Mr. and Mrs. William Bryan Layne of McLean are announcing the engagement of their daughter, Beverly Kay, to John Michael Haynes. The prospective bridegroom is the son of Mr. and Mrs. John Morse Haynes also of McLean. A garden wedding is being planned for Aug. 3, at the home of Mrs. Gladys Smith, 717 North Grove. The bride-elect is a 1973 graduate of McLean High School, where she was an honor student. She plans to attend Texas Tech University in the fall. Her fiancé is a 1969 graduate of MHS and received a BA degree in journalism from TT in May. He was on the dean's list every semester.

ROBBIN OTTO-JIMMIE HENIN

Lamar Dull Gospel Assembly Church will be the scene of the Aug. 3 wedding of Miss Robbin Anne Otto and Jimmie N. Henin. Making the announcement are Mr. and Mrs. Richard R. Otto, Lafayette, La., parents of the bride-elect. Mr. and Mrs. Neal E. Henin, 1316 E. Francis, are parents of the bridegroom-to-be. Miss Otto is a graduate of Comeaux High School, Lafayette, where she was a member of the speech and drama club, chorus, French club, and the Recreation Association. The prospective bridegroom is a graduate of Cushing High School and a recent graduate of Central State University, Edmond, Okla., with a BA degree in business. He was a member of the society for the Advancement of Management, the American Marketing Association and the honor society. He served two years with the US Army.

PLANNING FESTIVAL — It's easy to overlook the hot lazy days of summer when your hands are busy and your mind is filled with thoughts of fall and the Seventh Annual Fine Arts Festival and Crafts Fair, scheduled for Oct. 13 in the Heritage Room of the M. K. Brown Auditorium. Ruth Nienstiel is shown weaving a decorative basket for the event.

(Photo by Terry Hanna)

Burglars Hold 'Open House'

Some doors and windows invite burglars to "open house."

"Home burglaries are increasing as part of the general increase in the nation's crime rate," Patricia A. Bradshaw, housing and home furnishings specialist, Texas Agricultural Extension Service, Texas A&M University System, noted this week.

"Suburbs are being hit hard, and the more affluent naturally take the brunt."

Tough door locks are one "key" to protection, the specialists said.

"A dead bolt lock is the very minimum protection for the home.

"Dead bolt locks often snap into a locked position automatically when the door is closed. They shouldn't require double locking from the outside.

"These locks can't be forced open readily and can't be jimmed or pried open, but it's possible to saw through a dead bolt unless it has a built-in hardened-steel rod.

"Segal-type locks have two

dead bolts that move vertically into metal hasps — they are far superior to the standard snap lock or even the dead bolt lock," Miss Bradshaw explained.

She also cited chain locks for providing good protection.

"Some chain locks are key operated — a key from the outside releases the chain. These are handy for those who lock up as they leave and for families with members who wish to retire and lock up before arrival home of other members who can use a key.

"Key-operated cylinder locks can be picked by an expert, but good ones from \$10-\$50 offer more security. Check to see if it's possible to fit a new cylinder into the present lock."

For windows, the specialist recommended key-lock window latches "which offer the best protection — providing the key is out of reach to anyone who might break a window pane. Also good are wedgelocks, as they're more resistant than switchlocks," she concluded.

Planning August Weddings

Miss Rita Jeanine Devoll and Ray Edward Hughes will wed Aug. 3 in the Church of God, Pampa. Her parents, Mr. and Mrs. L.D. Devoll, 1308 E. Frederic, are making the announcement. The prospective bridegroom is the son of Mr. and Mrs. B.E. Cliff of Reynon, Okla. The bride-elect will graduate from Pampa High School in December '73, and the bridegroom is a graduate of Reynon High School.

Nuptial vows will be solemnized Aug. 11 at 7 p.m. in the First Assembly of God Church for Miss Jana Sue Holdaway and Samuel Lee Parks of Oklahoma City. Making the announcement are her parents, Mr. and Mrs. J.E. Holdaway, 2113 Coffee. Mr. and Mrs. Clarence Upton, 843 Murphy, are the parents of the bridegroom - to-be. The bride-elect is a 1973 Pampa High School graduate and is presently employed by Duckwall's. Her fiancé is a 1972 graduate of PHS and is attending United Electronic School in Oklahoma City. He is currently employed by IGA Stores. Friends of the couple are invited to the wedding.

Knife Uses And Misuses

Kitchen knives often perform deeds they weren't designed to do, Miss Jimmie Lou Wainscott, county Extension agent, pointed out.

For example, sometimes they remove staples, open cans or pry up lids. Such misuses frequently result in injuries.

Likewise, using the wrong knife for a task can lead to injuries.

Each piece of kitchen cutlery was designed for some specific job — and should be used only for that task.

Utilize paring knives for peeling, scraping and various small tasks.

When slicing, dicing and coring vegetables — or trimming and scoring some meats — use a utility or trimmer knife.

A hefty butcher knife should be capable of dealing with stubborn joints or other hard-to-cut objects.

Carving knives are ideal for

cutting hot meats and poultry.

Many common knife injuries stem from slips. Avoid slips by gripping the handle firmly and cut away from your hand or thumb. Above all, concentrate — inattention invites trouble.

Since sharp knives are less likely to slip, keep all cutlery sharp. A dull knife requires extra pressure — and when force overcomes resistance, the blade moves suddenly and unexpectedly.

As another precaution, stand or sit in one location when using a knife — don't move around the kitchen with knife in hand.

Common sense in using these kitchen utensils is another important defense against accidents, the agent concluded.

Runway reinforcement.

LONDON (UPI) — Two million pounds (\$5 million) is being spent to strengthen London Airport's No. 1 runway to stand up to jumbo jets.

BPW Club To Attend "Texas" Performance

Pampa Business and Professional Women's Club held its regular business meeting Tuesday evening in the City Club Room. The meeting was called to order by Mrs. Gertrude Stall, who read the Collect. Fourteen members and one guest, Mrs. Corda Dennis, Mangum, Okla., were present.

Mrs. Clara Lee Rhodes reported 76 tickets have been sold for the annual bus trip sponsored by the Club to attend the performance of "Texas" on Friday, July 20.

All members were urged to

attend a district planning meeting called by Mrs. Shirley Dobbs, District 9 Director, to be held on Sunday, July 15, at 12:30 noon in the Colonial Cafeteria in Amarillo.

Old Settlers OCEAN SPRINGS, Miss. (UPI) — The first permanent white settlement in the mid-South was at or near the present site of Ocean Springs. Established by France in 1669, the settlement was the base for early exploration of the Louisiana Territory by the French.

DEADLINE FOR WEDDINGS — ENGAGEMENTS — Due to the number of summer weddings, the following deadlines and procedure on wedding stories is being announced. For a wedding story to appear in a Sunday edition, the information and picture must be turned in to the women's editor by 5 p.m. on the Monday BEFORE the wedding. All wedding stories submitted after that time will appear during the week. Engagement announcements must be submitted by 12 noon Wednesday to appear in Sunday's edition.

Guest Speakers Highlight ABWA Installation Meeting

The American Business Women's Association met at the Lamplighter Cafe, Tuesday, July 10 at 8:30 p.m. with Mrs. Danny Malone, president, presiding.

Mrs. Wallace Grimsley, engineer with Marie Foundations told of the history of the factory. The first factory was built in California and later plants in McLean, Pampa, and Reynosa, Old Mexico. She spent two years in Reynosa getting the factory in production there.

The factory in Pampa has 400 to 600 employees according to the demand of business, and is a great boon to the economy of the city.

She concluded, "Marie Foundations offers good working hours, a reasonable wage for those willing to produce, insurance, vacation time, and retirement for the working woman."

The vocational speech was given by Mrs. Ken Plotner who has spent 25 years of service with the Dunlap Company. She is a buyer for the ready to wear department and goes to market five times a year. She is manager of sportswear and the junior department in the Pampa store.

Mrs. Plotner explained some of the reasons for the increase in prices on ready to wear apparel is there has not been an increase in the number of mills in the United States since 1934, and the garment factories are unionized.

"There is a shortage of material for piece goods, and the clothing stores are not realizing the profit that the customer assumes due to the fact of the exorbitant prices the retailer must pay for the merchandise," she stated.

Mrs. E.E. Willis gave the

reading of the minutes.

A decision was made by the chapter to have a booth at the Flea Market in Coronado Shopping Center.

New officers were elected and installed to serve on the Executive Board for the 1973-74 year. Mrs. Homer McNeil, president; Mrs. Fred Glick, vice - president; Miss Betty Mounce, recording secretary; Mrs. James Culpepper, corresponding secretary; and Mrs. Danny Malone, treasurer.

Mrs. Norman Dulaney's name was drawn from the Rocket Fund.

Guest of the evening was Miss Nancy Bartholdi from Gary, Indiana, cousin of Miss Betty Mounce.

Members attending were Mrs. Danny Malone, James Quarry, David McNair, Don Elledge, G.F. Richmond, Fred Glick, Tohn T. King, Homer

McNeil, Vernon Graham, James Culpepper, Eugene Franklin, Ken Plotner, C.A. Herd, E.E. Willis, and Miss Betty Mounce.

Arctic surveyor NEW YORK (UPI) — Man is pushing his search for surely needed oil reserves into the ice-invested Arctic Ocean. Now joining the exploration effort is a new type of specially designed seismic surveying vessel adapted for Arctic operations by Seiscom Delta, Inc., of Houston, Tex.

The 180-foot craft has a reinforced hull, satellite-based navigation system and other equipment for operating under the foulest weather conditions. Value of its surveying gear alone is more than \$1,250,000, say officials of Seiscom.

It's our gigantic Coat Caravan!

Styles and prices for everyone. Limited time only.

A terrific assortment of fall and winter coats for juniors, women and half sizes. Favorite fabrics in newest silhouettes. Make your selection now and put it in lay-away. You'll be glad you did when cold weather arrives.

Post that false fanny warning 'just before'

By Abigail Van Buren

© 1973 by Chicago Tribune-N. Y. News Synd., Inc.

DEAR ABBY: A woman wrote and asked you if you knew where she could buy a false fanny and you replied, "Send me your name and address and a stamped, addressed envelope and I will let you know."

Well, I wasn't the person who wrote about it, but I sent my name and address and a stamped envelope making the same request, and you told me where I could order one.

Well, it came and I want to thank you, Abby. My clothes look a lot better on me, but here is my problem: Should I tell a guy (not as soon as I meet him, but after we get to know each other better) that I have a false fanny? I don't think it's fair to wear something fake without being honest about it. I mean, one day we might get to the point where he'll find out himself.

How should I handle this?

FALSE FANNY

DEAR FALSE: Don't wait until you get to that point. Just before you think he might find out himself, give him a little warning.

DEAR ABBY: My husband and I are second-time-arounders. I have never seen such stability and tranquility in a marriage.

There is only one problem: I am bored stiff! When we dated, he took me out to dinner and to movies, and we had a great time, but now all he thinks of is work.

I carry his dinner to his office so he can work straight thru. He eats in five minutes, thanks me, and goes back to work. When he comes home, it's bedtime, and he is too tired for anything but sleep.

He works all weekend. We NEVER go out for dinner or to a movie anymore. He says it's too expensive, which is ridiculous because we can certainly afford it.

His health is fine. [He had the company doctor examine him, that way he didn't have to pay the bill.]

I am young and pretty and full of life, but I am lonely. He says if I want to see a movie I should go without him, but it's no fun going alone.

I can just see myself ten years from now getting a divorce. Can you help me?

FRUSTRATED

DEAR FRUSTRATED: Fill in that communication gap with some straight talk. He's using his "work" as an excuse to isolate himself. Insist on counseling. And if he ducks that, you go alone. Your frustrations could lead to something worse than boredom.

DEAR ABBY: Over the years, my sister, who lives in another state, has been writing me letters that are filled with nothing but her illnesses, the deaths of her friends (whom I don't even know) and any gossip about the family that is bad. She even rehashes the world situation, dwelling on the doom and gloom. After reading one of her letters I am so depressed I just sit and cry. I have written to her, asking her to please quit sending me such depressing letters, but it hasn't helped.

I don't want to sever our relationship completely, but I don't know how else to deal with her. I never write depressing letters to anyone. I am a happy-go-lucky person by nature, but could spread plenty of gloom if I wanted to.

I have tried not answering her letters, but she doesn't need a letter to answer. She writes once a week regardless. Please tell me what to do.

ANOTHER DAY RUINED

DEAR RUINED: If you want to let your sister know you mean business, return her letters UNOPENED. She may be hurt and shocked, but I promise you, she'll not write many more depressing letters after that.

DEAR ABBY: A reader thought it would look "ridiculous" for a 47-year-old father to be best man at his son's wedding when the bride had selected a 21-year-old girl to be her maid of honor.

I wonder what that reader would have thought of this situation: When I was 14 years old, I was asked to be the godmother for my new-born cousin. The godfather was my 70-year-old grandfather.

DAVID'S GODMOTHER

CONFIDENTIAL TO THOSE WHO WROTE TO THE EUTHANASIA COUNCIL FOR COPIES OF "A LIVING WILL": If you have not heard from them, please, please be patient. They have been inundated with requests for copies. Thirty thousand additional wills were printed, which were gone in a few days. In order to handle the mail, extra help was called in. Finally, they had to move to larger headquarters. An estimated 100,000 wills have been sent out to date.

Bedding Plants For Instant Color

COLLEGE STATION — Bedding plants can bring instant color to your summer landscape," says Everett Janne, landscape horticulturist for the Texas Agricultural Extension Service.

Among the better annuals that are easily transplanted and provide real satisfaction are the ever-popular petunia, marigolds in all sizes, the coleus with its colorful foliage and the sun-loving celosia.

The Texas A&M University specialist also suggests the dwarf dahlia and dwarf phlox, the shade-loving impatiens, the fibrous-rooted begonia and the colorful ageratum. One of the finest for hot, unprotected areas is the Madagascar periwinkle which seems to be at its best during the July and August heat, points out Janne.

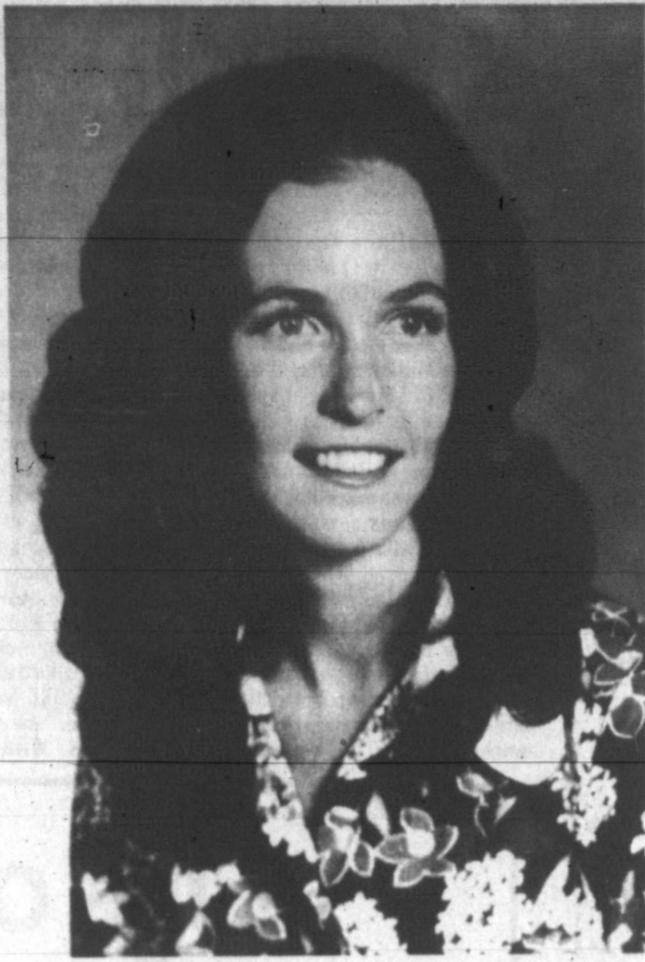

"These plants may be set out in June or anytime through summer, allowing you to catch up on the planting you should have done this spring, or better

yet, to augment your earlier planting." Select plants that are short, stocky, and compact with a good green foliage color. Flower buds should show color if you want to plant for immediate effect.

"Plant them close together for immediate effect, but allow elbow room if you want them to last for a while," advises the horticulturist. "Unless you need flowers the same day, select plants that are just coming into flower rather than those in full bloom."

Since large bedding plants are generally expensive, try to make the greatest impact with the fewest plants, suggests Janne. Saturate a few strategic garden locations with color. Use plants in containers on the patio or balcony, or concentrate them near entry ways or along the inside face of a curved walkway. Planter boxes under a window with a garden view are always effective when planted to annuals.

Betrothal Listed

Wedding vows will be solemnized in private ceremony Aug. 4 in First Presbyterian Church of Pampa by Miss Vanessa Gail Arthur and Mark Buzzard. Making the announcement are her parents, Mr. and Mrs. William L. Arthur, 604 E. 17th, Pampa. Parents of the prospective bridegroom are Mr. and Mrs. Ross Buzzard, 2429 Christine. The bride-elect is a 1971 graduate of Pampa High School, completed two years at the University of Tulsa and will continue her education at Texas Tech. Her fiancé is a 1970 PHS graduate and received a BS degree from the University of Oklahoma in 1973. He plans to enter Texas Tech Law School in the fall.

TOPS TX-41

TOPS TX-41 recently honored all past yearly queens and KOPS at their tenth anniversary dinner. Past queens in attendance were Mildred Knight, 1968 Queen; Juanita Stump, 1970 Queen; Norma White 1971 Queen and Ellen Hamlin, 1972 Queen.

Special guest speaker for the event was Mona Spencer, Area Supervisor.

The Club held an auction and salad supper to conclude the latest six-weeks contest June 25. Linda Bumgarner was honored as June Queen.

Plans are now being made for a fun night to be held Sept. 6 to include seventeen area TOPS clubs.

Glass in the bath
NEW YORK (UPI) — Building contractors, remodelers and homeowners bought 1,280,000 tub-showers and shower stalls made of glass fiber reinforced plastic in 1972, according to a trade source.

This was about 33 per cent of the total sales of bathtubs, showers and shower units, said Guy O. Mabry, general manager of the Home Building Products Division of Owens-Corning Fiberglas Corp.

FASHION NOTES

Brought To You

by Doug Coon
BEHRMAN'S

Women who thought they detected the demise of the pant suit will need to revise their thinking ... They're coming on bigger and better than before.

Many suede and leather coats are cut short ... in order to become suitable companions to pants ... or wear them for an even more dramatic turn ... over understated evening clothes.

By the way, if your suede happens to crack ... don't worry ... Rub the surface often with a dry turkish towel ... Smart girls do this even before any cracking appears.

A knit suit is an indispensable part of a woman's wardrobe ... It carries her from day to night ... place to place ... season to season ... always emerging with an impeccably well dressed look.

Remember, fashion is your best SOCIAL security.

You're always welcome at Behrman's. Come in, browse leisurely. Our friendly staff is ready to show you the very latest in fashions.

Mad, Mod Mother Hubbard

Mod Mother Hubbard's cupboard is un-bare-able today because she buys convenience foods and "impulse" items, dines away from home — and says she's mad about the cost.

"Homemakers may have to do more food preparation themselves and spend more time doing it to reduce the cost of food," Judy Grubbs said this week.

The foods and nutrition specialist, Texas Agricultural Extension Service, Texas A&M University System, added, "Sometimes we have to give a little to get a lot."

She cited five ways of "giving a little time and effort" to help cut food costs.

—Eat at home as much as possible.

"Cost of food at home hasn't risen nearly as high as cost of food away from home. When the family cannot eat at home, often they can take a sack lunch, which can mean more nutritious and economical lunches.

"Also, coffee breaks costs dip with food taken from home. Fruit or fruit juices and some of the breads and cereals offer excellent choices. By saving a few cents for each person on each coffee break, the whole family saves several dollars a week."

—Use less meat.

"Adults need two servings of about three ounces of meat a

day. In order that they not feel hungry, they can stretch the meat with pastas, rice and potatoes."

—Use more of the breads and cereals — and less sugar-sweetened foods.

—Eat food necessary for health and to maintain weight.

"Eating more food than is necessary for our own energy output — and feeding excess weight — is a waste of money."

—Buy foods in season or the most economical form of the food available if it's out-of-season.

"If homemakers are unable to do more food preparation at home because of limited skill or time, they'll have to pay for this when they go to the market," the specialist concluded.

Summer Wedding Plans Revealed

Mr. and Mrs. F.W. Cobb, 623 N. Faulkner, are announcing the engagement of their daughter, Vickie Jo, to John Edward Maglaughlin, son of Mr. and Mrs. E.P. Maglaughlin, 2547 Duncan. The couple will exchange nuptial vows Aug. 17, at 7:30 p.m. in Central Baptist Church. The bride-elect graduate from Pampa High School in 1972 and completed the one-year Concentrated College Training for business course at West Texas State University. She is presently employed by Diamond Shamrock Corp. in Amarillo. Her fiance is also a 1972 graduate of PHS and is presently attending WTSU. He is employed by K-Mart Foods of Amarillo.

The engagement of Ila Faye Grayson and Phillip James Miller is being announced by her parents, Mr. and Mrs. David Grayson of White Deer. Parents of the bridegroom are Mr. and Mrs. Joe Miller, White Deer. The wedding is being planned for Aug. 17 in Sacred Heart Catholic Church of White Deer. The bride-elect is a 1971 graduate of White Deer High School, attended Southwestern State College in Weatherford, Okla., where she majored in medical records. Her fiance is also a 1971 graduate of WDHS, attended SSC and will be a junior at Oklahoma University, Norman, Okla., where he will major in medical technology.

Mrs. Aftergut-Is Rho Eta Hostess

Rho Eta Chapter of Beta Sigma Phi recently held its annual Salad Supper in the home of Mrs. Myron Aftergut. After a short business meeting, members exchanged Secret Sister gifts and new Secret Sisters were drawn for the coming year. One year Perfect Attendance awards were presented to Mmes. Joe Boedecker, Gary Clark, John Grooters, Jay Manning, Richard Morris, Lesley Stone and Herman Vinson. A three-year award went to Mrs. Randall Phillips and a five-year award to Mrs.

Tommy Hill. Mrs. Gary Clark and Mrs. Herman Vinson received the "Table of the Year" award for their table using the theme "Gingerbread Men." The table featured a handmade gingerbread house with gingerbread cookies for favors. Mrs. Randall Phillips and Mrs. John Grooters received the award for "Program of the Year" for the program "You and Your Audience" from the book "Conduct - Expression - Purpose." Historian, Mrs. Randall Phillips, presented the 1972-73

scrapbook using the international theme "Lead a Queenly Quest" to outgoing president, Mrs. Tommy Hill. It was announced that the book would soon be entered into State Competition in McAllen. The traditional gift of a coffee mug from each member was presented to Mrs. Gary Caldwell, moving to Greenville, S.C., Mrs. Carlos Nunez, moving to Miami, Fla., and Mrs. Lesley Stone, moving to Canyon. Those in attendance were Mmes. Myron Aftergut, Gene Barrett, Joe Boedecker, Gary

Clark, Randall Cross, Richard Dorman, Gene Drake, Jack Eddins, John Grooters, Terry Haralson, Tommy Hill, Richard Houseman, Jerry Jones, Jay Manning, Richard Morris, Randall Phillips, Herman Vinson, James Winkleblack and honorary member, Mrs. Georgia Mack. Cruise port MIAMI, Fla. (UPI) - The 14 cruise ships using the port of Miami as base of operations for Caribbean cruises make it the nation's most active cruise port, according to the port director's office.

There are from 60,000 to 80,000 species of flies in the world.

Mrs. Tidwell Presents Altrusa Club Program

The Altrusa Club of Pampa met at the Coronado Inn July 9 for their regular meeting, president, Mrs. C.L. Sullins, presided.

Mrs. M.Q. Wilson, chairman of the Altrusa Information committee, reminded members that the meeting July 23 will be a buffet dinner in Fellowship Hall of the First United Methodist Church, honoring special guests of the club.

Mrs. Bill Tidwell, program co-ordinator, used the international theme "Channel for Change" in the presentation of her program plans for the Altrusa year 1973-74.

Mrs. Tidwell, comparing the Altrusa Club to a "Ship in the Channel of Service," designated the four committee chairmen as

"shipmates," and each gave highlights of her proposed programs for the year.

Miss Verne Meador and Mrs. Bill Tidwell are planning to attend the International convention in Montreal, Canada July 22-26 as delegates from the Altrusa Club of Pampa. They have been asked to be a part of one of the convention workshops, in which they will present a short skit involving a project of the Pampa Club.

German doctors BONN (UPI) — There is a doctor for every 620 West German citizens, according to figures released by the Ministry of Public Health. The average age of doctors in the Republic is 50 to 60 years.

Our Weekly Column

by Louise Box

The biggest news in hair coloring is the "Natural Look". This has come about by shading and toning rather than by resorting to the old flat-color look. Your hairdresser no longer dyes the hair all one color - she shades it and thereby achieves the look of natural hair color, which is made up of many shades and tones. Discuss the new techniques with your hairdresser on your next trip to the beauty salon and let her show you a chart with today's new natural colors. And let her also tell you about the new methods of coloring in use today.

Communicating With Children

Poor communication is the cause of many misunderstandings between adults and children, emphasizes Miss Jimmie Lou Wainscott, county Extension agent. Just because a child doesn't respond immediately to something you've said, don't accuse him of ignoring orders. Often he or she hasn't heard — or comprehended — the directive. Many youth develop an ability to shut out conflicting or

undesirable noises. For example, they can get their lessons done despite a loud radio or record player. Therefore, parents and teachers should determine whether they've also been "tuned out." Adults wishing to improve a child's listening ability may utilize the following suggestions. Minimize misunderstandings — make sure conditions favor good communication.

—Touch the child with a friendly hand on the shoulder or arm.
—Gain his attention by speaking his name clearly and distinctly. Wait for the child to respond before continuing the conversation.

—Look him "in the eye" when speaking. If he's small, get on his eye level.

—Speak in a quiet voice. Children are a product of their experiences — if adults yell to gain attention, youngsters learn to do the same.

—Discuss mutual interests.
—Pay attention when the child talks.
—Follow up family trips, outings and activities with "give and take" conversations.

Children respond favorably when parents and other adults care enough to listen to them. This fosters self-respect, as well as respect for others.

Sharing an experience together is the surest way to strengthen a relationship. Later, there will be "good old times" and fond memories to talk about, the agent concluded.

Rho Eta Holds Summer Social

Rho Eta Chapter of Beta Sigma Phi recently held the first of its summer socials, a hamburger cookout, in the new home of Mr. and Mrs. Tommy Hill. After the cookout, outdoor games of yard darts and volleyball were enjoyed by all. It was announced that members, Mrs. Tommy Hill, outgoing president, Mrs. Randall Phillips, recording secretary, and Mrs. Gary Clark, treasurer, would be

attending the Texas Beta Sigma Phi State Convention in McAllen. Those in attendance were Mssrs. and Mmes. Myron Aftergut, Richard Dorman, Gene Drake, Jack Eddins, John Grooters, Tommy Hill, Jerry Jones, Jay Manning, Richard Morris, Randall Phillips, Herman Vinson, James Winkleblack, and Mrs. Randall Cross. Guests were Mr. and Mrs. Bob Fuller.

Your Horoscope

By Jeane Dixon

must balance community expectations of you with your actual resources.

Sagittarius [Nov. 22-Dec. 21]: Early incidents find you set for events that do not come about. Mind your own business; select company carefully.

Capricorn [Dec. 22-Jan. 19]: Be thorough conventional this Sunday. Plans are subject to change; leave some slack in your schedule.

Aquarius [Jan. 20-Feb. 18]: The urge to change things for the better is strong. If you overdo this, others will never learn to solve their own problems.

Pisces [Feb. 19-March 20]: Pushing for immediate answers provokes unexpected responses, perhaps negative. Let well enough alone, sticking to usual routines.

MONDAY, JULY 16

Your birthday today: Finds you stepping into an expansive career stage, beginning to make better use of skills, pulling away from old habits of depending on others. Great optimistic plans come easy. Your intuition comes on stronger than ever, can save many detours if you learn to listen. Today's natives tend to take care of themselves.

Aries [March 21-April 19]: Cultivate recent social contacts, make a search for possible career advancement—keep these activities separate.

Taurus [April 20-May 20]: In this relatively quiet environment your efforts count more; resist temptation to take the easy way.

Gemini [May 21-June 20]: Optimism rises; arrange financial details, redeem promises made to others. It's a good time for a financial transaction.

Cancer [June 21-July 22]: Joy in the fullness of a close

circle of friends is indicated, whatever the external situation may be.

Leo [July 23-Aug. 22]: Overt leadership isn't necessarily yours to exert. It's time for group-work, consultation, getting general agreement.

Virgo [Aug. 23-Sept. 22]: Relationships show their quality now—some are richer and more diverse than appeared lately.

Libra [Sept. 23-Oct. 22]: Now is time to publish or promote your view of what can be done to alleviate local conditions, persuade friends to cooperate.

Scorpio [Oct. 23-Nov. 21]: Claim whatever is owed to you, now, or seek clear understanding of when it will come in.

Sagittarius [Nov. 22-Dec. 21]: This can be a memorable upward-moving two-day episode in your life. "Luck" arrives, tends to compensate for imbalances.

Capricorn [Dec. 22-Jan. 19]: Pick up your share of the work, press career interests vigorously. Long-past connections are again available.

Aquarius [Jan. 20-Feb. 18]: With all the possible opportunity to advance yourself materially, your personal life is apt to be more pressing.

Pisces [Feb. 19-March 20]: Explore possibilities for confidential and special assistance; find out which people really decide those matters in which you are interested.

Grounds for vacationing

New York (UPI)—There are now 16,274 public and private campgrounds in the United States, according to the 1973 edition of Rand McNally's Campground & Trailer Park Guide. This compares with only 4,669 campgrounds which were available to Americans in 1960.

SUNDAY, JULY 15
Your birthday today: Promises a year of fulfillment in emotional and spiritual maturity and expanding material responsibility. Relationships are stimulated by your changing life style. Today's natives have personal charm, and are good at telling stories.

Aries [March 21-April 19]: Deal with grouchy moods gently; the people involved are more complex than they appear. Do not overreact.

Taurus [April 20-May 20]: Being personally serene may be difficult, but is well worth it. Attend your community's Sunday routines, then relax.

Gemini [May 21-June 20]: Social situations change abruptly; don't stir matters. Neither meddle in others' affairs nor let others mix into yours.

Cancer [June 21-July 22]: You can please nobody fully; begin with yourself. If a hobby palls, take a rest. By evening you have new incentive.

Leo [July 23-Aug. 22]: Accept differences of opinion calmly. If you're off the right track, make amends and start fresh.

Virgo [Aug. 23-Sept. 22]: Your constructive criticism is taken wrong—perhaps it is not so essential to pick things apart.

Libra [Sept. 23-Oct. 22]: Comes a gentle turning around of your life. Support the constructive side of any issue you are involved in resolving.

Scorpio [Oct. 23-Nov. 21]: Practicality outweighs all other considerations. You

Opening lead—♦10

By Oswald & James Jacoby
Here is a real gem of a hand played recently by John Solor of New York.

His two-club opening was artificial as was North's two-heart response. The final six-club contract was a good one, but chances looked slim indeed after West opened the 10 of diamonds.

John decided that West wasn't leading from the king, but it wouldn't do him any good to hold back dummy's queen so he played it. East produced the king and John won with the ace.

He cashed the ace and king of trumps. East dropped the six of spades.

John took his spade ace; led a club to dummy while East let go of a low diamond. Then he ruffed dummy's last spade; cashed his ace of hearts; led a heart to dummy's king and noted the fall of the 10 from West.

It was now time for some real thought. John came to the conclusion East had started with exactly eight red cards so that West had started with four of that color.

Hence, West was now holding just one red card which would be either the jack of hearts or a diamond. In that case there was no reason for John not to play a heart and finesse his nine.

If West produced the jack he would have to give John a ruff and discard for the same down one that would result if John rose with the queen.

John played the nine. When it held he cashed the queen and played a low diamond. West produced the nine.

East could not afford to overtake and West had to give John a ruff, discard and the slam.

FOSTER WHALEY
Agriculturally Speaking

By FOSTER WHALEY
The fourth Annual Landscape and Garden Clinic will be held in the Pioneer Natural Gas Building on Wed., July 18, starting at 10 a.m. and running through 3 p.m.

Dr. Robert Berry, plant disease specialist, Extension Service, Lubbock, Texas, will be present to identify plant disease problems with shrubs, lawns, or gardens. Dr. Bill Clymer, insect specialist, Extension Service, Amarillo, will be present to identify and recommend control methods for insects.

James Valentine, soil chemist, Lubbock, Extension Service, will advise Pampa homeowners on soil's problems. Everett E. Jamme, landscape specialist, Texas A&M University, College Station, will be present for general landscape problems.

Anyone having problems with plants or insects should bring a specimen of their plants or insects to the Pioneer Natural Gas large meeting room where you will be registered. There is a possibility some home visits can be made if time permits. There is no charge for this service. For more information contact the County Agents' Office.

GRASSHOPPERS
Over 2,000 acres of rangeland lying in the northeast part of

Gray and northwest part of Wheeler County has been blocked together for a Government spray program. The bids to aerial applicators are to be let shortly and spraying is to begin by the week's end.

Concentrated and undiluted Malathion will be used to spray this vast area where grasshoppers are reported to be in very heavy numbers. Some checks by Lubbock and Childress-based Plant Pest Control people show there are as many as 40 grasshoppers per square yard. Anyone wishing to join the program in that area should contact Charlie Gatlin whose phone number is 665-1591. The cost to the rancher is to be approximately thirty-five cents per acre.

If you have grasshoppers in town, use Malathion. Follow instructions on the label.

4-H CENTER FUND
Checks are still rolling in as well as contributions of wheat to help reach our \$4,500 goal for Gray County. We appreciate the fine response. We will soon publish the list of the fine people that have responded to this very worthy cause. Many towns people have mailed or dropped a check by our office. Should you want to help, make your check payable to the Gray County State 4-H Center Fund.

China Agriculture Suffering Drought

By CHARLES R. SMITH
UPI Senior Editor

HONG KONG (UPI)—A few weeks ago, Premier Chou En-lai slipped out of Peking and attended a meeting 200 miles to the south concerning China's problems with drought.

The meeting in Shihchiachuang was not widely publicized, and Chou's presence there was never announced. But diplomatic sources based in Peking said he was there.

They also said he apparently spoke "with some gravity" about the serious situation on the farm front in the light of threatened new "natural disasters" this year.

Chou's presence underscored the fact that China's agriculture, which was seriously affected by drought last year, still is in trouble.

4-H CLUB NEWS

By AUDETTE VAUGHN
Asst. County Extension Agent

Members of the Lefors 4-H Club modeled garments made for the dress revue when they hosted the Senior Citizen party in the Civic Center, July 5. Models were: Mollie Carlton, Elaine Webb, Sarah Stroud, Valerie Pangle, Peggy Coleman, Sally Youngblood, Kelly Dougal and Sandra Stroud.

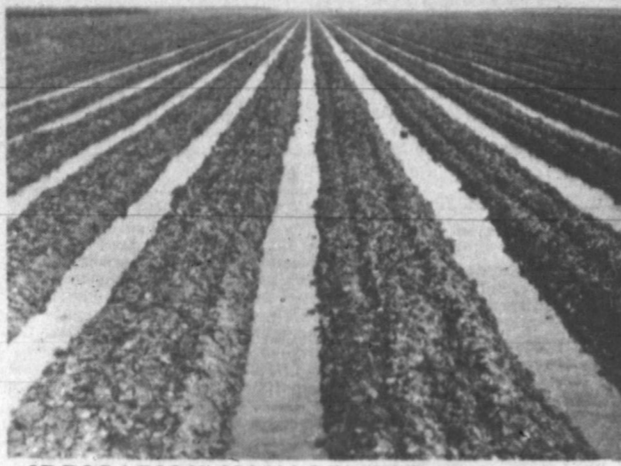

Twelve senior citizens attended: Carl Wall, C.J. McAnnich, Mrs. W.R. Combs, Mrs. Volna Odgin, Mr. and Mrs. Bill McAnnich, J.V. Gutherie, Pritchard, Mrs. Meredith, Earls, Bill Wall and Mrs. A.T. Cable.

A decorated Angelfood cake catered the serving table surrounded by party favors and picturesque rocks and recipe holders hand decorated by 4-H'ers. Games of 42 and dominoes were played.

A regular meeting was conducted following the social. The following 4-H members gave sewing demonstrations: Elaine Webb, "Working with Sheer Material;" Sandra Stroud, "Winding Bobbin;" Peggy Coleman, "Threading Machine;" Sarah Stroud, "How to Hold Ends When Sewing;" Sally Youngblood, "Finishing Seams — Clean Finished;" Valerie Pangle, "Parts of a Sewing Machine."

The following officers were elected: Mollie Carlton, president; Sally Youngblood, vice-president; Sandra Stroud, secretary-treasurer; Kelly Dougal, council delegate; Valerie Pangle, reporter; Peggy Coleman, refreshment chairman; Sarah Stroud, game chairman.

The girls are looking forward to the county dress revue, July 23 at 7:30 p.m. in the First Baptist Church Fellowship Hall, Pampa.

IRRIGATION MANAGEMENT — A properly designed and utilized row irrigation system can be expected to operate at 80 per cent efficiency, states Jim Roach, Soil Conservation Service spokesman here.

(Photo Courtesy USDA)

Livestock Export Facilities Expanded

AUSTIN — Agriculture Commissioner John C. White formally opened the Del Rio livestock export facilities July 10.

Other state officials and representatives of the Mexican government will also be present.

"The facilities at Del Rio and the one to be dedicated at Eagle Pass July 25 far exceed minimum standards set by Mexican veterinarians and the USDA," Commissioner White reported.

Built and operated by the Texas Department of Agriculture, the pens are on an eight-acre site west of Del Rio International Airport within the 12-mile limit established for trucks licensed for exporting livestock. There is a direct route to customs at Villa Acuna.

Several features have been incorporated in the facility for ease and safety in handling livestock. A hydraulic lift which can be lowered and raised to meet various levels of cattle trucks connects to a ramp from which livestock can be directed to necessary areas. The lift has a maximum capacity of 20,000 pounds. Operated by remote control, it was the first hydraulic lift installed in Texas for such purposes.

Marketing specialists with the TAP (Texas Agricultural Products) program of the Texas Department of Agriculture work with Mexican and Texas livestock men to expand the growing export program.

"Our TAP representatives have attended Mexican livestock expositions, with several sales directly related to contacts made there," Commissioner White stated. "With these new facilities in Del Rio, Eagle Pass, and Houston, the livestock export program should grow even more."

Trees Need Good Care

COLLEGE STATION — One of the most prized possessions of a homeowner is a healthy shade tree. But a tree needs special care if it is to remain beautiful and disease-free.

Trees are subject to various disease-causing organisms such as viruses, bacteria, fungi and nematodes, points out Dr. Walter Walla, plant pathologist for the Texas Agricultural Extension Service. Furthermore, trees are affected by drought, root system damage, nutrient deficiencies, misuse of pesticides and storm damage.

"Any of these factors can injure a tree, often seriously enough to kill it," says Walla. "Drought damage is especially a common problem. And by the time a homeowner can tell that a tree is suffering from water shortage, it's usually too late."

Construction injury is a common ailment around and near new homes, buildings or paved areas. Such injury is first indicated by a dieback of twigs and too early a shedding of leaves in late summer and early fall.

Chlorosis is another common symptom in trees and often is the result of insufficient iron. Light green or yellow leaves signal this condition. Iron chelate or iron sulfate can be applied as a spray on smaller trees or like a fertilizer on larger ones to correct iron deficiency.

Walla cautions homeowners to use special care with weed killers and other pesticides. "Indiscriminate use of such materials in the general area where trees are growing can be costly. Trees have a vast network of feeder roots that can easily absorb such chemicals, killing a part or the entire tree."

For more information on shade tree diseases, Walla suggests a copy of an Extension Service publication on this topic which is available at any county Extension office.

Irrigation Management Outlined

Fuel shortages and increasing prices of fuel, are two good reasons why an irrigation water management plan is a must to the irrigation farmer. A properly designed system along with good management can increase crop yields and cut operating cost, which means more profit, according to Jim Roach of the Soil Conservation Service.

To have a properly designed irrigation row water system the irrigation farmer needs to know, (1) how many gallons per minute the well or wells pump, (2) how much fall exists per 100 ft. in the field he is going to water, (3) how long the rows are, (4) 30' or 40' row width, (5) the type of soil, and (6) size of irrigation pipe if not using open ditch. With this information, the irrigation farmer will know if he needs to use a 12 hour set or 24 hour set. Also, he will know how many rows (within 2 or 3, depending on the weather conditions), that he can water. Using this information and good management the irrigation farmer using row watering can expect about 80 per cent efficiency from the water his well pumps, stated Roach.

The sprinkler irrigation farmer needs to know, (1) the output of irrigation well or wells, (2) a good topog map showing all elevations of his field, (3) how long the system is, (4) how many sprinkler nozzles and their size, (5) size of main line, (6) the pressure at the well or pump station and the pressure at the end of the sprinkler system at the most critical set. This information is needed for all types of sprinkler systems, stated Roach. With this information a properly designed system and good management, the sprinkler irrigation farmer can expect to get about 70 per cent efficiency from the water his irrigation well pumps.

If you need any information to help get a good design on your irrigation systems, feel free to call your local Soil Conservation Service office at 665-1751.

4-H'ers Plan Camp

Six 4-H members from Gray County are attending Electric Camp in Cloudcroft, New Mexico July 16-20. They are Doris Carlton, Elaine Webb, Mollie Carlton, Frank Morrison, Chris Skaggs, and Jay Spearman.

Doris Carlton has returned from attending the first 4-H Congress in Houston. Audette Vaughn has been to College Station attending New Agents' Training.

4-H'ers Plan Camp

Other export facilities have been proposed for Brownsville, Laredo, and El Paso. The Houston pens, built near Houston Intercontinental Airport, are designed mainly for shipment by air or sea, as will the Brownsville center when it is constructed.

The Del Rio facility was built by Fitzgerald & Co., Inc. of Donna. The architect was Starnes Group Inc. of Houston.

Panhandle Water

By FELIX W. RYALS
Last week we carried a portion of a paper presented at the American Institute of Chemical Engineers by Clarence H. Scherer, Water Reclamation Superintendent of the City of Amarillo.

It has been my pleasure to have been associated with Scherer for a number of years at various meetings and seminars concerning water. He has been very helpful to the water and sewage department personnel of most of the Panhandle area towns. He is one of the most thorough people in the water field. He prepared the following information concerning the reclamation of City sewage water in Amarillo: Amarillo Water Reclamation Plants purpose is to remove some 48,000 pounds of pollution from 11,000,000 gallons of wastewater per day, process the separated materials so they no longer create a nuisance, and return the water portion to a condition to be reused for industrial, recreational, agricultural and domestic purposes.

Plant Capacity and Flows are as follows: North Plant Capacity is 12,000,000 gallons per day. South Plant Capacity is 4,500,000 gallons per day. Presently 85 per cent of our flow is going to the North Plant.

The treatment process is, of the 48,000 pounds of pollutional material removed daily from 11,000,000 gallons of wastewater, about 30 per cent of it is in the form of solids that are carried along in the flowing sewage; the other 70 per cent is dissolved in the water.

Treatment consists of essentially three steps: (1) Separating the solid from the liquid pollutional material. This is done by slowing the flow down, in basins to let the solids settle out, then removing them in a thick slurry from the bottom. (2) Feeding the solids pollutional material to one type of bacteria under controlled climate conditions. This is done in tanks covered to exclude air and to collect the gasses produced, and heated to within a range of 1 to 2 degrees to control bacterial activity. The only thing left of the solid pollutional material after this processing is a fertilizer and a gas. We sell the fertilizer and burn the gas in engines. (3) Feeding the dissolved pollutional material to an entirely different type of bacteria, again under controlled conditions. This is done in open tanks into which we pump large volumes of air to: a.) provide oxygen for the bacteria, and b.) thoroughly mix the polluted water with the injected bacterial slurry. The only thing left of the dissolved pollutional material is a 20 per cent increase in the weight of the bacterial mass injected. We then separate the well-fed bacteria from the cleaned-up water, dispose of the excess growth of bacteria, and re-inject those remaining into some more sewage for feeding.

The fate of cleaned-up water is as follows: Direct Industrial Re-use is 5,000,000 gallons per day. Direct Agricultural Re-use is 1,250,000 gallons per day. Evaporation loss (South Plant Lake) is 750,000 gallons per day. Released to Canadian River is 4,000,000 gallons per day and the average flow is 11,000,000 gallons per day.

The construction cost of two treatment Plants is approximately \$3,500,000. The annual operating and maintenance cost is approximately \$300,000. The staff required for two Plants is 26 (1 Operator is on duty at all times at each Plant).

The approximate annual revenue from Reclamation Activities is as follows: Sales of Industrial water is \$170,000, sales of Irrigation water is \$4,000, sales of Fertilizer is \$2,500, value of gas used in engines is \$30,000.

Work with the III Corps Artillery at Fort Sill, Oklahoma

Some guys don't have to shout about their job. You can hear them working miles away. That's how it is with the men of the III Corps Artillery.

With today's Army you can enlist directly for this proud outfit. If you qualify for the job, we'll guarantee it in writing, before you enlist.

III Corps Artillery is the largest Artillery unit in the United States Army. Right now the unit needs good men for meaningful career opportunities in missile fire control, data processing, radio repair, meteorology, vehicle mechanics, television equipment repair, and artillery surveying.

Artillery's tough. It demands a lot of a man. The men of III Corps Artillery like the challenge. They enjoy doing a job they can be proud of. You will too.

To help enjoy off-duty time, Fort Sill offers a wide variety of facilities. Golf courses, water sports, bike and horse trails, auto racing.

Of course, you'll receive all other Army benefits, including starting pay of \$307.20 a month, free medical and dental care, 30 days paid vacation every year and the Army's outstanding educational benefit program.

Talk to your Army Representative. Tell him you'd like to make a little noise with the III Corps Artillery at nearby Fort Sill. Today's Army wants to join you!

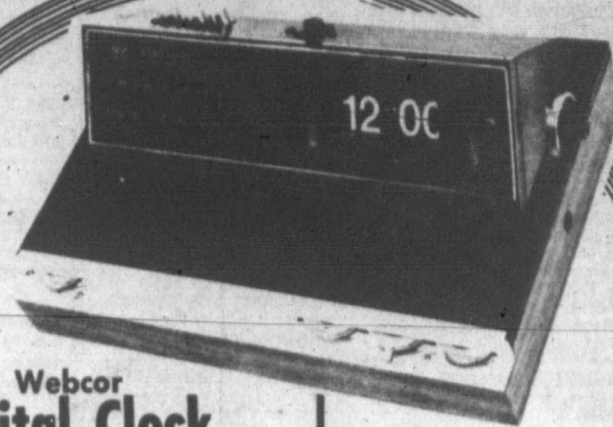

WOW Army!

See your Army Representative:
