The Hidden Tyrant

We are among those folks who admire greatly our former commander in the Pacific theater, General of the Armies Douglas MacArthur.

Recently, the general, as one of the directors of the Sperry Rand Corporation, arose to address the stockholders. What he had to say was far more important than the confines of that particular select gathering.

The words he uttered have been printed in the February issue of True Magazine. We urge a general and widespread reading of his speech for we do not have the space here to reproduce it entirely.

What MacArthur had to say was not particularly original. In essence it was a summation of our national condition as it appears because of our present tax picture. The editors of True titled his words: "Taxation: The Hidden Tyrant.'

Here are some quotes:

"Taxes in 1956 came to a staggering total of more than \$100 billion. The Treasury received \$70 billion and state and local government the other \$30 billion. This means that the cost of government consumes almost one third of the national product which is the sum of all goods and services by the entire population of the United States. The government's appetite for taxes has grown steadily and inordinately. In 1885 the per capita tax take was \$1.98. In 1917 it was \$7.92. During World War II it rose to \$35.70 . . . Last year, the fiscal year of 1956, was the costilest of all. \$446.86 per head for every one of

"Twenty percent of the cost of your food; \$800 on a \$3,000 automobile; half the cost of a package of cigaretes (more than that in Pampa since the first of the year): nearly nine-tenths of the price of a bottle

Taxes have grown so rapidly in recent years that now they are the largest single item in the cost of living. Americans will pay for government this year more than they will spend on food, clothing, medical care and religious activities combined.

When you buy a dozen eggs you pay at least 100 tiny taxes which do not appear on the bill. There are 1.51 taxes on a loaf of bread, at least as many and maybe more on a pound of beef steak, a box of soap, a can of beans. Billions a year are drained off which should be invested in new or enlarged enterprises or spent on the products of these enterprises . . .

Every word the general utters is gospel on this subject. And the balance of the article goes largely to show that the evil we face in this hidden tyrant is a part of a Marxian plan aimed at taxing capitalism out of existence. For it is demonstrably true that taxation is wrecking our economy and setting us up as ripe plum ready for

MacArthur doesn't bring in the British picture. But we will, for we are lucky in this country, having a neighbor like Britain which has preceded us down the road of the socialist welfare state. What happened in Britain a few years ago is in the process of happening here and for the same reason. The British people listened too intently to the siren song of the socialist reorganizers.

So, according to a recent AP dispatch from London, there were only 600 persons in all of Britain who earned more than 600 pounds last year. This is a paltry \$16,800 in American money. The basic income tax in Britain is a whopping 42½ percent. So that when you get into the true upper brackets in Britain-persons who earn more than 100,000 pounds (\$280,000 during a year before taxes-1957 found only 45 in that category. And this list is getting shorter with every year.

Britain is fortunate in having a tax-mad group in Congress which continues to tax Americans to pay for British socialism. But when our present taxing policies have reduced us to the level of Britons, where will we go for bail?

As MacArthur warns us: "Excessive taxation produces results somewhat resembling the evils of slavery and serfdom in days of old. To illustrate: the government takes in taxes over a third of the income of the average citizen each year. This means that he or she is required to work entirely for the government from January 1st until May 10th. This begins to resemble the Soviet forced labor system. It practically reduces the citizen for protracted periods to what amounts almost to involun-
