It's Official, Dulles Stepping Down

By MERRIMAN SMITH UPI White House Reporter .

AUGUSTA, Ga. (UPI)- President Eisenhower today sadly announced the resignation of Secretary of State John Foster Dulles. The President, with traces of tears in his eyes and a choked up voice, personally met with reporters to tell them that the cancer stricken secretary was "absolutely incapacitated" to carry on his administrative duties as state secretary and still make

The President said however that Dulles will continue as the nation's top-level foreign consultant

to the White House. Dulles was placed under additional X-ray treatment today for what appeared to be a second outbreak of cancer.

The secretary of state returned from a recuperation trip in Florida only last Sunday and was hospitalized again.

The President, appearing at a highly unusual news conference in the temporary White House news headquarters at the Richmond Hotel here, said he expected to name a successor to Dulles within a few days.

He said there were other government experts on foreign policy in addition to Acting Secretary Christan A. Herter who would be considered for the post.

Before he makes a final decision, the President said he would discuss the matter with Dulles. Seldom have Washington re-

Grave-faced he walked into the temporary White House press oom and said simply that what he had to say would be brief and that it concerned Dulles.

He went on to report that, in view of the medical findings Tuesday when doctors announced evidence of new cancer in Dulles, the secretary had "definitely made up his mind to submit his resignation."

Eisenhower, 'looking somewhat pale and drawn beneath his tan,

Red Fighter Planes Watch, Don't Buzz U.S. Transport

Fly Within 600 Feet, Do No Harm

By JOSEPH B. FLEMING United Press International

BERLIN (UPI)-Two Sovlet fighter planes flew to within 600 feet of a U.S. Air Force transport flying the high altitude route to Berlin today but made no attempt to "buzz" it as on two pre-

vious flights. The high-flying American turbo rop plane, which the West would use in the event of a new Berlin blockade, was dispatched to West Berlin from West Germany despite previous warnings from the Communists that the West must fly the corridors under 10,000 feet. A U.S. official said the United States formally notified the Russians in advance by filing a routine flight plan with the Soviet delegate at the Berlin air safety center stating the flight would be

made today. The official said the flight was not provocative. We merely are asserting our right to fly to and rom West Berlin at altitudes of

The C130 landed at West Ber in's Tempelhof Airfield safely. The U.S. official said the two Soviet jets joined the transport shortly after it entered the space over East German territory. "There was no harassment or

ouzzing." ha said. The official said it was a "high ltitude" / flight. It was assumed by this that the transport flew at about 25,000 feet, which was the altitude flown by the first C130 the Soviets buzzed on March 27. The Soviets have insisted that Western planes remain below 10,000 feet in the air corridors be ween West Berlin and West Germany. They said the air above his was reserved for Soviet planes. The United States, Britain and France have insisted there is no ceiling on the corridors. The C130 still faced the pros

pect of returning to West Germany from West Berlin. The flight was made after the Soviets by word and deed warned the United States against sending to West Berlin high-flying aircraft of the type that would be used to fight a new blockade. Wood engraving reached its greatest perfection about 1800 in the art of Thomas Bewick, an Englishman. Bewick made his engravings in boxwood in-stead of the softer woods formerly used and on the end of the block rather than the side. This made possible much finer lines and real depth. He used a tool, developed by steel and copper engravers, rather than a clumsy knife. The methods of Bewick are still used.
