

8 Tornadoes Rip Through Texas, Oklahoma; 6 Killed, 67 Injured

By JOHN G. WAINSBER
United Press International

HILLSBORO, Tex. (UPI)—At least eight tornadoes hit sleeping communities and homes over a front of hundreds of miles long in Texas and Oklahoma Tuesday night.

They killed at least six persons and injured 67 others, four of them critically.

A tornado that hit two communities between Hillsboro and Waco in central Texas, was worse than the other seven combined. It accounted for all of the six dead and 38 of the injured.

That tornado blew an automobile from the road, killing James C. B. Bruner, 27, wife of a Mrs. Connally Air Force Base flight

surgeon. It injured her husband and two children.

It drove so many splinters into the body of A. Lee Harris, 71, of Bynum, Tex., that doctors at Hillsboro said he looks like a "pin cushion."

6 Hurt at Silver City

The other tornadoes, and the damage and casualties they inflicted included:

Walnut Bend and Callisburg, Tex.—Nineteen persons injured, including two seriously. Farm buildings and a natural gas plant destroyed. Walnut Bend and Callisburg are about 120 miles north of Hillsboro.

Henderson, Tex.—None injured. A garage and a home destroyed and trees plucked up by their roots.

Perrin Air Force Base, Tex.—A tornado touched ground, but no injuries or damage reported. Perrin AFB is north of Dallas, near the Oklahoma line.

Silver City, Okla.—Six injured, including one seriously.

Tertion, Okla.—Damage but no casualties reported.

Morrison, Okla.—Damage but no casualties reported.

Rock Creek Lodge—Four injured, but none seriously. Rock Creek Lodge is on Lake Texoma, along the Texas-Oklahoma border.

Air Tanker Crashes

The central Texas tornado may have contributed to the crash of an Air Force KC135 tanker near Killen, Tex. Four or five crewmen were believed to have been killed.

The tornado dead included: Garnet Cain, about 50, Bynum, Tex.

Mrs. Minnie Lee, 76, Vaughan, Tex.

Harleton Stanford, 48, of Vaughan, Tex., a grocer.

Miss Mildred Stanford, 59, Harleton Stanford's sister.

Ben Harris of Bynum.

Mrs. C. B. Bruner, wife of an Air Force doctor stationed at Connally Air Force Base, Waco, Tex.

A twister picked the Bruner car up and swept it from the highway. Her husband and two children were injured and in a hospital.

Highway patrolman Doug Howard and A. D. Langston reported that they saw two funnel clouds.

The community of Vaughan, which was reported destroyed, is south of Hillsboro. Bynum is southeast and the twister destroyed homes between the two points.

Highway patrolman Raymond Wallace of Hillsboro, who drove his squad car through part of the stricken area, reported homes flat on the ground and the road filled with broken and splintering power lines.

"I drove toward Vaughan," he said, "but I had to stop and wait until an REA (Rural Electrification Administration) truck came along to cut the broken power lines."

Two Houses Stand

"Every house that I saw from U.S. Highway 81 to Vaughan, a

distance of about seven miles, was leveled with the exception of two. These two were heavily damaged."

The service station and five or six homes in Vaughan—about all there is of the community—were leveled. There was further damage west toward Acquilla.

"The wind lifted a car off the road at Quiston—it was one of these foregin jobs—and the last I heard, it hadn't been found. It looked like the tornado moved in a straight line and mowed down everything it hit."

Tuesday was a warm, fair spring day and most of the residents of the area apparently were in bed, not suspecting that bad weather was about to hit them.

Man Caught in Car

George Millard, 50, lives west of Bynum and Floyd Cain, his father-in-law, was blown out of his home. Cain was one of the injured treated at Grant-Bule Clinic in Hillsboro.

Kenneth McDearmon of Hillsboro, another of the injured, was caught in his automobile as he drove from Waco to his home in Hillsboro.

Mr. and Mrs. Ralph Grounds of Vaughan and their five children, ranging in age from 11 to 18, were all injured.

Among the critically injured was Mrs. Ella Watson, 78, of Hillsboro, who was waiting relatives at Vaughan. She suffered a concussion, cuts and multiple fractures.

These men and others like them are devoted to the Society for the Preservation and Encouragement of Barber Shop Quartet Singing in America, Inc. Officers of the Pampa Chapter were installed Tuesday night with fitting harmony. Seated on a piano stool are Ott Shew-

Coal Miner Is Shot Down

BARBOURVILLE, Ky. (UPI)—An area as a result of Smith's killing Kentucky state police today arrested Fred L. Gregory, 21, of Four Mile, Ky., on a charge of suspected murder in the fatal shooting of a coal mine operator Tuesday night.

Woodrow Smith, 44, Pleasanton, Ky., was shot six times as he ran up a hill near his mine, 20 miles west of here, followed by five or six men. Witnesses said the men attacking him were not known to him. He said state police planned to bring charges against every man who was present.

The commissioner said he said the miners were not known to him and that a 20-car convoy of striking miners was shot. The governor ordered Smith to be placed in the military and near the front of the group at the Smith Ferry County, where trouble some trouble broke out Monday.

Smiling to the men at the shooting. The state police officials said earlier today they would bring charges against every one of the men present at the "premeditated first degree murder."

Gov. A. B. Chandler conferred in flight and crashed Tuesday night in a state Public Safety night in an area swept by violent storms and thunderstorms and near the front of the group at the Smith Ferry County, where trouble some trouble broke out Monday.

The strike of about 7,000 mine workers began more than three weeks ago when coal operators refused to sign contracts in eight southeastern Kentucky counties. The strike was called off by a court order Tuesday.

Mrs. Charles Crutchedfield of Clark, Ky., was the pilot and air state police said he has named the pilot and air state police commander. The KC135 is used to refuel B52 Stratofortress bombers in flight. The plane was from Bergstrom Air Force Base, near Austin, Tex.

Camp Will Head 1959 'Sing' Club

D. V. Camp was installed as president of the Top of Texas Chapter of the Society for the Preservation and Encouragement of Barber Shop Quartet Singing in America, Inc. at the organization's annual installation banquet Tuesday night.

Six new officers were installed by Howard Buckingham. A camp look over from Ott Shewmaker as president. Then came Eugene Turner, vice president; Odel Strickland, secretary-treasurer; James Evans, historian and Round-Up reporter; and Bill Haley, chorus director.

B. R. "Bunny" Shultz was to have been installed as assistant chorus director but left for the final rehearsal of the Lions Club.

Others installed in absentia were Ivan Collier, librarian; and Frank Blake, sergeant at arms.

Mike and Dianne Phillips, a young guitar and piano team, entertained with several popular songs, including "My Happiness" and "White Sport Coat" and "Invisible Hands."

The evening ended with group singing led by Haley. Guests, in addition to wives, were Artie Abing, Perryton; Frank and Jeanetta Murdaugh, H. C. and Lorraine Payne.

It was announced at the banquet that the Top of Texas and Amarillo Chapters will put on a parade of Quaternets in Perryton April 16. The production will feature the 1958 world champions, the Four Heartbeats of Amarillo.

Tanker Blows Up In Flight

KILLEEN, Tex. (UPI)—An Air Force KC135 jet tanker exploded today in a crash and crashed Tuesday morning in the Texas Panhandle.

It turned the bodies of four crewmen over 100 acres of dense woodland.

The victims were: Maj. Jesse L. E. Myrick, 41, Wichita Falls, Tex.; 1st Lt. Rodney Anderlich, San Antonio, Tex.; 1st Lt. Philip C. De Bonis, 25, Newark, N.J.; and T. Sgt. Herman Allison, 47, Tampa, Fla.

Myrick was the pilot and air state police commander. The KC135 is used to refuel B52 Stratofortress bombers in flight. The plane was from Bergstrom Air Force Base, near Austin, Tex.

Big Four Tries to Decide On 'Deal' to Offer Soviet

WASHINGTON (UPI)—The four major powers today tried to decide whether to negotiate separate agreements with Russia on arms reduction and disarmament. The talks were held at the American Pavilion in Paris, where the four nations are meeting to discuss a "package" of proposals for reducing European armaments.

Dalai Lama Has Reached Safety

Leads Revolt

NEW DELHI (UPI)—The official Chinese Nationalist Central Agency said today the Dalai Lama has reached a safe place in Tibet and is personally leading the revolt against the Chinese Communists.

Reports in the Taipei newspaper said the Nationalist Air Force was air-dropping encouraging leaflets and minor supplies—"comfort items" such as toothbrushes, towels etc., —to the rebels and planned to fly reinforcements.

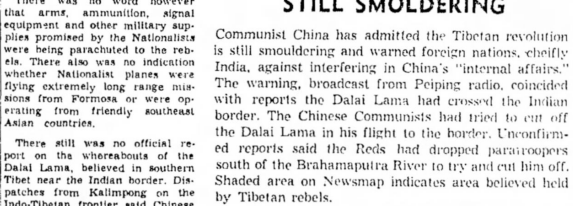

There was no word however that arms, ammunition, signal equipment and other military supplies promised by the Nationalists were being parachuted to the rebels. There also was no indication whether Nationalist planes were flying extremely long range missions from Formosa or were operating from friendly southeast Asian countries.

There still was no official report on the whereabouts of the Dalai Lama, believed in southern Tibet near the Indian border. Dispatches from Kalimpong on the Indo-Tibetan frontier said Chinese Communists were searching for him with planes and troops.

The Kalimpong reports also said the Red army had sent search parties to strategic points in Tibet to search monasteries in belief the Dalai Lama may have taken refuge in one of them.

Relations between India and Communist China, meanwhile, grew chillier as the Indian government, voiced strong objections to the operations of the Chinese Communist embassy in New Delhi.

Mrs. Lakshmi Menon, deputy foreign minister, told the lower house of Parliament it was "highly improper" for any embassy to criticize the government of the country where it was stationed. She said this was not the function of an embassy.

STILL SMOLDERING

Communist China has admitted the Tibetan revolution is still smoldering and warned foreign nations, chiefly India, against interfering in China's "internal affairs."

The warning, broadcast from Peiping radio, coincided with reports the Dalai Lama had crossed the Indian border. The Chinese Communists had tried to cut off the Dalai Lama in his flight to the border. Unconfirmed reports said the Reds had dropped paratroopers south of the Brahmaputra River to try and cut him off. Shaded area on Newsmag indicates area believed held by Tibetan rebels.

Soviet Warns Of Planes' Altitude

BERLIN (UPI)—A Soviet spokesman today warned the United States that the implication was to West Berlin at heights not so that the Soviet might take action against the aircraft.

He said if the United States flies a Soviet ban on flights in the unannounced American Air Force air corridors above 10,000 feet in transport plane flights both into and out of West Berlin while it was crossing the Soviet Zone.

The Soviets rejected an American protest against the buzzing and countered with a protest of their own. They said Western aircraft may not fly above 10,000 feet when crossing West Germany, and from West Berlin.

A spokesman at the Soviet Embassy in East Berlin backed up the protest. He said the Soviet government of the United States. "The U.S. cannot unilaterally decide to change flight rules and prohibit Allied strategic bombers" he said.

He said the Soviet Union and the United States continued to fly above 10,000 feet he said. "The three were joined later by the United States." The U.S. cannot unilaterally decide to change flight rules and prohibit Allied strategic bombers" he said.

Officials said the four allies are asking what will happen if a general agreement on an established rules are broken. The American plan calling for conclusion of an agreement is obvious it will lead to serious negotiations.

Officials said the four allies are asking what will happen if a general agreement on an established rules are broken. The American plan calling for conclusion of an agreement is obvious it will lead to serious negotiations.

Hill County Hospital Lists Injured

HILLSBORO, Tex. (UPI)—The list of injured in the Hill County tornado:

Dr. C. B. Bruner, 50, James Connally Air Force Base, broken leg and possible internal injuries.

Jule Bruner, 6, both legs broken, cuts and bruises, serious.

Ricard Bruner, 9 - months, bruises.

A. Lee Harris, 71, Bynum critical from shock, splinters.

Mr. E. J. Kallus, 39, Vaughan, serious, broken ribs, possible internal injuries.

Ernest Kallus, 43, face cuts, shock.

Richard Kallus, 12, cuts.

William C. Harris, 42, Bynum, splinters and small piece of timber in his body.

Mrs. Alice A. Johnson, 45, Vaughan, cuts and bruises, lost tip of finger on left hand.

Mr. E. J. Kallus, 39, Vaughan, treated and released.

Mrs. Ella Watson, 78, Hillsboro, concussion and left leg amputated because of fracture, critical.

Mrs. Garnett Cain, Bynum, broken pelvis, internal injuries, critical.

Mr. and Mrs. Ralph Grounds, Vaughan, observation.

Five Grounds children, 11 to 18 years old, treated and released.

Floyd Cain, Bynum, bruises and shock.

Mrs. Floyd Cain, Bynum, cuts on head.

Kenneth McDearmon, Hillsboro, concussion, cuts, bruises.

Mr. and Mrs. T. V. Keeton and daughter, Fay, Vaughan, treated and released.

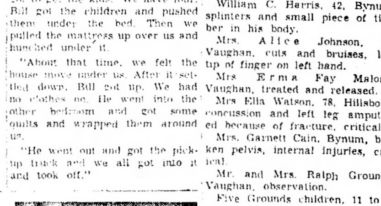

Mr. and Mrs. Allen Hilliard, Acquilla, treated and released.

C. M. Beavers, no address, treated and released.

Stanley Ward Sr., about 45, Acquilla, possible internal injuries.

Mrs. Getha Ward, about 38, Acquilla, possible internal injuries, cuts and bruises.

Mr. and Mrs. Ernest Polk, Lake Whitney, treated and released.

REN ROSE seeks third term

Rose Seeks Re-election To Pampa School Board

REN ROSE, member of the Pampa School Board, today announced he has filed for re-election to a third term on the board.

Rose said he is not seeking a campaign for a third term. "The people know who they want," he said. He added he does not "have the perfect answer" to school problems. "I have always guided my actions by considerations of sound education and sound educational programs."

Rose said he has been a member of the Pampa School Board seven years. He was appointed in 1952, was later elected and then re-elected.

Rose is 59, lives at 505 N. Gray, and has had many professions and has his own contracting business.

Rose said he has been a student in the Pampa school system and earned a bachelor of science degree in business administration at Texas Tech.

As a member of the school board, Rose said he has been a member of the Pampa School Board seven years. He was appointed in 1952, was later elected and then re-elected.

8 Tornadoes Rip Through Texas, Oklahoma; 6 Killed, 67 Injured

By JOHN G. WARNER
United Press International

HILLSBORO, Tex. (UPI) — At least eight tornadoes hit storm communities and homes over a wide area in Texas and Oklahoma Tuesday night.

They killed at least six persons and injured 67 others, but the damage and property loss are still being tallied.

A tornado hit the town of Hillsboro, Tex., about 10 miles west of Dallas, and another struck near the town of Pampa, Tex., about 100 miles west of Dallas.

The tornadoes were reported to have hit the following areas:

- Hillsboro, Tex. — Killed 6, injured 17.
- Pampa, Tex. — Killed 1, injured 10.
- Wichita Falls, Tex. — Killed 1, injured 10.
- Lawton, Okla. — Killed 1, injured 10.
- Lawton, Okla. — Killed 1, injured 10.
- Lawton, Okla. — Killed 1, injured 10.
- Lawton, Okla. — Killed 1, injured 10.
- Lawton, Okla. — Killed 1, injured 10.

It injured her husband and two children.

It broke so many splinters into the teeth of A. Lee Harris, 71, of Hillsboro, Tex., that doctors at Hillsboro hospital took away a portion of his teeth.

W. Hurt at Silver City

The Silver City, N.M., tornado damaged and destroyed the home of W. Hurt, 68, of Silver City, N.M., and injured his wife and two children.

W. Hurt at Silver City

The Silver City, N.M., tornado damaged and destroyed the home of W. Hurt, 68, of Silver City, N.M., and injured his wife and two children.

It injured her husband and two children.

It broke so many splinters into the teeth of A. Lee Harris, 71, of Hillsboro, Tex., that doctors at Hillsboro hospital took away a portion of his teeth.

W. Hurt at Silver City

The Silver City, N.M., tornado damaged and destroyed the home of W. Hurt, 68, of Silver City, N.M., and injured his wife and two children.

The tornadoes dead included:

- Garnet Cobb, about 50, Bynum, Tex.
- Miss Minnie Lee, 78, Vaughan, Tex.
- Harleston Stanford, 48, of Vaughan, Tex., a grocer.
- Miss Mildred Stanford, 50, Harleston Stanford's sister.
- Ben Harris of Bynum.
- Miss C. B. Bruner, wife of an Air Force doctor, stationed at Fort Worth Air Force Base, Wash., Tex.
- A driver speared the Byrum car and swept it from the highway. Her husband and two children were injured and in a hospital.
- Highway patrolman Doug Howard and A. D. Langston reported that they saw two tunnel vision.

The community of Vaughan, which was reported destroyed, is south of Hillsboro. Bynum is southwest and the mother's driveway home between the two points.

Highway patrolman Raymond Wallace of Hillsboro, Tex., said his patrol car struck a power line in the storm area, reported power out.

Highway patrolman Douglas Howard and A. D. Langston reported that they saw two tunnel vision.

distance of about seven miles, was reported with the exception of two. These two were heavily damaged.

The storm hit Vaughan about 10 miles west of Hillsboro, Tex., about 10 miles west of Dallas.

The storm hit Vaughan about 10 miles west of Hillsboro, Tex., about 10 miles west of Dallas.

Man Caught In Car

George Millard, who lives west of Bynum, said that his car was blown out of his house. One of the injured treated at Great-Bue Clinic in Hillsboro.

Kenneth McDearmon of Hillsboro, another of the injured, was caught in his automobile as he drove from work to his home in Hillsboro.

Mr. and Mrs. Ralph Grounds of Vaughan and their five children, ranging in age from 11 to 18, were injured.

Among the critically injured was Miss Ella Watson, 78, of Hillsboro, who was visiting relatives in Vaughan. She suffered a compound skull and multiple fractures.

WATCH OUT FOR SAM

Venturi, Wall, Betting Favorites

By LEO H. PETERSEN
UPI Sports Editor

AUGUSTA, Ga. (UPI) — Ken Venturi and Art Wall were the betting favorites and Sam Snead, as usual, the gallery favorite as the field of 76 professionals and 14 amateurs took their final tees today for the 23rd Masters golf tournament, starting Thursday.

Venturi, because most of the pros think he has the best game "from the tee into the cup," was the 3-1 betting choice with Wall, the leading money winner on the PGA circuit this year, the second choice at 4-1.

The 46-year-old Snead and the 48-year-old Jimmy Demaret only golfers to win the Masters three times, were quoted at 5-1 along with Cary Middlecott, Arnold Palmer, last year's winner, was listed at 6-1.

"This no longer is an old man's game," explained 57-year-old Gene Sarazen, who won the Masters back in 1935, the second year it was played. "We old timers can't take it on the greens any more. And putting is

a good 60 per cent of your game.

"We can stay in there with players like Venturi from tee to green, but when it comes from the green to the cup we lose out. Ken is a fine putter. He should win."

Venturi is only 27. He's won a lot of tournaments but none of the big ones, like the Masters. Wall is 35. He is the most consistent player of the year and he has everything it takes to win. A lot of players like him because of the added experience he has over Venturi.

But it is surprising to talk to old-timers other than Sarazen. They all like old Sammie Sammie. "For the last few weeks he's been playing the best I've ever seen him play," said Lew Worsham, who won the N.S. Open back in 1947. "You name any player in the field and Bill takes Snead head to head."

There was little said about the chances of the 46-year-old Ben Hogan. Hogan is now limiting his competitive golf to four tournaments a year, and his fellow pros don't feel he has it on the greens any more.

ENDS RIDING SPREE

BOWIE, Md. (UPI) — Jeffrey Howard Grant closed out his record-breaking riding spree at Bowie by booting home two winners on the last day of the Colonel Art and Bombs Up raised \$10,000 to 51 winners for the 44-day season.

NBA Hints At Basilio-Fullmer Title Matching

MILWAUKEE (UPI) — The National Boxing Assn. today hinted at a possible title match between Carmen Basilio and Gene Fullmer, if middleweight king Ray Robinson abdicates or has his championship taken away for inactivity.

Basilio and Fullmer, both former middleweight rulers, were No. 1 and No. 2 in the April ratings of the NBA released today by ratings Chairman Fred Saddy.

"We're sick and tired of Robinson's promises of a title defense," said Saddy. "He hasn't done anything since winning back the title from Basilio a year ago."

"If Robinson were to abdicate the middleweight crown or his recognition impaired, his principal runners-up would be under top consideration in future plans," said Saddy, indicating a possible title fight between Basilio and Fullmer.

"We're sick and tired of Robinson's promises of a title defense," said Saddy. "He hasn't done anything since winning back the title from Basilio a year ago."

Dairying contributed 25.07 per cent of the total farm income of Ohio during 1958.

UT THUMPS TCU BY 4-1

AUSTIN (UPI) — Texas, the perennial Southwest Conference baseball champion, got even for the young season Tuesday when Bobby Verplank potted a three-run homer and Elmer Rod hurled five-hit ball to give the Longhorns a 4-1 victory over Texas Christian.

The victory gave Texas a 1-1 loop mark to 2 for TCU. "We're sick and tired of Robinson's promises of a title defense," said Saddy. "He hasn't done anything since winning back the title from Basilio a year ago."

NAME SOCCER REFEREE

TORONTO (UPI) — Ray Morgan of Toronto has been selected by the United States Soccer Association to referee the international soccer match between England and the United States May 28 in Los Angeles.

3-4A Outfits Have Tough Day; Lose 4

Coach Deck Woldt's Pampa Harvesters stumbled from the ranks of the unbeaten, 4-3 in an extra inning at Borger Tuesday, leaving District 3-AAAA without a perfect record, baseball club.

Besides Borger's come-back verdict (Pampa had owned a 3-0 lead), Palo Duro Don's were the only other conference outfit to post a Tuesday win. The Dons hammered out eight hits for a 9-3 decision at Dumas.

Dumas plays at Pampa Friday before the Harvesters in a v a d e Clovis, N.M. for a Saturday twinbill.

Outsiders kayoted three other league teams while dust blew down another. Tascosa cancelled a game in the first frame with a 2-0 edge at Hereford because of high winds and dust.

Mighty Monterey, the pre-season selection to walk off with the loop marbles, absorbed its worst setback of the season and third in 13 games as a scrappy Snyder flipped a 7-0 white-wash brush in Lubbock.

Lubbock High outthrew Lamesa, 11-9 but was outscored 6-5 as the Westerners were handed their seventh loss in a dozen outings.

Plainview's happiest Bulldogs committed seven errors but it still took Leveland an extra inning to win a 12-10 decision, thanks to three runs in the 8th.

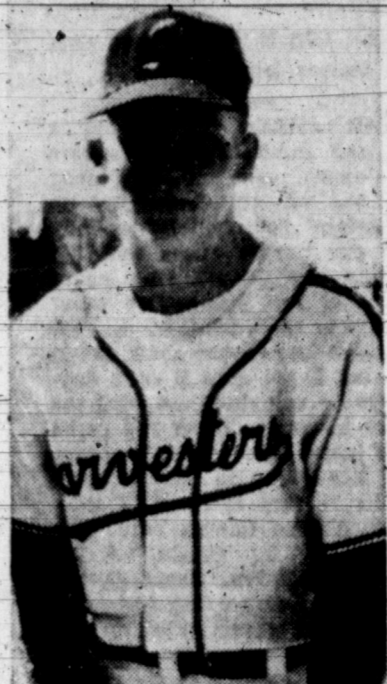

DISTRICT 3-4A

Team	W	L	Pct.
Palo Duro	4	1	.857
Pampa	4	1	.800
Monterey	10	3	.769
Borger	4	2	.667
Amarillo	4	2	.667
Tascosa	2	2	.500
Lubbock	5	7	.417
Plainview	0	8	.000

Wednesday
Tascosa vs Hereford at Canyon.
Friday
Dumas at Pampa; Hereford at Plainview; Amarillo at Odessa; Oklahoma City Northwest Classen at Tascosa; Lubbock at Snyder.
Saturday
Pampa at Clovis (2); Spearman at Borger; Plainview at Hereford; Abilene at Monterey (2); Amarillo at Odessa (2); Oklahoma City Northwest Classen at Palo Duro (2); Dumas at Tascosa; Midland at Lubbock (2).

JIMMY WALKER, Pampa Harvesters pitcher

Deck Woldt plans to pitch his ace, Kippy Williams on Friday against Dumas, and then come back with the little lefty in the loop opener in Amarillo against the Sandies next Tuesday.

The Class AAAA vote on whether or not to continue spring football training is due within the next few days. Superintendent Knox Kinard will vote for Pampa. Babe Curfman sez he's all in favor of the spring drills.

Double-talk!
Gil Burgund, the Garden Lanes guy who insists he'd like to get all the kids off the streets and into his alleys might be interested in this: The Bowler's Dictionary?

HEAD PIN — Man who goes bowling more than once a week without his wife.
SPLIT — Easiest way to settle up at the end of the night.
OFF NIGHT — When somebody else keeps score.

PINS — Them dang things standing at the end of the alley, after two "gutter" balls.
FOLLOW THROUGH — What you do when your thumb sticks in the ball.
SPARE — Guy with low average who shows up every night just in case.

SLOW GAME — A good excuse for getting home at 2 a.m.
PERFECT GAME — A game in which the bowler has... oh, why bother!

Glo-Bal, Bah!
Deck Woldt, like just about every other coach in the diamond biz, is experimenting this spring with the new Glo-Bal. It's a bright orange baseball, looking like something out of an olden val, which is supposed to be easier to see in the sun.

The Decker says, phoo! The thing gives outfielders a mental fit, and it'll never replace the good ole white horsehide.

Didsa hear about the scion of a very wealthy family who was a petty officer on a submarine during the last war. He listened carefully as he heard the captain warn the crew: "Torpedoes are expensive. Before you release one, make sure you are going to hit the target."

Shortly after the lecture, the million-dollar officer spotted an enemy destroyer coming toward the sub. "Destroyer spotted on the portside," he yelled into the megaphone.
"There was no answer."
"Destroyer 400 yards away!" he bellowed.
"Pause."
"Two hundred yards away!" shouted the rich boy.
"Still no answer; and no action."
"One hundred yards away!"
"No answer; no action."
"Fifty yards away!"
Nothing.
"Fire!" bawled the playboy. "I'll pay for it!"

Hither & Yon
For your information, there are 638 schoolboy baseball teams now in Texas. Nothing compared to the 1,091 basketball teams.
By basket ball's how the baseball picture stacks up: 4-A has 93 teams; 3-A has 70; 2-A has 100; 1-A has 94 and B has 272.

Warren Giles, the National League president, is quoted: "I've never heard any complaining from the fans about a baseball game being too long. The only complaints I've heard have come from writers who have a date after the game."

Mayo Has Reds Looking Like Window Breakers

By FRED DOWN United Press International

The Cincinnati Reds are beginning to look like those famous "window breakers" of 1957... except that they're also getting the pitching. A long-shot National League pennant shot, the Reds have won six of their last seven games scoring a total of 35 runs compared to 10 for the opposition. They've had four different pitchers go nine innings and Tuesday saw three of their "fringe" pitchers combine in a 5-0 shutout of the Philadelphia Phillies.

Harris Ready For Fleeman

DALLAS, Tex. (UPI)—Backwoods Roy Harris who lost a game but bloody bid for heavy-weight champ Floyd Patterson's title on pay TV, gets his first chance to show the nation's free television audience tonight that he's good enough to merit another chance. Harris and his manager, Lou Viscusi, are so confident that the colorful fighting schoolteacher will make such an impression that they were willing to risk Harris' rocky ring reputation against Donnie Fleeman, a hard-hitting Texas light heavyweight that Harris failed to put down in a previous effort.

BORGER

(Continued From Page 4) on an error by Hill, allowing Bob Murray to reach first; a passed ball, and singles by Deen and Lindsay. The bulldogs got their two fifth inning runs on singles by Kidd and Rash, followed by a fielders choice error by Ridgway on Dyke's bouncer over second, and Hood's single to right field. Good Pitching. Both hurlers went the full eight innings, and both did some great clutch hurling. Walker stranded 14 Bulldogs on the basepaths, and Deen left seven Harvesters on base. Walker had more trouble with his control, as he issued seven free passes to four for Deen. Deen fanned nine Harvesters, to four, strikeouts for Walker. Most of Deen's whiffs came in the fifth, sixth, and seventh innings when he struck out seven of the 10 Harvesters who faced him. Deen was the Bulldogs' batting leader, as he hit a double to deep centerfield in the second inning. Pampa got only five hits, all of them singles. Borger collected a total of 10 bingles.

Ira Joins Field For Texas Relays

AUSTIN (UPI)—Ira Murchison, who pushed Olympic sprint champ Bobby Morrow to a world record tying 100-yard dash mark of 9.3 seconds on the same track in 1957, has joined the select field for the Texas Relays' invitational century dash Friday night. Presence of the Chicago flyer, who gave Morrow his closest competition in the NCAA finals here two years ago, heightened interest in the special 100 due to be run at 8:30 p.m.

Celts-Nats In Showdown Tonight

BOSTON (UPI)—The chips are down and the players are up for tonight's seventh and deciding game between the Boston Celtics and the Syracuse Nationals in their Eastern Division playoffs. The winner meets the astounding Minnesota Lakers in the National Basketball Association's final playoffs which start Saturday. The lowly Lakers shocked the basketball world last weekend by ousting the defending champion St. Louis Hawks in six games.

By all odds the Celtics should win it. Boston has beaten Syracuse eight straight times at the Garden this season and finishes 17 games in front of the Nats over the regular season. In addition the money boys have installed the Celtics solid eight-point favorites.

Out Of The Past

Whatever Happened To... CHARLES HUMEZ United Press International Charles Humez of France won the European welterweight and middleweight boxing crowns in his first eight years of fighting on the continent but lacked the punch to make much headway in the U.S. He lost his New York debut to Tiger Jones in a 10-rounder in 1954 and dropped Fulmer two months later. He packed off to Europe after that, delecting Jones in a return at Paris and retaining his European 160 pound crown until Gustav Scholz flattened him at Berlin last October. Among Americans he had defeated abroad were Tony Janiro, Gene Hairston and Garth Panter. Whatever happened to Charles Humez? Now 31, he has turned wrestler in Europe following the lead of ex-boxers Robert Villmain and Pierre Langlois.

ABC Tourney In Last Month

ST. LOUIS (UPI)—The 1959 American Bowling Congress tournament eyed its fifth month of competition today with no serious challenges to the leaders in sight. The best open team score Tuesday was 2,594 by the Milwaukee Sausage Co. team. The Liberty Tavern team of Ford, N.J., arrived with only four bowlers and packed James Fishbein, Belleville, Ill., as a substitute. It proved a wise choice as Fishbein bowled a 644 series, 100 pins over the best of the regular team members. Stan Moskat, Saginaw, Mich., the 1942 ABC All-Events champion, turned in the best singles.

NAMED TRACK ASSISTANT

NEW YORK (UPI)—Minnesota track coach Jim Kelly has been named to assist Frank Potts in coaching a U.S. squad that will meet Russia in Philadelphia.

Dolls, Queens Move in AAU

ST. JOSEPH, Mo. (UPI)—Eight teams, headed by the top four seeded outfits battle tonight in the quarterfinals of the Women's National AAU basketball tournament. And there is a possibility that four top ranked entrants will battle in Thursday's semifinals. Tonight's quarterfinal pairings have defending champion and top-seeded Nashville, Tenn. Business College meeting Clarendon, Tex., Juco at 8:15 p.m. Second-seeded Iowa Wesleyan hits the Atlanta, Ga. Tomboys at 7:15 p.m.; third-ranked Wayland, Tex., takes on Dowell's Dolls of Amarillo, Tex., at 9 p.m. and fourth-regarded Guy's Gals of Kansas City, Mo. face Commercial Extension of Omaha, Neb. at 10:15 p.m.

News In Brief

ESTIMATE TOURIST FIGURE
ROME (UPI) — An estimated 100,000 tourists and pilgrims came to Rome and Vatican City during the Easter Holy Week, officials said today. A spokesman for the Rome Tourist Bureau said the number was about 10 per cent higher than in 1958.

GET U.S. PLANES
KARACHI, Pakistan (UPI) — The U.S. Embassy here today confirmed that Pakistan's air force soon would receive the first shipment of American-supplied B-57 jet bombers.

PLAN EXCHANGE TALKS
MOSCOW (UPI) — Russian delegates are en route to the United States for talks on exchange visits of artists, the Soviet Press news agency said today. The exchange is planned in connection with the forthcoming summer exhibitions in New York and Moscow.

MOTHER-BABY PRINTS
NEW YORK (UPI) — All hospitals in New York City will be required starting Oct. 1 to foot-print newborn babies and fingerprint their mothers on the same card before they leave the delivery room under a directive issued by Assistant Health Commissioner Harold Jacobson.

ASKS SCHOOL LEGISLATION
ATLANTA, Ga. (UPI) — Sen. Herman Talmadge (D-Ga.), who has proposed a constitutional amendment giving states full control over public schools, said Monday night that only legislation on the federal level can save public schools in the South.

CRACKDOWN ON DRUNKS
BUDAPEST, Hungary (UPI) — In a move to try to curb increasing alcoholism in Hungary, the government will confiscate the incomes of known alcoholics and the drunks will be put in the charge of a state guardian, the Justice Ministry announced Monday.

LUCY'S FRIEND SUE
HOLLYWOOD, Calif. (UPI) — Actress Vivian Vance, who plays a more-or-less happily married friend of Lucille Ball on the "I Love Lucy" television show, has been charged with extreme cruelty in a divorce suit brought by her husband, actor Philip Ober. They have been married 18 years.

JIMMY FIDLER DIVORCED
BURBANK, Calif. (UPI) — Hollywood radio commentator Jimmy Fidler and his 35-year-old wife, who were divorced Monday, still are living together in their home here. The couple agreed to continue living in the same home until other arrangements could be made.

The Pampa Daily News

INDUSTRY
EDITION

Future Here Rated Bright

(Editor's Note: The following information was taken from a report prepared for the Pampa Chamber of Commerce and Board of City Development and The Pampa News. The report and projected look at Pampa and Gray County was prepared by Burt C. Blanton, consulting industrial engineer and business economist.)

He is Burt C. Blanton, who took a survey and projected look at the city and county as to its agricultural, financial, commercial, industrial and economic aspects.

A part of his report is as printed below:

"In the scheme of things to come in Pampa and within the confines of Gray County, it is obvious that cognizance must be given to all basic constituents which will provide the components entering into the projection depicted in this economic entity and its status as of 1960, 1970 and 1980.

"Therefore, the projection, with forecasts and analyses, is concisely delineated and portrayed herein:

POTENTIAL NEW TOP OF TEXAS INDUSTRIES TAKE NOTE!

At least one industrial engineer and business economist sees a bright future for Pampa and Gray County.

(1) Expansion of City Area.

"The present urban area development of the city of Pampa approximates 4.7 square miles. The opinion is rendered, predicated on the anticipated growth and development of the City of Pampa, that expansion of the city's area by the advent of the year of 1960 will approximate 6.1 square miles; by the advent of the year of 1970, this expansion will approximate 7.7 square miles; and, by the advent of the year of 1980, this expansion will approximate 9.5 square miles.

(2) The opinion is rendered that the population growth of the City of Pampa will remain on a consistent basis over the period of the next quarter century from 1955 to 1980, inclusive. Based on conservative projections, the total number of inhabitants residing in the City of Pampa, for specified years, should approximate 26,381 in the year of 1960; 37,598 in the year of 1970; and 47,796 in the year of 1980.

"The anticipated growth of the Pampa metropolitan area, for specified years, should approximate 33,251 in the year of 1960; 43,547 in the year of 1970; and, 55,437 in the year of 1980.

"The deduction is also made that the rate of growth in population in Gray County will continue on a consistent basis during the next quarter century from 1955 to 1980, inclusive. Based on conservative projections, the total number of inhabitants residing within the county (See FUTURE, Page 15)

'Black Gold' Has Aided Area Growth

The development of industry in Gray County is closely tied with the production of "black gold."

Before the discovery of oil in Gray County, the towns of Pampa, Lefors and McLean, like so many other towns in the Panhandle, were quiet, dreamy little towns depending upon farming and ranching for the economy of the county.

With the coming of the oil business in the 1920's the picture changed. At first the change was more evident, because it was new to the area, and like anything that is new there is a novelty.

As more wells were drilled the novelty wore off but the effects of the discovery of oil have become an integral part of the way of life in this area and other industries have developed because of oil.

It was in 1924, before most of the residents of this area even heard of Pampa that the first oil well was drilled in Gray County. This well, located on the Bowers Lease some 12 miles south of Pampa, was drilled by the Wilcox Oil Company.

The Pampa Picture...

Pampa, seat of Gray County, Texas, is the wholesale, retail and financial center of a metropolitan area of approximately 450 square miles and a retail trade territory consisting of twenty counties in Texas and Oklahoma. Its economy is a blend of agriculture, ranching, oil gas and allied industries and businesses. The climate is temperate with a mean annual temperature of 56.9 degrees and average rainfall of 20.99 inches per year at an elevation of 2,218 feet above sea level.

Financial institutions include two strong banks with combined deposits of \$3,389,181. Pampa listed its 1958 assessed tax valuation as \$37,121,235. Valuation for the whole of Gray County totaled \$52,229,110 in 1958. City telephone listings in Pampa at the end of 1958 totaled 11,501.

Gray County is located on the Panhandle Plains of Texas and has fertile soils ranging from dark chocolate loam to deep sand. Approximately one-third of the County's area of 372 square miles is located on the level high plains, the remainder being rolling and broken, thereby creating diversification in agriculture.

The County has an abundant supply of underground water and 90 per cent of the land is devoted to farming and ranching.

Grain Co. Has Best Year Ever

Barnett and Wilkinson Grain Co. of Pampa had the best year in its history in 1958. W. J. Wilkinson reported:

Its Pampa elevator bulged with one-half million bushels of barley, wheat and milo, a figure that represents all the elevator capacity.

Wilkinson said his elevator, in operation 15 years, handles grain from farmers in Gray and parts of Roberts counties. Business in recent years has been good enough (See GRAIN, Page 15).

Oil, gas, petrochemicals and related products and industries are of primary importance in the County, which is one of the State's largest producers of natural gas. Agriculture is second and principal crops in order of their importance are wheat from the chocolate sandy loam of the area which is famous for its high quality production, grain sorghums, cotton, hay, oats, barley, corn truck crops and fruits. Crops values in the Pampa trade territory according to 1950 figures of the U.S. Census of agriculture were \$125,053,843.

Livestock values, from the same source, totaled \$77,000,000. The raising and broken areas of the County are devoted to raising with fine Hereford cattle predominating.

The livestock industry is very important to the economy. With the raising and fattening of cattle for market, as well as dairy cows, horses, hogs and poultry, a large percentage of the cattle and hogs produced in the territory are processed in the City of Pampa.

Two years before the first gas well had been discovered in Gray County by Dick Dulaney for the Texas Company on the banks of the river about 15 miles south of Pampa.

With the successful completion of the well on the Bowers Lease in 1924 the oil industry began in the county and with it came the boom. Drilling of wells throughout the county started in earnest and by 1928 the oil industry was firmly planted in Gray County. The boom was over, years ago, but the drilling business has never slowed down and the oil industry is still expanding.

Gray County was a bit behind the drilling of the first wells in the Panhandle, but it wasn't long in catching up after operations started and today this county ranks as the top producer in the Panhandle.

The first oil well in the Panhandle was drilled in 1920 on the Burnett Ranch in Hutchinson County by the Texas Company. (See GROWTH, Page 15).

Daniel Sets April 1-7 As Industry Week

Texas Industrial Week, the annual period of recognition for the industrial firms of the state, was officially proclaimed in Austin last week by Governor Price Daniels. In presenting the official proclamation to James L. Whitcomb, President of the Texas Manufacturers Association, the Governor pointed out that it was important that Texans understand and cooperate in the action which is necessary to perpetuate a climate of continued development and economic advancement.

The special observance is scheduled April 1-7 and sponsored on a statewide basis by the Texas Manufacturers Association with local observances being sponsored by Chambers of Commerce.

The purpose of Texas Industrial Week is to point up contributions of Texas business and industry to the state economy.

Climax of the state-wide observance will be a Legislative Dinner to be held in Austin on April 7th by TMA, at which leading businessmen and industrialists from throughout Texas will be host to the members of the Texas House and Senate, and other state officials, including the Governor.

From The Governor

By resolution of the Legislature, the week of April 1-7 is observed each year as Texas Industrial Week.

Texas has long recognized the value to its citizens of proper industrial development, which provides new opportunities for our people and at the same time contributes to general prosperity and National progress.

The Texas Industrial Commission, local and regional chambers of commerce, and private industrial and business organizations are working continuously to bring new industry and manufacturing to Texas communities.

Manufacturing is today one of the most rapidly expanding sources of income for our State. By maintaining a favorable climate for industrial growth, Texas has encouraged the creation of more jobs, more markets, more demand for goods, and greater economic health.

It is more important that Texans understand and cooperate in the action which is necessary to perpetuate this climate of development and economic advancement. One means of achieving this is to set aside a specific period for discussion and study of our State's industrial activity, economic potential, and prospect of growth and development, and for the promotion and display by Texas merchants of the products manufactured in our State.

THEREFORE, I, as Governor of Texas, do hereby designate the week of April 1-7, 1959, as **TEXAS INDUSTRIAL WEEK** and urge due recognition and understanding of Texas' position as a rapidly developing industrial State, and the need for continued progress in this field.

In official recognition whereof, I hereby affix my signature this 19th day of Feb., 1959.

Price Daniel
Governor of Texas

Cabot's Operation is Varied, Important to the Top o' Texas

With approximately 900 employees in the Pampa area, Cabot is one of the biggest industries in Gray County.

Actually Cabot is three companies — Cabot Shops, Inc., Cabot Carbon Company, and Cabot Engineering Company.

Cabot has three plants in the vicinity of Pampa: Cabot Shops and Pampa and Schaefer-carbon black plants.

Cabot's Pampa Office occupies the second, fifth, and sixth floors and part of the basement of the Hughes Building. Not only are the local plants operated out of the Pampa Office, but it is headquarters for the entire Southwestern Division of Cabot, which has extensive operations in other parts of Texas and in several of the other states.

Personnel in the Pampa Office serving all the southwestern operations total approximately 170.

Cabot Shops, located on the Amarillo highway west of Pampa, covers about 30 acres of land, has approximately 150,000 square feet of floor space in the buildings, and employs approximately 400 people.

Cabot Shops was started around 1930 to fabricate steel for the construction of the Cabot carbon black plants, and soon it was doing quite a bit of work for other industries in the area.

A line of oil field pumping units was developed, and Cabot Shops is now one of the top producers of this kind of equipment. The sale and distribution of the pumping units is handled through H&L Supply Company with about 80 stores located throughout the nation.

During World War II the Ordnance Division of Cabot Shops was formed to make 40 to 155 mm. gun tubes for the United States Government. This Division produced its own steel, and forged, rough-turned and heat-treated gun tubes. During the Korean conflict the Division was reactivated, and since last August a plant has been in production again, making 90 mm. tubes.

In 1935 Cabot Shops purchased Franks Manufacturing Corporation of Tulsa, Okla., one of the first and best known builders of portable well drilling and servicing equipment for the oil and gas industry. It was moved to Pampa in September of 1937 and now operates as Franks Division of Cabot Shops, Inc. Its equipment can be found in all major drilling and operating fields throughout the world, and has service and warehouse facilities in all major oil producing areas.

Carbon black, manufactured in this area, is practically pure carbon soot. It is produced from partially-burning hydrocarbons, such as natural gas or liquid by-products of petroleum. At the present time Cabot produces approximately 50 different grades of carbon black.

More than 80 percent of all carbon black produced today goes into the manufacture of rubber goods, with tires as the major product.

The Pampa Office is headquarters for Cabot's expanding oil and gas operations. These operations now extend into some ten western and southwestern states.

Cabot Engineering Company's Pampa engineers design and supervise the construction of carbon black plants all over the world, and Cabot Carbon Company's research and development department, which is located here, supplies technical data and personnel for such foreign plants.

Dr. Godfrey L. Cabot, founder of the firm and now 98 years old, is still active and serves as chairman of the board of directors of the parent company, Godfrey L. Cabot, Inc. Thomas D. Cabot is the Company's president, and Russell G. Allen, former general manager of the Southwestern Division, is executive vice president.

The following officials of the Cabot Companies have offices in the Hughes Building: Hugh Burdette, general manager; E. L. Green, Jr., executive assistant (general) to the general manager and manager of oil, gas, and natural gasoline departments; W. L. Loving, manager of carbon black department; N. D. Steele, general production superintendent, carbon black; R. E. Dobbin, director of research and development; O. M. Prigmore, director of purchases and Pampa Office; Reno Stinson, director of industrial relations; Don M. Conley, director of safety and insurance; Robert P. Vail, manager of Cabot Engineering Company; Homer D. Johnson, southwestern counsel.

R. A. Baker, manager of Cabot Shops, has his office in the Shops office building west of Pampa.

Burdette, Loving, Green, Baker, and Vail are vice-presidents of Cabot Companies.

Club Women, Better Wives, According To Club President

By GAY PAULEY UPI Women's Editor

AKRON, Ohio (UPI)—Does club work interfere with house work? It does, but not so husbands or children notice it.

"I think the club woman is a much better homemaker than that perfect little housewife who is home all day," said young Mrs. Donald F. Tenney, the president of Witan Club, a women's social and civic organization here.

"The club woman has been out mixing with people. She came home to her family with interesting things to talk about," she said. "Her conversation is not centered on the washing machine, breaking down or something else that went wrong."

"My husband always says, 'Now sit right down and tell me all about it' when I get home from a meeting," said Mrs. Charles Morrow, another Witan. "I think the men like for us women to be out doing things."

Help Many Causes
The subject of club women, favorite target of cartoonists, versus the housewife who is not a "joiner" came up after a Witan membership lunch where I was the speaker.

The Witan take their name from the Anglo-Saxon word "witan," meaning "to know." Each year, funds from membership dues, a benefit dance and a spring style show go to some Ak-

ron "cause"—this year, mental health.

Since its organization in 1943, Witan (with a closed membership of 211 women under 35 at the time of joining) has raised 130,000 for an amazing 86,000 volunteer hours to welfare agencies.

"None of us is a perfect housewife. I can tell you, laughed Mrs. Frederick Lise, a past president. "None of us is what I'd call a typical clubwoman either."

All Have Children
To the members with whom I talked, the "typical" clubwoman deserves some of those barbs anyway, because of the amount of time she spends on bridge, matinees and other social doings.

To the cartoonists, they usually have three chins—a pointer-pigeon boom and pillbox hat with flowers soaring out like an antenna.

The club women, like many of their sisters in other cities, find time also to work with the Scouts, PTA, Garden Club, charities and church, and act as family chauffeur. A few also hold full-time jobs outside the home. The ones I talked with all have children, some as many as four, and operate their homes with little or no outside help.

And none admitted to having a complaining husband.

Designers Fighting For Handbag Space

NEW YORK (UPI)—Some leaders in the handbag industry deserve a salute from us females. They're trying, bless 'em, to bring order out of the chaos in our purses.

Of course any woman can tell them they're fighting a losing battle. Purses are like closets. The more room we have, the more we stuff in, and the harder it is to grub through to the bottom. But designed inventiveness is not at all discouraged by feminine disorder.

This season, one manufacturer (Koret) is out with a whole group of leather knick-knacks called "necessaries" (the word is a combination of "necessary" and "accessories"). These include a patented billfold to fit the outside currency a traveler gets overseas; "his" and "her" passport cases; and a flip-top cigaret box for square packages. The case is magnetized, to stick to the instrument panel of a car.

Another manufacturer (Bond Street) has a series of matching purse accessories, all so light in weight they add only a few ounces to the overall weight of a purse. (What's a few ounces when some of today's life bags weigh in at 10 pounds by the time they're full of everything from makeup to magazines and a sandwich for lunch?)

The matching sets come in natural-colored linen with strawberry embroidery; in flower-printed silks; and in pastel kids. They include cigaret cases, eyeglass cases, coin purse, perfume container, and a two-fold, which is a combination billfold, coin purse and card holder with celluloid windows for easy viewing of driver's license and identification card.

The same firm makes purses to go inside other purses—these are called the "continentals." The larger of the two types, about four by seven inches, includes space for a passport, bills, cards and coins.

Only trouble with these efforts toward organization—we fraills have frail characters. Good intentions end in failures within an hour of hectic shopping.

TO LEAD UMBRELLAS

JAMAICA, N.Y. (UPI)—April showers may come the way of commuters on the Long Island Railroad, but nobody will get wet if the railroad's new plan works out.

The LIRR announced today its lost and found department will put hundreds of unclaimed umbrellas at strategic spots on train stations next month. Commuters can borrow 'em, free. The railroad hopes the bumblebees will be returned the next day.

Pampa Tent & Awning

Established In 1948
317 E Brown MO 4-8541

Arey Construction Co. Has Booming Year During 1958

Arey Construction Co. of Pampa, Oklahoma, New Mexico and Texas has enjoyed prosperity since its opening in 1942. Ernest Arey, the company's owner, reports that "volume this year was way ahead of last year."

The company recently finished laying 211 miles of steel six-inch pipe for a gas products line from Amarillo to the New Mexico border. The 74-man crew involved has now been transferred to a line near Tulsa.

In its own plant, built east of Pampa, the firm reaches a production of 335,000 pipe feet a year and lays the same amount. Arey lines have been laid in Kansas, Oklahoma, New Mexico and Texas.

BEST MAN

WAKEFIELD, England (UPI)—Walter Gani, 32, was best man at a wedding here Saturday for the 40th time. He is a bachelor.

TOUGH EGGS

PETERS HOLLOW, Tenn. (UPI)—Folks here are just about ready to concede that farmer Ray Love has chickens that lay the toughest eggs in town.

Love, 63, won Peters Hollow's annual Easter egg fight Sunday for the third time in the last four years. He had the only uncracked egg left after 200 contestants bashed eggs against each other.

Whitener Milling Company

Will Expand During Summer

Business the past year at the Whitener Milling Company, 625 S. West, was up over the previous year, and according to owner Herbert M. Whitener, the company will expand slightly this summer.

The firm, in operation since October, 1955, was first known as Lawrence and Whitener Milling Co. Early in 1958 the company changed names when Whitener bought out the interest held by J. M. Lawrence.

Bonds Selling Strong Here

"Savings Bonds sales in Gray County totaled \$78,937 during February. Sales for the first two months of 1959 amounted to \$144,843 which was 18.2 percent of the county's 1959 goal of \$795,000," George B. Cree Jr., chairman of Gray County's Savings Bonds Committee has announced.

The total sales in Texas during January and February of this year were \$31,100,328 which represented 17 percent of the state's 1959 goal of \$182.5 million.

Top business leaders from all over our nation gathered in Washington recently to hear the President, cabinet members and other governmental leaders discuss our nation's economy and defense position under present conditions. The importance of the Savings Bonds Program to our nation's economic and military well-being was emphasized over and over again by the speakers. I know that the citizens of this county will support our President and our county will surpass its 1959 Savings Bonds sales goal," chairman Cree stated.

A mobile field office and a warehouse moves with Arey's construction crew.

Arey Concrete Pipe is used chiefly for irrigation and sewer purposes. Plant Foreman Martin Nease is in charge of the making of all pipe.

Under his supervision 13 workers mold concrete joints with diameters of anywhere from 10 to 15 inches. Most of the concrete, however, goes into 12-inch pipe.

The pipe is put under steam from 10 to 12 hours and then set out in the yard two weeks to dry. Rain has little effect on the plant's production since pipe can be dried in the plant shed.

Cement for Arey concrete pipe comes to Pampa by rail from Fort Worth and Dallas at the rate of two cents a yard.

Operating separately from the Pipe Co., the Arey Construction Co. lays steel, oil and gas lines for companies up and down the Panhandle. Steel pipe sizes begin at 2 inches and go up to 28 inches in diameter.

In addition Arey Construction Co. maintains its own warehouse and repair shop as a service to gas companies.

Its construction crews are equipped with water pumps, dope and cleaning machines, tractors, bulldozers, ditching machines and a complete fleet of pipeline trucks equipped with low field truckbeds.

Quotes In The News

United Press International

ORLANDO, Fla.—Jose Gilberto Socas, restaurant busboy in Orlando who is leaving reluctantly to become the new mayor of Bolondron, his former hometown in Cuba:

"I no want to leave. This is a better living for my wife and two children. But I must do my duty."

ROME—Monsieur Bousard of Baton Rouge, La., member of a delegation of U.S. newsboys who visited actress Gina Lollobrigida Sunday during their tour of Rome:

"Gee, wait 'til my girl friend, back home finds out I was holding Gina Lollobrigida's hand."

NEW YORK—Mrs. Allen C. Fogarty, head of the American Mother's Committee who admitted that 39 Kansas women were erroneously notified of their selection as "American mother of the year":

"We have not heard from any other state and may the Lord hope that we won't."

LONDON—A receptionist at the West London Air Terminal, where ground hostesses of the state-owned British European Airways have been ordered to shun eye shadow and nail polish because it makes them look "unwashed":

"Just because the airline has prehistoric ideas about beauty."

WASHINGTON—Sen. George D. Aiken (R-Vt.), cautioning against over-optimism about the possible results of a summer-summer meeting:

"Anyone who predicts that a millennium of peace with the Communist bloc is to be achieved by one meeting or two meetings or a dozen meetings is indulging in wishful thinking."

Charlton Heston Unemployed After Being in Spectaculars

By VERNON SCOTT
UPI Hollywood Correspondent

HOLLYWOOD (UPI)—The actor who appeared in the two most lavish spectacles in movie history is unemployed and looking for work.

He's Charlton Heston, star of the \$12,500,000 "The Ten Commandments," and the 15 million-dollar "Ben Hur"—a grand total of \$28,500,000 worth of celluloid.

How's Heston going to top that? "The same question arose after I finished 'Ten Commandments,'" the towering actor replied. "Then along came 'Ben Hur.' It's possible another great role will crop

up with another brilliant director, such as William Wyler."

Heston seems destined to star in super-colossal epics that overshadow performances of the individual actor. Audiences are so engrossed in pageantry there is little time for them to pay attention to the actors.

Emphasis On Character
Perhaps that is why Chuck never been nominated for an Oscar.

He feels, however, sufficient starring in "Ben Hur," and admittance was placed on the character of Ben Hur that he will not be lost in the welter of pomp and circumstance.

Heston credits his craggy features for his historical roles.

"I don't look like a modern play contemporary parts," he grinned. "My appearance qualifies me for historic characterization, going back to the year one."

Bill Holden has just the opposite problem. His face is typical of the 20th century. He'd look out of place dashing around in a tunic and waving a sword.

Chuck spent 11 months in Rome, and admits it was as much a gamble for him as it was for MGM Studios.

By sinking 15 million in the picture, Metro might fold completely if it isn't a block-busting success.

Have Optimistic Outlook
"If the film isn't a smash it would wreck the studio," the idiom-jawed actor predicted, "and it would be a devastating blow to the entire industry. But the executives are convinced it will make 100 million dollars. So am I."

"We shot more than a million and a half feet of film, and spent more than nine months of actual shooting. There was a total of 150 shooting days, and I was called to the set every single day."

Despite Heston's two Hercules roles, he literally is out of work. "I really don't know where I'm going to go from here," he said. "I'll pick and choose my roles carefully, but at the moment there isn't a picture in sight for me."

It's not a cause for worry, though. Any actor playing Moses who can lead the Israelites out of Egypt can win a chariot race playing Ben Hur. Perhaps my next part won't be quite as demanding."

PAMPA HAS ITS OWN MATTRESS FACTORY

C. H. Tollison moved his modern mattress factory here from Lubbock on Nov. 1, 1955. The Acme Mattress and Spring Company is now owned and operated by his son, Gene Tollison. It is located at 817 Foster.

The family now operates mattress companies in Lubbock, Amarillo, Borger and Pampa.

The Pampa plant employs three persons and occupies approximately 250 feet of floor space. Acme is equipped to rebuild and renovate all mattresses. One of its features is a sterilization plant where mattresses are kept at 230 degrees for one hour.

The present production capacity varies from 10 to 14 mattresses per day. All work is done in Pampa. Some of the products are box springs, king-size and foam rubber mattresses.

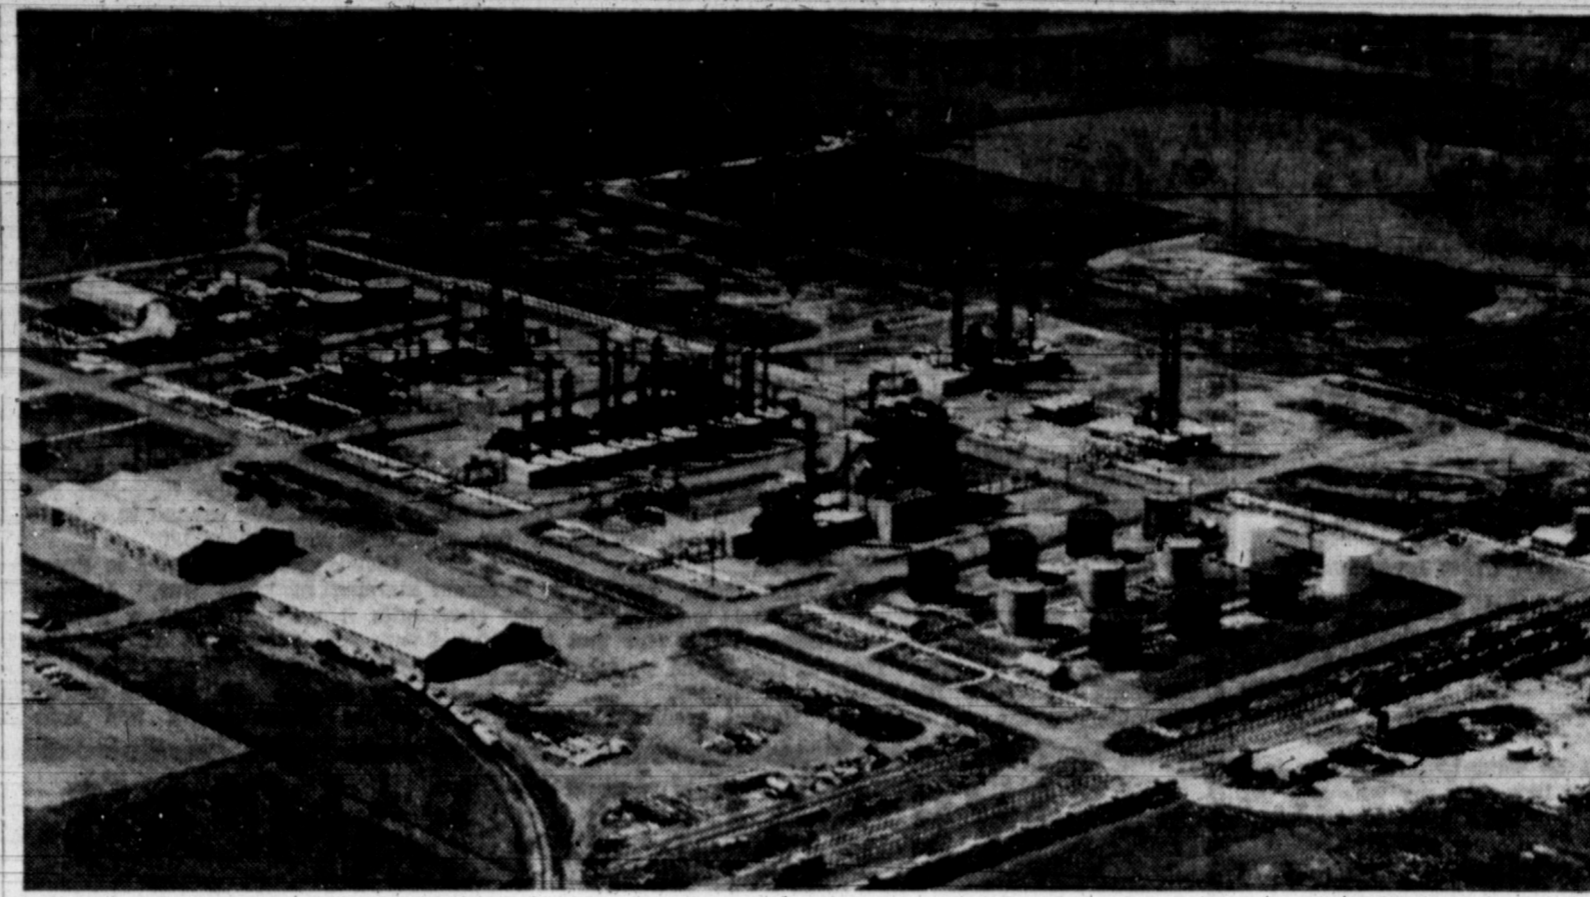

Box springs are made by attaching a wooden frame to the spring, adding an insulator and padding, then covering the spring to match the mattress. King-size mattresses are made to any length and furnished with either a metal frame or legs.

The company gives one day service on reconditioned mattresses. Besides renovating cotton mattresses, the company can convert them to innersprings and orthopedics or cut them down to twin size.

LITTLE LIZ

Not so many years ago there were no deductions from a man's pay until he got home.

Celanese Corporation Will Increase Production Here

The Pampa Plant of the Celanese Corporation of America — an ever-growing giant on the City's industrial scene — continued its impressive growth this year with its current program to increase its acetic acid capacity 50 percent.

Expansion work, which began at Celanese plant early this year, will vastly increase capacity but it is not expected to mean an increase of employees.

The plant currently employs 248 area residents, or 19 fewer than in 1958. However, it is stressed that many of the local company's workers have been transferred to new plants.

Celanese's annual payroll at the Pampa Plant is now in excess of \$1.5 million, most of which filters into the city's healthy economy.

Nationally Celanese in 1958 showed its highest sales since 1950 — \$223,708,844.

The Pampa Plant went into operation in 1952, following the discovery in 1945 of the first successful process for the production of synthetic acetone and acetic acid.

Until it was found that natural gas hydrocarbons formed the basis for petro-chemical production, the chemicals for Celanese acetate, fiber and plastic products were derived from farm products.

As far back as 1932 Celanese chemists were looking for a new source of acetone and acetic acid. Thirteen years of research revealed that the direct oxidation of propane and butane would yield low cost chemicals and enable Celanese to develop new primary hydrocarbon products and derivatives.

A plant went up in Bishop in 1945 and seven years later the new process resulted in the building of the Pampa plant.

During the past year there have been two changes at the department head level at Celanese. They include the promotion of Roy K. Russell to the position of supervisor of personal administration at the Celanese plant; Rick Hill, S. C.; and the promotion of E. J. Machowitz to the position of plant accountant of the new subsidiary of Celanese Fibers Inc. at Shelby, N. C.

The Pampa plant recently completed one million man-hours without a lost time accident. The record, of which employees are justly proud, was achieved by going without a serious accident from July, 1957 to the present date.

Foundry Here Will Expand In Future

The Pampa Foundry Company, 701 S. Somerville, is going places with a new expansion program. A sand slinger molding system, representing the peak of foundry production, will be installed within the next two months.

Starting in 1948 with five employees, the Foundry now employs from 47 to 54 persons. Production averages 270,000 pounds of finished metal a week, according to H. O. Darby, owner.

Pumping parts normally form the bulk of production and are used by local firms. The Foundry turns out tractor wheel weights, bushings, pistons, gauge wheel attachments and sub-soiler castings.

Darby deals with local farm implement dealers, wholesalers, engineering outfits, manufacturers, irrigation suppliers and machine

shops. Cast iron is imported from parts of Texas, Oklahoma, Kansas, New Mexico and Colorado. Coke and limestone come from the South.

In a 1957 expansion the Foundry acquired automatic mold-making machinery, a new cupola and modern air supply controls. In December of that year, R. F. Foraythe took over as plant superintendent. Foraythe came here from Tulsa, Okla. with 11 years experience at the Big 4 Foundry.

In Severe Mental Illness, Meaning Of Pain Often Lost

As the result of a study made some 16 years ago on the part of oil operators in the Panhandle to improve the oil production of their properties, the West Pampa Re-

pressuring Association was formed to conduct a "secondary" oil recovery program whereby high pressure gas was returned to the oil reservoir through gas injection wells.

The Association made agreements with the Cities Service Oil Company and the Slickly Oil Company to build two compressor stations that would furnish gas at 500 pounds per square inch pressure to the 162 gas injection wells located uniformly throughout the oil field.

A gas distributing system was built to transport the gas from the compressor plants to the injection wells.

In May of 1945, Fred Neilage was moved to the area to supervise the construction of the field distribution system and the compressor plants. On March of 1946, gas-injection operations were commenced on the largest dolomite repressuring project in the world.

At the present time, the West Pampa Repressuring Project covers an area of approximately 12,000 acres with 895 producing oil wells and 162 gas injection wells.

A second repressuring operation, the Watkins Project, is operative in Carson and Hutchinson Counties. The project includes an area of approximately 14,000 acres with 1,114 producing oil wells and 152 gas injection wells. Both projects are under the supervision of the West Pampa Repressuring Association office.

The two projects combined total approximately 26,000 acres, 2,025 producing wells and 310 gas injection wells. A total of 40 million cubic feet of gas per day is injected into the reservoir. The production from the combined areas is approximately 16,000 barrels. It

Local Firm Makes Tents And Awnings

Melvin Clark, owner and operator of the Pampa Tent and Awning Company, 317 E. Brown, began his operations in 1948 after purchasing the equipment and company name. The firm had originally been located on 321 E. Brown. Clark operated the firm with one employee until 1950. At present he employs five persons besides himself.

The building originally occupied about 1250 square feet of floor space and was increased to the present size of 2600 square feet in 1953.

The firm is equipped to make and repair all types of awnings used by residences and businesses. It also makes metal awnings and are the distributors of a line of awnings for homes.

A service offered to sportsmen of the area is the renting of tents for camping use.

Clark sells venetian blinds both inside and outside types and draperies for the home.

The firm specializes in the making and repairing of canvas for oil field use. They are equipped to make rig canvas of any size for the oil industries in this area.

The area covered by the firm is within a 90 mile radius.

CORNER KINGSMILL AND RUSSELL

"A FRIENDLY BANK with FRIENDLY SERVICE"

SCHLUMBERGER CORP. OFFERS UNIQUE WELL SURVEY SERVICE

The driller of an oil well needs to keep constant check on the formations being drilled in and on the progress of the hole.

Many firms can supply the oil man with information about the progress being made in the drilling of the well by the making of logs of the well. One of these firms is the Schlumberger Well Surveying Corp., which has an office west of Pampa.

With the cost of drilling a well often many hundreds of thousands of dollars, the oil man must obtain from his drilling the greatest possible information as to his prospects of achieving oil or gas production. He wants to know the nature, depth and thickness of the various formations he has penetrated with the drill bit. He also wants to know what formations are porous and the fluid these formations contain.

expected increased needs of the future.

These units apply the most modern methods to obtain the greatest possible information as to the prospects of achieving oil and gas production as well as an accurate estimate of the extent of such production.

Since the first such service was introduced more than 25 years ago, these methods have become recognized as the greatest single means of providing rapidly and economically information vital to the oil and gas industry.

The large ten-wheel trucks of the firm mount a heavy power winch bearing thousands of feet of steel armored electrical cable, sufficient in some units to probe as deep as four miles into the earth. In a roomy cab ahead of the winch is an array of ultra-

modern electronic control panels, conduits, switches, power supplies, a special photographic recording camera, dark room, and printing machine for producing copies of survey results.

The electrical survey is made by lowering an exploring electrode system of sonde into the well and formations penetrated by the well while withdrawing the electrode system through the hole. The measurements obtained include the electrical resistivity of each formation through its contact with the fluid in the hole.

To obtain resistivity measurements an electrical current is sent from a power source at the surface down through the cable, spreading from the electrode into each formation as the sonde passes it. Potentials, occurring then at other electrodes on the sonde give

measure of the formation resistance to the current.

These potentials are transmitted to meters in the recording camera in the instrument cab where their increasing or decreasing strength causes tiny beams of light to move on continuously moving film on which the depth of measurements is recorded. Similarly the spontaneous or self potential of each formation survey is isolated and recorded simultaneously on the film opposite the resistance record. When the survey is completed the film is developed in the darkroom located in the truck cab and the results "read."

Experienced engineers interpret measurements in terms of lithology, formation type, fluid content, and potential oil and gas production. Services offered include several logging services serving as auxiliaries to the primary log to obtain added information or as alternate methods where well conditions make them more applicable. The microlog indicates formations which are permeable. The laterolog gives sharp, bed definition and is unaffected by salty drilling fluid. High salinity mud fluid alters the values measured by the standard electrical log. The microterolog measures small volumes of material in porosity or reservoir capacity of the formation.

The radioactive service group includes neutron and gamma ray surveys. The neutron log developed by the Corporation's nuclear physics section is obtained by bombarding the formation with neutrons, or atomic particles from a radioactive source, and measuring the amount of gamma rays is a measurement of the natural gamma rays given off by the traces of radio-active material in each formation. Together the radioactive surveys produce results which may be interpreted for porosity and fluid content of the formations.

Samples of formations at a any depth may be extracted from the wall of the hole by other devices using the same cable. A complete recording of the changes in diameter of the bore hole and continuous temperature recordings are other logging services offered. As production aids the corporation offers casing perforating services by which holes penetrating the casing and its annulus of cement

Dallas Club Takes Pride In Its Do-Nothing Record

DALLAS (UPI) — The Bone-Plant-A-Tree Week by planting a tree in the center of one of Dallas' busiest intersections.

Every year it holds a chigger party and elects "Miss Scratch." It holds its annual Christmas party in May and observes July Fourth in December.

The present Chief Bonehead is H. Philip Scarborough, the vice presidents include a judge, a postmaster, bankers, presidents of insurance companies, lawyers and a prominent jeweler.

The vice presidents also include two or three charter members who were among a group of business men that organized the club in 1919 as an antidote to civic clubs.

"We never do anything worthwhile," Scarborough said. "But the main thing about the Boneheads that appeals to me is that it enables me to forget my troubles. The fellowship is wonderful."

Middle Class Is Being Taxed Out Of Being, Says Andrews

WASHINGTON (UPI) — "The middle class is being taxed out of existence. The income tax is fulfilling the Marxist (Socialist) prophecy that the surest way to destroy a capitalistic society is by heavy levies on the estates of 'steeply graduated' taxes and heavy levies on the estates of people when they die."

If Karl Marx was right about that, the U.S. number is up. You wouldn't believe how lightly the income tax flicked the pocketbook in the first years after Republican William Howard Taft proposed (1909) and Democrat Woodrow Wilson began to collect it (1913).

From 1909 to 1913, Congress submitted, and the states ratified the 16th or income tax amendment to the Constitution. President Eisenhower is the eighth in office to be confronted with the income tax riddle: How to distribute the tax burden fairly to all hands.

Business Views

An inventory buildup by steel consumers to tide them over an anticipated summer steel strike is faltering because current operations are taking incoming shipments as fast as they are received.

Mill spokesmen predict the inventory accumulation by July 1 will be substantially less than consumers planned. C. M. White, chairman of Republic Steel Corp., predicted the steel industry should turn out close to 60 million tons in the first half of 1939, against 58 million tons in the similar 1938 period.

United States imports of green coffee in January totaled 210 million pounds valued at 80 million dollars the Commerce Department announced. This compared with January, 1938; imports of 242 million pounds valued at 118 million dollars.

Times Have Changed

A few lower brackets escaped taxation altogether when the levies first were applied back there in 1913. In that year, a married person with two dependents and a \$5,000 net income paid \$10. At \$8,000 the bite was \$46, rising to \$60 on the \$10,000 family; \$260 on 25,000; \$2,510 on 100,000; \$25,010 on \$500,000.

Times have changed. Wars and the welfare state boosted taxes over the years until the \$5,000 family was paying \$577. The \$8,000 family paid \$1,282. The bite on \$10,000 became \$1,744; on \$25,000 \$7,094; on \$100,000, \$56,032; on \$500,000, \$411,224.

These figures, however, do not represent the actual highs and lows of income taxation. The record over the years as compiled by the Internal Revenue Service shows income taxes generally rising sharply under Democratic administrations and declining under Republicans—not merely declining for rich folk but for the little fellows, too. The proportionate Republican cut for the little fellow sometimes was greater than for the rich man.

How Rates Increased

For example: The family man with \$5,000 net who paid Woodrow Wilson's Democratic treasury \$10 back there in 1913 paid only \$3 to Herbert Hoover's Republican tax collectors in 1929. The 1913 \$40 tax on \$8,000 had been reduced to \$14. But the \$100,000-a-year family which paid \$2,510 in 1913 hit for \$14,816 on 1929 income. The \$500,000 family paid \$110,846.

Upper bracket taxes zoomed in World War I. The principle of more or less confiscatory taxes on the higher brackets had come to stay. That principle has been reaching down into lower brackets

FUTURE

(Continued From Page 9)

lines of Gray County, for specified years, should approximate 35,561 in the year of 1960; 45,784 in the year of 1970; and 47,894 in the year of 1980.

(3) Expansion in Agriculture: "Predicated on the new types of industries as recommended in this survey, which comprise agricultural-extractive and chemurgic types, the opinion is rendered that further development and expansion in agriculture in the Pampa area will be synchronized with industrial development.

"It is obvious that the establishment of new types of industries to utilize products of the soil, livestock and livestock products will materially enhance the agrarian industry. Such industries will, of necessity, require large acreage devoted to specific crops to assure an adequate raw material supply.

"The objective of marked industrial expansion in the Pampa area during the oncoming era from 1955 to 1980, inclusive, is absolutely essential to assure a well-balanced economic entity.

(4) Expansion in Transportation: "The overall transportation facilities in the City of Pampa will not, in all probability, show great expansion during the oncoming

era, 1955 to 1980, in so far as current rail and motor transport are concerned, but the utilization of aircraft of various types, especially helicopters, will materially increase. Therefore, aside from expansion in trafficways to accommodate vehicular transport, additional facilities will be necessary to adequately provide for air service.

(5) Expansion in Retail and Wholesale Trade and Service Business: "Predicated on conservative projections relating to the growth and development of the City of Pampa and environs during the oncoming era, 1955 to 1980, it is evident that there will be marked expansion in retail and wholesale trade and service business.

"In the year of 1960, the volume of retail sales in the city should approximate \$47,482,000; in the year of 1970, sales should approximate \$68,069,000; and, in the year of 1980, sales should approximate \$99,747,000. On this hypothesis, it is evident that the current number of retail enterprises in the city will be substantially augmented by the advent of each of the respective oncoming decades.

"On the same basis of projection, the volume of retail sales in Gray County will show substantial increases, as cited in this report, for the oncoming era.

"In the year of 1960, the

volume of wholesale sales in the city should approximate \$311,869,000; the year of 1970 volume should approximate \$45,784,000; and, in the year of 1980, sales should approximate \$68,798,000. On this hypothesis, it is evident that the current number of wholesale enterprises in the city will be substantially augmented by the advent of each of the respective oncoming decades.

"The volume of service business in Gray County will show substantial increases.

"In the year of 1960 the volume of service business in the city should approximate \$4,189,000; in the year of 1970, service business should approximate \$6,178,000; and in the year of 1980, service business should approximate \$8,941,000.

"It is evident that the current number of service-business enterprises in the city will be substantially augmented by the advent of the respective oncoming decades.

"The volume of wholesale sales in Gray County will show substantial increases.

(6) Expansion in Industry: "The expansion in manufacturing and processing industries in the City of Pampa and environs during the oncoming era, 1955 to 1980, should prove substantial in view of the potentiality of the establishment of a number of new types of industries which are logical for location in the area to serve the expanding markets in this geographical section of Texas and the Southwest states.

"The value added by manufacturing and processing in industries located in the City of Pampa and environs, conservatively estimated for the year of 1955 is approximately \$4,292,770. Based on the anticipated industrial expansion in the community, the value added by manufacturing and processing in the year of 1960 should approximate \$5,926,880; and, in the year of 1980, value added should approximate \$14,292,750.

"It is obvious that the anticipated growth of the City of Pampa and environs, during the oncoming era from 1955 to 1980, inclusive, will result in substantial gains in earned income from all gainful occupations of the inhabitants, together with effective purchasing power or buying income.

"Total earned income from all gainful occupations of the inhabitants residing in the City of Pampa for the year of 1955 is conservatively estimated at approximately \$32,347,760. Projections, predicated on population growth, indicate earned income in the year of 1960 will approximate \$40,250,070; in the year of 1970, earned income will approximate \$56,021,020; and, in the year of 1980, earned income will approximate \$72,171,960. On a comparable basis, as cited in this report, the effective purchasing power or buying income of inhabitants residing in the City of Pampa and environs will, likewise, show consistent gains. The foregoing indicated gains in total earned income and effective purchasing power or buying income, will likewise, prove true in Gray County.

(8) Expansion in Real Estate Development: "Predicated on the anticipated growth in the City of Pampa and environs, the opinion is rendered that the urban area development will probably double in size during the oncoming era, 1955 to 1980. On this hypothesis, it is evident that there will be marked gains in real estate investments in all major classifications, value of building permits issued, total assessed or taxable valuations of all property, and indicated true value of all property.

(9) Future Business Activity: "The composite index of Pampa's business activity should continue to rise on a consistent annual basis to the advent of the year of 1980, barring the contingency of atomic war or other unforeseen economic transitions.

"In the age of nuclear-electronics, when development of atomic power and electronics have attained maturity, producing a whole new way of life by the advent of the year of 1950; the level of Pampa's business activity, as indicated, should be approximately 131.3

GROWTH

(Continued From Page 9)

The first gas well was drilled on the Masterson Ranch, north of Amarillo, in 1918.

In 1925 and 1926 the excitement of oil in the county had reached a fever pitch and the influx of the oilmen was felt in Gray County. Within a few short months rigs were rushed into the Top o' Texas and, said an old-time oil man, one in relation to the oil industry, the rigs were moved in so fast and so close that the strings of oilmen were almost working on top of one another.

"New industry had taken over. Hundreds of new faces were crowding into the county to work in the oil fields, to build and operate the early gasoline and carbon black plants and to operate the subsidiary businesses. A new hotel was built in Pampa later, local businessmen that had been here before the boom saw incomes start a dizzy climb and it wasn't very long before rents and property values started the climb to catch up. Residents could see and feel the sudden pulsation of new life. A new era had been born in the county. The well which at the time had been formally organized less than 25 years, was witnessing a rebirth.

"In the early days of the oil business, it was not like it is now. The rigs were built out of timber by special crews. The rigs were not moved from one well site to another and the wooden rigs were usually left when the well was completed.

"The drilling was accomplished by the use of cable tools, instead of the modern rotary equipment. The bit was lifted by the steel cable and allowed to fall back into the hole. Old-time drillers used to check the progress of the drilling by feeling of the cable and some of the old-time drillers swear that sufficient to tell them of any trouble.

"In the early days the oil men did not have the modern testing equipment to show them the various formations and when they hit the best producing formation. An example of this was a well drilled in Hutchinson County in 1922 by the Dixon Creek Oil Company. When first drilled the well produced 3,000 barrels. This particular well helped to start the boom in that county and the company went back the next year, drilled only two feet and had a 10,000-barrel producer that rocketed the Panhandle area into national oil prominence.

"Extensive development in Gray County did not come till June 12, 1925, when a 700-barrel flowing

per cent above that for the year of 1955.

(10) Potentialities of the Area: "The City of Pampa and Gray County occupy a strategic geographical position for the location of a number of types of new manufacturing and processing enterprises in view of the stupendous inland, consuming markets comprising the State of Texas and the Southwest states.

With its complement of manufacturing facilities, embracing adequate and economical power, fuel, labor, raw materials, and transportation, this area offers to industry all of the requisites of successful development and expansion. Furthermore, the area is most desirable for the location of new industries due to these essential constituents: desirable living conditions, and conveniences for industrial workers and their families in such specific and important factors as education, culture and recreation.

"The City of Pampa is replete with the fundamentals of location and the factors determining the desirability of a metropolitan area as a logical site for industrial enterprises, wholesale and distributing firms, especially in view of the adequate and efficient type of native labor available and the prevailing social relations, environment and type of citizenship.

"The City of Pampa is a modern and progressive city. It has shown marked development and growth during the past decade.

"Therefore, it is safe to assume the city's growth is inherent and permanent for these specific reasons: (A) the age levels are low; (B) a large number of families are newly organized and, as a consequence, many children are below school age; (C) the majority of the inhabitants are native white, this being likewise true of the entire population of the region; (D) the average wage earner is young; and, (E) the inhabitants within the area are in relatively good pecuniary circumstances due to their fortitude and progressiveness.

"Specific groups of businesses which may be anticipated to prosper in the City of Pampa and within the confines of Gray County during the oncoming era will include: accounting, advertising, agricultural implements and other farm equipment; automotive, baking and related food products; banking and finance; building construction industry; cafes and restaurants; cleaning and pressing; cosmetics, toilet articles, drugs and sundries; cosmetologists; service, electrical appliances; food products; furniture and household equipment; general insurance including life underwriting; grocers; jewelry; ladies' ready-to-wear and accessories; laundries; lumber and building materials; machinery and auxiliary equipment; mens' clothing and accessories; millinery; office equipment and supplies; plumbing; printing and publishing; radios, televisions, washing machines, refrigerators, ranges and heating equipment; real estate; sign manufacturing; honoraria service; transfer and storage; general lines of retailing; and the major lines of wholesale and jobbing businesses."

well was drilled, on the Combs-Worley Ranch. Another early well was Cities Service No. 1 Heitholt, completed in June of 1925, but for only 15 barrels in dolomite.

One of the favorite pastimes of residents of the area was to watch the drilling operations of the No. 1 Worley Reynolds. This well sits in a hollow, with slight hills rising around it, and people who lived here at that time say it was a popular Sunday pastime to travel out to the well and watch it being drilled. Spectators from town would sit around the edge of the natural amphitheater and watch drilling operations below.

One of the earliest wells drilled in Gray County was the old Purple Sage test drilled in 1922. The venture was drilled about four miles northwest of Amarillo.

One of the most expensive wells from a point of wasted resources was the Stone-Tipton No. 1 McConnell. Many local veteran oil men still believe that had the well been drilled at least 40 feet deeper, Pampa and not Borger might have gotten the biggest part of the boom.

One of the biggest wells in the county, and in the Panhandle, was the Taconian No. 1 Sullivan which was drilled two miles southwest of Pampa in 1930 and produced 20,000 barrels of oil. This well was later sold for \$800,000.

The well that holds the record for production in Gray County, and offsets the north half of the Phillips-Jackson lease, is the Texas Company's No. 1 Bowers, eight miles southeast of Pampa. This well has produced well over 2,000,000 barrels and is still producing. "There can be little doubt that it cost the men \$15 to \$20.
