More than **73,000** miles in a New Ford

THE substantial worth of the new Ford is reflected in its good performance, economy and reliability. Its stamina and endurance are particularly apparent in sections where bad roads and severe weather put a heavy extra burden on the automobile.

In less than a year a new Ford Tudor Sedan was driven more than seventy-three thousand miles over a difficult route. The operating cost per mile was very low and practically the only expense for repairs was for new piston rings and a new bearing for the generator.

The ear carried an average load of 1200 pounds of mail and was driven 250 miles daily. "The Ford has never failed to go when I was ready," writes one of the three mail carriers operating the car. "The starter did the trick last winter even at 34 degrees below zero. The gas runs about 20 miles per gallon. At times I pull a trailer whenever I have a bulky load."

Many other Ford owners report the same satisfactory performance. Every part has been made to endure - to serve you faithfully and well for many thousands of miles.

-700 Too Quick A Diagnosis

ONE OF TWO THINGS is gener-O ally wrong with discussions of the nation's business situation. Either it is taken for granted that the country has gone to the dogs and will never be able to lift its head from the pillow again, or it is assumed that everything is really all right and that we need only a little bit of Pollyanna gladness and hope to be as prosperous and happy as we ever were

Recovery will come, of course will come, probably, before we have stopped wailing about hard times. Sooner or later we shall be more osperous and busy than we were in 1928 and 1929, and the time may not be as far off as we suppose.

On the other hand, there is no sense in trying to pretend that there is nothing the matter with us except a pessimistic frame of mind. The bread lines have been real enough; the Red Cross and other relief organizations have been busy enough. There has been plenty of suffering and one must be a simpleton to

What does all of this mean? Why, obviously, that the country is in better health than we had supposed. This is not to say that here has not been a great deal of unemployment, a great deal of hunger, a great deal of discouragement. But great deal of discouragement, But great deal of discouragement. But great deal of discouragement, But great deal of discouragement, But great deal of discouragement. But great deal of discouragement great deal of discouragement great deal of discouragement. Smoke a FRESH Cigarette!

Cigarettes in prime condition have a moisture content of about 10%. It will be seen by the Pittsburgh Testing Laboratory Chart that cigarettes in the ordinary wrapped package lose more than half of their total moisture in thirty days and that only the Camel Humidor Pack delivers

cigarettes to you

in prime condition

HE whole country is talking about the throat-easy mildness and the prime freshness of Camel Cigarettes in the new Humidor Pack.

The above chart prepared by the Pittsburgh Testing Laboratory tells you why.

Please examine it carefully. It is an unfailing guide to cigarette selection and enjoyment.

As you can quickly see by the three upper curves on this interesting chart, cigarettes that lack the protection of the Humidor Pack lose their moisture rapidly from the day they are manufactured.

And day by day as this moisture disappears, the smoke from these cigarettes becomes harsher, hotter, more unkind to the smoker's throat.

Not so with Camels!

The Humidor Pack is moisture proof and sealed air-tight at every point. It protects the rich, flavorful aroma of the choice Turkish and Domestic tobaccos of which Camels are blended.

Make these tests yourself

It is so easy to tell the difference between parched dry cigarettes and fresh prime Camels that it is no wonder everybody is reaching for a fresh cigarette today.

Your fingers identify stale, dried-out tobaccos at once. While a Camel is flexible and pliant,

Your ears can tell the difference too. For a dust-dry cigarette crackles under pressure.

But the real test is taste and there is simply no comparison between the rich mildness of a Camel and the hot, brackish smoke from a stale, dry cigarette.

Switch to Camels just for today then leave them tomorrow if you can.

R. J. REYNOLDS TOBACCO COMPANY, Winston-Salem, N. C.

Artificial heat in houses and apartments soon dries the moisture out of cigarettes wrapped the old fashioned way. It is the mark of a considerate hostess, by means of the Humidor Pack, to "Serve a fresh cigarette."
Buy Camels by the carton this eigarette will remain fresh
