POMTAC!

A FINE CAR MADE EVEN FINER!

GM Hydra-Matic Drive optional on all models!

advancements in the car that has already won the wholehearted endorsement of more than a million owners and friends.

Foremost among these advancements is the great General Motors Hydra-Matic Drive— now offered as optional equipment on all Pontiac cars. Pontiac is the lowest-priced car

in the world to provide this great mechanical

masterpiece—which shifts gears automatically, and completely eliminates the clutch pedal. Coupled with this great engineering triumph is a striking improvement in beauty and luxury. New exterior smartness extends from the new radiator grille to the streamlined rear

Interiors, too, are remarkably improved. Upholsteries are more beautiful and are expertly blended to achieve new attractiveness and charm. Instrument panels are finished in a smart design adapted from quarter-sawed mahogany—and an adroit use of chrome moulding adds a deft touch of modernity. Engine and chassis have been refined wherever possible-but they remain, basically, the same

synonymous in the automotive industry with goodness and dependability.

There are many more things we could tell you about the new Pontiac, for there are countless improvements which add to its traditional quality and value. But we feel that, for those who know Pontiac, we need only say--here is, by far, the most beautiful Pontiac

-here is the most Inxurious Pontiac ever built -here is the most dependable Pontiac ever built

-and it is now available with GM Hydra-We wish only to add that it is here—on display in our showroom—and that you are most cordially invited to see and inspect it.

It's Not Due to

Prohibition Either

AUSTIN —(P) — Far West Texas is still dry and not getting any wetter.

The United States Geological Survey's water map for December shows low stream flow and ground water in a belt from the Pecos to Southern California, aiong the Mexican border.

January reports received thus far indicate no change.

The dry area extends from the upper Big Bend northward to central New Mexico, westward on the Pacific. Light rains in the area have not materially affected ground water reserves, the USGs said.

Plant Manager Transferred

J. P. Weatherall, for the past eight persuance to the past eight years superintendent of the past eight years superintendent of the past eight years superintendent of a new Haryington, and Marsh gasoline plant at White Deer, has been named manager of a new Harrington and Marsh plant nearing completion at Hooker, Okla.

January reports received thus far indicate no change.

Mr. Weatherall before going with hagy, Harrington and Marsh, was for 16 years connected with Philips Petroleum, both as plant superintendent for a time.

Mr. Weatherall, for the past was an all-state basketball player. The family will remain at White beer until the end of the current school year, when the son will graduate.

Mr. Weatherall before going with be succeeded at White Deer by B. O. Bentley, who has been promoized.

Mr. Weatherall before going with hard years connected with Philips Petroleum, both as plant superintendent for a time.

He has been active in the Lions where the promoized states of Agriculture said Texas turkey growers will raise eight percent fewer by an all-state basketball player. The family will remain at White beer until the end of the current school year, when the son will graduate.

Mr. Weatherall, for the past suberintendent of a new hard near a latent program. His son James was an all-state basketball player. The family will remain at White eurol of the current school year, when the son will remain at White eurol of the current school year, when the son will re

Snead Leads Texas Open Into Finals

SAN ANTONIO-(A) - Slammin' Sammy Snead, the reticent man from Virginia, ripped Bracken-ridge Park's soggy three - plus miles for a six-under-par 65 yes-terday to grab the lead by a stroke at the half-way mark of the \$10,000 Texas Open.

The slammer romped in for a 36-hole total 131 as the field was cut to the low 60 scorers and ties for today's 36-hole finals. Snead staved off a great round by Dick Metz, the ex-Texan now m Arkansas City, Kans., who came within a stroke of the competitive course record over the 8.400-vard lay-out. Metz rolled home with a 63 to make his 36hole total 132. Jimmy Demaret of Ojai, Calif., set the record at 62 in last year's Texas Open.

Within shooting distance of the leaders were Jim Ferrier, the burly San Francisco pro; Cary Middlecoff, of Memphis Bobby Locke, the star from Johannesburg, South Africa; Al Smith, little-known pro from Winston-Salem, N. C., and Norman Vancouver, Wash., is the first Von Nida of Sydney, Australia, American to win a medal in an one of Friday's leaders. Each had Olympic skiing event. She plac-

CONCRETE AND MATERIAL CO.

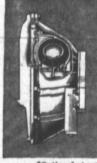

Everyone knows where this one's going

No, it hasn't always been easy, here of late, to be absolutely sure just which way automobile design was heading.

So it's a refreshing thing, people tell us, to see one car that quite clearly knows where it's going and shows it inside and out.

You can't mistake this poised

No gears ever shift in DYNAFLOW DRIVE* In Bulck's new Dynaflow Drive, sliding gear transmissions and complex gear-changers are made unnecessary. You simply set a selector lever and step on the gas. The power plant does the rest, djusting itself to varying driving anditions with atter amouthness You start up — accelerate — climb hills — cruise — stop — start up again — all without toyching the

selector lever.

and ready fashion plate for anything but a Buick - you're sure from a glance that you'll find it steady as a battle cruiser and full of ginger as one of Grandma's

A broad bonnet promises plenty-power-and you get it with . such velvety new smoothness that you need to check the batterycharge needle to make sure the engine's running.

> You size it up as comfortable. The road's verdict is that it's the most tireless car on the market, what with four coil springs, pillowy low-pressure tires and a wholly new attack on car vibration keeping you

fresh through the longest day.

You find quiet here - quiet that encourages conversation - quiet from Sound-Sorber top lining that invites conversation in normal

And if it's a Dynaflow Roadmaster you're handling, here you can sample driving ease that is near magic in its simplicity.

You set a lever, press the gas treadle - and simply steer. The power plant does all the rest swoops you up from standstill to full pace, accelerates, climbs, slows to a stop, starts up again all without any gearshifting, either manual or automatic!

So it's pretty plain where this one's heading - it's going even higher in the regard of the motoring public.

Why not see your Buick dealer now and get your order in P

consultant and wartime regional director of the War Manpower Comconsultant and wartime regional director of the war Manpower Com-mission, is quoted by Time Magazine as advising the Advertising Women of New York: 'Let the New Look of today be the forgotten look of tomorrow. It shows everything you want to hide and hides everything you want to show." . . . So be it, but some of the New Looks about Pampa are "points" to the contrary.

PREACHIN'—Psychiatrists' offices are filled with people who are unwittingly inflicting pain on themselves, says the noted MD, Louis E. Bisch. Usually it is mental pain but cases exist where it is physical. Sometimes they know what they are doing and why; sometimes they don't. And it is often these very self-torturers who complain most bitterly about being frustrated and unhappy. Suffering pangs of conscience for a sinful thought or act, fancied or real, is the commonest way in which individuals inflict pain, by way of retribution, on themselves. Insomnia is a frequent result; so are frightening dreams and nightmares. Fear and anxiety likewise spring from self-accusatory ideas. A feeling that some danger is threatening is always a sign that punishment, for some reason or another, is deserved. In more pronounced cases, there may even be obsessive and compulsive ideas and then, of course, a full-fledged neurosis—a functional disorder—is the high price of self-torture that is paid. So says the doctor Therefore, don't hate yourself.

PICKED UP HITHER AND YON-The name kept bothering me At first I thought it was a newspaper error, but I saw it again; and then I knew that no such consistency could be expected. It was "Benelux." The truth is out about "Benelux" now. No, it's not a washer, electric or otherwise, or a cousin of William Bendix. Benelux refers to Belgium, The Netherlands, and Luxembourg. (Now if you don't know what they are, you can look them up like I did.) a large photographic agency wrote the following to a home appliance company a few weeks ago: "We have a constant demand for photographs of modern home appliances in use in the American home, for use in Japanese publications. The Japanese public, although unable to buy any of the American luxury (or necessity) items, seems to like to dream about them." . . . Hugh Burdette and his executives at Cabot are house-hunting. They're not all going to be thrown out of their homes or anything like that, but it's a matter of prime necessity that they find a house, we hear. Louie Cabot and his wife and their son of a few weeks are coming to live at Pampa Louie, we hear, is going to sorta learn the business from the carbon black up. . . In view of the fact that Gen. Ike might have been elected president if he had run, the announcement that he would not run should have been headlined: "Gen. Ike Abdicates."

already made two trips from New York to Calcutta, and will make another trip to New York and back to South Africa, and two

When it is unwrapped by physicists of the Chicago University Institute for Nuclear Research the plates are expected to contain information of vital importance in cosmic ray research.

Cosmic ray particles, when tra-

versing photographic e mulsion, leave tracks. Even the weight and speed of the particles are clear ly shown.

The possibilities of this new type of induced radio-activity we're shown by H. E. Huntley of Witwatersrand University, who deposited photographic plates 11,100 feet up in the Drakensburg mountains in Natal, and obtained pictures of cosmic rays smashing a glass atom.

Atom smashing by cosmic rays cannot be controlled as in the man-made article. Its projectiles have vastly greater energies than the artificial product. To get the full force of cosmic radiation it is necessary to be above the blan-ket of the earth's atmosphere.

URANIUM AND U.M.T. (Chicago Daily Tribune) Dr. Fritz Lowenthal, former Communist deputy in the reich-stag in the pre-Hitler era, has provided a grisly account of German slave labor at work in nine pitch-blende mines in Saxony from e ich the Russians are extracting uranium. Urged on with blows and kicks by brutal Red guards, these miners, both men and women

some of them under 14 and others over 65, looked to Dr. Lowenthal "like the slave army of a Phar-Sickened by his observations, Dr. called to order by Mrs. Appling, circle chairman; Mrs. Paul Pierson, mission study care. tection of the western zone. He man, taught the lesson from "That the World May Know," by W. R. in the magazine, Plain Talk. American proponents of the mil-White, Fourteen persons were pres ent. itary state will undoubtedly view Dr. Loewenthal's testimony as further evidence that Russia has engaged in a race against time to obtain the basic material for the atomic bomb. The story will be used in behalt of the cause of

universal military training, or peacetime conscription, as urged upon the country by Mr. Truman and the department of defense. This kind of propaganda for Umptee is easily answered. The department of defense knows that when Russia gets the atomic bomb, or thinks it has it, tests will have first bomb, or after it has produced only a few. It is not going to proceed turning out bombs if they are defective. The department of defense knows that when there is an ato-

mic blast anywhere in the world, the radiation soon will be registered by Geiger counters in this country as radio-activity comes round into our upper atmosphere. The blasts at Los Alamos, Hiroshima, Nagasaki, and Bikini all were registered by the counters. The evidence is unmistakable. Thus the United States is certain to know when and if Russia gets the bomb. The officials in

Washington know from their own experience that the production of bombs is a slow process, that Russian engineering and technology is backward, and that the process for that reason will be all the slower. It will take Russia a minimum of a couple of years after turning out its first to acquire a sufficient stockpile to contemplate a full scale against an America with a large existing stockpile of bombs With almost a million and a half men already under arms

with the greatest navy and air force in the world, the United States now has more than sufficient defense forces for any period of watchful waiting. In fact, its defense establishment is grossly excessive. It does not need conscription or anything elsa

a steady attention to research and a willingness to reform its services for modern war, to preserve the security of America for the time being.

Mass armies, according to the

best military judgement, will have little utility in a future war, despite propaganda of the militarists. The time for an alert and for thinking of mobilization will come only after we know that Russia has the atomic bomb. There will be plenty of time after that to put the nation in a condition of readiness! Until then conscious on or anything approximating it cannot be justified on grounds of necessity, nor should the people permit themselves to be stampeded into it by manufactured scares-

Manufacturers of the

Crall Spiral Paraffin Scrapers

A new, practical and more economical method of eliminating paraffin accumulation in pumping wells has been developed by the Petroleum Specialty Company with headquarters at Pampa, Texas. The spiral type scraper (Pat. appl'd for), now in use by some thirty different major and independent oil producing companies throughout the severe par-affin accumulation area of the Panhandle of Texas, West Texas, and Oklahoma fields, is being acclaimed by far the most practical and economical method of combating this costly item in the lifting

The merits of the equipment have been proven by the companies for the past year and a half. For example: One major Oil Company's well locat-ed in the South Pampa field, the paraffin accumulation in the tubing was so severe as to necessitate steaming of tubing every two weeks and in addi-tion to this the rods and tubing had to be pulled once a month (a conventional stripping job) in order to maintain the production allowable. This was a very costly operation, aside from the loss in production damage to rods, tubing, etc. On August 14, 1946, Crall Spiral Paraffin Scrapers were installed on 1600 feet of %" x 25' company used sucker rods and installed in this well for a total scrapered cost of \$256.00. For the past year and a half no production loss or expense has been incurred due to par-affin accumulation in this well.

We could continue citing individual well per-formances but will only add that major oil companies have wells equipped with our scrapers throughout the Panhandle area and are at this date installing ad-

The concise basic working principle of Crall Spiral Paraffin Scrapers is based on the fact that as long as the rod string equipped with the scrapers is re-ciprocated and the scrapers are placed close enough together to pass with each reciprocation, the complete coverage scraping and churning action of the scrapers in the tubing column of oil prevent par-affin accumulation. You will note the scrapers when installed alternate one a right spiral and the next a left spiral around the rod. This eliminates any tendency of the rods to unscrew as well as other desirable features in preventing pariffin ac-cumulation. The application of the scrapered rods to any well is a simple matter. All the information we need is the size of tubing in order to scraper your rods. The stroke of the well is describe as the long-er the stroke, the less scrapers needed per rod and consequently the cheaper the installation per well.

PAMPA

YOU CAN GET

Well, it seems the bad weather the nation over has convinced the powers that be that the fuel shortage in this nation of ours is a real serious matter. Now if will only make it possible the oil industry to obtain all steel needed for production and drilling this shortage can be greatly aided. Shortage of steel has been a stumbling block to all forms of oil production from actual drilling to the transporta-iton of it. When the oil men are given a green light on steel the industry will take care of a great part of this shortage. This week's issue of LIFE Magazine pictures the circumstances under which fuel was dispensed in various sections of the country. . . Makes you feel lucky to live here in the center of oil and gas production which makes such scenes far-fetched in this area.

A Milwaukee wife made her hubby a sandwich of sliced tulip bulbs, mistaking them for nions. He's probably wondering when the flowers are going to come up.

PRICES....

Snatching Food From Your Table

THINK ...

JUST HOW HIGH ARE PRICES?

Almost everyone is talking about prices in terms of money. Actually the true price of anything is what it takes in bushel of wheat, or head of cattle, or hours of labor to buy it. It is true you pay more for most things you buy todav---

BUT NOT NATURAL GAS

In 1941 it cost us \$2.27 to lay a foot of pipeline. Today it costs us \$5.68 to lay a foot of pipeline, yet we are selling natural gas at the same price of 30c per thousand feet for the first thirty thousuand as in 1941.

REMEMBER

We are helping you to keep that 1948 budget down . . . for by today's standards you are actually buying---

HEAVEN HEAVEN
"In heaven there'll be no parting, no pain to bear;
No care-worn brow, no sigh, no silvery hair;
No death to snatch our loved ones from our side,
No angry waves, no sea, no treacherous tide.

In heaven there'll be no thirst, no cry for bread;
No soul who knows not where to lay his head.
No one to feel the Winter's chilling blast.

For there the piercing storm will all be past.

In heaven there'll be no toil without repay; building for a brief ephemeral day;
For all the joys that prophets old have told have told
'Twill take the endless ages to unfold.

In heaven there'll be no weary pilgrim band; No seeker for a better, fairer land. For all who reach that blissful, happy will never cry nor sigh, nor wish for more."

In all these things we are more than conquerors through Him that loved us. Romans 8:37.

All Description of the property of the Hank Breining, Lefors, Texas 19-Watch Repair

for him. Dr. Holbrook's beautiful,

gadabout wife has just left for

France to look after some prop-

erty there. The evening of her departure, the doctor, lonely, asks

Janice to have dinner with him. It is his birthday. Janice, after a

noment's hesitation, accepts-al-

though it means breaking a date

with Ben Archer, childhood friend

who is very much in love with

her. Erie buys Janice a corange,

takes her to Michelle's for dinner.

Later they ride through the park

in a hansom cab. The evening is

perfect. Before taking her home,

with him and listen to some of

hesitates, then decides her fears

are foolish, "You know it's all right, don't you, Janice!" he en-

treats. "Of course it's all right,"

she replies. "I'd love the music."

Then she adds: "My head has just got elear of Michelle's special

wine. Now I know why it is so

special-it seems harmless when you are drinking it, but it creeps up on you so that too much might

isp on you so that too much might become dangerous—like smolder-ling, unseen fire." "If I had known that you got that big a surprise from Michelle's wine I'd have from Michelle's wine I'd have finsisted on your taking more." the doctor anys. "It's not sensible to pass up anything that sets you on fire."

on fire."
These are words that he—and ahe—are to remember, but neither know it at the time.

ERIC'S house stood in total dark-

ness when their taxi deposited

his favorite records. At first she

Agnes Reynolds, Real Estate Shamrock, Texas

THIS IS THE TRUTH . . .

And I ought not to mention it - - - I left here for Missouri the other day, and made it as far as Claremore, Okla, to spend the night - - - Now Cloremore is supposed to be an up and coming town - - - its where Will Rogers used to be - - - in fact everything down there is named after him - - - but what was so good was that we went into the Will Rogers Hotel to eat supper, and they had fried chicken on as their special for that day - - - I ordered it and here's what they brought me - - - A fried neck - - - a fried gissard - - - a fried back, and another piece that I didn't know what it was - - - it was some kind of a joint - - - I figured it was where they had cut the wing off from the chicken body - - - Imagine a Hotel like the Will Rogers serving something like that - - - That's the first time that I've ever seen a chicken neck and gissard served on a fried chicken dinner - - - I wouldn't have thought nothing about it if they had at least given me a piece of breast, or even a wing -- - I ask the waitress about it, and was she surprised - - - what she was surprised over was that I had even questioned them about it, so I shut up - - - Imagine me from Texas, or anybody else, as for that matter trying to eat anything like that with artificial teeth - - - besides it was fried hard - - - I don't know what they do with the good parts of the chicken down in that country - - - maybe they ship it to Texas - - - those people down there seem to be pretty well fed though - - - I didn't see over one or two at the most that looked too thin - -,-

I have a letter from an out of town owner and he says he has an 8 room duplex over on Wells Street (332) that he wants to sell in the next thirty days - - - wants 6500 for it - - -

I have another deal here that's a good one - - - one nice furnished duplex bringing in 90.00 per month - - - big 11 room two story house with three baths - - - up-stairs furnished, the two down-stairs apts net furnished - - - this property located on 100x140 ft. lot - - - take 17,000 for a quick sale.

The owners of the Stauffer System here want to sell it - - - I was supposed to run an ad two weeks ago on this but something came up, and now I think they're sore at me - -- they have a two year lease on the location - - - the business is good -- its making money, but they have other business interests and want to sell - - - you could ad something else with it - - - say a good beauty shop - - - the price is very reasonable - - - if you would be interested in something like this get in touch with the owners - - - its located at 918 Alcock St.

I can't get over that 1.25 fried chicken dinner - - - I wonder if those people just don't know any better.

A LIST OF GOOD HOUSES - - -

Nice 4 room furnished - - - furniture extra good - - even includes deep freeze box - - - electric washing machine - - - vacuum sweeper - - - good garage - - - fenced in back yard - - - this is a good buy.

5 room 2 bedroe Large 6 5 room	and bath East Albert and garage east part om and garage north room house Ballard newly decorated and bath, double gara	part Street		6250 10,500 3800 4250
rooms .	and bath, hardy clean ni or	ce rent house	in rear -	a bar
2 bedroom 4 room 5 room	and shower bath, gar om, modern, good loc and bath, new and basement, good ledwoom, modern	ation		2800 3500 3750

Beautiful 8 room home on the hill - - - 60x126 ft. lot - - - large double garage, best location - - - must be seen to be appreciated - - - reasonable price.

I don't see how big hotels like that Will Rogers gets any business serving that kind of chicken - - - what do they do with the good parts.

And now I've been handed a listing on some good land -153 acres - - - 4 room house, Gas, Electricity and water - - - made a big wheat crop last year - - - all in cultivation - - - located east of Pampa - - - 85.00 per acre - - - im-

For Sunday's calls on the above listings, Phone 2056W - - - ask for Jim Arndt - - -

When you read this go to Church - - - You'll feel better

the rest of the day.

Officials Point to Socialism Danger In Rail Industry

CHICAGO - The railroad in-dustry is the door through which socialism threatens to come to the United States, C. E. Johnston, of Chicago, chairman of the Western Association of Railway Executives, warns in an article in the current issue of "Traffic World" maga-

After setting forth statistics showing that the railroads over a period of 25 years have not been permitted to "earn more than a meager and wholly inadequate return" insufficient to provide improvements and pay dividends, Johnston observes that "if and when the railroads fail to be self-supporting, their by the government will be inevitable, since the country cannot possibly survive without rail

transportation. Most informed students of the subject believe that if the railroads are allowed to fall into govarnment ownership," the article continues, "the same fate ultimately will overtake all other basic industries and public utilities just as is happening in England today. That, of course, is socialism and it might well be the fore-runner of communism and dictatorship-the ultimate punishment for failure to handle a fundamental economic problem courrageously and soundly, and in

The financial stability of the railroad industry is very definite-ly threatened, Johnson wrote, as a result of the accumulating effect of several factors during the past 25 years.

"As a public utility engaged in interstate commerce," he said, "railroads are subject to continuing and minute regulation by a federal agency, the Interstate Commerce Commission, in almost all matters pertaining to their opera-tion. Probably the most important exception is in connection with the matter of wages and working conditions of employes; and those, too, are influenced greatly, and often determined by the action of boards and bureaus of the government.

Other factors whose influence has been felt in the period since World War I, are the accelerated growth of competing forms of transportation, and the subsidies granted these competitors by gov-ernment, federal and state, and

the depression of the 30's.
"The record shows that the public has enjoyed a railroad trans-portation service for the past 25 years with an inadequate return to investors in railroad property and in many instances with a complete loss of their holdings through bankruptcy proceedings.

"No form of free enterprise can survive under such conditions. The public, if it honestly believes in the free enterprise system, should expect and be willing to pay in freight and passenger rates all that is required to produce the highest quality of rail service, including a fair return on invest-

Discussing capitalization of the railroads. Johnston said that the several valuations issued by the Interstate Commerce Commission have all been greater than the net capitalization of the carriers as a whole, thus removing any possible basis for the claim that the railroads collectively are overcapitalized.

'Using the Commission's esti-\$20,662,713,588, which is \$1,926,253,743 below the net in vestment of the carriers, a re turn of 6 percent annually re-flected in net operating income would amount to \$1,237,363,000. The actual net operating income of Class I railroads for the 25year period 1922 to 1946 averaged \$397,251,500 per year below a 6percent return.

'One appraisal of the long-range effect of the commission's admin-istration of the rate provisions of the Interstate Commerce Act may be obtained by a review of the railroad bank policies. The peak was reached in 1939 when 75,028 miles of Class I railroads were operated by receivers or trustees. This was 33.8 percent of the 220,915 miles of road owned by Class I railroads on December 31, 1939. Since then many of these railroads have been reorganized with great loss to investors in rail securities.

"It cannot be truthfully said that an unreasonable amount of money has been appropriated from earnings over the 25-year period for payment of dividends. For every dollar paid out in dividends during the period, two dollars were put back into the property for improvements.

England's first poet laureate was Ben Jonson, so honored in 1617.

STOMACH

Help Get Food Digested to Relieve Yourself of This Nervous Distress .

Do you feel all puffed-up and miserable after every meal, taste sour, bitter food? If so, here is how you may get blessed relief in helping your stomach do the job—it should be doing—in the digestion of its food.

Everytime food enters the stomach a vital gastric juice must flow normally to break-up certain food particles; else the food may ferment. Sour food, acid indigestion and gas frequently cause a morbid, fouchy, frettil, peevish, nervous sondition, loss of appetite, underweight, rectiess sleep, weaknes.

To get real relief you must increase the fic-7 of this vital gastric juice. Medical authorities, in independent laboratory beste on human stomachs, have by positive proof shown that SS Tonic is maxingly effective in increasing this flow when it is too little or scanty due to a non-organic stomach disturbance.

w when it is too little or scanty due a son-organic stomach disturbance. Is is due to the SSS Tonic formula ich contains special and potent actiting ingredients.

Lise, SSS Tonic helps build-up non-main, weak, watery blood in nutrinal anemia—so with a good flow of s gastric digestive juice, plus rich redood you should eat better, sleep better, it better, work better, play better.

Liveld punishing yourself with over-me of sods and other alkalizers to interest gas and blooting when what
