RB-47 Incident 'Act Of Piracy'

By BRUCE W. MUNN United Press International

UNITED NATIONS, N.Y. (UPD) The United States accused Russia today of a "criminal and reckless act of piracy" in shooting down a reconnaissance plane. It said a Soviet fighter plane tried to force the RB-47 over Soviet territory before it was shot down over international waters.

U.S. Ambassador Henry Cabot Lodge said secret electronic devices based in England tracked the plane throughout its entire flight. He asked if Russia was seeking a pretext for war.

In a formal resolution Lodge challenged Moscow to submit the case to investigation by a commission of the United States and Russia and a third party acceptable to both, or to take it before the International Court of Justice. Russia immediately rejected the demand.

The United States wanted the commission to inspect the site, examine the wreckage and question the survivors and other witnesses.

"Our purpose here is not to defend ourselves," Lodge said. "We have done nothing which requires defense. We want the council to deal with this criminal and reckast just what would be in the lank because "it is still in the rocess of negotiation."

Cubans Plan To Celebrate Revolution

HAVANA (UPI) - Thousands ley of admirers of the "new Cuba" headed into the Sierra Maestra loday for a massive bivouac honoring Fidel Castro's 26th of July revolutionary movement.

Leading the official honor roll of Iron Curtain guests was a Red Chinese trade delegation which 'ast weekend bought 500,000 tons of Cuban sugar to initiate a fiveyear economic pact.

Members of the high - level Peiping mission won a lusty ner ovation at a Santiago rally Sunday when they joined President Terry Rd. Osvaldo Dorticos in heralding a 'new Cuba" that will be able to withstand U. S. "imperialism" nd "aggression."

The government confidently prelicted that a million persons would be encamped in and around the former Castro guerrilla headquarters of El Caney de Las Mercedes when the premier arrives there Tuesday to launch the -7th anniversary celebration. However, there were indications

that Roman Catholic officials and other anti - Communist quarters were attempting to dissuade Cubans from attending the moun-Communist - supported Latin Modern Beauty Shop, Mo 4-7131. tainside rally, as well as the American Youth Congress which coincides with it.

Braves To Top By GARY KALE United Press International

It may have felt like a, century for the Milwaukee Braves since they occupied first place in the National League, but calendar-wise it was exactly 103 days.

On April 12, Milwaukee won the season opener along with three other clubs. That was the last time the Braves occupied the top rung until Sunday's 7-5, 1-0 doubleheader sweep over the Chicago Cubs.

en hawk soor high in the air you must have wondered at the deficacy of the mechanism that permits the bird to maintain its balance by merely shifting or fluttering its outstretched wings every once in a while.

And, at the circus, you must have wondered equally at the skill of the tightrope walker who glides across the arena without anything to cling to but an open

umbrella held over his head. The secret of these balancing acts is a sort of built-in spirit level situated in our inner ears. Besides its connections with our hearing apparatus, it is also intimately hooked up with our eyes

and muscles. That's why the tightrope walker focuses his sight on the stretched wire. Then, the split second his eyes notify the spirit evel that he's wandered off the true, signals go out to the muscles to make the needed adjustments. He teeters a bit from side to

side and manipulates the umbrella while you and I hold our breaths in excitement. And before we can count three he's gotten himself righted and is advancing toward his goal. Now when gremtins get into this delicate balancing mechanism, the afflicted person usually complains of dizziness (vertigo)

or unsteadiness (ataxia). If the trouble is in the inner ear where the spirit level is located, the vertigo and ataxia are often accompanied by deafness or a fairly constant ringing

sound (tinnitus). I've given you a word-picture of this complex mechanism so you'll understand what a tough job faces your doctor. He may have to serid you to an ear, eye and nerve specialist.

Fortunately he can solve your problem quite easily most of the time. Sometimes the ringing and deafness are due to nothing worse than a ball of wax jammed against your eardrum.
