Pampa To Host ...

19-County HDC District Convention Tomorrow

Home Demonstration Club women from 19 Texas Panhandle counties will meet at Pampa High School tomorrow for the District One meeting of the Texas Home Demonstration Association.

Registration will get underway at 9 a.m. in the high school and will be concluded at 10 a.m. During registration, a Coffee Hour will be held in the high school cafeteria with Gray County Home Demonstration Clubs, Goodwill, Worthwhile, Merten, Bell and Le-fors, as hostesses.

Mrs. T. J. Parsons of Hereford, District One vice-president, will be the presiding officer during the meeting, which will be concerned with the state theme "Facing The Challenge of Today's Task." Assisting with convention business will be Mrs. Tom Clifton of Hartley County, secretary; and Mrs. Eltzy Vanderburg of Hansford County, parliamentarian.

Special guests and speakers will be Mrs. Melton McGehee of Way-side, state THDA president; Mrs. C. R. Berkley of Odessa, state THDA secretary; Miss Bonnie Cox of College Station, Extension Organization specialist; and Gil Lamb of Muleshoe, co-owner of the radio station, KMUL, in Muleshoe.

In the morning session, Mrs. Berkley will discuss "THDA And You"; Miss Cox will speak on "Women in the Space Age"; and Mr. Lamb will talk on "Alcohol and Alcoholism." In the afternoon, Mrs. McGehee will have as her topic, "Places To Go."

Mrs. T. D. Anderwald, Gray County THDA chairman, which is host-county for the district meeting, will extend a welcome to guests with response offered by Mrs. Gilbert Wynn of Dallam County.

The morning program will begin with honor to the flag and invocation offered by Jay Channell, minister of the Harvester - Mary Ellen Church of Christ.

Official welcome to visiting delegates and guests, will be given by Mayor E. C. Sidwell and County Judge Bill Craig.

Included in the morning session will be introductions of THDA board members and visitors by Mrs. Parsons; introduction of the Extension Staff by Mrs. Edith L. Wilson, District One agent; resolution report by Mrs. Ralph Price of Parmer County and credential report by Mrs. Jim Latham of Ochiltree County.

An election of a District One vice-president is on the business schedule of events for the district meeting. Mrs. R. A. Hodges of Canyon, nominated by the Pleasantview Club of Randall County of which she has been a member for 12 years, is the only candidate for this office.

Mrs. Hodges has served in all elective offices, on all standing committees either as a member or chairman in her club. She is now chairman of Randall County Home Demonstration Council. She has served as THDA chairman for two years and for two years was state recreation committee chairman.

Luncheon will be served at 1:30 p.m. in the high school cafeteria with Mrs. Douglas Flynn of Pampa offering invocation.

In the afternoon session, business will get underway with reports of the credential, resolution, District 4H Fund, election returns

committees and invitations for the 1962 district meeting. Following which, a summary of the 1962 district meeting will be given by Mrs. C. E. Roark of Oldham County.

Committee chairmen in charge of arrangements for the meeting are Mrs. Vardeman Smith of Pampa, registration; Mrs. Jim Latham of Perryton, credentials; Mrs. Ralph Price of Parmer County, resolutions; Mrs. Emil Kersten of Wellington, courtesy; Mrs. H. S. Fuller of Deaf Smith County, election; Mrs. A. L. Parks of Hutchinson and Mrs. Ray Alt-miller of Lipscomb County, approve minutes.

Group singing, throughout the meeting, will be under the direction of Mrs. T. J. Parsons.

Dirksen Gets Unexpected Bonus In Tuesday Illinois Primary Election

CHICAGO (UPI)—Returns from Illinois' first-of-the-year primary gave Senate Minority Leader Everett M. Dirksen an unexpected bonus and his Democratic opponent, Rep. Sidney K. Yates, a surprise setback today.

Dirksen, a wise and wily veteran of Illinois political wars, and Yates, the handpicked protégé of Chicago Mayor Richard J. Daley, both coasted to senatorial nominations as expected in Tuesday's first major primary of 1962.

But a man who campaigns in an Uncle Sam suit whose middle name is legally "America First" dimmed Yates' showing.

Lar (America First) Daly, a Chicago jobber who habitually runs and loses in Illinois elections, took more than 20 per cent of the Democratic primary vote away from Yates. Most of his unlooked-

for total was collected in Chicago, where Yates has been a congressman for seven years and where the power of Mayor Daley is supposed to be unquestioned.

Reports from 8,105 of Illinois' 10,344 precincts, including 4,343 in Cook County (Chicago), gave Yates 582,807 votes to 189,315 for Daley. With virtually all of the Chicago votes in, Yates' and Daley's Cook County totals were 368,895 to 128,520.

Dirksen in 8,412 precincts amassed 462,340 votes to 80,538 for Chicago attorney Harlan D. Jones, a political unknown. The organization orator from Pekin, Ill., had 104,649 votes to 30,759 for Jones in 4,261 Cook County precincts.

As if Daley hadn't done enough to Daley, the mayor suffered a personal and bitter setback on his home grounds.

Steel Price Boost Triggers 2 Anti-Trust Investigations

Increase In Cost Of '63 Cars Seen By Auto Industry

DETROIT (UPI)—The auto industry, handed a \$90 million bill for higher steel prices, is expected to pass it on to the American consumer next fall by raising the price of 1963 model cars by perhaps \$50.

The list price of 1962 model cars, however, is not expected to be affected by the \$6 per ton steel increase announced Tuesday night by U.S. Steel Corp.

That was the unofficial consensus in the industry. Officially, the five big carmakers began studying the unexpected steel price hike.

One industry executive commented privately that, "We're very unhappy. The steel price increase is unwarranted."

Industry sources said no boost in car prices is likely during the 1962 model run because the industry historically announces a basic price each year and sticks with it until new models come out.

In addition, carmakers already have an average one-month stockpile of steel — an inventory built up as insurance against a possible steel strike. This steel was purchased at the old price.

The industry has not had a general across-the-board increase since 1958 — the time of the last major steel hike. Then prices went up about 2 per cent, or \$50 on a \$2,500 car, an average that may be matched this year.

The industry uses upwards of 15 million tons of steel a year for cars, trucks, other transportation vehicles, and spare parts. Between one and two tons of steel are used in cars.

Thus, the steel hike would mean a \$6-12 basic increase in car costs. But the total bill would be \$90 million. Besides, steel is usually a bellwether for other industries providing auto materials. So the car unit cost could be higher than \$12.

The auto industry, which increased prices steadily from 1955 through 1959 models, actually reported a slight decline last year, even though it signed a new wage contract for 55,000 workers.

New Monogram For CoC Adopted

The Pampa Chamber of Commerce has a new monogram for its stationery and for use on podiums and backgrounds at chamber luncheons and banquets.

The monogram, recently approved and adopted by the board, is circular with the Texas Lone Star and a map of Texas in the center. A hat hangs on the Top O' Texas.

The words "Pampa Chamber of Commerce" are emblazoned on the inside rim of the circle and "Planning for Progress" is printed across the map.

The new monogram was designed by E. O. Wedgeworth, chamber manager.

Students Sent Home As Teachers Go On Strike

NEW YORK (UPI)—Thousands of public school students were sent home today and rioting closed one school shortly after disgruntled teachers in the nation's largest school system had struck for higher salaries.

The Board of Education reported that the teaching staffs at a number of the city's 840 schools were so reduced by the strike that older students whose parents were not working were sent home. All schools were open, the board said, but attendance was limited to 40 pupils for each teacher.

Most students reported to their classrooms this morning and were encouraged to do so by picketing teachers, who began to march outside schools in the five boroughs at 6:30 a.m. Many

classes were being conducted in orderly fashion by teachers who crossed the United Federation of Teachers picket lines or by supervisory employees.

However, 2,300 students who were gathered in the auditorium at Seward High School became rowdy when the bell rang for the commencement of classes. The 15 non-striking teachers in charge were unable to control the students and six policemen were called.

The policemen also were unable to handle the shouting, fighting students and they were ordered out of the school building. The fighting continued in the streets until the students dispersed. The school was closed as a safety measure.

The exact number of teachers participating in the strike was not known. George Washington High reported only 52 of 127 teachers in attendance while Manhattan High reported 100 per cent teacher attendance. The union claims 15,000 members among the city's 40,000 public school teachers.

The teachers, who voted to strike 2,544 to 2,231, face loss of their jobs under the state Condon-Wadlin bill. They currently earn \$4,800 to \$8,600 a year and have been offered wage increases totaling \$28 million-a \$700 annual increase.

The "bark was worse than the bite" last night as a line of thundershowers growled across the Top O' Texas.

Bashful clouds deposited .19 inch of moisture in The News rain gauge but complained loudly in doing so with rolling thunder and brilliant flashes of lightning.

A repeat performance may be in store for tonight as Amarillo Weather Bureau prognosticators expect thundershowers late this evening.

Meanwhile, other parts of the state were also getting some moisture. Some parts experienced weather of a more violent nature.

A wave of spring storms ripped through North Central Texas during the night. At least one tornado touched down in Irving, and half the size of baseballs pounded the Dallas-Fort Worth area.

Wind gusts were clocked as high as 60 miles per hour as the storm front swept eastward across the state. Rainfall totals measured nearly an inch and a half.

The Weather Bureau said the unsettled conditions would continue most of today. Scattered thundershowers dotted the eastern Panhandle early today, and intermittent drizzle fell across East and Central Texas.

A weak cool front covered the northern half of the state and was moving slowly southward. Temperatures were only slightly lower, with the overnight minimums ranging between 41 degrees at Dalhart and 73 at Corpus Christi.

Rainfall totals for the 24-hour period that ended at 6 a.m. included 1.45 inches at Rosser, 1.10 at Pilot Point and Carrollton, 1.03 at Amarillo.

(See WEATHER, Page 3)

Strong Attack From President Expected

By WILLIAM J. EATON
United Press International

WASHINGTON (UPI)—A surprising \$6 per ton increase in steel prices triggered two antitrust investigations today and was expected to draw a strong attack from President Kennedy.

Pattern-setting U.S. Steel Corp. announced the increase in Pittsburgh Wednesday night just five days after signing a new labor contract that calls for a one-year wage freeze and additional fringe benefits.

Justice Department and Senate investigators were ordered to begin investigating possible price-fixing if similar increases are put into effect by other "big steel" firms.

Kennedy, who has hailed the wage agreement as non-inflationary, was ready to assail U.S. Steel's latest move in "strong terms," an administration source said.

The President had a readymade forum to express his views. He was scheduled to hold a nationally televised news conference this afternoon and was certain to be questioned about the price boost.

The increase was seen as a severe jolt to the administration's hopes for preserving price stability at home in a time of crisis abroad.

The President was said to feel that the rise in steel prices was a short-sighted step that might touch off an inflationary spiral.

U.S. Steel President Leslie W. Worthington defended the across-the-board increases as "modest" and necessary to "catch up" with mounting costs since steel prices were last raised in 1958.

The steel industry cooperated last fall when Kennedy asked it to hold the line on prices even though steel workers received a wage increase averaging from 7 to 10 cents an hour under the 1960 contract.

Most government economists anticipated that steel producers would forego any price increase now because of the relatively inexpensive 1962 labor pact and stiffer competition from aluminum, plastics and steel imports.

If other firms follow U.S. Steel's example it could mean higher prices on autos, refrigerators and washers for American consumers later this year.

At least one other big steelmaking firm—Republic—indicated it would follow U.S. Steel's lead shortly. Other giants in the basic industry said they would review their prices, too.

Atty. Gen. Robert F. Kennedy swung into action soon after the announcement. A spokesman said the Justice Department would take an "immediate and close look" at steel pricing practices.

Chairman Estes Kefauver, D-Tenn., of the Senate Antitrust subcommittee ordered his staff to make an immediate inquiry into what he called U.S. Steel's "shocking and irresponsible" move.

"Whether other steel companies slavishly follow U.S. Steel's proposal will determine whether there is any real competition in the steel industry," Kefauver said.

Other congressional reaction ranged from crisis of "betrayal of state law he had no authority to act in the matter."

Atty. Norman and the CBGG group then announced the matter would be carried to District Court which resulted in the petition that was filed yesterday.

Today both sides in the City Hall controversy were busy preparing for the clash in District Court Friday afternoon.

A check shortly before noon today showed that 13 absentee ballots have been received by the City Secretary in the election on the mayor scheduled for Tuesday.

If it comes from a hardware store we have it. Lewis Hdw. Adv.

Solons Express Dismay At Firm's Price Increase

WASHINGTON (UPI)—Democratic leaders in Congress today expressed dismay at U.S. Steel's announcement of a \$6 a ton price increase.

Senate Democratic Whip Hubert H. Humphrey, Minn., said it "possibly destroyed an effort to hold back inflation."

"Regrettably," he said, "steel management has failed to cooperate" with the administration's effort to keep price lines steady.

Republican leaders Sen. Everett Dirksen, Ill., and Charles Halleck, Ind., declined comment until they had studied the developments. So did Speaker John W. McCormack.

House Democratic Leader Carl Albert, Okla., said the price was "unfortunate" and "I'm sorry to hear it."

Sen. Estes Kefauver, D-Tenn., chairman of a Senate antitrust subcommittee, said he had ordered his staff to "begin an immediate inquiry into the matter."

He called the increase "shocking and irresponsible."

"I do not see how it can be justified by the wage agreement which was negotiated upon the urging of the President and which was supposed to be noninflationary."

One Republican, Sen. John Sherman Cooper, Ky., said "I think it's a mistake."

Sen. Gale W. McGee, D-Wyo., called it a "betrayal of a united effort of all elements of our economy to hold the price line."

Sen. J. W. Fulbright, D-Ark., said "It's contrary to what I (See SOLONS, Page 3)

Hearing Set On Recall Election Restraining Order Friday

Judge Lewis M. Goodrich of the 31st Judicial District will conduct a hearing at 2:30 p.m. Friday to determine whether the recall election scheduled for next Tuesday will be held on Mayor E. C. Sidwell alone or a new election will be called on the mayor and all four ward commissioners.

Judge Goodrich, in a writ of mandamus seeking a temporary restraining order to hold up the scheduled April 17 election on the mayor, is asked to order a recall election on the mayor and all four city commissioners as originally sought in recall petitions circulated by the Pampa Junior Chamber of Commerce.

The petition, filed in the names of Herman Whatley, W. C. Fry, Claude Wilson, A. W. Lunsford and A. C. Troop as plaintiffs, asks that the names of five candidates for the offices to be vacated, in event of recall, be placed on the recall ballot. The candidates are Herman Whatley for mayor and Joe Fischer, W. C. Wilson, Felix B. Fisher and A. C. Troop for commissioners in Wards 1, 2, 3, and 4, respectively.

The writ of mandamus also seeks to enjoin and restrain the election judges, named for the April 17 election, from holding and conducting the election, pending final determination of the in-

junction request. The election judges, Mrs. Kenneth Dunn, Mrs. W. D. Price Jr., Bill Watson and H. H. Boynton, also are named as defendants in the court action.

Sheriff Rule Jordan yesterday afternoon served notice upon Mayor Sidwell and Commissioners Lloyd Simpson, Newt Secrest, Leon Holmes and L. P. Fort to appear in District Court for the hearing at 2:30 p.m. Friday.

The commissioners will appear with their legal counsel, Atty. Clayton Heare of Amarillo, whom the commission employed to represent them in the recall court battle.

The five plaintiffs will be represented by Atty. Walter T. Norman of the Borger law firm of Gassaway, Allen and Norman, retained by the Citizens for Better City Government, a Pampa group which has been carrying the fight to oust the City Commission since the Junior Chamber of Commerce stepped out of the picture when the recall petitions were filed March 28.

Decision to circulate the recall petitions was reached by the Junior Chamber of Commerce February 28, one day after the City Commission, had requested the resignation of City Manager John Kooztz. Kooztz resigned on March 15.

Meanwhile, the Jaycees went about the business of circulating the petitions and filed them with the City Secretary March 26. At the same time the slate of five candidates was filed to be placed on the recall ballot.

Notice of the filing of the recall petitions was delivered to the City Commission March 27. On Monday April 2 the Commission was given an opinion by their legal counsel that only the petition on the mayor was valid. Petitions on the four ward commissioners, they were advised by their attorney, did not contain sufficient signatures.

The commission on the same day ordered that a recall election for the mayor be held on April 17 but refused to order an election on the four commissioners.

On Wednesday night the Citizens for Better City Government met and elected Lewis Hackley chairman and employed the Borger law firm to contest the action of the city commission. The following day, Thursday, April 5, Atty. Norman requested County Judge Bill Craig to order the election on the mayor and all four commissioners, contending that all of the petitions were valid.

Judge Craig set a hearing for Monday, April 9, at which time he handed down a ruling that un-

der state law he had no authority to act in the matter.

Atty. Norman and the CBGG group then announced the matter would be carried to District Court which resulted in the petition that was filed yesterday.

Today both sides in the City Hall controversy were busy preparing for the clash in District Court Friday afternoon.

CAMPAIGNS IN PAMPA — Jesse Owens, Democratic candidate for Associate Justice of the Supreme Court of Texas, Place 1, was in Pampa today on his state-wide campaign. Owens resides in Amarillo where he is a licensed lawyer. He was County Judge in Crowell and Foard Counties for four years; District Attorney in the 46th district for four years; Assistant Attorney General for three years and District Judge in the 48th district for nine years. Owens was accompanied by his wife, who is his campaign manager. (News Photo)

Professional 'Self-Improvement Clinic' For Teenage Girls Planned By Altrusa

Altrusa Club of Pampa will begin a series of "Self-Improvement Clinics" for teenage girls on Friday at 4 p.m. in Lovett Memorial Library under the direction of Miss Lou Ella Patterson, Vocational Information chairman.

Mrs. Thelma Bray, committee member, has been appointed as chairman of this special project, which has grown out of a series of classes on good grooming started last year by the club and held in the Pampa Junior High School.

The first clinic in the new series will feature a workshop to be conducted by Mrs. Vivian Heit of the Heit Modeling School in Amarillo, who will be present to advise and demonstrate "self-improvement in appearance."

At a recent planning session, held in the home of Mrs. Bray, 1300 Hamilton, committee members attending in addition to Miss Patterson and Mrs. Bray, were Mrs. Vera Lard, Mrs. Evelyn Mason, Mrs. Rufe Jordan and Mrs. L. L. Harkins, Altrusa Club president.

Also attending were a group of teenagers, Misses Judy Robison, Barbara Hopkins, Paula Sealey, Pat and Pam Ludeman, Betty Hinderliter, Jan and Kay Harkins, Gail Gilpatrick and Jane Murphy.

According to the Vocational Information committee, "these classes are planned to help the teenage girl cultivate the qualities of the true charm of inward beauty and at the same time to be better able to choose techniques to enhance the personal appearance of the individual."

All teenage girls, junior high through high school, are invited to attend the free clinics.

Mothers are invited to inquire about these classes and to encourage their daughters to take advantage of the professional leaders' lectures in each workshop session.

VB Members Tour White Deer Homes

WHITE DEER (Spl) — Venado Blanco Study Club met recently with Mrs. Finis Keeton. The members toured six new homes in White Deer. Houses visited were those of Messrs. and Mmes. E. F. Tubbs, Winfield Powers, George Colfee, Alvin Williams, John Rapstine and Mrs. J. C. Freeman.

The group returned to the Keeton home for refreshments and a short business meeting.

Attending were Mmes. Paul Buchanan, Bob Eastham, Olan Vinson, Joe Wheeler, Curtis Lee, R. J. Sailor, Felix Ryals, Leon Nickolson, C. C. Kelly, Floyd Ulrich, Orville Craig, Roy McCallie and Roy Simmons. Mrs. Powers was a guest.

Mrs. Howard Has HD Club Meeting

WHITE DEER (Spl) — White Deer Home Demonstration Club met recently with Mrs. Russ Howard. Mrs. Horace Williams presided at the meeting. Roll call was answered by the members with a hint on time-saving. A report on the 4-H club was given by Mrs. Leon Nickolson. The county council report was read by Mrs. Lloyd Collis.

Mrs. Joe Wheeler, food demonstrator, brought to the meeting a dish of sour kraut salad and gave the recipe. Mrs. B. E. Evans presented a demonstration on needle point and displayed several pieces of work done in needle point. Mrs. Evans explained the uses of the different canvases, varying in size and shapes.

The group discussed the district meeting of the home demonstration councils to be held in Pampa on April 12.

The next meeting of the club will be April 17, with Mrs. Sybil Stringer, Carson County Home Demonstration Agent, as guest. Mrs. Leon Nickolson will be hostess.

Attending were one guest, Mrs. B. E. Evans and Mmes. Floyd Ulrich, Clint Freeman, Donald Booth, Lyle Waltz, Ray Armstrong, Nickolson, Lloyd Collis, Horace Williams, Joe Wheeler and Charles Warminski.

STEERING COMMITTEE — Plans for the District One meeting of the Texas Home Demonstration Association, which will hold a one-day meeting here tomorrow in the Pampa High School, have been under the direction of the committee pictured above working with a group of sub-committees. Mrs. A. P. Coombes, seated left, chairman of the Gray County HD Council, when the invitation was extended two years ago to hold the meeting in Pampa and to Mrs. D. W. Swain, seated right, current council chairman, has fallen the duty of carrying out the plans for the meeting. Mrs. T. D. Anderwald, seated center, is the Gray County THDA chairman, who is co-ordinator between district and local council business. Plans for the meeting have been in the making since the first of the year with everything in readiness now to extend Gray County hospitality tomorrow to the visiting Home Demonstration Club women from 19 surrounding counties. (Daily News Photo)

Adams-Hill Vows Are Announced

WHEELER (Spl) — Miss Bobbie Carroll Adams, daughter of Mr. and Mrs. Carroll Adams became the bride of James Harold Hill, son of Mr. and Mrs. Harold Hill, in a double-ring ceremony in March 23, in Amarillo. Mrs. Hill will be graduated from Wheeler High School on May 18.

Mr. Hill graduated from the Wheeler High School in 1958 and attended Canyon-West Texas State College. He is now employed by Phillips Petroleum Company in Perryton.

They will make their home in Perryton after Mrs. Hill's graduation.

Activities Should Influence Clothing Needs: Gray County HD Club Speaker

LEFORS (Spl) — Lefors Home Demonstration Club met recently in the home of Mrs. John Lantz for a program on "Planning Your Wardrobe" given by Miss Louella Patterson, Gray County Home Demonstration agent.

Miss Patterson pointed out that it is important, "to dress for the occasion. Your activities will influence your clothing needs. Clothes for particular activities in which one participates most often will be the first consideration and should make up the greater part of the wardrobe."

"With a limited budget, you will find it safe to buy a coat, hat, shoes and purse the same basic color; dresses and minor accessories should harmonize. Choose a basic color scheme that will complement personal coloring and plan from there."

"Clothes for church or informal parties should be dressy, but planned as a coordinated costume. For parties, use more elaborate accessories. Play clothes, work clothes and rest garments should always be chosen with great care for freedom of action and comfort. Shoes should always fit properly and comfortably, as well as being fashionable."

Roll call was answered by stating "the color of my best accessory."

During the business meeting, plans were discussed for a Spring Rummage Sale to be held April 6-7. Members were requested to gather rummage. They were also reminded of the Mothers' Day dinner and that sewing classes will begin on April 4 at 1:30 p.m. in the home of Mrs. Lantz.

Plans For Girl State Representative, District Delegates Named By Auxiliary

Mrs. L. K. Stout was hostess to the American Legion Auxiliary in her home on Thursday evening for a salad supper and business meeting.

The meeting opened with prayer by Mrs. Katie Vincent.

Included in the business meeting, conducted by Mrs. Stout, was the Council of Clubs report, given by Mrs. Shotwell following which the auxiliary voted its support to reelecting the Council of Clubs Room.

Mrs. Shotwell also announced that 4,000 poppies had been ordered and would be offered for sale before Memorial Day in May. She urged all members who would work on the sale to contact her at 4-7121.

Mrs. Stout read a membership letter from the national membership chairman in which it was stated "if it were not for the FBI, the veterans' organizations and auxiliaries, the Communists would have an easy way in the United States of America. The Legion and auxiliary are constantly warring against subversive groups."

An invitation to the district conference was read from the Hereford Unit. The conference is planned for April 27-28 and will be held in Hereford. The local auxiliary voted approval to send \$2 to the district treasurer to apply on a gift for the out-going district president, Mrs. John Coleman of Wellington.

Mrs. Vaughn of Hereford, auxiliary president, requested that all auxiliary members join in the Prayer For Peace. "Each auxiliary member is asked to pause at 9 a.m. each day and pray for peace." The Pampa auxiliary is to notify all of their members regarding the program for peace.

Mrs. Shotwell was appointed to work with the Pampa High School in selecting a girl to represent the auxiliary in the Girl State program. Reservations have been made for one girl from Pampa High School.

Delegates to the district convention, appointed by Mrs. Stout, are Mmes. Cordie McBride, Pat Prosser, Mrs. Stout with alternates, Mmes. Shotwell, Mary Martin and Bessie Foster.

Mrs. Trayler Has Stitch 'N Chatter

WHEELER (Spl) — The Stitch and Chatter Club met in the home of Mrs. Agnes Trayler recently for its regular meeting.

The president, Mrs. W. E. Burke, presided as Mrs. Claude Crouch read the minutes and gave the roll call.

The meeting was spent piecing on three quilt tops for Mrs. Trayler.

Refreshments were served to the following members, Mmes. W. E. Burke, Marshall Wilson, George Warren, Clara Bradstreet, Claude Crouch, Charley McCartney, M. P. Rogers, W. E. Bowen, Henry Hink, Loyd Childress, Otis Ford, and the hostess, Mrs. Agnes Trayler.

The next meeting will be in the home of Mrs. Marshall Wilson.

Mrs. Bert Qualls Honored At Coffee

WHITE DEER (Spl) — Mrs. Glen Satterwhite was hostess for a "Get Acquainted" Coffee honoring Mrs. Bert Qualls recently. Mr. and Mrs. Qualls have recently moved here from Kaskell, Okla.; Mr. Qualls is the new minister for the Church of Christ.

Attending were Mmes. Kenneth Fielmel, Sam Denny, James Mashburn, Stanley Townsend, A. C. Cummings, Arlie Barnard and Bert Qualls.

Dear Abby...

Just Go Ahead And Insult Him!

By ABIGAIL VAN BUREN

DEAR ABBY: I live in an apartment building where people are very friendly. It's the kind of place where they just walk in if your door isn't locked and nobody thinks a thing of it. There is a man living here who works a different shift from his wife. He seems to have a lot of time on his hands and likes to visit with me. (I am married, and don't work out.) This man loves to tell me about his "personal affairs" with other women. I can't figure out whether he is asking me for advice or what. I know his wife and like her. I would rather not hear all this stuff. How can I cut him off without insulting him?

STUMPED BUT GOOD
DEAR STUMPED: Go ahead and insult him! Tell him you are not interested in his private affairs, don't approve of his behavior, and do not want to hear about it. Men who behave this way usually have plans for their listeners. And lock your door!

DEAR ABBY: I am writing to you about a dear friend of mine. She was married at 18, has been married for three years and has had three babies already. Her husband says he would love to have a baby every year but, Abby, how long can she keep that up? She is a lovely girl, but she has no help with her house or the babies and it is making an old woman out of her before her time. What should she do? This is between you and me.

A-DEAR FRIEND
DEAR FRIEND: You are mistaken. It is between your friend and her husband.

DEAR ABBY: I happen to be married to an extremely handsome man who is 12 years younger than I. From time to time I get anonymous phone calls from women who call to tell me that my husband is seeing someone else. There is never anything to it, because I have had him followed. How can I discourage these anonymous telephone calls?

TIRED OF IT
DEAR TIRED: Say, "If you cannot give me your father's name, please give me your mother's."

DEAR ABBY: If there is a reader somewhere who has caught her husband being unfaithful and has forgiven him and has since had a happy marriage, would you please ask her to tell her story? I need it so desperately now. She doesn't have to sign her name.

HURT
Stop worrying. Let Abby help you with that problem. For a personal reply, enclose a stamped, self-addressed envelope.

For Abbsy booklet, "How To Have A Lovely Wedding," send 50 cents to Abby, Box 3365, Beverly Hills, Calif.

By-Laws Approved By Hospital Guild

GROOM (Spl) — The Hospital Guild met Monday afternoon in the hospital dining room.

It was voted that a special pin would be provided for members to wear who put in 50 hours of work. The by-laws for the Guild were read by Mrs. Jim Babcock and it was voted to accept them. They will be presented to the hospital board of directors for approval.

Dr. Robert Clayton was present for the first part of the meeting and outlined what members could do to help the patients and also the nurses.

The Guild is planning to have a food sale on May 12. Refreshments were served to

twenty members by Mrs. Marvin Talley.

Suffer from ARTHRITIS Rheumatism?

Your doctor can tell you there is no known cure for these conditions. However, good fast relief from nagging pain attacks of minor arthritis, rheumatism, backaches and muscular aches can be yours when you take PRUVO. There is nothing faster, safer or more effective. PRUVO's medically proved formula has helped scores of men and women to lead happy and full lives. Buy a trial size bottle. Take as directed. You must get wonderful results as thousands have, or we will refund your money.

SAVE MONEY. Use the larger economy size.

Tourist Group Sets Meeting Here Friday

Plans for development of tourist business in Pampa this summer will be discussed at a meeting of the Chamber of Commerce Tourist Development Committee at 10 a.m. Friday in the Pampa Hotel dining room.

Friday's committee session also will include outlining plans for a membership drive of the Pampa Highways Association, local group for the development of tourist business over all highways leading through Pampa.

Bob Reilly of Denver, district manager of the U.S. Chamber of Commerce, spoke yesterday at a meeting of the Legislative and National Affairs Committee of the chamber.

Reilly discussed current issues in Congress and explained "to members the chamber's methods of keeping the public advised on national affairs."

Calvin Whately, chairman of the LNA committee, presided at yesterday's meeting.

ECA To Offer Hungry Hood Swim Project Hits Nursery Refrigerator

Plans for a swimming program for exceptional children were completed at a meeting of the Exceptional Children's Association meeting held Monday night in the City Club Room with Mrs. Jack Sloan, president.

The swimming program will be started Thursday from 6 p.m. until 7 p.m. in the Pampa Youth and Community Center with a Red Cross swimming instructor in charge. Membership in the Youth Center is not required to participate in the program. All exceptional children in Pampa and the surrounding area are invited to attend.

Included in the business session at the Monday night meeting was an election of officers for the 1962-63 association year.

Elected to serve were Mmes. Jack Sloan, re-elected for a second term; Verne Wyatt, vice-president; Rex Spence, secretary; Bobby Hatfield, treasurer. Named to the board of directors are Mrs. Jack P. Foster, McHenry Lane, A. L. Patrick Jr., Gene Barber, the Rev. Jack Riley and Dr. N. G. Kadings.

The remainder of the meeting was spent viewing films of last year's swimming program and films of an air-plane trip taken by the Boy Scout troop.

Convention pages are Mrs. John Brewer, Mrs. Don Duggan and Yvonne Reynolds, all of Pampa. Delegates, representing Gray County during the business meetings, are Mrs. Lester Reynolds, Mrs. Doug Flynn and Mrs. Glenn Newman.

THDA chairmen, representing their counties, are Mmes. A. J. Newsom of Armstrong; Cecil Walker of Carson; Rex Wooten of Castro; Emil Kersten of Collingsworth; Gilbert Wynn of Dallam; H. S. Fuller of Deaf Smith; T. D. Anderwald of Gray; Elizabeth Van-

Steel Price

(Continued From Page 1)

responsibility" from Sen. Gale McGee, D-Wyo., to the milder "mistake" used by Sen. John Sherman Cooper, R-Ky.

The increase, effective last midnight, applies to U.S. Steel's carbon steel, tin, wire, fencing, pipes, tubing and stainless steel.

House Democratic Leader Carl Albert, D-Okla., predicted it would raise living costs for consumers. Government experts said any rise in the price of a basic material takes a long time to show up in the marketplace.

U.S. Steel Board Chairman Roger M. Blough called at the White House Tuesday night to inform Kennedy of his firm's decision before it was publicly announced.

Observers at a congressional reception in the mansion said Kennedy appeared stunned by the news.

With the aid of Labor Secretary Arthur J. Goldberg, the President has been trying to make the steel industry a shining example of his call for wage-price restraint in the national interest.

The new labor contract, which provides about 10 cents worth of pension, vacation and job security benefits in the first year, was praised by him as "industrial statesmanship."

That is why the U.S. Steel action was regarded as a slap in the face for the administration and indicated why Kennedy appeared determined to dramatize his concern over the development.

In Detroit, auto industry officials indicated that car prices would not be increased on 1962 models but probably would go up next fall, perhaps by as much as \$50.

In Pittsburgh, Steelworkers' President David J. McDonald said he was "troubled" by the move and said the cost of producing a ton of steel has gone down since 1958 despite higher wages and other union-won gains.

Kennedy has no authority to cancel the increase and did not appear likely to seek any price control legislation from Congress to deal with the situation.

Worthington mentioned competitive pressures from domestic producers and imports of foreign-made steel in the statement announcing U.S. Steel's action.

Weather

(Continued From Page 1)

at Ennis, 70 of an inch at Dallas, 26 at Fort Worth, 40 at Tyler and 44 at Valley View.

A tornado whirled from dark skies near Irving in northwest Dallas County, demolished a chicken house, and pulled back into the air. Jerry Housewright said he and his family watched the twister from a window in their home about 100 yards away.

Witnesses reported a tornado funnel dipped from a cloud in West Dallas near the intersection of Hampton and Irving streets. It stayed in the air, then retreated into a cloud.

Heavy hailstones, frozen together in lumps as large as baseballs, battered roof tops and automobiles at Grapevine, a community in Tarrant County northeast of Fort Worth. Police said there were no injuries, but heavy damage was likely.

Hail ranging from pea to golf ball size peppered Dallas and Fort Worth during a torrential downpour. High wind gusts to 60 miles an hour sent trash can lids hurtling down Dallas streets, tore down signs and tree limbs and smashed windows.

The Gainesville area also was hard hit by the thunderstorm. It was accompanied by brilliant flashes of lightning. The sheriff's office at Gainesville said the broad, thunderstorm front took nearly an hour to pass eastward through Gainesville.

Solons

(Continued From Page 1)

thought was the whole purpose of this settlement."

Sen. Wayne Morse, D-Ore., said "I know of no facts to justify the increase. I hope they can prove their case."

Sen. Albert Gore, D-Tenn., was "upset" and Sen. George Smathers, D-Fla., found it "most unfortunate and regrettable."

Rep. Henry O. Reuss, D-Wis., of the joint congressional economic committee said it "couldn't have come at a worse time" and hoped that the administration would investigate, and if it found the increase unjustified, "attempt to bring the force of public opinion on the steel companies to rescind" it.

Armed Forces Day Is Planned

Plans for Pampa's observance of Armed Forces Day were being outlined at a noon luncheon today in the Emerald Room of Coronado Inn.

The Armed Forces Day Committee of the Chamber of Commerce, under the chairmanship of Wesley Langham, also was expected to pick a date in May for the local observance.

A program by the school band and chorus directed by Charles Meech and Mrs. Shelia Williams.

The Pampa Daily News

AN INDEPENDENT FREEDOM NEWSPAPER

We believe that all men are equally endowed by their Creator, and not by any government, with the gift of freedom, and that it is every man's duty to God to preserve his own liberty and respect the liberty of others.

To discharge this responsibility, free men, to the best of their ability, must understand and apply to daily living the great moral guides expressed in the Ten Commandments, the Golden Rule and the Declaration of Independence.

This newspaper is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessings.

SUBSCRIPTION RATES

By Carrier in Pampa, 35c per week, \$4.50 per month, \$5.00 per 3 months, \$15.00 per year. By mail, paid in advance at office, \$10.00 per year in retail.

It is estimated that perhaps 100,000 property owners all over the nation may try to sue airports, in the light of the Supreme Court's decision that airport authorities must compensate those whose property is made less valuable by noise and vibration of aircraft.

With population spilling everywhere with a supersonic plane and its glass-shattering "sonic booms" coming by 1970, the high court has posed a serious puzzle for all those concerned with this country's commercial air transport.

It is correctly said that no one has "enough" money. The reason is obvious. If everyone had all the money he wanted, then no one would have any reason to want money.

There should be no illusion that Social Security is an insurance program. It is not. Long ago, the Supreme Court ruled that it is merely a taxing device.

The single variation is that a bond has been issued which makes the Treasury liable for an ultimate return of the money.

Now when the time comes for the individual to demand "benefits," his claim is sent to the Social Security Department.

The Treasury must redeem it. But the Treasury has no money, either. It already has spent all the sums given to it, including those it received from Social Security.

To repay this bond, the treasury has only two avenues it can follow. It can float another bond to make good on the first bond.

Since these are interest-bearing bonds, the Treasury must float a larger bond than it originally had, if it chooses the bonding route.

When your payments to the Social Security program are made, a record of the payments is made. Then, the money, aside from a modest sum kept on hand for immediate repayment to others, is turned over to the Treasury Department.

To keep track of the money, the Treasury Department issues a bond, or an IOU, to the Social Security Department.

The Treasury then takes the money and spends it on any one of its thousands of projects. It pays salaries, gives the money to

some foreign country, sets up or operates bureaus, subsidizes various people, or businesses and otherwise treats the money precisely as it treats other sums it receives through taxation.

As a matter of fact, the government could repeal the so-called "benefit" payments and still continue to collect the taxes. Or it could, by law, reverse the process, discontinue the taxes and continue to make the "benefit" payments.

The Doctor Says:

Mumps and Aftereffects Can Be Held in Check

By DR. HAROLD T. HYMAN

Mumps often is taken too lightly. When we were young it was even regarded as a laughing matter.

Now, either we underestimated the damage that could be done by the mumps virus, or the rascal has gotten more pernickety.

Until recently, our underestimation of the mumps had little importance since there was nothing much we could do to prevent complications, relieve them during their period of activity or compensate for the damage done to them when it was finally brought to our attention.

But today, if we are alert, we can prevent the disease, reduce complications to a minimum and, if they arise, treat them effectively.

Prevention of the disease and its complications can be effected by injections of mumps vaccine during the long incubation period that intervenes between exposure and demonstrable illness.

Complications can be effectively treated before permanent damage is inflicted if alert and knowledgeable parents summon their doctor at first signs of trouble—pain and swelling of the male sex organs (testicles), lower abdominal pain on one or both sides suggesting ovarian inflammation in the female and severe headache, neck stiffness, mental confusion and otherwise unexplained restlessness or drowsiness suggesting brain involvement (encephalitis).

For, if a corticosteroid (ACTH) is given before the complicating inflammation can inflict permanent damage, it should be possible to wipe out serious after effects and most particularly the disappointments of a barren marriage.

For a copy of Dr. Hyman's leaflet "How to Choose Your Family Doctor," send 10 cents to Dr. Hyman, in care of this newspaper, Box 489, Dept. B, Radio City Station, New York 19, N.Y.

The Nation's Press

THE RIGHT UNDER SCRUTINY (Human Events)

The Cincinnati Enquirer is a hard-hitting conservative newspaper. An editorial about the Life-Look-Time-Newsweek-CBS-NBC "exposures" of the Right concluded with these thoughtful paragraphs:

"The extraordinary coverage accorded the American Right would not be so remarkable had the consecutive thinkers responsible for it displayed, at some point in their varied careers, an equal concern about the American Left.

"But we can recall no spreads in Time or Life or Look, for example, about the Institute of Pacific Relations, which all-but dominates this nation's disastrous Far Eastern policy in the days following World War II.

"We can recall no CBS television spectacles, on the American scene for Democratic Action or the American Civil Liberties Union.

"We can recall no jests in Newsweek about the occasion on which the managing editor of the Washington Post joined forces with the editor of the Democratic Digest to hire a confidence man to get the goods on the late Senator Joseph R. McCarthy," whose "tactics" they found so reprehensible. They instructed their con man, by the way, to use any tactics that served his purposes.

"We can recall, finally, no exhaustive treatment of the prodigious campaign to abolish the Committee, although it strikes us that it is no more illogical to abolish a standing committee of Congress because you object to its findings than it is to advocate the impeachment of a Supreme Court Justice because you object to his.

"Maybe, on the other hand, we're all wrong. Maybe it's all just a remarkable coincidence that so many of our liberal observers should reach the same conclusions about the same problems at the same time and in substantially the same degree.

"And maybe the Rightists are just lucky to be getting so much publicity."

Continued Existence of Cuban Underground Hinges on President's Decision Whether to Supply Weapons

ROBERT ALLEN PAUL SCOTT

WASHINGTON—President Kennedy faces a remarkably grave decision on Cuba as the April 17 anniversary of the ill-fated island invasion nears.

The President must decide on how far the U.S. is willing to go to help the hard-pressed Cuban underground stay alive.

He is being frankly told that a steady flow of U.S. arms to these anti-Castro forces must be started within the next 90 days or they will be forced to abandon their organized espionage operations against Castro's Communist regime.

Since last year's abortive invasion, U.S. arms help to these freedom fighters has been very limited. They are now being turned to obtain most of their weapons and supplies from private Cuban refugee groups both inside and outside this country.

Virtually none of the \$100,000 a month that U.S. sources are pumping into the Cuban Revolutionary Council is going to the underground or being used in revolutionary activities within Cuba.

These funds are going mainly to maintain the administrative apparatus of the Council in this country, according to information furnished a Senate Armed Services subcommittee headed by Senator Richard Russell, G-4.

This subcommittee, which is still actively investigating the Cuban fiasco, has been fully briefed on the underground's plight and the dilemma now facing President Kennedy.

The senators have learned that a sharp policy dispute has developed within the Kennedy Administration on how far to go in helping the Cuban underground overthrow the Castro regime.

This argument has been raging at the very top government levels since last October, with President Kennedy getting conflicting advice from his principal advisers in the White House, and State and Defense Departments.

THE INSIDE STORY — The Joint Chiefs of Staff and Intelligence officials are urging the President to provide enough military and economic assistance to enable the underground to wage effective espionage operations against Castro.

By providing this covert help, the JCS believes the underground can cripple the Cuban economy sufficiently to keep Castro's Communist regime off balance until the time is ripe to topple it.

They fear that unless the underground is given the arms it needs now, nothing short of direct military intervention by U.S. forces will be enough to shake the Castro government's iron hold over the people in the future.

It is understood, however, that a group of State Department officials, headed by Richard Goodwin, the free-wheeling Deputy Assistant Secretary for Latin American Affairs, is opposed to stepping up this arms aid. They are worried about the political and military consequences in the hemisphere and elsewhere in providing this new military aid to achieve political ends in Cuba.

Instead, they are urging the President to limit U.S. action to a quarantine of Cuba until Castro breaks his ties with the Soviet bloc. Also, they want the President to explore the possibility of taking advantage of Castro's alleged rift with some of the old-time Cuban Communists by renewing private contacts with his regime.

Pull Up A Chair

By Neal O'Hara

When it comes to a manufacturing plant, a study by University of Michigan finds that congestion, difficulty of communication and environmental factors in a city are not conducive to the best employe morale, but that living conditions of people in small towns seem to produce a vitality of mind, body and spirit that makes for healthier operating conditions.

The unusual project of a Chelsea, Mass., school group was preserving snowflakes this past winter. Each flake was picked up with a needle and placed on a piece of black velvet. The flake was then doused with a solution that removed excess water from the ice crystal; the crystals were then coated to prevent them from melting.

Enlarged photographs were taken and assembled for a collection of 250 microscope slides.

Headline in the Hartford (Ct.) Courant: "Tukle Soars 205,211 Feet To Win Brattleboro Jump."

A fellow who really likes to know a city determined to cover every street of New York's Manhattan borough by foot. And by the time his project was accomplished, he had traversed 502 miles.

Today's favorite gag: CARTER — "Did you tell her when you proposed that you weren't worthy of her? That always makes a good impression." HARPER — "Well, I was going to, but she told me so first!"

Since Alaska attained statehood, the number of state employes has grown from 750 to 4000, and its inhabitants are squawking at the horde of new bureaucrats. There has also been a steady increase in cigarette, gasoline and liquor taxes.

It wasn't until 1870 that Congress got around to providing a weather forecasting service, and then it was placed under the jurisdiction of the U.S. Army.

The collarbone, which runs from the breastbone to a projection of the shoulder, is the first bone to start hardening in a baby's body. It acts as a prop to keep the shoulder from collapsing forward on the chest wall.

Thoughts while shaving: 1 In our youthful days, which were quite a while ago, any vaudeville comedian could rock his audience with laughter by announcing, "I will now sing a beautiful ballad entitled 'When the Banana Peels Are Falling, I'll Come Slipping Back to You.'"

2. Then he'd follow up with, "And now let me sing you a tender lullaby entitled 'Since Father Cut His Toenails, He Doesn't Tear the Sheets.'"

3. And a very snappy witticism of the same era went like this: "Blow your nose—your brains are dusty."

4. And a sure-fire closing would be when the comic announced, "My next song will be a dance." Then he'd go into a soft-shoe dance routine for his finish. (Yup, that was comedy in those days, and maybe what helped to kill vaudeville.)

Country editor speaking: "The old boy gets to act his age when he finds himself holding both banisters as he goes downstairs."

fruits and produce. The later are highly significant, as Cubans already are existing on an austere diet. Apparently it's going to become even more so to pay for imports from the Soviet bloc.

OUR ANCESTORS by Quincy

"Some researcher wants to know what magic lantern slides we're watching this evening!"

Pegler Says: Long Ago Kennedy-Pegler Political Debate Recalled

By WESTBROOK PEGLER

It seems but yesterday that the corridors of the Lawrence Park West Country Day School in Westchester County, N.Y., and the academic groves of that stately institution vibrated with the fierce clash of political conflict in a debate which, with the passage of years, now ranks with the clang of righteous conscience or moral conviction on the front stoop of Old Main at Knox College.

At Knox College, nowadays known as Old Swab, at Galesburg, Illinois, Abraham Lincoln debated Stephen A. Douglas on the fateful issue of slavery.

It was more than 21 years ago that Teddy Kennedy and Westbrook Pegler II, both of Bronxville, met in a formal dispute of classical ambiguity on the candidacies of Franklin D. Roosevelt and Wendell Willkie.

The Yonkers Herald-Statesman of Nov. 5, 1940 reported that Mr. Kennedy's candidate for president was badly beaten in the balloting that afternoon. A four-column photograph shows Mr. Kennedy standing at mid-picture just behind the Stars and Stripes.

Mr. Pegler sat at the left wearing an indefinite expression, possibly tolerant but possibly a slight sneer. The same dubiety attends the expression of Teddy Kennedy. He wore a striped T-shirt and his opponent a gray V-neck sweater.

The chairman of the debate, Patrick Gormley, of New Rochelle, wore a rather formal tweed jacket. Mr. Gormley's remarks are not recorded, but David Jones, the son of the noted bandleader of that day, Isham Jones, was quoted in favor of sandwiches.

The story said: "Teddy Kennedy, 8-year-old son of Joseph Kennedy, ambassador to Britain, made his debut as a political orator yesterday when he stumped for President Roosevelt in a short but vigorous campaign at the Lawrence Park West Country Day School, but suffered a setback when his 'man' went down to defeat at the hands of the teenage student electorate. Taking the stand in defense of the Third Term candidate, the youngest of the Kennedys engaged Westbrook Pegler, nephew of the columnist, in a verbal duel before the school's student body at the morning assembly."

"Today we are facing a crisis," Mr. Pegler thereupon retired from politics. Mr. Kennedy is now a candidate for the Senate in Massachusetts and for president in 1976, presuming two terms each for his brother, the incumbent Jack, then Bobby and finally Teddy. That would carry the Kennedy Reign to the Dawn of 1934 and the Big Brother Era.

The Kennedy family left an impression on Bronxville which Hollywood would describe as "terrific." The police for a long time maintained a stand-by riot formation which many times rushed to the Kennedy home to quell fights between the girls and the boys.

The Almanac

By United Press International

Today is Wednesday, April 11, the 101st day of the year with 264 to follow in 1962. The moon is in its first quarter. The morning stars are Jupiter and Saturn.

The evening star is Venus. On this day in history: In 1814, Napoleon decided to abdicate and signed a proclamation to that effect.

In 1898, the United States proclaimed a treaty of peace with Spain, ending the Spanish-American War. In 1951, President Truman relieved Gen. Douglas MacArthur of his commands in the Far East.

In 1953, Mrs. Oveta Hobby was sworn in as the nation's first secretary of the Department of Health, Education and Welfare. A thought for the day: American humorist Mark Twain said: "Soap and education are not as sudden as a massacre, but they are more deadly in the long run."

Matter of Fact

Coffee is certainly a good thing to put on your feet in the morning, but did you know that coffee quickens the spirit, and makes the heart lighter... is good against sore eyes... excellent to prevent and cure drowsiness? These were the claims made by the first known coffee advertisement in 1652.

Harvesters Massacre Hapless Palo Duro, 14-0

Maris, Mantle Homer As Yanks Cop Opening Win

United Press International
Amid all that noisy cannonading by the likes of Bob Clemente, Wally Post, Gino Cimoli and the Yankees' famed "M and M boys," the shots that rang loudest in the major leagues Tuesday were fired by the new Colt 45s and two-gun Roman Mejias.

The Houston Colts introduced major league baseball to the land of the Alamo and Mejias shot off a double-barreled salute in the form of a pair of three-run homers that made it an easy five-hit, 11-2 conquest for Bobby Shantz over the Chicago Cubs.

And speaking of shoot-'em-ups, Roger Maris, Mickey Mantle and Bill Skowron each blasted a home run to help power the world champion New York Yankees to a 7-5 opening victory over the Baltimore Orioles.

Whitey Ford started the game for the Yankees and Luis Arroyo saved it in the ninth. As one wiseguy put it upon leaving Yankee Stadium, "It was just like watching an old television movie on the late show."

While the homer-hitters decided most of the games on the first big program of the 1962 season, there were three brilliant shutout pitching jobs, by Dick Donovan of the Cleveland Indians, Juan Marichal of the San Francisco Giants and Bob Friend of the Pittsburgh Pirates.

The biggest crowd of the day showed up at Los Angeles, where 52,564 watched Wally Post's three-run seventh-inning homer spear the Dodgers' debut in their new

Chavez Ravine Stadium, 6-3. In other National League games, Bob Clemente, the major league's leading hitter in 1961, hit the first grand slam homer of this season to help Friend and the Pirates blank the Philadelphia Phils, 6-0, and the Giants beat Warren Spahn and the Milwaukee Braves, also 6-0.

Donovan pitched a five-hitter as the Indians defeated the Boston Red Sox, 4-0; Gino Cimoli's three-run homer gave the Kansas City Athletics a 4-2 win over the Minnesota Twins; and Sherman Lollar's ninth-inning single drove in the Chicago White Sox, winning in a 2-1 triumph over the Los Angeles Angels.

The scheduled debut of the New York Mets against the Cardinals at night in St. Louis was rained out. The Washington Senators and Detroit Tigers were idle.

Three ex-Pirates helped the Colt 45s beat the Cubs before a disappointingly small crowd of 25,371 at Houston's temporary new ballpark.

Mejias hit a three-run homer in the third inning of Chicago starter, Don Cardwell and repeated in the eighth inning against Al Lary to drive in six runs for the day. Catcher Hal Smith also hit a Houston homer.

Shantz, who has not been a regular since he won 24 games for the Philadelphia Athletics in 1952, had a shutout until Ernie Banks hit the 299th homer of his career for the Cubs in the seventh.

Post's three-run homer off lefty John Podres in the seventh inning broke a 2-2 tie and earned the Reds their win over the Dodgers. Bob Purkey got the victory, although Bill Henry saved it by pitching the Reds out of a bases-loaded, one-out jam in the eighth.

Friend held the Phils to five hits and walked only one Phils batter. Clemente hit his grand slam off Jim Owens in the third and Don Hoak immediately followed with another homer.

At San Francisco, Marichal hit a two-run single off Spahn and struck out 10 batters while pitching his three-hitter. Willie Mays homered in the first off Spahn, who was driven out when the Giants scored four runs in the fourth inning.

In the American League, Maris went 10 games ahead of his record 1961 timetable by hitting a three-run homer off Billy Hoelt in the fifth. Skowron earlier had hit an inside-the-park homer with a man on and Mantle connected with the bases empty off Skinny Brown to tie the score in the eighth.

Elston Howard's double and Skowron's single off knuckleballer Hoyt Wilhelm produced the winning run immediately after Mantle's homer. Ford retired with a 5-4 lead after six innings; Ralph Terry lost that advantage, but gained credit for the victory when the Yankees scored twice in the eighth, and Arroyo put down a Baltimore rally in the ninth.

Donovan gave up five singles and one walk as the Indians beat Don Schwall of the Red Sox, the 1961 American League rookie of the year. John Romano hit a triple and two singles to figure in three Cleveland runs.

Cimoli's three-run homer in the fourth off Jack Kralick supplied the power for Ed Rakow's seventh Kansas City win over Minnesota.

Lollar's game-winning hit for the White Sox was his fourth of the day. Juan Pizarro pitched a five-hitter for Chicago and reliever Ryne Duren, who walked two batters and was relieved by Joe Nuxhall before Lollar came to bat was the loser.

The Pampa Daily News
6 WEDNESDAY, APRIL 11, 1962 55TH YEAR

JUST AROUND THE CORNER — An appetite-whetting picture of what lies just ahead for boatmen all over the U.S. is presented by the 32-foot auxiliary sloop Galaxy asail.

Colt 45s Shoot Down Cubs In Loop Opener

HOUSTON (UPI) — The Pittsburgh Pirates may be wondering today why they let six-year veteran Roman Mejias go to the new Houston Colt 45s for \$75,000 in the National League's player pool.

The slender Cuban outfielder provided the punch for the supposedly punchless Colts in their 11-2 manhandling of the Chicago Cubs in Tuesday's opener by powering a pair of three-run homers and contributing a timely single in another three-run Colt uprising.

The Pirates had the six-foot, 175-pound Mejias under contract since 1953. He had been used for only 308 games over that span and last year he was farmed out to Columbus of the International League.

Mejias, like most of the other "castoffs" making up the 45s roster, may find the steady playing diet with Houston to his liking and blossom into the star which his minor league record had indicated.

That possibility was voiced by the Cubs' homerun artist Ernie Banks after he had watched Mejias swat one ball out of the big, colorful Houston park at the 400-foot mark in left center and another over the left field wall at about the 380-foot mark.

Asked if he thought Mejias had improved since his playing days with the Pirates, Banks replied: "I never thought Pittsburgh gave him a chance to see what he could do."

Mejias wasn't the only hero of the 25,371 paid spectators who watched the Colt 45s shock five Cubs pitchers.

Bobby Shantz, the little lefty

Pampa Unleashes 17-Hit Attack As Glover Wins

By DICK RABE
Daily News Sports Editor
AMARILLO — Pampa's Harvesters, who managed to ring up a scant three runs and nine hits in three district games this year, exploded with a vengeance Tuesday against the Palo Duro Dons as the local nine romped to a crushing 14-0 victory over their neighbors to the west.

The Harvesters, behind the smooth six-hit pitching of Jerry Glover were in complete command throughout the contest as Pampa's big bats exploded for 17 hits to send the Dons down to their fourth-straight-lop loss this year.

The Harvesters evened their league record at 2-2.

The Pampa nine, which looked like it was under a pitcher's hypnotic state before the Palo Duro game, completely emptied both barrels to wrack up their initial victory over a team in the big city.

Everyone of the Harvesters joined in the merry hitting attack, with the exception of Mike and Ricky Stewart. Larry Gregory with 4 for 4 and John Arthur with 4 for 5 fattened their averages the most off the servings of three Amarillo pitchers. Gregory had three singles and a triple and scored two runs while Arthur had two singles, a double and a triple and also scored two runs.

The Harvesters scored in every inning except the second, third, and fifth with the local nine smashing in seven runs in the final inning for their biggest one frame barrage.

Glover also evened his loop record for the year at 1-1. Jerry struck out seven and walked two in going the distance for

In the seventh, the Harvesters paraded seven big runs across the plate to complete their lopsided win.

Glover singled, Ricky Stewart was safe on an error, Hebert doubled, Gregory singled, and Owens singled. After Crossland skied out, Reed and Arthur slammed out back to back, singles. Mike Stewart reached first on a fielder's choice and Glover singled for the second time in the inning. Ricky Stewart walked in his second appearance in the big seventh, but Hebert struck out to end the uprising and cool off the hot Harvesters bats.

Hebert, making his first appearance in a baseball uniform since he finished up his track and field duties last Saturday, connected for a pair of doubles in two trips for a perfect day with the timber. Owens, Reed and Glover each connected with a pair of hits also to share in the merry hitting parade.

whose chief claim to fame in 13 years in the majors was a 247 record ten years ago with the old Philadelphia Athletics, was the toast of the crowd as well.

Shantz, another Pirate "castoff" picked up by the 45s for \$75,000, hurled two-hit shutout ball for six innings until Banks lofted his 299th career homer in the seventh.

He weakened a bit toward the end and manager Harry Craft twice thought of taking the little southpaw out of the game. But, in the end Shantz lived up to Craft's confidence and limited the Cubs to five hits.

His own sensational fielding of bunts and dribbles off Cub bats caused a loud applause as did his pitching. He handled five assists, including the start of one double play and twice cut off potential scores going to second.

Shantz, making only his third opening day appearance as a starter in a long career, said he felt good "all the way" but admitted that he "got pretty tired the last couple of innings."

The crowd was somewhat of a disappointment since the Colts had anticipated a possible standing room only gathering for the first club to figure in National League expansion since 1900.

But, threatening weather and poor traffic facilities along the approaches to the sparkling new stadium were responsible for the non-capacity crowd.

Former Baltimore boss Paul Richards, general manager of the Colts, watched the game from the press box, marking the first time since 1926 that the tall Texan hadn't been on the playing field as player or manager on opening day.

Foreigners Predominate In River Oaks Invitational
HOUSTON (UPI) — Exactly half of the 16 players going into today's fourth round of the River Oaks Invitational Tennis Tournament are from foreign soil, paced by two Australians and a pair of scrappy Mexicans.

Australians Rod Laver and Roy Emerson, top seeded in the tourney, had little trouble advancing to today's round. Emerson clubbed Alfonso Ochoa of Mexico City, 6-2, 6-3, Tuesday. Laver defeated Jimmy Parker of Rice University, 6-1, 6-4.

Gabino Palafox and Ben Anzola, rising young tennis stars from Mexico, turned in major upsets Tuesday. Palafox, Mexico's 10th ranked singles player, beat the top U. S. amateur, Whitney Reed

Lakers Lead Celtics By 2-1 Margin
LOS ANGELES (UPI) — A proud athlete, Jerry West of the Los Angeles Lakers, was upset over his performance in the opening National Basketball Association playoff last week between Boston and Los Angeles. But he made up for it Tuesday night.

The thin guard intercepted a Celtic pass with three seconds to play and sped alone for the game winning layin as the Lakers edged Boston, 117-115, to take a 2-1 lead in the best four-of-seven game series.

The teams played in the fourth game of the set tonight.

And the overtime West Virginia University star did more than give the final punch. With Los Angeles trailing 115-113, and only three seconds to play, he stood at the foul line and methodically put in two free throws to tie the score.

Boston called time out to set up its one last play. But when Sam Jones tossed the ball toward Bob Cousy, West got his gangling arm in the way and drove in for the bucket.

A record Los Angeles basketball crowd of 15,180 squeezed into the Sports Arena, and the hectic finish of the game alone assured another sellout tonight when the clubs battle for the fourth time.

Drying himself in a noisy Laker locker room, West couldn't explain how the interception took place — and didn't care.

"It just happened," he beamed. "I just happened to be there at the right time."

It wasn't the only right time West was around. The Lakers needed every one of the 17 points he scored during the third quarter. And they also needed the 28 that Elgin Baylor poured in during the first half as Los Angeles pulled to a 54-50 lead.

of Alameda, Calif., in straight sets, 3-6, 7-5. Anzola upset Ronnie Fisher of Houston, 3-6, 6-1, 6-4. Today Emerson plays Butch Newman of Trinity University, Laver meets Anzola, Chuck McKinley of St. Louis is pitted against Neal Marcus of Rice, and Wolfgang Stuck of West Germany plays Chris Crawford of Corpus Christi U.

In other action, Garner Mulloy of Miami is paired against Frank Froehling, of Coral Gables, Fla., John Sharpe of Australia meets Ron Holmberg of the U. S. Military Academy, Gabino Palafox tackles Clifford Drysdale of Beaumont, Tex., and Michael Sangster of Great Britain battles Antonio Palafox of Mexico.

Lost 30 Pounds With Barcetrante
"I stay trim the Barcetrante way. It is a simple, practical plan. I have lost 30 pounds taking Barcetrante and continue taking it as a tonic for the wonderful feeling of pep, vim and energy which it gives me."

This is from a letter from Mrs. Paul Cooksey, 605 25th S.E., Paris, Texas.

Barcetrante is the original grapefruit juice recipe for taking off ugly fat. Sold in Texas for 20 years.

Asked if he thought Mejias had improved since his playing days with the Pirates, Banks replied: "I never thought Pittsburgh gave him a chance to see what he could do."

Mejias wasn't the only hero of the 25,371 paid spectators who watched the Colt 45s shock five Cubs pitchers.

Bobby Shantz, the little lefty

slowly built up the Tigers' cage squads.

Under Sweet's guidance, the Tigers joined the powerful West Coast Athletic Conference and took on a powerful list of inter-sectional cage foes.

They generally found the going rough against these tough opponents and Sweet had a record of 81 and 148 in his 10 years. This year's team turned in a 10-16 mark, but was loaded with a solid group of sophomores expected to improve Tiger fortunes in the years ahead.

STOCKTON, Calif. (UPI) — Van Sweet has resigned as coach of the University of Pacific basketball team in order to return to his alma mater, Baylor University, as assistant athletic director.

Sweet's resignation was announced Tuesday night by University of Pacific president Robert Burns, who said he was "very sorry" to see Sweet leave after a decade at Pacific. Sweet was also assistant golf coach at UOP.

Pacific's basketball fortunes had hit bottom when Sweet took over in 1952. The Tigers won 3 and lost 20 Sweet's first year, but he

Matson, Martin Set For Regional Meet

Randy Matson and Bill Martin, the two lone Harvester cinder stars churning toward the Regional 1 Track and Field meet in Odessa Saturday, continued to workout in their specialties Tuesday with high hopes of going all the way to the big state tournament May 4-5.

The two field event stars, who grabbed off regional berths with winning performances in the District 3-AAAA track and field meet Saturday in Lubbock, appeared in top physical condition for the Odessa meet.

Matson won the shot put with a toss of 60 feet 10 inches and was second in the discus with a throw of 155 feet eight inches to gain

the regionals in both events. Martin, on the other hand, finished second in the high jump with a jump of five feet eight inches to secure a berth in the regional meet.

Randy has bettered the regional shot put mark of 58 feet three inches set by Kenneth Henson of San Angelo in 1960 and has a good chance of eclipsing the regional discus mark of 170 feet 1/2 inches set by Richard Stafford of Matador in 1958.

Martin will have to go some to better the regional high jump mark. The record is six feet four and 1/2 inches set by Clarence Miller of Crane in 1954. Martin has shown steady improvement during the course of the track season, however and holds the Harvester high jump record of six feet.

This will mark the second time both boys have participated in field events in Odessa, having taken part in the Odessa relays earlier in the track season. The top athletes from AAAA and AAA cinder teams will congregate in the oil city Saturday with their hopes set on earning a state berth in Austin.

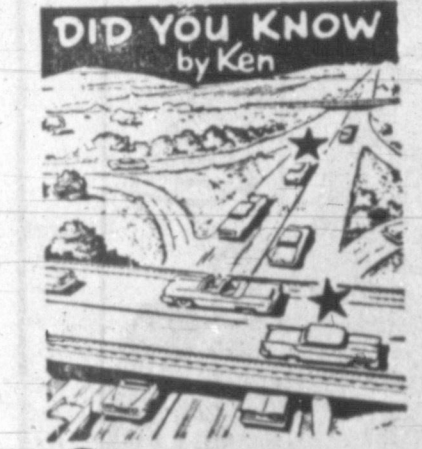

Matson's shot put toss in the district meet left him one foot ten and 1/2 inches shy of the state mark of 62 feet eight and 1/2 inches set by Inman of Belton in 1960.

Bowling Fete Slated For Today At 6:30

The Pampa Women's Bowling association's annual banquet will be held tonight starting at 6:30 p.m. in the Pampa high school cafeteria.

The annual meeting will be held at 7:30.

Officers for the coming year will be elected and trophies and prize money won at the city tournament will also be presented.

Perryton YMCA Readies Fields

PERRYTON (Sp) — Work has started by the Young Men's Christian Association to get the ball diamonds in shape for the coming softball-baseball season. The Jaycees have been working on the two practice fields while the YMCA is repairing the concession stand where someone has done considerable damage.

A lighting unit is planned for the older boys' baseball diamond in order that it may be used by the men's softball league. Installation of the lights is due to begin in the next two weeks.

Trampolines In Second Finish

PERRYTON (Sp) — A group of boys and girls from Perryton entered the Talent Show held in Liberal, Kansas in conjunction with the annual Pancake Day, and won second prize for their trampoline jumping.

The group, comprised of Glenn McLain, Vicki Cutting and Jerry Helfenbein, presented Jack Maxey, General Secretary of the YMCA, a check in the amount of \$25.00 to be placed in the 'Y' Building Fund.

This money is a portion of the prize money won at the Liberal Talent Show.

WEIGHTY MATTER — George Harris of Chicago balances the scales on an 826-pound black marlin landed off New Zealand. Harris looks slightly incredulous as he reads the scales, but he shouldn't since fish of this species run 800 to 900 pounds down there.

Golf, Tennis Teams Had Shining Hours

Well, two of the spring sports are over with for another year at Pampa high school with mediocre records posted by both teams on the face of it.

But, as a whole both the golf and the tennis stalwarts showed their prowess in high style with some tremendous efforts and fine individual showings during the course of their campaigns.

Coach Eural Ramsey's golf team, though finishing in sixth place in the District 3-AAAA golf meet, nevertheless had their moments of brilliance and stardom such as the victory in the Amarillo relays and Leonard Hudson's tying for medalist honors in the same event.

Hudson also was fifth in the running for medalist honors after the final 18-holes of the loop meet in Lubbock and together with Bryan Prigmore, Johnny Hatcher

Pettit's Bird Winner Of Pigeon Race

Bazell Pettit, White Deer, won the weekly Top O' Texas pigeon race from Frederick, Okla. to Pampa last Saturday with an average time of 1:13.75 yards per minute.

The course covered 150 miles. Other owners with their bird's times included Delbert Thurman, Pampa, 1:19.33; Bill Dycus, Pampa, 1:18.03 and 1:17.50; Buddy Epperson, Pampa, 1:10.38; Keith Alley, Pampa, 1:10.18; Walter Thomas, White Deer, 1:06.52 and Jim Cantrell, Pampa, 8:13.02.

Last Saturday the club opened its racing season with a flight from Eldorado, Okla. to Pampa. Thomas of White Deer finished first with a speed of 502.93 yards per minute.

This weekend, the club will fly a race from Frederick, Okla.

Sumlin Expresses Regret That Bout Was Stopped

WEMBLEY, England (UPI) — Modest Guy Sumlin of Pritchard, Ala., who shattered British and Empire welterweight champion Brian Curvis' hopes of a world title bout, said today he was sorry the bout was stopped in the eighth round.

Referee Tommy Little called a halt to the scheduled 10-round bout at 2:58 of the eighth round Tuesday night with Curvis, the world's fifth ranked welterweight, bleeding from a deep gash over his right eye.

"Curvis is a strong boy," Sumlin said, "but like myself he has got to improve a lot. I wish the fight had gone on so that we could have seen who was definitely the better man."

Curvis, who had taken the bout with the idea of then challenging world champion Emile Griffith to a title fight, naturally was heart broken at the decision.

"I'm sure disappointed," he said "He never baffled me, I always thought I could handle him." The defeat was the first in 25 professional fights for Curvis. For Sumlin, it was his 28th victory in 32 fights.

ST. EDWARDS VICTORY — AUSTIN, Tex. (UPI) — A double followed by a sharp single pushed St. Edwards University past Texas Lutheran, 3-2, Tuesday in a Big State Conference baseball game.

Melvin Bulot got the double in the 8th inning. He scored on Dave Eckstein's single.

GREENVILLE, Tex. (UPI) — Arlington State walloped East Texas State, 6-1, Tuesday in a non-conference golf match.

COLLEGE STATION, Tex. (UPI) — Texas dumped Texas A&M, 5-1, Tuesday in a Southwest Conference tennis match.

Texas now has a 13-5 SWC tennis record. A&M is 2-16.

FIGHT RESULTS — LONDON (UPI) — Guy Sumlin, 147 1/2, Pritchard, Ala., stopped Brian Curvis, 147 1/2, Britain (8).

TURIN, Italy (UPI) — Bruno Visintin, 152, Italy, outpointed Charlie Cotton, 158, Toledo, Ohio (10).

Crippled Children Responsibility Still For Public

SAN ANTONIO, Tex. (Spl) — Crippled children will remain a major responsibility of the American public throughout the foreseeable future, although recent medical developments have conquered, or hold promise of ending, many crippling diseases.

Mrs. Thomas S. West, San Antonio civic leader and president of the Texas Society for Crippled Children and Adults, made this statement today in a message to thousands of Easter Seal volunteer workers in Texas.

"The fact is that thousands of children will continue to be crippled each year by accidents, birth defects, and as yet unconquered diseases. Nor can we forget those for whom new medicines and vaccines have come too late."

Mrs. West continued, "We must remember that each of these children has tremendous potentialities; it is only a portion of their bodies that is crippled—their minds and other abilities are capable of great contributions to Texas, and to the nation. We must offer them the specialized physical, educational and occupational services and rehabilitation which will help develop these potentialities."

She emphasized that funds are vital to keep pace with new medical and rehabilitation developments in the treatment, care, and education of crippled children and adults.

She closed her statement by saying, "Our whole program is based on the voluntary way of helping our fellow-man. We will grow in service as the people in our communities and state help us to grow."

Ninety percent of the funds raised in Texas remain in the state for DIRECT aid services to the crippled of Texas, the remaining ten percent supports a national program of research and education.

The Easter Seal Appeal will continue through Easter Sunday, April 22.

Painter Plans To Continue Work On 'Accidental Art'

WEST HOLLYWOOD, Fla. (UPI) — Like many painters, Louise Hubyak cleans her brushes on a board.

Recently, one masonite board, dabbed countless times with brushes to remove excess paint from them, caught her fancy.

"The colors were bright and pretty so I gave it a close scrutiny, turning it one way and then another until I saw a scene emerge," said Miss Hubyak. "Then I improvised on it a bit and had a painting."

She labeled the abstract work, "blind flower girl," and entered it in a Miami art show with her other works. It was the first painting she sold and went for a "nice price," she said Monday.

Encouraged, and perhaps with an eye toward similar remunerating projects, Miss Hubyak said her cleaning boards often produce "charming pieces of art."

WORLD AWARD — The Federation Aeronautique Internationale has given its 1961 Montgolfier Award to Mrs. Constance Wolf, 56, of Blue Bell, Pa. The feat which won her the honor, the first to a woman pilot, was her nonstop 364-mile balloon flight from Big Springs, Tex., to Boley, Okla., last November. Mrs. Wolf is shown above after the 40-hour flight, which broke a record set by two Russians.

SERVING THE TOP O' TEXAS 54 YEARS

THE PAMPA DAILY NEWS, WEDNESDAY, APRIL 11, 1962

187 Million Americans Make The Most Of Motoring

New Cars Shown In Widest Choice Ever

The 1962 automobile season now is in full bloom, and this year the American automobile manufacturers are offering the prospective buyer the widest choice he has had since the freewheeling days of the early 1900's when an idea, a workshop and a modest financial stake were all that was needed to compete in the car market.

From small cars to big cars there is a dazzling array of se-

Styling is simpler this year; dead weight has been cut from cars; and the key words are functionalism, technical and mechanical advances, and value, with a capital "V."

Withal there are some swank touches, too, for the bucket seat brigade shows no sign of disappearing, and there is solid evidence that the car-buying public wants its economy car trimmed with mink.

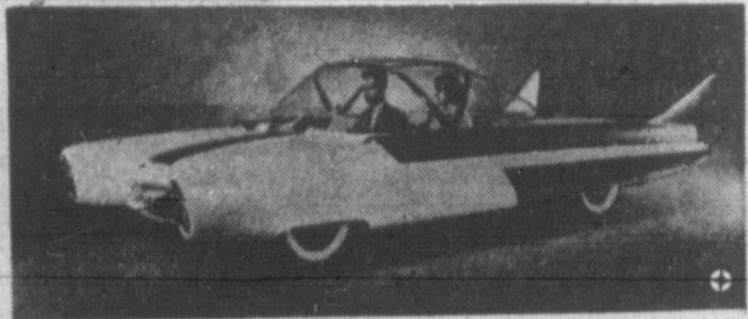

There is good news on the price front, too. For the third year in a row the industry is holding prices. Don't be misled if the sticker (or list) price is higher than last year, for in 1962 the

heater, which is essential to 99 per cent of buyers, is for the most part no longer an optional extra but an integral part of the factory-installed equipment.

The 1962 lines comprise more

than 300 different sizes, kinds and shapes—under no less than 30 nameplates. New for 1962 is a new dimension, the so-called medium-sized car. The silhouettes are smoother and crisper; the color

tones are muted.

FORD ATMOS is a full-scale model of a dream car of the future which was designed by the automobile company's styling department.

Today's concept is for mass-produced cars but tailor-made models. The buyer can add variety by fitting regular production options to the basic vehicle. In a sense the buyer can, within reasonable limits, design his own car.

And with the touch of spring in the air, several glamour models that were held back to take advantage of the lure of the open road sans snowdrifts and ice are just coming off the assembly lines.

Hand-in-hand with the almost complete spectrum of cars is the stronger than ever emphasis on quality control. This is one reason why it is taking a little longer to get delivery, for cars are getting more tender, loving care these days and it is showing up in the finished product. This is also the reason that the manufacturers are guaranteeing their cars for one year or 12,000 miles, whichever comes first. Formerly the new car warranty was 90 days or 4,000 miles.

Value is obviously the keynote as auto makers strive to make cars more competitive than ever with the other items and services

that seek the consumer's dollars. Neither horsepower, styling, size, diversity, luxury or economy alone seems capable of doing the trick. It is believed some solid combination of those things holds the key to winning the new car buyer, and the industry is pulling out all stops to whet his appetite for the 1962 models.

All of this boils down to the fact that the customer can pick and choose options at will. If he wants power, all he has to do is mention it and it's available. If he wants basic transportation, there are several models from which to select.

Engineering and design innovations share the spotlight with styling, for along with pleasing lines the public demands — and the industry is supplying — cars of sensible size and price that are mechanically able to perform nimbly in traffic as well as on the open road.

With upwards of 300 models to choose from, the biggest question

seems to be not how many cars will be sold, as what cars will sell. It is the auto makers' contention that there is no longer just one right size car for a market as diverse as exists in this country, so they are offering something for everybody.

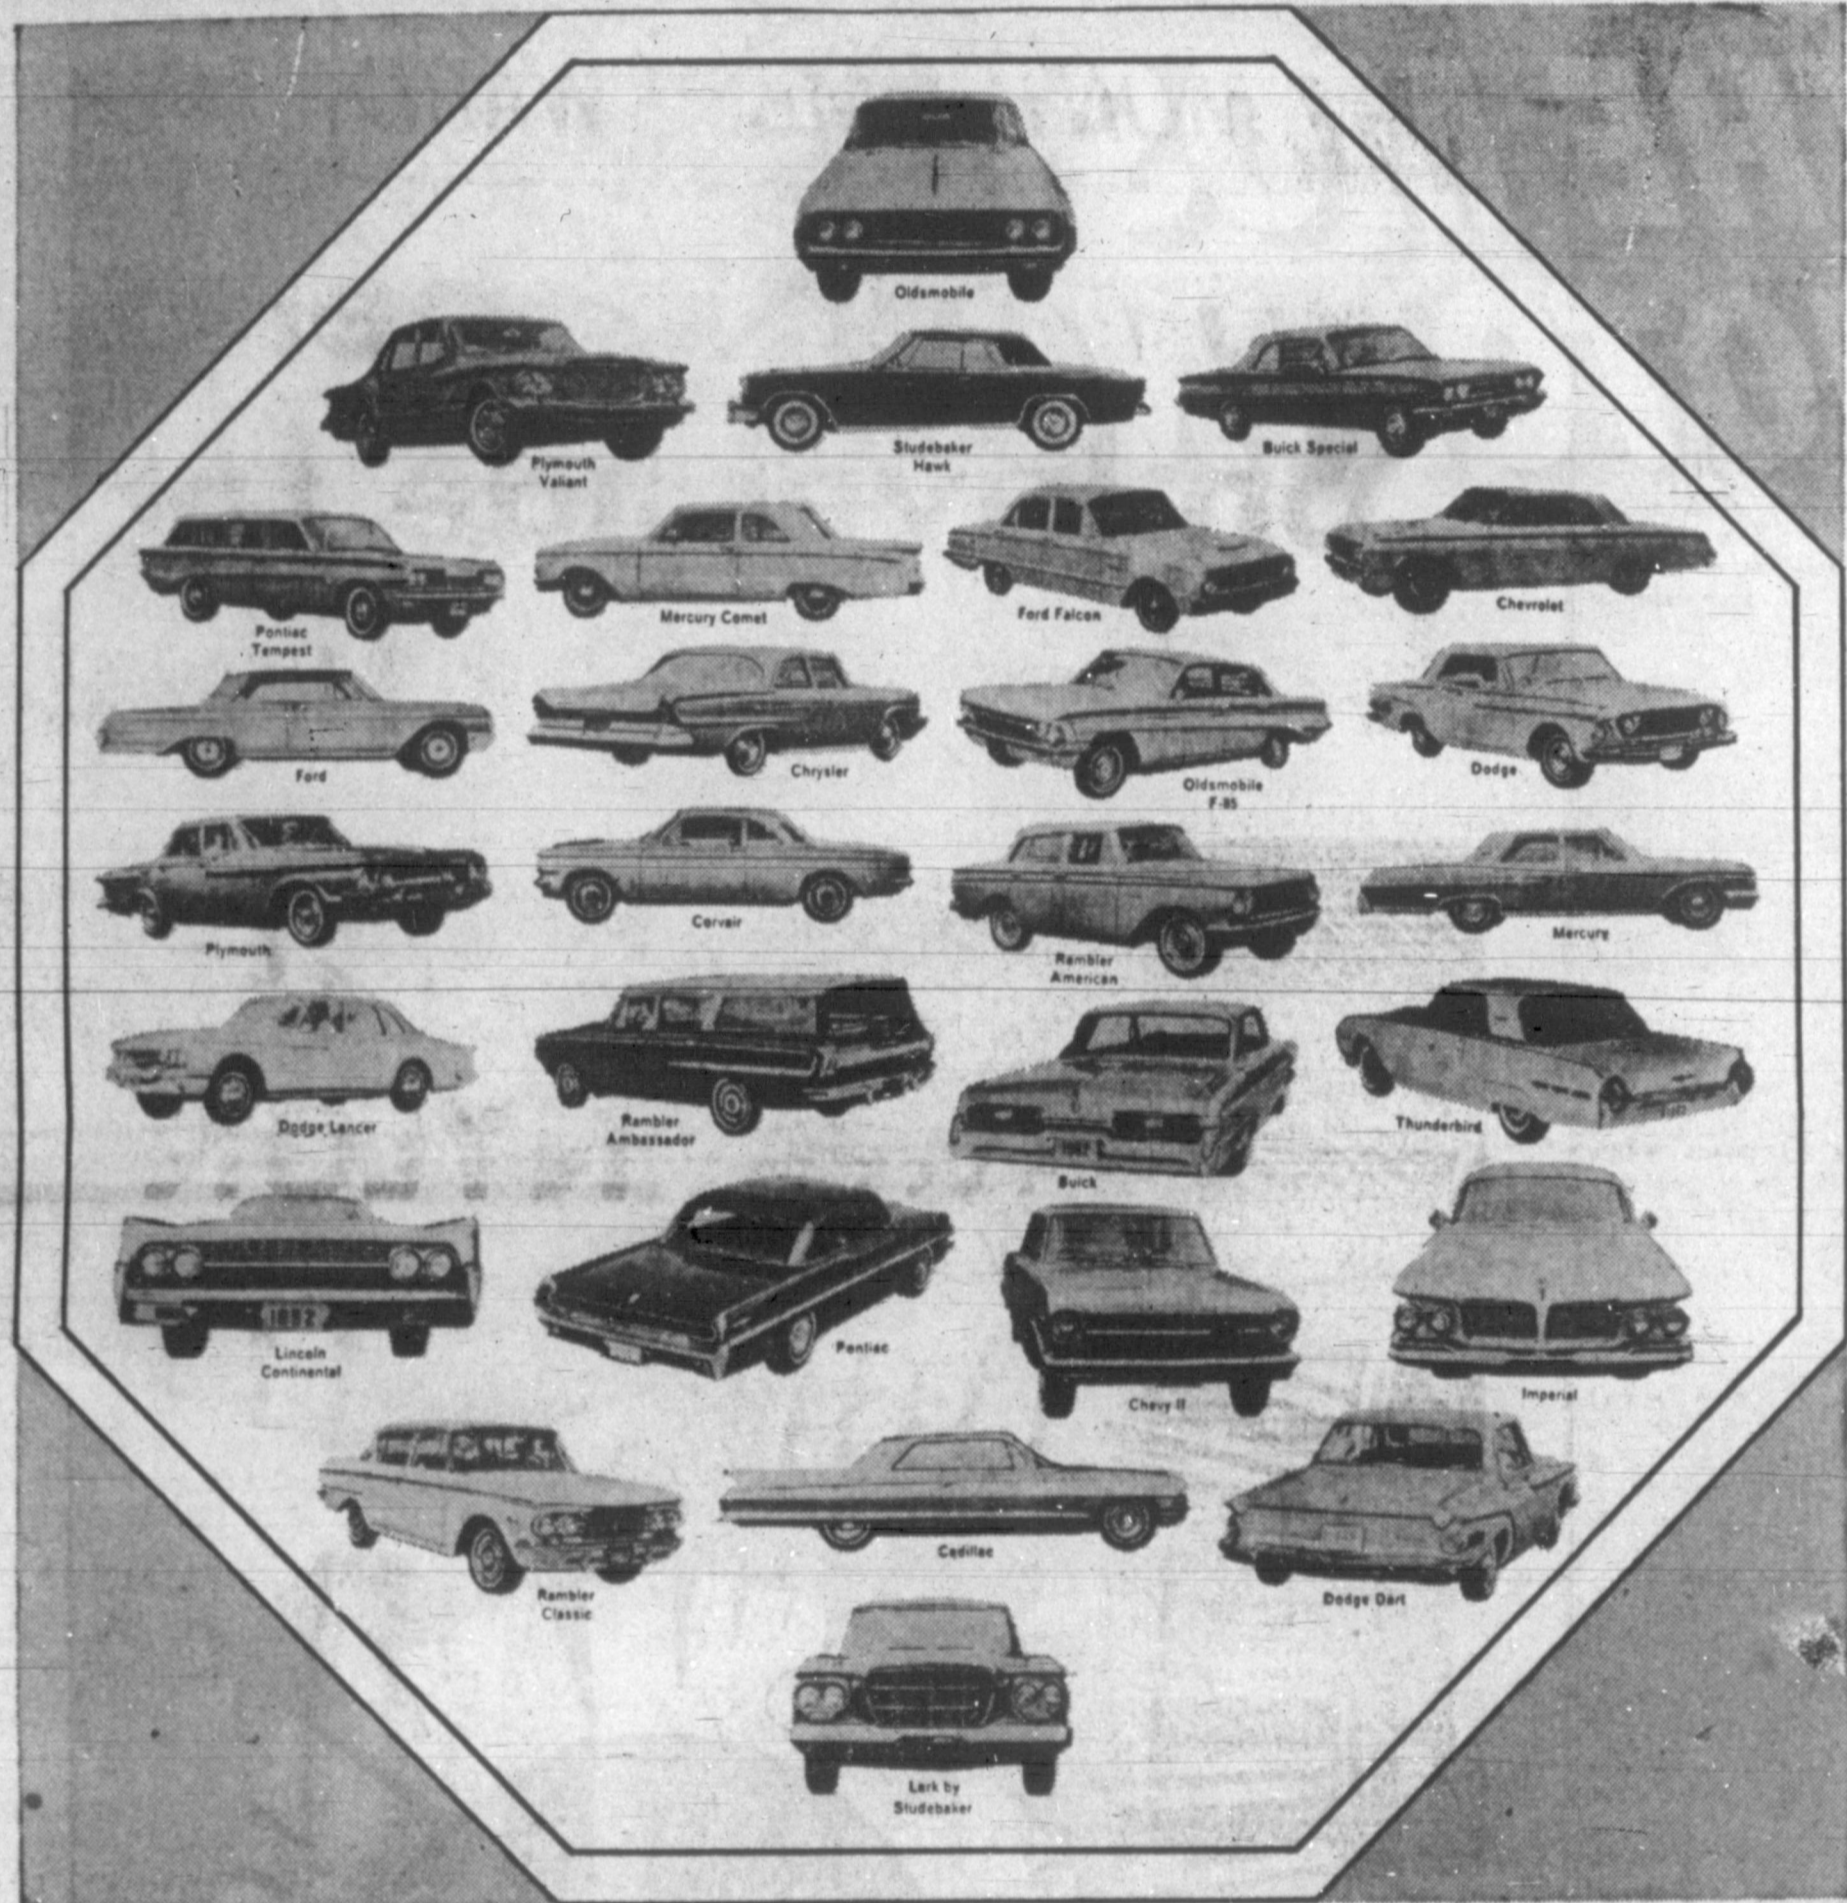

Auto Body Called 'Wonderful Armor'

The strength of its steel frame and skin makes today's automobile a wonderful piece of armor, points out Dwight M. McCracken, who heads Liberty Mutual Insurance Company's loss prevention department.

In a mishap, Mr. McCracken said, the driver and passengers have a much better chance if they stay within the strong steel body. The best way to assure this, he continued, is to install and use seat belts.

Installation of the belts has been greatly simplified by anchor devices all car makers are installing this year.

How To Save On Auto Insurance

Here are six ways motorists can save money on car insurance in most states, according to the Insurance Information Institute:

- Safe driver discount, for which about 70 per cent of motorists qualify.
 - Package policy combining coverages at savings of 10 to 20 per cent.
 - Compact car discount of 10 per cent.
 - Two or more cars discount.
 - Driver education discount of 10 per cent, if every young man under age 25 in the household has successfully completed a recognized course.
 - Farmer discount of 30 per cent.
- Check with your insurance broker or agent to find out if you qualify for these premium savings.

BUYING THE NEW CAR is a family affair. After its home, the car is the family's biggest investment. The franchised dealer, who forms the vital link between manufacturer and consumer, spends more to protect his customer's investment than any other merchant.

The Automobile Industry Plays Giant Role In World's Economy

The entire world is the storehouse from which the automobile industry draws to produce the cars Americans drive. Even the Loyalty Islands off the east coast of Australia supply chrome, the ore used in platings and alloys. Philippine sugar cane provides cellulose for safety glass; crude rubber

comes from Ceylon and Malaya; Africa produces industrial diamonds and asbestos; Bolivian tin and domestic steel, glass, copper and some other items, either in raw form or finished parts, come from all over the world to the factories of the Midwest for inclusion in the auto-making process.

The size of the industry can be judged by its annual shopping list. It used nearly 17 million tons of steel last year—and that's about a fifth of all steel produced here. In some categories, sheet steel, for instance, the auto industry accounts for an even greater proportion of annual production.

It also takes 70.4 per cent of the malleable iron; 46.9 per cent of the lead; 67.6 per cent of the rubber; 61.8 per cent of the leather upholstery, and about 70 per cent of the plate glass. When Alfred Politz Research asked consumers to name the products they associated most closely with steel, automobiles were named many more times than any other product. This is hardly surprising since upwards of a ton of steel is used in the popular priced cars, accounting for about two-thirds of the total weight of a car.

Even in the new compacts, steel is the most important component, accounting for about 65 per cent of the car's weight. But in addition to steel and other visible parts such as glass, tires and fabric, auto makers buy such exotic items as baby bottle nipples (for covering certain parts as they go through paint spraying booths), crushed walnut shells (for some metal polishing operations), ground corn cobs (for a polishing compound), cactus fibers (used in air cleaners) and castor oil (one of the components of brake fluid).

Since the time in 1908 — when fewer than 200,000 autos were on the mud paths that passed for roads — when the country's leading banking house deemed that the "saturation point" in car ownership had been reached, the industry has continued to mushroom.

Currently there are nearly 78 million motor vehicles registered in the United States, including 63 million passenger cars and 13 million trucks. Three of every four families own automobiles.

In its growth, the auto industry has revolutionized the nation's economy, pioneered major advances in industrial production and assembly, made city dwellers suburbanites and made rural isolation a thing of the past.

Family outings, and even family camping trips, are now familiar customs. The vast ma-

ajority of vacationing Americans travel by car, and there is virtually no part of the country that is inaccessible.

The automobile has become so much a part of every American's life that the industry that produces it has become unique among the nation's producers of economic wealth; to the average man it has become a part of his personal life.

People are certainly aware of the steel industry, but few of them buy a ton of steel bars. When a man installs wood paneling in the playroom, he might think fleetingly of the lumber industry.

But his car is in the driveway every day, and more likely than not he uses it several times a day. Whether or not the car is driven to work, it's likely the whole family rides in it on trips to school, shopping and all sorts of social and recreational activities.

And, breathes there a man with curiosity so stilled that he has never opened the hood to tinker even a little with the engine underneath? All of this makes the industry that produces his car seem real and familiar to him.

Today's auto industry is not only real and familiar to the car owner and the wide-flung suppliers of raw materials, but to the millions of workers in the basic industry and its suppliers and the post-manufacture industries it generates.

Two-Thirds Of New Car Sales Are On Credit

Fifty years ago half a million automobiles were sold — nearly all of them for cash on the barrelhead. This year car sales of upwards of seven million are forecast — at least two-thirds of them on time.

There are many ways to finance your new car purchase (and used cars, too). Some dealers handle their own financing; others have arranged with major finance companies to handle it for them.

At first, banks were slow to offer financing to the car buying public. Now they handle upwards of 50 per cent of automobile time sales and are anxious to get more of this business.

Banks will make loans directly to potential buyers. Other banks have working agreements with dealers to take care of their time sales. Insurance agents offer a bank financing service to their customers and will assist them in processing the papers.

The automobile manufacturers have done an amazing job in finding out what consumers want and then giving it to them. Today's line-up of cars — featuring low cost, low upkeep, economical operation, durability, and sizes and styling most wanted — should make this a banner year.

Similarly, financial institutions have improved the quality and value of their service. A recent example is the practice of some banks of giving the potential buyer a line of credit for 90 days during which he can select a car at his leisure.

There are methods of financing to suit every buyer. Go shop for the new car of your choice, select the financing terms best suited to your need, and enjoy driving it.

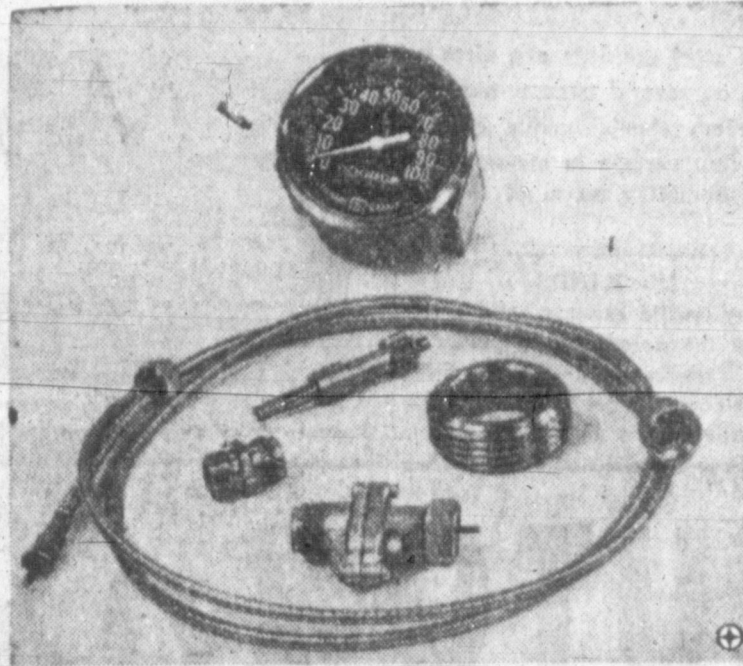

ASME To Have April Meeting

The April meeting of the Amarillo group of the American Society of Mechanical Engineers will be held Saturday in Lubbock.

The meeting will be in conjunction with the annual Texas Tech College Engineering Show. All mechanical engineering students have been asked to meet at 12 noon Saturday in the student union building.

A presentation of a \$25 check will be made by the ASME group to the student winner of the science contest in the show.

Those in the Pampa area interested in attending the event may secure reservations by calling E. C. Juenger at MO 3-8545 or MO 4-4681.

BEHIND SPEEDOMETER DIAL are precision parts, each made of the type of steel designed to perform the task best at low cost. The "nerve" of the instrument is the flexible steel shaft, or cable. Stewart-Warner makes 90 miles of it each week.

SHELTER FOR SALE

WESTCHESTER, Pa. (UPI) — Mr. and Mrs. Edward Trost today offered for sale a brand new fallout shelter.

The couple won the metal shelter in a local raffle after they had spent nearly a year working evenings, weekends and vacations to build a concrete block underground shelter in their backyard.

Tests with newly developed fuel-per-hour meter reveal that automobile air conditioners do not increase gasoline consumption.

Homecoming Slated At Lakeview

LAKEVIEW — Plans have now been completed for the Lakeview Ex-Students & Ex-Teachers Homecoming to be held on April 21 in the Grade School Auditorium at Lakeview.

The morning session will begin at 11. Noon meal will be served by members of the Junior Class in the Cafeteria beginning at 12. Evening session will begin at 1:30. The evening session will include a variety show, class reunions and business meeting. The evening meal will be served by members of the Sophomore Class in the cafeteria between 6 and 7. Evening entertainment will begin at 8 in the School Gymnasium.

The Homecoming will include ex-students and ex-teachers from Lakeview, Webster, Brice, Lesley, Pleasant Valley and Deep Lake.

Automotive Uses Of Steel Widen

Thanks to the ingenuity of metallurgists, engineers and researchers, the unique qualities of steel are being advanced and refined to do more and more jobs in automotive production with a consequent reduction in cost of car ownership because of increased durability and reliability.

Auto experts stress that only steel provides the combination of strength and formability essential to mass-produced car bodies.

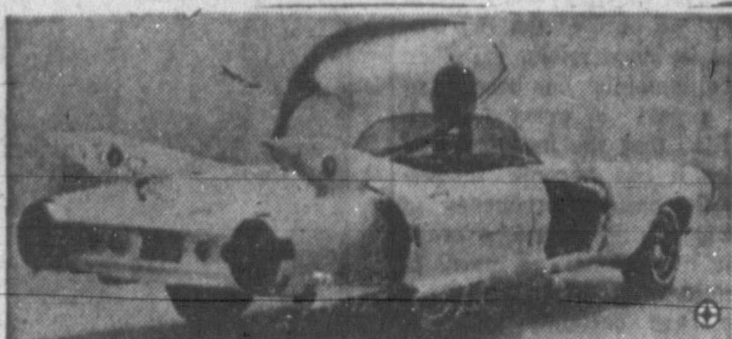

Steels coated with ceramic or plastic are certain to find increasing use as the trend toward lighter and more economical to operate vehicles continues. Ceramic

coated steel mufflers are already in use on several current models.

Stainless steel's unique qualities seem certain to make it a key automotive metal of the future.

NO HANDS

Many traffic experts believe the day of the automated highway is near. Test roads are being built with electronic devices that take over the entire driving task.

CADILLAC CYCLONE is an experimental car with switch-controlled doors which spring out from the sides of the car and slide back.

300 Models Of 1962's Offering Personal Autos

The industry that made mass production and standardization of parts a way of life in this country is now engaged in the paradoxical business of putting out cars that are in a real sense one-of-a-kind.

For in addition to offering nearly 300 models in the 1962 auto line, the American auto industry provides so many options—choices of paint color, interior decor, accessories, engines, transmissions, power accessories, and other equipment—that it is literally possible for one of the big makers to produce 2 million cars without having any two exactly alike.

As a result, the greatest flowering of personal cars, vehicles made to the individual taste of the buyer, is evident in the new cars now on the roads. And apparently the trend toward individuality is continuing. Last year, there were only 260 different models.

While there are only three basic body styles—sedan, convertible and station wagon—there are many sub-types within those three basic categories. There are, for instance, two and four door models available in each type, and there are such things as a hard-top convertible, a compromise between the sedan and the convertible.

Automatic transmission is available on every American automobile, and for a while looked like it would shoulder the older standard transmission right out of the market.

But there has been a resurgence of the "stick," particularly among sports car enthusiasts, many of whom are able to indulge in their car passion for bucket seats, four-speed gear boxes, tachometers and other personalized paraphernalia in a car that also has the room and comfort of a family vehicle.

Buyers also have choices between headrests or no headrests, one of several types of radio or none at all, a table of different horsepower engines, air conditioning, power windows or the old hand-cranked type, seat-belts or none, and on and on.

Stainless Steel Maintains Its Gleam On Cars

The automobile metal of the future is here now. The characteristics of stainless steel which make it so desirable on 1962 cars are expected to be even more important in the future.

These characteristics of stainless steel include great strength, tolerance of high temperatures, resistance to corrosion and gleaming beauty.

Whether stainless steel is used functionally or decoratively, its good qualities overlap each other. For instance, in automotive trim stainless steel's main attraction is its rich gleam—which can't wear off and needs only the wipe of a damp cloth for cleaning. Stainless steel's bonus in trim is that it resists dents and scratches that would damage other materials.

Looking to the future, engines may follow several trends—from refinements of today's reciprocating types to gas turbines. Whatever the type of engine, the trend is to lightness and more power. Stainless steel seems sure to receive increasing use because of its strength and its resistance to heat and corrosion.

One example of stainless steel's exciting possibilities is an experimental engine with thin, strong walls of stainless steel which has produced one horsepower per pound of weight.

You will get greater value and satisfaction if the accessories you buy for your car are stainless steel.

Some which come in stainless steel are wheel covers, auxiliary lamps, car top carriers, license plate frames, mirrors and sunshades.

It's More Fun And Safer To Drive Now After Research

The odds for a safe trip on highways in the United States weigh more heavily each year in favor of the careful motorist.

An army of educators, researchers, engineers and traffic safety specialists work constantly to increase the odds for safe driving, and records show they are making rapid gains in the battle against accidents.

In fact, it is three times safer on a mileage basis to drive today than 25 years ago.

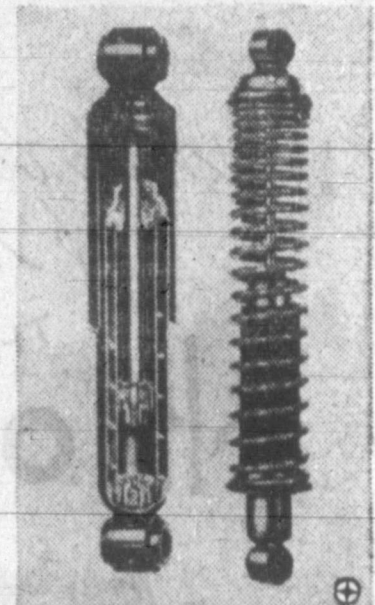

Traffic safety specialists consider the achievement—astounding in the light of increases in the number of vehicles, which has almost tripled in the last 25 years, and the number of drivers, which has more than doubled.

Norman Damon, a vice president of the Automotive Safety Foundation and veteran campaigner for highway safety, ranks advances in traffic accident prevention among the most important social accomplishments in the history of the country.

Automotive engineers are designing vehicles with built-in safety features. Manufacturers have improved tires, brakes, headlights, visibility. Safety belts, door locks, steering wheels and dash panels are engineered for crash protection.

Mr. Damon points out that four out of five drivers over an average of 10,000 miles each last year without a mishap.

"This is due in large measure," he said, "to the rapid increase in high school driver education courses now provided by 71 per cent of the public schools. This is our greatest insurance that coming generations of drivers will be better than their elders."

PRECISE DESIGN and special steels assure durability and reliability of two types of Moorshoock shock absorbers shown.

Now Is The Time For You To Spring Out In A New '62

Wheels Are Vital To Our Work And Play

A romance that began almost seven decades ago between the American and his automobile shows every sign of growing stronger with the passing years. At first only the adventurous were attracted by the newcomer, but it rapidly became a cynosure and has remained so.

The automobile has been described in prosaic terms as nothing more than a marvelous combination of steel and glass, of wire and rubber and fabric. But it has inspired almost lyric prose from others who have called it a young man's wings and an old man's limbs; a housewife's magic carpet for shopping and the doctor's motor of mercy.

Storekeepers depend on it to satisfy customers quickly and with it the sportsman and vacationing family can find new adventure in places far off the beaten path.

The automobile's four wheels bring distant parts of the nation closer together, and because of it America has the most extensive system of highways the world has ever known.

Whoever has a part in making it, or selling it, or using it, or servicing it has an intimate, continuing interest in it.

Because it is so much a part of our lives, the automobile has made more money for more people than any other product in

our history. It has created millions, brought prosperity to thousands and has kept millions employed. No single product has so rearranged our lives, our geography and our mode of living.

It has been a liberator in many ways. Without the internal combustion engine most vacations would be quite impractical. How else can dogs, babies, adults and their sundry possessions be moved for a week-end or long vacation, with some orderly confusion to be sure, but without worry about train or plane schedules; not to mention that carrying a full load of passengers doesn't add a penny to the basic transportation charges. Which is one big reason why some 65 per cent of all pleasure travel is in the family car.

The automobile, likewise, has enlarged America's economic horizons immeasurably. The power to go has been the power to grow. One out of every six businesses is related to the automotive field; one job in seven is in highway transportation. The automobile uses more than one-fifth of the nation's steel and accounts for a major volume of all the rubber, petroleum, glass, zinc and lead produced. Steel plays a leading part in road construction. Out of every million dollars of contract construction cost (about two miles in rural areas, some

times as much as they pent mile through big cities) about 600 tons of steel are used.

Last year Americans spent more than 57 billion dollars to buy, operate and maintain their motor vehicles. This is about three times as much as they spent on all other forms of transportation combined.

Automobiles and parts account for 5 1/2 cents of the consumer's dollar; another 3 1/2 cents goes for gas and oil. Fifty years ago consumers paid less than 2 billion dollars for all types of travel.

In all but a handful of big cities, the automobile accounts for 85 per cent of all urban travel and is usually the dominant form of transportation for persons entering the downtown area.

The largest single use of the average automobile is transporting workers to and from their jobs, accounting for the mushrooming growth of industry and business activity on urban fringes. Supermarkets could not have thrived without the car, the parks and national forests would be all but deserted, the blending of urban and rural life would be virtually unknown.

Even though the rate of car growth has slowed slightly, the automobile is multiplying faster than man. Since 1930 motor vehicle multiplied five times as rapidly as the nation's population. The increase for motor vehicles has been 150 per cent; the population has risen 30 per cent.

By 1976 motor vehicles are expected to show an increase still twice as high as the population

STEEL—upwards of a ton—makes up two-thirds of typical car.

Autos And Steel Belong Together

Automobiles and steel are two of our nation's vital industries whose destinies are, to a great degree, interdependent. Considering that about one-fifth of our huge annual steel output goes into car production, the importance of one business to the other becomes self-evident.

Upwards of a ton of steel goes into the production of a modern automobile. This consists of more than 160 distinct varieties of steel, prepared in more than a thousand combinations of form, size, quality and varieties of steel, prepared in composition.

Not only is steel the basic material in autos, but it is the only one of the more than 18,000 items that go into cars which can perform dual and triple functions.

Steel gives structure and strength to the automobile, and at the same time helps insure reliability and durability. It forms an excellent base for paint, and the resulting colored component becomes a coordinated part of the car's decor.

The forecast for 1976 is car registration close to 114,000,000 or a gain of 54 per cent over present totals and an estimated population of 215,000,000, a rise of 27 per cent.

Without the automobile the world would be a lot poorer. It has no rival when it comes to taking you where you want to go and when you want to go.

New Cars Shaped In Sculptured 'Steel'

Steel, says the definition, is composed of iron alloyed with carbon.

Yet they make "steel" in an automotive styling studio without using either iron or carbon. At Ford Motor Company's Styling Center, for example, they use plaster, clay, lumber, foil, plastic tape and paint, and a few other materials.

Once the stylist transfers his idea of what a car should look like from his mind to paper, it is made into a three-dimensional model that has the appearance of an all-steel body and other steel components. In this way, he visualizes how the design will appear in production without having to wait for prototypes to be built.

To simulate the appearance of sheetmetal, the Ford styling studios use in one year as much as

55,000 board feet of lumber, 900 pounds of foil, 1,500 gallons of paint, 14,000 yards of plastic tape, and more than 100,000 pounds of modeling clay (which is used over and over).

The lumber is used to build a skeleton-like framework on which the full-size clay model is sculptured in clay. Once the model is honed to a fine finish, it is painted or covered with a special-colored plastic film to give the appearance of a finished metal car. The foil and plastic tape are used to simulate the appearance of brightness in moldings, ornaments and bumpers.

The finished product, even at close range, looks like an all-steel automobile. Yet it contains neither of steel's essential ingredients.

Pontiac-Tempest 'Drive-o-Rama' Slated April 12-16

The 1962 Pontiac - Tempest "Drive-o-Rama" is coming to Pampa April 12 to 16.

This will be the first appearance of the "Drive-o-Rama" in Texas.

The show will be held at McAndrew Pontiac, 800 W. Kingsmill. It is free to the public.

STAINLESS STEEL wheel covers shrug off stones and road salts, clean with damp cloth.
