Juvenile Wounded In Wild Chase

★ ★ ★ ★ ★ Khrushchev Sounds New Warning To United States ★ ★ ★ ★ ★

USSR Would Aid Any 'Socialist' Nation

By ROBERT J. KORENGOLD

MOSCOW (UPI) — Premier Nikita S. Khrushchev said today the Soviet Union would come to the aid of Cuba, China, East Germany or any other "Socialist" nation in case of "imperialist" attack.

His words were reminiscent of those spoken last Friday by Defense Minister Marshal Rodion Malinovsky, who warned the United States that any attack on Cuba would start a thermonuclear World War III.

But Khrushchev widened the sphere of coverage by including the other Communist states.

Khrushchev also warned the West to expect no further concessions from the Soviet Union on the matter of on-site inspections to police a nuclear test ban.

Major Address
In a major radio and television speech, he said the Soviet Union already had made a "serious concession" on the issue by agreeing to two or three inspections yearly in the Soviet Union.

"You cannot expect any more from us," he said.

The United States initially wanted eight to 10 such inspections, but now has lowered its minimum to seven "Neutral" nations at the Geneva disarmament conference.

It had been overlooked by the burglars, police said.

The burglary first was discovered shortly after 7 o'clock this morning by Patrolman P. E. Bailey on a routine check of the alley behind the store.

Police Chief Jim Conner said entrance was gained by prying off a wire mesh over a glass on the rear door. The door glass was broken and the burglars reached in and turned the night lock.

The safe apparently was loaded into a waiting car and hauled away. Nothing else in the store office was molested, police said.

Terrorist Queried In France

PARIS (UPI) — French security officials questioned secret army terrorist chief Antoine Argoud today on possible new assassination attempts against President Charles de Gaulle.

Argoud, bound and beaten, was turned over to police Tuesday in the heart of Paris under mysterious circumstances.

Police said his subordinates in the Secret Army Organization (OAS) had betrayed him. Argoud was reported to have claimed he was kidnaped in Munich, Germany, and several Paris newspapers said the job was done by secret agents of the French government.

De Gaulle summoned his cabinet today for discussion of international affairs and domestic problems.

Headed OAS
Argoud, 52, announced from hiding last May he had taken charge of OAS activities in France. The OAS has carried out terrorist acts in France and Algeria and is blamed for eight frustrated plots to kill De Gaulle.

The latest plot was revealed Feb. 7. Fifteen terrorists currently are on trial for another attempt last Aug. 22. Argoud, the most prominent OAS terrorist leader at large, was a prize catch for the French government.

The newspaper Paris Jour said Argoud was caught in the same way Israeli agents kidnaped former Nazi officer Adolf Eichmann in Argentina in May, 1960, and spirited him to Israel for trial and execution.

Anonymous Phone Call
Police said they received an anonymous phone call Tuesday saying Argoud would be found "very close" to police headquarters. They quoted the caller as saying:

"Argoud has betrayed us. He has failed in all affairs he organized, notably the assassination attempt against De Gaulle at Petit Clamart. You can take delivery of him."

The terrorist leader was found in the back of a small truck near the Cathedral of Notre Dame.

ANTI-TELEPHONE POLE
HOLLYWOOD (UPI) — A hapless motorist Tuesday painted this slogan on the rear, round end in his front fender. "Help stamp out telephone poles."

On Cuban Reconnaissance

Subcommittee Summons Air Intelligence Chief

WASHINGTON (UPI) — The Senate Preparedness Subcommittee investigating the Cuban crisis summoned the Air Force intelligence chief today presumably for questioning about air reconnaissance over the island last fall.

Chairman John C. Stennis, D-Miss., called Maj. Gen. Robert A. Brietweiser to testify behind closed doors as the inquiry resumed.

Testimony started at 2 p.m. EST. Prodded as a result of a news magazine story, the Defense Department said Tuesday that responsibility for aerial reconnaissance of Cuba was shifted from the Central Intelligence Agency (CIA) to the Strategic Air Command (SAC) a day or two before offensive missiles were found there Oct. 14.

The story appeared in Newsweek. But the Defense Department claimed there was "no conflict at any time" between the CIA

SCIENCE FAIR EXHIBIT — Radiometers indicating various sources of energy displayed above, will be a part of the Science Fair exhibits to be shown Friday and Saturday in the girls gym at Pampa High School. In Mrs. A. W. Skewes fourth grade at Stephen F. Austin Schools, Steve Edwards, Ruth Ann Davis, Cindy West and Welissa Lockett show their exhibit and explain that the radiometer turns approximately 450 revolutions per minute under the heat of a 100 Watt bulb, 215 rpm's from the heat of an iron and 750 rpm's from direct sun light, proving the intensity of radiant energy varies with the source. (Daily News Photo)

Frequent Trips Cause Powell's Budget Overdraft

WASHINGTON (UPI) — Chairman Adam Clayton Powell was said today to have overspent his \$63,000 Education and Labor Committee budget in the last Congress, partly because of frequent trips to Puerto Rico where Powell maintains a home.

Powell put the overdraft at \$269. But other sources said it apparently would total more than \$2,000. It came to light as Powell went before an accounts subcommittee seeking an increased committee allowance of \$697,700 for the coming two years.

Rep. John M. Ashbrook, R-Ohio, a member of Powell's committee, told the House shortly afterwards that Powell's money request should be cut by \$200,000. He cited the Puerto Rican travel expense, which he said was run up by Powell, other committee members, and staffers in 1961 and 1962.

If it comes from a hardware store we have it. Lewis Hdw. Adv.

Science Fair Slated For Pampa Schools

Months of research and work will be culminated for the science students of elementary schools, junior high schools and Pampa High School with the staging of the seventh annual Science Fair on Friday and Saturday in the high school girls' gym.

Pampa students in the three

school levels have entered 375 projects, according to Mrs. Elaine Ledbetter, high school science instructor and Science Fair director.

The projects will be set up by 5 p.m. Thursday with judging of the exhibits slated on Friday from 8:30 a.m. until noon. "Local industrial and professional people and former teachers will judge the entries," Mrs. Ledbetter announced.

The Fair will be opened to the public from noon Friday until 4 p.m. Saturday.

Projects have been entered in seven divisions of the fair instead of three, which means 172 students will receive prizes instead of 68. Projects are in the fields of botany, medicine and health, zoology, chemistry and biochemistry, earth and space, physics, math and computers.

Seven projects entered by high school students and adjudged best in the local fair will compete at the Amarillo regional Science Fair to be held March 28-31. An undecided number will compete from the elementary and junior high groups.

Last year 428 projects were entered, Mrs. Ledbetter reported. "The lack of space forced this year's reduction in entries. Each school was given a percentage of the total projects based on the number which had been entered in years before."

"Even though there are fewer projects," Mrs. Ledbetter stated "they are better this year because only the best were selected to compete."

In addition to being director of the Pampa Science Fair, Mrs. Ledbetter is one of 21 members of the Science Council of the National Science Fair, International member of the Panhandle Science Council and secretary to the National Science Teachers' Association.

BOOST TO BUSINESS
WASHINGTON (UPI) — The Commerce Department Tuesday reported that automobile production has been one of the main reasons that business has continued to advance recently.

Auto output, it said, accounted for nearly a fourth of the increase in the national total of goods and services produced during the last three months of 1962. The value of passenger car output totaled \$23.4 billion at seasonally adjusted rates during the final quarter of last year.

15-Year-Old Boy Shot Twice In Gun Battle

A 15-year-old Perryton juvenile delinquent was in serious condition this noon in Highland General Hospital here with a .38-caliber bullet in his neck after the "four-gun" car thief and would-be killer engaged in a running gunfight this forenoon with two state highway patrolmen, the Miami sheriff and a Canadian deputy sheriff. Officers said the youth shot out one car's motor and refused to surrender, even after being wounded.

The incident started when Highway Patrolmen Lawrence Macha and George Broughton, cruising in the Miami area around 9 a.m. heard a radio call from Bill Starr, deputy sheriff of Canadian, stating that he had spotted a 1960 Pontiac which had been reported as stolen early this morning from Perryton.

Starr reported that he had tried to stop the car, but that it was outrunning him at speeds up to 115 miles an hour. He asked all officers in hearing for assistance.

Macha and Broughton were joined by Miami Sheriff Cy Carr, and set up a roadblock four miles east of Miami on Route 60. Broughton placed the highway patrol car on top of a hill overlooking the road one way, while Carr parked further down the road covering the other side of the highway.

Macha stepped to the middle of the road with a 30-30 rifle in his hands as the stolen car neared him. Just then, Starr radioed "Look out, he's armed."

"I pointed the rifle at the car, hoping it would stop him," Macha said, "but he kept coming straight at me. I jumped out of the way at the last minute and put a bullet through his motor, while Broughton blew out one of his tires with a shot from his .357 Magnum."

Apparently Sheriff Carr also shot and missed, because the car kept going.

"Starr sped by us, and we all three jumped in our cars and followed."

"The boy kept leaning out the window and shooting back at us, while we kept shooting at his tires."

"We blew three of them out, because Sheriff Ray Phagan of Perryton reported that there were rubber streaks all the way from Perryton to where we finally stopped him."

Patrolman Macha said he kept on going however, shooting back. (See GUN BATTLE, Page 3)

Downtown Parking Plan Aired At Council Meet

With two members absent, the Pampa City Commission transacted only routine business last night and entered into a lengthy discussion of a downtown parking proposal submitted by the Merchants Activities Committee of the Chamber of Commerce.

Commissioner Will Graham was not in attendance at the meeting, having been notified just before the session convened that his father had died in Midlothian, Texas. Commissioner L. P. Fort was absent because of illness.

The commission heard a plea from J. Kirk Duncan, downtown businessman and member of the chamber committee, urging the city to create a city parking department and budget \$25,000 annually from parking meter receipts for the purchase or lease of property for off-street parking in the downtown area.

Duncan told the commission that it was the opinion of downtown businessmen that the current use of parking meter receipts through the general fund is unfair both to the shopping public and downtown merchants and property owners.

He stated that since parking meter receipts originate in the downtown area, they should be spent in the downtown area to provide additional parking facilities there.

NEW DIRECTOR — George D. Smith, 29, is in the middle of his first week as director of the Pampa Youth Center. He arrived in Pampa last Sunday from Chickasha, Okla., with his wife and two small sons. They are making their home at 1534 N. Faulkner. Smith, a graduate at East Central State College in Ada, Okla., has coached and taught in Oklahoma schools for the past eight years. (Daily News Photo)

(Continued From Page 1) some day there will be a change of mind.

District Scouters To Meet Thursday

Members of the Santa Fe District Boy Scout Committee will meet at 7:30 p.m., Thursday in the Scout Service Center to conduct administrative and program activities of the coming month.

Plan To Solicit Livestock Buyers

A meeting of the Agriculture and Livestock Committee and the board of directors of the Pampa Chamber of Commerce was held yesterday to organize the solicitation of buyers for the Gray County Junior Livestock Show.

Home To Elect Campaign Chiefs

The next meeting of the Executive Committee being formed in the community campaign to raise funds for a Nursing Home in Pampa is scheduled today at 4 p.m. at the Court House Cafe.

The stolen car's motor finally burned out about four miles west of Miami and the car stopped. The driver opened the door on one side and wedged himself between the door and the ridge and kept on shooting at us with a pistol.

Goal of the campaign is to raise \$300,000 for the construction and furnishing of a 50-bed community Nursing Home.

That property was the first gift to the Foundation from Rev. and Mrs. E. G. Barrett, said Teed; "and was the beginning of this fine project. However, the property was deeded back to Rev. Barrett, and the Castleberry land was deemed more suitable for the Nursing Home because of its nearness to Pampa's other health facilities."

How Do Birds Handle Handel?

By TOM A. CULLEN
Newspaper Enterprise Assn.
LONDON (NEA) — What does the "Blue Danube" sound like when warbled by a brace of canaries? How does Handel's "Largo" sound when played on a saw? Was Nicolai-Lenin a bass or a tenor? Could Rudolph Valentino sing as well as act? Could the poet Robert Browning really read poetry?

The answers are to be found in the British Broadcasting Company's colossal record library. The BBC has more than half a million recordings on tap, valued at about \$1.5 million.

Sampling some of this enormous collection, the listener discovers that Lenin, noted as a Russian revolutionary orator, was neither a bass nor a baritone. He comes over a high-pitched tenor.

Valentino sang in English with a thick Italian accent, and flattened his high notes. The BBC's recording is the "Kasmiri Love Song," the only record Valentino ever cut.

As for Browning, he fluffed his lines while recording poetry once, broke up and giggled before he could continue.

If the "Blue Danube" is to your liking, go to the BBC library. There are 315 versions of the tune on tap. If anyone had 26 hours to listen to the lot, he would hear it sung by canaries, played with kitchen spoons, presented by a military band, a music box, a steel hand, gypsy strings and Spike Jones.

There is also the "Blue Danube Blues," the "B.D. Bounce," the "B.D. Rock" and a Dixieland version — not to mention the vocal offerings in English, French, German and Italian.

"Tiger Rag" runs a healthy second with more than 200 different pressings available. In addition, there are stored 66 recordings of Schubert's Unfinished Symphony, and 73 recordings of Beethoven's Fifth — all neatly filed away in the ground floor and basement of a London building, filling a some

NON-HI FI — BBC Record librarian listens to an ancient Edison recording on vintage Gramophone.

7,000 square feet of floor space. One box of Edison white wax cylinders, pressed in 1888, was discovered in a London junk shop in 1951 and promptly snapped up by the BBC at the bargain price of \$33. Today they would be worth at least 10 times that amount.

The largest record in the library is a 14-inch Pathé made by Enrico Caruso in 1898. The smallest measures only 15-16 inch in diameter. The tiny record plays the National Anthem, and was made in 1924 especially for a royal doll house.

The library is filled with voices

of the greats — but not Queen Victoria's.

"Queen Victoria made one recording in 1898 on condition that the cylinder be destroyed immediately after it was played for the first time," Miss Valentine Britten, librarian, declared.

"It was a personal message from the Queen to the Emperor of Abyssinia expressing her regret that she could not visit him."

"The emperor stood at attention while the record was played, after which an artillery salute was fired. The cylinder was then broken into pieces by a British diplomat."

Weekly Report To Texans

By SEN. JOHN TOWER

Senator John Tower (R. Texas) discussed in his weekly report to Texans the implications of the Arms Control and Disarmament Act and his resolution, introduced in the Senate this week, which would insure Senate approval of all moves to limit or reduce America's armed might. The Senator's remarks follow:

This week I joined with Senator Carl T. Curtis, of Nebraska, in introducing a resolution to insure Senate approval of all moves to limit or reduce America's armed forces or America's armed might.

In 1961, the Arms Control and Disarmament Act, sometimes known as Public Law 87-297, which created an agency to be known as the United States Arms Control and Disarmament Agency. The agency is headed by a director who serves as principal adviser to the Secretary of State and the President on Arms Control and Disarmament matters.

Section 33 of the act authorizes the Director to prepare for the President, Secretary of State, and heads of such other Governmental agencies, as the President may determine, recommendations concerning U.S. arms control and disarmament policy. This section continues, however, with a proviso that "no action shall be taken under this or any other law that will obligate the United States to disarm or to reduce or to limit the Armed Forces or armaments of the United States, except pursuant to the treaty making power of the President, under the Constitution or unless authorized by further affirmative legislation by the Congress of the United States."

Section 34 of the act provides, among other things, that the Director is authorized to "formulate plans and make preparations for

the establishment, operation, and funding of inspection and control systems which may become part of the United States arms control and disarmament activities, and as authorized by law, to put into effect, direct, or otherwise assume United States responsibility for such systems."

This resolution that I have co-sponsored with Senator Curtis says it shall be the sense of the Congress that the American negotiating position in arms control or disarmament discussions include these safeguards:

1. Complete on-the-spot inspection of all areas involved in arms control or disarmament agreements with Members of Congress included as members of the inspection team.

2. Reporting of the President of the United States to appropriate committees of Congress, of any and all steps taken by him which would tend to alter existing ratios of weapons and the effectiveness between this Nation and its allies, and the Soviet bloc of nations.

3. All preliminary and final arms control or disarmament agreements be embodied in treaties subject to the advice and consent of the Senate of the United States.

When this act setting up this Disarmament Agency was passed I voted against it. It was passed by a vote of 73 to 14 with 13 members not voting. I very vigorously opposed the bill at that time and I am very sorry that it is on the books now and that this agency has been created. It is our hope that this resolution will get favorable consideration by the Congress to the extent that we can have more control over this business of disarmament.

You know what would happen if we surrendered our armed forces to the United Nations. They would for the most part come under the control of the Assistant Secretary-General for Security Council Affairs. He is one of the eight Department or Cabinet Secretaries in the United Nations and this is the most important "Cabinet" position in the United Nations. The present Assistant Secretary - General for Security Council Affairs is a Russian. His name is Eugeny D. Kiselev. As a matter of fact, every one of these Assistant Secretaries since the beginning has been a Russian by virtue of some stupid agreement that we entered into with the Soviet Union on the matter. That would mean that our armed forces would come under the control of an Assistant Secretary - General who is a Soviet. I think it is foolish for us to talk about disarmament at a time when the Soviet Union is bent on the destruction of the free world.

Too, we should take a lesson from history. No dictatorship has ever voluntarily disarmed. We cannot expect the Soviet Union bent on world conquest as it is to enter into any honorable agreement.

Washington Window

By LYLE C. WILSON
United Press International
WASHINGTON (UPI) — Puritanical is the word chosen by President Kennedy's chief economic adviser to describe those numerous taxpayers who are resisting the administration's effort to give them a tax reduction.

The dictionary defines puritanical as morally rigorous; strict; as, for example, puritanical women, laws, behavior and self denial. The resisting taxpayers, therefore, have no need to be ashamed of themselves if they are, indeed, puritanical.

Walter W. Heller is the head man of the President's economic council.

Politically, Heller is a spender. He is a disciple of the late Maynard Keynes. Keynes was an Englishman who damaged the United States in this century more than George III or the hated Lord North ever injured the colonies in the 18th.

Spending Policy

Keynes sold Franklin D. Roosevelt on the "spend yourself out of trouble" fiscal policy that did not work, least of all remedy unemployment or anything else. It did obtain an uninterrupted series of Treasury deficits during every year FDR was president. Kennedy administration policies are similar and the results promise to parallel FDR's.

Heller is a crack economist, no doubt. But Heller is not much good at understanding the motives of men, especially of taxpayers who resist the Heller-devised tax cut.

These resisting taxpayers are not puritanical. They are no more morally rigorous than their fellow citizens who are whooping it up for the administration's tax plan. Smarter, perhaps, but not more moral.

What economist Heller seems not to understand is that the taxpayers are resisting a tax cut because they are afraid they can't afford it. They are fearful, also, that the Treasury cannot afford it either. It has nothing to do with morals unless it be with the out-moded morals preached by Franklin in Poor Richard's Almanac or by McGuffey in his old reader.

Follow the Franc

During the past 22 years, the U.S. dollar has travelled the path of the pitiful French franc. In four decades—40 years—the franc lost 99 per cent of its purchasing powers. The years were 1915-55.

In 22 years, 1940-62, the U.S. dollar has lost 54 per cent of its purchasing power. A bit more, in fact. The U.S. Bureau of Labor Statistics calculated for November 1962 that the dollar was worth just \$0.456.

Economist Heller is assuring Congress that a few more de-

SCORES BULL'S EYE

CAPE CANAVERAL (UPI) — The Army scored a bull's eye Monday night with a Pershing missile fired from a mobile launcher parked on a sloping sand bank.

Col. O. M. Hirsch, Pershing project manager, said the missile, designed for field army support, met all test objectives. He said the Pershing's warhead impacted in a target area after a comparatively short range flight.

NO NEWS CONFERENCE

WASHINGTON (UPI) — The White House said Monday that President Kennedy would not hold a news conference this week.

The U.S. Patent Office was established in 1836.

ficits won't do us any harm. The taxpayers have heard that one before, often. They are more skeptical than puritanical and they are more fearful than skeptical. They believe they just can't afford a tax cut right now.

Now You Know
By United Press International
The first adding machine was invented by the great French mathematician Blaise Pascal in 1642, but the first commercially successful adding device, which recorded its results was invented by the American William Seward Burroughs in 1888, according to the World Almanac.

TAKES TOP JOB — Swedish director Ingmar Bergman, one of the giants in world of films, has accepted appointment as director of Sweden's Royal Dramatic Theater.

Haltom City Upsets Pampa In Bi-District

Red Sox Believe Dick Powerhouse

By FRED DOWN
UPI Sports Writer
The hope that springs eternal in the spring leads the Boston Red Sox to believe that in Dick Stuart they've acquired their most powerful right-handed hitter since the days of Rudy York and Vern Stephens.

They don't pay off on practice home runs, of course, but the tremendous power Stuart is displaying in the Red Sox' Scottsdale, Ariz., training camp has Manager Johnny Pesky thinking that his rookie year as a manager could be a howling success. "I haven't seen such a display of power since the days of Ted Williams," said Pesky Tuesday, invoking the name of the greatest Red Sox slugger of 'em all. "It's just fantastic."

Stuart had just hit 10 batting practice "homers" in 10 minutes bringing to 25 the number of balls he has hit out of the Scottsdale park in three days. Obtained from the Pittsburgh Pirates during the winter, Stuart is being counted on to hit between 35 and 50 homers for the Red Sox this season. No Red Sox player has hit 50 homers in a season since Jimmy Foxx did it in 1938.

Giants Sign Sanford
The San Francisco Giants landed one of their key players Tuesday with 24-game winner Jack Sanford's agreement to a contract for an estimated \$37,000. Sanford's signing for about a \$13,000 raise left Orlando Cepeda, Juan Marichal and Matty Alou unjustified.
Former New York Yankee ace Bob Turley turned in a strong performance in the Los Angeles Angels' intra squad game, causing Manager Bill Rigney to enthuse, "He looked fine to me. A few more starts and he'll have full confidence in the health of his arm. Then he'll really let loose."

At Apache Junction, Ariz., Manager Harry Craft of the Houston Colts said the young arms "in this spring camp are the best I have ever had the pleasure of managing. Many of these fellows may be a year away but most are sure to be standout hurlers in the not-too-distant future."

Kucks Impresses Mets
Johnny Kucks, former Yankee World Series hero, impressed in the New York Mets' St. Petersburg, Fla., camp and Coach Ernie White said he is the dark horse of the team's pitching staff. Kucks, who won 18 games for the Yanks in 1956, was 14-7 with Atlanta last season.

Other camp news: Rocky Colavito, Norm Cash and Chico Fernandez, who hit a total of 96 homers among them last season, officially became holdouts when they missed the Detroit Tigers' first official workout. Second baseman Bill Mazerowski, a six-year veteran, was appointed captain of the Pirates and Manager "he's not a holler guy but he knows how we play the game."

Two Chisox Unsigned
Pitcher Juan Pizarro and outfielder Floyd Robinson remain unsigned with the Chicago White Sox. Frank Howard and Bill Skowron continued to pound the ball during Los Angeles Doger workouts at Vero Beach, Fla. Tom Brown, baseball and football star at the University of Maryland passed over offers from the Green Bay Packers and Buffalo Bills to sign for an estimated bonus of \$20,000 with the Washington Senators.

UP AND OVER — Wayne Kreis goes over the head of Haltom City's Larry Lake (25) for a bucket, while Randy Matson (55) watches and an unidentified Buff dashes in to help Lake. (Daily News Photo)

Jeff, Buna Head List

By United Press International
Defending Class AAAA and AA state champions Dallas Jefferson and Buna headed for regional play in the state schoolboy basketball championships today, but Class A titlist White Deer failed to clear the bi-district hurdle.

Class AAAA champion Dallas Jefferson squeaked out a 63-58 victory over Fort Worth Arlington Heights and Buna easily bumped Humble aside 52-37 in bi-district games Tuesday night, but White Deer, moved up to the AA rank this year, fell before Canyon 56-43.

Class AAA champ Dumas faces Seminole Friday night in a regional tournament at Lubbock in its next step toward next week's state tournament at Austin.

In other AAAA play Tuesday night, Haltom City stunned Pampa 77-74, Spring Branch ousted Houston Bellaire 39-37, Beaumont French defeated Paadena 64-54, Victoria beat Austin McCallum 50-48 and San Antonio Burbank beat San Antonio Jefferson 42-36 to join Monday night winners San Angelo and Denton in the regional round.

This set up regional pairings like this: San Angelo vs. Haltom City, Dallas Jefferson vs. Denton, Spring Branch vs. Beaumont French and Victoria vs. San Antonio Burbank.

In other AAA play, Hurst Bell defeated Paris 62-58, Brenham downed Bridge City 52-47, Clear Creek stopped El Campo 72-56, San Marcos ousted Austin Johnston 67-54 and South San Antonio beat Weslaco 47-45. Kilgore had won a berth Monday night.

Regional play will find Dumas vs. Seminole and Lamesa vs. Graham in the Lubbock regional.

Amazing Arnold Stuns Harvesters

By JEFF COHANE
Pampa News Sports Editor

HALTOM CITY — A whirling, dancing dervish reminiscent of Bob Cousy at his best weaved in, out and around the Pampa Harvesters last night to give Haltom City a 77-74 win in their bi-district game.

Billy Arnold, a lanky, skin-and-bones junior, hit from all over the court, faked the Harvesters out of position time and again to set up his teammates, and literally dribbled out the clock in the final quarter a la Hot Rod Hundley, to ruin the Harvester's hopes of another state championship.

The Harvesters were completely unable to stop him as he would dribble down court with his right hand, Keith Swanson would move to meet Jim and Arnold would change hands behind his back and come swivelling around the bewildered Swanson and his replacement, Donnie Ayres, sometimes leaving them flat on their backs in his wake as he drove on through.

The Harvesters were in the game until the final second however, when Wayne Kreis missed a vital free throw and Barry Williams snatched the rebound.

Score in Town
The no-stop racehorse basketball game saw the score change hands an astounding 24 times in the first three quarters and tied eight times. Until the final frame, the biggest lead the Harvesters ever had was six points at the beginning of the second quarter and the biggest Buffalo bulge was four points near the end of the half.

However, the deadly shooting Buffs made 53 per cent from the floor the first half and 51 per cent the second half, to offset a 22 of 28 to 15 of 25 free throw advantage by the Harvesters.

Big Randy Matson and 6-4½ Barry Williams battled the boards against each other, with Peterson picking up four fouls and Matson three, with the duo staying in the game all the way. While they were competing however, Haltom's 6-3½ Larry Lake dragged down 13 rebounds to give the hosts the victory, the first time a 3-A team has ever lost a bi-district game.

Pampa Leads
With Arnold and Sandy Peterson moving the ball down, Haltom grabbed a quick 4-0 lead, but the mighty Matson blocked a couple of shots, dunked a rebound and added a free throw. Wayne Kreis came back to sink his own rebound and Pampa took a 5-4 lead. The quarter went back and forth, with neither team ever leading by more than one point until, Kreis hit a basket and three straight free throws for a 17-13 lead, only to have Peterson hit a long shot, and Arnold tie it up with a pair of charities and Matson did the same to put Pampa ahead, 19-17 at the quarter as Arnold sunk a long shot but the buzzer sounded too soon.

Kreis opened with a basket and Gordon Balch canned two free ones and Pampa had a six-point lead, but the stubborn Buffs kept slicing away at the margin. Pampa kept a two to five-point lead until Lake tied the score, 31-31, on a fast break with 2:32 left in the half. Kreis put the Harvesters ahead again on a give-and-go, but Dicky Lanier tied it again and Arnold hit from the corner to give Haltom City the edge and they took a 41-37 lead into the second half as Arnold faked beautifully, drew the Harvesters out of position, and passed off in mid-air to Lake in the corner.

Back and Fourth
Big Randy hit two straight to tie the game as the second half opened and it was match point again as the lead changed hands 11 times in the frame, with the difference usually being one or two points.

With six seconds left, Swanson hit two from the free throw line for a 61-60 edge. The Amazing Arnold came driving right back to give the Buffs a 62-61 bulge going into the final frame as Balch missed a free throw in the last second of play.

Swanson hit a basket, Arnold scored two free throws, and then Lake blew the game open as he hit two baskets and a free throw. Kreis came back with a bucket, but Arnold hit another basket and another free throw for a seven-point lead.

The Buffs immediately stopped running and slowed to a crawl as Arnold dribbled, dribbled, dribbled down the court. Kreis hit three points to cut the margin to 74-70 with two minutes left, but Arnold again, dribbled the clock away. The Harvesters put on a full-court press, double teaming Arnold to

TILT — Everything looks topsy-turvy as Keith Swanson (25) goes up for a jump shot, with Haltom defenders Dicky Lanier, Barry Williams and Billy Arnold all seeming a little tipsy as they sway with the ball. (Daily News Photo)

Rice Basketball Coach Sick Of Brawls

HOUSTON (UPI) — Rice basketball coach Johnnie Frankie said he is getting tired of rough play in the Southwest Conference.

"In a so-called no-contact sport," Frankie said, "I'm getting sick and tired of going out and picking my boys off the floor."

Frankie was irate over a fight in the closing seconds of Saturday night's game with Texas Tech at Lubbock in which Tech won 74-73. The fight erupted between Rice's Larry Tyner and Tech's Harold Denney.

"I think anytime a boy deliberately starts a fight on the basketball court, his scholarship should be taken away from him," Frankie said.

Foreign News Commentary

By PHIL NEWSOM
UPI Foreign News Analyst

A large portion of President Charles de Gaulle's continuing popularity among the French people is his undisputed claim that they never had it so good. French incomes are going up. Economically, the country is developing faster than Germany and more than twice as fast as either the United States or Britain. There is a healthy surplus of exports over imports.

France, once the sick man of Europe, now is the strong man. But there also is a problem which could drastically alter the picture.

The problem is creeping inflation, which has seen the cost of living jump 5.3 per cent in the last year and 17 per cent since De Gaulle devalued the French franc in 1959.

The result is that individual incomes barely have kept pace with increasing prices and in some

cases have fallen considerably below them.

Home Front Problem
So long as he had the Algerian war to worry about, De Gaulle was able to remain fairly aloof from the problem and leave it in the hands of his experts.

The French government is the nation's largest single employer

and it is the unions in state-owned industries who now are ready to make their bid.

In the state-run coal mines, some 230,000 workers have scheduled a two-day walkout for March 1 and 2. It is possible they will be joined by nearly 500,000 others on the state-run railroads and in the state-run gas and electricity industries.

The De Gaulle government has

appealed to private employers to limit wage increases to 4 per cent per year. But France has a labor shortage and the pressure of demand has in some cases forced wages up to more than twice the government ceiling.

This is the prosperity in which the government workers now demand they be allowed to participate.

Butter Over Guns
They are supported by the Communists, who demand that savings resulting from the end of the Algerian war be pumped into wages instead of new armament.

De Gaulle's determination to protect French agriculture was a prominent factor in his veto of British membership in the European Common Market.

Agriculture remains the largest

industry in France, but it operates at an efficiency below that of its neighbors. The government is pushing a program of modernization and is attempting to siphon off a sizable portion of farm workers into industry.

Solutions to the problems of labor and agriculture are necessary if the wage-price spiral is not finally to wipe out the economic miracle of France.

Dry ice is solidified carbon dioxide. Clay pigeons are not made of clay, but asphaltum.

IT'S THE LAW in Texas

The death of an intestate person (one who has made no will) may give rise to many problems regarding distribution of his separate estate. In the preceding column we investigated the manner of dividing the community estate upon the death of a husband or wife. Now we shall see that, where separate property is involved, a completely different set of rules applies in determining heirship and apportioning the estate among the rightful claimants.

It may be well to recall that the separate estate of a husband or wife includes property owned by either before marriage, and that which is acquired after marriage by gift or inheritance. Any other property acquired after marriage is presumed by law to be community property until the contrary is clearly proved.

Now, here is a general idea as to how your separate property will be divided if you do not make a will with contrary provisions prior to your death.

If your husband or wife survives and if, in addition, there are surviving children or descendants of previously deceased children, the children and their descendants immediately obtain a full (fee) title in two-thirds of the real estate involved. The surviving spouse receives a life interest in the remaining one-third of the real property, which passes on to the children and their descendants upon the death of the spouse.

The rule for distributing personal property — cash, stocks, bonds, furniture, or any other items not constituting real estate — is different. Here the surviving spouse gets full ownership of one-third, and the children and their descendants inherit the balance.

Now suppose your husband or wife survives, but there are no surviving children or their descendants. In this case the surviving spouse inherits all of the personal property involved.

With regard to real estate, the survivor obtains full title to one-half, and the other half is divided between your mother and father, if both survive you. If only one of them survives, he or she receives only half of this portion, and the other half (or one-fourth of the entire real estate) will be divided among your brothers and sisters (and their descendants) who survive. If there are no surviving brothers and sisters and their descendants, then the one surviving parent inherits the full one-half.

Where no parent survives, but there are brother and sisters and descendants, the full one-half is divided among these survivors.

And, if there are no parents or brothers and sisters (and their descendants) surviving, then the surviving husband or wife inherits all of the real estate.

This newsfeature, prepared by the State Bar of Texas, is written to inform — not to advise. No person should ever apply or interpret any law without the aid of an attorney who is fully advised concerning the facts involved, because a slight variance in facts may change the application of the law.
