Television In Review

By RICK DU BROW

United Press International HOLLYWOOD (UPI)—NBC-TV offered a 90-minute "Encyclopedia" of communism Wednesday night. The Britannica is safe. The aim of NBC's ambitious project was to round up a geographically thorough report on the state of communism's ideologically divided world today, with the aid of experts, correspondents, film, political leaders, and Chet Huntley.

But although a great many facts were transmitted, even a non-expert could feel the basic discomfort of trying to thumb through an encyclopedia in 90 minutes, less commercials. Last Of Series Before going on, however, this seems an appropriate time to give some credit where it is due. The "Encyclopedia" was the last in a series of four NBC-TV specials about communism—the first three being "The Death of Stalin," "The Rise of Khrushchev," and "Primer" on the movement. And though there have been justified criticisms about oversights in making of them, there should be an acknowledgment of the effort and worth of putting together a reasonable low-brow popular introduction and summary for video.

"The Death of Stalin" and "The Rise of Khrushchev" offended the Soviets, who have closed the network's Moscow news bureau. All these shows have been aired this season in prime time. Furthermore, NBC also had a notable 90-minute documentary depicting the building of a Berlin escape tunnel, and will present — also in prime time — a one-hour tour of the Kremlin May 21. Thus the credit for the season's effort on a major subject.

Summary Of Others

Perhaps Wednesday night's program would have set better if it had been titled more modestly

than as an "Encyclopedia," or attempted less. It was mostly a skimming once-over, serving mainly as a summary with no major revelations. The fact is, most of the significance of the Russian-Red China ideological split was dug out several years ago when such reporters as UPI's European diplomatic correspondent, Karol Thaler, first brought the enormous story out into the open.

Wednesday night's show was functional and up-to-date. What it could have used was less drama in the music and in the translations from Communist speeches, and more style in overall presentation. There is no subject that is above stylish handling. I offer, for instance, this recent comment on the dry subject of economics by a noted British newspaperman: "The swiftest form of aid from the West to the underdeveloped countries is a consignment of economists."

The Channel Swim: ABC-TV's "Wagon Train" continues to ride high abroad... it was the only American series to place in Britain's "top 20"-rated programs for the two weeks ending March 17... it ranked sixth.

John Chancellor, former host of NBC-TV's "Today" show, will open and head a Brussels news bureau covering the Common Market for the network, effective July 1.

Kate Smith guests with NBC-TV's Jack Paar April 26... Dick York, who plays a youth director on ABC-TV's "Going My Way" series, once portrayed "Billy Fairfield," the pal of the oldtime radio serial favorite, "Jack Armstrong, The All-American Boy."

STRONG STUFF

NEW YORK (UPI) — Victor Griffin, dancer on the "Sing Along With Mitch" television series, has thinning hair. While he was in a barber shop the owner tried to sell him a bottle of hair restorer. Griffin asked if it really was good. "Yes, sir," said the barber. "I know a man who removed the cork from a bottle of this with his teeth and the next morning he had a mustache."

Red Chinese Solider Has Easy Answer To Whaddaya Read?

By ARTHUR J. DOMMEN
HONG KONG (UPI) — The dissemination of the writings of Mao Tse-Tung among the Chinese population is more than ever a priority party objective and nowhere is this considered more important than in the armed forces.

From the top to the bottom, Red China's 22.5 million man army is based on the foundation of Mao's interpretation of Marxism-Leninism.

This Marxist interpretation, rooted in the guerrilla struggles of the 1930s, stressed the necessity of intimate linking of the armed forces with China's massive peasantry in what the communists call a "People's Liberation Army."

Now this attention to Mao's doctrines appears to outweigh purely military training in order of importance.

Newly conscripted recruits into the army are being given a thorough education in the written

works of Mao before they undertake anything else.

According to China Youth News, the daily newspaper of the central committee of the Young Communist League, the study of Mao's writings by new recruits was instituted by "party committees at various levels and the party branches of companies."

Senior military officers apparently have not had a say in determining the priority of courses through which the recruits are

This would appear to be a main point of possible friction between the army and the party, with army officers hesitant to criticize the heavy emphasis on strictly political indoctrination for fear of being accused of reacting against the spirit of the "People's" army.

What is known from the China Youth News and other mainland press articles is that the first requirement of the good soldier is to

have "good political thinking."

And in China today, this means thinking the way Mao thinks.

Mao is to be regarded as a "guiding light, a lighthouse illuminating their (the young soldiers) revolutionary advance."

Moreover, the conscripts are told that "when you come across a new word, consult the dictionary, when you come across problems, consult the selected works of Mao Tse-Tung."

The emphasis on Mao's written word is so intense that soldiers who can read are directed to "carry the books around with them all the time so that they can read them whenever they have time."

On the other hand, illiterate soldiers are taught to read and write, using Mao's works as textbooks. In this way, "while learning to read and write, (they) also study revolutionary truths."

Bright Bow Ties Identify Geese

KNOXVILLE, Tenn. (UPI) — What does the well dressed geese wear?

In East Tennessee they're wearing bow ties in eye-catching colors, according to Bob Burch of the Knoxville office of the Tennessee State Game and Fish Commission.

"In the Paint Rock refuge they're wearing yellow," Burch said.

Game and Fish Commission officials in Tennessee decided the new garb will help them identify the honkers. The brightly colored bands are used to check the movement of geese to and from the different refuges.

The birds used to be marked with little metal bands around their legs, "but with the bands we didn't know about their movement unless they were shot and the bands returned," Burch said.

"With these colored bow ties, it's easy to identify them with a pair of binoculars," he said.

Quotes In The News

By United Press International

WASHINGTON — Nine-year-old James Grady, who wrote to Sen. E. L. Bartlett of Alaska to replace his grandfather's dog which died:

"I wish when another Eskimo comes down he would bring a little husky puppy with him. We can't get one here. They don't make them."

LONDON — Lady Clementine Churchill, after her husband was made an honorary citizen of the United States:

"We were terribly thrilled."

"They're going in faster than I can get them out of Cuba."

ROOM TO ROAM — Many have seen the Army's Nike-Hercules air defense missiles slumbering on their launchers at installations near major cities, but few are the views of the weapon in action—Blastoff, above, occurred at Site Summit, overlooking Ft. Richardson, Alaska, one of the few launch sites where there's elbow room for practice firing. Launchers are located on a 4,000-foot mountain peak.

Try 'Cephalic Surge' For That Pesky Cold

NEW YORK (UPI) — Have a courage more rapid blood flow through the congested throat and nasal tissues, since blood is one of nature's prime defense mechanisms.

The Illinois doctor said he had become convinced after 33 years of general practice that if the "cephalic surge" is practiced faithfully morning and evening, it is "of definite benefit in the prevention of the common cold," or it may shorten a cold's course.

People who have high blood pressure, hernia or are prone to nose bleeds should not attempt the exercise, Wagner said. But otherwise, "it is considered a safe procedure."

Foreign Commentary

By ELIZABETH WHARTON
WASHINGTON (UPI) — An increasing number of questions are being asked in the House Foreign Affairs Committee about the wisdom of extending military aid to India while the Kashmir dispute with Pakistan remains unsettled.

Defense Secretary Robert S. McNamara testified this week that the future course of military assistance for India is currently under study in the administration.

"Political and economic factors, including India's efforts to help itself and reduce the vulnerability

EXPANDING—Stretch slacks remain a popular item in coming styles. This two-piece outfit was just shown by a New York designer. It features a midriff shell top with bow and brass shoulder buttons. Matching green slacks are of a stretch-type nylon.

of the subcontinent by contributing to the resolution of the Indo-Pakistan differences, will be given due consideration in arriving at our final recommendations to the President," he said.

No less than five of the committee members raised the subject during questioning of McNamara on the proposed \$4.5 billion foreign aid bill.

Last week, Secretary of State Dean Rusk also was closely questioned on the subject by several members.

Pakistan is a strong ally of the United States while India's neutralism has antagonized some congressmen. There is concern that U.S. military aid given to India "conceivably" could be used against Pakistan should trouble break out over the province.

Both Rusk and McNamara said that negotiations which may lead to a settlement of Indian and Pakistani claims to Kashmir are underway. Both said the United States is strongly desirous of seeing a settlement achieved.

Dodge Pressure Question

But both dodged a direct answer to questions as to whether any "pressure" is being exerted on India to make peace with her neighbor, and both declined to predict the outcome.

Rusk said he disliked the use of the word "pressure" but said the United States is "most anxious" to ensure the security of the Indian sub-continent.

McNamara told committee members Monday that he would prefer such questions to be answered by State Department witnesses.

But in answer to a charge by Rep. H. R. Gross, R-Iowa, that India is supporting "two armies," and has "80 per cent of her military forces on the Pakistan borders instead of China's," the secretary replied:

"Both the United States and the two countries involved must plan for the defense of the sub-continent. I would not favor an assistance program on any other basis."

At the same time McNamara added that he did not believe India still has most of her armed forces on the Pakistan frontier, and said there has been "considerable redeployment" since the Red Chinese attacks on her borders.

BIG BEARING HAS STELLAR ROLE—Massive 334,000-pound casting, right, will be machined into a huge bearing, 17 feet in diameter for use in stellar radio-telescope, now building at National Radio Astronomy Observatory, Green Bank, W. Va. The gigantic, 500-ton assembly of shaft, yoke hub and bearing will control the minutely delicate movements of the big "ear." Machining is being done at Pittsburgh plant of Westinghouse.

State Senate Passes Record Budget For '63

AUSTIN (UPI)—The State Senate Wednesday passed a record \$3.1 billion appropriations bill to run state government for the next two years.

The Senate substituted its own version of the states spending proposal for the House-passed bill after what turned out to be a debate that lasted only about seven minutes.

Senate action returns the bill to the House, where it will be sent to a House-Senate conference committee for its final workover. The Senate version calls for spending of about \$31 million more than the House bill on anticipation of new revenue from sales tax revisions and extension of the corporate franchise tax.

The sales tax revision and franchise extension proposal, which will raise about \$30 million in new revenue to meet Gov. John Connally's budget requests, is scheduled for debate in the House Thursday.

Moffett Explains Bill

Senate finance subcommittee chairman George Moffett of Chillicothe took the floor today on the spending bill six minutes before the Senate went into executive session to confirm some appointments by Connally.

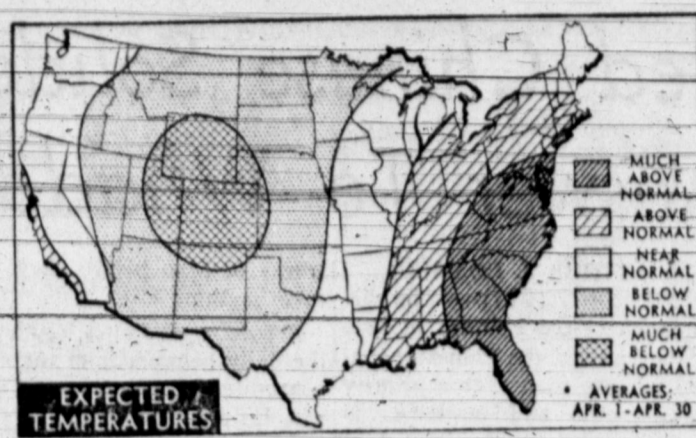

Using the six minutes to explain the bill, which had been before his committee since early in January, Moffett said his group "took into consideration that most areas of state government needed more money" over the next biennium. Higher education, he explained, received the biggest boost "because we felt it deserved perhaps more increases than other departments."

After the short executive session, senators came back and within about another minute's time had finally passed the appropriations bill.

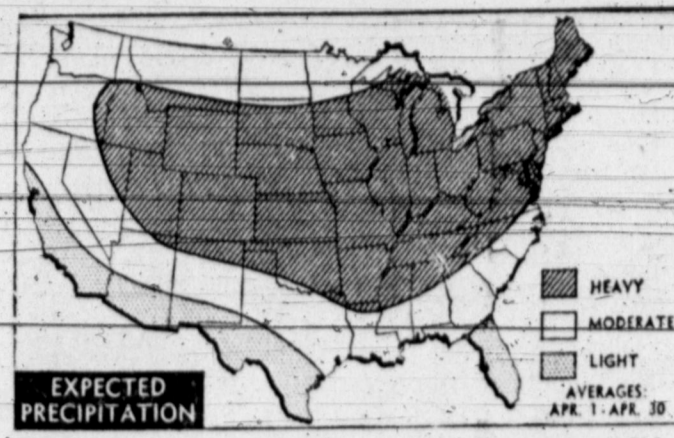

BOOMERANG BLUES

NEW YORK (UPI)—Tom Poston, panelist on the "To Tell the Truth" television series on CBS-TV, tells of the world's greatest boomerang thrower. "No matter where he threw this boomerang or in what kind of weather, it always came back," said Poston. "After years of using the same boomerang he finally bought a new one. A few weeks later friends were amazed to learn he had been taken to a mental institution. The poor fellow had gone crazy trying to figure out how to throw the old boomerang away."

AFL-CIO Bracero Suit Dismissed By Court

WASHINGTON (UPI)—U.S. Dist. Judge Bernita S. Matthews has dismissed a suit by the AFL-CIO organization in Texas aimed at blocking Mexican laborers

from commuting across the border each day to work in Texas towns.

The union had contended that the government, in effect, was giving Mexican nationals the status of aliens lawfully admitted to the United States for permanent residence.

An estimated 30,000 to 50,000 Mexican laborers hold jobs in Texas border towns and commute from their homes across the Rio Grande in Mexico.

In contesting the suit, the government presented an affidavit by Secretary of State Dean Rusk. Rusk said border cities such as El Paso, Tex., and Juarez, Mexico, Eagle Pass and Piedras Negras, Laredo and Nuevo Laredo "have grown into single economic communities."

The secretary said that to cut off employment opportunities for those on the Mexican side of the border would injure relations between the United States and Mexico and also jeopardize programs under the Alliance for Progress in Mexico and other parts of Latin America.

LEVELING THE MOUNTAIN—Dramatic reduction in new cases per week of paralytic polio in the United States, 1955-1962, is graphed in Newschart, above. Tools that whitened the mountain: the polio vaccines. From a peak of 700 new cases per week at height of the polio season in 1955, new cases dwindled to less than 50 per week in 1962. Data from analysis of U.S. Public Health Service figures.

Washington Window

By LYLE C. WILSON

United Press International

WASHINGTON, D. C., is likely to become the United States' race relations show window with a Negro mayor and city council under a home rule plan proposed by President Kennedy.

American diplomats have been clamoring for just such a show window. They want an American race relations exhibit to offset worldwide publicity of race violence in Washington and several Southern states.

The Kennedy home rule proposal could have been drafted with that in view. It would provide for the election of a mayor and city council to govern the District of Columbia subject to considerable surveillance and veto authority reposed in the President and in Congress.

Three commissioners appointed by the President now conduct the district government with Congress functioning as a city council. One of the three commissioners appointed by Kennedy is a Negro, John B. Duncan, the first of his race in that job.

Negro Majority

The nation's capital probably has the fastest growing Negro population in the world. Census returns show that from 1940 to 1960, the district's Negro population increased by 224,000. The white population decreased in the same period by about 130,000. Negroes outnumbered whites in 1960 by 411,000 to 345,000.

A more recent calculation fixes the percentage of Negroes in that district's population at 53.9. If the Kennedy home rule bill is enacted and if, again, the Negroes vote as a bloc, the nation's capital likely would have an all-Negro municipal administration.

The Kennedy plan provides for an elected mayor to serve four years at a salary of \$20,000. There would be a municipal council of seven members, one to be nominated from each of seven wards.

There is a further provision, however, that all council candidates shall run at large.

With all council candidates running at large, the indicated ma-

majority of Negro voters in Washington could name the mayor and all seven council members. The argument in behalf of the Kennedy proposal, of course, is that since Negroes are a majority in the District of Columbia they are entitled to control the municipal government if they are so inclined.

Electoral Votes

The importance of the Negro majority in Washington is not limited to municipal politics. The 23rd Amendment to the Constitution adopted recently permits Washington residents to participate in presidential elections. The district will have three votes in the electoral college.

These electors, like the proposed councilmen, will run at large. The Negro majority will be in a position to choose its favorites in such a winner-take-all contest.

There is, of course, one qualification to speculation that Negro voters will control any elections taking place in the District of Columbia. A great many Negroes who count toward the census total of the Negro population are minors. Negroes account for 83 per cent of the Washington public school population.

DISASTER AREA ASKED

MEXICO CITY (UPI)—The Reynosa Local Livestock association announced that it will ask the federal government to declare a disaster area in northern Mexico because of heavy losses by ranches from weather and reduced exports, the newspaper "Novedades" reports.

The organization will ask for special federal assistance in portions of the states of Tamaulipas, Chihuahua, Sonora, Zacatecas, Coahuila, Durango and Nuevo Leon.

French Fruit Water Ice Delightfully Delicate

FRENCH fruit water ice, a delightfully delicate Easter dessert, consists only of ice, crushed fruit and fruit juice.

By GAYNOR MADDOX
Newspaper Enterprise Assn.

A French fruit water ice makes a delightfully delicate dessert for Easter. It is a true European water ice, consisting of crushed or minced fruit and fruit juices only—no milk, no gelatin, no binders, no fillers. It has only three ingredients: grapefruit juice for fresh tartness, red maraschino cherries and their juice for sweetness, crunch, and lustrous pinkness.

CHERRY GRANITA
(Makes 1 quart)

3 cups grapefruit juice, fresh, frozen or canned
1/2 cup maraschino cherry juice
1 1/2 cups finely chopped red maraschino cherries, well-drained (about 60)

Mix all ingredients together. Turn into 1-quart refrigerator tray. Freeze until mushy. Stir thoroughly; freeze until firm.

EASTER-ICE CREAM TARTS
(Yield: 4 tarts or one 8-inch pie)

1-3 cup shortening
1 cup sifted flour
1/2 teaspoon salt
1/4 cup finely chopped maraschino cherries
1 to 2 tablespoons maraschino cherry juice
Vanilla ice cream
Whipped cream
Maraschino cherries, stems on

Corn As High As An Elephant's Eye Makes Delicious Corn Pudding Pie

By GAYNOR MADDOX
Newspaper Enterprise Assn.

Fresh corn is now in our markets 12 months of the year. At this season most of it comes from Florida, and reaches us a day or two after picking, thanks to modern streamlined method of harvesting and shipping.

FRESH CORN PUDDING PIE
(6 servings)

1-3 cup diced green-pepper
2 tablespoons chopped onion
1-3 cup melted butter or margarine
2 tablespoons flour
1 cup milk
1 teaspoon salt
1 teaspoon sugar
1/4 teaspoon ground black pepper
2 eggs, beaten
2 cups fresh corn, cut off the cob

1-3 cup fine cracker crumbs
1/4 cup butter or margarine, melted

Saute green pepper and onion in butter or margarine. Blend in flour. Stir in milk and cook until medium thick. Add salt, sugar and ground black pepper. Combine eggs and corn and stir into

the sauce. Pour into a buttered 9-inch pie plate, sprinkled with fine cracker crumbs. Blend melted butter or margarine with remaining crumbs and sprinkle over the top. Bake in a preheated hot oven (350 degrees) 1 1/2 hours or until done.

FRESH CORN AND OYSTER CASSEROLE
(6 servings)

3 cups (about 6 medium ears) fresh corn, cut off the cob
1/4 cup soft bread crumbs
1 egg, beaten
1 1/4 teaspoons salt
1/2 teaspoon whole celery seed
1/2 teaspoon ground black pepper
4 tablespoons butter or margarine
1 cup soft bread crumbs

Combine first 7 ingredients. Break 2 tablespoons of the butter or margarine into small pieces and add. Turn into a greased 1-quart casserole. Melt remaining butter or margarine, mix with crumbs and sprinkle over top. Bake in a preheated moderate oven (350 degrees) for 40 minutes or until crumbs are brown.

Elimination Of Carving Makes Boneless Roast Big Hit With Party Hostesses

Your guests will not be afraid to make hearty sandwiches when they are presented with the fixin's of cold slices of rolled rib roast, an onion-sour cream meat topping, French and rye bread and plenty of hot coffee.

Preparing this roast before the party should make a hit with any cook. It is also a meat cut that'll make a hit with the carver. Being boneless there's no guesswork concerning the carving technique.

The rolled rib roast is placed on a rack in an open roasting pan, and then placed in a 300 degree F. oven. It's roasted about 28 to 32 minutes per pound for rare and 34 to 38 minutes per pound for medium. Remember, roasts should never be covered when cooking, they then become pot-roasts.

Boned and rolled roasts will require approximately 10 more minutes per pound during the cooking process than the same cut, bone-in.

If using a roast meat thermometer, be sure it is inserted into the center of the thickest portion, however, do not let the bulb rest in fat.

To facilitate carving, allow the roast to set a few minutes after it is taken from the oven.

MEAT SPREAD

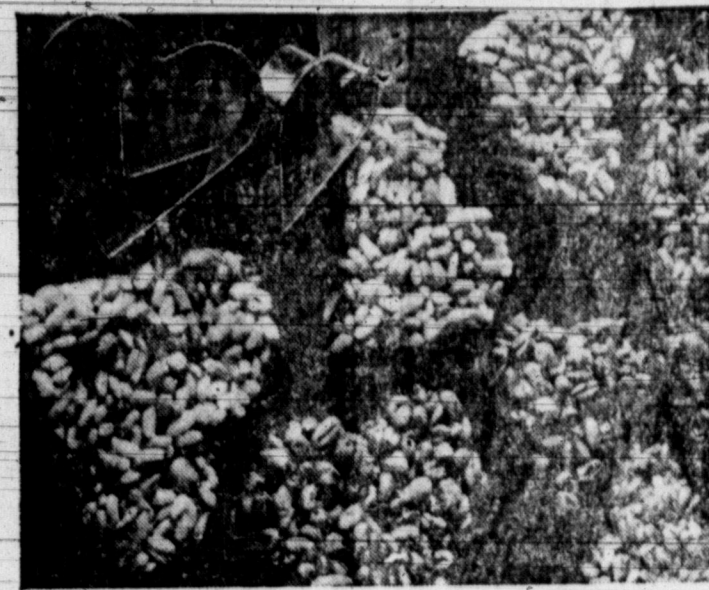

The onion-sour cream spread is so easily prepared and adds just the right piquant flavor to the beef sandwiches.

Simply combine 1/2 package of dry onion soup with 1 cup of dairy sour cream. That's all there is to it.

MAGIC WITH LEFTOVERS

Leftover beef slices is as fine a foundation for a dinner-meal as the first day roast. So when leftover slices of beef are your prime problem, serve them with an onion or caper sauce. It's as delicious a combination as you'll find.

Cereal Breakfast Cookies

Heart-shaped puffed cereal cookies—a big heart for the eldest child, a little one for the youngest, and a middle-size for those in between.

Make the birthday child a breakfast-cereal cookie to start his day with a touch of excitement. Puffed rice or puffed wheat, regular or presweetened, work equally well in the recipe for Cereal Molasses Hearts. But, be mindful of the fact that no special treat should be allowed to interfere with breakfast.

Surveys reveal that breakfast cereals are found in over 80 percent of the homes. On the average morning, about two-thirds of the children eat cereals for breakfast. So, fight at your hand is the main dish of an adequate breakfast, the cereal and milk serving. The basic cereal and milk breakfast pattern was established as an adequate breakfast during the course of the Iowa Breakfast Studies on the role of breakfast in the diet regimen. Fruit or juice, cereal, milk, sugar, bread and butter, is the easy-to-serve menu that means your children will have an adequate morning meal.

Cereal Molasses Hearts

6 cups puffed wheat or puffed rice, regular or presweetened
1/4 cup salted peanuts
1/4 cup light corn syrup
1/4 cup light molasses
2 tablespoons vegetable oil
1 teaspoon vinegar
1/2 teaspoon salt
1 teaspoon vanilla

Pour cereal and nuts in greased bowl; mix. Combine syrup, molasses, oil, vinegar and salt in saucepan and cook to hard ball stage (358°F). Remove from heat; stir in vanilla. Pour syrup over cereal and nuts; mix until cereal is evenly coated with syrup. Use buttered heart-shaped cutters in sizes 4, 4 1/2 and 5 1/2 inches to shape hearts. Place cutters on waxed paper; press cereal mixture into cutters. Remove cutters and repeat until mixture is used, making 4 hearts of each size. Cool at room temperature. Yield: 12 heart-shaped cookies.

Foods That Supply The Most Calories

By GAYNOR MADDOX
Newspaper Enterprise Assn.

Q—What kinds of food supply the most calories in the American diet?

A—According to statistics compiled by the U.S. Department of Agriculture, the two main sources of calories were flour and cereal products (21 per cent) and fats and oils (20 per cent). Another 15 per cent of the average person's calories came from meat, poultry, and fish; 13 per cent from dairy products other than butter; and 2 per cent eggs. The remaining 23 and sweaters.

Q—My teen-age son is very athletic. What special diet should I give him?

A—Contrary to popular beliefs, the nutritional needs of athletes vary little from those of nonathletes. The main exception is that additional calories are required for the added energy expenditure. Like many other nutrition scientists, Dr. Fredrick J. Stare, head of the Department of Nutrition, Harvard School of Public Health, indicates that the optimum diet for an athlete is essentially the same as that for a normal boy of the same size and age.

There is no magic about the optimum diet for the athlete. It should include citrus fruit or other vitamin-C-rich foods; a dark-green or deep-yellow vegetable or fruit; other fruits and vegetables; milk; meat and other protein foods; enriched or whole-grain breads and cereals.

A garlic skin will come off easily if hot water is poured over the garlic bud.

Try cooking bacon in the oven. It will cook more evenly and will also be crispier.

POLLY'S POINTERS Mom Didn't Forget

While In Hospital

By POLLY CRAMER

DEAR POLLY—My suggestion is for mothers of small children who will be going to the hospital for a new baby in the near future. When my third child was born, I had a 2-year-old and a 4-year-old at home. Because of rules, I could not see the children while I was in the hospital. I was afraid they would think I had deserted them, so I bought small items from the dime store for each day I expected to be away. These were wrapped in pretty paper and packed in the suitcase I took to the hospital. Each time my husband came to visit me, he took a gift home to each child. It was an inexpensive way to ease that "left behind" feeling and to let them know I was thinking of them.—MRS. W. S.

DEAR POLLY—To launder the children's white shoelaces, I string them through the buttonholes of a garment and tie the ends. Then they are washed with the regular laundry, come out really clean and are not lost in the washer.—M. E. B.

DEAR POLLY—I have found a solution for those who always forget to return library books on time. Use a piece of paper for a bookmark and write in large letters, the date the book is due back. Every time you open the book to read, you will be conscious of how much time is left before you have to pay a fine. It really works for me.—C. Y.

GIRLS—If your children have to pay library fines out of their allowances, they will welcome this suggestion. Colored paper might be even more effective and eye-catching than white.—POLLY

Be very careful not to betray a child's confidences.

Adenauer Announces Retirement Publicly

BONN (UPI) — Chancellor Konrad Adenauer Wednesday publicly announced his retirement in the fall and said he must accompany President Kennedy if the U.S. leader goes to West Berlin during his coming German trip.

The West German leader, 87, in a television interview filmed during his current vacation in Italy and broadcast tonight, said he "no longer understands all this talk" about his alleged desire to remain in his post beyond October or November.

Adenauer, who earlier told only a foreign press meeting about his retirement plans, said he wanted to stress "there can be no doubt" about his retirement.

Adenauer said it is important that Bonn government and parliamentary leaders join the President's party to Berlin in June.

Asked if he would join Kennedy on a West Berlin trip, he said, "I believe that is absolutely necessary."

It was recalled that when Vice President Lyndon Johnson went to Berlin just after the wall was built, Washington resisted Adenauer's wish to go with him.

The administration wanted the visit to be an all-American action designed to show U. S. support of West Berlin.

BERRY'S WORLD

Freeway Wasn't Free At All

HOUSTON (UPI) — E. L. Wood Jackson, 28, snarled traffic on the busy Easter Freeway today, but officers had trouble figuring out how to write him a ticket.

Police, looking for the source of a traffic slowdown, found Jackson cruising along in his wheelchair.

Jackson said he had traveled three miles from his home before he was stopped. He was on his way to pick up an unemployment check.

But three miles is no trip at all, he said. Jackson told officers he rode the wheelchair most of the way from Pennsylvania to Texas recently.

Police gave Jackson a ticket for failure to heed the minimum speed limit of 40 miles per hour.

TOUCAN PLAY AT RACING — As far as that goes, SE could play at racing in the Joel Kuperberg home in Naples Fla., while the family cared for five baby toucans, an overflow from a more-than-ample shipment to a bird sanctuary. It's plain that Jeffrey Kuperberg is on to the free-riding antics of his feathered hood ornament. Jeffrey's dad is an employe of Caribbean Gardens in Naples.

The Mascot of Yale University, California is 770 miles long, is a bulldog. Texas is 620 miles wide.

SURPRISED BIDDER — Jack Coster bid one dollar for a vacant church. He thought the lumber might be useful in a home-building project he's involved in. To the surprise of the Grand Haven, Mich., policeman, the 81-year-old building was knocked down to him and his troubles began. As part of the deal he had to get it off the property pronto. Neighbors pitched in and he's beating the deadline.

Cattlemen Cautioned

LAS CRUCES, N.M. (UPI) — A word of caution has been extended to New Mexico ranchers, as well as to livestock men elsewhere in the Southwest, by two New Mexico State University economists.

The two, Dr. James R. Gray and W.Y. Fowler, predict 1963 will be a good year for sheepmen but urge more-than-usual caution for ranchers in general.

Factors which might have a continuing adverse effect on beef prices during the year, according to the two economists, are the record number of cattle placed on feed during October-December last year, a big increase in the beef cattle population the past five years (27 percent), and the weather bureau's forecast for a dry summer in the Southwest.

Bunch Marketing Possible

If dry conditions are coupled with a stable cut in 1964 wheat pasturage acreage, the two men contend, bunched marketing of cattle is likely to occur. In general weather conditions in New Mexico have been unusually good for the past six years with average to excellent moisture.

The report indicated fed lamb prices early in 1963 were \$3 per hundred above prices of January of 1962 and reduced slaughter of sheep and lambs is expected to hold average returns above the 1962 level, the report says.

However, Gray and Fowler caution that supplies of other meats will be more abundant and lamb will face more competition on the market.

Regents Boards Nominees Okayed

AUSTIN (UPI) — The state Senate approved Wednesday a series of nominations by Gov. John Connally to state boards and regents of colleges.

The Senate confirmed the appointments of Dr. Harvey Renger and Ed Clark of Austin to terms to 1965 on the Texas Southern Board of Regents, and Dr. Joseph Chatman of Lubbock, Rev. Marvin Griffin of Waco and Joseph A. Scott of San Antonio to terms to 1964.

Confirmed to terms on the Texas Woman's University Board of Regents were John Hazlewood of Amarillo, Mrs. Jack Bowman of San Antonio and Reagan Houston of San Antonio.

The Senate approved the nomination of Jack Kuitgen of Waco to the State Highway Commission.

Clayton Hearse of San Antonio, Dr. Jose San Martin of San Antonio and Otis Lock of Lufkin won confirmation of their nominations to the Board of Regents for State Teachers Colleges.

The Senate confirmed to the Texas Tech. Board of Directors Herbert Allen of Houston, Roy Furr of Lubbock and Harold Hinn of Dallas. Hinn is a reappointment, and has served on the board six years.

College To Open In Virgin Isles

ST. THOMAS, U.S. Virgin Islands (UPI) — A new educational institution, the College of the Virgin Islands, plans to welcome its pioneer freshman class in July.

The first American institution of higher education in the Caribbean, it will be a public junior college, the majority of whose students will be Virgin Islanders. A limited number of places are being reserved for students from the continental United States.

Dr. Lawrence C. Wanlass, former assistant to the president of Sacramento State College, Sacramento, Calif., has been named head of the new college.

The college will offer a two-year transfer program in Liberal Arts, in addition to vocational studies in Business Education, Engineering Technology, Nursing and Resort Operation. It also will be the home of a Peace Corps Training Center and will participate in the Experiment in International Living.

DALLAS — Former Maj. Gen. Edwin A. Walker, unperturbed though slightly injured by casing splinters from a bullet fired at him through his window. "I want a purple heart."

matter of fact

Instead of the happy sound of birds singing outside your window, imagine hearing a bird whose cry is so annoying and repetitious that you start having symptoms of brain fever. There is such a bird which superficially resembles the old world sparrow hawk. It is the Asian Hawk cuckoo, whose common name is the brain-fever bird.

Wall Street In Review

NEW YORK (UPI) — Colby & Co., a Boston investment house, does not see many excesses in the stock market "as a matter of fact, hardly any."

The firm says this market advance is more solidly based than any it has seen in the past several years, reinforcing the view that the panic selling of May and June last year resulted from a reversal of previous over-confidence to a complete loss of confidence.

Investors Research Co., a West Coast advisory service, says the November-April bull market remains intact and the overall trend into May-June-July is bullish.

Regarding Monday's market, Larry Bleiberg of Bache & Co. says recent market leaders were joined by a number of the lower-priced, more speculative issues, which he thinks is further evidence of greater market participation. In view of the steepness of the recent advance he thinks the market may be nearing a short-term peak, but he would use future weakness to increase stock positions.

James F. Hughes of Auchincloss Parker & Redpath says the market has a fair start on a possible third phase of the major investment stampede that has played such an important part in bringing the industrial average up from the \$49 low on October 24 to its current high above 700.

NEW YORK — Anne Bancroft, the actress, informed that she had won a major Academy Award for her role in "The Miracle Worker".

"I tell you I'm so excited I can't believe it. I didn't think I would win. I don't know why, but I just didn't."

Situation Tense In Laos As Chairmen Try Truce

VIENTIANE, Laos (UPI)—The international control commission tried Wednesday to arrange an on-the-spot truce between warring Laotian Communists and neutralists on the battle-scarred Plain of Jars. The chairman returned to Vientiane Wednesday night to report the situation there "very tense."

India's Avtar Singh, chairman of the three-man commission, said there appeared to be a lull in the fighting that broke out last week between Maj.-Gen. Kong Le's neutralist troops and leftist forces led by the Communist Pathet Lao.

"In my opinion the situation there is very tense although Wednesday there was no incident," Singh told newsmen on his return here.

Singh said he had brought back "suggestions" from Kong Le and the Pathet Lao commander, Gen. Singkapho Chuanlamani, for easing tension between their rival forces.

Singh conferred with Prime Minister Souvanna Phouma. Then he held a much longer talk with the vice premier of the coalition government, Prince Souphouvong who is leader of the Pathet Lao. It was believed he transmitted

to the two Laotian leaders the suggestions he received from Kong Le and Singkapho.

The three members of the control commission had flown from Vientiane to the Plain of Jars airfield, which has become an island held by Kong Le's neutralists and surrounded by Communist and dissident neutralist troops.

Their transport plane also carried more than four tons of relief supplies to the beleaguered neutralists.

HE "LAKED" IT

BUFFALO, N.Y. (UPI)—Robert Smith, 19, faced charges today for violating a city rubbish dumping ordinance by driving his old model car into Lake Erie.

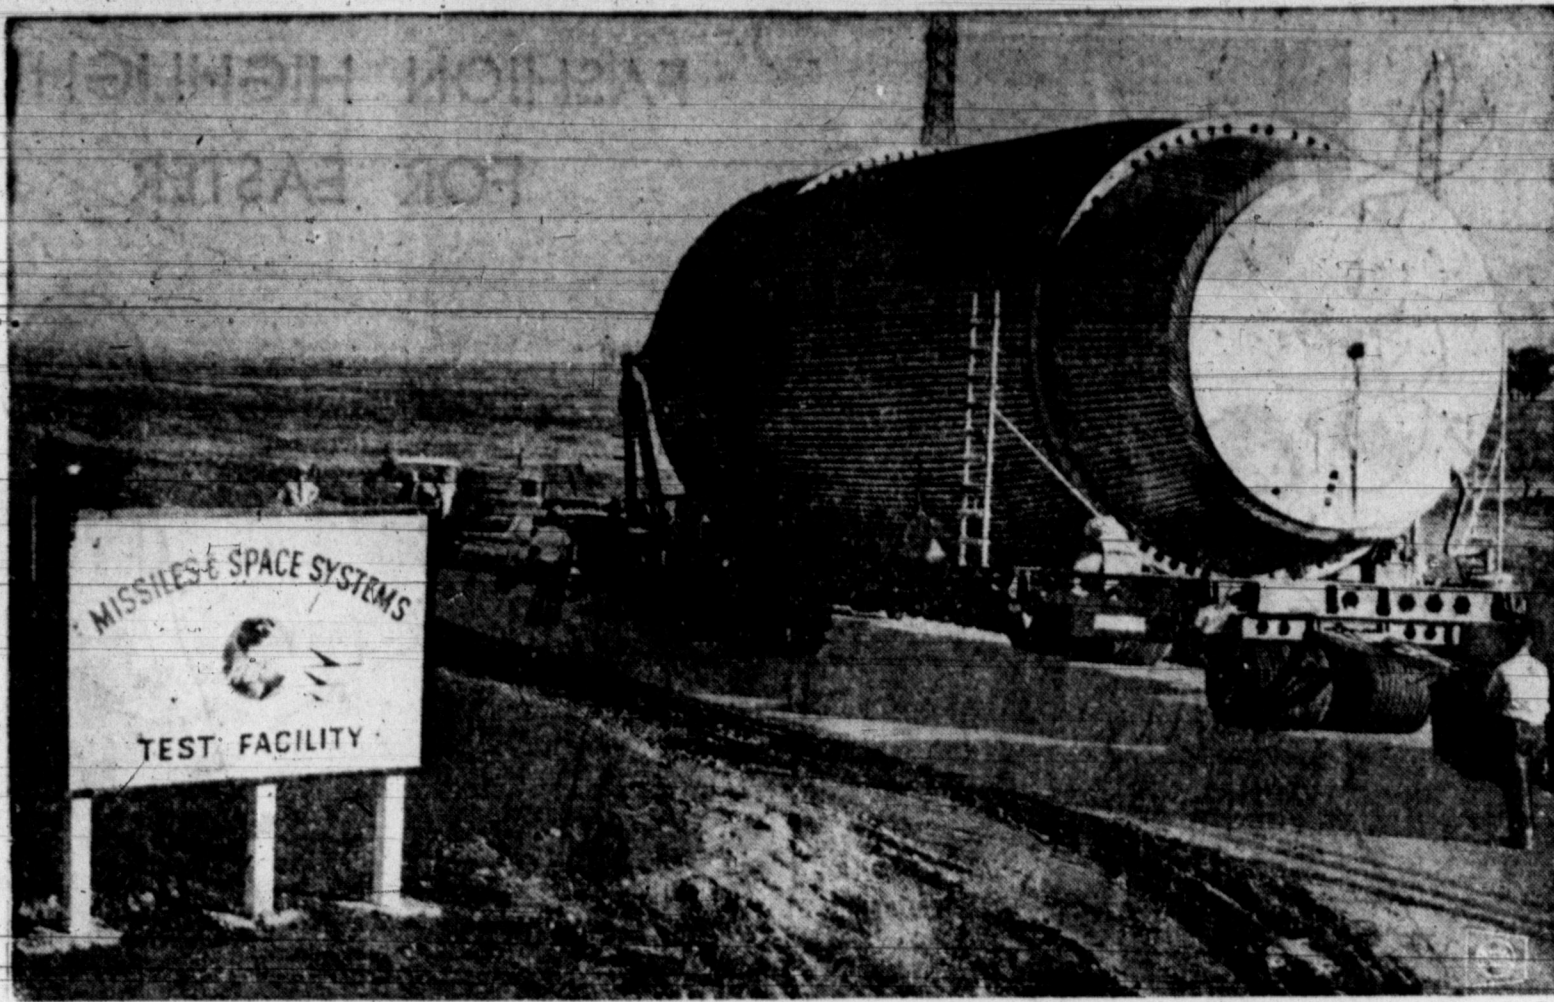

"He couldn't sell it and apparently couldn't even junk it," police said when they issued the summons Tuesday.

BAN CROOKED CUCUMBERS

LONDON (UPI)—The tomato and cucumber marketing board has banned the sale of bent or crooked cucumbers, it was reported Tuesday.

Harry Wright, a rebel member of the board, called the decision "fantastic."

CHESTERFIELD, England (UPI)—Telephone officials have apologized to Ernest Driver, the new head postmaster here, because his name appears in the new telephone directory as "Drivel."

ROTSA ROCKET—Carried on a heavy-wheeled trailer truck, the S-IV, second stage of the giant Saturn moon rocket, arrives in Sacramento, Calif., at the Douglas Test Facility near Mather AFB. The 41-foot length and 18-foot

width of the S-IV houses a cluster of six liquid hydrogen engines. The S-IV will be static-tested on the ground; may possibly go into space later this year in the first flight test of Saturn's upper stages.

Genevan Conference Cuts Easter Vacation

GENEVA (UPI)—The 17-nation disarmament conference cut its Easter recess from four weeks to one because of lack of progress on a nuclear test ban and other issues.

U. S. Ambassador Charles C. Stelle proposed the conference reconvene April 17, following rejection by the other delegations of an earlier U. S. proposal to recess until May 7.

Stelle, presiding over Wednesday's final pre-Easter session, and he believed most delegates wanted a month's recess to enable them to review the situation.

But United Arab Republic delegate Abdel Fattah Hassan rose

to protest against "the much valuable time which will be lost," which he termed an "unfriendly impediment to our efforts to agree here." Russia shared the U. A. R. view.

Earlier, the Soviet Union vetoed inclusion of the proposed "hot line" communications link between Washington and Moscow in a progress report on the arms talks here which is to be submitted to United Nations Secretary General Thant.

Soviet negotiator Semyon K. Tsarapkin said the spring report should avoid mention of a direct link between the two governments until the Soviet Union and the United States can agree on its operation.

This, he said, must be after secret bilateral negotiations proposed by the United States Tuesday on implementation of the agreement.

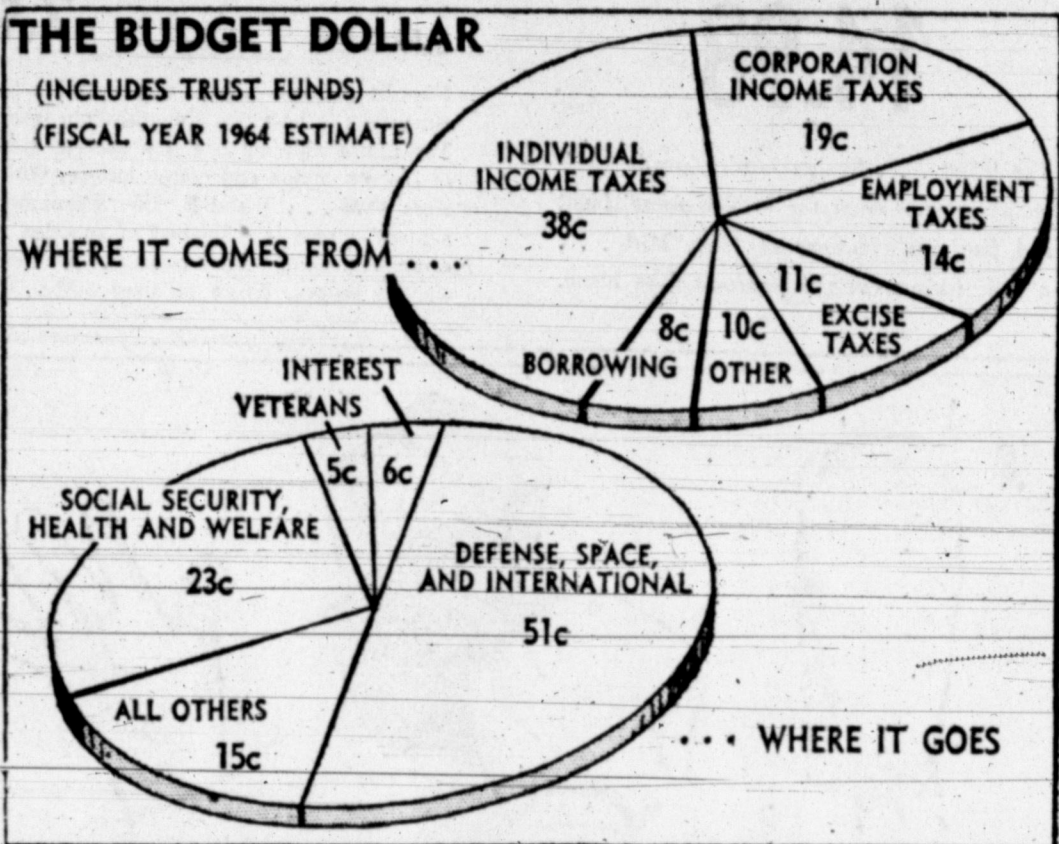

The Soviets agreed in principle Friday to this U. S. proposal to reduce the risk of nuclear war by accident. That was the first positive result achieved by the 17-nation disarmament conference.

PICTURE NEWS

AROUND THE WORLD

BLOW-UP—A cow pays no attention as a volcano blows its top in the background near San Jose, Costa Rica. Ashes from Mt. Irazu volcano were carried in the air as far as San Jose, which is about 20 miles away from the mountain.

HARRY THE HOOD—Harry, a 1,000-pound hooded seal who just came to town, grins in happy anticipation over the prospect of meeting Selina, his intended mate, at the Coney Island Aquarium in Brooklyn, N. Y.

WELL CAST—A cast-on her foot doesn't stop Liza Minelli from wriggling through a musical number during rehearsal of off-Broadway revival of "Best Foot Forward" in New York.

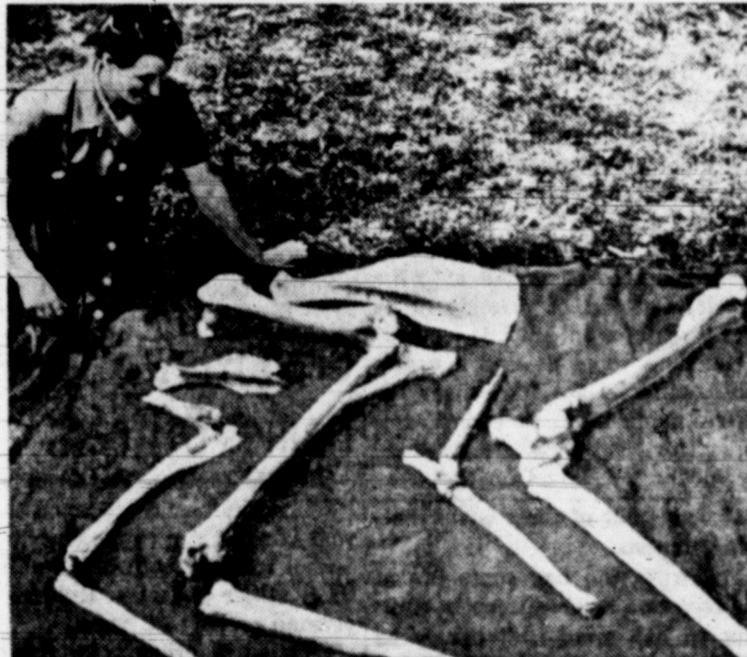

NEW ROLE—Anne Baneroff plays a toothless, haggard mother of three grown children in "Mother Courage and Her Children," a new Broadway play. Anne is a nominee for an Academy Award for her role in the film, "The Miracle Worker."

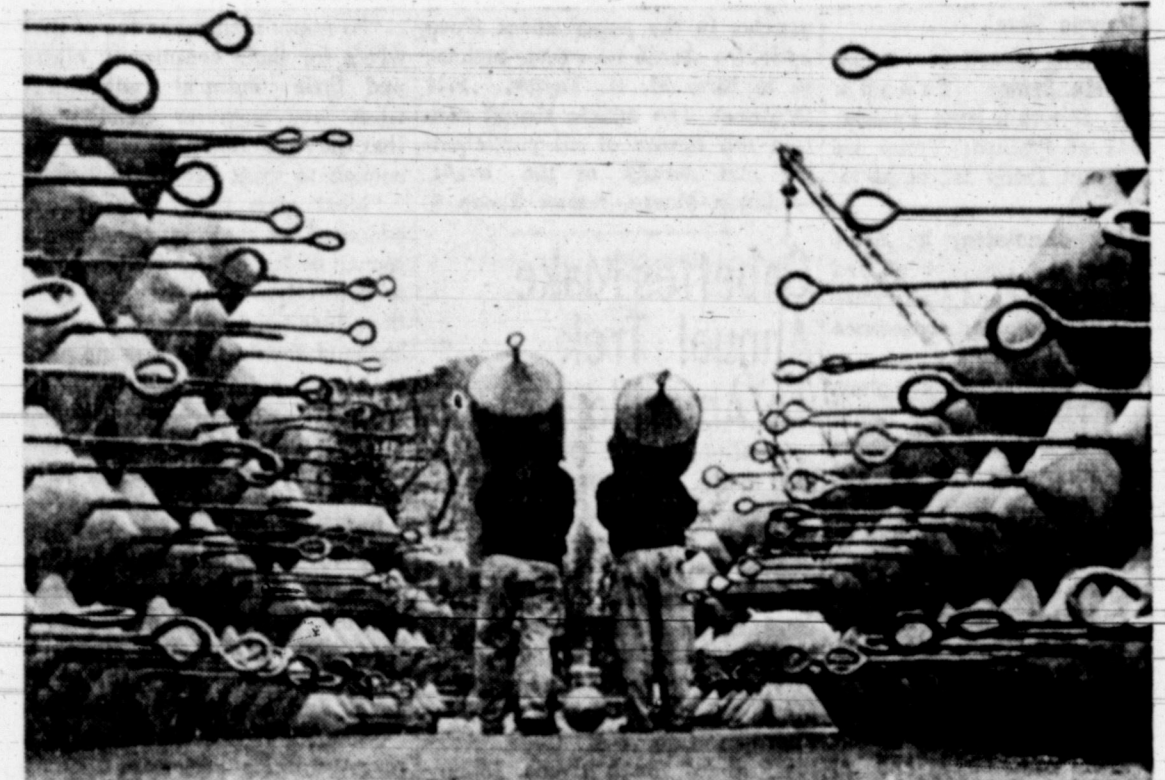

CAT'S MEOW—Kalinka Des Chanterelles shows off her new hat in Paris. The cat wears a perky straw bonnet covered with dotted net at the Salle Wagram Cat Show.

VISIT SHIP—Princess Margaret and Lord Snowdon leave the Royal Navy's newest nuclear-armed destroyer, H.M.S. Hampshire, in Glasgow, Scotland. The couple dined with the ship's officers after commissioning ceremonies.

ANCIENT BONES—Mrs. Shirley Coryndon looks at bones of giraffe which lived 12 to 14 million years ago. They were found in an excavation site near Fort Ternan, Kenya.

OH, BUOY—It's a sure sign of spring when newly painted harbor buoys are stacked in the storage area at Belmont harbor in Chicago. The men are starting the job of placing the mooring buoys for small craft in the city lakefront harbor.

CLOSE-UP—Joby Baker takes a picture of Cindy Carol during a break in the filming of "Gidget Goes to Rome." The movie is about a girl who dreams of finding herself in ancient Rome. Baker plays Nero in the film.

LAUNCHER?—St. Louis University students exhibit model of what may be a type of technique the Russians used to launch cosmonauts. It combines gravity and rocket thrust.

POWERFUL PERCH—A girl finds a powerful long lens to perch on to rest at the "Photokina 1963 Exhibition." The lens was on display at the exhibit in Cologne, West Germany, where firms from 22 countries displayed their equipment.

CUTE—French starlet Sophie Daumer strikes a cute pose as she tries one of the bonnets designed by Jacques Griffe of Paris. The hat is natural straw.

LAUNCHED—The ultra-modern luxury superliner Raffaello, a 43,000-ton addition to the Italian Line fleet, is launched at the San Marco shipyards in Trieste. The colorful launching ceremony took place amid scenes of enthusiasm shown by a cheering crowd of 100,000 people.

REPORT ON THE ALLIANCE—Newsmap shows how much aid has been given to South American nations since the Alliance for Progress was announced two years ago. Under the alliance the United States proposes to spend \$20 billion by 1970 to develop Latin America's backward areas and correct social inequalities before violent revolution sweeps the continent. So far, social, economic and governmental reforms have been slow because of opposition from leftists wishing to repeat the story of Cuba and rightists attempting to preserve the status quo.

SEATO, US Vow Continued Fight

PARIS (UPI) — The United States and its Southeast Asia Treaty Organization allies pledged themselves Wednesday to continue fighting Communist subversion throughout the vitally strategic area.

In a communique winding up a three-day SEATO council session, they reiterated their support for a "neutral and independent Laos under a government of national union."

They noted that the government of embattled South Viet Nam has succeeded in checking the Communist Viet Cong rebellion.

They voiced the hope that Viet Nam will progress further towards "international stability and international security."

Final Actions

The communique was issued after a final session at which the ministers:

- Named Pote Sarasin of Thailand to continue as SEATO secretary general for another two years.
- Named Manila as the site of the council session in 1964, the 10th anniversary of the signing of the SEATO pact in that city.
- Adopted a long series of resolutions on technical details of the work of the eight-nation alliance.

Aim is Peace

The council, the closing communique said, "reaffirmed that the main aim of the Manila pact is to insure the peaceful development, economic stability and national independence of the countries within the area."

The council expressed concern over the continuing and widening threats to the security of such countries, while reaffirming their determination, to maintain vigilance.

During the meeting, Secretary of State Dean Rusk and other leaders warned that new fighting between neutralist Laotian troops and the Communist Pathet Lao could constitute a "probe" designed to prepare for another Communist attempt to take over the jungle kingdom.

WHEAT PRICE FIXED

MEXICO CITY (UPI) — A guaranteed price of \$73.04 per ton will continue for wheat during the current crop cycle, the National Popular Subsistence Company (a government price regulating agency) said Monday.

Illiteracy Rate High In America, Says Labor Leader

WASHINGTON (UPI) — Labor Secretary W. Willard Wirtz said that 38 per cent of the youths called for the draft last year were rejected because of illiteracy — and 13 per cent of the rejects were high school graduates.

Wirtz, a former Illinois high school teacher, said the "startling" illiteracy rate demonstrated that "education has a responsibility to keep youngsters in school until they can learn to do something."

He spoke at the closing session of the two-day first annual conference of the National Committee for Support of the Public Schools, composed of 500 private citizens seeking more money for public schools.

"I hate to use statistics when talking about human traits," the secretary said. "I wish we could forget about such terms as a 5 and 6 per cent national unemployment rate. The figures do not reflect the true problem."

Wirtz said the main trouble is in the teen-age bracket. He said the unemployment rate for white teen-agers in the 14 to 19 age bracket jumped from 6 per cent in 1952 to 12 per cent in 1962.

The Lighter Side

Dizzy Vacationland

By DICK WEST
United Press International

MERIDA, Venezuela (UPI) — Arriving at this city by air is a rare experience, mainly because the plane doesn't land here.

It reaches the ground all right, but I wouldn't call it a landing. In a landing, the plane goes down to the airport. Here the airport comes up to meet the plane.

We sort of swooped over a mountaintop and flew along a canyon at an altitude considerably lower than the adjacent terrain. Finally we came to a ledge that was fairly level and there was Merida.

River Flanks Field

Below the airport is a river and above it is Pico Bolivar, at 16,000-odd feet the highest point in the Venezuelan Andes.

I flew here for more research on a book I am planning called "Don't Let Vacations Spoil Your Fun." This is an ideal place for the pater on mountain resorts.

The mere sight of those jagged peaks flashing by the airplane window put me in the mood for climbing. The first thing I did was climb a bar stool for an infusion of nerve tonic. Then, it being siesta time, I climbed into bed for a nap.

Such a regimen probably is too strenuous for the average tourist, but I wanted to get into condition for the return flight.

Taking off from Merida should be relatively simple. In a pinch, they can just roll the plane to the edge of the precipice and give it a shove.

Ignore Air Warnings
My advice to persons planning a trip to the mountains this summer is to ignore all of the warnings they will hear about the air being thin at high altitudes.

Most people will not be bothered by the lack of oxygen, except when they try to breathe.

The same is true of the temperature. Persons who are immune to frostbite won't mind it at all.

I went up past 15,000 feet with hardly any difficulty. My only trouble came at a lower altitude where I experienced a softening of the brain. This was what caused me to go up past 15,000 feet.

What is more, I did it the hard way. I rode up in a cable car. The cars glide along on cables suspended hundreds of feet above the ground. On the mountainside below I could see Andean hillbillies tending their livestock. But

Long May She Wave At \$5 Per

PETERSHAM, Mass. (UPI) — Every time this town raises the flag on its Common, it costs \$5.

Here's why:
The flagpole consists of two 30-foot sections. To fly the flag, nobody must climb up steel spikes to a platform atop the lower section.

From there he must raise the second section by pulleys and lash it to the bottom part. Then by means of another pulley he raises the flag to the top of the staff.

Nobody wanted the job. So Police Chief William W. Ellsworth agreed to do it — at \$5 per flag-raising, which occurs on every legal holiday.

TOWCESTER, England (UPI) — Farmer Robert Copping was fined \$155 Tuesday for causing unnecessary suffering to 13 of his pigs.

The prosecutor said photographs of his pig farm might have been taken in a concentration camp.

It was no place for chickens. When I get back home to Washington, even Capitol Hill will probably make me dizzy. That, however, will be no novelty. It always did.

Road Revenue To Increase To \$12.7 Billion

Revenue produced for highway purposes at all levels of government in 1962 is expected to total \$12.5 billion when all figures are in, Rex M. Whitton, federal highway administrator, announced.

The receipts are expected to increase to \$12.7 billion in 1963, he said.

Road spending for 1962 is estimated at \$12.1 billion with spending this year projected at \$13 billion.

A thought for the day: Prime Minister Winston Churchill said: "Nothing in life is so exhilarating as to be shot at without result."

The income and outgo figures differ because of adjustments in reserves. Some of the 1962 receipts went into reserves while some reserve money will be needed to bring receipts up to total outlays.

Taxes on vehicles and on fuel are, by far, the largest source of highway money, with the proceeds of bond issues in second place.

Road building by all levels of government consumes the bulk of highway money, more than \$7 billion a year. The annual bill for maintenance is about \$3 billion.

NAMED NETWORK PREXY

NEW YORK (UPI) — Thomas W. Moore Tuesday was named president of the American Broadcasting Co. television network.

Moore, a vice president of the network since March 20, 1962, began his television career in 1952 as an account executive with the Columbia Broadcasting System.

What kind of a "nut" is he?

- He wants to run his own business.
- He wants to select his own doctor.
- He wants to make his own bargains.
- He wants to buy his own insurance.
- He wants to select his own reading matter.
- He wants to provide for his own old age.
- He wants to make his own contracts.
- He wants to select his own charities.
- He wants to educate his children as he wishes.
- He wants to make his own investments.
- He wants to select his own friends.
- He wants to provide his own recreation.
- He wants to compete freely in the market place.
- He wants to grow by his own efforts.
- He wants to profit from his own errors.
- He wants to take part in the competition of ideas.
- He wants to be a man of goodwill.

What kind of a nut is he?

He's an American who understands and believes in The Declaration of Independence, that's what kind!

Aren't you glad you are too? And don't you wonder why so many of our fellow-Americans are trying so hard to destroy this kind of life that has made us the aim and the envy of every other people on earth? The question is: what kind of nuts are they?

Easter Services Set For Amphitheater

CANYON (Sp) — The new open-air theater of the Texas Panhandle Heritage Foundation in Palo Duro State Park will be used for the first time in an inter-denominational sunrise service at 6 a.m. Easter Sunday.

Sponsored by the Canyon Christian Youth Council, the service will be open to the public, and the usual entrance fee to the park will be waived to those attending the service.

The sermon will be delivered by the Rev. James Dunn, director of the Baptist Student Union of West Texas State College. Special music for the youth service will be provided by the vested Canyon High School Choir and organ, with the congregation joining in the singing of the hymns.

Members of the Youth Council will conduct the service. Davis Price giving the Call to Worship. Mita Hernandez, exchange student from the Philippines, will read a religious poem and prayers will be offered by Pam Calder, Mary Ann Wheelock will read the Scripture, and the Benediction will be given by John Brantley.

The new open-air theater is located in Palo Duro State Park, on the floor of the canyon, on the right side of the road and about a half mile before reaching the first crossing of the river. It is marked by a large sign.

Adult sponsor of the Canyon Christian Youth Council is the Rev. Dale Harter, pastor of the First Christian Church in Canyon. His daughter, Joy, is president of the Youth Council. John Brantley is vice president. Other officers are Mem Moore, secretary; Becky Price, treasurer; and Davis Price, publicity chairman.

Permission for use of the new amphitheater for the service,

which is one of the most important of the year for the Christian youth group, was given by the board of directors of the Texas Panhandle Heritage Foundation.

The theater was built for the production of a drama with music, built around the history of the Texas Panhandle area. It will be an entertainment somewhat like the musical "Oklahoma" with deeper and real historical significance.

Mrs. Ples Harper, president, predicts the production will open in the early summer of 1964. The script is now being written by author-historian-poet Paul Green, whose other nine outdoor dramas about the glories of the American past have been seen by over three million persons.

Issac Van Grove, Hollywood composer, who has collaborated with Green on other productions, is writing the musical score. Mrs. Harper states that in the interval before the opening, some daytime civic programs, as approved by the board of directors, will be presented in the theater.

The Ceremonial Indian Dances, last presented in the area in 1956 to over 10,000 persons, will appear in the theater this summer.

Dressing rooms, lighting towers and other buildings and equipment necessary for the presentation of the highly specialized historical entertainment with recognized professional actors, are yet to be installed.

Asiatic and African elephants can be readily distinguished by the size of the ears. Those from Asia have moderate-sized ears while those from Africa have very large ones.

NEW YORK (UPI) — Coffee squeezed out of a tube in paste form is among the packaging developments now on the planning boards.

While the collapsible metal tube is commonplace for such items as toothpaste, the big area for expansion is in a variety of items other than dental aids and cosmetics, an industry source said.

In England and on the Continent, tubes are the conventional way of marketing many items not familiar here in such containers, according to the Collapsible Tube Manufacturing Council.

One of the advantages of the tube is that the metal takes printing — colors, pictures, text — by lithography and other methods very well, the council said. A tube produced recently for mayonnaise rich, dark colors with vivid yellow splashes to convey a visual impression of the contents.

Test marketings of "foods" in tubes have gone over very well, according to manufacturers and distributors who have tried such containers.

Besides mayonnaise, ketchup and even such items as coffee in paste form, are some of the food items on which planning is being pushed.

However, the manufacturers' group believes the big area for expansion is outside foods, cosmetics and medicinal preparations.

Such products as court plaster in semi-liquid paste form is a commonplace in vending machines in bowling alleys. Bowlers use it to make it possible to grasp a ball more firmly.

Among other products in vending machines at the point of sale are bug repellents, skin protective cream, suntan lotion, boot waterproofing grease, gun grease, fish bait, a reel lubricant, a liniment in paste form for the sportsman's back, an epoxy adhesive and a ski wax.

Why You Meet
NEW YORK (UPI) — "Adult Leadership," a professional journal, defines a meeting as follows: the gathering together of persons with felt needs that have not been satisfied through individual action.

What's the most that can be done at a meeting? The "Adult Leadership" answer: The most that can be done is to create enough dissatisfaction and sufficient understanding of the problem so that concerted effort will be employed outside the meeting hall.

matter of fact

Asiatic and African elephants can be readily distinguished by the size of the ears. Those from Asia have moderate-sized ears while those from Africa have very large ones.

POLL TAX BAN—14 HURDLES TO GO—Proposed 24th amendment to the Constitution, which would bar poll taxes as a qualification for voting in federal elections, has been ratified by 24 states. Necessary for adoption: O.K. by 38 (three-fourths) of the 50 states. Newsmag gives the state-by-state story on progress of ratification.

'Squeeze Out Another Cup Of Coffee, Dear'

NEW YORK (UPI) — Coffee squeezed out of a tube in paste form is among the packaging developments now on the planning boards.

While the collapsible metal tube is commonplace for such items as toothpaste, the big area for expansion is in a variety of items other than dental aids and cosmetics, an industry source said.

In England and on the Continent, tubes are the conventional way of marketing many items not familiar here in such containers, according to the Collapsible Tube Manufacturing Council.

Such products as court plaster in semi-liquid paste form is a commonplace in vending machines in bowling alleys. Bowlers use it to make it possible to grasp a ball more firmly.

Among other products in vending machines at the point of sale are bug repellents, skin protective cream, suntan lotion, boot waterproofing grease, gun grease, fish bait, a reel lubricant, a liniment in paste form for the sportsman's back, an epoxy adhesive and a ski wax.
