RIVERS IN THE SKY—What's the easy way to get tons of newly felled logs cross-country quickly and cheaply? Easy. Build a 10-mile-long trough—a river in the sky. That's exactly what the Quebec North Shore Paper Co. did to get its pulpwood from a storage depot in Manicouagan to the wharf at Baie Comeau. It takes about 90 minutes for the logs to make the trip. The system handles 150 cords of wood an hour. The flume, supported by trestles, is about 160 feet above the ground.

"In New York when an individual citizen votes, he has 43 punch keys (on a voting machine) moving in unison voting for his choice for president. But his neighbor in Vermont has only three. "Under the grandfather

clause in the old unreconstructed South at its worst and under the greatest abuses ever perpetrated by a literacy test, we had one man nullifying the vote of another man. Under the circumstances prevailing in our Electoral College system one voter in California or New York actually nullifies the votes of 14 persons voting in Delaware, Nevada, Alaska, Vermont or Wyoming."

The foregoing represents the mathematical calculations by which is reached the conclusion I am willing to pay for the that the one-man, one-vote prin-ciple is violated in the Electoral College system. It is presumed therefore that if the matter were presented to the intended to gamble while in Supreme Court, Chief Justice Las Vegas:

millions of voters in presidential elections also are being deprived of their constitutional voting rights.

REV. HARMON MEIXNER HARRAH METHODIST CHURCH

We live in the most challenging age that has come to man. The call of the unknown has caught us up and we are seeking orbit into the mysteries of the beyond. We stand upon the threshold of our first step into the unknown of outer space.

Despite great progress into outer space we find ourselves baffled by the problems of inner space. Unless we solve the problems of inner space it will avail us little to explore outer space. Man's spirit was created to soar above the petty whelms of self. Our so journ here on earth will not be worthwhile unless we get into orbit spiritually. Man must orbit above the things of this world that involve him in degregation and strife. The imminent moment has come when mankind must be borne up above athiesm, ignorance, racism and other forms of deterioration.

After the unleashing of the power of the atom, man realizes that he has only two choices, Christ or destruction. Let us look to Christ to see what our poor stricken lives should be. "And as Moses lifted up the serpent in the wilderness, even so must the son of man be lifted up:" We find the reality of life in response to his summons. "And I, if I be lifted up from the earth, will draw all men unto me."

As man perfects his faith in Christ he will orbit above all the things that are defeating him and become worthy to conquer outer space. Let us live wisely and give our devotion "To him who loves us, and has freed us from our sin by his blood . . . to him be glory and dominion for ever and ever." eeyHoohaeo
