Bear-Raising Gimmick Puts Meddlesome Bruin in Orbit

HELENA, Mont. (UPI) - Somewhere in Yellowstone National Park today there's bear possibly pondering the hazards of unscheduled air flights.

The bear-raising story was unfolded Tuesday before a Montana Highway Commission meeting by contractor

According to Schye, the luckless animal had been nosing around a subcontract job near Lamar Canyon in northern Yellowstone National Park, bothering the con-

struction crew, particularly the cook. Workmen chased the bear up a tree, and then pulled the tree to the ground by a cable attached to a bulldozer. "We cut the cable and sling-shotted him through the air," Schye said. He added that the bear landed about

150 feet away and wasn't badly hurt. "We didn't see the bear around after that," Schye said.

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

We believe that freedom is a gift from God and not a political grant from government, Freedom is neither license nor anarchy. It is control and sovereignty of oneself no more, no less. It is thus consistent with the Human relations Commandments, the Golden Rule and the Declaration of Independence.

National Outlook

By GEORGE HAGEDORN

INCREASED SAVINGS One of the most interesting, and unexpected, of recent economic developments has been the increase in the rate of personal saving. During the second quarter of 1964 individuals saved 8.2 percent of their total income after taxes. This is the highest percentage recorded in the past

The 8.2 percent compares with a 6.8 percent savings rate in the same quarter of 1963. The gain may not seem spectacular, but to achieve this individuals had to save one-quarter of the increase in their total incomes

Savings and Taxes

This has occurred while the economy has been gaining upward momentum. The combination of a general economic rise with an increase in the savings rate suggests a new look at some previously accepted theories.

> This has been a delightful ties of birds as they stop off in Pampa on their way to warmer climates. The most fascinating of all to me is the tiny yellow Goldfinch or Wild Canary as it is sometimes called. A quote from a naturalist I read recently says: "People make the mselves poorer because they take birds for granted." Now is a good time to pause and enjoy our gardens as well as the lively, colorful, graceful birds. To me, all gardens to be complete should have a chair or bench under a tree for a few quiet moments of relaxation. In fact, my ideal garden is going to be made up of "perrennials and patios"; the patios for seating and reclining areas to watch the seasonal shows produced by the easy - to - care - for perrennials.
