It takes a lot of "outside" help to get this year's big telephone job done...

This year Southwestern Bell is investing nearly \$1 million a day in an intensified construction effort to make your telephone service (already the most modern and reliable in the world) even better.

These construction dollars, pouring into communities large and small, account for some 17,500 jobs among the hundreds of firms which sell supplies, services and materials to the telephone company.

These jobs mean more paydays for secretaries, accountants, architects, brickmasons, carpenters, engineers, truck drivers, bulldozer operators, ditch diggers-thousands of people who aren't telephone company employees.

There's another tangible benefit, too. Because hundreds of individual projects affect virtually every telephone exchange we serve, the economic impact in these communities will be significant and widespread.

That's how Southwestern Bell's construction program works to help build a more prosperous America. You, personally, will benefit through even better telephone service. "Your Town, USA" benefits from a surge of new dollars into the local economy.

EVER STRIVING FOR THE TOP O' TEXAS TO BE AN EVEN BEFTER PLACE TO LIVE

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

We believe that freedom is a gift from God and not a political grant from government. Freedom is neither license nor anarchy. It is control and sovereignty of oneself no more, no less. It is thus consistent with the Human Relations Commandments, the Golden Rule and the Declaration of Independence.
