### It takes a lot of "outside" help to get this year's big telephone job done...

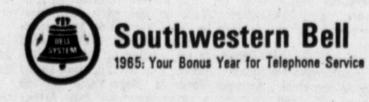

This year Southwestern Bell is investing nearly \$1 million a day in an intensified construction effort to make your telephone service (already the most modern and reliable in the world) even better.

These construction dollars, pouring into communities large and small, account for some 17,500 jobs among the hundreds of firms which sell supplies, services and materials to the telephone company.

These jobs mean more paydays for secretaries, accountants, architects, brickmasons, carpenters, engineers, truck drivers, bulldozer operators, ditch diggers-thousands of people who aren't telephone company employees.

There's another tangible benefit, too. Because hundreds of individual projects affect virtually every telephone exchange we serve, the economic impact in these communities will be significant and widespread.

That's how Southwestern Bell's construction program works to help build a more prosperous America. You, personally, will benefit through even better telephone service. "Your Town, USA" benefits from a surge of new dollars into the local economy.

Skateboarding is the latest craze for youngsters. It's sometimes called sidewalk surfing. At any rate it appears to us to be a dangerous pastime. Skateboards are simply fashioned pieces of board, about two feet long, with rollers at each end. They look like an elongated roller skate. Youngsters put one foot on the board and propel themselves with the other foot. When they attain sufficient speed they coast along with both feet on the board, hence the reference to surfboarding.
