### Murray At Chicago

Gallstones are a common affliction and constitute a large portion of the so-called disease of the liver and its appendages.

Nearly 50 er cent of all cases and ermine cloak, Mr. Cranshaw looked in on Bobby's flool and when he talks of the subody's fool and when he talks of the country he knows quite well that he is babbling buncombe to tickle the bankrupt's ears. Of course if 'he Federal Reserve Beard is to bar bankers and is to be filled up with "little men" who want to see all borrowers accommon afflications than men, it being estimated that three quarters of the cases cour in women.

The bearing of children appears to influence the 'development of gallstones, for 90 per cent of wom the farm and the deadbeat in charge of the counter where he buys" goods in exchange for his worthless word.

Murray banking would run only as long as everybody insisted on paying his obligations as they matured. When times became hard the banks would have nothing to learn, for the very good reason that they would already have loaned the carpet off the floor and the blotter.

The other theory advances the fair before the evening was over.

Mrs. Cranshaw looked in on Bobby's dinner as she went out, a sumptious figure in white velve and ermine cloak, Mr. Cranshaw and ermine cloak, Mr. Cranshaw is until to be marques particularly, and to lount in the termined of the cases cour in women.

The bearing of children appears to influence the 'development of gallstones, for 90 per cent of women as uffering with gallstones have been met with the marquesa, cant' be formed, is still undermined. There are two principal theories offered.

One theory maintains that gall-the banks would have nothing to lime salls and choics.

DALLAS, Sept 7.(INS)-Oil men nterested in the East Texas field predicted today that the proration order under which daily produc tion of 225 barrels per well is be-ing allowed will not remain in force more than 15 days. Within that time, they think, Governor Ross Sterling will either order another complete shut down or the allo able production will be revis ownward.

With production under the pre-cent order already in excess of 400,-000 barrels per day, prospects were that it would grow rapidly as new wells were brought in. With greater production, prices were expect-ed to tumble. Besides, a great deal of natural waste may result from the per well basis for production. perators said.

### Lamesa Tornadoes Face Prospect Of Having Inexperienced Squad; Take First Game By Touchdown

Beccial to the Herald.

LAMESA, Sept. 7.—For the first season in many years, Coach F. T. McCollum has had to build a Lamesa High School Tornado football team almost from the ground up. The truth in this statement may be seen with a check over the number of last year's gridmen who are back in uniform. There are only five of last year's squad placed on the team for 1931. Three of these men are in the backfield and the other two are in the line Outstanding among the boys who will wear the black and gold for another season are David "Sonn; which was unspected that sang The Kyes on Texas for the first time 28 year on Texas for the first ti back who has been classed the best class.
