SWINGING WING

Key to the versatility of the new F-111 fighter is the 14-foot steel yoke, diagramed above right, on which the wings pivot to achieve the basic wing configurations of conven-tional planes, compared with F-111 in drawings at left. Fully extended wings, top, permit short take-offs with heavy loads but limit flight speed. Partially swept wing, middle, gives less lift but more efficient flight at greater speeds. Fully swept delta wing, bottom, permits supersonic speeds. In F-111, combining all advantages in one plane, the yoke and 81/2-inch diameter pins linking it to wings support entire weight of plane in flight.

Brotherhood -

The brotherhood of man, under the fatherhood of God, has long been the ideal of Christianity. Everytime that we say, "Our Father", we indicate that all mankind are brothers. Christians have been striving toward this ideal of Christian belief for many centuries. In the days of early Christiandom leaders of the church had distorted ideas about the brotherhood of man. The Christian concept of brotherhood has evolved through the centuries, yet, Christians have not attained their ideal or the teachings of their master.

One of the great paradoxes of life is that Christians confess one thing and practice something entirely different. The concept of brotherhood has not crossed denominational boundaries to the fullest extent, much less our social, economical, and racial boundaries.

As a Nation of people we are in a crisis at present because we have been unable to cope with this age old problem. A man is not a true man, much less a Christian, until he has dissolved his prejudices. I personally predict that we are going to solve our problem of brotherhood. When we solve our one great problem, we, as a nation of people, will flourish as we have never flourished before. We, the American people, are the New Israel of God.

When we reach the ideal toward which we are striving other nations of peoples will pay attention to our way of life. We will be able to teach others the way, the truth, and the life. When we have become one brotherhood under God then will God say of us: "You only have I known of all the families of the Earth." Then the blessings of God will rain richly upon our Great Nation and we will be able to teach both by example and precept as well as by word.

Rambling With Red RON CROSS

You can bet that the price of a certain Brittany Spaniel has gone way up in the Jim Leverich home. Ch. Way Kan Jill has won her second U.S. Open Brittany championship. The latest one at Lake Murray near Ardmore, Okla. last week.

Jill won the same trail in 1963 and owner Leverich was a little prouder of this one.

Jill was flawless finding four coveys of quail in the preliminary round of the one hour heat and pointing two coveys in the finals.

In both the first round and the finals Jill hunted brilliantly and with superb style.

Pups Next

Jill was handled in both of the Brittany championship stakes by Delmar Smith, a professional trainer from Edmond, Okla, who taught her the tricks of the game. The seven-year-old Jill has a list of honors that would make most dogs feel like a Heinz variety.

The little girl has 34 or 35 field trial wins and has made the Sports Afield All-American team for three straight years.

Jill was a finalist in the Open in 1964 and 1965. She is regarded as a champion in the Field Dog Stud book and the American Kennel club.

If Jill can win the championship once more Leverich will be able to keep the trophy permanently. Three

times and its retired. Jill isn't through for the year by a long shot, in fact for 1966 she is just getting warmed up.

She will be slowed for a while (she's expecting) but after she has her pups will be back in the running.

The Bampa Baily News

A Watchful Newspaper

EVER STRIVING FOR THE TOP O' TEXAS TO BE AN EVEN BETTER PLACE TO LIVE

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

We believe that freedom is a gift from God and not a political grant from government. Freedom is neither license nor anarchy. It is control and sovereignty of oneself no more, no less. It is thus consistent with the Human Relations Commandments, the Golden Rule and the Declaration of Independence.

DEAR ABBY: It has become necessary that we share a home with our mother. This is what bothers me. Mother loves to cook and she is a very good cook, and I know she will be doing most of the cooking here. But she has always had the habit of tasting everything with the same spoon she has used to stir it. Isn't this terribly unsanitary? What do you say in a case like this?

SQUEAMISH DEAR SQUEAMISH: I say by this time you surely must have developed an immunity to your mother's "germs."

NEW WAY TO BE SUDDENLY SLIM, COMFORTABLE, TOO

Los Angeles: -Are you a woman whose figure is on the good side but might look perfect? You'll be thrilled by the new easy way science has discovered for you to become Suddenly Slim and yet completely comfortable. If you're more than 15 pounds overweight, then this idea is not for you. If your weight problem falls within this range, then you can realize a new, smoother figure today, without diet or

exercise. Suddenly Slim is an all-new kind of 4-oz. girdle constructed of science fibers. One startling innovation is the sheer nylon front panel. This is permanently stiffened by a science process and cannot give or sag. It's surrounded by a slimming action border. A featherstitched panel down each side of this girdle will contour your hips if they are a problem.

The girdle itself is of a "wonder" Lycra spandex blend. It's a new power net consisting of nylon, acetate and spandex. It is so comfortable, but has such slimming strength, it gives your figure everything that's possible with a foundation.
"Suddenly Slim," in both gir-

dle and panty versions, is the peak achievement of the California designer-genius, Olga. They are available in our area at
