-High cost of living. -High cost of government. The third big issue, of course, will be President Johnson's conduct of the war in Viet Nam. But the Republican approach to the cost of living and government and the issue of war in Southeast Asia is likely to be subtly different. Congressional Republican can heat up the issues of living and government costs in the House and Senate, in committees and on any street corner where an audience can be assembled.

On the issue of war in Southeast Asia, the Republican are likely to sit by while angry congressional Democrats debate among themselves on war and peace in Viet Nam. This battle among the Democrats is helping to establish in the public mind the fears and lack of confidence on which the Republicans will seek to capitalize next November.

For their own part, the Republicans apparently intend to support LBJ's war while demanding more aggressive prosecution and victory. If the public is tiring of war costs, war casualties and war news. the Republicans will have good voter bait such as campaign offers to shorten the war with honor. The Korean war helped turn the Democrats out reporter should be.

in 1952. The war in Viet Nam might repeat against the Democrats this year and for some time after. Meantime, food prices are up

at market check-out counters. That will be the basis of the Republican campaign against the High Cost of Living (HCL). HCL is the ideal campaign issue because nobody can be in favor of it. It can be argued, of course, that the issue does not exist and that the cost of living in fact is not high.

Such arguments are a sure loser if the womenfolk believe food prices are up. It is difficult to argue against the fact that the wholesale price index rose by one half of 1 per cent in January after a long period of comparative inactivity. That represents an increase of 6 per cent on an annual basis if the January rate continues. A 6 per cent increase in the wholesale price index would be so inflationary as to be unacceptable.

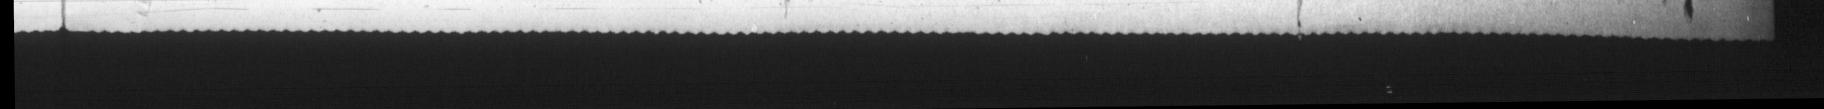

If prices continue to rise, LBJ surely will propose more taxes as a brake on currency inflation, which would hold the price line. There is no indication, however, that the Great Society will impose payas-you go economy on government. Pay-as-you-go would compel the government to live on tax revenue instead of on borrowed money. The deficit spenders of borrowed funds have been nudging living costs higher for more than 30 years. LBJ is indulging in more of the same.

In the five Kennedy-Johnson years since President Dwight D. Eisenhower left the White House the public debt has risen about \$30.5 billion. The average annual Kennedy-Johnson deficit to date has been \$6 billion. LBJ has budgeted for a \$1.8 billion deficit in the next fiscal year but his figures are challenged on grounds that the budget is gimmicked with income derived from sale of federal assets. Estimates of the real deficit likely to flow from LBJ's latest budget program range up to \$10 billion if the gimmicks were eliminated. It is likely to be several billions more than \$1.8 billion in any circumstances.

THIS **GROWING-UP** BUSINESS

A home-delivery newspaper route is a "growing up business" unlike any other. It alone provides a youngster with an opportunity to put muscle into what he is taught in school, by putting him in a part-time business where he buys at wholesale and sells at retail; serves all kinds of people; keeps his own records; makes his own collections; and discovers the rewards of salesmanship.

Here he learns, before his classmates, the importance of responsibility, self-reliance, punctuality and courtesy, and adopts right attitudes about what will be essential to his future success.

Encouraged by parents who realize the many benefits which come from route management and by men who are interested in and trained to work with boys, he will some day look back on his newspaper route experience and say "This was when I really started growing up".

If you have a son or know of a youngster who might similarly profit by having newspaper route experience, phone or write to our Circulation Department.

A high level of morale is he said. maintained with present staff members. These staff members are encouraged to talk with and invite qualified candidates to apply for positions.

Teams of professionals from the district are sent to college campuses to talk with graduates and other prospective candidates.

The residents of the district are also a source of recruiters. Community members who have a pride in their school system spread this pride to friends and acquaintances. Over a period of time an image is developed which reaches prospective staff members. They hear that the school district is a good place in which to work.

Careful thought is given to salaries, fringe benefits and working conditions. A school district need not pay the highest salary in the nation to attract good teachers. This does not mean that a good salary is unimportant. It does mean that a combination of factors will determine

EVER STRIVING FOR THE TOP O' TEXAS TO BE AN EVEN BETTER PLACE TO LIVE

The Pampa News is dedicated to furnishing informa-

tion to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

We believe that freedom is a gift from God and not a political grant from government. Freedom is neither license nor anarchy. It is control and sovereignty of oneself no more, no less. It is thus consistent with the Human Relations Commandments, the Golden Rule and the Declaration of Independence.

A New Twist for the lvy

gold ownership? The individual who can own gold can make exchanges with others, enhance his own wealth, transfer that wealth to gold ownership, and then be free from the manipulations of the monetary "experts" in Washington and elsewhere.

By HARRY BROWNE

What is the importance

YEAR The American Way

The individual who owns gold does not have to fear monetary devaluations (such as took place in the U.S. in 1934); he does not have to watch his savings eroded by inflationary printing of paper money (a constant fact of life in the U.S.); and he knows he possesses something that will always have value to others and can thus he exchanged at any time.

When a government outlaws gold ownership (as the U.S. Govt. did in 1934) it is saying

are completely dependent upon

Why should the individual be dependent upon the whims of "monetary experts"? Any individual who felt inadequate to manage his own wealth could

Democrats Glad This Is Not '68

By BRUCE BIOSSAT Washington Correspondent WASHINGTON (NEA) -From the Democrats' viewpoint, the

best thing to be said about this year is that it is not 1968.

Aptheker exclaimed, Conceived in terms of support course. Watts was glorious!" their talent, that assassination is an answer; it deposes government. Others believe that electric power interruption is an
