U.S. Aircraft Losses Nearing Korean Level

Today Marks Third Year of Viet Raids

WASHINGTON (UPI) — The third year of U.S. bombing raids on Communist North Vietnam opened today with the loss of American planes in the war approaching Korean conflict figures.

On Feb. 7, 1965, U.S. warplanes first struck north of the 17th parallel in an attempt to bring the war home to the Hanoi regime.

Since that time, the United States has reported 469 fixed-wing aircraft and 4 helicopters lost over the north. Of these losses, 10 planes were shot down by Communist MIG jet fighters and 30 by Soviet-built SAM (Surface-to-air) missiles; the rest were downed by groundfire.

The Pentagon disclosed Monday that, overall, the United States has lost 1,172 planes non-combat—during five years in Vietnam. It was understood that helicopter losses from all causes would raise the total for all aircraft to about 1800.

This compared with 3,001 aircraft losses in the three-year Korean war—1,321 from combat and 1,680 from non-combat causes.

But U.S. officials point to the breadth and scope of the air war in Vietnam as compared to that over Korea. They reported that there were upwards of 31,000 sorties over North Vietnam last year and some 3,400 thus far this year.

In addition, though the ground forces committed in Vietnam have for some time exceeded those committed during the Korean war, American battle deaths are nowhere near the Korean total. This reflected the guerrilla nature of the Vietnam conflict with its lack of front lines or set battles.

In Vietnam, U.S. casualties through Jan. 28 have been 1,109 dead and 40,799 wounded; during the Korean war, 33,629 were killed and 103,284 wounded.

DEADLINE MARCH 1

Two School Board Seats Up for Grabs

Two seats will be up for grabs at an April 1 election which the Pampa School Board is slated to call when it meets Thursday.

The board posts to be filled at the independent school district election are those currently held by Board President E. E. Shelhamer and John Gikas, board secretary. Their terms end March 31.

Shelhamer is winding up one three-year term and Gikas is completing his second three year hitch on the board.

Neither had reached a decision today about seeking reelection.

When the board holds its regular monthly meeting Thursday morning, it is expected to set the April 1 date for the school election to fill the two vacancies on the board of trustees. At the same time, judges and clerks are expected to be named.

Another major item at Thursday's board meeting is expected to come with the selection of a successor to Joe Reid who recently resigned an executive post with Cabot Corp. to join the Panhandle Eastern Pipeline Co. in Houston.

While Reid has not yet submitted his resignation to the board, it is anticipated he will do so Thursday. Board members are expected to appoint someone to serve out the remaining one year of Reid's term at that time.

Other trustees of the five-man school board are Dr. R. M. Hampton, who has completed two three-year terms and has two more years of his current three-year term to serve, and H. C. Grady Jr. who has completed five years on the board with one year remaining of his current three-year term.

Wilson, Kosygin Agree on Truce

LONDON (UPI)—Britain and the Soviet Union have agreed that the best route to peace in Vietnam would be extension of the Asian new year's truce and a halt in U.S. bombing of North Vietnam, informed British sources said today.

Sources said British Prime Minister Harold Wilson and Soviet Premier Alexei Kosygin agreed on these two points in conferences Monday. But both were reported pessimistic over the likelihood that North Vietnam was now willing to negotiate for peace.

Britain and Russia were in the most favorable position to initiate new peace moves since the nations are co-chairmen of Indochina. And sources said both were agreed that the move could best be timed to coincide with the Asian new year (Tet) cease-fire beginning at 5 p.m. CST today.

The sources said Wilson made a personal man-to-man appeal to Kosygin to join him in a new peace bid. This would have been during the one-hour the two men spent alone with their translators. They were later joined by other officials for two more hours of talks.

Wilson and Kosygin were to meet for two rounds of talks today.

Beyond the very scant outlines given by the British sources, strict secrecy was being observed on the talks, reportedly at Soviet request to enable both sides to talk more freely.

Other informed sources said much of the first meeting was devoted to mapping subjects for future talks.

Wilson and Kosygin were said to have voiced hopes for increased trade and economic cultural and technical exchanges between the two countries.

They were said to have agreed that such small-scale steps toward improving and broadening strictly Anglo-Soviet relations would also help ease east-west tensions generally.

WILLIAM B. FROST... "Uncle Billy"

'Uncle Billy' Frost Dies At 104

By DORIS E. WILSON
News Staff Writer

On his 104th birthday, not quite a month ago, William B. (Uncle Billy) Frost said, "If you should hear some day that Uncle Billy has 'tickled off' well, you can just make up your mind that he is in the care of his Lord and Savior."

Uncle Billy did "tick off" last night about 8 p.m. in Highland General Hospital. He died of pneumonia.

He had been a patient at the hospital since Jan. 30, when he was admitted from St. Ann's Home for the Aged in Panhandle.

Frost was not a wealthy man by material standards. Yet, in inspirational contributions to his fellowmen and in friendships, he was rich indeed.

Born Jan. 10, 1863 in Tionesta, Pa. Uncle Billy worked most of his life in the oil fields of Pennsylvania and Texas. He came to Pampa in 1929. Until retirement in 1940, he was employed as a production superintendent for Dunigan Brothers, oil and gas producers.

Prior to a hip injury in early December of last year, he did his own house-keeping and cooking in a neat, white frame, "bachelor" house at 1105 Charles.

Uncle Billy is survived by one son, Charles of Caney, Kan., who is nearing 80 years of age, and numerous nephews, nieces, grandchildren and great-grandchildren.

He was preceded in death by his wife, Effie Jane, five brothers and three children.

Funeral services are set at 2 p.m. Wednesday in Duenkel Funeral Chapel to be conducted by the Rev. J. W. Duke, pastor of St. Ann's. (See FROST, Page 3)

Soviet Embassy Gates Smashed By Red Guards

MOSCOW (UPI)—Mobs of Communist Chinese red guards smashed through the gates of the Soviet embassy in Peking and marched through the compound waving flags and threatening physical violence Moscow radio reported today.

It was the first time in 13 days of anti-Soviet rioting outside Moscow's Peking embassy that Chinese demonstrators were reported to have actually entered the compound, violating the embassy's diplomatic status as Russian territory.

The announcement by the Soviet broadcasting agency came only a few hours after hundreds of Soviet workers staged the first mass march against the Chinese embassy here.

There are also reports today that anti-Soviet and anti-Chinese demonstrations were spreading outside the capital cities of the two countries.

The incidents coupled with warnings of "serious consequences" from Peking if the Russians failed to apologize for the anti-Chinese demonstrations brought the two former allies to the brink of a diplomatic break observers said could come at any time.

A Moscow radio commentator said, "the Chinese authorities have engaged in a new escalation of anti-Soviet hysteria by breaking into the territory of the Soviet embassy in Peking after breaking down the cast iron gate giving on to the street."

"The red guards are walking now in the garden of the embassy brandishing signs bearing threats of physical violence," the commentator added.

GM Charges Its Private Detective Has Joined the Opposition. Nader

NEW YORK (UPI) — For seven long years, what was good for General Motors was good for Vincent Gillen. But no longer.

In papers filed in New York Supreme Court Monday, GM, the world's largest corporation charged that Gillen, the private detective it hired to investigate auto safety crusader Ralph Nader, has joined the opposition.

The accusation was particularly surprising since Gillen had been named as co-defendant with General Motors in Nader's \$26 million lawsuit charging the auto-maker and the gumshoe with invasion of privacy.

GM's corporate suspicions were aroused by an affidavit filed by Gillen in which the detective said he was hired by GM to investigate Nader to "shut him up" and discredit him as an auto safety expert.

Charges "ridiculous" Francis Maguire, Gillen's lawyer, said GM's suggestion of collusion between Gillen and Nader was "ridiculous." He added: "If we're in cahoots with Nader, would we be suing him for \$21 million?"

Maguire said he would file an affidavit with the court "showing clearly that we have had nothing to do with Nader and we're opposing him."

Nader's lawyer, Stuart M. Speiser, said GM's accusations "contain no charge whatsoever that any of the statements in the admissions are untrue, or that any of Gillen's answers are untrue."

"As for Gillen cooperating with Mr. Nader, I assume that GM means Mr. Gillen has given truthful answers to questions under oath. A witness in litigation has no other choice."

Mr. Nader is willing to cooperate with GM in the same way," Speiser said. Gillen has filed a cross-complaint against Nader, claiming damages on grounds he was defamed by Nader's testimony at a senate subcommittee hearing.

Red Chinese Army Troops Rout Forces Opposed to Mao

HONG KONG (UPI)—Peking Radio said today Chinese army troops loyal to party chairman Mao Tse-tung routed opposition forces in the Manchurian city of Changchun, hub of Red China's truck-making industry.

The broadcast by the Mao-controlled agency said many people were injured in sharp fighting Jan. 24 between the factions for and against the aging Chinese leader before the troops intervened in behalf of Mao.

Although there was no confirmation from other sources, wall posters in Peking had previously reported clashes in Changchun, often referred to in industrial circles here and elsewhere as the "Detroit" of China.

Changchun is the capital of Kirin province and also an important railroad in the key industrial complex of northeast China, better-known as Manchuria.

The use of army troops to put down anti-Mao elements was obviously broadcast by Peking radio as an object lesson for other areas.

According to the broadcast, pro- and anti-Mao forces clashed in a stone-throwing melee at the Kirin provincial sports college. It said the anti-Mao elements were holed up in a three-story building and surrounded by "revolutionary masses," meaning Mao's friends.

Although surrounded, Peking radio said the anti-Mao faction "still stubbornly resisted and threw down bricks and spears, injuring many Red guards, public security officers and revolutionaries."

"At this moment, the fighters of the seventh company (of an army unit), singing songs composed from the text of quotations from chairman Mao, arrived at the scene," the broadcast said.

The troops isolated the ringleaders of the opposition and arrested them, the broadcast said. "After the arrest, pistols, hand grenades and other weapons were found."

Bombers Strafe N. Viet Units

SAIGON (UPI)—U.S. planes roaring through Cambodian airspace today bombed and strafed Communist units holed up in a thick border jungle from which they had attacked American troops with apparent impunity.

The Viet Cong had used Cambodian territory as a base from which they exploded a Claymore mine that killed and wounded a group of American soldiers just a few hours before the Asian new year Tet truce was to begin.

It was the second time since Sunday the Viet Cong have fired on U.S. troops from the Cambodian side of the Cai Bac River, a narrow stream that separates South Vietnam and Cambodia about 18 miles northwest of Tay Ninh and 70 miles northwest of Saigon.

A mile north of where the Claymore mine was detonated U.S. twin jet B-57 Camberra bombers roared in at low level to attack a Viet Cong platoon which had attacked a U.S. 25th Infantry Division unit repeatedly.

The Camberras flew repeatedly over Cambodian territory as they swept in for the kill, but as far as could be determined the American planes did not drop any bombs or fire any cannons into Cambodian territory itself.

Instead they swept low over the border and poured heavy fire into the thick jungle next to the river frontier.

The Claymore mine attack came as a unit of the 196th Light Infantry Brigade was searching a Viet Cong area along the river as part of Operation Gadsden, a 25th Division operation aimed at driving the Viet Cong out of War Zone C.

If it comes from a hardware store we have it. Lewis Hdw. (Adv.)

New Road Construction Announced

The Texas Highway Department today announced the beginning of a new highway construction project on FM 2300 at the intersection of U.S. 80 and FM 2300 and extending 0.7 miles south.

The construction will consist of completely rebuilding and widening this section of road. G. K. Reading, resident highway engineer, stated construction began yesterday and will be completed by June 15. The contractor is Gilvin-Terrill, Inc., Amarillo.

The section of road will be heavily traveled by industrial workmen and large construction equipment. Every effort will be made to minimize inconvenience to motorists. Reading stated. The project has been zoned for a maximum speed of 45 miles per hour. Cooperation of motorists passing through the area is earnestly solicited in obeying all warning signs and speed zones, the engineer added.

WEATHER

PAMPA AND VICINITY—Mostly cloudy tonight with scattered light snow flurries starting tonight and ending Wednesday morning. High today upper-30s. Low tonight low 20s. Northerly winds 15-25 mph this afternoon becoming northeasterly tonight 10-20 mph. Thirty per cent probability of precipitation tonight and 40 per cent tomorrow.

OVERNIGHT LOW 22

The Lighter Side

By DICK WEST
 United Press International
 WASHINGTON (UPI) — Valentine's Day is coming up next week, chaps. You all know what happens on Valentine's Day.

Your wife or sweetheart comes out of hibernation and if all she sees is a 25-cent card there will be several days of stormy weather ahead.

In other words, Valentine's Day has gotten our of hand, lads, just like the rest of the holidays.

Hearts and arrows won't do it any more, my boys. Not unless accompanied by a little something from the jewelry store. Even the traditional box of candy is now considered a bit on the niggardly side.

Getting Expensive

It's "be my diamond-encrusted, 21-carat Valentine," if you want her to get the message.

Valentine's Day hasn't quite reached the prodigality of Christmas, with its "his" and "hers" — bathtubs from Neiman Marcus. But it's coming up fast on outside.

Department Store in Allentown, Pa., has a "Valentine special" for \$9,500 — taxes included. It is a 120-day world cruise to the famous "landmarks of love."

The tour will include Verona, where Romeo met Juliet; Wimpole Street, where Robert Browning wooed Elizabeth Barrett; and a trip down the Nile along the route of Anthony and Cleopatra.

With maybe a side trip to

Wall Street, where Merrill Lynch, Pierce and Fenner met Smith.

Romantic Soul

Being a romantic soul myself, as well as a penurious one, I deeply resent the Valentine escalation, which can be blamed in part on Western Union.

The telegraph company began the step-up a good number of years ago with the introduction of those form messages for special occasions.

They cost more than conventional Valentines, but being romantic by the numbers was easier than picking out cards or thinking up original expressions of sentiment.

Western Union has now worked up to perfume-by-wire and I am almost afraid to guess what the next level will be. Mink coats-by-wire probably.

It would, I suppose, be technically possible to transmit a Valentine remembrance without a gift attached, but there is no way to do so without looking like a piker.

Next year, chaps, we will all be carrying heart-shaped credit cards. And don't forget there are only about 12 more shopping days before Washington's birthday.

Television In Review

By RICK DU BROW
 United Press International
 HOLLYWOOD (UPI) — What, above all, are the Ford Foundation and Carnegie Commission plans for a public television service saying to viewers? They are saying implicitly, despite all the courtship, that commercial broadcasting has not fulfilled its significant obligations to their publicly-owned airwaves with which it has been entrusted all these years.

If this were not the chief point of the two documents, there would have been no need for a Ford report, a Carnegie plan. There is a passage in the Carnegie proposals that goes: "We seek for the artists, the technicians, the journalist, the scholar, and the public servant freedom to create, freedom to innovate, freedom to be heard in this most far-reaching medium. We seek for the citizen freedom to view, to see programs that the present system, by its incompleteness, denies him."

Said, "Variety," the show business newspaper: "Implicit in the (Carnegie) commission's recommendations — the depth and breadth to which the commission wants the government to go in behalf of public video's just possibly the most damning indictment of the commercial TV medium ever rendered."

Thus we have the rather clear reasons for the issuance of the two reports in the first place. And now we come to the two vast, complex plans themselves — the six month-old Ford propo-

sals and the brand new Carnegie ideas, the consummate effect of which will be to alter the shape of significant American television production, if differences in the two reports are not continually emphasized. Unfortunately, this either-or approach to the two plans is in danger of taking rather firm root. At the heart of the disagreement are two basic points: How to finance the Public Television Service; and whether the emphasis of the new system should be on an instantaneous, interconnected network type operation, or a more locally oriented collection of stations.

The Ford plan envisages a domestic satellite system, with the large sums saved by the networks who now use line transmission being passed on to the new video service. The Carnegie plan has as its chief prospective money-raiser a proposal for a slight excise tax on television sets, which, as one observer phrases it, "would cost the TV purchasers about two cents a week over the average seven-year life of a set."

To most experts, however, the prime difference is between Ford's centralized network concept and Carnegie's plan for more optional, local autonomy. This is one of those impossible decisions to the veteran observer who sees merit in both ideas and refuses the either-or approach, for a genuine effort could effect a satisfactory compromise that would strengthen a public television system.

On the one hand, the strong network concept seems wholly essential if public-TV is going to

Pampans Leave For Music Meet

Representatives of elementary, secondary and college departments from all over the state of Texas will go "back to school" at the Texas Music Education Educators Association annual clinic-convention Feb. 9-11 in Houston.

Attending from Pampa, in addition to the six Pampa High School students pictured on page 1, will be Jeff Doughten, Pampa Junior High School band director; Mrs. Buster Higdon, music teacher at Lamar Elementary School; Mrs. J. E. Gunn, music teacher at Stephen F. Austin Elementary School; Harris Brinson, Pampa High School band director; Hugh Sanders, Pampa High School choir director.

More than 3,500 music teachers and over 1,000 student participants will crowd almost every Houston hotel facility for the three-day event.

The main objective of the clinic-convention is to give Texas music teachers the opportunity to attend class sessions and demonstrations in their particular field of interest, to learn valuable new teaching techniques and to observe outstanding performing groups under direction of national prominent conductors.

Personnel Group To Hear Dallas Speaker Feb. 21

W. D. Moore, training coordinator for the Dallas Power and Light Co., will speak at a dinner-meeting of the Panhandle Personnel Association at 6:30 p.m. Tuesday, Feb. 21, in the Starlight Room of Coronado Inn.

His topic will be "Emerging Trends in Employee Training." Moore received a M.B.A. degree from the Wharton School of Finance and has done additional work at Vanderbilt University.

Presently he is serving as national vice president of the American Society for Training and Development. He is widely active as a lecturer, consultant and conference leader for management associations, university programs and civic groups.

Reservations for the meeting can be made by contacting Gene Steel, industrial relations manager of the Celanese Chemical Co., P. O. Box 937, Pampa.

(Daily News Staff Photo)

WATER CONSERVATIONISTS — Panhandle groundwater conservationists, comprising the board of directors for District 3, are pictured following an installation luncheon yesterday. From the left, Felix Ryals of White Deer, director; Stewart Purvines, director; C. Russell McConnell, secretary; John Harnly; president; Phil Hawkins, director, and Fred Vanderburg, vice president.

Cabot's Carbon Black Operation To Be Subject at AICE Meeting

Cabot Corporation and its carbon black operations will be discussed by Samuel B. Coco, Jr., assistant general manager and domestic sales manager of Cabot Corp. Boston, Mass., at a meeting of the American Institute of Chemical Engineers at 6:10 p.m. Thursday in Jim's Steak House.

After receiving a B.S. degree from Louisiana State University in 1950, Coco immediately joined the engineering staff of Cabot's Western Region carbon black operations. In 1952 he was appointed administrative assistant to the general superintendent of U. S. carbon black production in Pampa. During the year following he was named first chairman of Carbon Black Packaging Inc., an industry-wide organization formed to study and improve methods for the packaging of carbon black. He transferred to the Akron, Ohio, sales office in 1956 as a carbon black sales representative and special technical consultant on bulk and bagging and packaging service matters. In 1959 he was appointed administrative assistant to the vice president and director of sales. In 1962 he was named manager of sales coordination, Carbon Black Division, which position he held until 1964.

Coco is active in various professional organizations among them the American Chemical Society. He is married to the

former Hannahou Pohn, and they are the parents of Harvey S. and Caroline S. Coco. Coco graduated from a resident course at the Alfred P. Sloan School of Management, Massachusetts Institute of Technology.

The dinner is \$2.50 per person. For reservations, call Coy Mitchell, MO 4-3283, by Wednesday afternoon. All chemical engineers and interested guests are cordially invited.

Copies Of Texas Map Are Available

Motorists may order the 1967 Official State Highway Map when registering for this year's license tags during February and March. The Texas Highway Department reports county tax officers have been provided with supplies of special order cards.

Six new public lakes, 819 miles of new highways and 18 new safety rest areas make their appearance for the first time on the Texas Highway Department's colorful 1967 official state highway map.

Before the year is out, about one million copies of the map will be distributed throughout the world, inviting Texans and out-of-state visitors alike to "Discover Texas, America's Fun-ier."

All the new lakes are accessible to the public via the 67,000-mile Texas highway system. Largest of the new reservoirs is Lake Meredith on the Canadian River in the Panhandle. Others are Lake Arrowhead, Fin Creek Reservoir, White River Lake, Bardwell and Somerville Reservoirs.

Copies of the map may also be ordered directly, sending name, address and Zip Code to: Texas Highway Department, Travel and Information Division, Post Office Box 5064, Austin, Texas, 78703.

Pampan Dies By Apparent Suicide

Funeral services are pending at Duenkel Funeral Home for Herbert Clayton Turner, 54, of 626 N. Starkweather.

Turner apparently committed suicide, according to Pampa Police and Gray County Coroner, Ed Anderson, Monday night.

Turner's wife, Bertha, discovered the body after returning from work about 7:30 p.m., in the bedroom.

Anderson said Turner shot himself in the head with a .22 rifle.

Turner, born Oct. 31, 1912, in Dalhart, had resided on a ranch 20 miles northeast of town for 23 years before moving to Pampa a year ago. He was a retired ranch employee.

Survivors include his wife, Mrs. Bertha Turner of the home; two sons, Arthur Turner of Amarillo and Henry Turner of Spade; three daughters, Mrs. Don Grah of Ellis Gove, Ill., Mrs. Ben Laughlin of Fairbanks, Alaska and Mrs. Dale Byram of Ocoee, Fla.; two brothers, L. E. Turner of Amarillo; J. M. Turner of Idaho; two sisters, Mrs. Bob Smith of Tulsa, Okla., and Miss Marie Turner of Naptha County, Calif., and eight grandchildren.

Funeral arrangements are incomplete at Duenkel Funeral Home.

Lent

(Continued From Page 1) his own conscience that he had a weighty reason for doing so. "For all other weekdays of Lent," the bishops' statement says, "we strongly recommend participation in daily Mass and a self-imposed observance of fasting."

Water Men Take Oaths At Luncheon

Grainger McIlhany, 31st Judicial District judge, installed three newly-elected directors of the Panhandle Groundwater Conservation District 3 at a luncheon yesterday in the Quivira Room of the Coronado Inn.

Oaths of office were administered to C. Russell McConnell of Pct. 3 in Carson County; Phil Hawkins of Pct. 2 in Carson County and Fred Vanderburg of Pct. 4 in Gray County, all of whom were re-elected to office in January elections.

Holdover directors are Stewart Purvines of Pct. 1 in Potter and Carson Counties and John Harnly Pct. 5 in Gray County, who was also re-elected president by the board of directors.

The directors serve on a five-man district board which studies underground water conditions in Gray, Potter and Carson Counties.

Quarterly meetings are held with special called meetings at any time a water problem arises. It is the board's responsibility to approve policies and rules in the water conservation district.

Special luncheon guests were Mrs. Grainger McIlhany of Wheeler, Mrs. C. Russell McConnell, Mrs. John Harnly, Mrs. Fred Vanderburg, Mrs. F. H. Hawkins, T. C. Jackson and Fern Jackson of White Deer, Charles Briggs of Amarillo, editor of Irrigation Age magazine, and Mike Redd, the magazine's advertising and public relations manager.

Ministers Will Discuss Bible School Training

Two ministers from the Midwest Bible Institute in Webb City, Mo., will be in Pampa Wednesday and Thursday to discuss merits of Bible school training.

The Rev. Bill Hobson, pastor, said the Rev. Bob Palmer, superintendent of the institute and formerly a missionary in Anchorage, Alaska, for 15 years and the Rev. Earl Bruitt, former pastor of the local temple now associated with the institute, will discuss preparations and advantages in attending a Bible school.

Discussion sessions will be held at 7:30 p.m. Wednesday and Thursday in Immanuel Temple, 801 E. Campbell.

Anyone interested is invited, Rev. Hobson said.

Woman Injured In Auto Collision

A 21-year-old Pampa woman, Sandra Lou Reeves, of 1301 Terrace, was injured slightly in a two-car collision Tuesday about 8 a.m.

According to a Pampa police report, the Reeves woman was traveling west on Montague and collided at an intersection with a car driven by Sandra Beede Margel, 19, of 2237 Hamilton, traveling south on Naida.

Damage to the Margel vehicle was estimated at \$325 and to the Reeves car at \$250.

Officers cited the Reeves woman for failure to yield right-of-way.

Revival In Progress At Church of God

The Rev. Charles E. Neal of La Feria is the evangelist for revival meetings in progress at the Church of God, corner of Gwendolen and Sumner Sts. Special music is provided by a ladies quartet, a girls trio and others from the local church. Services begin nightly at 7:30 Monday through Saturday and at 7 p.m. on Sunday. The public is invited.

Two Now in Race For Ward Three Seat on Council

Joe Taylor, Pampa used car dealer, who announced recently he would be a candidate for city commissioner from Ward 2, filed his official intention of candidacy with City Secretary Stanley Cattaneden yesterday afternoon.

Taylor was the second candidate to file for the Ward 3 vacancy following announcement by Commissioner Roy Kay he would not run for re-election.

Fred Carothers, owner of the Western Motel & Gun Museum, 821 E. Frederic, was the first to file yesterday.

Carothers, who is married to the former Barbara Crossman now employed by Southwestern Bell Telephone Co., has been a Pampa resident since 1929.

In a statement issued today Carothers said:

"Before purchasing the Western Motel in 1961, I was employed by Phillips Petroleum Co. for whom I worked 13 years. "I am a member of the Chamber of Commerce in which I serve on the Tourist and Development Committee; member of the Citizens Band Radio Club and am president of the Pampa Rifle and Pistol Club.

"I had not given much thought to seeking this office until I was approached by several friends and associates and through their encouragement decided to announce my candidacy.

"There are several matters that will be forthcoming which will affect our city and I would very much like to be able to help in these circumstances. I have a genuine interest in Pampa and an earnest desire to do what I can to help in the growth and potentials I feel we as citizens are capable of."

Price Fares Well In Agriculture Committee Assignments

WASHINGTON — U. S. Rep. Bob Price of the 18th Congressional District fared well in Agriculture Subcommittee assignments announced today by Rep. Page Belcher of Oklahoma, ranking Republican member of the committee.

Price had asked for subcommittees on livestock and grains, cotton, and got both. In addition he was named to a third, the subcommittee on departmental oversight which looks after implementation of Agriculture bills passed before the Congress.

Two former subcommittees, wheat and the subcommittee on livestock and grains, were combined into one with eight democratic and six republican members, Chairman of the combined committee will be Rep. Graham Purcell of Texas.

"These are the most important subcommittees of the Agriculture Committee, especially to the 18th District of Texas," Price stated.

"The cotton export situation is in deplorable shape as this country continues to lose its world market," Price declared. "The cost of the cotton program is rising but cotton farmers are not sharing in the benefits as they should.

"Actually, I believe the decline of the cotton export markets is largely the result of State Department policies that have forced the American taxpayer

to assume heavy losses by the Commodity Credit Corporation for carrying a huge and growing surplus of unwanted cotton." Price added.

"This is one of the problems I will be working on as a member of the cotton subcommittee," he stated.

"I intend to ask for early hearings on the question of whether the Food and Agriculture Act of 1965 has been properly administered and also what can be done about State Department policies that have crippled our cotton export program," the Panhandle Congressman concluded.

MALOUF ABRAHAM REPORTS Too Early to Comment On Mixed Drink Bill

AUSTIN (Sp) — John has spoken. I'm writing this just a few hours after his speech and it's too early to get much reaction as yet. I imagine that he will get several truck loads of mail on the Liquor Bill. One or two of the old heads said that maybe he had decided not to run for a fourth term. I kinda figured that this would not pass, but with his support it might be a different story. He is not without a lot of power down here. I guess that maybe I better wait a week or so before I comment any further. That's one danger about writing this kind of a column — you're liable to say too much too soon.

The bills are rolling in over 50 already. They tell me that on most of these bills you wouldn't worry too much about them until they come out of committee — if they do. Invariably, there are a lot of changes in them. Of course there are certain bills important to our area that I need to keep a close eye on but you could spend all your time trying to learn what's in these bills. Our committees start holding hearings next week and we will be snowed for the rest of the term.

I have been real pleased to see so many folks from our area down here on various matters and I have had quite a lot of letters on various issues. I am pretty sure that on some of these things people write me to support that they are not familiar with all the provisions of the bill involved. These hearings, which are open to everyone, are real good places to thrash out the various pros and cons.

I might tell you a little about the lobbyists who are called the Third House. I think most of us have sorta thought about someone kinda shady when we hear that term used. Actually they are a big help to the Legislature on many things. Most of them

NUCLEAR-FREE ZONE

WASHINGTON (UPI) — The United States objects to the present form of a proposed treaty to make Latin America a nuclear-free zone on grounds it contains a loophole that could be used to develop nuclear weapons.

The proposed treaty, being drafted by Latin American diplomats at a Mexico City meeting, would not be "completely effective" in preventing the spread of nuclear weapons, State Department Press Officer Robert J. McCloskey said Monday.

The pending treaty would permit "development of nuclear explosive devices for peaceful uses." But McCloskey said such devices are — for all practical purposes — indistinguishable from weapons. He said the United States was bringing pressure on delegates to the Mexico City meeting to change the wording.

THE NATIONAL REPORT ON WHAT'S HAPPENING

THE BOA SCORE FOR POP IN '66: The box score for top pop music hits over the last 12 months has just been racked up... see if you agree or disagree.

Research are usually given credit for the invention of the modern bikini, but mademoiselle, way back in the days of the French Revolution, ingeniously "crossed" in nothing more than half a pound of this, dampened muslin... as effectively revealing as today's bikini. In Crete 1,700 years ago a proper lady dressed in a toe-to-neck garment as shrouding gas by of ment as shrouding as any of Queen Victoria's... but, with "topless" cut-outs. In the other direction, the first daring slacks popped as bloomers stretching to ankle under long skirts 100-odd years ago — and were thought scandalous. Guess what sport loving gals around that date wore for playing tennis? — yards of cloth and laces draping them from choke collar to tight wrist to shoe tip, plus a flouncing, yard-wide basic skirt. For centuries "they" have been complaining about the way girls dress... So, what if "they" still do — about an ecstasy teenty, itty-bitay, modern miniskirt?

BEGORRA, WHAT ARE YOUNG FOLKS COMING TO? Teen Beatniks have sprouted in Ireland...

lice, church, parents and government. Dublin is reported to have a score of low-light cellar hangouts... in Limerick insidious observers state necking has been going on in some of them, and even "slimy slippy dancing." The club owners retort: "We are keeping the kids off the streets." Holy Shamrock! what is happening to the Emerald Isle... once known as the habitat of the "wild Irish" — By Ralph Hartell

NUCLEAR TREATY

WASHINGTON (UPI) — President Johnson sends to the Senate today for ratification the treaty the United States signed with Russia to bar nuclear weapons from outer space and the moon.

The pact, initially agreed upon at the United Nations, was signed Jan. 27 at special joint ceremonies in Moscow, London and Washington. Some 80 other nations also signed the treaty at the White House that day.

TERRORIST BOMB

ADEN (UPI) — An explosion, believed touched off by a terrorist bomb, rocked the South Arabian Broadcasting Service Monday night and trapped a number of persons inside the building.

Royal Air Force men rescued the trapped personnel from the smoldering ruins unharmed.

Powell's Seat Looking Safer By the Day

WASHINGTON (UPI) — Adam Clayton Powell's seat in Congress is looking safer by the day.

Republican House members, who voted unanimously to bar the free-wheeling Harlem Democrat pending an investigation of his activities, are now taking another look at the whole affair. Many of them now say privately they probably will vote to seat Powell.

A number of congressmen are frankly concerned that expelling Powell might set a dangerous precedent. As one conservative Republican put it, "Next time it could be Democrats knocking a guy off simply because he's a Republican."

In Powell's case, a lot will depend on his cooperation with the select committee investigating his fitness to serve. He has been invited to testify before the panel Wednesday, and he is expected to appear as requested.

With the House now made up of 246 Democrats and 187 Republicans, at least 100 Democrats — most of them from the South — can be expected to vote against Powell.

It is therefore apparent that future. On Jan. 10, all 186 Republicans present voted to expel Powell from the House. Powell's immediate political bar him from taking his seat.

College Leaders Sign Resolution To Abolish Draft

WASHINGTON (UPI) — Leaders of 16 major college and youth organizations have signed a resolution...

The youth leaders, attending a weekend conference sponsored by Moderator, a college magazine, proposed that compulsory military service be replaced by some form of voluntary national service.

Of the 18 youths attending the conference, all but two agreed that "the draft must go."

Although the participants attended as individuals and not as representatives of their organizations, they endorsed a resolution stating that "the present draft system, with its inherent injustices, is incompatible with traditional American principles of individual freedom."

The youth leaders agreed to start a program called "students serving society," which would issue cards similar to draft cards which would prefer to serve the nation.

Biggest Class to Graduate From School of Corrections

HUNTSVILLE (Sp) — R. L. (Bob) Phinney, Austin, District Director, Internal Revenue Service, will be principal speaker for the largest inmate high school graduating class in the history of the Texas Department of Corrections, on Sunday, Feb. 19.

Dr. George J. Beto, prison director, said Phinney will address 204 inmates of the Southern prison units at 10 a.m. at the Brazoria County, and then talk to 315 graduates of the Northern Units at 2 p.m. at the Ellis Unit in Walker County.

A native of Marble Falls, Phinney has been associated with the Federal Service for more than 30 years. In 1947 he was appointed Postmaster in Austin. He transferred to the Internal Revenue Service in April, 1952, and in November of that year was promoted to his present position.

Graduates will receive their certificates from H. H. Coffield, Rockdale, chairman of the Texas Board of Corrections. The veteran prison board chairman has presented each a diploma since the first graduation class in Sept. 1957.

Counting the 519 inmates who will graduate Feb. 19, a total of about 8,000 inmates will have earned high school equivalency certificates since 1957, said Alno Langley, education director for the prison system.

Republicans Hope Dirksen Changes Mind

WASHINGTON (UPI) — Key senate Republicans are hoping that their leader, Sen. Everett M. Dirksen, will change his mind over the next couple of weeks and cast his vote in favor of the U.S. consular treaty with Russia.

Vice President Hubert H. Humphrey predicted that Dirksen, who up till now has been one of the major obstacles to Senate ratification of the treaty, would wind up voting for it.

He said in a weekend interview, "I think you can expect Sen. Dirksen to ask searching questions, but I have a feeling he will recognize this treaty is in our national interests and when that becomes clear to him, he'll support it."

In opposing the treaty, Dirksen has pointedly narrowed his objections to one particular point—that the pact would give diplomatic immunity to all consular employees, not just diplomatic personnel as has been traditional. This could give him room to change his mind.

Dirksen, clearly the key to Senate approval, has firmly declined to comment on former President Dwight P. Eisenhower's endorsement of the pact.

Foreign News Commentary

By PHIL NEWSOM

UPI Foreign News Analyst
Whatever the internal strife that threatens to blow Red China apart, all sides seem to support the increasingly shrill campaign of abuse against the Soviet Union.

It suggests that whether Mao Tse-tung or his opposition wins the power struggle, Red Chinese policy toward the Soviet Union will remain unchanged.

And as the two huge Communist nations move closer to a total break, no less an Asian authority than former U. S. Ambassador to Japan Edwin O'Meara has argued the two never again can regain their former unity, and that the United States should review its own policy toward both.

Indeed, the Soviets and Chinese now seem to be on that collision course ascribed at various times in the past to the United States and the Soviet Union and the United States and Red China.

Subject To Insults

In Red China, Soviet diplomats have been subjected to insults of a physical nature described only in gutter language and not in a family newspaper.

Yet, if the Soviets are to hold to previous policy it will be the Red Chinese who will declare the formal break.

In its role as champion of Communist unity, the Soviet Union has sought to divide state relations from ideological relations and so far as the Red Chinese are concerned, to react rather than act.

As to a continuation of the policy, it must be recalled that both Mao Tse-tung and his high-ranking opposition all had a hand in shaping it.

Except for necessity, there never has been reason for fondness between the Soviets and Red Chinese.

The Soviets fear a unified China and as far back as Josef Stalin's day sought to keep the country weak by forcing Mao and his followers into a compromise with Nationalist Generalissimo Chiang Kai-shek.

Following the course of events inside the guarded walls of Red China is a different matter.

Read Backwards

Here the experts must read events backward.

If Peking Radio, for example, announces that Mao forces have taken over Shansi Province, it then must be concluded that for a time they did not have it.

The same applies to reports of Mao victories in the cities, Nanking. It also indicates Mao is being forced to rely on his own prestige rather than strength within the party. Otherwise how to explain the long delay in President Liu Shao Chi's reported ouster.

It further suggests that if Mao should win, even temporarily, the blood bath to follow might rival even that which followed his takeover in 1949. Estimates of the numbers executed then range upward to 5 million.

Roast Beef And Big Tips Mark Of Businessmen

The average businessman in 1966 took one hour and 10 minutes each day for lunch for which he spent \$2 and left a 30-cent tip.

Those are the statistical findings of Marcel Lutwak, who as managing director of Chicago's Exeter Inn, Ascot House, Avenue Motel and Acre Motel, keeps such figures to help him evaluate his buying and staffing procedures.

Lutwak's year-end summary of his four restaurants' activity revealed that the greatest number of businessmen, 73 per cent, averaged \$2 for lunch and tip. A chart of the country's businessmen spent less than \$2 for lunch while an equal number feasted on meals ranging from \$2 to \$3.

In the tipping department, a 20 per cent gratuity was the average for 15 per cent of the businessmen. While less than 15 per cent of the tab was average for 12 per cent of the diners.

The amount they spent and their tipping habits were not related to the time they spent at the luncheon table, Lutwak reported. Almost 90 per cent of the businessmen took on the average of one hour and 10 minutes for lunch, while five per cent returned to their offices in less than an hour, and five per cent checked back in between one and one half and two hours.

Lutwak's figures did not include formal business luncheons which he said usually ran well over two hours.

They did reveal one eye-opening fact however: Men don't like to eat alone.

More than three-fourths of all businessmen usually lunch with at least one friend, and their favorite food was roast beef.

TONBRIDGE, England (UPI)—Landlord Edward King objected when the local rent office reduced the rent on one of his houses by \$1.40 dollars per week. He asked an official to visit the house.

Inspector Mark Couchman stepped inside and fell through the floor, weakened apparently by dry rot.

King withdrew his objection.

OP ART? Not quite. It's a large-scale reproduction of the electronic circuit maze printed on micro-miniature silicon chips produced by Westinghouse Electric Co. The final product, thousands of times smaller than this diagram, is an integrated circuit with thousands of uses in today's technology.

'Year of the Lamb' To Resemble Lion

By ARNOLD DIBBLE
United Press International
HONG KONG (UPI)—The Year of the Lamb in Asia will roar in like a lion, and be just as dangerous.

In the heart of the continent and along its 10-thousand-mile perimeter from Pusan to Palembang and beyond, the Lunar New Year will dawn Feb. 8 in tension, war, revolution and as the Year of the Fiery Horse—a traditionally bad year in the 12-year zodiac in this part of the world—gives way to a traditionally "good year" that could be even worse.

Red China is in ferment. No one presently can predict the outcome of that power struggle.

But the greater the chaos, the greater the threat of external adventures that could plunge the world powers into even greater conflict.

The Year of the Lamb is the year when the United States and its allies will try for a reasonable start toward a political solution of the crisis in Vietnam to back up the steady military progress.

The year will see events which will affect the Western world.

Curving around the arc of Asia, this is the picture and the possibilities:

Korea—North Korean Communist pressure has increased in the last few months, highlighted by sneez attacks.

The North Koreans are likely to intensify these attacks in an effort to dissuade South Korea from furnishing further support to the U.S. war effort in Vietnam.

Japan—There will be increasing pressure on the U.S.-Japan Security Treaty which comes up for renewal in 1970. If the Liberal-Conservative party of Prime Minister Eisaku Sato cannot maintain a healthy majority the prospects are for more governmental confusion and possibly another election in the fall.

Okinawa—The Japanese and Okinawans will increase demands for returning this great U.S. military base to Japan. The United States is slowly giving ground.

Formosa—There is less feeling of crisis and tension in this Nationalist Chinese bastion than in virtually any area of Asia.

Hong Kong—Quiet, but nervous as it watches the fate of the Portuguese overseas province of Macao only 40 miles to the west.

Macao—Harassed by Red China and more pressure to come. The Reds, who get hard currency through Macao, apparently do not want to take over completely. But the campaign of harassment may get out of hand. It is even possible the Portuguese may voluntarily give up the enclave, the oldest foreign settlement in Asia.

Philippines—The Communist Huk movement has shown signs of resurgence, but the major problem for president Marcos and his people is economic. Anti-Americanism, as exemplified by the campaign against American retail firms by Mayor Villegas of Manila, bears watching.

Indonesia—President Sukarno's days are numbered. What happens after Sukarno is the big question. He still has a base of power, particularly in East and Central Java. But strongman Gen. Suharto probably can take care of any opposition.

Vietnam—More military progress by the United States and its allies: The campaign to win over the people is the big challenge.

Thailand—The United States is likely to take a more active role in the anti-subversion campaign in northeast and southeast Thailand.

Cambodia—This tiny nation is leaning ever closer to Red China, but prospects are that Prince Sihanouk still will try to maintain a posture of neutrality.

Laos—There are always the threats of the Communist Pathet Lao will mount new attacks. But with Prince Souvanna Phouma back in control of the Vientiane-based central government, the situation looks quiet and probably will remain so.

Burma—There have been Communist attacks on government forces close to the outskirts of Rangoon. The economy shows little sign of improvement.

India—Drought, starvation, religious strife, tribal revolts, political instability, economic crisis are just a few of the problems facing India on the eve of a crucial election for the ruling congress party.

Income Tax Questions, Answers

EDITOR'S NOTE — This column of questions and answers on federal tax matters is provided by the Pampa office of the U. S. Internal Revenue Service and is published by the Pampa News as a public service to taxpayers. The column answers questions most frequently asked.

Q—I understand that the first \$100 in dividends is not taxable. Does that mean I don't have to list that on my return?

A—All dividends received should be reported on your return. Page 2 of Form 1040 has a line where you may take the exclusion you refer to. Note that this is \$100 for dividends of qualifying domestic corporations. On joint returns where both husband and wife receive dividends, each may exclude up to \$100 of such dividends.

It's a "Badge" of DISTINCTION

WHEN an ambitious youth serves a newspaper route in his spare time, it marks him as a young man who is eager to succeed in life—a good example of American Free Enterprise at work!

What's more, he is recognized as one of the vital connecting links between the newspaper and its great reader audience—a hustling young businessman who really strives to make his route service match the newspaper's constant efforts to serve you quicker and better.

Why not see if there's a route opening where you can earn your own money for yourself? Write: Circulation Department.

The Pampa Daily News

Federal budgets have risen steadily over the years but value of the Gross National Product has been going up at a much faster rate. As a result, the federal budget as a percentage of GNP has declined from almost 50 per cent at the end of World War II to around 15 per cent in recent years. Without the special costs of the Vietnamese war, the estimated fiscal 1968 budget would be about 14 per cent of current GNP.

Highlights and Sidelights

By VERN SANFORD
Texas Press Association
AUSTIN, — Texas legislators are at work on Gov. John Connally's recommendations for raising \$144,200,000 in new taxes which include a "surprise" proposal to legalize the sale of liquor by the drink.

His local option, mixed-drink endorsement was the major bombshell in an otherwise predictable package based on boosts or adjustments in old-standby sales and business taxes and a transfer of farm road financing to the highway fund.

House Revenue and Tax Committee hearings are due to get under way immediately. Legislative leaders acknowledge some bitter controversies are upcoming for the first major revenue program advanced since Connally took over the governor's office.

In his 25-minute speech to a joint session of the House and Senate, Connally outlined his views on how to raise the \$971,800,000 necessary to carry out his general revenue spending program for the next two years.

Here, in summary, is the governor's tax program:

—Repeat the sales tax exemption on all alcoholic beverages, effective July 1. (Should yield \$26,000,000.)

—Increase the gasoline tax 1 cent a gallon (from 5 cents to 6 cents), effective July 1. (Since \$24,400,000 of the additional revenue automatically would go to the available school fund, general revenue of this amount would be freed for legislative appropriation. Tax raise would add \$73,200,000 to the state highway fund.)

—Repeat the 1949 Colson-Briscoe Act's general revenue allocator of \$15,000,000 a year to farm-to-market roads and leave financing of these roads to the highway department. (\$30,000,000 general revenue gain.)

—Take distilled spirits and wine sold by the drink at licensed establishments five cents an ounce. (\$15,000,000 gain.)

—Increase the corporation franchise tax rate from \$2.25

—Raise the natural gas production tax from seven to eight per cent of wellhead value, effective July 1. (\$17,800,000.)

Connally said he had tried to fashion an equitable plan which will impose the least possible burden upon the individual and business taxpayers of this state.

He emphasized that he recommends legalizing liquor by the drink only on a local option basis and under "strict regulation" with punishment by revocation of licenses for repeat sales of liquor to minors. He hit at the existing "subterfuge" which now permits serving of mixed drinks through "so-called private clubs."

"It is time to bring this matter into the open," the governor said. "It is my considered opinion that a far more wholesome climate will prevail if liquor can be sold by the drink legally and under tight regulation."

Connally got his biggest applause when he said he would NOT recommend a state college-university tuition increase.

PAY HIKE URGED — The Legislature has unanimously petitioned the governor to submit as an emergency interim pay raise for all state employees.

Connally did not mention this request in his address, however. If such a raise would be voted, to take effect immediately, another \$5,500,000 in general revenue would have to be raised.

Connally's budget includes an overall average 20 per cent pay raise for the state government workers, effective September 1.

It is not an across-the-board 20 per cent raise. Raises would vary widely by salary groups. For example, lower-paid workers would be raised from \$2,640 a year to \$3,024 (approximately 12 per cent) and those in highest classifications from \$12,830 to \$17,784 (nearly 39 per cent). This means a \$32 a month raise to the little fellow and \$412 per month in the high salary brackets.

Connally last week added \$19,000,000 to his spending recommendations for another purpose — to raise to the maximum authorized by a 1963 constitutional amendment welfare grants for the needy aged, blind, families with dependent children and the disabled and to implement the Title 19 program of federal-state aid to the indigent.

AG REPORT — Texas agriculture is failing to attain its reasonable production potential by as much as a billion dollars a year, the House Interim

Committee on Agriculture has found.

"This suggests that Texas agriculture is now operating at only one-half to two thirds of its capability," the report says.

Committee made three recommendations. They are to set up a Coordinating Board to set agriculture goals, compile annual agri-business statistics, county-by-county, for planning and programming, and pass legislation to permit agriculture to provide funds of its own for research and promotion.

ATTORNEY GENERAL SPEAKS — Students at state-supported colleges no longer are required to take a "loyalty oath" in the opinion of Atty. Gen. Crawford C. Martin.

Martin said the 1949 act which required the oath of students and faculty was altered in 1953 by a law which covered only paid employees of the school. Some legislators are considering a bill to put students back under the law.

In other opinions, Martin held:

—District court judges who are members of county juvenile boards must be paid an additional \$325 a month in salaries, and county commissioners cannot pay less.

—Parks and Wildlife Department has authority to issue depredation permits for killing of wild birds or animals in Dimmitt, Uvalde and Zavala Counties.

—A person convicted of a felony and given a suspended sentence is not barred from applying for and receiving probation under the misdemeanor probation act.

—Texas inheritance tax provision concerning use of the "resident decedent's" entire estate wherever situated as a factor in determining the rate to be applied to succession of property is constitutional.

—Presidio Co. Hospital District can levy a tax for financing operation of the district.

TO HAVE OR NOT TO HAVE — The on-again, off-again proposal to make Guadalupe Mountain lands into a national park is off again, but perhaps only temporarily.

A halt that slowed the progress of Texas' transfer of Guadalupe Mountain lands came when Land Commissioner Jerry Sadler went before the Senate Committee on Counties and urged that the rugged lands be made into a state park.

Committee had voted to report the bill favorably, subject to insertion of a corrective amendment if needed.

Possible amendment would provide a safeguard against any subsequent federal legislation that might deprive the state of its bounty in the event of oil or mineral production.

Sadler, however, presented his views and summed up with a declaration that minerals alone, "in a short period of time would more than pay for the total cost of the establishment of a state-owned park in the Guadalupe Mountain area."

Committee members directed that the bill be held back for a hearing and further action later.

REDISTRICTING CLOUDED — Two recent Supreme Court decisions invalidating congressional districts of 12.8 and 10.4 per cent population disparities in Indiana and Missouri may renew the reapportionment fight in Texas.

LOGICAL ANSWER LONDON (UPI) — "What must you do before you obtain forgiveness of sin?" a Sunday school teacher asked her Bible class.

"Sin," replied the small boy.

Dear Abby...

Snooping Is Wrong, Even for Mother

DEAR ABBY: What should a 17-year-old girl do when she finds out her mother has been reading her diary? Also, I know she reads the letters I have re-
 ceived after I have put them away. I have lost all faith in her! She has no reason to doubt me. Why does she do this, Abby? How can I prevent her from snooping?

LOST FAITH

DEAR LOST: There is nothing you can do except to hide that which you wish to be kept private. A mother who snoops in this manner is in effect admitting that she is incapable of establishing a good mother-daughter relationship — one where there is mutual confidence and respect for privacy.

While I do not condone snooping, if your mother is typical of most snooping mothers, she is probably motivated more by good intentions than nosiness. But she is wrong, wrong, wrong.

DEAR ABBY: My problem is killing me, and I need someone to tell me what to do.

The man I have been living with for nearly two years does not believe in marriage. He says the piece of paper saying you are married doesn't mean anything. We are very, very, very happy together until I bring up the subject of marriage.

His man had a very bad experience with his first wife. It's not just his word. Everyone who knows her says she was so bad she was unbelievable. But what have I to do with this lady? All women are not the same.

My man is very good to me in all ways, and we love each other very much, but I want to be a respectable married woman. When I mention this to him he walks out of the house and says he will not come back if I keep pushing him. I am thinking of leaving him. Please help me do the right thing.

BELIEVES IN YOU

DEAR BELIEVES: Tell him that either he marries you or you are finished with him. But unless you mean it and can stick to your word, don't say

FEBRUARY BIRTHDAY HONOREES — Senior Citizens Center members having birthdays in February were honored at last Thursday afternoon's meeting of the group. Those honored included, front row left to right, Mrs. Elizabeth Taylor, Fred Cullum and Mrs. Mary Puckett; back row, left to right, Mrs. Edith Miller and Mrs. C. G. Miller. Altrusa Club of Pampa sponsors the center each week in Lovett Memorial Library Auditorium in cooperation with other organizations. The sponsoring group hosts the monthly birthday observance and honors those present having birthdays with a party and gift.

Fibers, Fabrics Correspondence Course Available

UNIVERSITY PARK, Pa. — Just about everyone today has questions on fibers and fabrics. Answers to many of these questions are given in a correspondence course, "Fabrics their selection, sewing, and care."

Available from The Pennsylvania State University, the course will be an excellent guide to your home sewing projects or for buying ready-to-wear garments.

The course is designed to help you understand the characteristics of the different fibers and the fabrics made from them. Advantages, care, and limitations of the various finishes are described in detail.

With a copy of the course at your fingertips, you can improve your buying and sewing know-how. The course has a section on labels and their importance to you as a consumer.

To get the complete course, send your name and address with \$2 to Fabrics, Box 5000, University Park, Pa., 16802. Make your check or money order payable to The Pennsylvania State University. All mailing costs are prepaid and the material will be sent promptly and in time for you to study the course before you begin your spring sewing or buying.

Senior Citizens To Be Given Chance To Return to School, Tuition Free

By PATRICIA McCORMACK United Press International NEW YORK (UPI)—No need for oldsters to lead a rock and roll life.

Let cobwebs form between the floor and the chairs they're supposed to sway back and forth in during the twilight years.

That's bound to happen to an awful lot of rockers when the oldsters are given a chance to go back to a college or university—tuition-free.

The basis for prognostication is an unusual experiment that's been unfolding in Kentucky since 1964. Since September of that year the Herman L. Donovan senior citizens fellowship has provided free tuition at Kentucky University to anyone aged 65 and over.

To date, according to a report in "Geriatric Focus," a newsletter for doctors, 138 pioneers have tied from the rockers and rushed for the campus.

They range in age from 65 to 87. Some were widows, others were living with spouses, some never had married.

The age spread, according to a report by Dr. Earl Kauffman at a Gerontological Society meeting, shows interest in learning is not restricted to the "vigorous" years immediately after retirement.

The thesis that older people are very interested in learning is supported by the reasons they gave for returning to college.

The greatest number of responses were "to learn something." A desire to participate was mentioned by many respondents. Others said they had an interest in campus life.

A few, would you believe, mentioned the practical applications of more education, such as teaching opportunities or job advancement.

The "senior" citizen students showed a completion rate above 70 per cent, said Dr. Kauffman,

director of the council on aging at the university.

This rate compares favorably with that of younger students.

The aged students earned above average grades—an A in 29.4 per cent of the courses; B in another 29.4 per cent.

"Failures are rare and usually are in scientific courses where earlier training—now is obsolete," Dr. Kauffman said.

Give Potted Plants For Valentine Gifts

Say "Be My Valentine" with a flowering or foliage plant on Feb. 14, suggests the Society of American Florists.

Trimmed with red ribbon, a long-lasting potted plant makes a beautiful Valentine's Day gift. Flowering plants available at your local florist include red, pink, and white azaleas; white, blue, and pink hyacinths; red, pink, yellow, and white tulips; and pink, yellow, and white mums.

Green plants—such as philodendron, dracaena, pothos, ivy, peperomia, nephthytis, Chinese evergreen, and ficus decor—are in plentiful supply with Valentine trim, for February 14.

The Society suggests that you place your Valentine flower order early. Whatever your choice—potted plant, bouquet, corsage, or nosegay—the recipient of your floral gift will display or wear it proudly on Valentine's Day.

UTILITY CLOSETS

Does that closet containing the mops and broom have a dark, dank floor? If so, have it surfaced with waterproof ceramic tile. In fact, if the whole closet has a dreary look, give it the full ceramic tile treatment. Good tile is assured when it's "Quality Certified" by the Tile Council of America.

Senior Center Corner

By MRS. O. A. WAGNER

Have been told that my jokes have been missed lately so here are a couple I hope are liked: When people reach 65, some wish they were back in the middle ages.

One husband to another, "What makes you think your wife is getting tired of you?"

"Every day this week she's wrapped my lunch in a road map."

Thursday was a beautiful day for the meeting at the Senior Citizens Center.

Reported in the hospital was Mrs. Ruff Hill in Highland General Hospital.

Good to see Mrs. Earl Eckroat out this week. We have been missing her.

Mrs. Katie Vincent is confined in the Worley Hospital. Would be nice if her friends could drop in and see her.

Mrs. C. G. Miller went to Elk City, Okla., Friday to visit her sister-in-law, Mrs. R. H. Carlotte and husband. Mr. and Mrs. Kenneth Ward accompanied Mrs. Miller and attended to business, and the group went to Carter, Okla., and visited Mrs. Ward's parents, Mr. and Mrs. Smith.

Mrs. R. H. Dilly and Mrs. Lillian Brunelle, former senior citizens center members now living in the Abraham Memorial home in Canadian, were Tuesday guests of Mr. and Mrs. J. C. Moseley. Eugene Thompson, manager of the home, took Mrs. Brunelle back that evening and Mrs. Dilly returned Wednesday.

Mr. and Mrs. J. C. Moseley went to Amarillo Thursday to visit their daughter, Mrs. Cleo Vaughn and husband and also visited a neighbor Mrs. H. V. Walls, who underwent heart surgery last week at St. Anthony Hospital, and some other friends were there.

The Altrusa Club was hostess and the February birthdays were celebrated and nice gifts were presented all present having birthdays this month including

Ruth Sewell.
 Red Cross Volunteers providing transportation included Mmes. Lee Harrah, George Benham, Jess Hatcher and A. D. Hills.

Dofr prizes went to Mmes. E. G. Frasier; Mollie Hethcock, Fred Cullum and Messrs. Wilkie, Hardy and Boydston.

The serving table was beautifully decorated in the Valentine motif. The floral centerpiece by

Book Buying Hints Given

UNIVERSITY PARK, Pa. (UPI)—Buying books for children requires thought and consideration.

Mrs. Marguerite L. Duvall, extension child development, and family life specialist at Pennsylvania State University, says there are no definite standards to follow, but the primary considerations are the child's interests, the form of the book and the illustrations.

"As far as a child is concerned, illustrations are the best part of the book," Mrs. Duvall says. "A child likes clear pictures that are not crowded, that tell a part of the story and reflect life as he sees it."

She also says that sturdy books usually last longer than glued ones.

Hal Saunders, who coifs Julie Andrews, says no woman past 35 should wear long hair. "Swept back and up, without any curl, long hair is aging," he said.

Astrological Forecast

By CARROLL RIGHTER

FOR WEDNESDAY, FEB. 8

GENERAL TENDENCIES: A day to wind up whatever has been left undone and to try to find some modern and up-to-date ideas that can help you do so. Also look for appliances of the scientific age that can bring you a greater amount of operative skill in whatever you have to do. Let friends know you are helpful with their problems.

ARIES: (Mar. 21 to Apr. 19) — Ideal day and night to socialize with good pals who comprehend your motives and desires and will help you to gain your aims. Talk over future group meetings, plans for outings, etc. Don't be reticent to put in your two cents' worth.

Taurus: (Apr. 20 to May 20) — Carrying through with duties of the business world as well as doing civic duty is fine during day since you can labor in a streamlined way. Bigwig can give even more support now. If you approach in a diplomatic kind way, show gratitude.

GEMINI: (May 21 to June 21) — You have greater inspiration how to advance now through the fine ideas that occur to you or which others can proffer. New contacts extend charming invitations—be sure you accept them with grace.

MOON CHILDREN: (June 22 to July 21) — Keep very busy getting bills paid, making collections, cooperating with partners, etc., and benefits accrue. Follow your intuition re. gaining favor with others. Move backlogs can be yours.

VIRGO: (Aug. 22 to Sept. 22) — Schedule your duties properly and they are performed in ideal, modern fashion. This will please co-workers who appreciate ingenuity. Add more editorial pieces to your narrative and get a spiritual lift.

LIBRA: (Sept. 23 to Oct. 22) — Ideal day to get duties nicely handled and then affix decorations with ornaments. This is a most pleasing day. Forget any worries you have. A charming person you like can be

very helpful if you are skilful in gaining favors.

SCORPIO: (Oct. 23 to Nov. 21) — Doing whatever most pleases you is right and you should not procrastinate any longer. Show that you are indeed devoted. Get rid of whatever is obsolete and you can progress far more easily, quickly.

SAGITTARIUS: (Nov. 22 to Dec. 21) — Get out early for the calls on trade, keeping professional appointments, etc., and be sure you are on time or you lose out. You have excellent ideas. Use them wisely and you have true success. Increase abundance appreciably.

CAPRICORN: (Dec. 22 to Jan. 20) — Finances are upmarket in your mind now and if you use more modern methods, you find you can add to such more quickly. Listen to what some big banker or person in business has to suggest. Follow through on ideas given you.

AQUARIUS: (Jan. 21 to Feb. 19) — Get by most other persons into doing whatever will make your own life more affluent and pleasurable, especially if it is absolutely critical. Get out socially after getting self nicely groomed. Be very charming, outgoing.

PISCES: (Feb. 20 to Mar. 20) — Plan quietly what you are going to do in the coming months and you find you can get ahead much faster by listening to what experts have to suggest. Handle personal matters wisely, also. Be more satisfied in the days ahead.

IF YOUR CHILD IS BORN TODAY — He or she will be one of those clever, young people who requires more rest than other youngsters since the mind when awake, is going a mile a minute with new ideas, and the body dashing about here and there. The fields of science and business are ideal in this chart, and the humanitarian qualities are very pronounced. A New Era child here who should definitely go to college.

WBA Champ Claims Clay Used Dirty Tactics

HOUSTON (UPI) —Cassius Clay stole Ernie Terrell's wanted left jab and threw it back into his face unmercifully Monday night to win a unanimous 15-round decision over the bloody but courageous World Boxing Association titleholder.

At the end of the fight, the 6-foot, 6-inch Terrell was bleeding from his nose and both eyes, his left eye was swollen almost shut and the entire right side of his face, which bore the brunt of Clay's machinegun-like left jab, was swollen.

There were no knockdowns. Terrell was staggered several times but still never has been knocked off his feet in 44 pro fights, 39 of them victories.

Clay, who promised to give Terrell "a Floyd Patterson annihilation," fulfilled the prophecy with his gloves and tried to add to the humiliation by shouting at the befuddled Terrell, "What's my name? What's my name? What is it, huh, what?"

Clay prefers to be called by his Black Muslim name, Muhammad Ali, but Terrell won't use it. This angered the champion so much he promised the Patterson-type beating. He gave Patterson a savage beating before stopping him in the 12th round in Las Vegas two years ago.

Clay had set him up with the best punch of the fight, a left uppercut which sent Terrell reeling into the ropes. Terrell slid off the ropes and Clay chased him, landing a flurry which opened the cut.

Clay, now unbeaten in 28 fights, praised Terrell's courage and stamina, but he criticized his fighting ability.

Terrell Sorry He Let People Down In Fight

HOUSTON (UPI) —Nobody had to tell Ernie Terrell. He knew it. When the bell sounded ending a fight, he headed for his corner where the first person he saw was his long-time friend and trainer, Sam Solomon.

Ernie Terrell

Terrell showed them so well at a full hour after the fight still lay stretched out on a sagging wooden table in his dressing room, not really caring where he was and trying to ignore the pain above his right eye where Dr. Robert

Harvesters Host Lubbock In District Cage Contest

Lubbock comes to town tonight and not because they want to, but because they have to. The Westerners have been in a worse pickle than Pampa in the second half of district 3-4A play (and first half too) and have not won a district outing in 15 starts, six in the last half.

High scoring players is something else the Westerners aren't blessed with either with only Jim Sawyer scoring in double figures with a 14.9 average.

Senior Steve Williams and juniors Bo Lang and George Bailey all are in the double figure bracket for Pampa while Bailey the season and conference leader for the Harvesters with a 17.8 and 15.3 averages respectively.

Too Many Cooks "He listened to too many people," said his manager, George Hamid Jr. "He wanted to show them he had a right mind, I guess he showed them right."

Terrell showed them so well at a full hour after the fight still lay stretched out on a sagging wooden table in his dressing room, not really caring where he was and trying to ignore the pain above his right eye where Dr. Robert

What's my name? "What's my name?" "What's my name?" "What's my name?"

The answer Clay was looking for, of course, was Muhammad Ali, the Muslim name which he has adopted.

"I didn't answer him," said Terrell, "but his name is Cassius Clay."

The forlorn-looking 6-foot, 6-inch loser leaned on Solomon for support as he spoke and tried to stand up for the benefit of the photographers. He remained standing a moment or so, then groped for the chair and said half audibly, "Lemme

In swift succession, Terrell said he was never hurt, Clay is a "dirty fighter" and that he would like to fight him again.

He wasn't that tough," said Lanky, Mississippi-born pugilist, who had prided himself being the WBA heavyweight champion. "I think I can beat a if I get another chance."

Too Many Clays The trouble was I was being two and three of him all time. After he rubbed my eyes with the top of the rope in the third round, he thumbed in my right eye."

Now THRU WEDNESDAY **CAPRI** MO 4 269 OPENS 1:45 ADULT COMEDY

Buy Vira George C. and His List Scott

Not with my wife, you don't!

As of Tuesday evening Williams had a 13.3 season mark and 14.2 conference average with Foster holding a 9.5 season and 8.5 league average.

Free Throws Hurt Harvesters

If you've been wondering what is wrong with the Pampa Harvesters in the second half of the district 3-4A cage race here are some interesting facts and figures on the first half race and what's happened in the second half.

No matter how you look at it, defense is still the key in basketball. You can score 100 points a game but if you can't hold the other team under 100, you are going to lose.

Everybody's average has dropped although Williams has been the leading scorer in half of the six last half league games.

Williams had a 13.1 season mark and 14.2 conference average with Foster holding a 9.5 season and 8.5 league average.

Williams had a 13.1 season mark and 14.2 conference average with Foster holding a 9.5 season and 8.5 league average.

Williams had a 13.1 season mark and 14.2 conference average with Foster holding a 9.5 season and 8.5 league average.

BRUINS STILL ON TOP

Princeton Moves High

United Press International NEW YORK (UPI)—The surprising Princeton Tigers reached the highest point of their already amazing season today when they moved into the No. 4 spot in the weekly United Press International Board of Coaches major college basketball ratings.

The Tigers, who had been ranked as high as sixth in the past two weeks, swept past Rutgers, Dartmouth and Harvard last week to stretch their record to 17-1 through games of Saturday, Feb. 4 and continued to fool the experts who rated them as mediocre in the pre-season surveys.

The Princeton coach claims this year's team is better than any of the Bill Bradley era and it's very hard to dispute that opinion.

The jump of Princeton was the highlight of this week's top 10 as no new teams and no returns managed to climb into the select group.

UCLA, which has been top-ranked all season, continued in the No. 1 spot for the 10th consecutive week but failed to receive all the first place votes from the 3-man UPI board for the first time in four weeks.

Coach Bill Van Breda Kolff, however, has built his club into an extremely unselfish, defensive-minded unit which believes in itself.

The support given Louisville as the best team by one coach failed, however, to lift the Cardinals out of third place in the ratings.

First baseman Ed Kranepool, the baby, hasn't had that good year everyone predicted. This is his fourth now, Ken Boyer (.266) slipped to 14 HR, 61 RBI.

INFIELD — Old and slow. First baseman Ed Kranepool, the baby, hasn't had that good year everyone predicted.

Houston and Kansas also retained the positions they held last week with the Cougars (15-2) holding into fifth and the Jayhawkers remaining in seventh.

OUTFIELD — Tommy Davis (.313), Cleon Jones (.275) set at two positions. Between rookie Don Boesch, Larry Stahl, formerly of As, for other spot.

OUTFIELD — Tommy Davis (.313), Cleon Jones (.275) set at two positions. Between rookie Don Boesch, Larry Stahl, formerly of As, for other spot.

Western Kentucky and Providence took advantage of their rivals' misfortunes to climb one place each in the standings.

CATCHING — Jeff Grote provides the defense. Unfortunately, nobody provides the offense.

Western Kentucky and Providence took advantage of their rivals' misfortunes to climb one place each in the standings.

Cassius Clay

FOR W. KENTUCKY

The Gem Best In Blue Grass

By United Press International The Polish of Glen (the Gem) Haskins evidently has rubbed off on the entire Western Kentucky team.

Warren and one by Jerry Southwood, with 1:22 remaining in overtime.

Western Kentucky, ranked eighth nationally in the United Press International ratings, has become accustomed to Haskins' brilliance during his career on the Hill.

Utah State's rampaging Aggies won their ninth successive game by blasting Denver 97-53. In boosting their record to 15-3, the 14th-ranked Aggies scored 14 straight points at the outset of the second half for a commanding 61-40 lead.

Something Special. But 1966-67 has been something special both for Haskins and for Western Kentucky.

Michigan State's 14th-ranked Spartans turned back Centenary 79-63, 82-77 and moved into a tie for the Big Ten lead.

Michigan State's 14th-ranked Spartans turned back Centenary 79-63, 82-77 and moved into a tie for the Big Ten lead.

The Pampa Daily News

A Watchful Newspaper
EVER STRIVING FOR THE TOP O' TEXAS
TO BE AN EVEN BETTER PLACE TO LIVE

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

We believe that freedom is a gift from God and not a political grant from government. Freedom is neither license, nor anarchy. It is control and sovereignty of oneself no more, no less. It is thus consistent with the Human Relations Commandments, the Golden Rule and the Declaration of Independence.

Go-Go Politicians

A new breed of cats has evolved from the ranks of heads of State of the world. They are constantly on the move, flitting from one nation to another, trying to improve their international image and spreading their own brand of goodwill.

Trouble is, American goodwill seems to come in the form of foreign aid and other assistance and many people are beginning to wonder how come it is paying if it is hated for everything we represent. Good question.

Our Leader, who not long ago returned from an extended tour of Pacific Islands and Asia, is a qualified member of the new go-go club. Visiting Heads of State are not hard to find in Washington and are easy to identify: they always have a hand out.

Lanfranco Rasponi, travel columnist, discussed the problems posed by the visiting dignitaries in host cities in a recent issue of the Seattle (Wash.) Post-Intelligencer. He also had other pertinent observations to make. Here, in part, is what he said:

"A rapidly increasing group of people has emerged after the Second World War, molding a new way of life—the nomadic one.

"Ever on the move, these persons have created a veritable revolution in the social structure of all classes with far-reaching consequences which, as yet, cannot be properly and completely evaluated . . .

"Among the greatest nomads today are the heads of state, who are perpetually paying official visits to their colleagues and issuing endless communiques on their beliefs of the brotherhood of man and democracy.

"The various capitals are greatly inconvenienced by these frequent arrivals and departures, with the main avenues and streets closed to normal traffic, forbidden for parking and all sorts of other restrictions enforced.

"These state visits represent tremendous expense on all sides. These dignitaries bring with them large retinues of aides, hangers-on and political appointees, along with a vast crew of secret service men. Their transportation usually

consists of costly jets or Caravelles chartered for the occasion.

"Each government appears to control the press sufficiently to have it published glowing accounts of how new industrial areas are rising out of some jungle a few weeks before the forthcoming visit of the President of an obscure African country (hard to find on a map, since only a short time ago it did not exist) or a minor South African republic.

"This is done in a routine attempt to stir up some enthusiasm in the local population which could not be more apathetic to these foreign heads of state with whom it has absolutely no interest in common.

"All cabinet ministers, for one reason or another, are ever in the air and close on their heels are the countless officers of NATO SHAPE, the U.N. VARATON UNESCO, FAO, UNICEF, the European Economic Commission, the Common Market and myriad of other organizations.

"Senators and congressmen of many nations are constantly on the go, sometimes with their wives and children, attending some international conference.

"In the name of culture, thousands travel each year with all expenses paid" (guess who picks up the tab). "Exhibits of all kinds . . . ramble here, there, everywhere, with officials in charge . . . Every sort of entertainment unit is sent on long propaganda tours . . .

Well, it does have such a mine . . . your pocketbook. And the ladle is the government-controlled money printing press.

Pull Up A Chair

By FRANK JAY MARKEY

Interest in coin collecting appears to be waning. The paid circulation of seven coin magazines has dropped about 20 per cent from last year. One of the reasons given is the fact Uncle Sam is trying to flood the economy with pennies, nickels, dimes and quarters. Half dollars are still scarce. Prices on coins minted in the last 25 years are reported off about 50 per cent. Not so long ago Kennedy half dollars were selling for a dollar in many of the coin shops, but you can get a good specimen much cheaper today.

Today's smile: Art Moger, TV wit and author, tells a story about a dreamy fellow working in a haberdashery who was approached by a woman customer who wanted to purchase a pair of men's gloves. "What color?" asked the clerk. "Coffee color," she replied. Then the clerk asked: "With or without cream?"

We're only reminded of our debts on the first of every month when the mailman delivers the bills, but things were somewhat different in ancient Rome. There were three "days of reckoning," according to the Roman calendar. The first day of each month was the Kalends, the seventh day, the Nones, and on the 15th day marked the Ides. And on those days you were expected to pay your creditors. Of course the ancient Romans didn't have credit cards and that sort of complicates things these days.

Thoughts while shaving: Ample proof that you never can tell what the public will like is the phenomenal success of Senator Everett Dirksen's hit record, "The Gallant Men." . . . Perusing this year's edition of the income tax form 1040 recalled a popular play of years ago "Brewster's Millions" in which the hero had to spend \$1 million legitimately in a year's time. Well, if Brewster was around today he could get rid of it legitimately by declaring it on his income tax. After Uncle Sam took his monstrous bite poor Brewster would wind up borrowing to keep himself afloat for the rest of the year . . . If you're a presidential aspirant and your wife has a short name your chances of getting to the White House are pretty good. In the last century 15 First Ladies were named Jane, Mary, Julia, Eliza, Lucy, Ellen, Ida, Edith, Helen, Grace, Lou Anna, Bess and Mamie . . . Although today's handset telephone is generally called a "French phone" it actually originated in Sweden . . . Bourbon is the only naturally colored whiskey because federal law states that it cannot be labeled bourbon unless it has been aged in new charred oak barrels. The color varies with the length of the aging . . . This is the season for the Golden Gloves amateur boxing matches in many parts of the country. It started out as a sports promotion of the New York DAILY NEWS in 1927 and was at that time limited to boxers of New York City. Many of the great ring champs started there . . . VARIETY headlined a story: "Shoestring Pays Off." Shoestring is the name of a theatre in Minneapolis and not a race horse. Can you tie that?

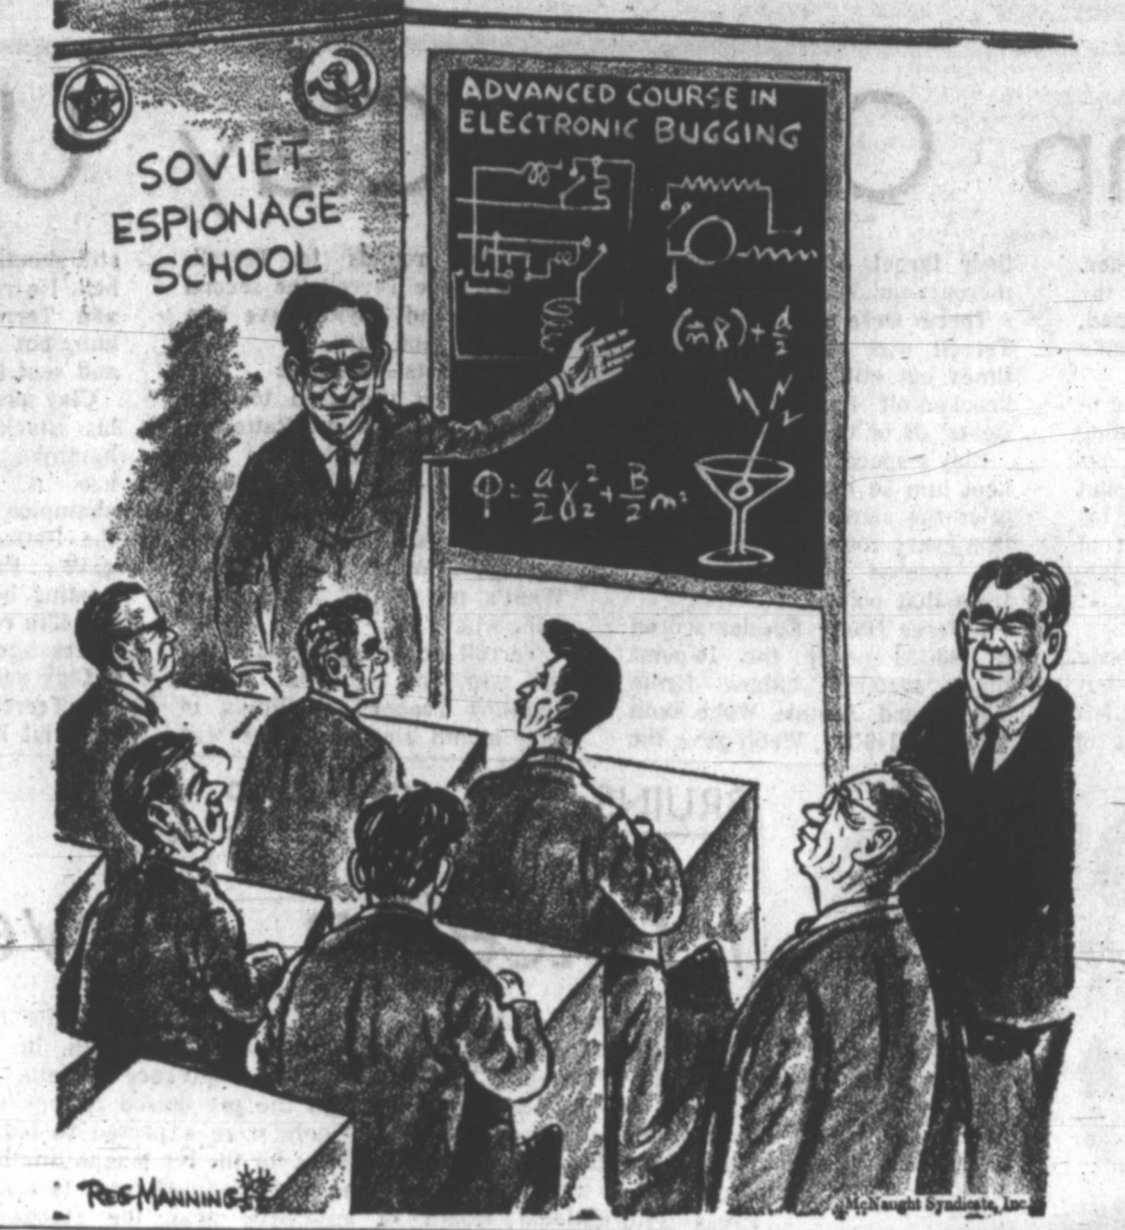

Country Editor speaking: "Parents are among the hardships children must endure until they become parents themselves."

angel of mercy been putting us on? Do you suppose she can't REALLY fly like that?

And this handsome knight who gallops up and down the street on a white horse to pow away dirt and grime with a flick of his shining lance. Is there a possibility he can't REALLY do it that easily — that he may have to use a little elbow grease, too?

Such disillusionment is hard to take. Next thing you know, they'll be hinting that Santa Claus doesn't really come down the chimney!

U.S. Intelligence Says 11 Russian Cosmonauts Die in Space Disasters

ROBERT ALLEN

PAUL SCOTT

WASHINGTON — Space and missile accidents in Russia are causing far more deaths than those in the U.S.

On the basis of latest U.S. Intelligence data, the Soviet has lost at least 11 cosmonauts since its first space flight in 1960, which was unsuccessful.

This has never been publicly admitted, although all the pertinent facts are known to U.S. authorities.

Significantly, five of the Russian cosmonauts were killed when their spacecrafts failed to get into orbit after reaching heights of several hundred miles.

No U.S. astronaut has been lost in flight. The only deaths have been in accidents on the ground and in plane crashes not connected with the space program.

Sensing The News

By THURMAN SENSING

THURMAN SENSING

Twisted Stories

The tragic flash fire in which three young American astronauts lost their lives is a terrible reminder of the unequal burdens of patriotic endeavor in this era.

At least, they should be regarded as heroes. Yet the sad truth is that American heroism is consistently downplayed.

How different the situation is from a few years ago when the television networks and liberal journals were doing their best to attribute heroism to the entire "civil rights" movement.

Under discussion by an inner Administration Intelligence committee is a proposal to provide the House and Senate Space Committees with publishable CIA findings of such Russian mishaps.

Also being deliberated is submitting to these committees during their inquiries of the Kennedy tragedy a report on the 11 Soviet space deaths. One purpose would be to demonstrate that the U.S. space program is still by far the safest.

How to Address Our Lawmakers

You may wish to write your senators and representatives in Washington and Austin. Here are their addresses:

- Rep. Bob Price, 1323 Longworth Bldg., Washington 25, D.C.
- Sen. Ralph Yarborough, Senate Bldg., Washington 25, D.C.
- Sen. John Tower, Senate Office Bldg., Washington 25, D.C.
- Rep. Majour Abraham, House Bldg., Austin, Texas.
- Sen. Grady Hazelwood, Senate Bldg., Austin, Texas.

World Almanac Facts

The Kremlin in Moscow is a great triangular citadel about 1 1/2 miles in circumference. The walls, dating from 1492, are 12 to 15 feet thick and 30 to 50 feet high, says The World Almanac.

In short, something is very wrong about the way the story of our national life is told. Americans should know about their heroes, not simply the draft-card burners. They should see fanatics as fanatics, not as martyrs who make a career of "sit-ins."

A single Harrison Salisbury goes on a guided tour of North Vietnam, writing scare stories,

The Doctor Says:

By DR. WAYNE BRANDSTADT
Red Blood Cells In Urine
Calls for Fast Diagnosis

Q—What would cause double vision? Could a blow above the temple do it?

A—The most common cause of double vision is a paralysis of one of the muscles that move the eyeball. A blow would not be likely to cause it unless it was heavy enough to cause a skull fracture.

Q—What causes macular degeneration? Does it result in blindness?

A—Macular degeneration is a destruction of the point of central vision in the retina. It may be caused by an injury to the eye or advanced age. Since there is no treatment for this condition the vision lost cannot be regained.

Q—My doctor found red blood cells in my urine. He has ruled out any disease of the kidneys or prostate. What other conditions could cause this?

A—The most likely other cause would be a disease of the bladder. Less likely possibilities include leukemia, purpura, scurvy and homophilia. I would advise you to have a cystoscopic examination without delay because blood in the urine is never to be taken lightly.

Q—What would cause albumin in the urine? What diet should I follow to get rid of it?

A—The commonest diseases that might cause albumin in the urine are nephritis (bright's disease), heart disease with a leaky valve, leukemia, purpura, scurvy and poisoning with mercury, lead and other chemicals. In adolescents and young adults albumin may appear in the urine after prolonged standing. For this condition, known as orthostatic albuminuria, no treatment is necessary. It is not a threat to health and disappears in time.

For the more serious conditions the treatment would depend on the cause. The protein intake should not be restricted unless the daily output of urine is scanty. Since scurvy is caused by a deficiency of vitamin C, adding citrus fruits to the diet will cure it. In some of the conditions listed it may be necessary to limit the intake of salt.

Q—What is bunsenoid gives for? Are there any bad side effects?

A—Bunsenoid is a combination of sulfur and clay bentonite. It is used in prescriptions to increase the rate of absorption of other drugs from the digestive tract. Bunsenoid lotion contains several added ingredients and is used in the treatment of acne. It may be irritating to very sensitive skin.

and the administration reacts by announcing that the heart of Hanoi is a privileged sanctuary. Why aren't the voices of the pilots who have flown over North Vietnam and faced fire from Russian missiles and anti-aircraft guns jammed into supposedly "civilian" areas?

Often it seems that the authentic voices of the American people — of the reasonable majority — are unheard through the clamor of professional left-leaning dissenters — the oddballs and the "Beat" element.

Consider the situation in which Gov. Ronald Reagan of California finds himself. The board of regents in California, which operates the state university system, votes "no confidence" in Dr. Clark Kerr, president of the University of California at Berkeley. Immediately Gov. Reagan is the victim of a nationwide liberal lynching effort.

Too Much Gamble in Space Race

By RAY CROMLEY
Washington Correspondent
WASHINGTON (Nea) — The

tragedy of the space program is that too little of the money and scientific manpower have been put into basic research and state of the art research.

This would not have prevented accidents such as that which caused the death of astronauts Virgil Grissom, Edward White and Roger Chaffee. But it would have made them less likely.

That is, too little effort has been put into learning more of the physical laws governing space flight, electronics, gravity in space, the interaction of different sensors with electronic and mechanical components.

Too little is known about gas-to-finding the principles needed for developing superior components or into the basic relationships between components in systems as complicated as those used in rockets and space-ships.

Too little is known about gases, including pure oxygen and its characteristics. Too little is known about sparks and their effects under differing conditions.

Too much of the effort has been in developing actual rockets and spacecrafts. Too much of this has been by cut-and-try methods. There has been insufficient knowledge of how the gigantic craft will perform in practice. It costs too much — sometimes \$100 million a throw or more — to run a long series of fullscale unmanned tests with the actual rockets and spacecrafts.

Says one space scientist: "We have therefore been working so close to the state of the art — that is, so close to the limits of our knowledge — that mistakes and accidents were bound to occur."

A greater diversion of funds into elementary research would not have slowed the space program. It would have speeded up the pace.

If there had been parallel research on both liquid and solid fuels for the big Saturn space rockets we would be considerably further ahead in space.

We moved ahead on liquid fuels. To the men who made the decision, these seemed the best bet at the time.

For relatively little extra expense, parallel research could have been continued on big solid fuel motors.

This extra state of the art research would have saved a great deal of money — and time — in the long run.
