Typewriters ceased, the big press came to a halt and the linotypes stopped automat-ically. The feast lasted three and one-half minues, with Mrs. Gibney and Howard Hamilton jumping the gun about thirty seconds. Mrs Guthrie was immediately elected vice president, editor, general manager and shop foreman.

Just how Ed. got a gallon of ice cream in his mou'h all at one time is probably just another of life's little mysteries. That fact, not withstanding, Mrs. Guthrie and ice cream should be wecome guests in anyobody's newspaper

REBELS ARE STILL IN **CONTROL OF SPANISH** MOROCCO

BY ALEXANDER H. UHL. ted Press 1986, by Th

MADRID, July 20.-The government today announced itself "master" of the situation in Spain after loyal forces, using artillery and bombing planes, had blasted rebellious capital garrisons into submission.

However, rebel troops, apparently under the leadership of the rightist general, Francisco Franco, were reported in control of Spanish Morocco where an insurrection with rightist tendencies broke out Friday. More than 1,000 army officers were announced as under arrest by their commands in Madrid by order of the government.

An official statement said province after province was announcing its submission to the central government.

Sources outside Spain said control over southern provinces had been gained by rebel forces, some of which had crossed into the penin-sula from Spanish Morocco.)

The government declared the rebel columns in Segovia province had been scattered by a loyal air corps attack which drove them back toward Miranda with numerous losses. In a victory announcement a government spokesman declared: "Spanish citizens: the movement in insurrection has been subjugated absolutely and it is necessary not to

(A)—Former King Alfonso of Spain suddenly departed today with a large amount of baggage for an unannounced destination.

The deposed monarch had been living in a castle on the Czech-Hungarian border as a guest of Count Zamoyski.

When he disappeared today he was accompanied by the count. All day yesterday he sat at a radio trying to catch the bro cast from the rebel-operated sta-tion at Seville. A responsible source disclosed that the castle radio was tuned in on the station through out the day.

A friend said it was possible Alfonso was heading for Koeningswart near Marienbad, where an other friend, Count Metternich, has a castle.

An inquiry at Koenigswart, however, brought the reply that no one was expected there.

Speculation was aroused as to whether Alfonso might be head-

They enjoyed the fun of seven vacation days arouund the Great Lakes on board the S. S. North American-sight-seeing, deck-promthe expenses and keeps them supplied with salary checks.

They left Oklahoma City July 10 and began their cruise of the lakes the next day from Chicago. The first few days they spent buggyriding at Machinac Island, throwing nennies to the Indian diving boxs at quaint Parry Sound, and watching Georgian Bay's thousands of islands and inlets from their deck chairs.

It was Buffalo and Niagara Falls Wednesday, and then they boarded ship again for return voyage to Chicago. Today they were back at their counters and cash registersall ready to get down once more to the serious job of selling.

# Life is more precious than pennies

• Shocked by the death of so many peoplebewildered by the scores stricken-America wawoke two years ago to the realization that a new menace threatened the health of our Nation.

Here, in a land where modern science has wrought so many wonders - where citizens boasted of a higher standard of living comfort than any other nation - men, women and children were suffering intense agony and dying of amœbic dysentery caused by faulty plumbing.

Doctors, nurses and hospital attendants worked ceaselessly to relieve the suffering, to save lives and to prevent the spread of this insidious malady. But their work means little today and those precious lives were lost in vain, if we neglect our solemn duty to remove forever the real cause of such a tragedy.

Health Authorities agree that the immediate cause of this epidemic and the contributing cause of much sickness can be traced to faulty, improperly installed plumbing. They are waging a vigorous campaign to warn the public of the danger that may result from trusting the important matter of plumbing installations and repairs to the uncertain hands of a "handyman." Millions of dollars are spent by municipalities to insure fresh, pure, filtered water delivered

in mains right in front of your home. What

happens to this pure water inside your home depends upon your plumbing. Improperly installed fixtures, faulty piping and cross-connections can contaminate or pollute water which may cause sickness and even death. And life is more precious than the pennies you might save using untrained men.

Health Authorities will tell you that it is unwise to trust the plumbing in your home to incompetent hands. Guard against danger by insisting that your plumbing must be inspected, installed or repaired only by the men best qualified by training and experience to protect your health-the Master Plumbers. Their work is so important that states and cities have laws not only regulating the installation of plumbing, but setting a standard for the Plumber himself.

In many states, Master Plumbers are examined as to their qualifications, licensed and registered. Most of the sanitary laws protecting public health and insuring the highest standard of professional skill have been passed through the nsistence of the Master Plumbers themselves. More than ever, "the Plumber protects the health of the Nation.'
