Sacramento (AP) - Califor-

nia's modern and sophisticated highway program, which has built 16,000 miles of state highway, has discovered it can't get along without a tool it long ago declared obsolete; the mule.

Six mules and their skinner are helping division engineer Don Foster with a research projuct along California 89 near Lake Tahoe in El Dorado County.

Foster is using the animals to carry rocks up a steep slope to line diversion ditches which will carry snow-melt runoff around a section of the slope being used for erosion research. The engineer said he could

use a truck or tractor to haul the rocks, but the tires of such a vehicle would cut a rut which would aggravate out his research project. The mules, which usually

SUFFERING IS A RESULT

When Robert Ingersoll said, "Suffering is not a punishment it is a result, he was merely stating a well

known fact. And, because many of our readers are C hiropractic Laymen, we would merely be stating a fact known to you,

should we say that suffering that comes with disease is a result of subluxated (slipped) vertebrae and of violation of hygienic rules. You have learned that fact in the school of your own personal experiences. Now many of you, at the first sign of physical suffering, get relief in Chiropractic care. Many of you avoid such suffering by having periodic Chiropractic examinations and whatever care such examination proves to be nec-

essary. How much less suffering there would be if all people knew, that while suffering is a result, health is also a result -- the resuit of Chiropractic Care, combined with hygienic living.
