MINERAL WELLS-May 30. (AP)

Morris Norton, Wichita Falls ace and tournament favorite. blasted the Mineral Wells Country club course record with a 67 today to enter the finals of the West Texas Golf association tourney.

Norton, however, needed all his brilliance to overcome Jimmy Walk-Fort Worth Star, who fired a 68. tying the old record held by Al Espinosa, professional, and beating Norton's score of five under par 72 gave him a 2 and 1 victory over

LOUDER THAN OUR WORDS!

CENTENNIAL IS The local Centennial had its birth in the Junior chamber of commerce The three-year celebration plan was THIRD PL uggested by Archer Fullingim who as general chairman of the 1934 HAS PRODUCED PAMPA FIRST TOWN IN STATE TO OBSERVE

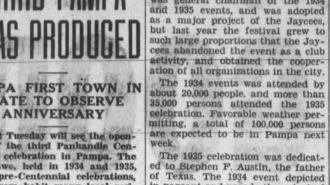

Next Tuesday will see the open-ing of the third Panhandle Cen-tennial celebration in Pampa. The first two, held in 1934 and 1935, were pre-Centennial celebrations. and from habit many local residents still refer to the 1936 event as the "Pre-Centennial."

The 1934 Pre-Centennial was the first celebration in Texas that com-memorated the hundredth anniversary of the founding of Texas and it received state-wide and national attention. It was the first Centennial celebration of any sort held in Texas. Pampa received columns of publicity as a result of the 1934 and 1935 shows.

The local sponsors believed it yould bring about a closer relation between the Panhandle and other parts of Texas, and rid the state of much sectionalism, and probably knock the chips off the shoulders of down-state and West Texas leaders-chips that caused them to criticize each other. It is 'believed that the Pre-Centennial events did much to cause the Centennial to be

PAGE TWO

FREEDOM OF PRESS FUNDAMENTAL

History affirms the assumption of dictators that the press can be the worst enemy of oppression, of dictators, of autocracies. Current examples are so plentiful that to mention Germany, Italy, and Russia seems sufficient.

English-speaking peoples are the greatest champions of freedom of the press and of speech. They have fought for the principle. They have written it into their constitutions. And today, partly because of this fact, they are the freest peoples in the world.

The greatest champion of this freedom, and the man who made a profound impression on the Colonial Ameri-icans, was Thomas Erskine, afterwards Lord Erskine and icans, was Thomas Erskine, afterwards Lord Erskine and the man icans of Creat Princip Lord Chancellor of Great Britain.

His first case related to the freedom of the press and he won it to the astonishment of all who knew about it. Nearly everyone in England who was at all interested did There are others, however, which Q. Please describe the phoebe. know about it, for in the early days the courts were a flow north for a part of their course. C. S. principal medium for the circulation of news, especially pamphlet form and widely circulated. There were few of the North in Minnesota and a dark crown, wings, and tail, and Europe any day. Will you follow newspapers.

At the age of twenty -eight, Erskine was called up to defend Captain Baillie, the lieutenant-governor of Green-wich Hospital. A rule had been issue against Baillie to mobile racer, born in this country? show cause why he should not be prosecuted for criminal D.M.B. show cause why he should not be prosecuted for criminal D.M.B. show cause why he should not be prosecuted for criminal libel. In a sort of pamphlet Baillie had charged the Earl of Sandwich, first lord of the Admiralty, with introducing of 9. On obtaining American citiinto the Greenwich hospital a large number of landsmen, zenship, he changed his first name lenses. It was the scene of a dis-astronic lenses of a dis-astronic defeat in the hospital was a ostensibly as patients or as servants. The hospital was a from Raffaele to Ralph. ostensibly as patients or as servants. The hospital was a charity devoted exclusively to disabled seamen. Sandwich, it was charged in the pamphlet, gave the landsmen soft berths in the seamen's hospital so he could control their ing? E. M. votes in a Parliamentary election.

It took a bold men, especially one only 28 years old and with his first case at bar, to oppose anyone so form-mates of the National Safety coun-cil, in 1935 no less than 3,400 auto-mobile drivers and pedestrians who removed to Italy, and they never idable. Superficially, the Earl of Sandwich did not appear were classified as intoxicated or had afterward met. as a party to the case, but young Erskine dragged him in. He said that the Earl was using his power to suppress publication of iniquities which should be exposed. He made buildings of New York City? M. R. St. James which was built on the Sandwich, by his address to the court, at least publicly. A. An estimate of the American site of St. James' hospital for leprous Sandwich, by his address to the court, at least publicly, if not technically, a party to the case and a man conspiring to restrict the freedom of expression. Erskine won the steel are in service in the buildings clected to the Hall of Fame, at New case and, it is told, as he left the courtroom, 30 retainers were pressed upon him. His fee for winning this, his first were pressed upon him. His fee for winning this, his first Q. How many one-room school-is the first Canadian whose bust has case, was 1 guinea-about \$5.

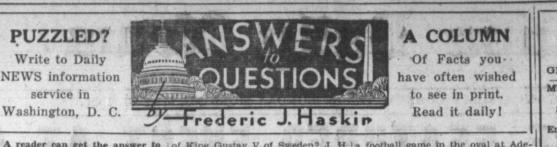

Again, in the case of the dean of St. Asaph, the ques-States? L. R. S. tion of freedom of the press came up. The court insisted that the question involved-a pamphlet which the Dean had published allegedly containing objectionable matter should be determined by the bench. In a notable argu-schoolhouses. ment, Erskine insisted upon a trial by jury as the safest protection of the press against tyrannical oppression. He won his case.

But the greatest of all his cases bearing on the question of freedom of the press, of speech, of expression, and indeed freedom of thought was The King versus Hardy.

It was the period of the French revolution. The excesses of the French revolutionists, the death of the king and the French royal family so alarmed the British crown and adherents that a 'sort of reign of terror, in reverse, was instituted in England. The writ of habeas corpus was suspended, authorization was given to arrest on suspicion and hold without bail persons believed to be disaffected against the throne, and other oppressive measures were taken to halt any republican movement in England.

It appears that there had grown up a number of political debating societies interested in reform. They issued many pamphlets and many speeches were made. There was not question of an armed rising, no evidence ever was adduced to that effect. What these societies desired was reform by the ballot. But with the French revolution raging across the Channel, the King of England and the aristocratic party were fearful and resorted to oppressive measures. The members of these reform societies and any other persons interested in reform were held to be guilty of what was called constructive treason with intent to encompass the death of the King. One man, one Robert Watt, already had been tried and summarily convicted for his opinions and hanged. It was then that Erskine was brought into the case. Incidentally, it is interesting to note that, in the ethics of the English bar, no lawyer ever accepts a fee for defending a man on a charge of high treason. The Crown had become increasingly alarmed and the penalty was stiffened from mere hanging. Convicted persons-convicted for freedom of press and speech and opinions-were to be hanged until nearly dead, then cut down, disemboweled, then quartered. After that dismemberment, their heads were to be stuck on pikes and publicly exhibited. This was in England only about 150 years ago. Hardy was a shoemaker, but happened to be secretary MYRA NORTH, SPECIAL NURSE of one of the reform societies-a man probably much like the famous cobbler who was the late President Coolidge's mentor in politics. All the legal forces of the Crown were arrayed against him. After the prosecution had rested having, as they thought, clinched the case, Erskine spoke for seven hours. He pointed out the dangers of curbing freedom of the press and of speech and thought, how such a curb would be more likely to lead to revolution than other courses. In the midst of this legal reign of terror. with his king and his own class against him, he won the case, the jury finding Hardy not guilty. We owe much of our freedom and our security to such men. For it is quite probable that this affair had much to do with the inclusion, in the American constitution, of a specific definition of what constituted treason, and of guarantees of free speech and press.

ALVORD, May 30 (Special) Candidates for public office who promise to "upset the established order, to wreck and tear down what has been built up over the threaten the security of years." Texans, Chairman Ernest O. ompson, of the Texas Railroad asserted this afternoon as he opened his campaign for re-

Addressing a home-coming crowd the town where he was born, Colonel Thompson urged a con-tinuation of the constructive, conservative policies in governmental regulation of industry built up over

"It is a time," he said, "for ex-perience in the regulation of the state's key industries; not for experiment on the part of those whose only qualification is a de-sine to hold public office."

1. In the field of gas utility of hole. regulation, city "gate rates" have McIlro and United. Fixing city gate rat-es, which he described as a te-with pay 3,030-90 feet. In lime, auditors by the year, so one of my first official acts was to redious process usually entailing long necessary before ratyear. In numerous Texas towns, all, named by the Commissioner, rates to the ultimate consumer al-ready have been reduced. r. In numerous Texas towns, named by the Commissioner,

2. In regulation of railroads, the Commission's record has been such that not only have rates been lowered with savings of millions to shippers, Thompson said; but the Commission has won the praise of both railroad and executives. He quoted the words of B. J. Fitz-gerald, conductor on the Frisco secently go along with represen-tatives of the railroads in saying to the citizens of Texas that we have a Commission that is do-ing the best job of any Com-mission we have had. The rail-road employes are going to be be-hind Colonel Thompson." 3. Specific freight

OLD 'CAPTURE' RULE **IS MODIFIED BY OPERATORS**

CONTROL OF

WELL FLOW IS

"The most important single dis-covery made by the oil industry since its inception was the realiza-tion that the flow of oil wells could be artificially restored without damage to ultimate productivity,' was stated recently by John M. est Lovejoy, president of the American in Institute of Mining and Metallurgical Engineers.

He continued:

gan voluntarily to modify the old rule of capture through the medium of proration and a new encident of proration and a new era" in the industry commenced. Concurrently nage.

eum engineering. During the un-restricted reign of the law of cap-merce, than in the prior 5 year ture the engineer had little chance period, comprising 74 per cent of to try out any theories which might total tonnage of Texas ports. In to try out any theories which might total tonnage of Texas ports. In lead to greater ultimate recovery 1930, oil and oil products made up but with the introduction of pro-ration, scientific production methods were required and soon the petrol-eum engineer became an essential proportion to 84 per cent. During the period from 1920 to group within the industry. The engineer, in conjunction with the progressive operator, has made the production of oil a true scientific mining operation. During the period from 1920 to 1933 many other important changes occurred; it is to be remembered that total Texas port tonnage in 1933 was the greatest of all years up to that time. By 1933 oil imports

"Commencing in 1926 as a tem-porary expedient, voluntary pro-gible and exports of oil and oil prowas adopted as the means ducts had decreased to a little more duction to flatten the too frequent peaks of flush production which were so up-setting to the stability of the indus-ducts made up 62.4 per cent of total total tonnage. to be making 1,500,000 cubic feet of carbon dioxide gas. On the basis of this showing, a flush production which were so up-setting to the stability of the indus-ducts made up 62.4 per cent of total try. The period from 1926 to 1931 port trade.

proved to be one of almost con-tinuous new discovery and once from Texas, of oil and oil products

About 200,000 Agencies Col-lect From Business—Per-centage of Profits is Low. HOUSTON, May 30—The petro-leum industry was instrumental in directing to government treasuries last year more than 11 per cent of all the taxes collected by nearly 200,000 different taxing jurisdictions, national, state, and local, W. R. Boyd, Jr., executive vice-president of the American Petroleum Institute, told the Houston Kiwanis club here. In answer to the charge frequently heard that profits in the oil industry are too high, he pointed out that for three-quarters of a century there

BUFFALOES AND BUFFALO SKINNER

Twas in the town of Jacksboro in the spring of seventy-three, A man by the name of Crego came stepping up to me, Saying, "How do you do, young fellow, and how would you like to And spend one summer pleasantly on the range of the buffalo?" we've crossed the Pease River; our trouble have begun. The first damned tail I went to rip-Oh how I split my thumb! While skinning the damned old stinkers, our lives wasn't a show For the Indians watched to pick us off while skinning the buffalo The season being over, old Crego he did say The crowd had been extravagant, was in debt to him that day. We coaxed him and we begged him, but still it was no go-We left old Crego's bones to bleach on the range of the buffalo. -Frontier song of "The Buffalo Skinners'

BY J. FRANK DOBIE

WHEN the Spaniards discovered Texas, buffaloes ranged clear to the coast and eastward perhaps to the Sabine. I remember reading in some old chronicle, which I am now unable to locate, that one year Austin's colonists drove the buffaloes out of the country in order that their unfenced corn patches might not be molested In the forties Bigfoot Wallace chased the last buffalo of the vicinity through Austin right down Congress Avenue. But the great range of the buffaloes was the Plains, where 20,000 years ago Indians whose dwelling places are yet to be traced along the Canadian River

in Texas, hunted them, ate their flesh and made use of their hides; where for centuries the Comanches and other tribes followed them; four hundred years ago@ where Coronado marked his route with Frank Collison had frequently, un

It is the buffalo and its hunting that concerns us. Weeks before the Battle of 'Dobe Walls, Billy Dixon had taken his two skinners, Frenchy and an Englishman named Arm itage, and camped on a creek now known as Dixon. To quote from his narrative: "The season, was lightful. The air was fresh and invigorating; the grass green flowers were blooming: the sky was feeling of joy and happiness every-, where. Those were splendid nights, out there under the stars The mornings came with dazzling splen-dor. At this season sunrise on the But the location about which Tex- plains presented a scene magnificence. "There are two hotels, a restau rant, three general mercantile establishments, an excellent hardware and furniture store, two banks, a drug store, three lumber yards, a livery stable and feed yard, tin shop, blacksmith shop, meat market and various other en-

terprises." The two paragraphs above are excerpts from a pamphlet of 64 pages, published by the White Deer Land company in 1908, describing the lands owned by that rompany. The names of Frederic de P. Foster and Cornelius C. Cuy-ler appear on the title page, they being the owners of the land de-scribed in the booklet, with the names of T. D. Hobart, agent and attorney in fact, and M. K. Brown, sistant. The emblem of the company appears on the cover, between "White Deer Lands" and "Panhandle of Texas." 'It will be a surprise to pat-

rons of the modern pupblic library here to learn that Pampa once pasted a public library along with "an excellent public school and an efficient corps of teachers". There were no Kiwanians here at that time, but theer were "fraternal organizations represented by three lodges." In view of the present road network, a chuckle i invoked by reading the state-ment that "good roads extend for

miles in all directions." Pampa is a new and growing town located on the plains and commands a very extensive trade. Its surroundings are such that the drainage problem is very simple." That last sentence will be welcome news to the engineers who are now puzzled as to how best deal with flooded streets when Pampa is treated to a cloudburst. County finances were no great roblem of those days, the pamhlet stating that the county treasurer of Gray County, writing nder the date of Dec. 31, 1903, any kind", and that on November

1907, the county had on hand n cash \$13,000. opography, towns, and other data of interest to prospective citizens onials are given a proment place and the booklet is copusly illustrated. Back of the wings would carefully by mounted mustangers, asked the strange mustanger what be waiting riders to close in behind was closed up with posts already he meant by driving those horses, the mustangs, As they came near prepared, so as to form a perfect Then he showed Bob the brand on the pen, Bcb-still in the leadprepared, so as to form a perfect inter he showed abor the brand on the perit, Bor som in the read-and continuous inclosure, impos-the stallion and the mates and as-would increase his gait, finally en-trojan horse, to break through or escape from. The numbers caught three years. The supposition was were frequently so great, and con- that Indians or other horse thieves gate held open in readiness and sequently their value so trivial, that had driven them far out of the closed as soon as he had passed they were often sold for a dollar, country and lost them and that through it. taken in quantity, of course some mained on the new range, taking ped, the mustangs, terrorized into

As a general rule, after a manada of mustangs had been dogged for a week, Bob Lemons found them tamed down enough for him to somewhat direct their course. Within another week he was usually able to take charge, assuming the leadership that their stallion formerly bore. His aim now was to thoroughly ingrain his mastership. This might take him two more weeks. Instead of following the mustangs and driving them, he gradually came to lead them. He knew their wants and habits, and he sought to lead them in such a manner that they would trust his judgment. He led them to the best waterings and to the green est and choicest range.

At night he unsaddled in front of them and, with his horse pic keted right at his saddle or pallet, lay down to sleep. The mustangs had a great desire always to get up to his horse. He knew well that the stallion got to his horse he would kill him or run him off. The mustangs, though they had grown so used to this man on horseback that he could move very near them and among them so long as he remained mounted, would keep their distance when they saw him afoot. Nor would they attack the saddle horse so long as the man was upon him. Now and then, however me old fierce stallion would rush

upon a horseman. Bob slept lightly. Many a time was aawkened at night by a nicker. He could tell that either the stallion or some of the mares were trying to leave and were calling the other mustangs to come along. Generally some of the others, would not want to leave. They had given in the manner of females-loyal alegiance to this leader on horseback and were not willing to turn from him. When Bob was awakened by a restless nicker, he would at once saddle, round up the manda-as a stallion rounds up his

unch—and go "pa'ahi." Thus day after day and night after night the lone man and his manada lived upon prairie and in thickets. If they came near so thing suspicious like a road that held the smell of a human being, Bob would appear to be as much excited as the mustangs and lead them away in a run.

At last, after weeks of living in olitude with the wild horses and having so mastered them that he felt confident of being able to lead them where he wished, Bob would communicate to some rider lurking on the range that on a certain day he would take the manada-into the

tions. It is therefore entirely logical and in harmony with our do mestic policy to place a limitation upon imports. In fact, there are many people who feel that as long as domestic production must be cut down so drastically that

imports should be shut out alto-gether: We are not asking for an embargo, however. We are merely asking that sufficient restrictions be placed on imports as will en-able the domestic petroleum industry to more successfully ad-vance its program of a balance between supply and demand. In oth-er words, that American capital, Americal labor, and American landowners be given a fair chance to about the benefits which accrue to this country by bring would the addition of the oil production of another Kansas.

MANY STATES **REGULATION OF OIL INDUSTRY SPREADS TO** rigid enforcement of all such rules

INEFFICIENT METHODS HIT AS CONSERVA-TION STEP

(Following is an address of J. D. Collett, oil operator, on the present status of the industry with respect to regulation.)

Time will not permit of a history of the efforts, within the various states to enact and enforce conservation laws relating to oil and in order to summarize briefly the ervation legislation.

Twenty-three states now have statutes that in some way pertain control over the drilling of and practically all of them require

Waste of gas in the Texas Pan-to the "cut and fit" method. We have reached the stage is Only five of the states have proof crude oil. California exercises

STATE

would be totally impractical and urdensome in another. Fortunately a great deal of the oneering work has been done in most of the important producing states. A slow and tedious part of this pioneering was the task of convincing the various boards and legislative bodies that conservation laws would be beneficial to the industry and further that they were

in the public interest. Securing the support of the producers was even more difficult and was a gradual process. It was a "bitter dose" the old time producers had to take when they were called upon to abandon the old and wasteful methods of big flush production and the accompanying quick profits and naturally they were slow to accept any new plan which promised greater ultimate production, but also greatly delayed the realization of profits.

Much experimenting has of course been done, as in every line of ad-venture and it follows that some mistakes were made but the trend ras. It would seem, however, to be has gradually changed and the demand has become more insistent sent status of oil and gas con- for adequate, reasonable and fair legislation in the states regulating oil and gas production.

and

visions for prorating the production just and reasonable conservation waste. It is to be hoped that other responsibility; that of conserving laws is recognized as essential to states can be induced to adopt the the source of their greatest income. It is a matter of common knowledge that oil and gas and the various products thereof provide more than half of the entire tax revenue of several of the states and and wasteful depletion of oil and gas resources would mean financial or gas out of a production state but ruin to those states and leave to

> posterity a burden it could not shoulder

prosperity of the oil and gas bus-iness is the greatest factor in the general prosperity of its entire cit-izenship and, by the same token, when prices of our products de-cling to a minimum and detailor cline to a minimum and development work stops-the loss of revenue to producers, to land owners, and the consequent drop in revenues to the state, means sudden and serious depression.

Thousands of land owners have oulled through long drouths, crop failures, declines in cattle prices and the prices of farm products reason of lease by rentals paid them by optimistic oil and gas producers, who were carrying their eases on from year to year with the hope of developing them at a future time.

Another matter of interest to the state lies in the constant threat to their domestic production from imported petroleum and its products. No state has authority to prevent the shipment of imported crudes or products to refineries within its borders or to its industrial consumers The volume of such importation might reach the point of almost or complete annihilation of its local producers but the state could, on its own intiative, do nothing about it. can, however, and should lend its support to the effort to secure federal regulation of imports, restricting the importation of foreign crude oil and products to some reasonable percentage of the domestic demand.

Without this protection the menace of having the entire market for domestic crude and products upset and demoralized by excessive imports will continue to exist.

The states have by this time had opportunity to observe the protection afforded them and the indus- the industry at large through de-(S. 1190) in preventing the ship-ment in interstate and foreign duced in violation of state laws. DICTATORS FIND VALUABLE AND IT POWERFUL

TO MANY NOW

By FREDERIC J. HASKIN WASHINGTON, May 30.—Prop-aganda is a word which has been dinned into the ears of the Ameri-can people almost incessantly for the last 20 years. Before the World war it was seldom heard in this country and not very much in the English-speaking world, but now it has become familiar to the point of disgust to a great many Ameri-cans. It has come to be associated in the popular mind with a more or less insidious attempt to sow seeds of mental unrest and political disorder. It has come to be looked and subversive. The word propa-ganda has become a term of op-probrium to some degree,

In the year of a Presidential election, the United States is flooded with progaganda, and the American people are extremely sensitive to propaganda of every kind. The best illustration is advertising. Enough advertising will propagandize the American people into buying anything, into seeing any show, into doing things which, when the advertising propaganda is withdrawn. will cause them to wonder at their guillibility. Of all American prop-aganda probably the outstanding single example was Uncle Tom's Cabin, a work which had an enormous effect in precipitating the Civil war.

tries seethe in a veritable cauldron of conflicting propaganda and, as in the World war, the various currents of propaganda represented and sought to advance general caus-es, the cause of the Central Powers es, the cause of the Central Powers on the one hand and of the Al-lied Powers on the other, today a large number of currents are directed to the upholding of the wills and policies of dictators and the political theories they represent. Harwood Lawrence Childs, As-sociated Professor of Politics at Princeton University has defined

Uncle Tom's Cabin furnishes an excellent example of how two con-flicting sets of opinion look upon propaganda. The Abolitionists of the North regarded the book as inspired, but the people of the Con-federate South regarded it as a bit-ter distortion of facts. In Europe today the major coun-

Of the 500 horns from Texas Longhorn steers, which R. L. Far-rell, of Dallas, has prepared for display, he believes these—7 feet, 9 inches long—are the finest. One hundred years old and polished until they gleam, the horns will be exhibited in the Rangers Cabin at the Texas Centennial Exposition, which ones in Dallas June 6.

THE PAMPA DAILY NEWS, Pampa, Texas

notable instance" of Christendom, for the founders of other great reli-gions placed the same injunction upon their disciples. Austria, Hungary, Jugoslavia, and Rumania, and each has his own propaganda and method of spread-ing it. There is a substantial the propagandas and the propaganda of American political the propagandas of American political for the founders of other great reli-gions placed the same injunction upon their disciples. Propaganda is as old as the im-pulse of individuals to manage the minds of others. In the days of imperial Rome, each Emperor had those of the dictators of Ger-many, Italy, and Russia. In those one or more panegyricists whose duty it was to tell the world, usually in poetical eulogy, how great the head oi the state was. Pliny the Younger's panegyric on Trajan is perhaps the most fam-ous. In earlier Greece, it was cus-tomary to deliver panegyrics on great men but only after, their death, but Rome laid the flowery tributes of words at the feet of the living in exactly the same fashion

detail, but kome tails the flower based in the feet of the Germany, Italian, and Russian the group aganda bureaus of Mussolini, Hitler, and the propaganda bureaus of American political parties do today. But none had the effective so of that Arch-Propagandist of the generated, and the discovery that the key have created absolute dictable to the Romans, to the Cointhians, to the Cointhians,to the Ephesians, to the Colossians, to the Thessalonians, and all the other Pauline Epistles are far and away the most effective examples of proceedings of the color of the color of the color of the color of the proceeding of the color of

progaganda known, more effective even than the Sword of Islam, for

the sword is recognized as an in-strument of propaganda too. The combination of political and religious propaganda is a usual phenomena. In Germany, propa-ganda has become so important un-der the Hitler regime that a Minist-er of Propaganda has been created as a member of the Cabinet. A tenuous recognition of the politicoreligious character of propaganda is found in the circumstance that Dr. Goebbels, the present German Minister of Propaganda is general-ly (albeit secretly) referred to as Wotan's Micky Maus—in other words this Minister, a man of words this Minister, a main of small stature, is called God's Mick-ey Mouse. State propaganda has gone to extreme lengths in Ger-many where the instrument of a controlled press and every other in-strument of managing the minds of others has been brought under the domination of the dictator to the end that the minds of the. subjects shall not depart from allegiance.

Spread of Communists

But State propaganda has gone no farther in Germany than in Italy where the Fascist Press Syndicate is the mouthpiece of the Fascist Party which, in turn, although including a minority of the Italian population, supports the dictator, Signor Mussolili. Practically from the cradle, the Italian child is raised under the Fascist propaganda, just as in Germany, with the result that the hold of propaganda grows stronger each year as the older, less managed minds die off and the new ones, which have known no other management, come into their adulthood. Religious culture, every

the political theories they represent. Harwood Lawrence Childs, As-sociated Professor of Politics at Princeton University, has defined propaganda as a "conscious attempt to manage the minds of others" and, he adds, it "has always played an important role in the exercise of sovereign power." There prob-ably could be no better definition. **Religious Propaganda** Discussing propaganda Henry Wickham Steed the famous editor. Mice and state of the Sarced Proga-of the London Times, said: "The thought and deed are dominated by

of the London Times, said: "The of the Holy See. To be sure, Mr. more complicated. They too are na-most notable instance is the in-

candidates, but the fact remains that there always is at the back of all propaganda the intent on the part of some man or some party to manage the minds of others.

Princeton University's School of Politics has made deep researches in these matters and its report, compiled and edited by Professor Childs under the title, Propaganda

and Dictatorship, is a mine of fac-tual information for the student. **Philippines Start Cotton Crops** MANILA (AP) - The Philippine It is Cecil B. DeMille, the director-

Texas Panhandle Centennial Oil Men's Reunion - Pampa, Texas, June 2-3-4-5

Skelly Oil Company avails itself gladly of this opportunity to extend to the citizenship of the Panhandle country, our sincere congratulations upon the Panhandle's forthcoming celebration of the Texas Centennial and Oil Men's Reunion. We know that the occasion will measure up in every way to the Panhandle tradition of hospitality and good fellowship. The one-hundredth anniversary of the Lone Star State is an event of more than state-wide importance and the nation joins Texas in its observance.

SKELLY

The entire organization of Skelly Oil Company, and particularly its Panhandle divisional staffs, are proud that they have the privilege to bear an active part in the development of the resources of this great region.

In behalf of this Company and its entire personnel, we extend to the Panhandle and its people our thanks for the courtesies extended to us throughout the years and our best wishes for the success of the present celebration.

Women were largely responsible. for establishing the first churches and schools, and as towns began to grow, they organized and started the work of making these towns more suitable places for homes and children.

Churches Took Lead

Church societies were the first organizations. Many a substantial place of worship in the Panhandle today rests on a foundation supplied by funds from Ladies Aid suppers.

Assistance to the schools was given in various ways, until the Parent-Teacher association was introduced to this country. The first association was organized in Pampa' in 1918, just after the women had completed their World war work in the Red Cross.

Promptly, the organization equipped school playgrounds, a domestic science department in the high school, school. libraries, and music departments. Through the years its sistance to students has continued, branching in recent depression school without help.

Growth of the organization has kept pace with that of the city. Instead of one unit for a 10-teacher school, there are now six units with total membership of more than a thousand, working in the six large Rampa schools. Mrs. C. T. Hunkapillar was the first president, has been active in the entire history of the association, and was recently elected district president.

The March of Empire Has Not Ceased In Texas

S the caravans of dust-covered immigrant wagons on their westward trek dwindled in number and the frontier spaces changed from desolate regions to populated areas, the march of empire did not cease nor slacken o'er Texas broad domain.

The push of the pioneers into the land of the southwest sun provided only the tinder for the raging flame of progressive energy that was to mark the trend of Texas for a hundred years.

Up through these years the march of empire has moved incessantly. Generation after generation fell into the never ending line to carry on the building that started with the first log cabin on the plains.

The vast lone stretches became flecked with cattle.

Forty-Three Years in the Panhandle Is the Background of the Man Who Seeks Re-Election to the Texas Senate, Subject to Approval of Voters in the 31st Senatorial District

He has been conscious of the heartaches and the hardships of the Plains people since 1893 when he came to Collingsworth County as a youth. His father joined the pioneers who made growth in West Texas an outstanding achievement in the Lone Star State. For nearly a half century of the period we now pay reverence, the Small family has engaged in the greatest battle ever fought on any frontier: that of secuing recognition

Clint Small, a Democrat in spirit as well as by party affiliation, has seen into the future. His fight to conserve the region's natural resources, dividing the profits among many, has been a gallant struggle for RIGHT over WRONG.

This Centennial observance finds him pledged to a continuation of his humanitarian

This Space Contributed By Friends of Clint Small

Farms were started and settlements came into being and grew to great cities. More people came, more farms were tilled, more products were produced and then in the late sixties came the flow of precious oil and gas.

On, on, on went the march of empire. More people, more farms, more cities, more cattle, railroads, min ing, cotton, and more and more came the oil and one of the largest gas fields in the world.

After one hundred years in the march of accomplish ment, Texas has not yet arrived. The march of empire continues with but a brief pause at the century mile post to review its fortunes of the past.

1936—The march of empire marches on. . . To greater heights of attainment is the Texas formula for another hundred years to come. Maybe some day in the distant centuries, Texas will have reached its ultimate goal; its pinnacle of achievement. Today it is only starting.

SCIENCE AIDS UKUUGHI HIIS SAVING BIRD LIFE IS FUNCTION HELD VITAL

By FREDERIC J. HASKIN WASHINGTON, D. C., May 30. before in this country, never ce is being enlisted to assist Mother Nature. A realization has come over the federal government that this nation, once almost the richest in the world in wild life, has been divested of much of its ost valuable game. The story of e buffalo is well known to prac₇ tically everyone. The last heath hen has gone. The trumpeter swan near extinction and some other species, once plentiful, are either completely or nearly exterminated. The Bureau of Biological survey been in existence for years, but only recently has it been given funds and powers to take construct tive steps toward the preservation of American wild life. There is no good reason to expect that once again the United States will be a land rich in every kind of game which should be indigenous or can

readily be acclimated. While the federal government may be considered slow in taking steps toward game preservation and propagation, some of the states have been active for years. New York has been particularly active and its fish and game laws have been used as a model by other juris-

There was a time when there were no pheasants in the United States. This bird of which there are some indred species is regarded as one of the finest game birds in the world and also is valued as a food delicacy. The pheasant originates in Asia, those now in America being lescendants of a bood brought here from China. There now are a great many pheasants in the country due to no small extent to the intervention of science.

O. N. Denny, consul general of the United States at Shanghai, be thought him that he would atover 22 cocks and 20 hens and lib-erated them. This was in 1880, 1892, it was considered that there were enough pheasants to justify an open The pheasant has always had a and in that time 50,000 pheasants

GREAT LEADERSHIP

Has Been a Factor in the Progress of the Texas Panhandle

Since the days of the earliest settlers in the Texas Panhandle, great leadership has been an important factor in the progress and development that has been so notably achieved.

Great men, with the courage, confidence and vision of a greater Panhandle have played important rules in stabiliz-ing and building—in creating and fulfilling the dreams that are always the forerunner to the founding of any empire.

+

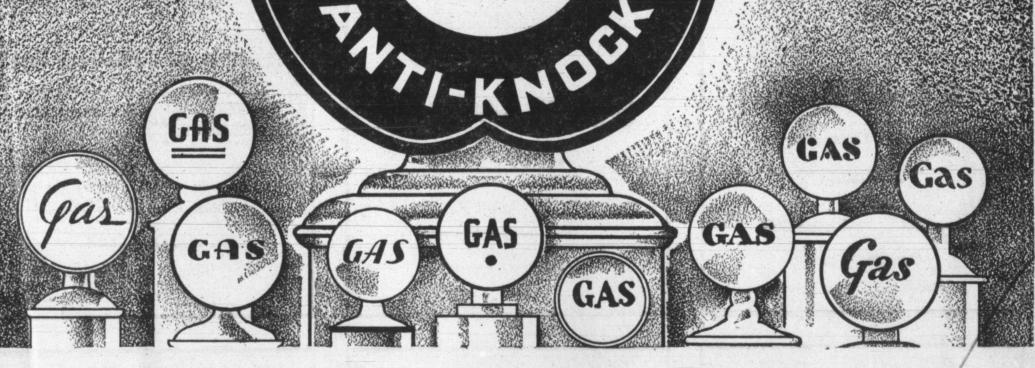

34

To the great men and women of the Texas Panhandle who have been the leaders there is due the praise of all West Texans! . . . With a continuance of their ideals, courage and vision the Panhandle will become an even greater section of Texas.

Texas Panhandle Centennial Celebration, Pampa, Texas June 2-3-4-5

And a great motor oil to GO with it!

KOOLMOTOR GASOLENE is truly a great

motor fuel because it is custom-built. Cities Service experts studied more than 500,000 running motors to get first hand knowledge of what modern motors demand of a gasolene. They found out. And they custom-built KOOLMOTOR gasolene to meet every one of these requirements. That is why KOOL-MOTOR gives perfect performance ... premium performance ... every mile you drive. There's a thrill in every tankful of this great green gasolene...a "longer run for your money" in every gallon. Try it today. More than a billion gallons sold each year.

CITIES SERVICE MOTOR OIL ... a perfect running mate for KOOLMOTOR gasolene. This rich, sturdy motor oil is refined from the cream of Mid-Continent crudes. It is processed by the best of modern refining equipment and built to rigid specifications by highly trained experts: Every drop of CITIES SERVICE MOTOR OIL resists searing motor heat, contains a minimum of carbon and will not corrode or form gum. You will be giving your motor and your pocketbook the finest protection by having your crankcase drained and refilled with this high quality motor oil today.

Cities Service Radio Concerts every Friday at 8 P. M. (E. D. T.) ... WEAF and 38 associated N. B. C. stations

-- SCHOOLS ADD TO WARD BUILDINGS AND START NEW AUD

MORE EVIDENCE of the continued growth of the Pampa community is furnished by the pictures above of three school campuses on which there is building activity.

Four-room additions have been constructed to the Sam Houston (north) and Woodrow Wilson (east) ward schools. A basement on one of the wings of the Sam Houston school will be used 'as a cafeteria.

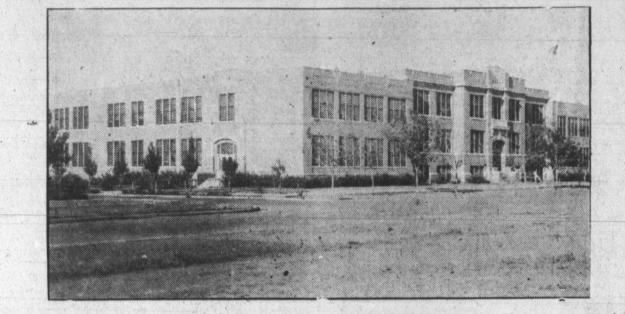

On the high school campus, between the wings of the main building, is to be completed the large school auditorium, with between 1,200 and 1,400 seats, according to arrangements to be perfected, and a large, well-arranged stage.

In each instance, the contractor is O. L. Boyington. Considerably more than \$100,000, without furnishings, is being spent in the three projects. The Pampa Independent school district voted \$50,000 in bonds to obtain a 45 per cent PWA grant for the remainder. The architects are Rittenberry & Carder of

Amarillo, who specialize in school construction and have drawn plans for scores of buildings in this section.

Mr. Boyington, too, specializes in schools and has erected many, besides such structures as the Combs-Worley building and Fort Worth & Denver station here. Besides his larger contracts, he has a number of small ones now.

New Auditorium To Be North of Administration Building

large, auditorium. O. L. Boyington, Pampa contractor, is the builder. A \$50,000 bond issue and a PWA Close by the above pictured Pampa high school will be erected a

grant nave building and the two ward school

In the school projects, materials were carefully chosen and purchased from the following firms:

General Supply company of Pampa, paints manufactured by the McMurtry Mfg. company of Denver; Acme Lumber company, Pampa, lumber; Rex Electric company, installations; V. M. Zanchettin Terrazo company of Amarillo, terrazo work; Forrest R. Barnes, Amarillo, brick; Jim Williams Brick company, Amarillo, brick; Lydick Roofing company, Amarillo; Panhandle Insurance company, Pampa, insurance.

Such well-constructed school buildings have made Pampa widely known for its excellently housed system. Recently delegates to the Panhandle district of the Texas Congress of Parents and Teachers were taken on a tour which included the four ward schools and the high school. Those who had imagined that Pampa was "just another oil town" were astonished to see the fine brick schools—as good as any on the plains and more numerous than most cities of this size can boast.

Mr. Boyington and others concerned in building the school structures take pride in building not only for the present, but for the future—sub-stantially, conveniently, without sacrificing a pleasing appearance.

East Ward School Is Enlarged by 4 Rooms

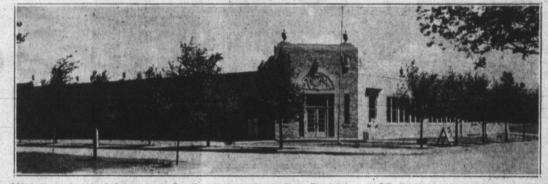

Growing enrolment at the Woodcompleted by O. L. Boyington, row Wilson school, pictured above, has made necessary a 4-room adprominent Pampa contractor. Both wings of the building were dition. This addition has just been

lengthened to provide new rooms the architecture of which matches the original structure.

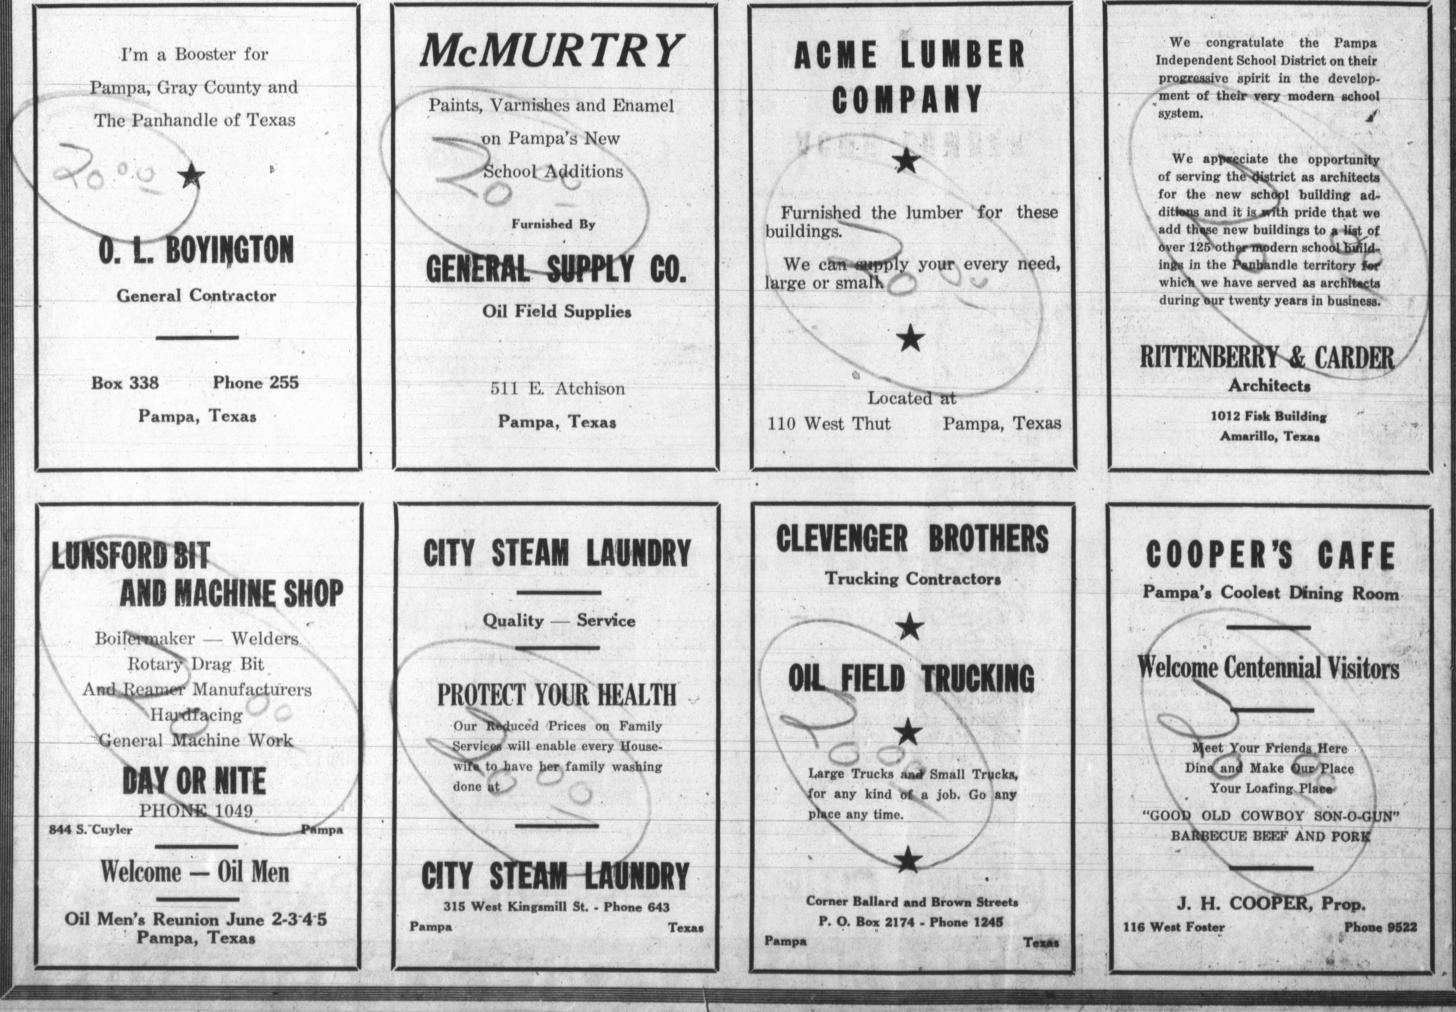

Four-Room Addition Built at North Ward

Attractive in architecture and convenient in arrangement is the Sam Houston ward school here,

Mr. Boyington also was a has been built by O. L. Boyington, Pampa contractor, a well-appoint-ed 4-room addition to handle the constructing the original

and a state

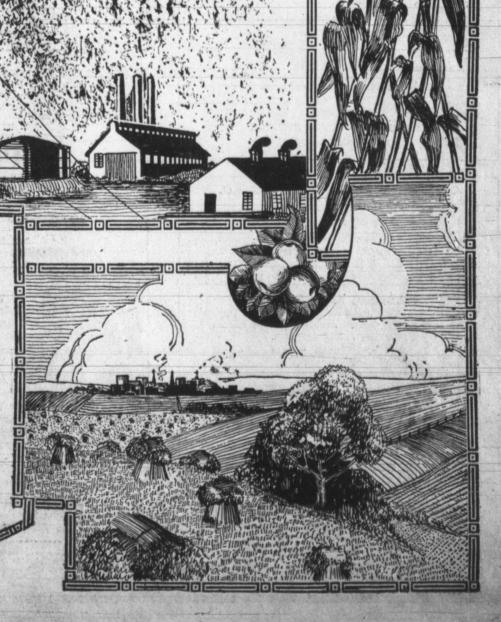

IN RESPECTFUL APPRECIATION

To the memory of Panhandle pioneers, living and deceased, whose "sustained courage" is the theme of the Panhandle Centennial celebration in Pampa June 2-5, and to the heroic men and women who during the last 100 years have developed the empire that is Texas, this special edition of the Pampa Daily NEWS is dedicated.

Within these pages are recorded deeds of the highest valor, of which Texans will always be proud. Herein, too, is the story of wheat, the story of oil, the story of livestock, and of the social organization of a people assembled from every state in the nation.

In this Centennial year, let us recognize and appreciate the vast resources of this great State and section, including the courageous and versatile citizenship.

OUAKER STATE OIL COMPANY INCORPORATED

oitten.

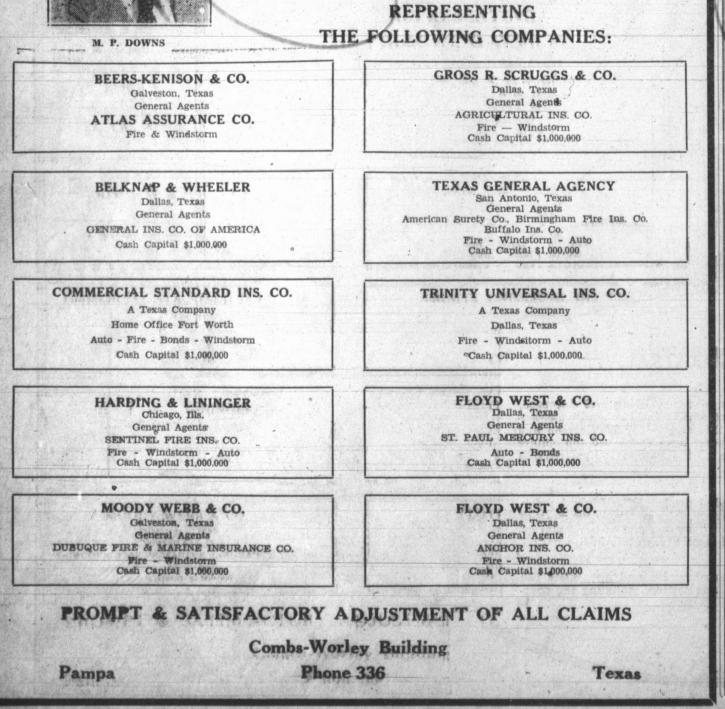

America's most photographed girl has returned to her San Antonio home for the state-wide observance Texas Centennial, highlighted by the \$25,000,000 Exposition in

Dallas. Her name is Janice Jarratt and she is as adept with a lariat as she is at modeling for cigarette and clothing advertisements.

The above cut shows the actual photograph of the Zurick No. 1 which is now being drilled by the Superior Oil & Gas Company and the Olson Drilling Company of Tulsa, Oklahoma, on the Zurick Ranch in Union County, New Mexico. The Quaker State Oil Company owns approximately 24,000 acres of leases checker-boarded around this well. The well now drilling at a depth of 1,000 feet. A number of major companies and independent operators of Tulsa, Oklahoma, have purchased protection in this block.

The Quaker State Oil Company is interested in developing large blocks of leases located on well defined structures, and also interested in developing semi-proved and proved acreage in the Panhandle and New Mexico field.

The Quaker State Oil Company is principally owned by Pampa citizens with offices in the First National Bank Building, Pampa, Texas, P. O. Box 1576, Telephone 630. All correspondence will be given prompt attention.

COMEDY OF NORTH IS STAGED IN SNOW BLIZZARD

Against a background of ice bound Labrador, Robert Montgomery and Myrna Loy are enacting one one of the funniest comedies ever screened, in the new Metro-Gold wyn-Mayer picture, "Petticoat Fever." now at La Nora theater.

Adapted from the stage hit of the same name, the story concerns a wireless operator who is so lonely that he holds prisoner two fliers, a beautiful young girl and her mate companion, whom he rescues from the Arctic night.

Reginald Owen heads the featured cast, as he blustery Englishman whose bride-to-be is snatched away from under his very nose. Other cast are Otto Yamaoka, as the Eskimo man servant; Forrester Harvey Bo Ching, and Iris Yamoaka. The brilliant direction of George

Fitzmaurice is to a large extent responsible for the unabating merri-ment of this exceedingly funny pic-Producer Frank Davis has dressed it with lavish production

and Miss Loy since their memorable first premier of the republic. vehicle, "When Ladies Meet." Each has gone far in personal popularity ferred recently with several promsince that time and improved vastly inent Poles in Switzerland, among in acting technique.

The funniest sequence in the new picture and, no doubt one of the sentence, and Generals Sikorski and funniest ever screened, is the party Haller who have been on the outs given by Montgomery for his two guests—the party for which only Veterans Deman e and Miss Loy have the courageous flair to don evening clothes while an Arctic blizzard rages outside.

Old Household Goods Are Lent

AUSTIN, May 30.-A collection of early Texas household goods has been loaned to the University of Texas for display this summer in only on account of the poverty of the University Centennial exposi-tion. A large amount came from our country and the duty to over-come it, but also on account of the Weatherford, collected through the efforts of Mayor G. A. Holland, who

has a museum of his own. A loom now owned by Miss Betty Woody of Weatherford is one of the oldest pieces loaned for this display. The loom was made of hand-shaped cedar in 1812 at Roane, Tenn., by Sam Woody, the great-great-grandfather of Miss Betty Woody. It was brought to Texas in an ox-wagon in 1848 by the maker's son, and has been in Parker county since 1850.

Mrs. A. P. Wynn of Austin loane a spinning wheel more than 100 years old. It is known as the Granny Taylor wheel and was used in Parker county many years. Mrs. Wynn lived at Weatherford before she moved to Austin, where she now lives. The whole history of this ancient wheel has not been learned. Mayor Holland sent several hideoottom chairs made in Parker coun-

out, but the mayor had them restored when he put the chairs in his

pioneer museum.

Veterans Demand Action

Serious rioting in various parts of the country has caused much concern. Lwow, Krakow and Czenstochowa were the centers of disturbances by unemployed. A more energetic economic policy is being demanded so that this discontented group will not be prey for communistic propaganda.

The Federation of Ex-Army Men passed a resolution immediately after the Lwow riots calling for " speeding up of economic life in the in 1905 and brought his family here a year later to occupy the first two-story home built

necessity of preparing proper de fense of our country." Among those who endorsed the resolution were Madame Alexandra Pilsudska, widow of the ex-dictator; Colonel Slawek, ex-premier and author of the present constitution Premier Koscialkowski and Vice Premier Kwiathowski.

Ex-Envoy Offers Program The press was almost unanimous in citing the Lwow riots as proof of bolshvik propaganda. The more than one million unemployed, the

press says, offer excellent ground for such activities. There are 450,000 registered unemployed and more than 600,000 standpoint of appearance and of upbut who are nevertheless underfed. Tytus Filipowicz, former ambaysador to Washington, presented a Discolored or cracked or peeling public works program and carried paint will spoil the appearance of ty before the Civil War by a man named Jackson. Temple Houston's Speech At Trial of Fallen Woman Noted Example of Oratory

vered a copy of an extempoat Woodward in the fall of 1889 by Col. Temple Houston, whose father Gen. Sam Houston, first pres-of the republic of / Texas. he Houston's widow will attend Panhandle Centennial here this

speech has been described swaling a jury and saving a she passed the portals to worship and has been quoted through-and to claim her rest, scorn and ut the world. Houston, who volatarily acted as attorney and obtained acquittal of his client by this oration, despite the most direct evidence of guilt, was known dur-ing the 80's and 90's and until his th as the most eloquent jury ader in the west, and the folaccount of the trail and on of Houston's address to Society is taken from an old of the Woodward News pubdiately after the oce. It since has been transinto many languages:

"Last Friday there was tried in district court at this place before Judge Burford, one of the most remarkable cases in certain respects ever disposed of in the territory. of the women of the town, (name deleted) was prosecuted for her vocation and running a awdy house. Something about the aroused the indignation of Temple Houston, who instantly and tarily undertook her case. Exure had impaired his voice and only addressed the court and y in a calm conversational tone. After referring to the legal questions involved and discussing the evi-dence, he bent over toward the jury he could almost have laid his ands on the shoulders of each, and a low clear voice closed his adss with these words:

"Gentlemen, you heard with what cruelty the prosecution referred to the sins of this woman, as if her condition was her own preference. The evidence has painted you a icture of her life and surroundings. Do you think that they were of her own choosing? Do you think that willingly embraced a life so reolting and horrible? Ah, no en, one of our sex was the uthor of her ruin, more to blame then let us judge her What could be more ently than the spectacle she esents? An immortal soul in ruins There the star of purity once glitered on her girlish brow, burning name has set its seal forever. And nt ago they reproached her for the depths to which she had sunk, the company she kept, the life she led. Now, what else is

PIONEERS THE

May A Memory of Their Work And Lives Always Burn Bright in the Minds of Panhandle People

Upon the eve of the Texas Panhandle Centennial Celebration, we pause to pay tribute to the Old Settlers who came here to find a home and stayed to found a community. Only a virgin prairie land awaited them when the came in 1836. There were no comforts and no conveniences. They had only their faith and courage to sustain them as they set about their tasks. Before them was an untried land and behind was the security of a civilization that was already established. But their hearts did not falter in spite of droughts or blizzards, privation or hunger as, calm in their own strength, they fulfilled their destiny.

There were only a few in 1836, but the scarcity of their numbers did not deter their actions or obscure their vision of what was to come. Their homes were only rude shacks or half dug outs, but the humble dwellings did not dim the love of family that glowed in each breast. Their neighbors often times lived many miles away, but distances could not diminish the ties of friendship that bound them together with bands of steel. And thus they lived and loved and had their being-working in the present, planning for the future-and by their work and out of their plans grew and developed a community.

THE PAMPA DAILY NEWS, Pampa, Texas

TOURNAMENT RIDING AND FOOT RACING ONCE POPULAR HERE

POLO AND RACING OF HORSES LATEST SPORTS

Football, now the most talked-of sport in the Pampa territory, was the first athletic competition in and around Pampa, nor was basewhich was here before foot-

Cowhands of this area had a game of their own 'way back. They ed it tournament riding. It was modified form of jousting. A line ot small rings would be strung from rotruding arms and the object was o ride at top speed along the line, picking the rings off with a spear. The rider gathering in the most ings won the contest.

Horse racing was another of the arly sports in this section. Bronco ousting was also considered a sport ore than a profession. There were ome of the greatest riders of the tion in this part of the country. One of the greatest was "Old sones," once a porter on the Santa Fe railroad. He now resides in Amarillo. It was not unusual for a passenger train to be stopped here while "Bones" (Mathew Hooks) rode a horse where large buildings now stand.

A now dead sport, excepting in schools and colleges, which thrived here for years was foot racing. Some of the hottest battles in the country used to be staged about where the Woodrow Wilson school now stands. Competition from all the towns in this part would be rought here.

Then came baseball. Pampa at that time, 1906, was one of the small towns of the country, Can-adian and Woodward, Okla, were the "cities" in a little league which also included Pampa, Miami, Higns, and Wheeler. From then on useball thrived until now Uampa has one of the best baseball plants in West Texas. Teams from Pampa four champion ships in Amarillo tournaments and took third ace in the Denver tournament last year, giving this city wide publicity. tball followed on the heels of

the national game. Now the turn-stiles click long and loud whenever the Pampa high school Harvesters are in action. More than 12,000 fans have been jamed into Harvester ium for a single game. Not only at home does the Pam-

ha team draw crowds. More than 15,000 persons saw the team play in Amarillo on one occasion. Oklana, New Mexico, and Colorado low Pampa through her football

The high school also started tball. It was followed by indeendent teams which now play over wide territory.

ourses, the game was played away back." The first course was ocated about where South Somerville street starts. It was necessary to irive over the Santa Fe tracks and around the coal chute. Later a urse was laid off north of the city.

Sixty-Second Anniversary **Of Adobe Walls Battle Is Recalled by Many Settlers**

(Editors Note: The following article was written by Mrs. Olive K. Dixon in 1917, and we are reproducing it as it appeared in the Miami Chief.)

In all the Panhandle country, perhaps there is no place so dear ily to many remaining old-timers as that section east of the town of Plemons in Hutchinson county, known as Adobe Walls battle ground. At this place was enacted one of the most stubborn and successful fights ever made by a limited number of white men against an overwhelming number of hostile In-

dians Here on the evening of June 26. 1874, a little band of white men, twenty-eight all told, went serenely to sleep, most of them out on the open prairie, wholly unconscious

Although it was only recently that that there was camped within half Pampa had its first modern golf a mile of them seven hundred murderous Indians, fully armed and on the war path, and only waiting for their favorite hour just before daylight, to surprise and massacre them as they slept.

This country was the home of the buffalo at this time. Thousands of es, armed with guns and lances, and were composed of three tribes, the Now the Country club is one of the sportiest layouts in this section and Pampa has her share of par-leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and summer and descended to the val-leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest layouts in this section leys and creeks for protection and sportiest leys leys and creeks for protection and shelter in winter. This brought the first influx of white men into the Texas Pan-the bodies of th running horses. This brought the first influx of the bodies of th running horses. Previous to the battle one of the white men into the Texas Pan-Scalps dangled from bridles, gorhandle, who first sought them for geous war-bonnets fluttered their their meat and later a still larger number for their hides, the latter retailing for three dollars each. As they were so plentiful big money could be made at the business, one man often killed fifty buffalo a day. This necessitated large transportation to carry the gains to market and bring back provisions and ammunition for the hunters, the nearest railroad point being Dodge City, glowing background. throughout the country about the Indian attack. Every horse at the Walls had either been killed or driven off dur-ing the fight, and when more could be secured most of the men went back to Dodge City. News of the battle was telegraphed to Fort Leavenworth, Kans., and the U. S. troops in command of Gen. Nelson A. Miles was ordered into the Pan-bandle

The following fall these same In-dians made another trip to Adob Walls and finding the place desert ed, they burned the buildings to the ground. Quantities of provisions, such as flour, sugar, coffee, dried fruit, etc., had been left there, but the Indians were suspicious would not use it. Besides the three men killed in

the battle there was two other killed later. Billy Olds, the husband of the only woman at Adobe Walls, accidently shot himself with a rifle while descending a ladder, and later George Huffman, who was killed by the Indians out on the open prairie This makes the five men who bod es lie there today. There is no more beautiful spo

phasis on lasting qualities which on the Canadian river than the valley where the Adobe Walls batdevelop civic personality along with tle took place. A lovely little stream, known as Adobe Walls creek winds evidenced expansion of church in-fluence here in recent years. Churches have been erected in nieghborhoods where places of worits way to the Canadian, fringed on each side with hackberry, cottonwood and willow trees, while the high bluffs on the east around ship were formerly not easily ac base the Indians so conficessi dent of victory rode that memorable June morning of 1874, still stands guard over the surrounding the First Church of Christ, Scient

ountry. Of the twenty-eight white mer who fought at Adobe Walls, only one remains alive at this time. That is Fred J. Leonard, of Salt Lake City, Utah. The writer had a letter from Mr. Leonard a short time past in which he spoke of the battle and commented on the bravery displayed by the participants.

The battle ground has been marked with concrete markers at each corner of the six-acre tract deeded to the Panhandle-Plains Historical society by Mr. and Mrs. W. T. Coble owners of the Turkey Track ranch. The corners of the buildings have been marked in the same way and the graves of the men who lost their lives in the battle are marked with simple granite monuments suitably en-

The Panhandle oil and gas field structure lies along a buried untain range known geologially as the Amarillo arch, that stends along the length of the eld, continuing in a southeast-dy course into the southwesterly on of Oklahoma, where to the surface as the mountains, at an elevaof approximately 1,000 feet sea level. The field is a lying in a southeasterly

hwesterly direction and extends from eastern Wheeler coun-ty to northern Moore county.

It is approximately 124 miles in length with an average width of pproximately 20 miles, containing

1.504,386 acres; there being 1,066,662 acres of sweet gas, and 437,724 205,545 barrels. acres of sour gas territory. The field is located in the counties of Hartley, Moore, Hutchinson, Potter, Carson, Gray and Wheeler. The oil producing area covers a belt about 90 miles in length lying on the northeast flank of the structure and contains about 198,000

The oil and gas so far encoun tered in the Panhandle Field has been found, with minor exceptions, in four separate strata, namely: the dolmite, the arkosic-dolmite, the gray limestone, and the gran-ite wash. These four formations overlie one another, and though they are normally separated one from another by impervious strata, they are inferconnected as is shown of the oil and gas from all of them was 430 pounds per square inch at sea level, regardless of the location in the field.

In the latter part of 1918, gas was first discovered in northern Potter county. Following the completion of this well, several other gas wells were drilled; however, it 200 barrels. Following the com-pletion of this well, development was, slow and was confined to the surrounding this well. At the ared surrounding this well. At 16 close of 1924 there were but 16 wells producing 1600 barrels per the produce day. During 1925, 44 new produc-ers were completed in this area., be agreed upon and selected by said back. the total daily productions to 5500 barrels.

In July, 1925, the Mid-West Exploration company completed their Laycock No. 2 well which was the first well in Wheeler county. This well produced 120 barrels daily. The Gibson Oil Company—Bentley No. 1, completed in January, 1927, for first charter brought forth no trans-1, completed in January, 1927, for 750 barrels, was the next import-ant well completed in Wheeler county.

In the early part of 1926, the Dixon-Creek Oil & Refining company completed the discovery well in the Borger pool in Hutchinson the Republic and started lay-ing rails between Harrisburg and the Brazos river. In the early part of 1926, the

ORDERLY DEVELOPING rack Oil & Gas company complet-ed their Worley-Reynolds No. 1 for 1200 barrels south of Pampa Development was confined to the south Pampa area until the lat-ter part of 1928, when the Bowers pool was discovered. Following the Bowers pool, the Marland-Finley pool was brought in. Developmen has continued in all areas Other data on the field:

Total producing acres 75,000. Producing acres per well 28,880. Semi-proven acres 198,000. Semi-proven acres per well 76.22. Number producing wells, Dec. 1, 1935, 2,597; flowing, 207; gas lift 11; umping, 2397. A later report, showing steady

development this year, appears elsewhere in this issue. Cil production to Dec., 1935,
