Hightower Defeats Price For U.S. Representative

By TEX DEWEESE
U.S. Rep. Bob Price was among the Republicans across the nation who fell victim in Tuesday's election to voter dissatisfaction with the state of the national economy, inflation, the 5 percent surtax, Watergate and the Nixon pardon. With 99 percent of the vote counted in the 13th Congressional District's 33 counties late this forenoon State Senator Jack Hightower of Vernon had defeated Price 52,871 to 38,875. That gave Hightower 58 percent of the vote to 42 percent for Price. Last election when Price was re-elected to a fourth term he received around 85,000 votes to 68,000 for his Democratic challenger Graham Purcell of Wichita Falls. Price carried 55 percent of the vote. The total vote in the 1972 congressional race in the 13th District was approximately 154,000 compared to a total of only about 102,000 in yesterday's election. Many voters stayed away from the polls. Price took his biggest licking in Wichita County, losing there by more than a 3 to 1 margin where the unofficial vote was 13,072 for Hightower and 4,763 for Price. Two years ago the Pampa congressman lost to

Purcell about 2 to 1 there. The vote in 1972 was Price 10,664 and Purcell, 21,326. Price's expected strength in Amarillo and Potter County yesterday did not hold up. He won Potter County by less than 300 votes over Hightower. The Potter County vote was Hightower, 6,586 and Price, 6,828. Price carried his own home county of Gray by 1,327 votes. The Gray County vote was Price 3,643; Hightower, 2,316. In 1972 Price carried Gray County by more than 5,000 votes over Purcell. The 1972 vote in Gray was 7,419 and Hightower, 2,117. Only about 5,900 voters went to the polls in Gray County yesterday compared to 9,500 two years ago. Hightower jumped out to an early lead after the polls closed at 7 p.m. and built up his percentage as returns came in. Price expected to gain some strength in late returns in the Randall County half of Amarillo, but it was not enough to overcome Hightower's lead. The Randall County vote gave Price 6,848 votes and Hightower, 5,482, a margin of only 1,366 votes for Price. Price received his best support from the northern

JACK HIGHTOWER...defeat GOP incumbent

tier of counties in the Texas Panhandle. Ochiltree County (Perryton) gave him 1,600 votes to only 491 for Hightower. He carried Moore County (Dumas) 1,388 to 1,314 and Wheeler County (Wheeler) 1,122 to 865.

Crop-Dusting Plane Crash Injures Pilot

A lightweight Cessna 188 crop-dusting aircraft collided with a power line northwest of Pampa at 10:55 a.m. today, causing the plane to crash and possibly resulting in a city power failure this morning.

The pilot, Stanley Coleman of Pampa, was not seriously injured, but was taken to Highland General Hospital for examination. Melvin Kunkel of Southwestern Public Service said he was unsure if the crash caused the power breakdown, which affected several Pampa homes throughout the city, but a single power line going down could definitely cause a failure, "according to what lines he got into."

Crop-dusting aircraft will normally cut through power lines in such a collision, but according to Ritchie Crawford of Pampa Aircraft Incorporated, Coleman's plane "rushed down with him when he hit the wire. Usually, the plane just cuts right through. It was just one of those things."

The plane went straight down into a barbed-wire fence, turned upside down and was totally destroyed, causing approximately \$30,000 worth of damage.

Coleman was reported to be in "good" condition at the Pampa hospital. Results of X-rays and tests were pending at presstime.

Other state candidates, running unopposed were insured another year in Austin, including McGee, Reavley, Steakly, Morrison, Douglas, and Phil Cates, state representative, 66th district. WHEELER COUNTY Hightower, 980, Price, 837; Briscoe, 1190, Granberry, 579; Hobby, 1233, Marshall, 464, Hill, 1281, Cole 411, Vasquez 2; Bullock, 1281, Rowe, 2191, 1271, Holt, 2804, Armstrong, 1307, Grier, 343, White 3232, Fisher, 468, Langdon, 1234, Cain, 394, Wallace, 1234, Steffes, 357.

HEMPHILL Hightower, 425, Price, 422, Briscoe, 469, Granberry, 349; Hobby, 505, Marshall, 290; Hill, 554, Cole, 221; Bullock, 540, Rowe, 229; James, 484, Holt, 329; Armstrong, 544, Grier, 231; White, 514, Fisher, 288; Langdon, 518, Cain, 323; Wallace, 518, Steffes, 234.

CARSON COUNTY Hightower, 1029, Price 785, Briscoe, 1180, Granberry, 592; Hobby, 1276, Marshall, 463, Hill, 1338, Cole, 404; Bullock, 1325, Rowe, 402; James, 1184, Holt, 588; Armstrong, 1353, Grier, 384; White 1281, Fisher, 482; Langdon, 1305, Cain, Wallace, 1325, Steffes 388.

It was close in Hemphill County (Canadian) with Hightower edging Price by 3 votes, 425 to 422. Hightower carried Carson County (Panhandle) by a margin of 243 votes, 1028 to 785. Lipscomb County (Follett) voters favored Price over Hightower, 662 to 325. Hutchinson County (Stinnett) went 3,509 to 2,562 a margin of 947 votes for Price. Hightower carried Clay County (Henrietta) 1,510 to 439. Hansford County (Spearman) went for Price 886 to 636. Collingsworth County (Wellington) gave Hightower 866 and Price 381. In Dallam County (Dalhart) Hightower edged Price, 578 to 488. Donley County (Clarendon) gave Hightower 639 and Price 400. Hightower's victory was a stunning upset for Price, who was seeking his fifth term in Congress from the largest congressional district in the nation.

Price, who conceded to Hightower shortly after 10 p.m. issued the following statement from Republican headquarters here in Pampa where he and his wife, Marty, received the returns last night: "I have enjoyed serving this district and deeply appreciate the support

shown by so many of its citizens for so long. I will continue to serve out my term in the same honest and dedicated manner in which I have tried to serve over the past eight years.

"My offices will remain open to serve the people of the district until January and I hope those who need my assistance will not hesitate to call upon me.

"I believe the voting statistics indicate not that my opponent received an overwhelming mandate, but simply that many independents and Republicans who had voted for me in the past were somehow disenchanted this year and did not go to the polls. This election year has been unique in many ways.

"Over the next two years I intend to keep my options open and will try to decide whether I feel the voters might want me to attempt another election effort in 1976. Maybe I will see you all again then."

Hightower, a Democratic state senator for the past ten years, in one of his brief television comments last night said:

"I am real pleased and delighted with the results. I want to assure the people of the 13th District I will go to the Congress and try to represent the whole district."

Nixon Supporters Lose Election Bid

WASHINGTON (UPI) — Five Republicans on the House Judiciary Committee, which considered the impeachment of Richard M. Nixon, have been cast from office by voters apparently disillusioned by their support of the former President.

Although other factors played a part in several of the races, the threads common to all five candidates were their roles in the eight month impeachment proceedings in support of Nixon and the fact that each was opposed by persons the candidate had defeated in the past.

Thirty-four of the 38 panel members sought re-election.

One of the biggest surprises was the relatively close margin of victory for Rep. Charles Wiggins, R-Calif. His Democratic opponent in the Orange County district which includes Nixon's Whittier birthplace had been considered little more than token opposition.

Impeachment also was a factor, although not a major one, in the unsuccessful try

for the Senate by freshman Rep. Wayne Owens, D-Utah, who opposed Nixon from the outset of the impeachment proceedings. Salt Lake City Mayor Jake Garn defeated him handily.

The losses of Republican Reps. Wiley Mayne of Iowa, David W. Dennis of Indiana, Harold V. Froehlich of Wisconsin and Joseph Maraziti and Charles Sandman of New Jersey were not unexpected.

Rep. Robert McClory, R-Ill., who thought as late as three weeks before the election that he would win easily, squeaked by his opponent to return for a seventh term.

Froehlich, a freshman who rode the tide of a Nixon landslide in 1972, also had been confident. He thought the exposure and name recognition he received as a result of the televised impeachment proceedings "very well could be a plus." But voters in the Green Bay area chose instead Robert J. Cornell, a Roman Catholic priest and history professor who came within a four percentage points of Froehlich in 1972.

TABULATING VOTES — After polls closed at 7 p.m. Tuesday, the real work began in the office of County Clerk Wanda Carter. Tabulating votes, from left, are Shirley Stafford, left, who checks with outlying precincts, while Sherry Rogers, deputy, and Doye Massie, chief deputy, prepare to tally the official count.

Gov. Briscoe Gets First Four-Year Term Easily

United Press International Texas Democrats led by Gov. Dolph Briscoe crushed Republican challengers Tuesday, grabbed one congressional seat from a GOP incumbent and increased the party's dominance from Austin to Washington.

Briscoe, denied a majority in his first election two years ago, ran up 65 percent of the vote even though he missed the final two weeks of the campaign due to a family illness.

With 97 per cent of the votes counted, Briscoe had amassed 991,554 votes to Granberry's 503,646 and 89,835 for La Raza Unida candidate Ramsey Muniz.

Sen. Jack Hightower, D-Vernon, a Baptist deacon who earned a spotless image in the legislature, defeated Republican incumbent Rep. Bob Price of Pampa in a North Texas congressional race to apparently give Democrats control of 21 of the 24 congressional seats, although races in Dallas and South Texas were still in doubt shortly before midnight.

Democrats won all nine of the statewide races, generally by margins of 60 per cent. Bob Bullock easily defeated Republican Nick Rowe for state comptroller — the only state race in which there was no incumbent.

Briscoe spent more than \$1.2 million on his re-election campaign, while Granberry was plagued by a lack of funds and the burden of being a Republican in a year his party was hard hit by scandal.

Briscoe ran up more than 60 per cent of the vote even though he missed the final two weeks of the campaign because of a family illness, and his nearest rival — Lubbock dentist Jim Granberry — conceded defeat about two hours after the polls closed. He said it was a bad day for Republicans both in Texas and across the nation.

Democrats had also hoped to unseat Republican Rep. Alan Steelman of Dallas and further increase their congressional majority, but Steelman maintained a slim lead over former State Sen. Mike McKool.

Briscoe went to the victory celebration at his Valde campaign headquarters only briefly to claim his victory and pledge to continue his "no new tax" program. He had also pledged to reduce the state sales taxes on utility bills if he won a second term.

Granberry conceded defeat in Lubbock at about the same time Briscoe was claiming victory at the opposite end of the state.

"We feel we made a contribution to government

but the national trend as well as the state trend has not been for the Republican Party," Granberry told his followers. "The people have spoken. Personally we're very disappointed, but we wish Gov. Briscoe the very best."

Democrats won all nine of the statewide races, generally by margins of 60 per cent. Bob Bullock easily

defeated Republican Nick Rowe for state comptroller — the only state race in which there was no incumbent.

Briscoe spent more than \$1.2 million on his re-election campaign, while Granberry was plagued by a lack of funds and the burden of being a Republican in a year his party was hard hit by scandal.

GOV. DOLPH BRISCOE...gets 4-year term in office

Democrats Sweep To Power Victory

WASHINGTON (UPI) — Seizing on voter unrest spawned by scandal, inflation and unemployment, the Democrats swept the 1974 elections Tuesday by tightening their grip on Congress and building new power in the nation's statehouses.

Despite President Ford's warnings of doom under a "legislative dictatorship" of free spenders, the Democrats attained more than a two-thirds majority in the House and a few more Senate seats — just short of a numerical "veto-proof" Congress. The new House also tended to be more liberal.

The two parties traded several governorships and the GOP made a surprise gain in Ohio by electing Gov. John A. Rhodes over incumbent John J. Gilligan. But the Democrats made more and bigger statehouse gains, particularly by ending GOP domination in nation's two largest states — New York and California.

Hugh Carey, a little known Brooklyn congressman, propelled himself into national prominence by winning the top job in Albany and Secretary of State Edmund G. Brown Jr., 36, won the California governorship once held by his father.

In one of the nation's closest statehouse races, state Senate President Robert F. Bennett, a Republican, took the Kansas governorship away from the Democrats.

With a few races still undecided, the Democrats had gained or were leading for four more seats in the Senate, 45 additional seats in the House and added or were leading for four new governorships.

This tightened the grip they have held on Congress since 1954 and made the indicated party lineup for the 94th Congress convening in January 62 Democrats and 38 Republicans in the Senate, 293 Democrats and 142 Republicans in the House.

The indicated lineup of governors was 36 Democrats and 13 Republicans, and one independent in Maine — a high water mark in party domination of statehouses since the nation became a union of 50 states.

The Democrats needed 67 seats in the Senate and 290 in the House — a figure they surpassed — for the two-thirds majorities required to override presidential vetoes. But numbers alone do not reflect the ideological differences that often erase party lines on Capitol Hill.

IN AREA COUNTIES

Election Draws Light Turnouts

By ALETHA DAVIS
The off-year election conducted Tuesday across the nation ended with projected reports of a light vote turnout.

Early indications in Gray County yesterday pointed to a much heavier vote than materialized before polls closed at 7 p.m. The pattern was repeated throughout the surrounding county area.

Results locally included the formality of re-electing unopposed Democrat incumbents.

31st Judicial District Judge Grainger McIlhany received 4092 votes in Gray County; County Judge Don Cain, 4014; District Clerk Helen Sprinkle, 5293; Gray County Clerk Wanda Carter, 4322; County Treasurer

Jean Scott, 4163; County School Superintendent Rena Anderson, 4125; County Surveyor Gene Barber, 4077; County Commissioner Pct. 2 Don Hinton, 3263.

Justice of the Peace Margie Prestidge, Pct. 1, 316; County Commissioner Pct. 4, Ted Simmons, 431; Mary Dwyer, 132 write-in votes, Pct. 4; Justice of the Peace Earnest Beck, Pct. 5, 493.

Statewide the county carried a straight Democratic ticket with final results showing Briscoe over Granberry 3077 to 2710. Muniz, 21; Smith 7, and McDonnell, 42 in the governor's race. Lt. governor, Hobby, 3185; Marshall, 2468, Fein, 5; Attorney General, Hill, 3330; Cole, 2253, Vasquez, 5; Comptroller, Bullock, 3320; Rowe, 2191; Scoggins, 5; Commissioner General Land Office, Langdon, 3302; Cain, 2235; Garza, 22; Congress, 5; Agriculture Commissioner, White 3232; Fisher, 2417; Railroad Commission, Langdon, 3302; Cain, 2235; Garza, 22; Congress, 5; Railroad Commission, unexpired term, Wallace, 3201; Steffes, 2117.

Other state candidates, running unopposed were insured another year in Austin, including McGee, Reavley, Steakly, Morrison, Douglas, and Phil Cates, state representative, 66th district.

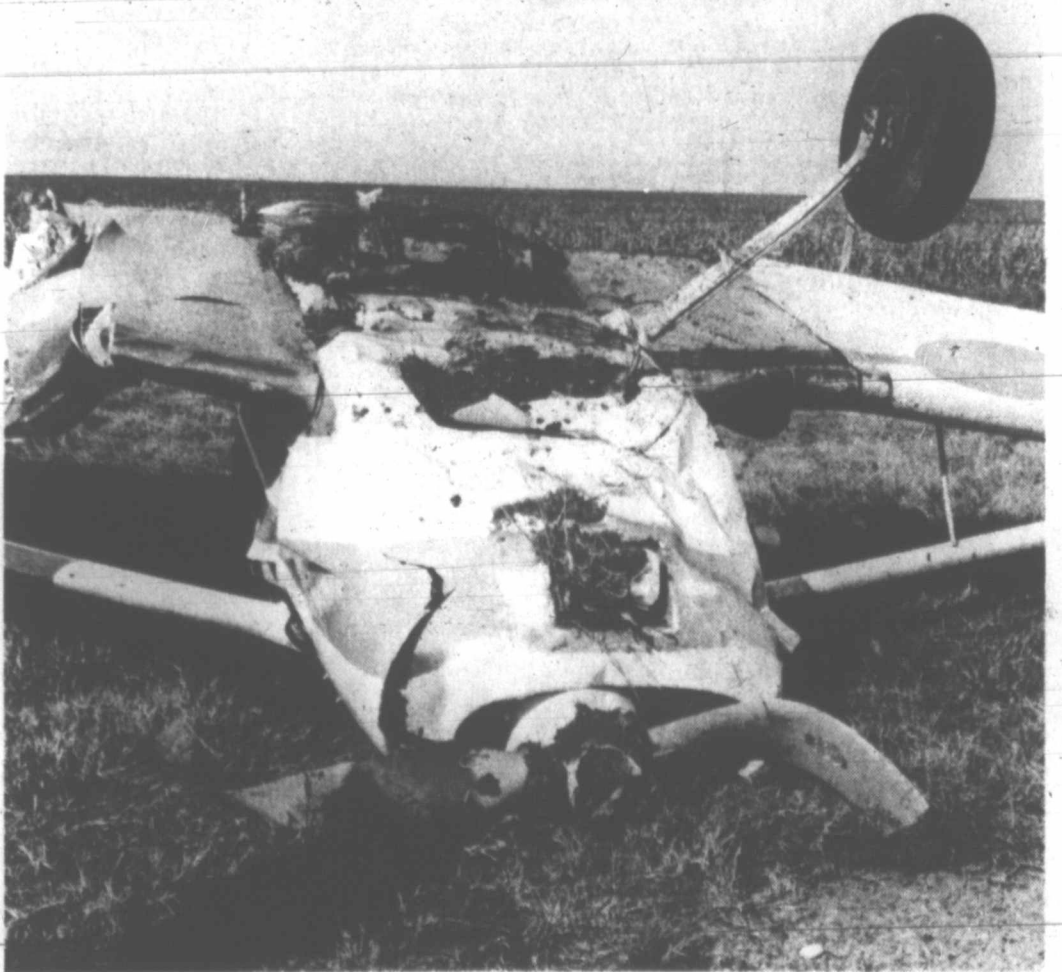

WHEELER COUNTY Hightower, 980, Price, 837; Briscoe, 1190, Granberry, 579; Hobby, 1233, Marshall, 464, Hill, 1281, Cole 411, Vasquez 2; Bullock, 1281, Rowe, 2191, 1271, Holt, 2804, Armstrong, 1307, Grier, 343, White 3232, Fisher, 468, Langdon, 1234, Cain, 394, Wallace, 1234, Steffes, 357.

HEMPHILL Hightower, 425, Price, 422, Briscoe, 469, Granberry, 349; Hobby, 505, Marshall, 290; Hill, 554, Cole, 221; Bullock, 540, Rowe, 229; James, 484, Holt, 329; Armstrong, 544, Grier, 231; White, 514, Fisher, 288; Langdon, 518, Cain, 323; Wallace, 518, Steffes, 234.

CARSON COUNTY Hightower, 1029, Price 785, Briscoe, 1180, Granberry, 592; Hobby, 1276, Marshall, 463, Hill, 1338, Cole, 404; Bullock, 1325, Rowe, 402; James, 1184, Holt, 588; Armstrong, 1353, Grier, 384; White 1281, Fisher, 482; Langdon, 1305, Cain, Wallace, 1325, Steffes 388.

Weather

Increasing cloudiness and cooler Thursday, possible showers. High in mid-50s, low near 40. Yesterday's high, 65. Today's low, 36.

ON ITS BACK — This crop dusting plane ended up on its back this morning in an accident northwest of Pampa, causing a possible electrical power failure in sections of the city. The pilot, Stanley Coleman, 36, was reported in good condition at noon today in Highland General Hospital, where he was undergoing treatment following the incident. (Photo by Jim Williams)

Needed: Good Salesmen

One of the country's best known speakers whose talent is to motivate salesmen once remarked that nothing happens until someone sells something. That is attributed to Arthur (Red) Motley, chairman of the board of Parade Magazine and a much-in-demand speaker.

Salesmanship is one of the great arts of the business world and a talent that is frequently misunderstood. A lot of jokes are told about salesmen such as suggesting one is such a good salesman he could sell ice cubes to an Eskimo.

Truth is that a good salesman does not try to sell something useless to a buyer. He seeks to show his customer that his product or service can be helpful and profitable to the buyer.

Obviously the statement by Motley that nothing happens until someone sells something sums up the essence of business. Something is needed, someone recognizes the need and provides. Someone first had to be sold on the idea that a need exists. Then someone had to be sold on the idea that the need could be satisfied. That starts the chain of productivity, the investment of capital, the employment of labor, etc.

Unfortunately business in many cases has failed to do a selling job on the need for its existence and on the value its freedom to operate has upon the general public.

Considerable public relations activity exist to promote a particular brand of commodity, but not nearly enough selling is done on the commodity itself — private enterprise.

The advertising industry has placed great confidence in the idea of repetition. Over and over we are told that brand X toothpaste will make the teeth whiter, that a certain mouthwash makes one more socially acceptable or that one can get a smoother shave with this or that razor blade.

The idea is to keep the name before the buying public so frequently that the buyer is automatically tuned into that special name when he's ready to plunk down his dollar.

What would be helpful to the preservation of the private enterprise system, it seems to us, would be the use of the reputation process to sell the virtues of private enterprise.

Some companies have begun to use this approach in a sort of defensive effort against the onslaught of political attacks upon the private enterprise sector.

Political government delights in attacking the private segment of the economy, seldom missing an opportunity to suggest that private enterprise cannot do the job. What makes this so damaging is that some spokesmen who fly the banner of private enterprise often mouth the foolishness of the politicians. They seem to have adopted the philosophy that they can't lick 'em so they'll join 'em.

That is extremely unfortunate and we suspect it is because there are not enough real salesmen at the top levels of private enterprise.

If they were real salesmen for the system, they would realize they are not trying to sell ice cubes to Eskimos, but are offering a product that will fill the needs of the public. They have something that will make life more profitable, more pleasant and more durable than anything the politicians can push.

HORSE COURSE
FULTON, Mo. (UPI) — William Woods College of Fulton offers a summer course in horses and horsemanship.

It includes all phases of the care and feeding of horses, from shoeing to shoveling.

The students work with horses and equipment in practical situations under close supervision. Woods is believed to be the only women's college to offer such instruction.

"We do have something a bit nearer your price range -- how are you on togetherness?"

**PRESIDENT BENDING?
Insiders Predicting Controls**

By VICTOR RIESEL
WASHINGTON — High voltage social tension crackling across the nation has alarmed a handful of thoughtful men deep in the Ford administration — and they now predict the imposition of wage-price control in "four or five months."

Further, they say this will be accompanied by price rollbacks in food and gasoline (with rationing) at the retail level.

These aren't frightened men. They've done their homework. They disagree with the upbeat speeches of such government spokesmen as Treasury Secretary William Simon — and aver that despite his good intentions, his phrases have the ring of the 1930-1932 early depression days' assurances of better things to come during the Herbert Hoover administration.

And now it appears that President Ford has eased his absolute, inflexible opposition to such controls. Or youngsters dying of ghastly starvation in Africa, India and Asia.

There is an international crisis. The world is spinning its wheels. Point is can wage-price controls work at home?

Virtually everybody says no. But why not? Controls worked successfully during the 1971-74 stabilization period without much effort or a heavy bureaucracy in the vast U.S. building and construction field. Controls worked because they were across the board. And there was self-imposed discipline in a well geared set of construction craft committees.

They worked in an arena which handles some \$138 billion worth of business annually (11 per cent of America's Gross National Product) employing some 3.5 million workers. That's a fair cross section of this land. Especially since those controlled were the hard hats.

Atop the industry was the Construction Industry Stabilization Committee (CISC). First it was directed by Harvard's Dean John Dunlop, whose genius matches his irascibility, and vice versa. Then it was directed by one of the country's young talents, M.I.T.'s Prof. Daniel Quinn Mills. On it sat the powers of labor and management. They had the authority to approve or reject virtually every contract negotiated. And they did reject those which transgressed the danger lines.

In 1970 the average contracted annual wage-fringe increases was some 19 per cent. In 1971, this was hammered down to 11 per cent; 6 per cent in 1972 and 5.5 per cent in 73.

The operating principle was simple — the national labor leaders had all the statistics before them, they knew they were getting a square deal from the dedicated Dunlop and they could tell their people through various craft boards down the line, cool it, you'll never make it in CISC. And it was cooled.

It worked because they wanted it to succeed. It was not sabotaged as were the other so-called Phase "controls" by the Nixon White House and by the then economic czar George Shultz.

So the pro-controls group, and they are very fond of Jerry Ford, just doesn't understand his resistance and even less do they fathom what he means by "I don't see anything domestically that would precipitate it (control)." To them it is historically reminiscent of another very decent man, a dedicated crusader who saved millions of lives across the world and then won the presidency, Herbert Hoover.

He died in 1964. Some years before that I talked frequently with him in an apartment on New York's West Side. I can still hear him say how much he regretted the flow of Pollyannish speeches before the deluge.

Federal Deficits Real Cause of Inflation?
WASHINGTON, Nov. 6. — Throughout the country the hustings are noisily reverberating with electioneering rhetoric about "cutting government spending" and "balancing the budget" — but don't bet a lead nickel anything will really be done about it!

It never has, and this campaign's vociferous promises are no exception. If you want to know why, read the series of penetrating analyses prepared by Sen. Harry Byrd (Ind.-Va.). It won't take long, and they will be highly revealing — and dismaying.

A ranking member of the Finance Committee and leading congressional authority on federal monetary affairs, Byrd spells out clearly and explicitly and reasons for the seemingly endless stupendous Treasury deficits, and why there is little likelihood of that being reversed in the foreseeable future.

He warns flatly unless that is done, there is no genuine prospect of curbing the rampaging inflation. It is Byrd's categorical contention that the persistent stupendous federal deficits, which in the past six years came to more than \$133 billion, about one-fourth of the entire national debt, are the primary cause of the sinister inflation afflicting the nation.

Says Byrd somberly: "The enormous deficits the federal government has been running are a major cause of our inflation. Just to pay the interest on the staggering national debt, which before next summer will reach an unbelievable one-half trillion dollars, consumes 17 cents of every individual and corporation income tax dollar."

In 1970 the average contracted annual wage-fringe increases was some 19 per cent. In 1971, this was hammered down to 11 per cent; 6 per cent in 1972 and 5.5 per cent in 73.

The operating principle was simple — the national labor leaders had all the statistics before them, they knew they were getting a square deal from the dedicated Dunlop and they could tell their people through various craft boards down the line, cool it, you'll never make it in CISC. And it was cooled.

It worked because they wanted it to succeed. It was not sabotaged as were the other so-called Phase "controls" by the Nixon White House and by the then economic czar George Shultz.

So the pro-controls group, and they are very fond of Jerry Ford, just doesn't understand his resistance and even less do they fathom what he means by "I don't see anything domestically that would precipitate it (control)." To them it is historically reminiscent of another very decent man, a dedicated crusader who saved millions of lives across the world and then won the presidency, Herbert Hoover.

He died in 1964. Some years before that I talked frequently with him in an apartment on New York's West Side. I can still hear him say how much he regretted the flow of Pollyannish speeches before the deluge.

All Rights Reserved

cost of the program when launched eight years ago. And that isn't all.

A study by the Congressional Joint Economic Committee projects the outlay for food stamps by 1977 at more than \$10 billion. Also by then, it is estimated every fourth American (60 million people) will be getting food stamps. Currently among beneficiaries of this program are college students and strikers.

"SOCIAL SERVICES" — Launched in 1967 as a "modest program" to assist state governments to "improve" various services, particularly for the elderly, ailing and handicapped, the initial cost was \$40 million. By 1972 it had zoomed to \$5 billion. By literally heroic measures that was drastically pruned to \$1.5 billion this year — but even that is 37 times the original grant.

"Inflation is running wild," avers Sen. Byrd. "It eats into the paycheck of every working man and woman. It hits hard and cruelly those on fixed incomes, especially the elderly. People are realizing as never before the direct relation between government deficits and inflation. Each year the government runs another massive deficit, and each year that adds more fuel to inflation."

"We simply have to stop squandering and wasting taxpayers dollars. We must put an end to such ridiculous outlays as contributing \$4 million for preserving Nubian archeological monuments inundated by Nile waters due to the construction of the Aswan Dam. The sponsor of that project is the United Nations Educational, Social and Cultural Organization. The Aswan Dam was built by Russia."

Also it has resulted in the government becoming by far the biggest borrower in the country — requiring 62 percent of all lendable funds, as a consequence of which interest rates are driven higher and thus making it more and more difficult for the home buyer, the consumer and businessman to find credit.

WHERE IT GOES
Clearly, immediate, and forceful measures must be taken to curb this catastrophic brain — and that's the rub!

Doing that will cut squarely across virtually untouchable federal spending.

Pulling no punches, Sen. Byrd details five "major categories of wasteful or inappropriate expenditures," as follows:

"Mushrooming of major programs into major burdens on taxpayers."

"Extensive and gross mismanagement."

"Foreign aid" — which this year will exceed \$8 billion to more than 100 countries "at a time when our own economy is very nearly in a state of shock."

"Over payments." A graphic example: National Science Foundation paying \$45,000 salaries to researchers — a higher scale than that of members of Congress, federal judges and top officials.

"Inappropriate use of tax funds" — such as hiring a foreign soccer expert at \$18,500 to promote that sport in South Vietnam, and paying a Yale scholar \$46,000 to explore the "dyadic relationships on adherence to stressful decisions."

"We are constantly told," points out Byrd, "that most of the federal budget is 'uncontrollable,' that ever-growing spending is so ingrained in our system that we will never effectively check it. Emphatically, I reject that defeatist concept. I say we must and can control outlays — and the place to start is bringing under control the various open-ended programs."

That will be quite a feat if its accomplished — which is very questionable.

BILLION-DOLLAR UNTOUCHABLES
Reason for that doubt is spelled out in the following two immensely costly illustrations:

FOOD STAMPS — Begun under President Johnson in 1966, this open-ended program cost \$84 million. This year the amount is \$4 billion — a 33 percent hike over last year. This year also the expense for administering this vastly expanded program (salaries, printed materials, etc.) is more than the entire

SEX IN TITLES

NEW YORK (UPI) — The U.S. Department of Labor has changed "Workmen's Compensation" to "Workers' Compensation."

This is part of a trend away from references to sex in job titles. The trend was started by the Women's Liberation Movement.

DRESSY SHADE

NEW YORK (UPI) — Did you ever think of dressing up a window with a shade and matching shade cloth valence? This tailored window treatment can transform a small, ordinary window into one that becomes a most important color accent in a room, says the Window Shade Manufacturers Association.

BIKE HAZARDS

NEW YORK (UPI) — In a safety check of 506 bikes it was found common mechanical hazards included:

Poor wheel alignment; over or under inflated tires; loose wheel bearings; loose gearchains; unresponsive handbrakes; worn brake shoes; worn pedal treads; loose handlebar grips; lack of reflectors; wrong-sized bike for the rider.

NEW APPROACH

NEW YORK (UPI) — A new approach to higher education — combining vacation with college study at a mountain resort — will be introduced in January by Adelphi University, Garden City, N.Y.

The winter educational-vacation will use mountain resorts in Ellenville, N.Y. for a campus.

Dear Abby

Please wait until the fish is dead

By Abigail Van Buren
© 1974 by The Chicago Tribune

DEAR ABBY: I know this sounds like a silly problem, but your answer would mean so much to me.

A friend and I often fish together and we both enjoy it. That is, I do until it comes time to clean the fish. My friend then proceeds to fillet the fish while they are still alive and wiggling.

This bothers me, but my friend assures me that fish have no feelings, I think they have.

Who is right? SORRY FOR FISH

DEAR SORRY: I checked with the Fish and Wildlife Department of the University of Minnesota, and their spokesman, Dr. Thomas Waters (so help me) said: "Since fish do have nervous systems, they also have feelings. However, it's impossible to say whether the pain a fish feels is the same kind of pain humans experience."

So tell your impatient friend that you aren't buying his fish story, hook, line and sinker, and he should wait until the fish is dead before he fillets it.

DEAR ABBY: My wife and I have been married a year. We were very happy until last week.

It all started when she bought a pants suit for \$150. (I make barely \$100 a week.) I told her to take it back. We argued a while and she refused to return it. The next day I took it back.

That evening when I came home for dinner, my wife was standing in the kitchen naked, preparing supper.

I asked her why she was naked, and she said, "Because I don't have anything to wear." Then it dawned on me what she was trying to get across, but I just ignored her.

I never said another word about her being naked, which bugged her. All during the meal she would bump my arm. When she got up to get the coffee she shoved my chair. Finally she "accidentally" hit me in the head with the coffee pot. That's when I turned her over my knee and gave her a good spanking on her bare fanny. I figured if she was going to act like a child, I'd treat her like one.

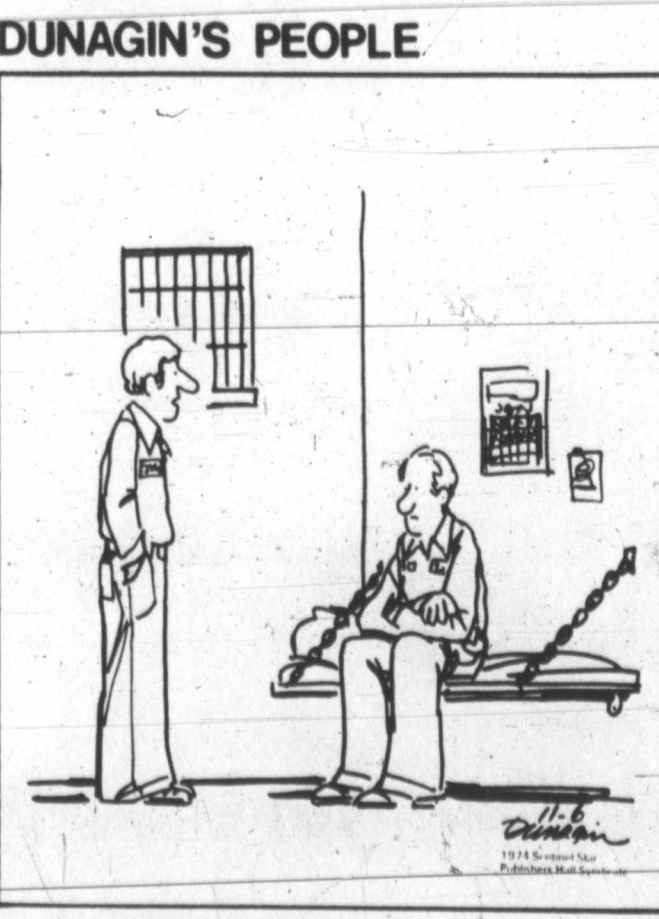

She's not talking to me now. Was I wrong? THE SPANKER

DEAR SPANKER: Yes. Fighting fire with fire won't solve anything, so knock off the spanking, and tell her to cut out the bumping and knocking. Your wife needs to learn how to live on your salary. And if it's insufficient for her extras, maybe she should get a job.

DEAR ABBY: What do you think of a middle-aged man who wants to marry for the first time in his life, but can't tolerate his beloved's children? She's a wonderful woman, but the thought of sharing her with those kids turns me off. Don't get me wrong, they aren't "bad" — they're normal, but that's bad enough.

I've always found children difficult to be around. Hers are in their teens, and will soon be out of the house and on their own, but marriage right now would be rough for me. On the other hand, the lady is lovely and if I wait until her kids are on their own, I'm afraid I'll lose her. Any suggestions? TORN

DEAR TORN: Much depends upon how this lovely lady feels about her children. You have no guarantee that once her kids are "out of the house" she will sever all connections with them and concentrate exclusively on you. I think you'd better try to find a woman who can devote herself exclusively to you, now and later.

"WE SHOULD HAVE HIDDEN IN A VOTING BOOTH. NO ONE WOULD HAVE FOUND US THERE."

Program Spots Latent Juvenile Delinquents

DENVER (UPI) — Dr. Paul Knott can spot a juvenile delinquent years before the youngster ever earns the title. The real trick, he says, is to stop the child before he gets that far.

Working out of a converted department store in one of the toughest sections of northeast Denver, Knott and his Colorado Youth Services Institute have put together a program which he says will

work. He has figures to back his claim.

"We are very confident now that we can predict delinquency as early as the first three grades of school," Knott said. "In fact, studies have shown that first, second and third grade school teachers can predict with virtually 90 per cent accuracy those kids that are headed toward delinquency, dropping out and drug misuse."

The clues include truancy from the school, a tendency to be disruptive in the classroom, a disrupted family background and poor grades.

"You show me a kid with those characteristics, and I can predict right now the odds are 99 out of 100 that by the time that kid hits teenage, he's either going to be a delinquent, drug user or dropout and probably all three," Knott said.

"We know that. So it's criminal to let the kid go on like that."

Knott and Dr. Jim Vander Weele, 36, chief court psychologist for Denver Juvenile Court for more than eight years, decided it was time to develop a new approach to the delinquency problem.

With the ability to predict delinquency with a fair degree of accuracy, they felt the task was to re-route the youngster on a different course.

Although he isn't claiming 100 per cent success with the program, Knott said both he and Vander Weele had been astounded by the results of their efforts. Studies involving a similar group of youngsters who did not take part in the program showed the institute's children had 58 per cent fewer re-arrests after on year and 80 per cent fewer arrests after two years.

Knott estimated the cost of his program at \$1,000 per year per child. The cost of sending a youngster with emotional problems to an institution could be as high as \$50,000 a year, he said, and that does not include the cost involved to a victim of the youngster's crime.

RECEIVED CRITICISM Assistant Atty. General Announces Retirement

WASHINGTON (UPI) — Assistant Attorney General Henry E. Petersen has announced his retirement, saying in spite of criticism

that if he had to conduct the Watergate investigation again, he would do it the same way.

Petersen announced his plans Tuesday. He was criticized in congressional hearings for giving Richard Nixon briefings on the early Watergate grand jury proceedings. The White House tapes showed that the former President discussed the information he received with some of the Under House aides under investigation for the cover-up.

Petersen is stepping down as head of the Justice Department's criminal division, effective Dec. 31. He indicated he probably will return to private law practice and may write a book about his experiences.

"Despite the fact that there has been criticism," Petersen said in a news conference late Tuesday, "I'm afraid that if I had to do it all over again I would probably do the same thing."

"I had only two choices — either tell the President or not tell the President. That's all. It was just that simple. You could not tell the President unless you had good reason not to tell the President. I did not have good reason not to tell the President."

My experience over and over has been, you've got to do it both ways," Knott said. "You can work with the family and get some good things going there, but if there still are some problems in school, it will foul up all of your progress — and vice versa."

The first job, Knott says, is to test the youngsters, find out what their learning disabilities are and then

develop a program to correct the problem.

Knott, whose staff includes both Ph. D. level psychologists and community-based paraprofessionals, sends a behavioral analyst into each home to discover the problems there.

The institute is working now with 200 families and children ranging in age from 6 to 16. Staff members work with each child and family for five months.

An effort is made to re-establish lines of communications within a family. Parents frequently are advised to temper discipline with praise; to meet a problem head-on instead of trying to argue around it; to forget old grievances.

"If they will put their arm around the kid and say, 'Hey, I really appreciate that...you're a pretty good Joe, you know,' — if they will do that once a day or so it will make all the difference in the world for the kid," Knott said.

Most of the Republicans President Ford campaigned for lost Tuesday.

In a 19-state, 16,685-mile, month-long rescue mission, Ford campaigned fervently for underdogs.

He endorsed a total of 103 Republican gubernatorial, Senate and House candidates. More than half were defeated in the first volley of returns. Most of the others in undecided races trailed their Democratic opponents.

At the time, Ford's inherited political adviser, Dean Burch, former political aide to Sen. Barry M. Goldwater in 1964 and Richard M. Nixon in 1972, disputed the view that Ford was undertaking impossible missions.

"We wouldn't go to some-where where a Republican

wouldn't have a chance," he told reporters aboard Air Force One on one of those trips.

But Tuesday night, when the scope of the Republican defeats became clear, Burch altered his explanation. He said Ford had gone into some of those races because "he is the kind of man who keeps commitments."

Burch drew a parallel to the 1946 election, a comparable debacle for President Harry S. Truman who, like Ford, inherited the presidency.

Truman used the heavily opposition Congress to his advantage in 1948, campaigning against the "do-nothing" good-for-nothing 80th Congress," Burch implied that Ford might do the same thing.

PROGRESSING FAVORABLE Pioneer Acquires New Gas Reserves Supplies

The board of directors of Pioneer Natural Gas Co. at its regular meeting in New York City today, announced that the acquisition of new gas reserves to be connected to Pioneer's system has been progressing favorably.

In the first six months of 1974 Pioneer acquired new gas supply equal to about 130 percent of sales during the same period and in the third quarter, acquisitions of an estimated 76 billion cubic feet were considerably in excess of sales for the period.

Late in September, a discovery well located on a six section unit in Wheeler County here in the Texas Panhandle, was completed and potential for 34,000 Mcf of gas per day. The producer is estimating a daily delivery capacity to Pioneer of approximately 10,000 Mcf per day.

It is estimated that an additional five wells will be drilled in the unit area, and Pioneer has 86 percent of the potential gas production

under contract.

In making the announcement, K. Bert "Tex" Watson, Pioneer president, said, "Gas from these new sources will start flowing into the system around the end of the year. We forecast that the average cost of gas to the company will remain level for the remainder of 1974."

"This would indicate that there should be no increase in the cost of gas served to Pioneer customers for this period as a result of the monthly adjustment based on gas costs."

The directors reported the Pioneer's subsidiary, Amarillo Oil Company, had a new multi-pay oil and gas discovery on its South Egan Prospect in Acadia Parish, La., approximately eight miles east of the Jennings Townsite Field which was discovered in November, 1973, by Pioneer Production Corporation, another subsidiary.

Amarillo Oil Company is completing its fifth

extension well in the Jennings Townsite Field. Production from the field is now 20 million cubic feet per day and will be increased to 40 million cubic feet per day by the first of the year. A sixth extension well and seven in-field oil development wells will be commenced within the next 60 days.

Pioneer Natural Gas Company's consolidated net income for the third quarter was \$6,030,433 compared to \$2,864,860 for the same period in 1973. Consolidated net income for the first nine months of this year amounted to \$14,804,693 compared to \$8,835,259 for the same period in 1973. Earnings per share for the nine-month period ending Sept. 30 were \$1.99 compared to \$1.19 for the same nine months of 1973.

The report of third quarter operations of the company will be mailed to stockholders about Nov. 15.

Ford's Candidates Lose

Robbers Handcuff 'Bomb' To Woman

QUINCY, Mass. (UPI) — Three men today held a woman bank manager and three other persons hostage, handcuffed a "bomb" to her wrist and tried unsuccessfully to force her to get money from the bank.

But the scheme failed, the hostages were found unharmed and the "bomb" turned out to be flares. A search was under way for the would-be robbers.

The bank manager, Mrs. Margaret Curran told police that three men in their early 30s burst into her apartment about 8:20 a.m. and took her hostage along with her husband and two neighbors.

The would-be robbers removed a "bomb" from a briefcase, handcuffed it to Mrs. Curran's wrist and told her it was set to go off at 10 a.m.

They then told Mrs. Curran to go to the Hancock Bank and Trust Co. and get an unspecified amount of money.

As she drove to the bank alone, Mrs. Curran spotted a policeman and dropped one of her business cards out the window. The alert officer noticed it and called headquarters. Police were sent to the bank and met Mrs. Curran when she arrived.

Police carefully cut the briefcase from her wrist, placed it in the nearby parking lot and cordoned off the area. Joseph Sainato, a State Police bomb expert, attached wires of about 100 feet long to the briefcase and gingerly opened it.

Officials said it contained flares taped together, giving the appearance of sticks of dynamite.

Police went to the apartment, obtained a key from the landlord and found the three hostages lying on the floor of the Curran's bedroom. They were bound with electrical cords and their mouths were taped. Otherwise they were not injured.

British Troops Fight Against Breakout Try

BELFAST (UPI) — British troops shot and killed a man today when hundreds of convicts tried to storm the main gate at the Maze prison camp. Twenty men crawled through a small tunnel under the fence in a daring bid for freedom.

An army spokesman said three prisoners escaped. Troops fired tear gas and rubber bullets in a two-hour battle that finally restored order to the prison.

Thirty-five prisoners were hurt. No guards were reported injured.

One of the fugitives, 24-year-old Hugh Coney, was shot to death by soldiers as a group of the escapees scrambled across a road near the jail. The government said the soldiers opened fire when the men refused to halt.

The spokesman said most of the escapees were captured within an hour after the midnight breakout.

Police carefully cut the briefcase from her wrist, placed it in the nearby parking lot and cordoned off the area. Joseph Sainato, a State Police bomb expert, attached wires of about 100 feet long to the briefcase and gingerly opened it.

Madam Leads Election For Nevada Post

LIDA JUNCTION, Nev. (UPI) — A bunch of the boys — and girls — were whooping it up in the Cottontail saloon today, celebrating the likely elevation of Beverly Harrel from bordello madam to state legislator.

Free champagne was served. Ms. Harrel, a striking red-haired woman in her 40s, gave her girls the night off and complained that constituents and well-wishers were drinking her out of her house that is not a home.

"Whatever I got, I guess they're going to drink," she said.

"This place is like a madhouse. This place is a legal brothel, the Cottontail Ranch, a collection of trailers at a lonely desert crossroads, topped by blinking red lights that can be seen for miles."

Ms. Harrel was leading fellow Democrat Don Moody, a service station owner, by 54 votes out of nearly 3,300 cast when the champagne corks began to fly.

There were no Republican candidates.

It may take some time to determine the final vote count for the far-flung district. There are only 7,122 voters in the 25,000 square mile area, which is mostly uninhabited desert.

Ms. Harrel's campaigning technique included dropping in on the roadside bars frequented by cowboys, miners and others who work the desert, buying drinks for the house and explaining her platform.

Women's rights. Return of Nevada land — 87 per cent of which is owned by the federal government — to Nevada control.

Efficiency in government.

Accent on Health

A weekly public service feature from the Texas State Department of Health. J.E. PEAVY, M.D., Commissioner of Health.

When someone mentions "lasers," the image that may come to mind is that of Buck Rogers ray-gun. But in fact, lasers are rapidly becoming a part of our everyday lives — and your Texas State Health Department has begun a new program to help ensure that the lasers in your life are safe.

Laser safety is one of the responsibilities on the Non-Ionizing Radiation Control Program, which is being carried out by the Occupational Health and Radiation Control Division of the State Health Department, under the Texas Radiation Control Act.

The program is responsible for protecting the public from the dangers of misuse associated with a wide variety of devices, including ultraviolet lamps — such as "sun" lamps — ultrasonic diathermy machines, ultrasonic burglar alarms, radar transmitters, microwave ovens, and even high powered amplifiers used for hi-fi systems and electric guitars.

The radiation control engineers have developed a set of standards for laser safety, and these standards have been approved by the Texas State Board of Health, giving the radiation control program regulatory authority to ensure that the public is not unnecessarily exposed to danger.

The immediate task of the new laser safety program is to locate and register all of the high-energy lasers being used in college laboratories and in a number of industries.

High-energy lasers are used for many kinds of research, including thermonuclear fusion — which some authorities believe will become the most important source of electrical energy in the future. Lasers are also used by many industries for such jobs as cutting, shaping, and welding materials and plastics, for quality-control inspection of miniature electronic parts, for alignment of machinery to critical tolerances as small as a millionth of an inch, and for a number of other work-a-day tasks.

One type of industrial laser is the high-energy carbon dioxide laser, which a radiation control official describes as "an invisible beam of pure radiant heat." The carbon-dioxide laser can be used by clothing manufacturers to cut an entire pile of fabric to an exact pattern, or the laser can be used by electronics manufacturers to shape and weld microscopically small components.

In one case, a laser welding machine is able to do as much work in a few minutes as a conventional process could do in 24 hours — and the rejection rate due to faulty work was reduced from 80 percent to zero.

19 PHS Choral Students Win All-Region Positions

Twenty-six students from the Pampa High School Choral Department returned from Amarillo Saturday after the All-Region tryouts with 19 students chosen to sing in the choral event which will be held in Amarillo on Dec. 6 and 7.

Those students were: Sandra Vance, Lori Perilloux, Jan Gray, Beverly Bradford, Tonya Organ, Eddie Roby, all seniors; Jamie Hood, Debbie Lehnick, Rodgers Hoskins, David Skoog, Scott Malone, Keith Waterbury, Patrick O'Connor, Karl Collier, juniors; and Elbert Hensley, Barry Hickey.

Keith Coffee, Bill Dingus, David Fraser, sophomores. Three alternates were Mike Fraser, senior; Irene Haesle and Cheryl McGahey, juniors.

One other school, Amarillo High School, also placed 19 students in the choir. Dumas placed 13, Tascosa had 11.

These students must win at the local level before going on to the Amarillo tryouts. Students who then make the All-Region choir must then win at least two more times before they are awarded a place in the Texas All-State Choir.

Another honor was accorded the local choirs when it was learned that the choral department tied with one other school in Texas as having won the most sweepstakes awards in a two-event (concert and sightreading) contest in the school year 1973-1974.

The Concert Choir, Girls' Glee Club, Men's Glee Club, under the direction of John Woickowski, and the Sophomore Girls' Choir, directed by Louise Richardson, won the top awards last year. The other school to win four was Clear Lake High School in Houston.

This marks the second time in Woickowski's career that his department has won as many awards and has finished first or second in the area.

Progress is being made on the musical "Brigadoon," scheduled for M.K. Brown Auditorium at 8 p.m. on Nov. 22 and 23.

Mutscher Appeal Rejected

AUSTIN, Tex. (UPI) — The Texas Court of Criminal Appeals today rejected the final appeal of former House Speaker Gus Mutscher and two accomplices convicted of conspiracy to accept bribes in the Sharpstown scandal.

On Sept. 24, the three had requested that the court rehear their appeal of the convictions, and it was that motion which the court denied today.

Mutscher, of Brenham, former State Rep. Tommy Shannon of Fort Worth and Mutscher aide S. Rush McGinty of Austin were given five-year probated sentences in 1972 for conspiring to accept bribes from Houston financier Frank W. Sharp in exchange for influencing the passage of legislation favorable to Sharp.

Mutscher was first to resign as speaker shortly after his March 15, 1972, conviction in Abilene. Both he and Shannon lost bids for re-election to the legislature two months later.

A team of defense lawyers submitted massive briefs arguing there was not enough evidence to support the conspiracy conviction, but the appeals court ruled otherwise.

The scandal which led to the convictions revolved around Sharp and his Sharpstown State Bank near Houston. Stock in National Bankers Life Insurance Company of Dallas, also owned by Sharp, was offered to selected persons by Sharp to be purchased with a loan from Sharp's bank. Once the purchase was made, the value of the stock was illegally manipulated up and then resold, giving each of the principals sizeable profits.

The scandal which led to the convictions revolved around Sharp and his Sharpstown State Bank near Houston. Stock in National Bankers Life Insurance Company of Dallas, also owned by Sharp, was offered to selected persons by Sharp to be purchased with a loan from Sharp's bank. Once the purchase was made, the value of the stock was illegally manipulated up and then resold, giving each of the principals sizeable profits.

Obituaries

MRS. ROSE CROCKER Funeral arrangements are pending with Carmicheal - Whatley Funeral Directors for Mrs. Rose Crocker, 81, who died at 8 p.m. Monday in Arlington, where she moved five years ago from Pampa.

Mrs. Crocker was born April 15, 1893, in Glen Williams, Ontario Canada. She moved to Mobeetie in 1987, then to Pampa in 1965.

Mrs. Crocker was past Worthy Matron of Order of Eastern Star, Chapter 65, and a member of St. Paul United Methodist Church. Her husband, G.C. Crocker, died in 1966.

Survivors include a son, Grover C. Crocker, Oklahoma City; two daughters, Mrs. Betty Sullivan, Malaga, Spain and Mrs. Florene Gannon, Hobbs, N.M.; on sister, Mrs. Otto Rice, Pampa, and 12 grandchildren and two great-grandchildren.

MRS. BESSIE PAYNE AUSTIN — Funeral services for Mrs. Bessie Lee Payne, 69, who died Tuesday at noon in an Austin Hospital, will be at 11 a.m. Thursday in Colonial Chapel, Cook - Waldin Funeral Home in AUSTIN.

Her husband, Roy D. Payne, with the Railroad Commission in Austin resided in Pampa during his childhood.

Additional survivors include two sons, Donald L. Houston, and Edward D. Englewood, Colo.; three sisters, Mrs. Marshall VanDerVoort, Banning, Calif.; Mrs. Roalind Deahl, Seattle, Wash., and Mrs. Jessie Lee Boyer, Austin; a brother, W.R. Johnson, Amarillo and three grandchildren.

Alibates Gains Tour Requests

Over 1,200 people have visited Alibates National Monument this year. The National Park Service recently announced 1974 visitation to Texas' only National Monument slightly below figures for the same time as last year.

However, the requests for tours are still coming in, added Park Ranger Allen School groups and scout troops make up most of the tour groups in the fall, she explained.

Shell Says Waste Burn Caused No Great Harm

NEW ORLEANS (UPI) — A Shell Chemical Co. technical report issued Tuesday said the burning of 4,000 tons of chemical wastes in the Gulf of Mexico south of Galveston, Tex., on the incinerator ship Vulcanus brought no harm to the sea, air or wildlife.

"The Vulcanus exceeded Shell's expectations," said R. Gary Dillard, manager of Shell's manufacturing complex at Deer Park, Tex., where the German-owned

ship loaded 4,000 tons of organic chloride wastes for a test burn last month 165 miles southeast of Galveston and 190 miles south of Cameron, La.

Clint Pray, head of the Louisiana Council on Environmental Quality, said if Shell's findings were true, they might foster a mushrooming of offshore incineration business. Pray had threatened to get a court injunction to stop the experimental burn and all future burns.

Pray said if the Environmental Protection Agency approves further offshore waste incineration, the Air Force will seek a permit for burning dangerous chemical warfare agents such as "agent orange," a defoliant.

"It's a dangerous chemical. So dangerous, that we wouldn't allow the Air Force to bring it into the state," Pray said.

Henry Admits Arab Summit Gives Problem

CAIRO (UPI) — Secretary of State Henry A. Kissinger admitted today that the summit conference of Arab leaders presented him with a "complicated situation," but said he would do everything possible to arrange Arab-Israeli peace talks.

"I don't believe I express either optimism or pessimism" on the chances for peace in the Middle East, Kissinger replied to a reporter's question. "I will do my best to move the parties to a peace negotiation."

The secretary of state began his second day in Cairo by calling on Foreign Minister Ismail Fahmi at the foreign ministry.

Kissinger said "we have a complicated situation" because of last week's summit conference of Arab leaders at Rabat, Morocco.

After his talks with Fahmi, Kissinger planned to meet for a second time in two days with ailing President Anwar Sadat before flying to Saudi Arabia later in the day.

The next steps on his two-day, five-nation peace mission were Jordan, Syria and Israel.

Hours before Kissinger's scheduled arrival in Jordan, hijackers claiming to be officers in Jordan's Arab legion commandeered one of the nation's airliners and forced the pilot to land in Libya.

An Arab press commentator said they probably were Palestinians trying to embarrass King Hussein.

Despite Kissinger's statement on the chances for peace, his aides said he fears a new Middle East war if Israel and the Arabs turn their backs on peace talks.

The secretary of state arrived in Cairo Tuesday night and promptly went to Sadat's bedroom for 90 minutes of talks with the Egyptian leader, who was suffering from influenza.

Singles Club Plans Party

The Betwixt - Between Singles Club invites adults of all ages who are single to a "Turkey Trot" on Saturday, Nov. 9, at 7 p.m. at 1121 S. Hobart, in the home of the club president, Dr. Gerald York.

A Halloween costume party was enjoyed by the club on Oct. 26. Highlights of the evening were informal games, and dancing. The refreshments featured "toothkabobs" and Halloween cakes. Leo Hall won the prize for the best costume present.

Plans are being made for a Thanksgiving covered dinner later this month.

For information about the club, call 665-1627.

Federal Agencies, Police Seeking Drug Smugglers

MIAMI (UPI) — Four federal agencies and police from two counties blockaded the southeastern Florida coast for the first time since the Civil War today, hoping to intercept drug smugglers who

apparently hijacked boats and murdered crews.

The blockade began at 5 p.m. Tuesday and was ordered ended at 11 a.m. today.

A Coast Guard spokesman indicated it may be only the first of a number of such operations. The first several hours of the blockade, however, did not result in any arrests or narcotics seizures, the spokesman said.

"This is the first time this type of operation has been tried. We were concerned to see how the agencies worked together, and at least we have made our presence felt," said Coast Guard spokesman Lt. George Johnson.

The blockade extended from Key West at the southern tip of the Florida Keys to Vero Beach, 275 miles north. All vessels entering or leaving American waters along this strip of Florida Gold Coast beaches were stopped and searched.

Twenty-nine boats, helicopters and airplanes—carrying Coast Guardsmen, customs agents, border patrolmen, Federal Drug Enforcement Agency agents and sheriff's deputies—were involved in the blockade.

An informed source said the blockade was aimed at intercepting one particular vessel thought to be carrying 5,000 pounds of marijuana and manned by persons believed involved in several murders and hijackings.

CALVIN DeWITT

VENITA DeWITT

Canadian Youths Named To Who's Who Listings

CANADIAN — Calvin and Venita DeWitt, son and daughter of Mr. and Mrs. J.W. DeWitt of Canadian, have been named to Who's Who Among American High School Students, 1973-74.

Venita is a 1974 graduate of CHS and Calvin is a senior in the same school.

Miss DeWitt was active in FTA Drama Club and the Drill Team. She was senior Football Princess, junior and senior Carnival Princess, attended Blue-Bonnet Girls State, and earned a leadership award in Drill Team. She was also Spanish Club president and UIL competitor in Poetry.

DeWitt is active in Student Council, track, Drama Club, National Honor Society, is president of Drama Club and NHS, was high point boy his junior year, Sophomore Class Favorite, and was

vice-president of Spanish Club in 10th grade. He plans to attend West Texas State University.

The pair will be listed in the new edition of Who's Who along with students from over 20,000 public, private and parochial high schools throughout the country.

Students are recognized for leadership in academics, athletics, activities and community services. Less than three percent of the junior and senior class students nation-wide are awarded this recognition.

The Canadian students will compete for one of ten scholarships of \$500 and \$1,000 funded by the publishers of the volume and will be eligible to participate in the firm's annual "Survey of High Achievers."

Brooks Defense To Fight Change Of Venue Motion

HOUSTON (UPI) — James Skelton, the new defense attorney for accused mass murderer David Owen Brooks, says he will fight the prosecution's attempt to have the trial moved to another city.

"We will oppose a change of venue," Skelton said. "We think we can get a fair trial here in Houston. It wouldn't even do any good to move the case to Mars. Everybody's heard about it."

Assistant District Attorney Don Lambright told District Judge William Hatten Tuesday at a pre-trial hearing he wanted the trial site changed.

Hatten moved the trial of codefendant Elmer Wayne Henley to San Antonio where the teenager was convicted this summer of killing six of 27 boys murdered in a three-year sex and torture spree. Brooks is charged in four of the deaths.

Hatten said the move was

necessary because of pre-trial publicity.

"The facts are not any different than in the Henley case," Lambright said. "If it was proper to move the Henley case, then it would be proper to move this case."

Skelton was hired by Brooks' father to replace court-appointed attorney Ted Musick who resigned Monday in a dispute over the defense strategy.

Musick, a family friend who has handled Brooks' defense since he was charged with murder in August, 1973, had wanted a competency hearing to determine if Brooks is capable of assisting in his defense. His assistant, Elaine Hocker, also withdrew from the case.

However, Mrs. Hocker Tuesday joined Skelton as a member of the defense team. Skelton said he has not decided whether to press for a competency hearing.

The competency question was scheduled to be heard Monday, but was delayed by Musick's resignation. Skelton said it would probably be February before a trial on the merits could be set.

Hatten set a hearing Nov. 13 on the change of venue motion.

Initiation Dinner Fets Local Alpha Iota Conclave

The Alpha Iota Conclave of Kappa Kappa Iota met recently in the Crown-and-Shield room of the Pampa Club for the annual Acceptance Dinner and candlelight initiation

service for new members. Mmes. Tommy Burns, Tommy Lester, Neil Quattlebaum, and Peggy Stevens. Hostesses, Priscilla Alexander, Jeannie

Peurifoy, and Cynthia West greeted members as they arrived with Mrs. West playing piano selections.

The tables were elegantly set with blue violet centerpieces. Following dinner the conclave was entertained by soloist Susie Wilson, accompanied by Dorothy Wilkinson.

Conducting the candlelight ceremony for new members was the President, Jeannie Peurifoy. She was assisted by Priscilla Alexander, Nancy Coffee, Virginia Dewey, Marlene Kyle, and Jane Steele.

Following the ceremony a business meeting was held. Nita Williams distributed copies of the By-Laws Revisions for a vote by the membership.

A resignation letter was read from Virginia Davis and new yearbooks were distributed by Priscilla Alexander who thanked Romona Hite, Flo Quattlebaum, and Cynthia West for their help in putting the yearbooks together.

Members attending were Mmes. Jack Alexander, Frank Anderson, John Best, Jay Boettner, Doug Coffee, Stephen Dewey, Albert Drinovsky, Jerry Farmer, Henry Gruben, Sam Hanks, Ernest Hawkins, Bill Hite, Earl Kyle, Robert McPherson, Floyd Miller, Jerry Peurifoy, Richard Steele, Jack C. Williams and William West.

Scarves Make Fall 1974 Fashion News

COLLEGE STATION — It takes a lot of imagination these days to look fashionably dressed while staying within the family budget, one clothing specialist said this week.

"Adding accessories such as scarves can change the style of last season's wardrobe," Marlene Odle, with the Texas Agricultural Extension Service, The Texas A&M University System, noted.

Scarves are setting the pace for fall fashions. They come in muted colors of green, rust, pale peach, beige and off-white.

All shapes and sizes — square and oblong, wide and long, printed and solids — are popular.

The specialist suggested several ways to accent your wardrobe using scarves.

— Tying at the neck is the most popular, but use your imagination to create fashion.

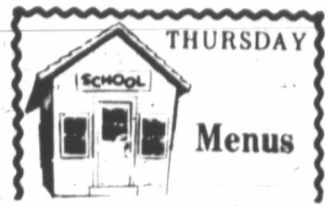

— Once around the head and tied in front creates a turban.

— Tie it around a section of hair and let it hang free.

— Drape it over your shoulders and pin it in place with a decorative pin.

— Weaving it through a chain belt adds color to last year's basic dress.

— Tie it in a sash around your waist for a belt.

Northern Zone Garden Club Meeting Stated For Thursday

Pampa Garden Club members will host the Northern Zone meeting of District 1, Texas Garden Clubs, Inc. Thursday, Nov. 7 beginning at 9:30 a.m. First Christian Church. Representatives are expected from the 15 clubs in the Northern Zone of the Panhandle at this annual fall meeting and luncheon.

Registration and an informal coffee will be held between 9:30 and 10 a.m. Dr. Ralph T. Palmer, pastor of the First Christian Church, will give the invocation.

opening the meeting session. Mrs. Joe Curtis, president of Pampa Garden Club, will present the greetings, and the response will be by Mrs. Joe E. Deason, Amarillo.

Business for the zone will be conducted by Mrs. John N. Jacobsen, Jr. of Hereford, Zone Chairman. District business will be conducted by Mrs. E.H. Boedeker, Lubbock, District I Director. Following the business session a workshop will be held on awards by Mrs. O.G. Hill of Hereford.

and a workshop on scrapbooks will be conducted by Miss Lelia Petty, Tulsa.

Mrs. Lee Coil of Lubbock, president-elect of the Texas Garden Clubs, Inc., will be a special guest at the meeting.

Mrs. H.H. Boynton of Pampa will present a program on organic gardening at the noon luncheon to be held in Fellowship Hall of the First Christian Church. Mrs. Lee Harrah of Pampa will give the invocation.

Luncheon favors will be

miniature plaques of dried flower arrangements which will hang from tree branches and be used as centerpieces. These were fashioned by Mrs. Holly Gray, Zone Meeting Chairman.

Other Pampa Garden Club members assisting with the convention include Mrs. Carlton Freeman and Mrs. W.R. Campbell, coffee; Mrs. E.L. Hudson and Mrs. J.V. Young, Sr., registration; and Mrs. Milo Carlson and Mrs. Ralph Esson, convention packets.

PANHELLENIC OFFICERS — Mrs. Richard Stowers, sitting right, installed new officers of Pampa Panhellenic Council recently in the Crown and Shield Room, Coronado Inn. Mrs. Robert Finney sitting left, was installed president. Others installed at the dinner meeting were from left Mrs. E.L. Henderson secretary; Mrs. Jack Reeve, treasurer; Mrs. Robert R. Williams, Jr., vice president; and Mrs. George Cree, out-going president.

The Women's Page

Pampa, Texas 68th Year Wednesday, Nov. 6, 1974

At Wit's End

By ERMA BOMBECK
My fifteen-year-old son said to me the other day, "Mom, I think I'm in trouble. Mitzi is referring my case to Mr. Weems."

"Who is Mitzi?"

"She's the girl at the record club who has been writing me letters saying I can't get out of the club because I still have to buy two more selections."

"Then who is Mr. Weems?"

"He's Mitzi's boss."

"Let me see the letter," I said.

Mitzi was a sweetheart. I could tell by the way she used phrases like, "You are forcing me to do something I really don't want to do, Mr. Bombeck, but you have left me no choice than to speak to Mr. Weems."

I had visions of Mitzi stamping out her cigarettes in her cottage cheese and letting her coffee get cold as she anguished over my son's case. I called her the next morning at the record club office.

"Hello, Mitzi Green please."

"Who?"

"Mitzi Green. She's the girl who has been corresponding with my son about his account."

"Oh, Mitzi isn't a person. She's a computer."

"So put her on."

"You don't understand. Mitzi can't talk."

"Nonsense, she has just written us that she will be talking soon with Mr. Weems about the possibility of bringing legal action against my son."

"But Mr. Weems is a computer too."

"Can he listen?"

"Yes, but you have to understand computers. You can speak to them, but they will not answer you back. You can feed information into them, but it doesn't necessarily mean it will come out 100 percent perfect. They're an important part of the family here at Freako Records, but they are without emotion and without income."

"You have described my son perfectly," I said.

"He's an X-70 model we purchased 15 years ago. Unknown to us, he punched out a membership in your club. According to his print-out, he has already fulfilled his obligation. However, if these two machines want to battle it out, it's all right with me."

"You mean our computer has been corresponding with another computer?" asked the girl on the phone.

"It was just a gut feeling, but I had the distinct sensation they were going to kick a few buttons in the Freako Record company."

Salad Punch
Adding diced or cubed ham to salads boosts their nutritive value and contributes to an appealing appearance. The addition of chilled cubes or pieces of ham makes super salads out of cabbage, potato and Waldorf salads, to name a few. The ham can be heated for inclusion in hot salads such as German potato and wilted lettuce.

District 16 Meeting Nov. 8 Stated By Teachers Association

Chairman of the English section meeting of District 16, Texas State Teachers Association meeting in Amarillo Nov. 8, is Mrs. Bette Truly, English teacher at Pampa High School.

The program this year will be presented by Dr. Jack Walker of the Speech Department, West Texas State University, and a group of his students giving examples of Readers' Theatre and how it can be used in English classes to enhance English literature.

As vice-chairman last year, Mrs. Truly was responsible for securing Dr. Fred Tarpley, Chairman of the Department of Languages at East Texas State University, and Executive Secretary of the Texas Council of Teachers of English for a program on using the Linguistic

approach to English in the classroom. Dr. Tarpley is internationally known in the field of Linguistics.

Mrs. William L. Ellis, English teacher at Pampa Junior High, is secretary this year.

This year's meeting will be held at Tascosa High School, at 1:30 p.m.

Homeowners Warranty Program

EDITOR'S NOTE: This is the first of a two-part series concerning the new homeowners warranty program. The first article explains what the program covers and the second deals with costs and who can participate in the plan.

PART I

COLLEGE STATION — For most people, buying a home is the largest investment they'll ever make. Now there's a protection plan for buyers of new homes, according to one housing and home furnishings specialist.

She's Mrs. Jane Berry with the Texas Agricultural Extension Service, The Texas A&M University System.

"This 10-year, nationally insured plan was developed by the Home Owners Warranty Corporation, a subsidiary of

the National Association of Home Builders. It offers the homebuyer warranty and insurance protection that hasn't existed before," the specialist said.

Reputable homebuilders recognize that they have an obligation to help the buyer protect his investment and this is why the Home Owners Warranty Program (HOW) was developed, she said.

BENEFITS TO THE HOMEBUYER
— HOW's screening assures that the house has been built by a reputable builder.

— All builders registered with the program have pledged to build homes according to HOW's approved standards and to provide the services specified in the Warranty Agreement.

— The homebuyer is provided a built-in procedure for resolving any disagreements with the builder.

— The HOW warranty is backed by a national insurance plan. Its coverage is transferrable to anyone else who buys the house within the 10-year protection period.

"This benefit should enhance the resale value of the house," Mrs. Berry pointed out.

WARRANTY PROVIDES

When a homebuyer moves into a new home built by a participating HOW builder, a Home Warranty Agreement is provided. This is the builder's pledge for the first two years under the program. The buyer receives an insurance Certificate of Participation which enrolls the home master insurance policy covering the rest of the 10-year protection package.

"The home buyer also receives a 'Consumer Information Booklet' which explains plainly all aspects of the HOW program.

THE PROGRAM IN BRIEF
1. For 10 years the home is protected against major structural defects. This is

the builder's obligation for the first two years. The next eight years are covered by a national insurance plan.

2. During the first year, the builder provides a warranty that materials and workmanship in the new house meet HOW's approved standards.

3. During the second year, the HOW builder continues to be responsible for the wiring, piping, and duct work on the systems in the house.

4. During these first two years, the national insurance provided through HOW assumes the builders' responsibilities if he cannot or will not meet the warranty's obligations.

MEAT QUALITY

Dating of meats is only a guideline — not a guarantee. Mrs. Gwendolyn Clyatt, consumer marketing information specialist with the Texas Agricultural Extension Service, the Texas A&M University System, advises. Many factors besides time influence the keeping quality of meat. Temperatures during storage and handling are more critical to the keeping quality of meat than time, she says.

If you don't use all your whipping cream within a certain time limit, don't waste it. Whip it, spoon into dollops and freeze on a flat shallow pan. Then stack in a freezer container, separating layers with waxed paper or plastic wrap and use, frozen, as needed. They'll thaw in a few seconds after being placed atop eggnog, cakes, pies or as fruit garnishes.

Department of Health, Education and Welfare

Mail-order shopping can be pleasant and thrifty. But it may also lead to problems. You receive the wrong color or wrong size or wrong item. Your merchandise arrives two months late. Or it never arrives. Consumers finally have a way of solving many of these problems quickly—through a new service offered by the U.S. Postal Service (USPS).

Under this new consumer protection program, Postal Inspection Service divides complaints into two categories—problems caused by inefficient business practices, and situations that may add up to cases of alleged fraud. In cases of inefficiency, the consumer's complaint is usually resolved more quickly than in cases of alleged fraud. Here's how:

If you have not received merchandise you ordered or a refund you were promised, put your complaint in writing and send it to your local postmaster.

Include this information: company's name and address; brief explanation of your basic complaint; description and cost of merchandise ordered; date order was mailed; full details on method of payment (credit card, money order or check—date and number of check and date cashed); if and when you have already complained to company.

If there is an investigation pending against the company, your letter will be added to that file and you will be notified.

If no investigation is pending, Postal Inspection Service will notify the mail-order company about your

complaint and will give the company a chance to make good immediately. USPS will also notify you of the action it has taken.

If the mail-order company does not cooperate, Postal Inspection Service will start a thorough investigation. This may lead to civil or criminal prosecution against the company.

Postal Inspection Service has been conducting this type of investigation for more than 100 years. (In fact, postal inspections were the first Federal effort to protect consumers from swindlers.)

What is new about the "new" protection program is that now Postal Inspection Service will informally contact mail-order merchants, without formal investigations. In a pilot project, this approach quickly resolved about 80 percent of the consumer complaints.

In dealing with mail-order problems, as with most consumer problems, wait a reasonable length of time before lodging a complaint; the company may be swamped with orders. It is also sensible to contact the company on your own before you complain to USPS.

The Lighter Side

WASHINGTON (UPI) — Despite recent production cutbacks in Detroit, there are enough autos on the road to accommodate the entire U.S. population in the front seats.

The above statistic, which I ran across not long ago, illustrates as well as any the enormity of the inflation-energy problem confronting President Ford.

It is apparent that if energy consumption is reduced enough to halt the wage-price spiral, some of us are going to have to start riding in the back seat. But who?

The United States has had a front-seat economy for so long the adjustment is certain to bring on psychological traumas if not genuine hardships.

Actually, the back seat isn't all that bad. Oh, you might get a bit cramped in some of those sub-compact cars. Especially on long trips.

But if Ford's new economic program is reasonably effective, back seat occupancy can be limited to four-door sedans.

The danger is that when the squeeze comes and there is no longer room in the front seat for all of us, we will start sitting on each other's laps rather than move to the rear.

A lap-sitting economy is exactly what we don't want at this point. It is even worse than a long trip in the back seat of a sub-compact.

In a lap-sitting economy, people complain that they are being squashed or that somebody's tailbone is

drilling a hole in their thigh or that blood circulation to their feet has been cut off.

Clearly, that is not the sort of togetherness that will help us weather the crisis.

What we should aim for is one back seat occupant per vehicle. For when you have two or more in the back seat, the economy is getting close to the point where somebody has to get out and walk.

And that is the point where recession leaves off and depression begins.

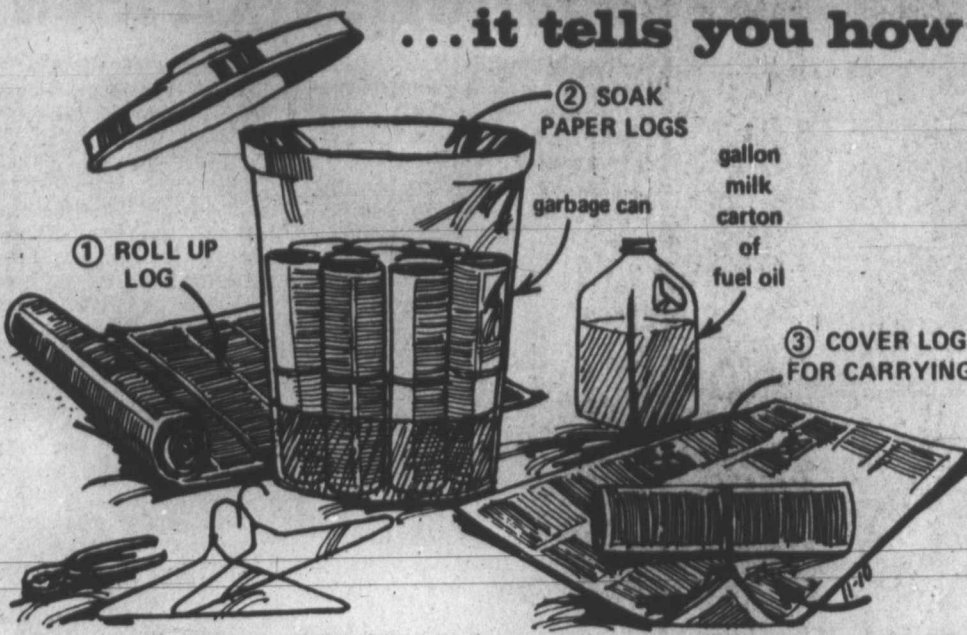

During the great slump in the 1930s, America basically had a running board economy. Which is to say that both front and back seats were full and several persons were riding outside on the running board.

Unfortunately, running boards have long since disappeared from motor cars, a design change that will make it more difficult for the population to cope with future depressions. We shall hope the current inflation-recession crunch doesn't force anyone to ride outside. If it does, some of us will become human bumperstickers.

TAX SURVEY
CHICAGO (UPI) — A survey by the Advisory Commission on Intergovernmental Relations shows that the percentage of taxpayers who think state governments give taxpayers the most for their tax dollars rose from 18 per cent in 1973 to 24 per cent in 1974.

THE MOTHER EARTH NEWS

...it tells you how

If you have a fireplace, you can cut your heating bill somewhat this winter by recycling old newspapers and coasters into long-burning "logs". [1] Roll 6-to-10-page sections of newspaper together until you have a tight log four to six inches in diameter. [2] Secure the roll with a wrap of coathanger wire and place the log—with others—in a leakproof garbage can. Four several gallons of ordinary fuel oil over the rolls of paper and leave them to soak at least overnight. [3] Then, whenever you want a cheery blaze, remove one of the logs, wrap it in a double or triple layer of newspaper and crimp over the ends of the covering (so you can carry the roll to the fireplace without making a mess). Add more homemade logs to the soaking container and remove them as you see fit. ... just make sure you always have enough oil in the can to thoroughly saturate every one. Each roll of paper should burn nearly two hours.

If you're lucky enough to have access to a source of real firewood, but you don't know how to cut it... send 10¢ and a stamped, self-addressed long envelope to THE MOTHER EARTH NEWS, Box 957, Des Moines, Iowa 50304. Ask for Reprint No. 4, BASIC AXEMANSHIP.

UNTIL DEC. 7, ANYWAY

Want To Make A Call? Talk To The Operator!

EL PASO, III. (UPI) — This is the only place in Illinois where you still get a live operator instead of a dial tone when you pick up the phone.

You want Topsy's Bar or the grocery store? You've got to go through one of El Paso's 22 operators, even if you have one of those newfangled touch-tone or dial phones.

But it won't be this way for long.

Come Dec. 7, the El Paso Telephone Co. moves from its cramped but cozy second-floor quarters in an old wooden building to a brand new brick one next door.

From there, El Paso's 1,450 telephone subscribers will be served by a spanking new automatic system that skips over operators.

The man in charge of the independent El Paso phone company, 75-year-old Virgil Gordon, has no qualms about spending hundreds of thousands of dollars on the new equipment that will end an era.

"We're getting about 100 new customers a year," Gordon said. "There's just no room on our existing equipment to add more lines when we cut over."

"We'll have the most modern equipment. There's nothing better anywhere in Illinois."

Conducting a tour through the small back room where all El Paso's phone equipment is housed, Gordon shrugged. "I'll probably sell this stuff for scrap metal. You can't keep everything."

Outmoded equipment won't be the only thing El Paso will lose when the system goes modern.

Gone will be the telephone with which, free of charge, kids can call their parents until 6:30 at night to get a ride or phone their friends to make a date.

Don't other people take advantage of this arrangement? "No," said Gordon's son, Robert. "The operators get to know the kids' voices. They know who's entitled to it."

Something else will be missing—operators—but Virgil doesn't like to talk about it.

"We'll keep some of them, of course, and the rest we'll pay through the end of the year," he said. "We'll see what happens after that."

Whatever happens, he'll keep his memories of the way things used to be.

His father, a doctor, set up the town's first switchboard in his house at the turn of the century.

"Dad ran the lines from our house to his patients for convenience," Virgil said. "For two years, Mom would be up all hours of the day and night to put callers through. There were 25 different bell tones to tell people apart."

Virgil's favorite story concerns the old style of running underground telephone cable—attaching it to ferrets and letting them chase rats.

"This is how our cable beneath the streets was laid years ago," he said. "The only problem was, after sucking blood from four or five rats, the ferrets would get lazy and you couldn't get any more work out of them that afternoon."

SALES INCREASE
AUGUSTA, MAINE (UPI) — Despite the energy crisis, more gasoline was sold to customers in Maine in 1973 than in 1972, says the Bureau of Taxation.

Total gross taxed gallonage sold to the public in 1972 was 517,865,317. In 1973 the figure was 533,230,946 gallons.

Classical records

By WILBUR G. LANDREY
NEW YORK (UPI) — A good many people would recognize the name of Giuseppe Verdi even if they hadn't decided to make a motion picture about him, and opera's greatest composer (the Wagnerians will dispute it) is particularly well-served in the recent crop of recordings.

No fewer than three Verdi operas have been issued on records, including his second, "Un Giorno di Regno" (King for a Day) and his next to last "Otello," which help demonstrate the amazing development of his music.

"Un Giorno di Regno" was Verdi's first attempt at opera buffa; he was not to serve the muse of comedy again until the miracle of "Falstaff," his last opera when he was in his 80's.

"Giorno" was a failure, and that was why it had to wait 134 years to get its first complete, first stereo recording just released by Philips (6703 055). The plot is not very good, because of the tessituras of its principal roles, it is difficult to cast; but the rousing vigor of Verdi is there rising above the imitation of Rossini and Donizetti.

The cast is excellent—Fiorenza Cosotto, Jessye Norman, Jose Carreras, Ingvar Wixell, Vincenzo Sardinero and Wladimiro Ganzaroli in the significant roles. It is well directed by Lamberto Gardelli with the Royal Philharmonic Orchestra.

In a way, it's too bad there isn't a new recording of "Falstaff" to compare with Verdi's first comic effort. But "Otello," the setting to music of Shakespeare's great tragedy, nevertheless demonstrates Verdi's musical and operatic development since "Giorno."

"Otello" was Verdi's answer to Wagner and those composers being influenced by him. In place of Wagner's magic emphasis on the orchestra, Verdi showed the way forward by keeping the

focus on the singers and developing a vocal line without interruption that binds together the opera in a way never achieved before and very seldom since.

Herbert von Karajan's production for Angel (SCLX-3809) realizes the Verdi drama with chilling clarity. The cast—Jon Vickers as Otello, Mirella Freni as Desdemona and Peter Glossop in the prize role of Iago—is magnificent. The orchestra is the Berlin Philharmonic.

The other recent Verdi opera on records is "Simon Boccanegra" by RCA (ARL 3-0564). This is the Verdi opera which had its not very successful premiere and first performance in 1856 and then was revised to come back triumphantly in 1881.

RCA produced this recording in Italy. The result is not quite as happy as the other two Verdi albums in casting or production, but its addition to the catalogue is nevertheless welcome.

Placido Domingo stands out in the cast which includes Katia Ricciarelli, Piero Cappuccilli, Ruggero Raimondi, Gion Pier Mastromei and Maurizio Mazzieri. The conductor is Gianandrea Gavazzeni.

Finally, for Verdi lovers must be mentioned another Philips album of two records containing the complete ballet music from Verdi's operas conducted by Antonio Almeida with the Monte Carlo opera orchestra and the London Symphony orchestra (6747 093).

"La Boheme" (RCA ARL 20371)—this is a fine version of Giacomo Puccini's ever touching classic sung by the stellar cast of Monserrat Caballe, Placido Domingo, Sherrill Milnes, Judith Blegen and others under the direction of Sir Georg Solti with the London Philharmonic.

"Therese" (London ADSA 1165)—This is a first recording of Jules Massenet's work, sung by Huguette Tourangeau, Ryland Davies and Louis Quillico in a production directed by Richard Bonynge with the New Philharmonia Orchestra.

"Hansel and Gretel" (RCA ARL 2-0637)—Engelbert Humperdinck's children's opera with a star cast of Anna Moffo, Helen Donath, Christa Ludwig, Dietrich Fischer-Dieskau, Charlotte Berthold, Arleen Auger and Lucia Popp.

"Khovanshchina" (Melodiya-Angel SDRL 4125) — Modest Mussorgsky's uncompleted opera performed by the soloists, chorus and orchestra of the Bolshoi Theater.

"Les Indes Galantes" (Columbia M 3 32973)—Rameau's operaballet performed by La Grande Ecurie et La Chambre du Roi under the direction of Jane-Claude Malgoire.

SHORTAGES POSSIBLE

Energy Crises Requiring Water

WASHINGTON (UPI) — Getting the United States through its energy crises will take so much water that some other uses — such as farming — could suffer, the National Petroleum Council believes.

The finding is one of the conclusions of an NPC survey of water availability in the long-term American energy outlook until 1985.

"If the water supplies are to be available when needed to develop other energy resources as substitutes for petroleum, several national and interstate issues must be resolved," the Council said.

The report said the issues include:

- National policy that recognizes the volumes of water needed;
- Federal government encouragement of building of new reservoirs;
- "Stabilizing" the federal, state and interstate policies that link water and energy availability;
- The environmental effects;
- Interstate water allocation compacts and state water resource authorities must recognize that some future energy resource developments will require reallocation of water supplies from other uses, most likely from agriculture," the NPC said.

Because the West has such a big part in the energy future, and because water supply is often touch-and-go in that region, such water basins as the Upper Colorado River and the Lower Missouri River become "critical," the report says.

The study looked at four possible levels of energy effort, ranging from all-out through two intermediate efforts, to a "lowest supply case."

For the all-out effort, it appears water in the West will be adequate under present allocations "in all areas except Arizona and New Mexico," the report said.

Those states' long-range projections of water allocation for energy production fall short considerably of what now seems needed for an all-out nationwide energy push, the report said.

But that gap could be closed by some alternatives: taking water from competing allocations, pumping water in from other states, weather modification efforts, or shifting planned power plants to somewhere else with better water outlook.

Even if supply is assured, the NPC pointed out, "The problems of water quality can be expected to become more important in the arid western states as western, industrialization and energy production continue to grow. Assuming rigorous compliance with plant and municipal effluent standards, problems of stream quality deterioration may develop from diversion of natural flows which have historically diluted the natural pollutants from mineral springs, agriculture return flow, and the like."

As for the East, "at reasonable development rates there would be no serious water availability problems" in the energy-important Appalachian and Illinois coal areas, the report predicted.

Beyond 1985, water availability in the West is likely to be a damper on further "major growth" of synthetic fuels and electricity, particularly in the Colorado and Missouri basins, the NPC said.

The amounts of water for energy production are enormous, the report pointed out: a coal liquefaction plant, for example, requires 5.3 barrels of water for each barrel of oil produced.

"If availability of water in sufficient quantities is to be ensured, three primary requirements must be satisfied — the early establishment of a near-billion-dollar program of dams and aqueducts, the reconciliation of disputes over water rights and allocations, and the procurement of large amounts of capital for project investments, taking into account the long lead times," the report said.

The ptarmigan — a game bird of high mountains and the far north — moults its toe nails twice a year. During winter, the bird's long claw-like nails permit easier walking on ice. More conventional nails are grown in the spring to adapt to low, succulent vegetation.

It Sims To Me...

By PAUL SIMS
Sports Editor

When you've got three running backs who are all potentially explosive and among the district leaders, you've got what's called balance.

But when you've got three explosive backs and a fine passing game, what do you call that? Superbalance?

Palo Duro, a team not really feared for its passing game, was beating the socks off Amarillo High Saturday, and for no apparent reason. Don head coach Doug James had quarterback Stanley Stambaugh start putting the ball in the air. Why? Was he trying to run up the score? After all, there is no love lost any time Palo Duro, or any Amarillo team for that matter, plays the Sandies.

Pampa coach John Welborn says no. Palo Duro used its four-touchdown lead (PD finally won, 35-3) as an opportunity to get in some throwing practice — practice for Pampa, the Dons' opponent this Friday in Dick Bivins Stadium.

"When you get a four-touchdown lead," said Welborn, "you have an opportunity, that you don't have at other times, to work on your passing game. I don't blame them one bit. A lot of people think they were trying to run up the score, but really, they weren't."

"I've done this before — it gives you the opportunity to throw a little bit."

"I think they have a much better balanced offense than most people give them credit for. I think if they had their druthers, though, they would rather stay on the ground."

Stambaugh completed five of 13 passes for 122 yards and a touchdown against the Sandies. The 13 attempts is the most he's thrown this year — prior to the game, Stambaugh had put the ball up only 38 times.

So, it's likely PD will mix runs with passes, more than it did with Amarillo High, against the Pampa defense, which is the best in 3-AAAA against the run.

The Harvesters will have to key on the run, however, since that's what the Dons do best. Fullback Greg Sellmyer is tops in the district with 149 carries on the season for 873 yards and 15 touchdowns. David Beezley is tied for second with Chuck Velasquez of Caprock with 70 carries for 822 yards and seven touchdowns. That's good enough for an 11.7 average gain per carry, while Velasquez is averaging 4.6. And Rodney Towner, the Dons' other halfback, has carried 79 times for 546 yards and three touchdowns.

Then there's Stambaugh, an adequate ball carrier, and Greg Towner, Rodney's brother, who is quite capable.

★ ★ ★

A look at why PD is 8-0:

1. PD 20, Dumas 14, 322 yards rushing — Beezley, 6 carries for 194 yards; Sellmyer, 15 for 106.

2. PD 27, Hereford 14, 317 yards rushing — Sellmyer, 22 for 108; Beezley, 13 for 103; Towner, 14 for 94.

3. PD 27, Clovis, N.M., 6, 264 yards rushing — Towner, 6 for 79; Sellmyer, 18 for 77; Stambaugh, 14 for 65; Beezley, 5 for 20.

4. PD 35, Lubbock Coronado 17, 289 yards rushing — Sellmyer, 27 for 180; Towner, 9 for 62; Beezley, 8 for 47.

5. PD 41, Canyon 14, 366 yards rushing — Towner, 17 for 139; Beezley, 11 for 123; Greg Towner, 1 for 56; Sellmyer, 14 for 49.

6. PD 28, Tascosa 14, 271 yards rushing, Sellmyer, 21 for 201; Stambaugh, 14 for 54; Beezley, 2 for 15; Towner, 2 for 1.

7. PD 21, Borger 10, 366 yards rushing, Beezley, 12 for 188; Sellmyer, 11 for 88; Towner, 12 for 70.

8. PD 35, Amarillo, 3, Beezley, 13 for 132; Greg Towner, 6 for 88; Rodney Towner, 8 for 73; Sellmyer, 15 for 64.

That's balance!

★ ★ ★

"We're going to have to play excellent defense," said Welborn.

"We'll try to force them to make mistakes that they haven't been making (PD didn't lose any fumbles to Amarillo). We're going to have to take the pitch away from them."

"Their fullback will go up the middle and off tackle. He's probably one of the finest running backs in this area."

"I think they run their offense as well as any high school team I've ever seen. They have the ability to throw the ball; they're difficult to defend, they're balanced, they're versatile, they've got great people. I don't see how they could keep from playing with some of those teams down in the Odessa and Midland area."

★ ★ ★

Little has been said about Pampa's offense, which ranks second in the district with an average of 272.8 yards an outing. Halfbacks Rick Leverich and Tim Thornburg, fullback David Smith and quarterback Chuck Quarles give the Harvesters the potential to knock Palo Duro out of the stadium.

Leverich has rushed 100 times for 493 yards and eight touchdowns, followed by Smith, 85 attempts for 333 yards and two touchdowns, and Thornburg, 65 tries for 326 yards and three touchdowns. Quarles has added 193 yards on the ground and is the best two-way threat of area quarterbacks.

The 5-7 Quarles has completed 22 of 44 passes for 517 yards and eight touchdowns. He has suffered only three interceptions. His favorite receiver is 6-6 Howie Lewis, who caught TD passes of 25 and 75 yards last week against Borger.

The key to a Pampa win will probably lie in the defense, which has been the best in either this district or Lubbock's all season. The Harvesters have given up only 490 yards rushing and 487 passing.

I will be up to linemen Dane Rassmussen, Dick Blaine and Ron Willett to contain Sellmyer; Kelly Baker and Tyler Drinnon to contain Beezley and Towner; linebackers Joe Holt and Coy Free to back up the line and stop the short passes to the backs and split end Larry Lipscomb, and to the secondary of David Edwards, Mike Adair, Willis Price and Lewis Dinkins to hold Lipscomb, a deep threat.

In other words, the whole defense will have to be ready.

Marshall Wins NL Cy Young Award

SHOCKER STANDOUT — Halfback Ricky Moore scored four touchdowns and led all rushers last week as the Pampa junior varsity belted Tascosa, 49-0, at the Shocker Field. Pampa has only two games left, Thursday at Caprock and Nov. 14 at Borger. Both games will have 4 p.m. kickoffs.

(Photo by Jim Williams)

NEW YORK (UPI) — "Iron" Mike Marshall, the Los Angeles Dodgers' record-setting relief pitcher, today became the first of baseball's "Fireman Corps" to win the Cy Young Award as the best pitcher in the National League in 1974.

Marshall, who appeared in a record 106 games for the Dodgers while compiling a 15-12 won-lost record with 21 saves, received 17 first-place votes and a total of 96 points from the Baseball Writers Association of America (BBWAA) in beating out teammate Andy Messersmith for the coveted Cy Young plaque.

Messersmith, the Dodgers' leading winner with a 20-6 record, finished second with five first-place votes and 66 points, while the National League's only other 20-game winner, Phil Niekro of Atlanta, was third with 15 points. The Dodgers almost made it a 1-2-3 sweep as Don Sutton, their No. 2 winner behind Messersmith with 19, was fourth with 12 points.

Ironically, it was the same sports writers Marshall repeatedly brushed aside with gruff "no comments" this season who saw fit to bestow the estow the heretofore "starters-only" award on a relief pitcher in baseball's past history only one relief pitcher—Jim Konstanty, the National League's Most Valuable Player with the 1950 Philadelphia Phillies—has ever won a major award.

As it is, Marshall is still in line to win the NL MVP award, too. Only five pitchers—Sandy Koufax, Bob Gibson, Denny McLain, Vida Blue and Don Newcombe—have ever won both the Cy Young and Most Valuable Player awards.

Marshall, speaking from his home in East Lansing, Mich., thanked the writers who voted him the award.

"The challenge that motivates me is to do the best job I possibly can," he said. "I've never gone into competition for awards but give whatever I have for whatever team I'm playing

for. In this case, the Dodgers. The Dodgers as a team has more talent than any ball club I've ever been with. Two years ago Gene Mauch called me the greatest relief pitcher he'd ever seen. Walter Alston earlier this year said I was the finest relief pitcher he'd been around. That meant a great deal to me."

"I don't mean to belittle this award. In fact, I'd like to thank all the sports writers. I realize it must have been a tremendously difficult selection with the great years Andy Messersmith and Don Sutton had."

"The more I saw him pitch, the more I liked and admired him," added Alston. "He never once gave me any indication he was tired or didn't want to pitch. He has his own ideas on pitching and you have to admire that too. He's really something else."

Acquired in the off-season from Montreal for centerfielder Willie Davis, the mustachioed Marshall was the one of the main cogs in the Dodgers' successful National League pennant run this year. In addition to the 106 appearances, Marshall also appeared in a record (for relief pitchers) 208 innings while compiling a 2.59 earned run average—fourth best in the league.

An off-season psychology professor who is also studying for his doctorate at Michigan State, Marshall finished second in the Cy Young voting behind Tom Seaver of the Mets a year ago after appearing in what then was a record 92 games for the Expos. Seaver did not receive a vote in the '74 balloting.

Although the playoffs and the World Series competition were not included in the voting, Marshall appeared in two of the four playoff games for the Dodgers against the Pirates and in all five World Series games versus the champion Oakland A's.

However, in the final Series game, he gave up a home run to the A's Joe Rudi which won the championship for Oakland.

During the regular season, however, Marshall's 15 wins and 21 saves made him directly responsible for 37 of the Dodgers' 102 victories—35 per cent.

Dutchman Fired As Head Coach

ATLANTA (UPI) — Rankin Smith finally heeded the "Dump the Dutchman" pleas of Atlanta Falcons fans.

The Falcons owner fired Norm Van Brocklin as head coach and general manager Tuesday evening and named defensive chief Marion Campbell to coach the team for the remainder of the season.

The move was not unexpected.

Van Brocklin, former Minnesota Vikings coach who took over the Falcons during the 1968 season, had incurred the wrath of Atlanta fans for the Falcons' poor offensive showing and of the local news media for his curt, often sarcastic interviews.

Smith, a multimillionaire insurance executive, had considered sacking Van Brocklin last year when the Falcons got off to a 1-3 start, but swung to his coach's side when Atlanta reeled off seven straight victories to move into contention for an NFL playoff berth.

The Falcons lost that berth because of late-season upsets by Buffalo and St. Louis, but their 9-5 record was their best in eight NFL seasons and they came into 1974 rated a playoff contender.

Instead, the Falcons lost their first three regular season games, rebounded briefly to beat the New York Giants and Chicago Bears, then lost their next three games.

The final blow was Sunday's game at Miami when the Dolphins, despite numerous injuries, humiliated the Falcons, 42-7.

Smith said Sunday that he might change coaches if he had a replacement but insisted he didn't know where he would find a new coach at mid-season.

Just Monday, Van Brocklin brushed aside the "Dump the Dutchman" campaign, saying, "The only many who can dump the Dutchman is Rankin Smith. He is the man who hired me."

But there was a feeling

10-POINT ELK — Johnny Broutherton bagged this giant recently off Slumgullion Pass near Lake City, Colo. The elk weighed approximately 650-700 pounds. Mr. and Mrs. Broutherton reside at 515 E. Foster in Pampa.

Sugar Bowl Announces Gators Vs. Cornhuskers

United Press International
Announcement of the Sugar Bowl matchup of Florida vs. Nebraska opens a flood gate that had been scheduled to remain closed a couple more weeks.

Although the NCAA threw out its former limitations on colleges' acceptance of postseason dates, bowl representatives, at a meeting at St. Simon's, Ga., last May, agreed to wait until mid-November before extending this year's bids.

The agreement drew chuckles then from those who did not believe the bowls would honor it and proved to be a laugh when the Sugar Bowl pairing of seventh-ranked Florida (7-1) against eight-ranked Nebraska (6-2) was disclosed.

Actually, the Sugar Bowl hadn't intended for the announcement to get out this early. The idea was to line up the teams early but keep the fact under wraps.

The Orange Bowl apparently has both its teams lined up — Alabama and Notre Dame. There has been no announcement, but it was pretty well understood that a rematch between the Crimson Tide and Fighting Irish was in the offering. It was just a question of whether that

Saturday's game at Kentucky are cinches by any means.

The Sugar Bowl wanted Alabama-Notre Dame and, when this fell through, was left with if it waited until Nov. 16 as earlier agreed.

Nebraska figures to go into the Sugar Bowl either 8-3 or 9-2, depending on who the Cornhuskers fare in their final regular-season game, at home against powerful Oklahoma on Nov. 23.

If Oklahoma weren't on NCAA probation, the entire bowl picture would be changed since the Sooners probably would have had first choice at any major bowl except the locked-in Rose.

Memphis State (6-2) appears to be the best bet among the Southeast independents for a bowl invite, especially if the Tigers should upset Tennessee Saturday. Miami of Florida, at 5-2, is another possible bowl candidate.

Maryland (5-3) and N.C. State (7-2) are two Atlantic Coast Conference teams expecting post-season bids and North Carolina (5-3) is an outside prospect.

Now that the flood gate is opened, the bids will be pouring out.

VIEW FROM THE PLAINS

Amarillo Chamber To Have Sheep, Deer Trophy Contest

By J.D. PEER
AMARILLO — Have you spotted that trophy buck or aoudad sheep that you might have a chance to bag in November?

The sports committee of the Amarillo Chamber of Commerce is again sponsoring a trophy contest for aoudad sheep, mule deer and white-tail deer bagged in the Panhandle Regulatory District.

The individual who bags the deer or aoudad sheep with the largest antler or horn will be presented a coin set of the U.S. Bicentennial Commemorative Metals. Doug Raines, chairman of

the sports committee, said today.

"The value of this coin set," Raines continued, "is \$50."

Texas Parks and Wildlife game wardens will be official measurers of these three species of animals.

Entry blanks can be secured from any game warden in the Panhandle or by writing Amarillo Chamber of Commerce, Amarillo Building, Amarillo, Texas 79101.

The cricket frog holds a type of world record for the standing broad jump — 40 times its own length.

American Beef Is An Equal Opportunity Employer

Investment Chatter

NEW YORK (UPI) — Merkin & Co. says the relative weakness of the utility and transportation averages along with the reduced amount of odd-lot short-selling suggests that "a significant downside test" is yet to come. It says that generally the overall list has developed a greater potential for an intermediate if not major recovery which could commence upon a successful test of the anticipated decline.

Winkler, Cantor, Pomboy & Co. says that while a return to the 600 level of the Dow Jones industrial average is "possible," it would be considered a "test of the bottom" and not the "precursor of another major selling wave." It suggests to investors that now is the time "to pick the stocks you want to own and be prepared to buy them on weakness."

Lionel D. Edie & Co. says that its 1975 inflation estimates "have been shaded a bit lower," reflecting the marginally weaker economic activity it now expects. It adds that if business activity "should slump faster and by more than our estimates, then our current estimates of inflation and interest rates... will prove to have been too high."

The Delaware River is 330 miles long.

Mainly About Skellytown

By MRS. C. COLEMAN
Mrs. Earl Lane accompanied by Mrs. Ruby Franks has recently returned home from a trip, they visited a former resident and family, Mr. and Mrs. Larry Cole and two children at Hart. Mrs. Lane visited three of her sisters and their husbands, Mr. and Mrs. Ed Brock, Mr. and Mrs. Woodrow Nelson and Mr. and Mrs. Owen Brock all of Demmitt. Mrs. Drank's visited her sister and husband Mr. and Mrs. Tyler Bridges at Plainview.

Mr. and Mrs. M.L. Giesler and daughter Ramona spent the weekend in Abeline where they visited the Gieslers daughter and husband, Mr. and Mrs. Charles Garrett.

Mrs. H.M. (Leona) Coday is a patient in the Highland General Hospital, where she underwent major surgery.

Mr. and Mrs. Dan Holloway spent the weekend with their daughter and family, Mr. and Mrs. Bob Thompson and children at Mayfield, Okla.

Mrs. A.L. (Billie) Lane, Cabot Camp is a patient in the Worley Hospital where she underwent major surgery. Bill Price is also a patient in the Worley Hospital. Virgil Weaver has been dismissed from the Worley Hospital where he underwent major surgery.

Mr. and Mrs. Herman Mayfield were business visitors Saturday in Amarillo.

Mr. and Mrs. Clifford Coleman, and Mr. and Mrs. Ross Coleman and sons of

Pampa, were Sunday dinner guests in the home of the Bill Smith family in Pampa.

Mrs. Howard (Vina Lou) Moore of Duncan, Okla. and her daughter, Mrs. Randy Elliott, and daughter Angela of Duncanville, spent the weekend with Mrs. Moore's sons, David and Charles Moore, and Mr. and Mrs. Malvin Neill and daughter Gwyn.

Mrs. Rob (Allie) Harlan of Borger, accompanied by Mrs. Kate Enochs, were in Amarillo Tuesday on business.

Mrs. Dianne Morrison and son Mark of Vancouver, Canada are here for a visit with her parents, Mr. and Mrs. Silas Paul and family and her grandmother, Mrs. Ethel Hunt.

Mr. and Mrs. Clarence Kaiser spent Saturday in Amarillo where they visited their daughter and family, Mr. and Mrs. Charles Meadows and children.

Mr. Greg Dennis and Troyann of Bowers City has accepted the job as Song Directors of the First Baptist Church in Skellytown.

Jimmy Franks and two children, Jamie and Joel, of Lubbock visited his mother, Mrs. Ruby Franks, Saturday.

Mrs. Earl Lane visited Sunday with her sister and her husband Mr. and Mrs. A.R. Clawson in McLean.

Mr. and Mrs. C.E. Dehls of Skelly Crawford Camp returned home Sunday from Phoenix, Ariz. where they visited Dehls' sister, Mrs. Jennie Misenheimer and his

mother, Mrs. Minnie Dehls, who is spending the winter with her daughter Mrs. Dahls' home in Arkansas. Mr. and Mrs. Dehls also visited their son, Larry, and family in Plano.

Mr. and Mrs. Jack Rovinson, who live at the Skelly Crawford Camp north of Skellytown, had as weekend guests in their home, their two grandsons, Jeffery and Shannon, sons of Mr. and Mrs. Jim Younger of Plainview.

Mrs. Merle (Mary) Kramer was injured Tuesday in a car accident in Pampa she is a patient in the Highland General Hospital.

Peter Cousins, former minister of the Church of Christ Church in Skellytown, now living in Tucumcari, New Mex., visited Mrs. H.M. (Leona) Coday Tuesday at the Highland General Hospital. He also visited Mr. and Mrs. D.C. McCarthy. The McCarthys had as weekend guests in their home McCarthy's cousin and his wife, Mr. and Mrs. Jessie Snow of Sundown.

John Hassler, son of Mr. and Mrs. Ben Hassler, has returned home from Norway, where he has been employed as a welder for a contractor for Phillips Oil Co. John and his wife and small son live in Borger.

Mr. and Mrs. Harold Crawford entertained Monday night with an anniversary supper for his father and wife, Mr. and Mrs. E.E. Crawford on their second wedding anniversary.

Mr. and Mrs. Ralph Gilpin had a dinner guests-Friday evening their grandson and his wife, Mr. and Mrs. Boyd Freeman of Fort Worth. They were enroute to Las Vegas, Nev. The Gilpins has as a weekend guest their grandson, Mark Lamb, son of Mr. and Mrs. Preston Lamb of Pampa.

Mr. and Mrs. Harvey McCabe of Phoenix, Ariz. accompanied by his brother and wife, Mr. and Mrs. K.S. McCabe, have returned home from vacation they visited Mr. and Mrs. Floyd Dixon, Cleveland, Okla., and another sister Mrs. Pearl McCabe of Osage, Okla., and visited an uncle and wife, Mr. and Mrs. C.H. McCabe at Luttrell, Ark.

Mrs. Eula Berry spent the weekend in Wellington where she visited her brother Wayne Reynolds and wife, recent weekend guest in Mrs. Berrys' home was Mrs. Darlene Russell and her mother of Amarillo.

Wage earners lose 297 million work days a year as a result of some acute medical condition, an average of almost four days off the job for each worker in the nation.

Men lose more days from work than women for all acute medical conditions.

Injuries, the second leading cause of work-loss days, occur more than twice as often to men than to women.

The average American incurs close to three days of restricted activity a year because of injuries or illnesses.

Persons from families with an annual income of less than \$3,000 average nearly five weeks of restricted activity days for both acute and chronic medical conditions.

Persons from families with an income of \$10,000 to \$14,999 have an average of less than two weeks of restricted activity annually.

—Health Insurance Institute

CLUB MARKS 50th YEAR — Members of the Z-R Nine gathered in Pampa for a golden anniversary reunion Saturday. The nine original members of the social club formed while they were students in Canadian High School in 1924, spent the weekend in Pampa. WHAT HAPPENED TO...

Coppolino In 3rd Prison, Project Blue Book Shut

AVON PARK, Fla. (UPI) — The gates of Florida State Prison at Raiford slammed behind Dr. Carl A. Coppolino in 1967. It marked the end of two related murder cases that are celebrated in American criminal history.

Coppolino was convicted on circumstantial evidence in 1967 at Naples, Fla., of second degree murder in the 1965 death of his wife, Carmela, at their Longboat Key home near Sarasota. He was accused of injecting her with succinyl choline, a

muscle paralyzing drug used in surgery. It is fatal if unattended. It disappears with in the body shortly after being injected.

The handsome, dark-haired physician began a life sentence May 4, 1967, after failure of an appeal by F. Lee Bailey, who had lost the case as Coppolino's trial lawyer. But Bailey earlier had won acquittal for Coppolino in New Jersey on charges of murdering his girl friend's husband by strangling after trying to

inject him with the same deadly drug.

Coppolino has served in three prisons, each with lessening security. He has been at Avon Park Minimum Custody Prison since Aug. 6.

James Tompkins, assistant superintendent at Raiford, remembers Coppolino as "friendly and quite talkative." The doctor was rumored to have set his own broken nose, after a prison fight, with such plastic skill that he improved his looks. But no prison officials would confirm the story.

Coppolino works with other inmates in the Avon Park prison library, checking and cataloging. His nemesis is state Attorney General Robert L. Shelin, who wants him kept behind bars at least 25 years as a menace to society. The average time served by lifers in Florida is nine and a half years.

Science Today

NEW YORK (UPI) — How good or bad is your nightly network news show?

This question was posed by the National Town Meeting Sunday when it critiqued network television news.

And what was unfortunate about this live PBS broadcast, which will be repeated on videotape throughout the week, is that it really never answered the question despite a panel of experts: David Halberstam, the Pulitzer-winner and former New York Times reporter; Nicholas Johnson, the former FCC commissioner; and Sig Mickelson, the former president of CBS news.

Much of the panel's time was spent reeling off bromide after bromide about network TV news and the caliber of newsmen who appear on the nightly broadcasts.

They all admitted that TV news was not the best source of information, but it was the best source of information available on television. That is like saying military music is the best music in the Army.

Halberstam called network news a good front page without a second page to give the listener the

background or explanation. Johnson made a list of 15 objections he had to the networks. However, many of these have been discussed before — the use of TV by a president; the emphasis on violence; and the Washington - New York bias of broadcasters.

Mickelson, who was a substitution because network newsmen declined to appear on the show, wound up agreeing with those who were supposed to bludgeon him with their comments.

Equally disappointing was the question and answer session by the students of Yale University, who hosted this Sunday's program. Their questions were about as brilliant and as incisive as a fourth grade civics student.

It would have been interesting to have seen what type of student response would have developed if the show had been done at the University of Mississippi or UCLA or Ohio State.

There are some very serious questions about television news that should have been asked or at least explored by this show. But they weren't and this show was really just another example of old beer in a new barrel.

GAS SUPPLY

UNIVERSITY PARK, Pa. (UPI) — A Penn State mining engineer says there is enough methane gas buried in pockets under Pennsylvania to heat the state and most of New England indefinitely.

Dr. Robert Stefank says 300 million cubic feet of the gas escapes into the atmosphere daily.

"In the interest of improved efficiency alone," he says, "we would do well to consider the tapping off of methane."

Pork Not "Fat Food"

Pork is no longer a "fat food" forbidden to those on diets to reduce. Two leading dieters groups, Weight Watchers, International and Diet Workshop, now include pork in their approved menus. Today's pork has less fat, fewer calories and more protein, making it an acceptable food for those trying to lose weight through a practical diet.

Women Mark 50th Year As Social Group

A tradition begun in 1924 marked its 50th year last Saturday when the nine original members of the Z-R Nine social club reunited for an evening of social activity and day of visitation.

The club was formed by nine Canadian High School students in 1924 and was dubbed Z-R Nine after a zeppelin air ship.

The group reunited for the first time since 1932 when members gathered in Amarillo in 1971.

Members arrived in Pampa Saturday and enjoyed a social hour at Pampa Country Club and then dinner at the Pampa Club. Members returned to their homes Sunday after brunch.

Mrs. Robert (Carrie Lee Mathers) Schwartz traveled from Colorado Springs for the event. Those attending from Amarillo were Mrs. M.W. (Evelyn Whately) Lemons, Ms. Miriam Clark and Vera (Chance) Jones. Ruth Shaller and Helen Snyder traveled from Canadian; and Mrs. H.H. (Regina Johnson) Rasor, Mrs. George (Reba Johnson) Philpott, came from Miami. Mrs. Frank (Dorothy Blanton) White Jr. traveled to the reunion from Clearendon.

TV In Review

By AL ROSSITER JR., UPI Science Editor
WASHINGTON (UPI) — Do large doses of vitamin C prevent colds?

Many people think so, including some respected scientists. But The Medical Letter, an authoritative publication for doctors, says a review of recent clinical studies indicates that substantial amounts of vitamin C do not prevent colds.

"And evidence suggesting that the vitamin might reduce the severity or duration of colds is not convincing," the nonprofit publication said in a recent issue.

The controversy started four years ago when a book by chemist Linus Pauling, two-time Nobel Prize winner, recommended massive doses of vitamin C to combat the common cold.

The claim prompted a number of studies in the United States, Canada and Ireland to see if the vitamin would control or prevent colds. The effects of large doses of vitamin C were compared with those of dummy pills with neither the researchers nor the subjects knowing who was getting the vitamin.

A Canadian study of 818 volunteers in 1972 found that the only significant difference between the vitamin group and the dummy pill group was that those receiving vitamin C who caught colds spent less time confined to the house.

A larger, more recent study by the same Canadian researchers found that those taking vitamin C caught just as many colds, and they were just as severe, as those on the dummy pill. And the amount of vitamin C taken did not seem to make any difference.

The Medical Letter said a small study of 21 adults in the United States observed the results after a cold virus was placed in their nasal passages. All 11 people taking vitamin C in large doses caught colds as did all 10 taking a dummy pill.

A study reported in January of 666 Indian children at a boarding school in Arizona found that those receiving vitamin C had fewer days of sickness from respiratory infections. But sick days from nonrespiratory illness also were about 30 per cent less in children taking vitamin C and The Medical Letter said a statistical analysis of these results showed no consistent effect due to the vitamin.

Another trial, in Dublin, produced somewhat confusing results with no firm evidence that the vitamin prevented colds or lessened their severity. The Medical Letter said.

Vitamin C is ascorbic acid and humans get it from fresh vegetables and fruits, particularly citrus fruits. The lack of the vitamin was responsible for scurvy, the scourge of seamen confined to sailing ships on long voyages without fresh foods.

The National Research Council recommends daily vitamin C intake levels of between 50 and 60 milligrams for most people.

THE PAPER TO LOOK AT

Thoughts

From The Living Bible

"Born again!" exclaimed Nicodemus. "What do you mean? How can an old man go back into his mother's womb and be born again?" Jesus replied, "What am I telling you so earnestly is this: Unless one is born of water and the Spirit, he cannot enter the Kingdom of God. Men can only reproduce human life, but the Holy Spirit gives new life from heaven; so don't be surprised at my statement that you must be born again!

WANTED: ANTI

Your Horoscope

By Jeane Dixon

Thursday, NOVEMBER 7

Your birthday today: Opens a year of healthy growth, in which existing limits are useful challenges that stir adaptation. There are no problems beyond those you make for yourself. Relationships bring you into contact with all the external resources you will need. Today's natives are milder than most other Scorpions, apt to pursue creative art with little regard for reward.

Aries [March 21-April 19]: Look for the goodness in people about you; let your own better side show. Pay attention to children, their serious interests.

Taurus [April 20-May 20]: Use modern formulas toward traditional goals. New concepts come easily to the inquiring mind. Repair and remodeling are favored.

Gemini [May 21-June 20]: It's a day for that stitch in time to save nine. Get out early, say "hello" to people who count. Your work should run smoothly if you don't skimp or shirk.

Cancer [June 21-July 22]: Cash changes hands as fast as ever; be sure you're directing outlays sensibly. Upgrading home, personal possessions rates high on your list.

Leo [July 23-Aug. 22]: Originality has great merit as your promote your ideas. Unearth new facts and figures for background material. Get reliable advice from those in the know.

Virgo [Aug. 23-Sept. 22]:

Fortune smiles — and an educated guess turns out to be profitable. Confidential arrangements are finalized now; get what is coming to you.

Libra [Sept. 23-Oct. 22]: Expansion is the motto for your day's campaigning. Bring your friends with you; there's room for everybody. Personal ventures thrive.

Scorpio [Oct. 23-Nov. 21]: Step up your search for technical information. There's an overall meeting of the minds now. Romance is brighter, to be enjoyed in symbols.

Sagittarius [Nov. 22-Dec. 21]: Today marks a fresh start. Leave behind all recent controversies, no recriminations offered or accepted. Cooperation is there for the asking.

Capricorn [Dec. 22-Jan. 19]: This is the time for salesmanship. Persuade associates to join you in the larger opportunity. Today's efforts brings you out on top money-wise.

Aquarius [Jan. 20-Feb. 18]: Carry out familiar policies and you will attract favorable deals, strong cooperation. Expert advice is rarely so much to the point as now.

Pisces [Feb. 19-March 20]: See your own interests in full context — where they clash with others' and where they agree. Set priorities early, chart a definite course of action.

TO YOUR GOOD HEALTH

Bothered By Dryness In Nose

By G.C. THOSTESON, M.D.
Dear Dr. Thosteson: I am bothered with dryness in the nose. A specialist prescribed an ointment but I still have an occasional nose bleed.

I found that petroleum jelly has helped but how can I get more of it farther up the nose where the dryness really occurs? The doctor said not to use Q-Tips.

Is there some form of liquid or drops I can use? I also have a stinky smell that stays in my nose. Would this be sinus trouble?

—D.H.

This dryness is called atrophic rhinitis. The surface cells in the nasal passages shrivel, normal secretions are reduced, crusts form, and you are experiencing the annoying results.

Mild ointments (as you know) help. Or petroleum jelly. But when you ask about a liquid (say, mineral oil) to get it higher in the nose, I have to say no. Your doctor has indicated that he didn't want you to get it higher in the nose and he had a good reason. Inserted too far, oily drops can descend into the lungs and do damage there.

The crusts that form break off and cause the bleeding you mention. The "stinky smell" develops from crusts, mucus or other material in the nose. The

condition is called ozena. There are things that can give you further relief. For one, check with your doctor about the use of nasal irrigations. And in some cases (women, that is) the use of estrogen, or female hormone, minimizes the dryness and the troubles that go with it.

Dear Dr. Thosteson: I had a dermabrasion approximately eight months ago. I was told at the time by my doctor that I shouldn't get in the sun for at least six months, but after that a little at a time wouldn't hurt.

I have been out in the sun a little and the area that was scraped will not tan. Is this normal? To me it looks like scar tissue. I have even used tanning cream which is supposed to tan with or without the sun. That doesn't work either. It just won't soak in.

The area is white and slick-looking. Will the area eventually tan? There is a distinct line where the dermabrasion area stops.

Mrs. G.H.
It could be that the layer of skin containing melanocytes — the cells that are responsible for tanning — was affected. It would depend on how deep the dermabrasion went, and you give me no indication of what its purpose was.

The white, slick-looking tissue is scar formation and may never tan again if the pigment layer was affected. That's about all the "maybes" I can offer, but I do suggest that you return to the doctor who treated you.

Knowing just what was done, and seeing you, he will be in the best position to tell you what if anything can be done to get you tan again. Lacking that, he can advise on special cosmetics so you won't have that distinct line showing.

Dear Dr. Thosteson: How serious is cryptitis, and if an operation is necessary, what kind of operation? I have heard it is incurable. —A.M.

The condition is curable. The "crypts" are anatomical "pockets" inside the anus. Bits of hard stool or seeds can be trapped in the crypts, causing enlargement of the crypts and inflammation.

Treatment consists of removal of material impacted in the crypts (simple removal, not surgery) followed by hot Sitz baths to reduce inflammation and discomfort.

Occasionally the anatomical structure has to be modified surgically, an operation comparable to

correcting a rectal fissure.

Hemorrhoids can be cured! If troubled with this or other rectal problems, write to Dr. Thosteson in care of Box 1400, Elgin, Illinois 60120 for a copy of his booklet, "The Real Cure for Hemorrhoids." Enclose a long, self-addressed, stamped envelope and 25 cents.

A thought for the day: Abraham Lincoln said, "The ballot is stronger than the bullet."

The Almanac

United Press International Today is Wednesday, Nov. 6, the 310th day of 1974 with 55 to follow.

The moon is in its last quarter. The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter. Those born on this date are under the sign of Scorpio.

American band leader John Philip Sousa was born Nov. 6, 1854.

On this day in history: In 1860, Abraham Lincoln was elected the 16th president of the United States.

In 1869, in the first formal

intercollegiate football game, Rutgers beat Princeton 6-4.

In 1953, U.S. Attorney General Herbert Brownell charged that President Harry Truman named Harry Dexter White head of the International Monetary Fund, knowing White was a "Russian spy."

In 1968, Richard Milhous Nixon was elected 37th president of the United States, defeating Democrat Hubert Humphrey.

The brain is made up of 10 billion nerve cells that learn to classify and store experience, solve problems, recreate the past and plan the future.
