PAMPA, GRAY COUNTY, TEXAS, THURSDAY EVENING, JULY 14, 1927.

PRICE FIVE CENTS.

SMITH HOPS OFF FOR HAWAII

NAVAL PARLEY CHIEF HITS AT HIS OPPONENTS

Bridgeman Says Some Persons Have Hurt Sessions

BRITISH CASE MISREPRESENTED

But Nothing Has Endangered Good Will Of Nations

GENEVA, July 14.—W. C. Bridgeman, head of the British delegation to the naval conference, speaking today in session, declared that nothing had occurred at the conference which imperils the good relations between the nations represented.

He said the British delegation had asked for the plenary session because it believed that the atmosphere of the conference was being vitiated by gross misrepresentations of the British case in certain quarters.

He declared that some trouble had been caused by parties who would rejoice at the failure of the conference. Even if no agreement were possible on cruisers, he declared, it would be worth while to reach an agreement on destroyers and submarines.

WASHINGTON, July 14. (AP)—

An agreement between the navy and the interior department under which the navy, after August 1, will take back the administration of naval reserves and the leases of lands in them, was announced today at the department.

GENEVA, July 14. (AP)—The session adjourned late this afternoon with the understanding that there would be another session at a time to be fixed by the secretary of the conference.

Methodist Church Orchestra Gets Many Invitations

The Methodist church orchestra under the leadership of Prof. Otto Schick, violinist, played at both services last Sunday and will be in attendance at all Sunday services.

The sponsor of the orchestra is the Rev. Tom Brabham, and the expenses are met by the church and the members. The orchestra now consists of 12 pieces and will be increased by extra pieces later.

They have received invitations to play at other church services and entertainments. This will be done at a later date.

At a meeting the following officers were elected: E. D. Zimmerman, manager; Mrs. I. Cole, assistant manager; J. G. Noel, treasurer; F. A. Cary, secretary.

LOAN MEN HERE

W. J. Lowe, vice-president, S. B. Decker, general manager, and C. H. Ackerman, field superintendent of the Interstate Fidelity Building and Loan association of Salt Lake City Utah, were in the city yesterday looking after several of their loans in this vicinity.

HONEY BEE COLONIES ARE REHABILITATED

WASHINGTON (AP)—Winged royalty rules again in the nectar domains of Louisiana. The honey bee queens are back.

Weeks ago the turbulent Mississippi wrecked their richest empires. Half the beehives in Louisiana were swept away. Many a keeper found whole colonies lodged in swamps, the myriad workers drowned beside the queen.

But bees, queens and hives have been donated through a trade journal to persons whose soil source of income washed away in the flood.

Louisiana Has Its Snyder Case

The most atrocious crime Louisiana has known in years was revealed by the confession of Mrs. Ada Bonner (left) that she conspired with Dr. Thomas Dreher in the murder of her husband, James J. Leboeuf (right). Leboeuf's buckshot-ridden body was slashed with a hunting knife to prevent floating and thrown into Lake Palourde, near Morgan City, La. An alleged hired assassin shot the husband to death. The conspiracy grew out of a love affair between Mrs. Leboeuf and Dreher, paralleling the recent Snyder case.

More Than \$1,000 Raised First Day In Pampa Boy Scout Drive

Early reports in the Boy Scout drive under way are that the movement is getting the hearty support of the local people.

Up to last night \$1,027 had been subscribed. This amount is about \$1,500 short of the amount necessary for a city of this size. The amount subscribed up to this time has been

given by 34 local men.

Five teams under the direction of M. K. Brown are out canvassing and report great enthusiasm among those interested in the Boy Scout program.

Tom Nelson and Edmonds Knittle, executives, are in the city assisting in the drive, and are sure the drive will go over big in Pampa.

Offsets Are Near Pay—Locations in Bowers District

The Empire Gas and Fuel company's No. 1 J. M. Saunders, in section 30, block 3, is fishing at 3,113 feet. It flowed 104 barrels the first 18 hours in granite wash pay at 3,080 feet. A cave-in on the tolls cut of production.

The Empire company's No. 1 J. A. Hood, in section 33, block 3, had the first showing at 2,922 and the second at 2,945 feet in the lime. They are drilling at 2,970 feet and expect lime pay at 3,025 feet.

The Majestic Oil company's No. 2 Joe Bowers, in section 93, block B-2, is setting 8-inch casing and standardizing at 2,815 feet in the granite wash. They drilled through the big gas flow with the rotary rig, which is unusual in this territory.

The Imo Drilling company's No. 1 Jackson in the northwest corner of section 88, block B-2, has located a diagonal offset to the Majestic No. 1 Bowers.

The Majestic Oil company's No. 3 Bowers, in section 93, block B-2, is a direct offset to the Majestic No. 1 Bowers.

New Orleans Woman Inflicts Own Wounds

NEW ORLEANS, July 14.—Mrs. Melville Settoon, prominent New Orleans society woman, was found today with a bullet wound on her head.

Police said the wound was self-inflicted. Physicians said Mrs. Settoon's condition was critical.

Judge C. S. Wortman, of the law firm of Cary and Wortman, is in Stinnett this afternoon to institute habeas corpus proceedings to secure the release of the client held in the local jail in connection with the Pampa bank robbery. He will go before Judge Newton P. Willis, district judge.

Rev. French Will Serve White Deer and Pampa Churches

SLATON, July 14.—After serving his church here for almost five years, the Rev. M. G. French, pastor of St. Joseph's Catholic church, left this week for White Deer, where he has been transferred, and where he will serve the people of his denomination as pastor. He will also be in charge of the Pampa Catholic church, it is stated.

Soon after his discharge from the United States army, with which organization he served overseas during the world war, Rev. French was sent to Slaton to take charge of the Catholic church and school here. During these five years, and under the direction of Rev. French, it is evident that the Catholic institutions here have prospered. The church building has been practically re-built; a \$6,000 school building has been constructed; a sisters' home built, and the rectory has been remodeled into a real beautiful little home.

The local Catholic church now has a membership of approximately 100 families, it is said, many of whom are families of prosperous and industrious farmers living near Slaton.

Since coming to Slaton, Rev. French has gained the warm friendship and respect of many citizens of this community, including not only members and those who attend his church, but those of other denominations and the town's people generally as well. He has been a conscientious and active member of the Slaton Rotary club since soon after its organization, and has taken prominent part in other civic and commercial activities.

TO BUILD RESIDENCE

W. A. Davis, local man, will commence at once the erection of a large frame residence in the Parkhill annex to cost \$3,500. The Glover contracting company have been employed to build the residence.

SEVERAL HURT AS TRAIN HITS BIG LANDSLIDE

M-K-T Passengers Are Shaken; Messenger Seriously Hurt

HEAVY RAINS ARE RESPONSIBLE

Twenty Die In East From Excessive Heat

(By The Associated Press.)

McALESTER, July 14.—The northbound Missouri, Kansas and Texas passenger No. 4, was wrecked today by a landslide at a bridge between Atoka and Springtown.

An express messenger from Parsons, Kan., was seriously injured and several persons slightly hurt.

Ten cars are reported derailed, seven being thrown on their sides. The landslide was due to unprecedented rain.

NEW YORK, July 14. (AP)—

Twenty persons in cities in the east have been killed by heat in the last 36 hours, it was shown by compilations made here today, although predictions were for slightly cooler weather today.

Cotton Likely to Go Still Lower, Is New Prediction

(By The Associated Press.)

DALLAS, July 14.—King Cotton, rocking under the impact of the low price blow, is the subject of a second alarm by R. C. Andrews, Dallas, district manager of the American Railway association in his fiscal year report on the state's agricultural outlook.

"Cotton exports so far this season have exceeded the exports of last year by about 3,000,000 bales and stocks on hand June 30, close of the fiscal year, around 700,000 bales more than a year ago, notwithstanding the very heavy production last year," he said. He predicted production in the four southwestern states will be about 7,000,000 bales this year.

"Unless sales this season are restricted to current requirements there probably will be nothing to sustain even present price levels.

"The difference between 16 and 20 cents per pound this season would amount to not less than \$140,000,000 in our four southwestern states and would affect favorably or unfavorably the buying power of the producers that much. Therefore, it is a matter of considerable concern to all industry whether this season's crop is dumped on the market in excess of consumptive needs. If last year's crop had been marketed properly, the producers in these four states would have profited to the extent of \$200,000,000. And that lesson should not be forgotten this season.

"General rain during the last half of June provided sufficient moisture in those sections needing it; but continued rains in many sections are causing alarm because of boll weevil infestation. Picking also has been delayed in extreme Southwest Texas; the army worm has appeared in southern sections and indications point to heavy boll worm activity in other sections. Cultivation in some districts has been retarded because of wet fields."

The cotton situation as shown by Andrews' report, giving receipts and exports for the year 1926-27 and 1925-26, respectively:

Galveston,	3,813,291,	2,984,496;
Galveston,	3,032,743,	2,017,112.
Houston,	3,570,032,	2,503,395;
Houston,	2,599,597,	1,721,933.
Texas City,	172,936,	91,110; 13-
Texas City,	234,	none.
Corpus Christi,	1926-27 only	44,798, 4,591.

Beauty Is "Ma"

Mrs. Al Richard, 18, of Yakima, Wash., won the prize in a recent beauty contest in which girls from several cities in central Washington participated. She is shown here with her two children, Albert, aged six months, and Caroline, two years.

CHURCH SURVEY NOW COMPLETE

Rev. Tillson Decides Congregationalists Not to Organize

Lewis N. Tillson has completed his partial social, religious and economic survey of Pampa for the Congregational church extension board and will leave tomorrow for Borger.

Mr. Tillson found in his survey that there are not many Congregationalists in Pampa, and that the Presbyterian church, which is similar, has organized in good manner and erected a new church. He feels at the present time a Congregational church should not be organized here, as the sister churches are doing good work. The work would be to a great extent a duplication to the Presbyterian church, which can now handle the situation successfully.

Mr. Tillson has been a student at the Congregational college at Bangor, Me., and is doing field work here for his church.

Summer Term To Close On Friday

The 1927 term of summer school will close in this city Friday. The attendance has been larger than usual this year, there having been 39 enrolled.

Miss Mellic Bld Ritchie will go from here to Clayton, N. M., for a visit with relatives. Miss Velora Reed will remain in this city for a few days before going to Oklahoma for a visit with her parents. She will return for the September term. Miss Smith, who has been staying with her sister, Mrs. Lennis Anderson, will return to her home in Canyon.

OFFICERS FIND "JAKE"

Local officers in a visit to a South Pampa rooming house last night found four men in a room practically dead to the world as a result of too much "jake".

Officers say they found 15 empty bottles in the room where the men were staying. The men were charged in the mayor's court this morning, and paid fines.

Mr. and Mrs. D. W. Holland of Spearman were in Pampa Wednesday and today visiting with Mr. and Mrs. C. W. Lawrence and other friends.

Mr. and Mrs. W. S. Huckill of Claude were visitors in Pampa yesterday and today.

SECOND TRY IS NECESSARY TO LEAVE GROUND

Civilian Aviator Veers Toward Crowd, Stops And Repeats

SHIP LEAVES MOORING AT 10:40

Emory Bronte Along As Navigator In Flight

(By The Associated Press.)

MUNICIPAL AIRPORT, Oakland, Calif., July 14.—The silver-winged monoplane "City of Oakland," manned by Pilot Ernest Smith and Navigator Emory Bronte took off from here at 10:40 this morning for a 2,400-mile flight to Hawaii.

The plane left the runway about 4,500 feet from the starting point in its second take-off attempt. The first had gone amiss when Smith halted after veering towards the crowd of spectators.

Smith attempted a take-off a few weeks ago, but turned back soon thereafter on account of a broken windshield. His navigator refused to take the air again that day, and delay resulted.

Lieutenants Maitland and Hegenberger successfully made the long hop on the day Smith was to have flown.

Youth Sought By Officers Of Two Counties

Officers of Gray and Wheeler counties are searching for W. H. "Hot-shot" Mays, a young man who disappeared Wednesday night from the Wilcox lease south of Pampa.

Mays, an employee of the Pure Oil company, has a check waiting for him. Officers were notified by residents at the lease that Mays had an altercation with a man said to have owed him \$300. Neither Mays nor the man with whom he is said to have had a difficulty can be located.

Officers and oil men yesterday and today searched the canyons and sent out descriptions on the theory that there might have been foul play.

Mays is said to be from near Wheeler, and an attempt is being made to locate his parents.

Lightning Fires Oil Tanks And Endangers Farm

ARDMORE, July 14.—The Carter tank farm at Wilson, one of the largest oil storage fields in southern Oklahoma, was endangered by fire today when lightning struck a 37,000 barrel tank of crude oil.

Hundreds of men are at work attempting to confine the blaze to the one tank.

MANY ENJOY DANCE

More than 75 couples enjoyed the ex-De Molay dance last night at the new Schneider hotel. Music was furnished by Walker's eight-piece Amarillo orchestra.

Pampa Quiz

More questions—try your memory, and confirm your answers by referring to the last page.

1. How big is the Panhandle gas field?
2. In what month of last year did Pampa's phenomenal growth begin?
3. When was the Western Union office established here?
4. What were the building permits for July of a year ago?
5. What was a great baseball year in Pampa?
6. When was the first electric plant placed here?

Telephone 100, all departments

SHEEP AS PROPER GRAY COUNTY ANIMAL

Statistics of the Federal farm census of 1925 show that there were but 142 sheep in Gray county in that year. Certainly such a small number is not indicative of a fair test, and the opportunities for sheep grazing have not been realized.

Prof. J. L. Lester, teacher of vocational agriculture in Pampa high school, believes that Gray county is suited to sheep raising. He does not advocate the industry for every farm, nor argue that large flocks should be kept. On the other hand, there is much broken land which would support sheep better than cattle.

Sheep are of little trouble, he points out, except in winter and at shearing time. The income from mutton or wool types should raise the revenues and make cash available more often during the year.

Mr. Lester says this climate is especially suited to sheep, and that farming methods and periods leave plenty of time to give to the animals. Small flocks on farms where conditions are right would be a big step toward diversification and the dividends would be welcome in this section.

Another agricultural movement which is in the right direction is the formation around Amarillo of a cow-testing association. Nothing is likely to be more conducive to efficient dairying, and the owners of only a few cows will profit as well. Protection from disease is a big factor, not to mention the economic asset of knowing whether a cow is profitable to keep.

more and better cows are needed in this area, and cow testing associations can encourage this desired accomplishment through fact finding. Cattle breeding has become a science on the big ranches and livestock farms, but the ordinary milch cow has not been drawn into the movement to the extent necessary.

The loss to the business world in this section by not getting paved roads is enormous. There seems to be nothing the average fellow can do but fret, but we need the roads and need them now. Everybody loses by poor roads.—Ada News.

A lot of business is lost by the way telephones are answered.—Alva Review-Courier.

He Sure Is a Tough Kid to Wean

land with her 27 trial judges with Texas and her more than 100. The difference becomes sharply impressive when it is remembered that England (including Wales) has about 50,000,000 population, while Texas has only 5,000,000. It therefore requires four times as many judges to try criminals in Texas as it does in England, although Texas has only one-tenth the population of England. Incidentally, Oklahoma, with only one-twentieth of England's population has twice as many trial judges, which would indicate Oklahoma is just forty times as criminal minded as England.

But the difference, as President Davidson points out is not one of criminality. It clearly is a difference in trial court procedure. The English judge devotes all of his time in the courtroom to a trial of facts. The Texas or Oklahoma judge is forced to spend most of his courtroom time in the trial of pleadings. When the English, years ago, did away with practically all legal pleadings, they did away with the things that so seriously impede progress and slow down justice.

A minister of justice might help the situation. But real relief from this serious condition can only come as it came in England from the simplification of legal procedure.—Daily Oklahoman.

Some folks in Chickasha are lucky enough to have good neighbors who raise fine peaches. That's something else to make life worthwhile.—Chickasha Express.

A Dutch professor has set the limit on word population at eight billion. Guess some of us will have to take the air then.—Muskogee Times-Democrat.

Windbreaks for crop protection should be located so as to protect the crop from the most damaging winds, usually summer winds. As efficient windbreaks exert their influence along the land surface to a distance of from 15 to 20 times their height, the intervals between them should be about 15 or 20 times the height of the trees at their maturity.

TURKISH DOGS SPEND SUMMER IN TRAVEL

SCUTARI, Turkey (AP)—In Turkish villages along the Bosphorus, a dog's life is that of a sailor.

When a village becomes "overhounded" with street dogs, the village fathers, loath to kill, as the Koran dictates kindness to animals, charter a ferry boat and ship a load of dog derelicts across the straits to some village on the opposite shore. The villagers on the other side ferry them back, adding a quota of their own.

The original exporters retaliate, and thus a game of battledore and shuttlecock wages yearly between Europe and Asia.

ROYALTY ADMIRES

GEMS OF DUCHESS
LONDON (AP)—The collection of emeralds belonging to the Duchess of Roxburgh, a former American society girl, has just been admired by the King and Queen of Great Britain.

The duchess, who was Miss May Goelet of Newport, R. I., was a guest at Windsor Castle during Ascot week. Her emerald collection is the finest known here, that of the former German empress, its rival, having been dispersed. She has two necklaces of cut emeralds, two ropes of large cabochon emeralds and a tiara and stomachacher of emeralds and diamonds.

The Federal Bureau of Agricultural Economics is studying marketing problems and making surveys indicating the prospects of various cooperative marketing projects. It is examining the causes of success and failure in cooperation, helping organizations to plan wise merchandising policies popularizing the use of a uniform and up-to-date accounting system and system of office records among cooperative association, analyzing marketing operations to reveal their strong and weak spots and aiding cooperatives to extend their markets at home and abroad.

WASHINGTON LETTER

BY RODNEY DUTCHER
NEA Service Writer.

WASHINGTON.—There are many earnest souls who yearn for a third party movement which would give the nation's progressives and liberals a chance to express themselves politically, but three major factors hold them back:
1. It costs like blazes to organize and promote a national ticket, and third parties have an especially hard time raising cash.
2. The third party sentiment lacks a leader to head the ticket.
3. It is reasonably certain that a third party would stand no chance of victory in its first presidential campaign.

All these factors apply with equal force to the third party suggested by Dr. Wayne B. Wheeler of the Anti-Saloon league, who threatens to lead the dry children of Democracy off on a bolt in case the unregenerate leaders nominate Governor Al Smith.

The high cost of new parties is the most discouraging feature in the minds of the chronic third party men. If they could be sure of a healthy popular support and enough money to cover expenses, they would be able to find some sort of a candidate.

Borah and Senator Norris of Nebraska are the two men who stand out as the best candidates of a possible third party, but there is some question as to whether either would carry the banner.

Borah probably wouldn't accept unless he felt there was some chance of winning. Norris is willing to fight a battle for progressivism at any and all times, but he has always avoided trying to set himself up as a leader, though he is the best-loved of the progressives.

Some progressives, such as William Allen White, believe that there is no appreciable

public sentiment in favor of progressive ideals, but most of them refuse to admit this and believe that a Moses is all that's necessary.

The loss of the elder LaFollette was a terrific blow. Had LaFollette lived, many of his worshippers believe that he might have organized a third party which would have figured importantly in the next election. As it is, few of the 5,000,000 LaFollette voters of 1924 will be satisfied to vote for Coolidge or any but a very exceptional Democrat in 1928. A handful may vote for Coolidge, many would vote for Al Smith, but the majority would like a candidate of their own.

PRESS FORUM

THE NEED IS SIMPLIFICATION

In demanding creation of the office of minister of justice, President Davidson of the Texas Bar association is far more impressive in his citations than he is in his original demand. A minister of justice might or might not do a lot of good, but if figures submitted by President Davidson are accurate, then the country needs something or other and it needs it quickly and certainly. The president contrasts Eng-

J. W. Rose of Lubbock arrived Wednesday to visit his sons, Tom, B. W. and Robert, of this city.

J. M. Dodson transacted business in Borger Wednesday and Thursday.

Mr. and Mrs. D. L. Bryan are the parents of a baby boy born Wednesday night. Mr. Bryan is an employe of the Atlantic Oil company.

The People's Store has just received a complete line of the new fall McCall Patterns. They're printed. 108-11c

Paul Conwell of Memphis has accepted a position with the Pampa Drug company.

Mrs. Robert McNeeley, Mrs. W. G. Lyons and Miss Bessie Lyons of Miami were shoppers in this city Wednesday.

J. K. Schaffer of Oklahoma City arrived here Wednesday to inspect his holdings in this territory.

Headquarters for McCall Patterns. They're printed. The new fall supply just received at the People's Store. 108-11c

Moe Dancinger of Kansas City is in this city on business.

George Rainouard left Tuesday for Lubbock after spending a few days with Mrs. Rainouard and son at the New Schneider hotel.

A. C. Lauderback of the Pure Oil company had his tonsils removed today by Dr. W. B. Wild.

The People's Store is headquarters for McCall Patterns. They're printed. New fall styles just arrived. 108-11c

Mr. and Mrs. L. N. McCullough and little son were Amarillo visitors Wednesday.

Rev. and Mrs. D. H. Truhitte arrived in this city Wednesday from Oilton, and will make their future home here, Rev. Truhitte having been called to the local Baptist church.

Mrs. A. Cole has as her guest Mrs. Millard Clark of St. Joe, Mo. Mrs. Clark is Mrs. Cole's aunt.

The People's Store has just received a complete line of the new fall McCall Patterns. They're printed. 108-11c

W. C. Mitchell returned Wednesday evening from Elk City, Okla., where he went on business.

Mr. and Mrs. Clarence Davis departed the fore part of the week for Graham to be gone several months. They were accompanied by Miss Allie Gibbs.

A. E. Davis has arrived from Phoenix, Ariz., to visit relatives and friends in this city.

Mr. and Mrs. Jack Little are in Gainesville this week on a vacation. Mr. Little is with the Galbraith-Foxworth Lumber company of this city.

New Fall McCall Patterns. They are printed. Just received at the People's Store. 108-11c

E. H. Petty of the Panhandle Lumber company of Amarillo was a Pampa visitor Wednesday.

Work of remodeling the Kraft Mint Variety store is under way. They are enlarging the store room, taking in some space to the north of the original room, installing new fixtures and adding to the show windows in the front.

Advance styles are here. See the new fall McCall Patterns. They're printed. People's Store. 108-11c

C. T. Hunkapillar of the Pampa Drug company, has taken charge of the City Drug company, on Foster avenue, which he recently purchased. The city drug will in future be known as the Pampa Drug Store No. 2. Tom Perkins, registered pharmacist, will have charge of the new store. He will be assisted by Delbert Stewart.

The People's Store is headquarters for McCall Patterns. They're printed. New fall styles just arrived. 108-11c

Mr. and Mrs. W. F. Causey of Houston are visiting the Rev. and Mrs. Tom W. Brabham.

The Entre Nous club will meet this afternoon at the home of Mary Ellen Cook.

The Thursday Bridge club will be entertained this afternoon at the home of Mrs. J. D. Sugg.

New Fall McCall Patterns. They are printed. Just received at the People's Store. 108-11c

Jamesons Have Wedding Anniversary

Mr. and Mrs. I. S. Jameson celebrated their thirtieth wedding anniversary Tuesday by entertaining their children and a few intimate friends with a noon day luncheon. Mr. and Mrs. Jameson have been residents of this city for a number of years, and have many friends here who extend congratulations and wish them many more anniversaries.

An edict issued by Cardinal Vicar Pompili urges all persons possessing letters or autographs of the late Pope Pius, who died in 1914, to lend them to the Holy See for examination toward the beatification of the late pope.

Baptist Circles Have Meetings

Circle No. 1 of the Baptist church met Wednesday afternoon with Mrs. Wilson Hatcher. Mrs. L. W. Barrett leading the devotional. Mrs. W. J. Brown presided over the business session, and Mrs. T. B. Solomon was leader of the Mission study, "The Life Beautiful."

Refreshments were served to the six members and one visitor present.

Circle No. 2 of the same church met Wednesday afternoon with Mrs. E. G. Barrett. Devotional was led by Mrs. Stark. Mrs. Harvey Haynes had charge of the business session.

The ladies began the study of a new mission book, "In Royal Service" with Mrs. S. L. Anderson as their leader.

At the close of the meeting refreshments were served the seven members and three visitors.

TOKIO WOMAN STUDIED DENTISTRY IN U. S.

TOKYO (AP)—Miss Kinuko Uchida, Japan's only woman dentist to study abroad, has returned to her native land after spending five years in the United States.

She is on the staff of Tokyo Woman's Dental College. Dr. Uchida opened a children's dental clinic at the college and is starting a campaign to institute dental hygiene in the public schools.

She hopes to convert the educational authorities to her view that much of the backwardness among Japanese school children is due to defective teeth.

Cattle Receipts Heavier, With Prices Steady

KANSAS CITY STOCKYARDS, July 14.—Though cattle receipts Monday were larger than on preceding Mondays, the increase was normal for this season of the year and about in line with a year ago. Prices were mostly steady, the exceptions being strong spots on choice steers and weak spots on common kinds. Hog prices continue on the upgrade and today were the highest since May. Indications are for a further advance. Sheep and lamb prices were 50 cents to \$1 higher last week, but today about half the advance was lost. All markets quoted lower prices.

Receipts Monday were 15,000 cattle, 7,500 hogs and 10,000 sheep, compared with a holiday a week ago, and 13,400 cattle, 6,250 hogs and 7,190 sheep a year ago.

Cattle that showed good quality or condition were fully steady today, but the plainer classes were slightly lower than last week's close. The few choice steers available were firm. Receipts were the largest for some time past but the increase was entirely in line with the season of the year. Grass cattle will move freely from now on but the supply of fed steers will be limited. The best fed steers here today brought \$13.60. They were not prime. Last week prime steers brought \$13.90 and yearlings \$13.25. The same kind would have brought the price today. Grass fat steers sold at \$7.50 @10.50 and wintered Kansas steers \$9.50 @12.25. Cows and heifers were fully steady, but quality was below last week's average. Most of the grass cows sold at \$5.50 @6.50 and fed heifers at \$9.00 @10.50. Veal calves were 50c higher at \$11 @12 for the best.

In proportion to total receipts of cattle the supply of stockers and feeders was small. Prices held fully steady. Demand will increase in keeping with the supply.

Hog prices advanced each day last week and made further gains today that took the general market into the highest position since May. Trade was not only active but demand now shows urgency so that a further advance is indicated. Today 140 to 240 pound grades brought \$9.25 @9.50; 240 to 260 pounds \$9.00 @9.35; 260 to 300 pounds \$8.75 @9.10; packing sows \$7.25 @7.85; stags \$7 @7.50; stock hogs and pigs \$9.50 @10.

Sheep broke 25c and lambs were down 50c. This decline was about one-half of last week's advance so that the market is still materially higher than 10 days ago. Today fat lambs were quoted at \$13 @14.25; yearlings \$10 @10.50; wethers \$7 @7.75 and ewes \$4.50 @6.

Trade in horses and mules remains quiet and about in line with normal for this season of the year.

U. S. Experts Work For Stronger Wings

(By The Associated Press.) WASHINGTON—Patient work at the Bureau of Standards is gradually evolving a solution for the problem of aluminum corrosion which may greatly increase the utility of aircraft.

Airplane wings constructed of a "doped" cloth stretched over wooden frames are fragile things. To the layman, it has long seemed that the strength and durability of the wings would be greater if the frames were made of steel or of some aluminum alloy.

The possibilities of metal wings, however, have been greatly restricted by the disposition of the complex alloys to corrode and ruin the expensive fabrics even more rapidly than the conditions of operation have worn out the cloth and wooden structures.

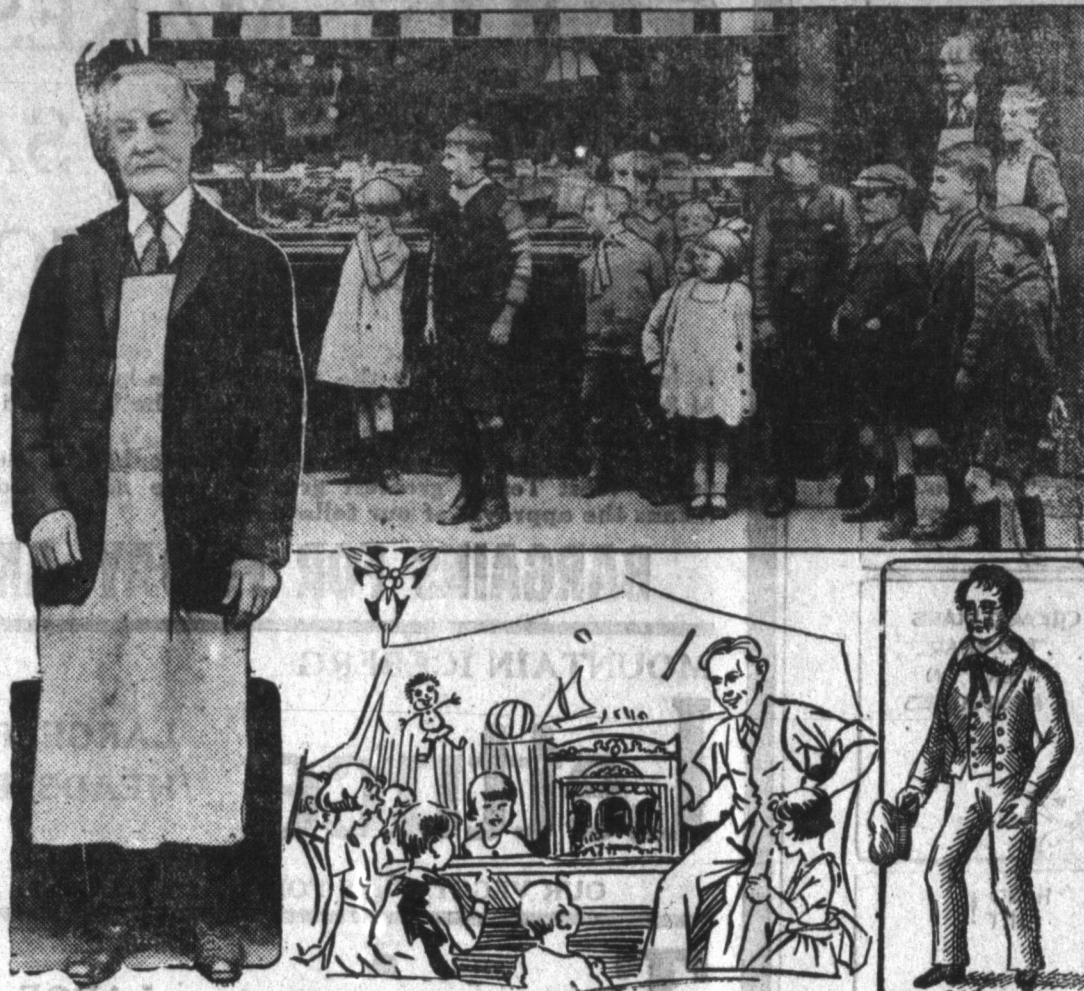

The bureau workers, aided by industrial laboratory experts and equipment, have been seeking a solution of the metal difficulties for some time. They have determined that, if aluminum, one of the aluminum alloys of sufficient lightness and strength for plane wings, is coated with pure aluminum by a metal spray process it can stand even salt water exposure for a year without deterioration.

Some experts are hopeful that by adding a corrosion resistant to the material through special treatment of the alloy during preparation and by coating it afterwards it will be possible to produce all-metal air craft that will be fire proof and durable.

The 1926 tax report shows 207 millionaires in the United States and 96 in New York alone.

Some 35,000 freight cars which daily move in and out of the Chicago Terminal District are handled by more than 82,000 employees.

SOCIETY ADOPTS TOY THEATRES THAT STEVENSON WROTE ABOUT

It is now quite fashionable in London society to have a miniature stage for the presentation of plays for the entertainment of residents in the district east of Hyde Park. Above is a shop where toy theatres are made and where Robert Louis Stevenson visited. Inset of Benjamin Pollock, who has made toy theatres for 50 years. Below is a sketch of a toy theatre with scene from Charles II and of Oliver Twist from Pollock's "penny plain" edition of the play.

BY BATES RANEY (Associated Press Feature Editor)

LONDON, July 14.—Mayfair has taken up a "new" fad, a pastime that was old a century ago. It is the "penny plain, tuppence colored" toy theater of which Robert Louis Stevenson wrote.

It is quite fashionable to have a miniature stage for the parties held in the select district east of Hyde Park. The top theater is placed in the center of a table and the tiny old fashioned footlights are lighted. The guests group around to watch the tiny pasteboard actors, manipulated on the ends of slender rods, disport themselves, while persons in the audience, or behind a screen, read the corresponding parts from a play.

There is a long list of plays to choose from, ranging from Oliver Twis and Don Quixote to the gorgeous spectacle of Timur, the Tartar.

The real story, however, is not in the vagaries of Mayfair but in Benjamin Pollock, 71-year-old friend of Robert Louis Stevenson, who has been making these toy theatres in his chubby-hole shop in Shoreditch for the past 50 years. He succeeded his father-in-law, John Reddington, who made them in the same place for 40 years before Pollock took charge.

Pollock is a shy, modest, little man, with grey hair and a slight stoop, acquired from bending over his work bench; a counterpart of Charles Dickens's noted toy maker, Caleb Plummer.

He was making another of his little theatres for Sacheverell Sitwell when interrupted and insisted on "putting on his Sunday coat" to be photographed in his little, out-of-the-way shop at 73 Hoxton street, in the shadow of Shoreditch Church.

"It must have been some 40-odd years ago that Mr. Stevenson became interested in my little shop," he said. "He was not in such good health then. That was just before he went out to the South Seas and died."

"Mr. Stevenson was particularly interested in the colored plates.

"I remember the first time he came in. He had been passing by and saw some of my prints in the window. 'How much are they?' he asked. And I told him what I always told anyone—penny plain, tuppence colored. Well, he came frequently after that."

The scenes and characters of the toy theatres, as well as the books for the plays themselves, are all copied from early London theatres. They are printed from copper plates, in some instances more than 100 years old.

Many of the original caricatures were made by George Cruikshank, contemporary of Gillray and Philz, who did much of the illustrating of Charles Dickens's books.

Pollock has a small hand press in a back room hardly large enough to turn around in, where he lithographs the sheets himself. The purchaser pastes the sheets of cardboard, cuts out the figures and scenes and uses them according to furnished directions.

Famous men and women have found their way to the shop, among

them George R. Sims, G. K. Chesterton, Gordon Craig, son of Ellen Terry, and the Sitwells.

Pollock and a tobacconist, H. J. Webb, of Old Street, are the only survivors of what was once a flourishing trade in London. Webb dates the vogue of the toy theatres back to 1812. Before 1870 when the demand began to wane, he says, the Webbs kept 20 employes and five presses busy.

Despite the temporary impetus given the business by society taking up the theatres, when Pollock and Webb go it seems likely that the trade "penny plain, tuppence colored" will go with them.

FRENCH REFORESTATION HALTING SOIL EROSION

WASHINGTON (AP)—United States foresters tell how trees saved the French.

Unexperienced with erosion, land owners cut their forests at the headwaters of streams. By 1860 about 800,000 acres of farm land had been ruined or injured. The population of 18 great communities was reduced to poverty and forced to move away.

But France started reforestation. Today, 163 streams, once devastating torrents, have been entirely controlled, and 624 others show beneficial effects of forest replanting.

Woman On Air Tour

HOUSTON, July 13. (AP)—Mrs. Frank M. Hawks of Houston is accompanying her husband on the 4,000-mile national air tour which started from the Ford airport at Dearborn near Detroit.

When the tour planes return to Detroit July 12 after visiting 24 cities Mrs. Hawks will have completed one of the longest flights ever undertaken by a woman.

AID TO FLYING SEEN IN STUDY OF METEORITES

DES MOINES, Iowa (AP)—Aviation will some day glean from fallen meteorites some knowledge about the upper air, Dr. D. W. Morehouse, president of Drake University and distinguished astronomer, is convinced.

When science progresses farther in the study of "falling stars," he believes, it will learn from them facts about height and character of the upper layers of the earth's atmosphere which may conceivably alter the present ideas of the universe and may prove of great value in the practical field of flying.

"No one actually knows the origin of meteorites," he says. "Theories range from the belief that meteorites are thrown off by the moon to the supposition that they are pieces of disintegrated stars.

"The hypothesis that they are 'chips' off our solar system is most appealing to me. It seems well established that meteoric showers are the

CATTLE BECOME WILD ON ALASKAN ISLAND

KODIAK, Alaska (AP)—Three hundred and fifty shorthorn cattle browse over the mountainous surface of tiny Chilikof Island, 200 miles out in the northern Pacific ocean from Kodiak.

More than 40 years ago the Alaska Commercial company, a development concern long since extinct, stocked the island with a few head of tame cattle for experimental purposes. On the little isle with a surface of but 20 square miles, the cattle have degenerated from inbreeding and have become thoroughly wild, but the herd continues to thrive. Alaskans say the experiment at least has proved that cattle can be grown in the region.

An Arkansas farmer plowed up \$200 in \$20 gold pieces at the scene of an abandoned race track dating before the Civil War.

remains of worn out comets whose orbits the earth crosses in its revolution."

KEEPING UP WITH A GROWING CITY

Within the last year Pampa has grown from a small country town to a city, bringing with that growth the modern conveniences and business enterprises which go to make up the city.

Along with that growth came the Pampa Daily News, giving to the people of Pampa and the outside world news of the activity and advancement of the great oil and wheat center. That news service has increased to not only tell the world about Pampa but to bring news of the outside world to Pampa.

THAT SERVICE IS EVER INCREASING—SUBSCRIBE TODAY AND KEEP UP WITH OUR GROWING CITY.

Faculty of 125 Will Teach For Tech Next Year

LUBBOCK, July 14.—With an enrollment of 2,000 students in prospect for the coming year in Texas Technological college, new faculty members are being added in every department. Approximately 40 new faces will be seen in the class rooms when school opens September 15, making a total of at least 125 faculty members.

Pres. P. W. Horn has announced a partial list of the new members as follows:

H. J. Bower, associate professor of agriculture; B. S. Kansas State Agricultural college; M. S. Ohio State university.

E. W. Camp Jr., teaching assistant in chemistry; B. A. Texas Tech; A. Y. Doherty, teaching assistant in chemistry.

H. R. Nissley, assistant professor in economics; B. S. in E. E. Armour Institute; Ph. B. University of Chicago.

F. E. Ballard, instructor in economics; M. A. Vanderbilt.

R. E. Garlin, professor of education; Ph. D. University of Texas.

J. T. Shaver, associate professor of education; M. A. Columbia university.

R. S. Fouraker, associate professor of civil engineering; M. S. in E. E., University of Texas.

W. M. Young, professor of electrical engineering (transferred from Physics Department); Ph. D. University of Illinois.

M. E. Farris, associate professor of Mechanical Engineering; M. S. in E. E., University of Texas.

A. C. Gullikson, instructor in woodwork; B. S. in M. E., University of Washington.

F. Y. Robnot, associate professor of English; M. A., Baylor university.

Mrs. R. M. Chitwood, assistant Dean of Women.

Theo. J. Beck, head of Department of French and German; M. A., LL. B. and LL. M., University of Copenhagen.

M. S. Stainbrook, associate professor of Geology; M. A., University of Iowa.

W. M. Graham, assistant professor of geology; M. A., University of Minnesota.

Marie Dellony, adjunct professor of Home Economics; M. A., Columbia university.

Edna Walker, instructor in Home Economics; B. S., College of Industrial Arts.

A. T. Bishop, adjunct professor of mathematics; graduate of U. S. Military Academy, West Point; M. A. University of Virginia.

C. C. Schmidt, associate professor of physics; Ph. D. University of Illinois.

Anna Jo Pendleton, professor of Public Speaking; M. A. University of Iowa (Miss Ruth Pirtle on leave of absence).

Frances Whately, associate professor of Spanish; M. A., University of Texas.

Madeline Janova, reference librarian; B. A.

Seasonable Dishes

ORANGE SHERBET

Home economic experts suggest this recipe for orange sherbet: 1 1/2 cups orange juice, 1 1/2 cups sugar, 1/4 teaspoon salt, 2 cups milk, or 8 cups rich milk, 1 cup cream, 2 table spoons lemon juice.

Heat one cup of the milk and add the sugar, stirring until it is dissolved. Add the other ingredients. Use a freezing mixture of one part of salt and four to six parts of ice. Turn the crank of the freezer slowly. After freezing remove the dasher, pack the freezer with more ice and salt, and let the sherbet stand for an hour or more to ripen in flavor.

Lemon sherbet may be made in the same way by omitting the orange juice and adding enough lemon juice to give the desired flavor.

CHOICE STRAWBERRY JAM

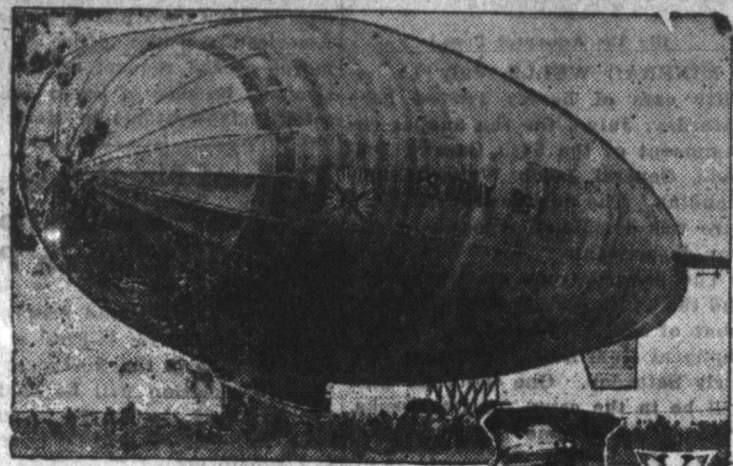

Wash thoroughly, drain and cap four quarts of strawberries. Pick out the largest fruit. Crush one quart of the smaller berries and add three pounds of sugar.

Cook rapidly in an enameled saucepan and stir until the sugar is dissolved and a thick syrup is formed. Add the remainder of the fruit and continue the rapid cooking stirring frequently to prevent scorching.

An asbestos mat should be placed under the pan as a precaution.

Cook 45 minutes to an hour, until fairly thick, then add two to three tablespoons of lemon juice. The jam should then have a brilliant red color and some of the fresh flavor of the fruit. The jam thickens when cooled and should not be cooked down too much. Place the jam in sterilized jars, seal and store.

LARGEST ARMY DIRIGIBLE GROOMED FOR FLIGHT TO ATLANTIC COAST

SCOTT FIELD, Belleville, Ill., July 14. (AP)—The RS-1, largest army dirigible and flagship of Scott Field, will embark this month on its longest flight.

A tour to Washington, New York and Boston, with a possible stop at the Ford mooring mast in Detroit on the homeward trip, has been arranged as an educational flight for a crew of about nine men, commanded by Lieut. Col. John A. Paegelow, commandant of Scott Field.

The ship is the world's largest semi-rigid craft, and is approximately a third as large as the Los Angeles, rigid airship of the navy. Launched in January, 1926, its longest previous flight was to Detroit on the first leg of a proposed 1,200-mile hegira which was cancelled because of adverse weather conditions.

On a flight here six months ago the RS-1 was compelled to remain aloft for nearly 20 hours because of a 51-mile gale which made landing impossible. It was in constant radio communication with the field.

The ship has three gondolas, two for engines and one a navigator's cabin, slung to an aluminum keel which gives it semi-rigidity. It is 282 feet long, 73 feet at its largest diameter, and has a helium capacity of 719,000 cubic feet.

The eastern tour will take the

The RS-1, largest army dirigible which will make its longest flight from Belleville, Ill., to Atlantic Coast. Below is Lt. Col. John A. Paegelow, commander RS-1.

RS-1 to Langley Field, Va.; Bolling field, Wash.; Lakehurst, N. J.; up the Atlantic seaboard by way of Mitchell Field, Long Island, probably as far as Boston, and thence by a return route to Lakehurst, up the Hudson river, over Troy and West Point, N. Y., over Buffalo and back to its hangar with the conditional halt at Detroit, if weather permits.

Texas Will Produce Eighteen Million Bushels of Wheat—Exports Reach Large Figures

(By The Associated Press.)

DALLAS, July 14.—Texas will produce more than 18,000,000 bushels of wheat this season and the Oklahoma turnout will be around 40,000,000 bushels, R. C. Andrews of Dallas, district manager of the American Railway association, estimates.

At the end of the fiscal year, June 30, 51,212,040 bushels of wheat had been received at Galveston and 47,365,138 bushels had been exported, as compared to the 35,429,900 bushels received and 33,623,821 bushels exported during 1924, last heavy production year, Mr. Andrews' report showed.

One million and sixty thousand bushels of wheat still are in the elevators there.

Grain situation in other ports, wheat (bushels) received since July 1, 1926: amount exported, and amount on hand respectively: Houston, 5,451,300, 3,785,413, 308,486 (none in 1925 or 1926); Texas City, 2,091,150, 2,094,029, none (previous year's figures unavailable); Port Arthur, 662,301, 634,170, 33,604. During same period in 1924, 3,130,998, 3,144,374, 23,540.

Wheat harvesting in the Panhandle was reported about 85 per cent completed and "exports are reaching heavy proportions."

"It is reported," the statement continued, "that a large percentage of interior available storage either has been filled up or contracted for, indicating a disposition by producers and dealers to hold for higher prices."

"Now that the heavy movement is on—and will continue for at least 60 days—it is important that grain cars be released promptly and returned immediately to production territory."

DANGERS OF FASTING

DENTON, July 13.—One of the most outstanding dangers of fasting is in the continual losing of vitamins which we all know are essential to the repair and maintenance of the various vital functions of our bodies. The daily supply of vitamins cannot be produced by the animal body but they are an exclusive product of plant life. The liver hoards up a small supply of vitamins to be used in an emergency, but not sufficient to last indefinitely. This is shown by the experience of the sailors who contract scurvy and those who become victims of beri-beri through living on polished rice. This being the case it is always well to arrange to have those foods which are rich in vitamins. That is why we should always eat fresh fruit and vegetables along with some cereals and milk, according to an expert in the household arts department at the College of Industrial Arts.

Breakfast
Fresh peaches and cream, Toast and butter, fig conserve, coffee, milk.

Luncheon
Macaroni and Cheese, Vitamin Salad, Graham Muffins, Milk.

Dinner
Roast Veal and Gravy, Green Beans Cauliflower, Pear Salad, Baked Custard, Iced Tea, Milk.

Vitamin Salad
2 medium tomatoes,
2 oranges,
1 cup chopped celery, lettuce.

Peel the tomatoes and oranges, cut in thin slices. Arrange alternately in a circle on lettuce leaves allowing 1/2 orange and 1/2 tomato to each serving. Sprinkle well with chopped celery. Garnish with Mayonnaise.

Macaroni and Cheese
4 oz. macaroni,
4 oz. grated cheese,
1 cup white sauce,
3 tablespoons crumbs.

Salt and pepper.
Cook Macaroni in boiling salt water 20 minutes or until tender. Pour into strainer and run cold water over it to prevent sticking together. Place layer of macaroni in buttered baking dish, pour over white sauce and sprinkle with cheese. Repeat until materials are all used up. Sprinkle top with bread crumbs and brown in oven. Serve hot.

A DEPENDABLE DISH

To make French fried potatoes, peel and cut the potatoes lengthwise into strips about one-half inch thick. Rinse in cool running water and soak for two or three hours to remove as much of the starch as possible. Pat with a clean dry cloth to absorb moisture.

Keep a kettle of deep fat hot enough to brown a small piece of bread in one minute. Fry a cupful of potatoes at a time. Remove from the fat when a golden brown.

Drain on clean absorbent paper and sprinkle with salt. Serve at once while hot and crisp.

LUMINOUS PICTURES CAUSES ART SENSATION

LONDON (AP)—Pictures with so luminous an appearance that they appear to have a light behind them created a sensation among English art experts.

Iwan Choultse, a Russian painter in oils, sent a number of his works for exhibition at a well known picture gallery. A picture which was shown in the window attracted such crowds that the street traffic was interrupted. Yet the subject was usual enough—sunshine upon snow.

ORATORS! CHILDREN! LOVERS! THAT'S SUMMER IN NEW YORK

NEW YORK—To see Democracy Unabridged, visit the playgrounds of Central Park.

Children—thousands of them, of every age, race and religion—in virtually unrestrained pursuit of juvenile joy. There are few "verboten" signs, the cops are handpicked for complacency, apparently, and the sky is the limit as long as life and limb are not endangered.

The Park is adjacent to Fifth avenue and a common sight is that of a French governess or tutor standing nearby while Algernon and Gwendolyn Multicash shout with a dozen East siders.

Romance thrives unabashed in the anonymous throngs of the metropolis. Kisses on busses are commonplace. And now the benches on Brooklyn Bridge have become a favorite trysting place for young couples. River traffic is no deterrent. And the moonlight is just as effective there as it is in Central Park.

Columbus Circle is New York's most popular outdoor auditorium. Every evening, regardless of weather the show takes place. Usually the performer is a lecturer, urging or asking everything from a new religion to the most efficient use of toothpicks.

Enthusiastic New Yorkers—and there are some—insist the visitor may find the answer here to any whim.

For instance, the motor maniac may go to the Motor Parkway in Brooklyn, a wide, long, privately owned stretch of roadway, and, for a nominal fee, send his bus along at the highest speed of which it is capable. There is no speed limit for any responsibility for what happens to the racer.

Heard at the door of a speakeasy in the Bright Light district:
Prospective patron: "Hello, Skipper, John Jones sent me over."
Doorman: "But you don't know us."

Prospective patron: "That's all right. I'm willing to trust you."

New York booksellers are "cashing-in" on the publicity given to books that have been barred by Boston censors. Over a shelf of books in the window of a Fifth Avenue store is a sign, "Books that cannot be sold in Boston."

Broadway talk is rarely worth face value, but friends and family of stage aspirants are prone to believe all they are told of coveted positions won and salaries paid.

One group of young men went on

masse to a show the other night to see a pal make his debut before the footlights, and finally located him serving as a super, wearing the robes of a sheik and carrying a huge spear. "Look at 'im!" exclaimed one of the group in disgust. "He'd be better off back on the truck."

A man sneezed at the movies and neglected to turn the blast off his vocal cords. The result was an explosive yell which brought a laugh from all parts of the house.

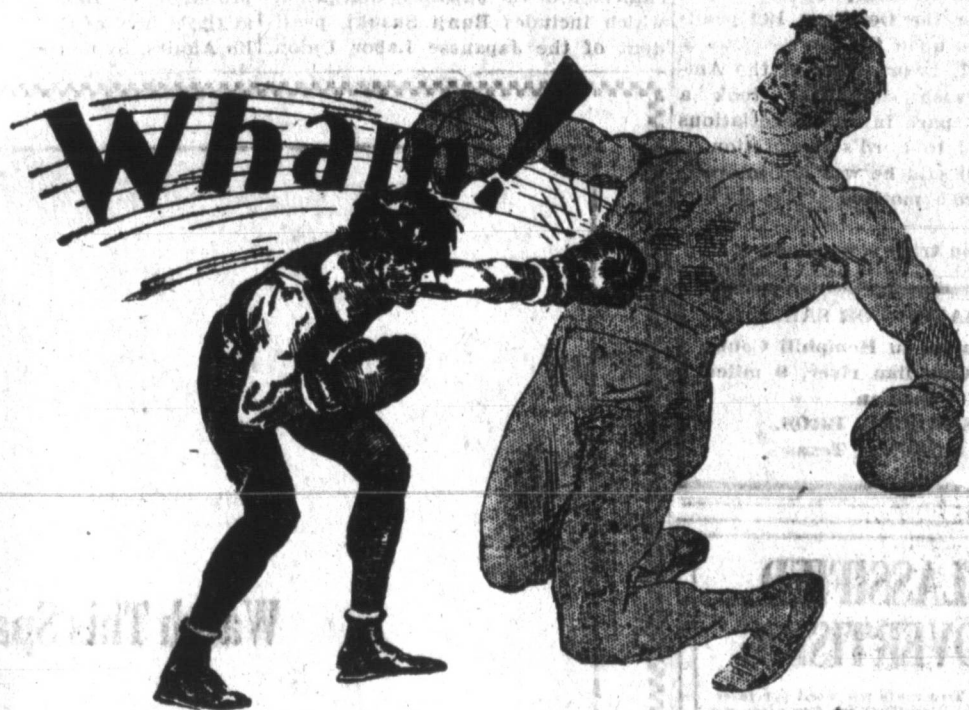

The uproar started to die down, but was renewed as the unwinding film happened to throw the following title on the screen:

"He must have been a colonel, at least!"

Britain To U. S.

Captain F. T. Courtney, British flyer and test pilot, is ready to embark on a flight from Calshot, England, to New York. He plans to land his seaplane in New York harbor. He will be accompanied by F. W. M. Downer, navigator and R. F. Little, mechanic.

The Proper Punch A Real Kick--Results

And after all it is the results that we all want. In fact, we must have results to be pleased. In advertising, probably more than in anything else, results are essential.

With a coverage of this trade territory, a complete force of type-setting artists, a nationally known advertising illustration service and real daily newspaper advantages, the Pampa Daily News is the outstanding medium to reach the buying public and thus secure results.

 4. \$127,000.
 5. A fine team represented Pampa in 1920, with Clyde Fatheree as manager. Good nines were also developed earlier.
 6. W. P. Baydler, once owner of the Crescent theatre, set up a small plant in 1916, for his theatre and a few other businesses.

Warns Jews Not To Go Strongly In Thanking Ford

NEW YORK, July 14. — Louie Marshall in a statement to the New York Sun today warned the Jews not to go into extremes thanking and congratulating Henry Ford for his apology for the Dearborn Independent attacks upon the Jews.

Marshall, as president of the American Jewish committee, took a prominent part in the negotiations which lead to Ford's recantation.

Marshall said he was not interested in Ford's motives.

Leading Citizens of Ten Nations to Discuss Tasks

(By The Associated Press.)
HONOLULU, July 14.—More than 100 leading citizens from 10 nations bordering on or having interests in the Pacific are here to begin a two weeks' conference in an endeavor to arrive at a mutual understanding of the causes of friction between East and West.

The conference has been called by the Institute of Pacific Relations, which emphasized that it is to be strictly on an unofficial basis, so that issues may be discussed frankly and openly. The Institute feels that open discussion, unrestricted by diplomatic formality, will quickly bring to light hidden points of cleavage.

There will be no forbidden topics, the Institute has announced. Barriers to the assimilation of alien races, immigration, the economic effect upon labor of immigration and emigration, the second generation of Orientals in California and Hawaii, industrialism in the Orient, extraterritoriality, and high cable rates, are some of the topics on the program.

Among nearly 50 Americans who will attend the conference are Dr. Ray Lyman Wilbur, president of Stanford University and chairman of the Institute; Prof. James T. Shotwell of Columbia University; Robert Dollar, president of the Dollar Steamship company; Mrs. Carrie Chapman Catt, lecturer of New York; Stephen P. Duggan, director of the Institute of International Education, and Archbishop Edward J. Hanna of California.

The British members include Sir Ernest Wilton, for 25 year in the Diplomatic Service in India; Sir Frederick Whyte, first president of the Indian Legislative Assembly, and Malcolm MacDonald, son of Ramsey MacDonald, former Prime Minister.

Among the Chinese delegates is Dr. Z. T. Yue, who was the People's Delegate from China at the Washington Disarmament Conference, and Dr. Chang Po-Ling, president of Nankai University in Tientsin.

Dr. Sawayanagi, president of the National Educational association is chairman of the Japanese delegation, which includes Bunji Suzuki, president of the Japanese Labor Union,

Albert Hauser Is New Sheriffs' Head

(By The Associated Press.)
LAREDO, July 14.—Sheriff Albert Hauser, of Maverick county, was elected president of the Texas Sheriffs' association today at the conclusion of the association's fiftieth annual convention. Austin was selected as the next convention city.

SAN ANTONIO BANK TO HELP AGRICULTURE
SAN ANTONIO, July 14. (AP)—Immediate results of the opening of a branch of the Dallas Federal Reserve bank here recently included an increase of \$400,000 in San Antonio bank clearings on the first day. According to Miers Crump, managing director of the bank, the new institution will greatly facilitate the financing of agricultural operations in this district.

The presence of the bank has made necessary a revision of the rules of the San Antonio Clearing house association and according to bankers will greatly simplify clearing operations.

RESOLUTIONS
WHEREAS: The Great Creator having been pleased out of his mercy to remove our brother, George V. Saunders, from the cares and troubles of a transitory existence to a state of eternal duration, thereby depriving his family of a kind husband and father, and the Masonic Fraternity of a loyal member of more than fifty years standing:

NOW THEREFORE BE IT RESOLVED that Pampa Lodge No. 966 A. F. & A. M. extends its sincere sympathy to the family of our deceased brother.

T. D. HOBART,
M. K. BROWN,
A. H. DOUCETTE,
Committee.

COTTON FIGURES GIVEN
WASHINGTON, July 14. (AP)—Cotton consumed during June totaled 662,630 bales of line and 70,041 bales of linters the census bureau announced today.

and Yusuke Tsurumi, foremost political orator of Japan.

Among the Australians is H. Duncan Hall of Sydney, recently made professor of international relations at the School of Citizenship and Public Affairs, Syracuse, N. Y.

Cavalry Brigade Takes Up Quarters at Mineral Wells

(By The Associated Press.)
MINERAL WELLS, July 14. — Fifty cars of horses arrived here Saturday, July 14, for the annual encampment of the 56th Cavalry Brigade, General Jacob Walters, commanding. The new permanent camp here was completed recently by the war department.

The service troop stationed here and the 112th cavalry with a detachment of the Adjutant General's department from Austin, went on duty early Saturday. One thousand men will be in the camp for two weeks. They were to come in four troops trains Monday.

Early on the program of the encampment will be the dedication of Pylon Hall, which will seat 1,000 persons and was a gift from Major Bob Pyron of Houston.

The 56th brigade is composed of the 122th cavalry, the 56th machine gun squadron and headquarters troops. The 11th cavalry is a part of the 56th brigade, but as it is located in New Mexico it will go to camp at Ft. Bliss this year. The following Texas cities are represented at the camp here: Dallas, Fort Worth, San Antonio, Houston, Tyler, Brenham, Waxahachie, Austin and Mineral Wells.

Governor Moody will review the brigade on July 22, with Brig. General Robert L. Robertson, Texas adjutant general; Gen. John A. Hulien, commander of the 36th division, and General Earnest Hinds, Ft. Sam Houston, commander of the 8th corps area.

CONGRESSMAN TO SPEAK
BRYAN, July 14. (AP)—Luther A. Johnson, Congressman from Corsicana, accepted an invitation to address the Wesley Brotherhood banquet at the First Methodist church here on the night of July 11. Johnson has been elected to congress three times without opposition.

Demonstrations In Mexico Results In Placing of Guards

(By The Associated Press.)
BROWNSVILLE, July 14.—Police guards have been placed around the American consular office at Matamoros at the request of Consul H. Leonard because of Sacco and Vanzetti demonstrations in Mexico.

Press of Northeast Texas Association to Meet In Paris

(By The Associated Press.)
PARIS, July 14. —First semi-annual meeting of the Northeast Texas Press association will be held here September 23, during the Lamar District fair, the executive committee has announced.

Sessions will be held in the Chamber of Commerce building and members, with their families, will be guests of the Lamar fair association.

The association embraces territory of the first and fourth congressional districts, including sixteen counties in which there are 43 daily and weekly papers.

Sam Fryer, Clarksville, is president; Sam Holloway, Deport, vice-president; and Lon Boynton, Paris, secretary.

Advance styles are here. See the new fall McCall Patterns. They're printed. People's Store. 108-1tc

CHANGING TIRES WILL PROLONG THEIR LIFE

Changing tires around from time to time will result in longer tire life and better all round service, according to L. C. Blackburn, of the Pampa Service Station, Inc., Firestone dealer in Pampa.

"When a motorist buys a new spare, we recommend that he put it on the right rear and give it a rest for a while," he stated. "The other tires should be changed, too, left front to left rear, etc. Each wheel puts certain strains on a tire different from that of the other wheels and by using the tire on each in turn the wear is evenly distributed and the tire lasts longer and gives better service."

"It is also important to have tires looked over frequently for minor cuts and bruises, etc., and to have small repairs made promptly. Tires should be inflated to the correct pressure as under-inflation of a few pounds will often result in the loss of hundreds of miles of useful service. Valve caps, screwed down tightly by hand, should always be used to prevent air leaks."

"If motorists will give their tires ordinary care and attention they will have less trouble and enjoy greater tire satisfaction."

A number of showers were reported between here and Amarillo during the night.
