PAMPA, GRAY COUNTY, TEXAS, FRIDAY, NOVEMBER 26, 1926

Price, Five Cents

PAMPA FIELD ATTRACTS WORLD

Worker Leaps From Derrick When Well Burst Into Flames

Lingered for only a moment at the top of a blazing oil derrick, with every apparent avenue of escape cut off and certain death staring him in the face, William A. Jackson, 35, a tool dresser for the Gulf Refining company in the Signal Hill territory, looked downward once, threw both hands into the air and leaped, landing in a slush pit 84 feet below.

Both arms and collar bones were broken and his body badly burned. Jackson is in a critical condition at the Northwest Texas hospital. He has a chance to recover, attendants reported last night. He was brought here in a Griggs ambulance after being given first aid at the Signal Hill Emergency hospital.

Jackson, according to co-workers, had been sent to the top of the derrick to repair one of the shives when the well, which had been making small heads of gas and a spray of oil, belched forth a volume of oil and gas which was immediately ignited from an undetermined source.

The rig was immediately enveloped in flames, with Jackson clinging to the top of the derrick, trapped.

Instinct told him that to remain where he was meant death, to descend through the flames also meant death. His only chance was to leap. The flames were leaping at his shoes, tips, in fact, had ignited his clothes, when he leaped.

He landed in the pit in an upright position and was quickly rescued by workmen and company officials.—Amarillo Daily News.

Work Started On Large Champlin Tank Farm East

The Champlin Refining Company of Enid, Okla., has started construction on their tank farm three miles west of Pampa. Two tanks with a combined capacity of 110,000 barrels will be built at once, and two others will be added later. The foundations for the first tanks have been completed.

The surveying for a pipe line from the new farm to the Roxana field has been completed and the pipe will be laid in the near future.

Tanks are being added to all of the farms between Pampa and Kingsmill, and the amount of oil now in storage on the farms is valued at several million dollars. Lines leading to the various tanks come in from most all directions.

Gas Well Burning At Berger Since Sunday

A gas well in the south part of Berger that caught fire Sunday is still burning. A crew of men have been working night and day attempting to extinguish the fire, but so far they have not been successful. A portion of the gas has been piped away, but the pit in the well is so deep and large that the major part of the gas cannot be piped.

One of the workmen lit a cigarette near the well last Sunday, and it is supposed that the wind changed enough to carry the fumes of the gas so as to come in contact with sparks from the cigarette. The workmen at the well say that as soon as sufficient steam can be piped to the well, they believe that the fire can be extinguished with its use. The well is the Burnett No. 1.

Gas Co. Has Installed 900 Meters in Pampa

The Pampa Gas Co. now has more than 900 meters installed here. Two of the meters care for more than 200 families. These two meters are installed in tourist camps.

The company now has two gas lines leading into town. One is from the Bowers well six and one-half miles south of Pampa, and the other is from the Anderson well nine miles south. The combined capacity of the two wells is three million cubic feet of gas a day, according to W. L. Woodward, manager of the company. The maximum amount of gas that the city will use on the coldest day will not exceed one million cubic feet, he says.

Larger pipe for a part of the main line has been ordered and will be installed as soon as it arrives.

Few Weather Proverbs Are Founded On Truth

"Mackerel scales and mare's tails, Make lofty ships carry low sails." Certain conditions of the atmosphere bring about cloud formations of special sorts which have so long been recognized as accompanying definite weather conditions that they have become proverbial. Not all weather proverbs are founded or supported by scientific fact, but many of those giving forewarning of storm conditions have stood the test of time, according to the Weather Bureau of the United States Department of Agriculture.

The foregoing jingle is a good instance. "Mackerel scales" are familiar to almost everyone, in their distinct appearance across the sky at rather a high level; "mare's tails" or "painter's brush" is a slightly different flecking of small clouds high in the atmosphere. Either of these cloud formations consists of high, thin, wispy cirrus clouds that float from 5 to 8 miles or cyclonic storm rises to that forms the upward currents in the forward portion of a great height, where in middle latitudes it gets into the swift eastward moving winds that carry it and its ice particles far ahead of the rains. There are also other ways by which this kind of a cloud is formed, but since the way just explained is very common, and the cirrus thus produced only the forerunner of a storm that is coming, it is usually to be trusted, and stormy conditions be expected.

Body of J. Charlton Buried In San Antonio

The body of Jordan Charlton, who died here the first of the week from burns received when a gas well exploded, was sent to San Antonio for burial Tuesday. G. C. Malone took the body overland to Cleburne and placed it on the Denver route which runs direct to San Antonio.

Jordan is survived by his wife and two daughters, his mother and six brothers and sisters.

Robert Clark Reported Improving From Burns

Robert Clark who was seriously burned Monday night when he attempted to save his pal, Jordan Charlton, is reported to be improving. Clark and Charlton were working at the Worley Reynolds well number 3 when the gas exploded and Charlton's clothing was set fire. Clark dropped to the floor and avoided the explosion, but was burned when he carried Clark from the derrick.

Gordon Official Here. A. Denebsten of Kansas City, president of the Gordon Stores Co., was here Thursday and attended the Thanksgiving dinner that was given for the local store employees. He also made a tour of the Pampa oil field while here.

"United We Stand, Divided We Fall"

(Editorial.) "United we stand, divided we fall." True enough, but probably not inclusive enough. Organization must first be considered. Then again we must not unite too much under one head.

Unlike most thriving communities, Pampa does not have an organized progressive Chamber of Commerce. It has been set aside from day to day and from week to week until there is practically no organization left. Of all times, now is when we need a good, live, progressive organization to place Pampa in the lead where she belongs, and keep her there. The city business has increased until it is a one man job, and the rapid development is calling for a Chamber of Commerce whose management will be a one man job.

At present M. A. Turner is secretary for the city and the Chamber of Commerce, and has, no doubt, done his best, or as good as any one, but one man cannot do justice to both of the offices. One of them must necessarily be neglected, and the result is that the Chamber of Commerce is here in name only.

Now, before it is too late, let's organize and work. A progressive Chamber of Commerce is the life-blood of the city. The work that it can do is practically unlimited, and its work is the kind that cannot be substituted by the work of an individual. It is representative of all the people, and its work is for all the people. Through a well organized Chamber of Commerce we will benefit as a community, which means that we can then prosper as individuals.

The women as well as the men can do much to further the interests of the community. A ladies auxiliary in connection with the Chamber of Commerce gives the city a representation at its maximum. The women of Pampa are progressive as individuals, and if properly organized they can keep pace with the men.

Are we going to unite in the organization of our Chamber of Commerce?

Pampa Wins Final Season Game Here From Miami 28-0

The Pampa High School football team won from the Miami boys here Thursday 28 to 0 in the last game of the season. The Pampa boys scored a touchdown in every quarter of the game and succeeded in kicking the extra points each time.

Pampa is disqualified from the district finals because of ineligible players. Sickness and failure to make standard grades are given as the reasons for not qualifying. The laws governing the high school teams specifies that all the players on each of the teams must make a scholarship record that comes up to a set standard.

Pampa engaged in seven games during the season. The results were as follows: Pampa 6, Panhandle 0; Pampa 6, Shamrock 14; Pampa 20, Wheeler 0; Pampa 37, Claude 0; Pampa 27, Wellington 0; Pampa 6, Panhandle 0; Pampa 28, Miami 0.

The two games played with Panhandle resulted in scores that, which makes the hope that there is great equality, but this from both of the cities still counts that there is a difference.

Cleveland Official Favors Superpower

Howell Wright, director of public utilities for Cleveland, Ohio, has advocated the purchase of 10,000,000 to 20,000,000 kilowatt-hours of electricity annually from some privately owned and managed superpower system. He states that it requires 1.53 pounds of coal to produce a kilowatt-hour of electricity at the municipal generating station while a private company in Cleveland produces the same energy with only 1.1-2 pounds of coal.

"The time has come when the municipal light plant can cease to exist as an isolated plant. The entire United States will soon be lined up in a chain of superpower systems. These systems can produce cheaper electricity than isolated plants," Mr. Wright said.

Mrs. Alice Crawford of Amarillo is spending the Thanksgiving holidays with her parents, Mr. and Mrs. J. S. Wynns.

Diamond Shop Opens Second Store Here

S. Fenberg and F. Soodhalter, proprietors of the Diamond Shop, have opened their number two store in the Davis Building on Cuyler St. The introduction of the new store is being made by means of an auction sale.

The entire stock of jewelry to be sold is now and valued at \$10,000, according to the proprietors. After the first of the year the building, which was formerly occupied by the Davis Hardware Co., will be remodeled and redecorated.

The Successful Sales Co. has been employed to manage the sale of jewelry. Sales are held every afternoon and evening.

Sheepskin Serve As Lung of Gas Meters

The gas meter which breathes in and out as the gas is used, and measures it with more than the accuracy of most watches, has lungs, or diaphragms, made of sheepskin, says the Texas Public Service Information Bureau.

Six skins are discarded for each one that can be used, and unless the skins have come from New Zealand or Australian sheep, the proportion of discards is even higher.

If the original wearer of the skin has been bitten by insects, if he has galloped through a thorn bush or collided with a barbed wire fence, the skin will show defects.

When the perfect skin has been found it is soaked for ninety days in heavy oil, to make it impervious to the corrosive elements in gas. Experiments with cotton, linen and vegetable fibre fabric, synthetic leather and rubber compounds have been made to discover a substitute for the sheep skin diaphragm, but as yet none has been found which can be depended upon for accurate and prolonged performance.

The second Lyceum number, under the auspices of the P. T. A., was given at the high school auditorium Monday, November 22, to a large and appreciative audience.

Mr. and Mrs. Epperly of Ft. Worth, were guests of Mr. and Mrs. C. P. Buckler Thursday.

Mrs. Judge Bryan and daughter were guests of Mr. and Mrs. R. C. Campbell Thanksgiving. Mrs. Bryan is a niece of Mr. Campbell.

PAMPA FIELD ENLARGES AS WELLS CONTINUE TO COME IN; MANY NEW LOCATIONS MADE

A new high mark in the production of the Panhandle oil fields was reached last week when the daily average was 165,710 barrels.

Gray County wells are still holding the attention of the oil operators in drilling developments. The Gulf Production Company's No. 1 McConnel, in section 175, block 3, is swabbing more than a hundred barrels after it was deepened a few feet. The well has been near the pay for some time but has had a fishing job.

The Nabob Oil Company's No. 10 Morse located in section 68, block 25, has been deepened after it came in for 35 barrels for the first 5 hours. The last report from the well was that it was drilling past 2700 feet and had 2000 feet of oil in the hole. This well is about three-quarters of a mile south of the old Holmes No. 2 well, and about 12 miles southeast of the Canyon Oil Company's No. 1 Jackson.

The Jackson well is spraying oil. Six inch casing was run at 2,885 feet. The Phillips Petroleum Company's No. 1 Davis in section 86, block 3, was flowing 382 barrels, according to the last report, and was being drilled deeper.

Several locations have been made in the county during the last few days. The following have been reported: Gulf Production Company's No. 1 Combs and Worley in section 37, block 3; Terrell's No. 1 Patton in section 61, block B-2; Prairie Oil and Gas Company's No. 8 Worley and Reynolds in section 83, block 3; Prairie Company's No. 1 Combs and Worley in section 60, block 3; Magnolia Petroleum Company has made an offset to the Roxana Petroleum Corporation's No. 1 Finley in section 11, block 3; John G. Lane's No. 1-A Chapman located in section 19, block 1.

The average daily production of the Pampa field remains around 10,000 barrels. This production, when the many wells that are now drilling are completed, is expected to make a surprising jump within a short time, according to oil officials.

Gray County crude is maintaining its high standard quality and continues to soar in price above the crude from the other fields.

Short Winter Days Demand More Light

With the arrival of winter the sun is falling down on its job. As a result people will notice an increase in their electric light bill—just as they noticed a decrease when the summer days arrived.

During November artificial illumination is used more than six hours a day, against two and a half hours in June.

The greatest amount of electricity is used during December when the days are shortest.

Apart from the miscellaneous uses to which electricity may be put in the home, which includes various forms of energy, the size of the bill will vary month by month, in direct proportion to the number of hours artificial illumination is necessary.

Statistics in the electrical industry have figured out the average number of hours a day that artificial light is needed approximately as follows:

January 6.35; February 5.38; March 4.10; April 3.48; May 2.95; June 2.55; July 2.66; August 4.00; September 4.45; October 4.90; November 6.18; December 6.85.

High Line Extended. The high line from Amarillo is being extended to the Wilcox field south of Pampa. The residents, oil companies and townships on the line will be given current from the line.

Mrs. Milo O'Loughlin of Miami spent Thanksgiving with Mrs. J. L. Stroope and her sister, Mrs. Olympton.

Mrs. Milo O'Loughlin of Miami spent Thanksgiving with Mrs. J. L. Stroope and her sister, Mrs. Olympton.

To Change Postal Quarters to New Building At Once

Most of the post office equipment will be moved into the new building on Kingsmill Avenue Saturday and Sunday, according to W. A. Crawford, postmaster. Persons who have a box rented at the present building will be given the same box number in the new building, so far as is possible, so that the postal employees as well as the customers will not be confused.

A city carrier will be started to work in the near future, which will greatly decrease the congestion at the post office, according to Crawford.

"The postal business is making a steady increase here," says Crawford, "and everything will be done that will keep our service the best possible."

As the carrier service is increased, the postmaster plans to lay out routes whereby the greatest number of people will be served. He does not plan to cover any certain part of town, but to cover some of all parts so that the service will be equally divided.

More boxes will be installed in the new building which will help to relieve the congestion at the general delivery window. With the carrier working, Crawford says that the service will be much more prompt than has been possible in the past.

United States Has One Telephone for Each Seven People

There is one telephone for every seven people in the United States. Taking our whole vast population of 114,000,000 souls—men and women and children, young and old, native and foreign, white and colored—for every group of seven persons there is a telephone in service.

No foreign country shows an equal telephone development. Sweden has just about half as many telephones in proportion to population as the United States. In other words, there is one telephone for every 14 Swedes. Denmark has one for every 11 people, Switzerland one for every 21 inhabitants. Germany boasts more telephones than any other country outside of the United States, but there is only one telephone for every 25 Germans.

Great Britain makes a still less favorable showing with 35 people to every telephone. Yet even this is better than the telephone development of France, for the French Republic contains but one telephone for every 55 inhabitants.

Taking Europe as a whole, there is only one telephone for every 71 people. As the United States has one telephone for every 7 persons, it will be seen that our telephone development in this country is more than ten times as great as Europe's. In fact, Europe has only just attained the point in telephone expansion which the United States reached (and passed) in 1900.

NOTICE OF ROAD BOND ELECTION

STATE OF TEXAS, COUNTY OF GRAY.

To the resident property tax-paying voters of Gray County, Texas:

TAKE NOTICE that an election will be held on the fourth day of December, 1926, within Gray County, Texas, to determine if said county shall issue bonds and if a tax shall be levied in payment thereof, in obedience to an election order entered by the commissioners court on the first day of November, 1926, which is as follows:

On this the first day of November, 1926, the commissioners court of Gray County, Texas, convened in Special Session, at the regular meeting place thereof in the courthouse at Lefors, Texas, the following members of the court, to-wit:

- T. M. Wolfe, County Judge.
- C. W. Bowers, Commissioner of Precinct No. 1.
- Thomas O. Kirby, Commissioner of Precinct No. 3.
- M. M. Newman, Commissioner of Precinct No. 4.

Being present, came on to be considered the petition of E. B. Hedrick and one hundred twenty four (124) other persons, praying that bonds be issued by said Gray county in the sum of \$1,200,000.00 bearing a rate of interest to be fixed by the commissioners court not exceeding five and one-half (5 1/2) percent, maturing at such times, as may be fixed by the commissioners court, serially or otherwise, not to exceed thirty years from date thereof, for the purpose of constructing, maintaining and operating macadamized, gravelled or paved roads and trunpikes, or in aid thereof, and whether or not a tax shall be levied upon the property of said Gray county, subject to taxation, for the purpose of paying the interest on said bonds and to provide a sinking fund for the redemption thereof at maturity, and praying that the funds derived from the sale of said bonds be expended according to the following schedule:

Highway No. 33, otherwise known as the Southwest Trail, 14 miles at \$18,500.00 per mile, or \$231,000.00.

Highway No. 75, otherwise known as the Postal Highway, 22 miles at \$14,000.00 per mile, or \$308,000.00.

Highway No. 88, otherwise known as the Clarendon Highway, 12 miles from Pampa, South, at \$198,000.00 per mile, or \$2,376,000.00.

Highway No. 33-A, otherwise known as the Fort Elliot Highway, 20 miles, beginning at the end of the 8 mile section mentioned above, at \$7,500.00 per mile, or \$150,000.00.

The sum of \$65,000.00 to be used for the construction of lateral county roads; in addition thereto, any premium or premiums derived from the sale of said bonds to be used for the construction of lateral county roads;

The said election shall be held under the provisions of article 627 to 641, inclusive, of Chapter 2, Title 18, Revised Statutes, 1911, as amended by Sectional Chapter 293, Acts of 1917, Regular Session.

All persons who are legally qualified voters of this State and of this county, and who are resident property taxpayers in this county, shall be entitled to vote at said election, and all voters desiring to support the proposition to issue bonds shall have written or printed on their ballots the words:

"For the issuance of bonds and the levying of the tax in payment thereof."

And those opposed shall have written or printed on their ballots the words:

"Against the issuance of bonds and the levying of the tax in payment thereof."

The polling places and the Presiding Officers of said election shall be respectively as follows:

Precinct No. 1 at Lefors, the regular polling place of which is at the courthouse, with Mr. M. B. Davis as Presiding Officer.

Precinct No. 2 at Pampa, the regular polling place of which is at the office of the White Deer Land Co., in the White Deer Land Co. building, with Mr. J. E. Murfee, Jr., as Presiding Officer.

Precinct No. 3 at Steed, the regular polling place of which is the Grandview Schoolhouse, with Mr. Lee Fortenberry as Presiding Officer.

Precinct No. 4 at Alanreed, the regular polling place of which is the S. L. Ball Building, next door to the Post Office on the South, with Mr. S. R. Loftin as Presiding Officer.

Precinct No. 5 at McLean, the regular polling place of which is at the Office of Mr. M. L. Bentley in the West end of the Montgomery Drug Co. Building, across from the Post Office, with Mr. A. A. Callahan as Presiding Officer.

Precinct No. 6 at Laketon, the regular polling place of which is the

Laketon Schoolhouse, with Mr. W. S. Paris as Presiding Officer.

Precinct No. 7 at Farrington, the regular polling place of which is the Farrington Schoolhouse, with Mr. C. C. Gillis as Presiding Officer.

Precinct No. 8 at Hopkins, the regular polling place of which is the Hopkins Schoolhouse, with Mr. W. E. Ginn as Presiding Officer.

The manner of holding said election shall be governed by the general laws of the State of Texas, regulating general elections, when not in conflict with the provisions of the Statutes hereinabove referred to.

Notice of said election shall be given by publications of a copy of this order in the Pampa News and in the McLean News, newspapers published in the county for four successive weeks before the date of said election, and, in addition thereto, there shall be posted other copies of this order at three public places in the county, one of which shall be at the court house door, for three weeks prior to said election.

The county judge is hereby directed to cause said notices to be published and posted, as hereinabove directed, and further orders are reserved until the returns of said election are made by the duly authorized Election Officers and received by this court.

Given under my hand, with the seal of the commissioners court affixed, this the first day of November, 1926.

T. M. WOLFE, County Judge
(SEAL) STATE OF TEXAS, COUNTY OF GRAY: I Charlie Thut, Clerk of the County Court of Gray County, Texas do hereby certify that the foregoing is a true and correct copy of the original order of the Commissioner's Court of Gray County, Texas, passed on the 1st day of November, 1926. As same appears of record in my office in Book 2, pages 268-269, Commissioner's Court Minutes, Gray County, Texas.

Given under my hand and seal of said Court at my office in Lefors, Texas, this 1st day of November, A. D. 1926.

CHARLIE THUT, County Clerk.
(SEAL) 32-41-c

Highway No. 88, otherwise known as the Clarendon Highway, 12 miles from Pampa, South, at \$16,500.00 per mile, or \$198,000.00.

Notice of said election shall be given by publications of a copy of this order in the Pampa News and in the McLean News, newspapers published in the county for four successive weeks before the date of said election, and, in addition thereto, there shall be posted other copies of this order at three public places in the county, one of which shall be at the court house door, for three weeks prior to said election.

The county judge is hereby directed to cause said notices to be published and posted, as hereinabove directed, and further orders are reserved until the returns of said election are made by the duly authorized Election Officers and received by this court.

Given under my hand, with the seal of the commissioners court affixed, this the first day of November, 1926.

T. M. WOLFE, County Judge
(SEAL) STATE OF TEXAS, COUNTY OF GRAY: I Charlie Thut, Clerk of the County Court of Gray County, Texas do hereby certify that the foregoing is a true and correct copy of the original order of the Commissioner's Court of Gray County, Texas, passed on the 1st day of November, 1926. As same appears of record in my office in Book 2, pages 268-269, Commissioner's Court Minutes, Gray County, Texas.

Given under my hand and seal of said Court at my office in Lefors, Texas, this 1st day of November, A. D. 1926.

CHARLIE THUT, County Clerk.
(SEAL) 32-41-c

Community Goats Aid In Welfare of County's Children

Milk for the baby, a real problem in Rural New Mexico, is being solved by the community goat, which lives where a cow won't, and thus saves many a farm baby. To help get the milk to children most in need of it, the farm women of Dona Ana and San Miguel Counties, under the direction of the home demonstration agents each procured a flock of county goats which are loaned out to farm families with sick or undernourished children. One Sunday afternoon the agent of Dona Ana County carried two goats in her car a distance of 50 miles to families whose sick babies were much in need of milk. This method of supplying milk to farm children in a country where it is impractical and often impossible to keep cows is proving very effective and furnishes many touching incidents. One San Miguel County baby girl who was in a critically undernourished condition responded with a gain of 5 pounds in four months and that in spite of the whooping cough.

A dance was given in honor of Don Duncan and Alfred Gilliland at the home of Mr. and Mrs. W. E. Duncan Thursday night.

Mr. and Mrs. M. K. Brown motored to Ardmore, Okla., this week where they are visiting Mrs. Brown's mother. They expect to return Saturday or Sunday.

Domestic Rabbit Meat Good All Year Round

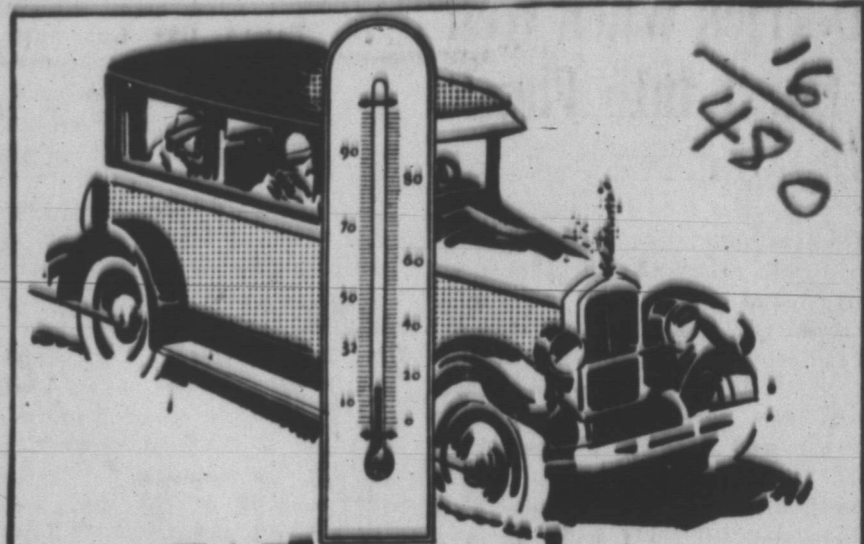

Domestic rabbits deserve to be better known as an article of food, says the United States Department of Agriculture. The meat is very delicious, tasting more like chicken than that of wild rabbits, although these are good too, in their season. Domestic rabbits have no special season, but may be eaten the year around, whenever those who raise them put them on the market. Domestic rabbits are raised in hutches where they have only limited exercise and where they can be fed properly. They are cleanly in habits, and their diet, consisting chiefly of oats, barley, and alfalfa hay, makes the meat sweet, tender, and ex-

cellently flavored. Housekeepers will do well to acquaint themselves with the domestic rabbit as an addition to their tables. The gamey flavor of wild rabbits is liked by many persons, but to others it is not so acceptable, and consequently the domestic rabbit is scarcely known by these people.

Texas wheat crop this year was 34,238,000 bushels or approximately five times that of last year.

Mr. and Mrs. E. S. Carr motored to Claude Thursday and spend the day.

Mr. and Mrs. Paul Stewart motored to Borger Thursday where they spent the day visiting friends.

When the thermometer drops look out for the radiators!

AS THE life insurance salesman said—"If you don't believe in insurance, just try dying without it one time." If you don't think that a freeze will ruin a radiator or perhaps crack a cylinder block or completely ruin a water pump, just try going without alcohol during a sudden drop in temperature. It is the easy, simple way to avoid trouble and expense. Blankets, laprobes and old comforts are all right as far as they go, but more often they don't go far enough.

Man supply you with alcohol. And after your first supply, return to the Marland station from time to time to determine what degree of temperature your water will stand.

Play safe and let the Marland station from time to time to determine what degree of temperature your water will stand.

As Told by Irvin S. Cobb

IZAAK WALTON IN BLACK

CAPTAIN GEORGE WALKER of Savannah used to have a hand on his Georgia plantation who loved seas and fishing. When he wasn't fishing he was loafing.

One night there was a rain almost heavy enough to be called a cloudburst and the next morning all the low places on the plantation were flooded two feet deep.

"Henry, you old fool," said Captain Walker, "what are you doing there?"

"Boss," said Henry, "I's jes' fishin' a little."

"Well, don't you know there are no fish there?" demanded Captain Walker.

"Yas, sah," said Henry; "I knows dat. But dis place is so handy!"

(Copyright by the McNaught Syndicate, Inc.)

"A good-natured woman," says philosophizing Philippe, "is one who can beat the cigar ashes out of the parlor rug and think what a nice time they must've had at the stag party."

How It Started

By JEAN NEWTON

THE "SACRED ARCANUM"

FREQUENTLY, in the newspapers, we come across this term. The reference is usually political, in the sense of being admitted to the "sacred arcana" or inner councils of a party or a group.

"Arcana" is the plural of "arcanum," meaning secret, which goes back to the Latin "arcanus," "to enclose." And the origin of the expression "sacred arcana" takes us back to original arcana, which was the name given by alchemists and astrologers of the Middle Ages to the hidden secrets and special knowledge which they were supposed to be teaching.

At various times "the arcana" was another name for the "philosopher's stone," the "elixir of life" and various chemical compounds which seemed on their discovery to have almost magic powers.

Fate's Pursuit

After she had refused him he said he was through with women, wanted to move women in his life. What he wanted, he said, was an undertaker. So he wandered down the street gloomily looking into windows, and pretty soon he came to an undertaker's window. And in a corner, he said: "Early yesterday." He kept right on.

Wallace Beery

Wallace Beery, the "movie" star, was born on a farm in western Missouri. He and his brother Noah were educated in Kansas City. He is at the top of the list of character actors. Among popular pictures in which he has appeared might be mentioned "Behind the Door," "The Spanish Dancer," "The Devil's Cargo," "Adventure," "In the Name of Love," "Rugged Water," and "The Pony Express." Beery is over six feet tall and weighs 235 pounds. He has light brown hair and brown eyes.

The Hotel Stenographer

THE Hotel Stenographer smoothed her dress over her hips carefully. "Hips are not fashionable any more," she said. "To be stylish these days a girl must be able to sit on a dollar bill and leave sixty cents of it exposed."

"You have some wonderful ideas," said the House Detective admiringly. "Yes," agreed the girl, "I got some of them at mother's knee but most of them over father's. But I'll broadcast to any invisible audience, Kelly, that the guy between the devil and the deep sea with the tide rising and the devil grinning hasn't anything on us girls this summer."

"Fashion dictates that we roll and wear rubber bandages, till we are hipless as a telephone pole. A hipless woman in a bathing suit looks like a flag wrapped around its pole on a wet day."

"If a woman could be like a show window, where they only change the decorations, it wouldn't be so bad, but they insist on changing the shape of the window every season. I am willing to wear 'em long at the bottom and short at the top because my collar bones do not look like the trusses of a cantilever bridge. Or I will fearlessly wear them high at the top and short at the bottom because nobody ever accused me of having legs like a canary. But when they want me to change myself to fit dresses designed like a stove pipe they can't expect me to yell, 'hip, hip, huray' when I got a couple of hips which have to be removed before I can hooray."

"Some sit-wit said fashions are, like laws, designed for the greatest good for the greatest number of people. It's a yarn, Kelly, for I see few hipless women among those who eat regularly."

American Industry Has 50 Millionth Horsepower Added

The fifty-millionth horsepower has been added to the industrial equipment of the United States and of this total the electric utilities of the country now have an installed capacity of more than 30 million horsepower, declares the New York State Committee on Public Utility Information.

These totals are based upon figures recently made public in the U. S. Census reports, which show that 61 percent of all prime movers in the country are now in the generating plants of the electric light and power companies.

Horsepower in factories on September 1, 1926, is estimated at 19,500,000. An increasing proportion of factory power is being purchased from the utilities, says the Committee. This phase of industrial development appears in comparison of factory power plants and public utility installations. Factory power plants have doubled in capacity since 1900, increasing from nine and a half to nineteen and a half million horsepower. In the same period public utility generating capacity has increased more than tenfold, from three million to thirty and one-half million horsepower. The installed power of the country per thousand of population has increased since 1900 from 168 horsepower to 425 horsepower.

MY HARDEST DAY

By DOUGLAS MALLOCH

O H, THIS has been my hardest day. Or so it seems. For I have had to put away So many dreams. Yes, I have had to toll so long. I cannot help somehow but say That this has been my hardest day.

More folks have said more things unkind, Or so I thought, And faith I did not seem to find For which I sought. Yes, love has turned its face aside, I even thought that love had died: I cannot help but somehow call This day the hardest day of all.

But here I am, the day is done, And—well, what now? Sweet night will hide the clouded sun, And so, somehow, I'll let it hide the wounds, the stings The little hurts the little things— Whatever other folks may do, The hardest day is always through.

And so tomorrow I may start Another day, I shall not leave upon my heart, Like lead to lay, 'The burdens of a day like this, The dawn will greet me with its kiss And it shall find, yes, dawn or not, My hardest day a day forgot. (By McNaught Newspaper Syndicate.)

Mother's Cook Book

Oh, sun and skies and clouds of June,
And days of June together,
Ye cannot rival for one hour,
October's bright blue weather.
—H. H. Jackson.

WITH BROWN SUGAR

This flavor of brown sugar is so generally liked that it adds to any dish. In the good old childhood days there was nothing that tasted better than bread and butter sprinkled with brown sugar. Let the children have it, it is cheaper than candy and much more healthful and it will satisfy the natural craving which every child has for sweets.

Brown Sugar Pudding

Beat two egg yolks with one scant cupful of brown sugar, two tablespoonfuls of flour and one tablespoonful of creamed butter. Mix smooth, then add one cupful of rich milk, gradually until smooth. Cool slightly and add the beaten whites of eggs. Mix lightly and serve garnished with cubes of grape jelly.

Brown Sugar Parfait

Take one-half cupful each of brown sugar and water, cooking without stirring, shaking the pan often to prevent burning. When a drop from a spoon makes a thread, remove from the heat and pour over two well-beaten egg whites. Beat until cold, then add one cupful of cream whipped stiff, flavor and pack in a mold; pack in ice and salt for three hours.

Brown Sugar Tapioca

Soak four tablespoonfuls of tapioca in one quart of cold milk, add a pinch of salt, butter the size of an egg, half a cupful of brown sugar and half a cupful of raisins. Bake two hours.

Brown Sugar Freeting

Beat the white of an egg until stiff, add two tablespoonfuls of water, three cupfuls of brown sugar and one teaspoonful of vanilla. Beat thoroughly before adding the flavoring.

Mr. and Mrs. Shepard and Miss Margaret Buckler were Amarillo visitors Thursday.

Mr. and Mrs. Jack Stephens were in Pampa Wednesday.

USE A WANT AD

My Daughter's Birthday

By DOUGLAS MALLOCH

With all your friends around you—
And many I hope there are!—
In that new home you've found you,
That always seems so far,
On this, the day of all days
For mortals to be glad,
I hope that you recall days,
Old birthdays with your dad.

May this day be a fair one,
Your buds begin to blow,
With maybe here and there one
Like buds of long ago.
Not long—I beg your pardon!—
But long it seems to me
Since baby ran the garden
And dad was there to see.

With all your years before you—
And many I hope the year!—
With blue skies ever o'er you
And good friends ever near,
If fate should ever fling you
A birthday that is sad,
Ah, then may memory bring you
A birthday with your dad!

SOCIETY NOTES

Mrs. Craven Hostess To El Progreso Club.

El Progreso Club met at the home of Mrs. W. M. Craven on Tuesday afternoon. The members responded to roll call with interesting current events.

The president, Mrs. G. C. Walstad presided at the business session.

Mrs. Jas. Todd Jr. was leader for the afternoon on the book, "The Blue Window," by Temple Bailey. She had given the subject much thought and had her program well

arranged. Mrs. Claude Ledrick as helper, gave an interesting sketch of the life of Temple Bailey and also gave the setting of the novel.

Mrs. Lee Ledrick gave a splendid description of the characters, and Mrs. Jas. Todd concluded the lesson by an excellent review of the plot.

During the social hour the hostess served a delicious salad course to the following: Mesdames Dave Pope, Jas. Todd Jr., Claude Ledrick, Lee Ledrick, Carson Loftus, G. C. Walstad, T. D. Mobart, John Andrews and V. E. Fatheree.

Mrs. White was the guest of the club.

The next meeting will be with Mrs. Dave Pope and will be guest day.

Mrs. J. M. Bell Celebrates Seventy-Second Birthday.

The pioneer home of the late John M. Bell, southwest of Kingsmill, was the scene of a happy family dinner last week, given by Mrs. Minnie Russell in honor of the seventy-second birthday anniversary of her mother, Mrs. J. M. Bell. Only immediate relatives were present. The birthday cake was a gorgeous affair, with 72 burning candles, and the dinner was sumptuous. Mrs. Bell, with her husband and sons and her daughter was among the two or three first settlers in that section of the county. Mrs. Bell is in good health, and maintains friends in Pampa. The Bells came from Kentucky in the early 80's.

Mr. and Mrs. George Walstead Entertain.

Mr. and Mrs. Geo. Walstead entertained a number of friends with a "42" party Thursday evening. After several rounds of enjoyable

games, a most delicious salad course was served the following: Mr. and Mrs. Tom Rose, Mr. and Mrs. R. C. Campbell, Dr. and Mrs. W. Purviance, Mr. and Mrs. C. T. Hunkapillar, Mrs. B. E. Finley, Miss Bernice Whitley.

L. L. Club Meeting Wednesday Afternoon.

The L. L. Club met Wednesday with Miss Nina Clift, at the home of Mrs. H. F. Barnhart. A business meeting was held and several plans for the future were discussed. The rest of the evening was spent in making candy.

The members of the club are: Misses Wilma Behrends, Jenett Flannigan, Margaret Schmidt, Bernice Chapman, Rena Belle Smith, Nellie Bird Ritchey, Nina Clift, Mabel Davis, Anna Barnard and Eunice Barnard.

M. E. Church Gives Farewell Party for Mr. and Mrs. Osborn.

A very pleasant surprise was given at the M. E. Church for Rev. and Mrs. B. J. Osborn on the eve of their departure to Wellington, where Rev. Osborn has been transferred.

Each guest brought dainties for a supper and after several talks and presentation of gifts to Rev. and

Mrs. Osborn and daughters in appreciation of their good work in Pampa and their kind response, a most enjoyable supper was served for the honor guests. Many kind wishes go with these good people to their new home.

Mrs. Vicars and Mrs. Wynne Are Hostess.

Mrs. Della Vicars and her mother, Mrs. J. C. Wynne were hostess to a delightful "500" party, given Thanksgiving evening at the home of Mrs. Vicars.

Mrs. A. H. Doucette won high score and received a dainty bouquet. A delicious luncheon was served the following guests: Mr. and Mrs. Carson Loftus, Mr. and Mrs. W. M. Craven, Mr. and Mrs. C. P. Backler, Mr. and Mrs. A. H. Doucette, Mr. and Mrs. Jess Wynne, Mrs. J. R. Crawford of Amarillo, Miss Jackson and Mr. Della Vicars.

Gordon Stores Company Entertains Employees.

The Gordon Stores Co. entertained the employees of their local store here and several friends with a 2 o'clock dinner Thursday. The feast was served at the Schneider hotel. Twenty-two persons were present, and each reported a real feed and plenty of fun.

SIGNS OF DEPARTURE

FOR some reason or other a good many stories of financial disaster have for their heroes or their central characters colored persons. For instance, there is the time-honored yarn of the mulatto cashier who told a black depositor seeking to withdraw his funds "dat de intrust had done et up dat money!" And one likewise recalls the pathetic narrative of the ancient negro who, on being told by the state bank examiner that banks had busted before and that no doubt in the future banks would continue to bust, sorrowfully replied: "Yaa, sah, I reckon you's right. But, boma, dis 'de de fust time I ever had one bust right in my face!"

I think of yet a third: An elderly person of color secured a job as janitor in a national bank. He put his savings on deposit in the institution, but after a few weeks withdrew the sum and transferred it to a rival bank across the street. News of this having reached the president's ears, he sent for the old man.

"Uncle Ike," he said, "of course your money is your own to do with as you please, but don't you think it looks peculiar for you to be working here for us and keeping your money somewhere else? What's the idea, anyhow?"

"Well, Mist' Blanchard," said Uncle Ike, "I's tuck notice dat you wears yore hat all de time you's in yore office. I ain't never seen you widout you had yore hat clamped on yore head."

"What has my habit of wearing my hat constantly to do with the case?" asked the puzzled president.

"Mist' Blanchard," said Uncle Ike, "I ain't gwine tell you no lie. If you must know de truth, it's done made me uneasy. You looks so much lak a man dat's fixin' to go 'way some-where in a hurry!"

(By the Central Press Association.)

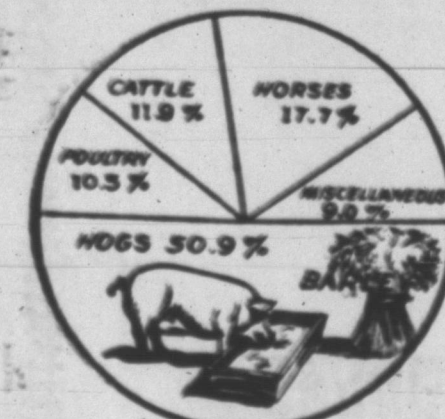

THE YOUNG LADY ACROSS THE WAY

The young lady across the way says another evidence that her father is observing the law in letter and spirit and limiting himself to soft drinks to the amount of ginger ale he buys.

Hogs Get Barley Diet

(Sears-Roebuck Agricultural Foundation)

Approximately 20,000,000 bushels of barley will be fed to farm animals in the United States this year if the present crop outlook is fulfilled. Of this amount a trifle over one-half, or 50.9%, according to the figures compiled by the Sears-Roebuck Agricultural Foundation, is consumed by hogs. Next to them, horses eat the most barley, or 17.7% of all barley fed to farm animals. Then 11.9% is fed to cattle, mostly to dairy cows in the form of barley chop. Farm poultry stocks get away with another 10.3%, leaving 9% to be fed to sheep and used for miscellaneous feed purposes. Barley is the chief competitor of corn as live-stock feed and is especially important in the northern corn belt and Pacific coast states, according to the Foundation's experts.

Railway Companies Adopt Busses And More Advertising

A special committee, which has just completed a national survey of local transportation problems, reported to the convention of the American Electric Railway Association, which met at Cleveland, Ohio, October 4-8. The committee found that electric railway companies are adopting the bus as a supplement to their car service and creating new business by advertising. The following are extracts from the report:

"Although the competition from the private automobile continues to be a major problem of the industry, this year's survey indicates that electric railway companies have a keener appreciation of the methods which must be employed to regain the traffic which has been diverted from the public transportation systems. The motor bus, though still a competitor in some places, does not present the serious problem that it did in the past. This is due largely to the fact that electric railway companies are steadily making increased use of motor busses to supplement and round out their own service.

"A lack of proper regulation of interstate motor bus carriers has caused serious competition in some districts. This condition has been recognized by the Interstate Commerce Commission with the result that a series of hearings have been held for the purpose of determining what legislation should be recommended for enactment by congress to provide reasonable and adequate regulations.

Breeders Successful With Dairy Campaign

Interest in dairying in North Carolina is at a high pitch since the successful completion of the state-wide dairy-sire campaign conducted during the first eight months of the year. During that time 223 scrub bulls were removed from the State and 359 purebred sires were placed. One full transportation and five three-fourths transportation to the National Dairy Show were given as rewards to the six county agents doing the best work in the campaign. A full transportation was given to the district agent in whose territory the greatest amount of work was done. Aside from the benefits received by the State in having so many purebred bulls placed, the large amount of educational work and publicity in connection with the campaign is resulting in a renewed interest in dairying. According to W. E. Wintermeyer, of the United States Bureau of Dairy Industry, who cooperated with John A. Arey, State dairy specialist, in conducting the campaign, this is one of the best examples of success in such work in the South.

Pretty Well Fixed.

A survey made recently by the Radio Corporation of America shows that 44 percent of the 26,000,000 American homes have phonographs, that 54 percent have motor cars and that 69 percent of the residences and offices have telephones.

"Reports from the various districts indicate that those companies that have purchased new equipment recently are beginning to reap the benefits in increased patronage revenues and improved public relations."

KNOW TEXAS

Texas produced about 3,500,000 bales of cotton this year and at the prevailing price it is worth almost as much as last year's cotton crop.

Texas produced 83,700,000 bushels of oats this year or more than six times as much as last year.

On crops other than cotton Texas farmers will collect this year more than \$100,000,000 in excess of their crop returns for last year.

Outfitters to the Whole Family

Take the Wheel Yourself

Learn what it really means to drive a low-priced car that is delightfully smooth at every speed—that exhibits click-of-the-heel acceleration—that can be driven at 40 and 50 miles an hour—hour after hour—without the slightest sense of forcing or fatigue! Take the wheel of a Chevrolet yourself!

at Low Prices!
Chevrolet... \$510
Cord... \$645
Ford... \$735
Lexus... \$765
Packard... \$835
L. S. B. Flint, Michigan

Until you actually drive a Chevrolet, you cannot realize how it combines all those qualities that have been the big reasons for the purchase of costlier cars. Never before has any low-priced automobile combined such brilliant beauty and such amazing handling ease with such thrilling qualities of performance. Take the wheel yourself—and learn the truth! Come in and get a demonstration.

Pampa Motor Co.

QUALITY AT LOW COST

WHEN I WAS TWENTY-ONE

BY JOSEPH KAYE

At 21: Frank Hurley, finder of the "Lost Tribes," started on his first great adventure.

AT TWENTY-ONE came my great opportunity. I was a professional photographer at this time and I heard that Sir Douglas Mawson had fitted out the famous Australasian antarctic expedition. I made up my mind to get the job of official photographer.

My application was lost in a sheet of others that flooded in upon Sir Douglas, and when I discovered that he was leaving for Adelaide, I ran to the station and got aboard his train. I sat down in the seat beside him and talked. For sixty miles I talked, and when I got off the train at the first station I was the official photographer of the Australasian antarctic expedition.—Frank Hurley.

TODAY: Frank Hurley is one of the heroes of the Mawson and Shackleton expeditions to the South pole and recently gained additional fame when he discovered an unknown savage tribe in New Guinea, during an expedition to that wild section of the globe. (© by McClure Newspaper Syndicate.)

Farmer's Diet As Compared to That Of a City Worker

In his food supply the farmer has a distinct economic advantage over the city workingman with comparable income, according to figures recently analyzed by the Bureau of Home Economics of the United States Department of Agriculture. Food consumption records collected from 1,331 families in Ohio, Kansas, Kentucky and Missouri were studied with a view to learning what classes of foods were chiefly used by these families, and also what proportion of their food was furnished by the farm, and what part was purchased.

The families included in the study were of all sizes, ranging from 2 to 10 persons, but the average for the four States was 4.2 adult-male units. This term, "adult-male unit," refers to the figure obtained by allotting different values to persons of different ages, sex, and occupations that made up these families. Hired help and relatives living with

the family were allowed for in calculating, and the foods consumed by persons of various ages were estimated by means of a scale which compared the food needs of each with those of a moderately active man, or an adult male unit. When the data was tabulated, the figures were compared with similar figures obtained in 1918 by the Bureau of Labor Statistics from about 12,000 workingmen's families.

Because of the large amounts of meat, eggs, cheese, milk, and cream furnished by the majority of the farms studied, the average farm diet furnished an ample supply of nutrients considered necessary in a good diet, but particularly calcium and protein. The average workingman apparently gets less of most nutritive factors than he should, with the exception of protein, in which he just meets standard requirements. The farm diet includes an abundance of fatty foods, sweets, and cereals, but falls somewhat below the standard for fruits and vegetables. The farmer can and should raise more of these products for home use.

The workingman's family appears to consume practically all foodstuffs in smaller quantities than the far-

NOTICE OF SALE

TO WHOM IT MAY CONCERN: Notice is hereby given that on the 6th day of December, A. D. 1926, between the hours of ten o'clock A. M. and four o'clock P. M. the undersigned will offer for sale, at public outcry, for cash, to the highest bidder, such real estate to be had on Lot 9, Block No. 38, facing on West Street in the town of Pampa, Gray County, Texas, being the place of residence of the undersigned, said property being One Fort Worth (Model No. 1) with lines and belt, complete, with two ballers, two pits, one stem and rope socket, one set of tool wrenches, one set of drive clamps and small tools complete, said property being now situated at my said residence and being open for inspection during reasonable business hours.

mer's family. When its figures are made comparable with those of the farm family it is seen that the workingman's food costs about 24 per cent less, but yields about 40 per cent less nutrients. It is therefore a more expensive diet, from the nutritive standpoint.

Said sale is being made under the terms of chattel-mortgage of date September 18th, 1926, from R. W. Gardner and H. E. Rufford to myself, which said mortgage was duly filed for record with the County Clerk of Gray County, Texas, on November 11th, 1926, to satisfy the amount due and owing upon six promissory notes for the sum of \$187.50 each, said amount being the sum of \$1,025.00, together with a reasonable attorney's fee of \$50.00 to the attorneys for Pampa, Texas, the undersigned for their services November 24th, 1926.

SAWS

By Viola Brothers Shore

You're lucky if you got a kid that'll stand up for his rights, even to you. The best horses comes from wild colts that was handled proper.

The young people of the day are too sophisticated," says mature Matilda. "About the only thing can shock them is a live wire."

THE WHY OF SUPERSTITIONS

By H. IRVING KING

STANDING BY THE TABLE

IN RURAL New England people seated at a table, eating, object to having another person pause and stand beside the board even should be only pause for a second to say some necessary word. As a rule it is a stranger with whom this action is deemed especially objectionable. The writer discovered this by making the aforementioned "break." On inquiring subsequently as to the whereabouts of the objection, some people said that it "is very bad manners"; others that "it brought bad luck," and still others could only say that it "is one of the things that isn't done." The idea seemed surprisingly widespread among a certain class of people, a general feeling that, for some unknown reason, such an act should be always avoided.

It was evidently a real superstition which was thus stumbled upon. Its origin is obvious. It is a survival of the idea of primitive man with regard to shadow, an idea which is found today existing in full force among savage and backward races and can be traced in many popular superstitions among civilized peoples. Our primitive ancestors regarded a man's shadow as a vital part of himself—a sort of "astral body," an "exterior soul." To have a person's shadow fall upon one was a sort of projection of the shadower's personality upon the shadowed. This projection was, as a rule, considered to be malevolent in its effect. A person passing by a table at which people are eating is liable to cast his shadow over both food and eaters—which is bad, especially if he is a stranger, for with the ancients, strangers and enemies were synonymous terms. Hence the superstition mentioned above, one of those survivals which, have outlasted for long centuries all knowledge of their origin and meaning by the people who still cherish them.

Young Man's Burden

To get on in business, and in society, and lay up something for a rainy day, a young man must carry life, accident, fire, theft, etc.,

Opening Announcement SATURDAY, NOVEMBER 29th, 1926 NORTH KINGSMILL

Where The Wealth Of The Field Is Being Stored

WATER WELL STARTED FOR TEXAS COMPANY'S NOEL FARM LOCATION

Machinery was carried to the Noel farm north of Kings Mill this week in preparation to putting down their water well. The oil well will start operations as soon as the derrick is erected and other arrangements are completed.

TEXAS COMPANY MOVING GENERAL FIELD OFFICE TO KINGS MILL HOLDINGS

Reports reaching White Deer this week are to the effect that the Texas Oil Company are moving their general field offices to Kings Mill. It is stated that from this location the company will be more centrally located to their holdings over the Panhandle fields. It is unofficially reported that the company are planning the erection of substantial office buildings on their Kings Mill holdings.—White Deer Review, Nov. 19, 1926.

EXCELLENT RAILROAD FACILITIES

As a trunk line station, Kings Mill is assured of first class service. The Santa Fe is constructing important additional facilities, including a long house track, loading yards, etc., to take care of the enormous increased traffic.

On the Main Line of the Santa Fe, Seven Miles Southwest of Pampa at Western Edge of Gray County

The Oil Concentration Point for Panhandle Field

Hundreds of men are busily engaged in converting this former sidetrack station into a veritable industrial city. The fortunate location of Kingsmill in the center of producing counties, at a logical railroad shipping point and pipe line terminal, has made its rapid development inevitable. Read the remarkable facts about this prospective city.

TANK FARMS OF

Magnolia Petroleum Co.—Texas Co. and Prairie Pipe Line Co. located here

These tank farms should mean to Kingmill what the tank farms meant to Cushing, Okla.

CHAMPLIN BUILDING NEW LOADING RACK TO RUN TWO LINES

Work of construction of the Champlin Refining company's rack at Kings Mill is under progress. The company plans to run lines to the Jackson lease in Gray county and to the Bryan lease in Carson.

It was said yesterday the company will post prices.—Amarillo News, Nov. 23, 1926.

PANHANDLE LBR. COMPANY ANNOUNCES NEW YARD AT KINGS MILL

NEAR-BY OIL PRODUCTION

Kingsmill is also in the great Gray County producing area. Several producing wells are less than 3 1-2 miles distant, drilling wells are all around, and the town is directly in the great northwest-southeast trend.

Over 3,000 feet Trackage for Industrial Purposes

Gas now available and distribution arranged for Electric Line Under Construction School about 4 blocks of depot Lumber Yard Elevators

Wonderful Business Opportunity Awaits You Here.

Lots \$145.00 And Up--Easy Terms

TOWNSITE IN HEART OF INDUSTRIAL DEVELOPMENT

North Kingsmill is north of the railroad directly opposite of Kings Mill station. Much of the railroad facilities development, and important oil storage and handling construction are on this side of the track. North Kingsmill is the logical location for the industrial and commercial development which is already far behind the needs of this area. Streets are being graded, water is provided for, gas should become available when development permits, and an electric power line is now being built.

INDUSTRIAL AND BUSINESS LOTS AT REMARKABLY LOW PRICES

Desirable lots are now available. These include sites for refineries, supply houses, and similar businesses requiring trackage; business locations; and residence lots.

ROYALTY GIVEN WITH EACH LOT

1-32nd royalty right of the tract has been divided up and each lot purchaser will receive his divisional interest. In view of the location of North Kingsmill, these royalty rights are valuable.

HOTELS

Texan Hotel, Pampa, Texas. A modern hotel in the panhandle oil fields. Price reasonable. 35-3tp

THE YOUNG LADY ACROSS THE WAY

The young lady across the way says the typewriter is almost universal now but there are still a few old-fashioned authors who think they can do better with a non de plume.

Mr. and Mrs. Craven were dinner guests of Mr. and Mrs. John V. Anderson, Thanksgiving.

Less Hay on Cattle Menu

THERE will be less hay on the live-stock menu this year, due to the short hay crop, says the Sears-Roebuck Agricultural Foundation. Farmers will produce only 78,000,000 tons, because of the unfavorable weather. Last year they produced 87,000,000 tons, and the five-year average crop is 90,000,000 tons, the Foundation points out. It is true that there are fewer live stock to consume this year's hay crop. Most of the crop is eaten by cattle. Horses and sheep also require large quantities. This year farmers devoted 50,000,000 acres to tame hay crops, such as alfalfa, clover, timothy and mixed crops. This is a slight reduction from last year's acreage. This is expected to yield 1.34 tons per acre, a smaller yield than usual.

STANDARD ROAD

Eighteen feet has come to be the minimum standard width for main highways, and except for roads

in the vicinity of large cities and a few of the heavily traveled roads between certain cities, this width will be ample for several years to come.
