PAMPA, GRAY COUNTY, TEXAS, MONDAY EVENING, MAY 23, 1927.

PRICE FIVE CENTS.

SITE FOR GAS STATION IS SOUGHT

LINDBERGH IS DECORATED BY FRENCH TODAY

Bashful Youth Kissed On Both Cheeks by President

FEARED WOULD NOT BE KNOWN

Aero Club Says He Also Holds Non-Stop Record

(By The Associated Press.)

PARIS, May 23.—President Doumergue of France in receiving Captain Lindbergh at the palace today decorated him with the Legion of Honor for his epoch-making flight from New York to Paris.

When the president planned the cross of the Legion on Lindbergh's breast, he took the somewhat abashed aviator in his arms, embracing him and kissing him on both cheeks.

Lindbergh was still dressed in ill-fitting, borrowed clothes. Tailors and shirt makers were busy supplying the wardrobe which he left behind in favor of more fuel. But President Doumergue pinned the cross on his breast as though he were arrayed in splendor.

It was a day of great glory for the Modest American boy. The Aero club of France arranged to confer its great gold medal on him late today, and Premier Poincare was to receive him immediately afterward.

A line-up of motion picture representatives had been waiting outside the American embassy, Lindbergh's temporary home, in an endeavor to get to him. All were talking in terms of large sums.

Figures at the Aero club show Lindbergh not only as the first man to make an uninterrupted flight between New York and Paris, but he holds the long-distance non-stop record, the journey having covered 3,647 miles.

(By The Associated Press.)

YORK, May 23.—Bashful, slim Lindbergh had feared he would be unknown when he reached Paris.

Col. Theodore Roosevelt today told how the young flyer had asked for letters of introduction to friends who would be willing to show him around a little when he arrived in Paris.

Texans Bat Well To Defeat Demons

AMARILLO, May 23.—A batting spree by the Texans defeated the Des Moines Demons here Sunday before a large crowd, 13 to 4.

Bobbles marred the game, but the punch was with the home team. Achenback won his third straight game.

The box score:	AB	R	H	PO	A	E
Des Moines	5	1	3	11	9	1
Glasgow, 2b	5	0	3	1	1	0
Grassman, 3b	4	0	0	1	0	0
Knobbe, ss	5	0	2	2	4	0
Griffith, rf	5	1	2	1	0	0
Langford, cf	5	0	0	2	0	0
Sprinz, c	5	1	0	2	2	1
Collins, lb	2	2	2	0	0	0
Egger, lf	4	1	3	7	0	0
Whittaker, p	0	0	0	0	1	0
Davenport, p	0	0	0	0	0	0
Whittaker, p	0	0	0	0	0	0
Totals	39	4	12	24	7	2

Score by innings. Des Moines 018 005 045—13. Amarillo 018 005 045—13.

Two base hits, Adams, Sprinz, Swansboro, Gunther, Knobbe. Three-base hits, Collins, Sprinz, Achenback, Wells (2), Connolly, Home run, Smith, Stolen base, Smith. Hits and runs off Whittaker 7 and 4 in 2 1-3 innings. Struck out by Whittaker 1, by Davenport 4. Base on balls, off Achenback 2, off Whittaker 2. Left on bases, Amarillo 6, Denver 11. Wins, loss pitcher, Achenback. Losing pitcher, Whittaker. Time of game, 2:10. Umpires, Green and Kolla.

WHERE NEARLY 40 CHILDREN DIED

A demented farmer's revenge for foreclosure of "the mortgage on the home place" is pictured above—the dynamite wreckage of the consolidated school at Bath, Mich., in which 36 children and five adults were killed. Andrew Kehoe, treasurer of the school board, fired the bullet that set off charges of dynamite in his automobile, which in turn exploded a stock of dynamite in the school basement. Kehoe himself was killed in the blasts. Rescue crews of firemen and volunteers are pictured carrying fallen timbers and pulling down hanging walls in the search for more victims.

Pampa Men Make Trip By Airplane

W. M. Lewright and C. T. Hunkapillar left Amarillo for Texarkana by airplane Saturday morning. Mr. Lewright had an important business engagement. A landing was made at Wichita Falls, where Mr. Hunkapillar visited friends. He made the return trip by rail.

The craft was piloted by Captain R. G. Gray of Amarillo. Part of the trip was made in a sleet storm but the sturdy craft went through without trouble.

Mr. Lewright attended to his business, and the return trip of 450 miles was made in 3 hours and 45 minutes.

Many Cattle Are Drowned in Floods After New Rains

NEW ORLEANS, May 23.—Flood waters which swept into the lowlands between LaFayette and Breaux bridge last night resulted in no known casualties, but approximately a thousand head of cattle were drowned.

The flood was caused by a five-inch rain which was augmented by a torrent already pouring into streams sending water into the Verillion river.

Bookkeeping and Typewriting Awards Made To Students

Certificates in typewriting and bookkeeping were awarded to high school students who made high records during the year.

Those who received typewriting certificates, with their words per minute are: Eva Clemens, 32; Hazel Kentling, 30; Jimmie Blackwood, 29; and Mae Lester, 32.

Fva Clemens, Thelda Mickey, Rosie Baggerman, and Beulah Wiseman received bookkeeping awards.

Negro Is Lynched On Allegation of Attacking Widow

BRAGGADOCIO, MO., May 23.—Will Sherod, 30-year-old negro, was lynched here last night after an alleged criminal assault upon Mrs. Henry Shot, 31 years old, a widow with two children.

Indian Jim Is Busy Again On Paving In Pampa

Indian Jim, champion brick thrower, commenced placing brick south of the track this morning. The work started at the south end and will be finished at the tracks. Next will be the intersection at Cuyler and Acheson, so that the main Street may be open for through traffic.

Petitions have been placed the city council to have about twelve more blocks paved.

I. C. C. To Investigate Western Rates On Livestock Hauls

WASHINGTON, May 23.—A general investigation into railroad rates on livestock throughout the western half of the United States was ordered today by the Interstate Commerce Commission.

Thermometer for Use in Oil Wells Is Originated

AMARILLO, May 23.—An apparatus for measuring the temperature in oil and gas wells has been made in the machine shops at the University of Texas following designs originated by Dr. Van Orstrand of the United States Geological Survey, according to Dr. E. H. Sellards, associate director of the University Bureau of Economic Geology. The apparatus is adapted to placing thermometers in wells and making it possible to take temperatures with great accuracy at regular intervals.

"In this way," Dr. Sellards explained, "there is established a gradient of increase of temperature for that particular well. The object of these measurements is to determine the relation of temperature increase to structural features, as it is considered possible that the rate of increase in temperature may be greater on uplifts than elsewhere. These temperature measurements are a part of a research project recommended by the Central Petroleum committee of the National Research council. Measurements of this kind are being made in Oklahoma, Texas, and California.

PAMPA CHOSEN BY EMPIRE IN LARGE PLANS

Booster Plant May Be Adjacent To City

EXECUTIVE IS ON WAY HERE

Gathering System Will Be Commenced In Near Future

Negotiations are nearing consummation for the purchase of a site near Pampa where a central gas gathering plant for the Panhandle sources would be built.

J. C. Kennedy, general superintendent of the Empire Gas and Fuel company, is expected to arrive here this evening to close the deals.

Sites now contemplated are near Pampa, adjacent to the huge gassers of the Wilcox pool. Feeder lines will be laid from the gas-bearing area northwest of the city, and from the south pool wells. A mammoth booster station, which will require probably 50 men, will be placed here to force the fuel into the 20-inch gas line which will connect with the Empire system near Wichita.

The contract for the world's largest pipeline project was let recently, and work will begin here soon after the site is purchased. A very extensive gathering and pressure system, with cottages for the employees, will be constructed here, according to present plans.

From the station near the city, the big line will extend along the general direction of the Santa Fe Railroad to a point near Wichita.

Location of the central plant near Pampa is regarded a recognition of Pampa's central place in the gas area, and of the almost inexhaustible supply of the cheap fuel available.

"Speed Up," Says Moody In Talk To Legislature

AUSTIN, May 23. (AP)—Governor Moody today urged the Legislature to speed up in a speech in both houses in joint session.

All parties concerned, he said, would like to avoid necessity of a longer session.

Whiskey Will Be Made for Medical Use Before Fall

WASHINGTON, May 23. (AP)—Manufacture of whiskey for medical purposes will be begun under treasury supervision in time to utilize the fall corn crop, Assistant Secretary Andrews announced today.

The treasury official said he would authorize such manufacture by possibly five corporations.

De Pinedo Hops Off For Azores Today

TREPASSEY, Newfoundland, May 23.—Comander de Pinedo, Italian flyer, hopped off this morning for the Azores.

Rangers Called to Austin Sunday

(By The Associated Press.) AUSTIN, May 23.—All Texas Rangers stationed at Borger, except one company, were called in over the week-end, it was learned here today.

Most of those ordered in reported to the headquarters office here.

Senior Describes Journey of "Chariot of Learning," of Hard Trip With Rearing "Steeds" Shaking off Drivers

Willard Johns, recent high school graduate, read the following imaginative history of his class at the commencement exercises.

In September, 1923, Apollo descended to earth in his golden chariot, the "Chariot of Learning." To it he had hitched the strongest and almost the wildest of his steeds—Algebra, English, Science, Latin and History.

Twenty-four Phaetons eagerly climbed into the chariot, some to meet the fate of that mythical Phaeton, others to become more true Apollos. The shining sun god gave the reins to Albert McKay, and appointed Halle Gantz as keeper of the golden coffer, into which the charioteers delved from time to time as they desired to stop the chariot for amusement or when there was any other need. The chariot did not always follow its true course, due to the fact that the occupants did not constantly keep their eyes fixed on the goal shining so brightly but too far away to seem realistic. Also, the driver was not accustomed to managing such steeds, and it was necessary to have Minerva, the goddess of wisdom

who took the form of Mrs. Parker, to aid them. When they wandered too far from the course, Jupiter, known as Mr. Irvin, hurled thunder bolts, (which the charioteers called examinations) in order to call them back to the path. As the chariot, far below its sphere, rolled slowly past the river Lethe, several of the Phaetons drank of its waters, thereby forgetting their ambitions and losing sight of the bright, but distant goal. Thus, after many struggles the charioteers, came to the end of the first lap of the journey with about two-thirds of the original number.

On Second Lap

They were no longer Phaetons, all of those having remained beside the River Lethe, but they were well on their way toward the Elysium they were seeking. Apollo again took the reins and allowed his charges to play on Mr. Olympus for three months, while he prepared the way for them. In September, 1924, he selected Johnnie Lee to take his place for nine months, at the same time advising all of the charioteers to aid him in every way possible. Jupiter, still in the form of Mr. Irvin, kept watch over them, and Minerva, this time being Miss Nunn, warned them whenever

there was danger of their going too slow. Since they were now sophomores, and the steeds were stronger and more difficult to control, the charioteers did not participate in many social events. Ruth Henry, keeper of the golden casket, was not often called upon to hand out the shining coins, but such occasions were indeed joyful. The most exciting occurrence of the year was when another group of charioteers, presided over by Diana and called Freshmen, attempted to dispute the superiority of the sophomores and endeavored to wrest their class colors from them. Apollo's devotees proved to be stronger and kept the lavender and white floating. New members had entered to take the place of those who had fallen the first year. However, many of them listened to the enticing music of the sirens and were lured away until they were dashed upon the rocks of Failure. After another shower of thunderbolts, from which a majority of the charioteers survived, Apollo again took command and permitted these seekers of knowledge to enjoy another three months on Mount Olympus.

When ready to begin their junior

year, Apollo chose Clara Brown to be chief charioteer, with Margaret Buckler as scribe and keeper of the golden coffer. Ruth Henry was the Ganyemede of the class and her reports were inspired by the winged messenger, Mercury. Jupiter changed to the form of a large and congenial man, Mr. Campbell. Miss Bernice Whitely was given the post of Minerva. She gave the juniors much valuable assistance. The thunderbolts came in veritable floods this year, and it seemed almost impossible to guide the wild steeds, so eager to hurl the charioteers to destruction. Cupid, the mischievous god of love, shot his golden tipped but dangerous arrows among them. Two of these took effect, and two of the most promising of the followers of Apollo left the chariot to follow after Hyman. Two others, unable to escape when the chariot wandered from its course, were caught by Scylla and Charybdis (they called them Algebra and English). During this part of the journey, to prove that they had not reached the height of dignity, attended a "kid party." So much pleasure was experienced

(See SENIORS—Page 4, Col. 2.)

RIVER CONTROL

Perfect drainage and deforestation have loosed the natural moisture of the Mississippi valley, giving it a rapid flow into the big channel, which has been confined to narrow outlets in order to reclaim the fertile delta region.

Many of the oldtime river pilots opposed extensive levee building, citing as an alternative the building of houses on mounds in the lowlands. Then the overflows would enrich the soil without doing the damage now occurring.

It is often said that the levee system continually raises the bed of the river, but government topographical engineers have disproved this theory. While some of the deeper places have filled, the shallower ones have been scooped out.

An important factor is the back pressure caused by diminishing the natural outlets in the delta area. The Atchafalaya river is the only remaining free outlet for flood waters, while formerly there were other lakes and streams.

It appears, therefore, that instead of building higher and higher levees, a wise plan would be to build artificial channels to the Gulf, other than the main channel and the Atchafalaya river or bayou, and control them by locks.

If the present flood has made an impression strong enough to insure the getting of sufficient funds, it is likely that the competent engineers at work on the problem will find a way to control the Mississippi, mighty river that it is.

TWINKLES

Pampa boys need a few more lawns to mow.

Lindbergh found the air mail work "too tame". But maybe there will be air mail robbers in a few years.

A "Man from God's Country" seldom does much credit to that region, wherever it may be.

"Our Mr. Eckhardt" came up from Canyon little touted as a pitcher, but he set all Pampa's horns tootin' without much effort.

A man of Lindbergh's courage and Lindbergh's court friends in any part of the globe he chooses.

Ambitious neighboring oil towns will have to sport a daily newspaper before they can claim to rival this fair city.

Since Transoceanic Flying Is So Common

WASHINGTON LETTER

BY RODNEY DUTCHER, NEA Service Writer.

WASHINGTON — If the Hon. J. Thomas Heflin, senator from the state of Alabama, isn't adequately appreciated here in Washington, perhaps the country at large is making up for it.

Ever since Congress adjourned, Senator Heflin has been giving audiences a dose of the golden voice that they could never hear without coming to Washington. He has been out west and now south and the faces tours through Pennsylvania and New England.

Generally he speaks on Mexico and Nicaragua and belabors the Catholic hierarchy in the manner which brought the ringing raspberry down on his silvery head during the last session. It is the senator's boast that only eight or ten states haven't heard him so far and he'll get to 'em yet.

Heflin's office has compiled some of the effusive bursts of praise which his speeches have occasioned. Full reports aren't in yet on the success of Heflin's religious speeches, although those few who think as Heflin does about things say that he is paving his way to the White House.

"It will be many moons before Shelby will forget Tom Heflin, and years before they say of another speaker, 'He's as good as Heflin,'" said the Shelby, N. C., Star.

Davidson College may well boast of having one of the few treats of a lifetime that comes from the speakers' platform," echoes the Davidsonian of Davidson, N. C.

"Senator Heflin is indeed a masterful speaker and held his audience as no other speaker in Corning has ever done," the Corning, Ark., Times-News is quoted as saying.

Other quotations include: "Those who heard the masterly address of J. Thos. Heflin, the distinguished senator from Alabama, who spoke in the school auditorium here last Monday evening, could but return to their home with a feeling of pride that the south was their home and birthplace." — the Chantown news of Thomsville, N. C.

"The lecture was one of the best ever heard in Lincolnton and we are all crazy about senator Heflin." — J. W. Mul-

PRESS FORUM

OIL IS DIFFERENT

In a news story dealing with the formal effort to restrict production in this country's greatest oil pool in the Seminole pool in Oklahoma, the New York Times, says in part:

Ray H. Collins of Tulsa, Okla., an independent oil operator, was chosen as arbiter with supreme authority to place an artificial restriction upon output of the Seminole area. The program of curtailment which he will direct is to have a two weeks' trial. Meanwhile a committee of five men will seek to perfect a permanent plan to limit production in all producing areas where there is prospects of large new development.

If the legitimate business interests of the oil producers are endangered, no serious criticism can apply to these producers for trying to protect themselves. The sequel to a situation of that kind cannot be written until the policies are made effective, if ever. There are reasons to believe arbitrary restriction of production if achieved in a way to adjust, will be utilized for the fact the general crude oil maintenance of prices unfairly high.

The big oil interests, although strongly represented in the retail oil business, do not desire a wide spread between refinery prices and retail prices. That offers too much encouragement to competition in retail end, which can be launched without large investment. These big oil interests would prefer to get a larger part of their profits on crude oil or through higher refinery prices, in which branches there is less competition than in the retail stations.

In the earlier days of the oil industry, a few big companies constituted the only market for crude oil—in fact bought up most of the oil wells as soon as they proved to be worth buying. Even without acquiring a full ownership of all the

lins, president of Lincolnton, N. C. Kiwanis Club.

"The business and professional men of this town are to be congratulated for bringing this great man among us."

The Lonoke, Ark., Democrat. "He will go down into history as the greatest storyteller who ever passed through this part of the country." — Raleigh, N. C., News and Observer.

"No mere reporter can do justice to the man—his message and magnetic personality—they must be seen, heard and felt to be appreciated."

panies. They probably would be willing to do their share of the restricting if shown that the policy would give them larger returns in dollars. They will not, however, permit the big companies to monopolize the market without for their own wares.

The situation is one which will attract attention from the government. President Coolidge already has declared in favor of "conserving" oil supplies, at the same time pretending objection to the restrictions being used to boost prices. He can hardly claim to be in doubt about the motives or probable effects. If corn were under consideration, for instance, he would be opposed to any interference with supply and demand. He'll be able to work out a different economic gospel for oil.—Sioux City Tribune.

Londoners Name Home After Stable

LONDON, May 21.—Because the building in which she lives was once part of a stable, Mrs. Robin d'Erlanger, an intimate friend of Princess Mary, calls her flat in Piccadilly, "The Hayloft."

Mrs. d'Erlanger was Miss Myrtle Farquharson before her marriage to Robin, son of Baron d'Erlanger, a British banker. She and her husband live behind the mansion of her father-in-law, which was once the residence of the poet Byron.

She is the daughter of Col. Farquharson, a near neighbor of the King at Braemar and head of the ancient clan of the Farquharsons.

Sacasa Leaves With All His Cabinet

(By The Associated Press.)

MANAGUA, Nicaragua, May 21.—Dr. Juan Sacasa, head of the Liberal regime, who opposed the conservative government under Gen. Adolfo Diaz, left Puerto Cabezas in a sloop yesterday, accompanied by his entire cabinet.

An aviator, apparently drunk or insane, recently terrorized the citizens of St. Clairsville, O., by skimming over the hedges, dodging smoke stacks and darting down at pedestrians on the street.

Woman Will Record Jewish Art History

PORTLAND, Ore.—Mrs. Elliott M. Burstein, wife of a Portland rabbi, is collecting material for a book on Jewish artists.

Art is cosmopolitan and international and should not be catalogued into religious or national groups, she believes, but takes issue with the general opinion that the Jew has neither an art status nor an art history.

"Jewish artists not only have contributed to the history of modern art, but also have been the means of promoting good will and a better understanding among the nations," she declares. "Why does France claim Picasso or Germany call Liebel as its own?" she asks. "Do they not owe their genius to their peculiar racial heritage as much as to the lands in which they lived?"

Starts Welfare Work For African Colony

LONDON—Lady Grigg, wife of Sir Edward Grigg, Governor of Kenya Colony, East Africa, while on leave in England with her husband, is raising a fund for child welfare work and medical attention for mothers in Nairobi, the colonial capital.

"There never has been any organized child welfare work among these backward natives," says Lady Grigg. "Although the infant mortality rate is said to be as high as 60 per cent. Europeans in the colony are badly in need of trained nurses and medical assistance is needed for the Indian population."

Sir Edward Grigg was private secretary to Lloyd George during the latter's war premiership.

Thousands Arriving For Beauty Show

(By The Associated Press.)

GALVESTON, May 21.—Thousands of persons are arriving here today for the International Pageant of Pulchritude starting this afternoon including girls from a number of foreign countries and many states. About 250,000 persons are expected for the event.

Teachers College Coach Masters Visitors While Grays Find Ball Often In Sunday Victory Here

The Pampa Grays shook the jinx yesterday and handed the fast-traveling Metros a 6 to 3 trimming. It was "Os" Eckhardt's first day on the mound, and he struck out sixteen Metros for a beginning.

Eckhardt is athletic coach at West Texas State Teachers college at Canyon. He can play any position on a team, is a powerful hitter, and a ten-second man.

"Hook" Shaw found his batting eye yesterday and rattled two triples off the left-field fence on his first two trips to the plate. "Hook" also had a double to end the day. Hunter and Cahill hit triples, and Eckhardt had a double and a single to his credit.

It was a sad day for Skeet Gibson and company, as they expected to "knock the Grays all over the diamond," as Skeet had mentioned before the game. Eckhardt is a second baseman, and Clarke on the mound. He works

without an effort and covers a lot of territory around the box.

Bassett didn't have much on the ball but his support was the best seen on the local diamond. Clevenger at short covers a world of territory and has a good arm, while Ravey in center is a regular fly hawk. Only one ball was hit to the Pampa outfield, and Reynolds gathered it in without moving.

This win gives the Grays an even break on the four games played so far. The last game of the series will be played in Amarillo soon.

First Inning
Amarillo—Clevenger singled over second. Whittenberg sacrificed Clevenger to second. Gibson flew out to Weeks. Franks walked. Ravey fanned. No runs, no hits, no errors.

Second Inning
Pampa—Weeks walked. Cahill sacrificed Weeks to second. Scalling singled through second, Weeks going to third. Shaw hit a triple off the left-field fence, scoring Weeks and Scalling. Goyer fanned. Reynolds was out. Whittenberg to Gibson. Two runs two hits, no errors.

Third Inning
Amarillo—Boydson fouled out to Clayton. Bassett singled over second. McCasland did likewise, Bassett going to third. Bassett scored on a double steal. Ammons fanned. Clevenger fanned. One run, two hits, no errors.

Fourth Inning
Pampa—Hunter went out, Clevenger to Gibson. Clayton walked. Eckhardt doubled to left, scoring Clayton. Cahill tripled to left scoring Eckhardt. Scalling fled out to Ravey. Two runs, two hits and no errors.

Fifth Inning
Amarillo—Whittenberg singled through short. Gibson doubled through short, Whittenberg scoring. Franks fanned. Ravey was out to Goyer, unassisted. Boydson was safe on Week's error, Gibson scoring. Bassett fanned. Two runs, two hits, one error.

Sixth Inning
Pampa—Shaw rattled the left field fence for three bases. Goyer was out. Boydson to Gibson. Boydson dropped the third strike. Reynolds fanned. Hunter hit a triple to center, scoring Shaw. Ravey gathered in Clayton's fly after a hard run. He fell but held the ball. One run, two hits, no errors.

Seventh Inning
Amarillo—McCasland fanned. Ammons fanned. Clevenger was out. Weeks to Goyer. No runs, no hits, no errors.

Eighth Inning
Pampa—Eckhardt beat out a bunt down the third-base line. Eckhardt stole second standing up. Weeks fouled out to Gibson. Cahill did the same. Scalling flew out to Ammons. No runs, one hit, no errors.

Ninth Inning
Amarillo—Whittenberg walked. Gibson hit to Eckhardt who caught Whittenberg going to second. Franks out, Cahill to Goyer. Ravey flew out to Weeks behind short. No runs, no hits, no errors.

Tenth Inning
Pampa—Shaw went out, Clevenger to Gibson. Goyer fanned. Reynolds was out to Gibson, unassisted. No runs, no hits, no errors.

Eleventh Inning
Amarillo—Boydson flew out to Reynolds. Bassett fanned. Scalling made a sensational one hand stop of McCasland's hard hit grounder and threw him out at first. No runs, no hits, no errors.

Twelfth Inning
Pampa—Hunter flew out to Whittenberg behind first. Clayton fled out to Clevenger. Eckhardt fanned. No runs, no hits, no errors.

Thirteenth Inning
Amarillo—Ammons fanned. Clevenger fanned. Whittenberg fanned. Eckhardt pitched fourteen balls. No runs, no hits, no errors.

Fourteenth Inning
Pampa—Weeks flew out to Whittenberg. Cahill grounded out, Clevenger to Gibson. Scalling singled through short, but was caught off first, Bassett to Gibson. No runs, one hit, no errors.

Fifteenth Inning
Amarillo—Gibson grounded out. Cahill to Goyer, on a close play. Franks fanned. Ravey fanned. No runs, no hits, no errors.

Sixteenth Inning
Pampa—Shaw doubled to left. Goyer fled out to Ammons. Reynolds was out, Whittenberg to Gibson. Hunter singled through second, scoring Shaw. Clayton out. Boydson to Gibson. One run, two hits, no errors.

Seventeenth Inning
Amarillo—Boydson fanned. Bassett singled over second. McCasland fanned. Ammons fanned for the fourth time. No runs, one hit, no errors.

Three base hits, Shaw (2); Cahill, Hunter; Two base hits, Eckhardt, Shaw, Gibson. Sacrifices, Cahill, Whittenberg. Left on bases, Amarillo 8, Pampa 8. Base on balls, off Bassett 2, off Eckhardt 2. Struck out, by Bassett 4, by Eckhardt 16. Passed ball, Boydson. Umpires, Beville and Barnes. Time of game, 1:55.

SPORT TALK

The Grays seem to have come out of their slump and are nelding and hitting like they used to do. Even

"Hook" Shaw has found his batting eye; he hit for two three baggers and a double yesterday.

Shaw rattled about three boards loose on the left-field fence on that second triple. The ball bounced back over Ammons' head. Cahill's triple off the fence did likewise and Hunter's rolled the required distance for three.

Ravey produced the acrobatic event of the afternoon. He came in fast on Scalling's short fly, caught the ball and turned a somersault. The old fly hawk held the ball, though.

Eckhardt laid a bunt down the third-base line and was perched on first before McCasland had fielded the ball, and then proceeded to steal second. Fast is that boy's middle name.

Ammons was swinging so hard that he nearly heaved his hat to second base on his third strike in the ninth inning. By the way, the same boy has been at bat against the Grays seven times this season. He fanned six of them and walked the seventh.

"Os" beat Clarke's strike-out record by three yesterday. Clarke had thirteen and "Os" just three more. Gibson was the only man on the Amarillo club to get through the game without fanning.

Scalling made a nice one-hand stab of McCasland's scorcher down the third-base line. Weeks was busy catching flies, and Gibson fouls.

In all, it was a real game and several would-be supporters should regret they didn't attend the game. There were enough there to razz the umpire, though.

Mr. and Mrs. J. H. Jones and daughter, Anna Mae, drove to McLean Sunday.

Hubert Burrow returned Sunday from Okmulgee, where he has been visiting.

Miss Nell Jones, Opal Johns, Herman Gantz, and Ray Barnard drove to Amarillo Sunday. The afternoon was spent in boating, golfing and swimming.

Purple Piped

The modern mode of the silk blouse is cleverly interpreted in this one of tucked orchid crepe with pipings of purple.

Miss Mildred Fahy and mother left Sunday for Canyon, Colo.

Mrs. L. M. Ballew and children, Angela and Buddy, motored to Altus Saturday to visit relatives.

More Glory for Studebaker Commander

Tests show 17 1/4 miles per gallon

Matchless endurance under sustained speed enabled Big Six to establish ten world records. And here is proof of thrifty gas mileage.

First—5000 miles in 4909 minutes—the fastest going for the greatest distance of any enclosed car in the world or any strictly stock car, open or closed.

Next, in 33 nation-wide hill-climbing contests, The Commander demonstrated its thrilling power over some of the steepest hills in the country.

the world of equal or greater rated horsepower.

There is a sound basis for the statement that The Commander is "the greatest post-war achievement in automotive engineering."

The feat of covering 5000 continuous miles in less than 5000 consecutive minutes merely dramatized the thrilling performance, the freedom from repair expense, the peace of mind and economy which all owners of this plus-powered car enjoy.

17 1/4 miles per gallon!

And now—in 61 tests held all over the United States, The Commander delivered an average of 17 1/4 miles per gallon of gasoline! In every instance the carburetor was drained and connected to an accurately measured one-gallon container. Each test was carefully checked by motor club officials or newspaper representatives.

And remember, this average of 17 1/4 miles per gallon was made by a Big Six equalled in rated horsepower by only seven other American cars—and they cost from \$4,000 to \$10,000! No wonder the Studebaker Big Six outsells the combined total of all other cars in

Drive The Commander yourself!

Get behind the wheel, step on the throttle and step out in front—try it in traffic for flexible handling—or level out the steepest hills. Any gait of travel suits The Commander—it answers instantly to the spur of its accelerator or the curb of its positive-acting 4-wheel brakes.

An exact duplicate of the champion Commander is ready and waiting for you. Come in today!

Commander Sedan, \$1585; Commander Victoria, \$1575; (broadcloth upholstery, \$1645); Commander Coupe, \$1545; (with rumble seat, \$1645) . . . All prices f. o. b. factory, including front and rear bumpers, mudflaps all around, and four-wheel brakes. Other Studebaker and Buick models range in price from \$945 to \$2495.

FEET PLAY IMPORTANT PART IN SINGING, LOUISE HUNTER LEARNS

ATLANTA (AP)—Louise Hunter, the prima donna, has learned that she sings with her feet as well as her voice.

While rehearsing at WSB, prior to broadcasting a radio concert, she complained the studio was oppressive—that she could not get "life" into her singing.

Whereupon the chief engineer suggested the deadening effect of the heavy carpets and draperies might be offset with a solid foundation. So he brought out a miniature platform, which had Miss Hunter smiling and joking again.

"Now I can feel myself singing," she said. "I never realized before my feet had anything to do with it."

Later, when Lambdin Kay was announcing the concert and commenting upon the star's voice, the radio audience heard a loud whisper interrupt:

"Might tell them about my feet, too!"

SENIORS

that it alleviated in a measure the sorrow they felt at having lost some of their members.

After another three months on Mt. Olympus, Apollo, in making ready for the last stage of the journey, counted his charioteers and found that of the original number twelve were prepared to continue on their way. He was proud to know that so many had proved to be true Apollos, and as he looked at the faces of Minnie V. Haynes, Lillian Mullinax, Rosie Baggerman, Frankie Barnhart, Clara Brown, Elizabeth Corson, Ruth Henry, Margaret Buckler, Hallie Gantz, Albert Lewter, George Walstad, and Willard Johns, he was very happy. There were about ten others, who entered the chariot at this time, but two left in the first part of the journey. Those who remained with the original twelve were Thelda and Ina Mickey, Beulah Wiseman, Eva Clemens, Macie Lester, Jimmie Blackwood, Ward Hicks, and Rector Roberts. The charioteers chose Oscar Dial as their sponsor and Apollo gave him the reins. Clara Brown was again appointed chief charioteer, with Elizabeth Corson to keep the key of the coffer, and this year it was in use more than ever.

A Hard Year

Everybody was kept busy, for Apollo had seen fit to hitch his wildest horses, among them Economics, Geometry, and Physics, to the chariot. Though they had become accustomed to driving they could never be sure where the steeds might go and they wished to take no more chances at being lost. After having weathered a series of thunderbolts, always guided by Jupiter, still in the form of Mr. Campbell, the charioteers were on the last lap of the journey. As senior charioteers, they proved to be unusually adept at entertaining. A faculty burlesque, which gave plenty of opportunity for laughter, was given in chapel. The year was sprinkled with parties and for good behavior, at a council of the gods known as the board of trustees and Mr. Campbell, it was decided that the seniors should have a half holiday. On All-Fools day they went on a picnic without the permission of Jupiter. They were punished but not severely, as it was their first offense. Later they dressed for a day like kids, acting the part, as this was the last opportunity for such amusement.

The goal was not far away, and as it was now necessary to replenish the golden coffer, the charioteers prepared a play, "Deacon Dubbs." The golden shekels were now plentiful. As a fitting conclusion for such a full year, the junior charioteers, still in the chariot of Diana, invited the senior charioteers to participate in a great feast. Although they had labored four seemingly long years, eager charioteers entered the Elysian field and reached their shining goal, the Kingdom of Graduation, blessed by Jupiter, and the lesser divinities of Pampa High School.

Police regulations in Japan require an electric light over the back seat of automobiles. Even this has failed to discourage "petters."

Firestone Dealers

Have Purchased 100% More GUM-DIPPED TIRES

[This Year Compared With Same Period Last Year]

THE demand from car owners for Gum-Dipped Tires has given Firestone Dealers a large increase in volume enabling them to sell these tires to you at the lowest prices in history.

On the cars of motorists everywhere, these wonderful tires are delivering unheard-of long mileage with greater safety and comfort.

The Firestone Balloon Tread, scientifically designed three years ago, and unchanged today, follows the contour of the tire carcass with no excess rubber at the edges to cause "shoulder breaks". Narrow rider strips permit the tread to yield to depressions and cling to the road, preventing skidding. This tough, pliable tread has the wear-resisting qualities for thousands of extra miles.

Such a tread must be placed on a carcass with the qualifications to withstand the terrific flexing that this design permits. The Firestone carcass is made of cords dipped in a rubber solution which not only saturates and insulates every fiber of every cord, but unifies sidewalls with carcass, avoiding separation under the extreme flexing.

Many Firestone Dealers are prepared to offer you a liberal allowance for your old tires, on a new set of Gum-Dipped Tires to start the motoring season.

To meet a demand for a low price tire and tube, Firestone designed and manufactures, for Firestone Dealers only, Oldfield Tires and Tubes, which carry the Standard Manufacturers' Guarantee.

Following Dealers Can Save You Money and Serve You Better:
