(P)—Associated Press

PAMPA, GRAY COUNTY, TEXAS, TUESDAY MORNING, OCTOBER 4, 1927

(NEA Service)

PRICE FIVE CENTS

REVOLT IN MEXICO IS FAILURE

Big Street Sweeper Is Purchased by The City Council

MACHINE WILL PICK UP TRASH OF EVERY KIND

Dirt Carrier Has a Capacity of Two Cubic Yards

HAS SPEED OF 4 TO 8 MILES

Vehicle Is Built to Meet Special Need of Pampa

An Austin motor pick-up street sweeper, weighing more than 5 tons and costing \$6,800, was purchased by the city council last night from the Austin-Western Road Machinery company of Chicago.

The purchase followed weeks of investigation of sweeper types, and was conditional upon the satisfactory performance over a five-day period here.

The big machine will be constructed at the factory especially for Pampa needs, and will be given a rigorous three-day factory test before shipment. Its arrival is expected about October 15.

A 42-inch rotary gutter broom, geared and adjustable, will operate along the curb. The rotary pick-up broom, 36 inches in diameter, will drive all kinds of trash into a self-cleansing elevator, which conveys the material to a dirt carrier having a capacity of two cubic yards. This carrier dumps through double doors.

The width over all is 9 feet 9 inches, and the length is 20 feet 3 inches. One man is required to operate it. The speed is from 4 to 8 miles per hour. It will require several days to clean the streets, but after that the entire widths will not have to be covered each day. It probably will be necessary to set a curfew hour for parking, in order to clear the streets for the sweeper. This work will be done at night.

A 28.9-H. P. motor, weighing 900 pounds, furnishes the motive power. It has a speed of 1,000 revolutions per minute. To lay the dust, the machine has a water sprinkler which applies water 15 feet in front of the sweeper. The tank has a capacity of 300 gallons.

Many standard parts strengthen the machine at all vital points. The alumite system of oiling is used.

Man Near Dead From Poisoning

A man, thought to be Harry Sheffer of Borger, was taken to Pampa hospital this morning about 5 o'clock suffering from strychnine poisoning. Doctors say he had taken three grains of strychnine during a fit of despondency.

He has been out of work for some time and was without funds. Local physicians state that Sheffer's condition is serious, but this afternoon hold some hope for his recovery. He became conscious enough this morning to tell an attending physician that he wished to live.

No information about relatives is now available.

DELANEY WELL BEING CLEANED OUT TODAY

Production in Delaney and others No. 1 Jackson is temporarily halted while drillers are working with tools to remove a collection of paraffin.

The flow ceased last night when a swab, run to remove the paraffin, clogged the hole.

Which Is Which?

It's a deep-dyed secret that the White twins of Derry, N. H., keep from their fellow students at the Boston University College of Practical Arts and letters. It's the secret of which of them is Madeleine and which is Caroline. But they confided with our photographer that Caroline is the one here pictured with a smile.

Kansas Flood Approaches Edge of Oklahoma, Threatening Much Crop Acreage and Menacing Stock

"The Spotlight" Is Name Chosen For School News

"The Spot light" is the name selected for the page of school news to be published weekly in the Pampa Daily News.

At a staff meeting yesterday afternoon, Jewel Cope was elected editor-in-chief. Opal Johns is assistant editor, Vernon Culverhouse is sports editor, Catherine Vincent is club editor, and La Veda Pendrick is chapel reporter.

Miss Bernice Whitely, instructor in English, is adviser to the staff. Another meeting was called for this afternoon.

City Football Men May Form Team

Football men in the city are asked to be out tonight at 4:30 o'clock and every night this week for a practice and to organize a town team.

Several men have been practicing on the vacant lot in front of the Central high school building. College stars and former letter men of the local high school are asked to be out.

The local boys are planning to have a game with either Wheeler or Shamrock next Sunday and are anxious to get enough men out for a team, and to elect a captain.

Mexico Censors Cables to U. S. A.

GALVESTON, Oct. 4.—Censorship of all cable communication between Mexico and the United States was put into effect today by the Mexican government, the Galveston office said today.

Cuba to Regulate Sugar Exportation

HAVANA, Oct. 4.—President Machado today signed a law adopted by Congress last night regulating the production and exportation of sugar from the coming crop.

KANSAS CITY, Oct. 4.—The crest of the flood that left hundreds homeless in southeastern Kansas today approached the northern Oklahoma border, threatening to increase the crop and livestock losses in that state.

With large areas inundated in Kansas, Western Missouri, Oklahoma and Texas, heavy losses have been reported in cotton, corn and winter wheat. Only three persons are known to have been killed and all are in Texas.

A. F. of L. Confirms Department Split

LOS ANGELES, Oct. 4.—Frank Morrison, secretary of the American Federation of Labor, now holding its annual convention here, confirmed reports that the building and trades departments had withdrawn from the national board of jurisdictional awards.

The withdrawal is said to affect in no way its federation affiliation.

CALF HAS SPARES

TEXARKANA—If hoofs were classified like automobile tires, a calf belonging to J. T. Berry, farmer living near here, carries seven "spares" for this calf has five legs and eleven hoofs.

GAS KILLS SPARROWS

TEXARKANA—Poisonous gas from sulphuric acid and sodium cyanide is being used at Magnolia to kill English sparrows, 605 were brought down out of one tree.

RATS ARE GIFT

CORPUS CHRISTI—Instead of the usual baby in a basket a Corpus Christi business man found a cage of white rats on his doorstep.

Gordon Baines is visiting his parents in Clarendon.

Mr. and Mrs. J. T. Morrow and Mr. and Mrs. Roy Smor and son, Billie, spent Sunday in Borger.

CATTLE TREND AN INSPIRATION FOR INDUSTRY

Upward Movement of Market Reaches High Peak

CATTLEMEN ARE PAYING DEBTS

Improvement of Herds And Methods Is Cited

KANSAS CITY, Oct. 4.—A steady upward trend in cattle prices at this and other southwestern markets for the past several months, which has carried the price of cattle here to its highest mark since 1920, is regarded as a reflection on the scarcity of cattle and the generally improved conditions in the industry throughout the southwest.

Increased values at packing centers will go far toward renewing confidence and reviving the cattle raising industry in Kansas, Oklahoma and Texas, is the opinion of representatives of those states.

High prices have stabilized and inspired confidence in the industry. H. Spiller, secretary of the Southwestern Cattle Raisers Association, pointed out, adding that cattlemen are paying old debts, improving herds and otherwise putting their houses in order.

Dan Moody Asks Return of Smith From Kentucky

AUSTIN, Oct. 4.—Governor Moody today issued a requisition on the governor of Kentucky for Bill Smith, alias Roy Miller, under a murder indictment in Fisher county for the slaying of sheriff Bob Smith and Deputy Jake Owens.

Sure-Daily News Will Have World Series by Plays

Baseball results? Sure. The Daily News has arranged to obtain the Associated Press play-by-play account of the World Series, and local sports fans can be assured of good, complete service.

This account will be unusually complete for a city of this size, and will be sent by a special operator provided for the Daily News and other newspapers of its type by the Dallas bureau of the Associated Press.

Lane Will Employ Man to Operate the New City Tractor

Tom Lane, general officer, was authorized last night to employ a man to operate the new city grader-tractor.

He was empowered to pay \$125 a month for the place. A man to operate the grader will be employed by the day.

RAIN MISSES COMMUNITY

WICHITA FALLS—By some queer prank of nature rain has not fallen in a certain section five miles north of Iowa Park since February, according to R. A. Palm, farmer of that district.

COURT IN SESSION

The 33rd district court convened this morning at LeFors with Judge Reese Ewing presiding. Two minor cases are being heard today. A trial by jury is scheduled for tomorrow.

Coming Soon

E. Otis Allen of Shawnee, Okla., will come to the First Baptist church next Sunday to assist in a revival and a study course in Sunday school and B. Y. P. U.

"We invite the public to attend these services," said the Rev. D. H. Truhitte, pastor, "and a special invitation is given to the other churches and schools to co-operate with us in trying to raise the standard of Christianity in Pampa."

Two Cases of Typhoid Fever Reported Here

Dick Steele, an oil worker who arrived in the city last week from the Seminole field, was taken to Pampa hospital this morning suffering with typhoid fever contracted in the Seminole oil field where he has been employed.

Several cases are reported in the Seminole field and precautions are being taken there to avert an epidemic.

J. W. Hibbs, an employe of the telephone line gang working in Pampa became ill Sunday and doctors this morning pronounced the case typhoid fever. He has been living at a local hotel, but will be moved immediately, doctors say.

Hydro-Airplane Will Try Flight to United States

(By The Associated Press.)
NORDERNEY, Germany, Oct. 4.—The Junkers hydro-airplane, ready for its scheduled flight to the United States by way of the Azores, took the air this afternoon.

The ship started off in a westerly direction.

The plane was commanded by Frederick Dooze, one of the crew of the Junkers plane Bremen during its successful trans-Atlantic attempt in August.

KNIFE FOR HARP

(By The Associated Press.)
WACO—A negro laid down his harp and took up his knife, and as a result Jack McLendon and John Cobb were arrested for disturbing public worship. Cobb was playing his harp in front of the church and McLendon sought to end the music. A fight resulted.

THE PRESIDENT SPEAKS

WASHINGTON, Oct. 4.—President Coolidge regards the tariff dispute between the United States and France as confined strictly to the question of French discrimination against American goods.

Mr. and Mrs. W. B. Seitz and Mrs. J. E. Wright spent Sunday in Miami visiting relatives.

W. C. Stripling of Oklahoma City is in Pampa on business.

SERRANO SAID TO HAVE BEEN KILLED TODAY

Federal Troops Pursue 800 Fleeing Men of Garrison

GEN. OBREGON OFFERS HIS AID

Officers Court-Martial-ed Summarily, Report Asserts

MEXICO CITY, Oct. 4.—Organized as a nationwide military uprising, the revolutionary movement in Mexico, allegedly inspired by Generals Serrano and Gomez, has failed, it was declared by President Calles.

Advices today indicated that 800 soldiers of the Mexico City garrison which marched out of the capital Sunday comprised the sole body of insurrectionists in the field. Thousands of loyal federal troops are pursuing them.

General Obregon, whose aspirations for re-election as president are opposed by Serrano and Gomez, has pledged his aid against them.

Unconfirmed reports coming from Tampico say that Serrano has been captured and executed. One body of insurrection troops in Torreon has been disarmed, the government claims, after a three-hour battle. The officers were court-martialled.

Advices to the presidential palace were that two regiments also revolted at Vera Cruz, but direct dispatches said quiet reigned there.

Officers Sued By Father of Youth Arrested Recently

A damage suit in behalf of Kenneth Irwin, a minor, has been brought by Samuel Irwin, his father, against W. J. Watson and Herman Watsondorf, constable and deputy constable, respectively, and their bondsmen.

The plaintiff alleges that the officers wrongfully arrested young Irwin, and injured him by blows while he was in their custody. The incident is alleged to have taken place on August 27.

The plaintiff asks \$5,000 actual damages and \$10,000 exemplary damages. His attorneys are Alexander & Baldwin.

Levine Discusses Aviation Question With Mussolini

ROME, Oct. 4.—Charles Levine, who was received in audience by Pope Pius yesterday, had a long audience with Premier Mussolini today, aviation being subject most discussed.

Half-Block of Paving Cancelled

One-half block of proposed paving, that east of Cuyler on Tyns street, was withdrawn from the new paving program by the city council last night when one property owner stated that he was unable to bear his part of the expense.

It was suggested that the half-block on the other side of Cuyler also be withdrawn, but the motion was lost.

TEXAS ATTORNEY DIES

DALLAS, Oct. 4. Judge W. M. Crow, 74 years old, well known Texas attorney, died at his home here today.

The BENSON MURDER CASE

by S. S. VAN DINE © CHARLES SCRIBNER'S SONS

Characters of the Story
PHILO VANCE
 JOHN F.-X. MARKHAM, District Attorney of New York County.
 ALVIN H. BENSON, Well known Wall Street broker and man-about-town, who was mysteriously murdered in his home.
 MAJOR ANTHONY BENSON, Brother of the murdered man.
 MRS. ANNA PLATZ, Housekeeper for Alvin Benson.
 MURIEL ST. CLAIR, A young singer.
 CAPTAIN PHILIP LEACOCK, Miss St. Clair's fiancé.
 LEANDER PFYFE, Intimate of Alvin Benson's.
 MRS. PAULA BANNING, A friend of Pfyfe's.
 ELSIE HOFFMAN, Secretary of the firm of Benson and Benson.
 COLONEL BIGSBY OSTRANDER, A retired army officer.
 WILLIAM H. MORIARTY, An alderman.
 GEORGE G. STITT, Of the firm Stitt and McCoy, Public Accountants.
 MAURICE DINWIDDIE, Assistant District Attorney.
 ERNEST HEATH, Sergeant of the Homicide Bureau.
 BURKE, SNITKIN, EMERY, Detectives of the Homicide Bureau.
 BEN HANLON, Commanding Officer of Detectives assigned to District Attorney's office.
 PHELPS, TRACY, SPRINGER, HIGGINBOTHAM, Detectives assigned to District Attorney's office.
 CAPTAIN CARL HAGEDORN, Fire-arms expert.
 DR. DOREMUS, Medical examiner.
 FRANK SWACKER, Secretary to the District Attorney.
 CURRIE, Vance's valet.
 S. S. VAN DINE, The Narrator.

"First," Vance announced, "I shall determine the exact height of the guilty person. Such a fact will, no doubt, come under the head of indicat'ry evidence—eh, what?"

CHAPTER XVII

"I believe you chaps have another hallucination about crime," continued Vance, "namely, that the criminal always returns to the scene of the crime. This weird notion is even explained on some roundside and misty psychological ground.

"But, I assure you, psychology teaches no such preposterous doctrine. If ever a murderer returned to the body of his victim for any reason other than to rectify some blunder he had made, then he is a subject for Broadmoor—or Bloomingdale. . . . How easy it would be for the police if this fanciful notion were true! They'd merely have to sit down at the scene of a crime, play besique or Mah Jongg until the murderer returned, and then escort him to the bastille, what?

"The true psychological committed a punishable act, is to get as far away from the scene of it as the limits of this world will permit."

"In the present case, at any rate," Markham reminded him, "we are neither waiting inactively for the murder to out, nor sitting in Benson's living-room trusting to the voluntary return of the criminal."

"Either course would achieve success as quickly as the one you are now pursuing," Vance said.

"Not being gifted with your singular insight," retorted Markham, "I can only follow the inadequate processes of human reasoning."

"No doubt," Vance agreed commiseratingly. "And the results of your activities thus far force me to the conclusion that a man with a handful of legalistic logic can successfully withstand the most obstinate and heroic assaults of ordinary common sense."

Markham was piqued.

"Still harping on the St. Clair woman's innocence, eh? However, in view of the complete absence of any taggible evidence pointing elsewhere, you must admit I have no choice of courses."

"I admit nothing of the kind," Vance told him; "for, I assure you, there is an abundance of evidence pointing elsewhere. You simply failed to see it."

"You think so?" Vance's nonchalant cocksureness had at last overthrown Markham's equanimity. Very well, old man; I hereby enter an emphatic denial to all your fine theories; and I challenge you to produce a single piece of this evidence which you say exists."

He threw his words out with asperity, and gave a curt, aggressive gesture with his extended fingers, to indicate that, as far as he was concerned, the subject was closed.

Vance, too, I think, was pricked a little.

"I know, Markham old dear, I'm no avenger of blood, or vindicator of the honor of society. This role would bore me."

Markham smiled leftily, but made no reply.

Vance smoked meditatively for a while. Then, to my amazement, he turned calmly and deliberately to Markham, and said in a quiet, matter-of-fact voice:

"I'm going to accept your challenge. It's a bit alien to my tastes; but the problem, y' know, rather appeals to me; it presents the same difficulties as the Concert Champetre affair,—a question of disputed authorship, as it were."

Markham abruptly suspended the motion of lifting his cigar to his lips. He had scarcely intended his challenge literally; it had been uttered more in the nature of a verbal defiance; and he scrutinized Vance a bit uncertainly.

Little did he realize that the other's casual acceptance of his unthinking and but half-serious challenge, was to alter the entire criminal history of New York.

"Just how do you intend to proceed?" he asked.

Vance waved his hand carelessly. "Like Napoleon, je m'en gage, et puis je vois. However, I must have your word that you'll give me every possible assistance, and will refrain from all profound legal objections."

Markham pursed his lips. He was frankly perplexed by the unexpected manner in which Vance had met his defiance.

But immediately he gave a good-natured laugh, as if, after all, the matter was of no serious consequence.

"Very well," he assented. "You have my word. . . . And now what?"

After a moment Vance lit a fresh cigarette, and rose languidly.

"First," he announced, "I shall determine the exact height of the guilty person. Such a fact will, no doubt, come under the head of indicat'ry evidence—eh, what?"

Markham stared at him incredulously.

"How, in Heaven's name, are you going to do that?"

"By these primitive deductive methods to which you so touchingly pin your faith," he answered easily. "But come; let us repair to the scene of the crime."

He moved toward the door, Markham reluctantly following in a state of perplexed irritation.

"But you know the body was removed," the latter protested; "and the place by now has no doubt been straightened up."

"Thank Heaven for that!" murmured Vance. "I'm not particularly fond of corpses; and untidiness, y' know, annoys me frightfully."

As he emerged into Madison Avenue.

In "Popular Fallacies About Crime" (Saturday Evening Post, April 21, 1922, p. 8) Sir Basil Thomson also upheld this point of view.

He signalled to the commissionaire for a taxicab, and without a word, urged us into it.

"This is all nonsense," Markham declared ill-naturedly, as we started on our journey up town. "How do you expect to find any clues now? By this time everything has been obliterated."

"Alas, my dear Markham," lamented Vance, in a tone of mock solicitude, "how woefully deficient you are in philosophic theory! If anything, no matter how infinitesimal, could really be obliterated, the universe, y' know, would cease to exist,—the cosmic problem would be solved, and the Creator would write Q. E. D. across an empty firmament."

"Our only chance of going on with this illusion we call Life, d'ye see, lies in the fact that consciousness is like an infinite decimal point. Did you, as a child, ever try to complete the decimal, one-third, by filling a whole sheet of paper with the numeral three? You always had the fraction, one-third, left, don't y' know. If you could have eliminated the smallest one-third, after having set down ten thousand threes, the problem would have ended."

"So with life, my dear fellow. It's only because we can't erase or obliterate anything that we go on existing."

He made a movement with his fingers, putting a sort of tangible period to his remarks, and looked dreamily out of the window up at the fiery film of sky.

Markham had settled back into his corner, and was chewing morosely at his cigar.

I could see he was fairly simmering with impotent anger at having let himself be goaded into issuing his challenge. But there was no retreating now.

As he told me afterward, he was fully convinced he had been dragged forth out of a comfortable chair, on patent and ridiculous fool's errand.

For years the famous Concert Champetre in the Louvre was officially attributed to Titian. Vance, however, took it upon himself, to convince the Curator, M. Lepelletier, that it was a Giorgione, with the result that the painting is now credited to that artist.

(To Be Continued)

JAIL RE-FINISHED

A coat of white stucco has been applied to the county jail in harmony with the new city hall. "Visitors" to the jail will find a clean interior, and new swinging beds have been installed.

G. G. Malone Ambulance Service Phone 131. (121-47c)

Housewives Are Encouraged to Buy Ice Cream "Dress"

A new and novel idea to simplify the ever-present problem of "What shall I serve?" has recently been presented to a hostess by a concerted effort on the part of the soda fountain industry to encourage members to sell crushed fruit and other flavorings for home use, together with ice cream.

The "Serve Fruit Sundaes in your home" idea, as it has been named, has met with an immediate response on the part of distracted hostesses and housewives, who find in it an easy and quick way to meet any emergency. All that is necessary to do when one is ordering ice cream from a fountain is to add "And please send me such-and-such an amount of crushed pineapple", or whatever flavor one desires.

The idea has even gone so far that special containers have been created for delivery of the crushed fruits. The four ounce size (one fourth pint) contains sufficient of crushed fruit to "dress" from four to six servings of ice cream, depending upon your idea of size of servings. The eight ounce container (half pint) contains sufficient for eight to twelve servings. The small size sell for ten or fifteen cts. and the larger size twenty to twenty-five cts.

There are several advantages in the idea. There is a wide selection of flavors from which to choose. Any quantity can be ordered, and if unexpected guests arrive, orders can quickly be supplemented. The idea eliminates the effort of preparing ice cream dressings in one's own kitchen, and as these crushed fruits are prepared by experts especially for ice cream sundaes, they are ideally suited to the purpose, usually being better than anything the housewife can prepare herself.

BILLY EVANS Says

Rugby Experts Hired

What, if any, effect is the lateral pass going to have on football as played in our colleges?

Evans said that Harvard was the prime mover in suggesting the lateral pass and then putting it over. I also have it that Harvard is going to stress the importance of the play as a ground game.

By my eastern football operative I am informed that Harvard has obtained several English rugby experts, skilled in the use of the lateral pass, to coach the Crimson athletes as to the many great possibilities of the play.

Since open play has tended to popularize the grid sport, the thought of the lateral pass was to encourage greater freedom in the handling of the ball, since all lateral passes except those from the center will, if incomplete, become dead and no further play can be made, except as specified in the rule governing this play.

Laugh Is On Ends

Deciding it would be well to get some first-hand information as to the possibilities of the lateral pass I took the matter up with one of the country's greatest English rugby players. Here are his observations:

"Teams with fast running half-backs will be in a position to take advantage of the lateral pass, that requires speed as well as deception.

"Good ends have always been able to turn flank attacks inside of them but a good lateral pass play can get outside of the best of ends.

"Recently in watching one of the leading teams in the east at practice, I saw an All-American end made to look foolish trying to break up such a play. The ball carrier would run right into the end's arms but just as the end dove for the tackle the ball was deftly passed to another back who had passed the end.

"The next time the play was called, the end tried to cover the outside half but this time the ball carrier merely feinted a pass, then cut in outside tackle and, as he reached the secondary defense, passed to the outside half who had gotten away from the end."

This May Take Place

"Open-field running is likely to be revolutionized by the lateral pass," continued the rugby star.

"With the lateral pass as a weapon, a man breaking loose in an open field instead of trying to dodge the safety man will run right at him, then pass to a teammate, say 10 yards farther out.

"On the kickoff, the wedge formation will be more effective than ever, since the receiving team, by displaying a half near each side line for a possible lateral, will compel the kicking side to cover these men, making it easier to run a ball up the middle of the field.

"Incidentally, teams successful with lateral and forward pass plays should be able to gain easily on straight stuff as the defensive team must spread out to stop the well-known passing ability of the team with the ball.

"A successful forward pass can often be easily converted into a touchdown by a quick lateral to a lineman, following the pass, as the lineman is almost certain to be uncovered."

Device Measures Billionth of Inch

NEW YORK—When scientists begin delving into the mysteries of magnetism, alloys, molecules and atoms they find it necessary, figuratively speaking, to throw old yardsticks away.

So P. P. Clouff, youthful scientist connected with the Bell Telephone laboratories, has developed a super-sensitive instrument, capable of

measuring a billionth of an inch, because scientists had to have a new device to measure infinitesimal changes in length. How complicated his task was is revealed by mathematicians who explain how incredibly small one-billionth of an inch really is. Such a distance they explain, is so short that if it were possible to get paper equally thin, more than a million sheets, piled on top of each other, would be required to equal a piece of ordinary tissue paper in thickness.

The need for so refined an instrument arose from studies of magnetic materials. The development of permalloy, a mixture of iron and nickel, upset old theories of magnetism, for it displaced iron as the best material for magnetization. To carry out experiments with the alloy Clouff devised his instrument.

DANGER WINTER IS JUST AHEAD

Get Your WINTER ACCESSORIES now!

Preparedness is half the battle. Don't wait until you freeze your fingers before you get your cold weather accessories. Buy them at the C.G. Motor and accessories Corporation where the lowest prices prevail.

Winter Fronts, Heaters, Skid Chains, etc., are necessities for safety and comfort. Let our mechanics keep your motor in tip top shape for the winter. WE HAVE A TRANSMISSION GREASE THAT WILL NOT HARDEN OR FREEZE.

Your American League Baseball Champions

Here is the full roster of the New York Yankees, captors of the pennant in the American League for the second consecutive season. They are, left to right, front row: Walter Ruether, pitcher; Joe Dugan, 3d base; Ben Paschal, outfield; Benny Bengough, catcher; Myles Thomas, pitcher; Mike Gazella, infield; Ray Morehart, infield; Eddie Bennett, mascot. In the center row, left to right are: Bob Shawkey, pitcher; Joe Glard, pitcher; John Grabowski, catcher; Charlie O'Leary, coach; Miller Huggins, manager; Art Fletcher, coach; Herb Pennock, pitcher; Jules Wera, infield; Pat Collins, catcher. In the back row, left to right, are: Lou Gehrig, 1st base; Bob Meusel, left field; Babe Ruth, right field; Wilsey Moore, pitcher; George Piggas, pitcher; Earl Combs, center field; Charley Miller, utility; Waite Hoyt, pitcher; Tony Lazzeri, 2d base; Mark Koenig, shortstop; Urban Shocker, pitcher; Cedric Durst, outfield; Doc Woods, trainer.

YANKEE TWIRLERS HAVE BIG EDGE ON PIRATES IN SERIES EXPERIENCE

Football Players Have Big Feet, Says Bob Zuppke

WAXAHACHIE, Oct. 3.—"All good football players have big feet," according to Bob Zuppke, gridiron coach at the University of Illinois, who can cite All-American players who had big feet as long as anybody will listen to him.

If big feet are a requisite for good football players, Coach Barry Holton of the Trinity Tigers should have several outstanding gridiron performers on his squad this year, the most of the candidates for team have unusually large pedal tremities.

"Rusty" Hill, former steer at the North Texas Junior Agricultural college at Arlington, takes first prize for having the largest feet of any of the Trinity players. Hill, a half-back, who weighs 192 pounds, sports a size eleven shoe. Closely following are two veteran tackles of the Trinity team, Floyd Varnell of Corsicans and Houston Allen of Whitesboro who wear size ten and a half shoes. Both of these players weigh 200 pounds.

"Red" Dennard of Carthage and Bill McCluney of Kerns wear size nine and a half, while six others wear a number nine shoe.

Trinity fans refuse to take the size shoe as the sole tests of the football players ability as George Flournoy, former Waco high back, who is expected to star at Trinity, wears a number six shoe. Pokey Ryan of Waco and Bennie Pettit of Maypearl, two star backs, feel lost if their shoes are larger than six and a half.

Swedish Swimmer Is Record Breaker

STOCKHOLM. — "The Record Breaker" is the title bestowed on Arne Brog, Swedish Olympic swimmer. Every chapter of Borg's life might be headed, "New World's Record Broken."

Borg's latest feat was at Naessjo, Sweden, when he swam half mile in 10 minutes and 27.3 seconds, a world's record. At Gothenberg he established a world's record by covering 1,000 yards in 12 minutes and 6.9 seconds, swimming free style. At Upsala he swam 1,000 meters in 13 minutes and 19.5 seconds. At Gothenberg again he swam a mile in 21 minutes and 41.3 seconds.

Borg lowered his own record for the 1,000 meter at Oslo, making the distance in 13 minutes, 4.2 seconds. At Oslo he likewise swam 500 meters in 378.2 seconds, and 880 yards in 637.8 seconds. Stockholm saw him do 500 yards in 5 minutes, 38.1 seconds, and 700 meters in 6 minutes, 8.4 seconds.

PACIFIC TENNIS STARS

BERKLEY, Cal.—A slight built youth of 123 pounds and his one-armed team-mate have between them annexed five Pacific Coast tennis titles. Brashaw Harrison and John Rizzo are the players. Both are University of California students.

Rizzo, with only his right arm, won the singles title at the Santa Cruz invitational tournament and again at the British Columbia competition at Victoria. Harrison is Oregon State, Pacific Northwest and Washington State list.

Kansas Entry

Here's Jack Billy, Wichita (Kas.) runner, who is training for C. C. Pyle's coast-to-coast run in January. Billy holds all long distance records for his state.

Shrimps Now One Of Texas' Important Export Products

AUSTIN, OCT. 3.—Texas is going ahead in production of market shrimp and its long coast line of "sun warmed waters" soon should make the state the heaviest exporter in the nation, Will J. Tucker, state game, fish, and oyster commissioner, believes.

"Based on a fifty per cent tally of the gross catch coastal waters for the years 1926-27 produced in excess of 3,500,000 pounds of shrimp and some localities along the coast have reported a greater shrimp catch in August this year than for all of the preceding eleven months," he said.

Provisions of new permits issued to take the place of those expiring August 31 forbid the catching of shrimp measuring less than five inches. "By all the laws of nature the Gulf of Mexico along the Texas coast line should be the greatest shrimp grounds in the world."

Wardens are giving close attention to the conservation program of the department and are making close inspection of shrimp catches.

Highway Inspector Held Without Bail After Murder Sunday

HOUSTON, Oct. 3.—Morris Laine, 42 years old, inspector for the state highway commission, is held in jail without bail today on a murder charge growing out of the killing of T. F. Conoway, 48 years old, engineer for the International Great Northern.

Conoway was killed in front of the First Baptist church here Sunday.

Laine's wife was divorced in February, and she married Conoway two months later. Conoway's body was sent to Palestine today for burial.

RED INK MEANS DEATH ON ONE SCRAP OF PAPER

LONDON (AP)—One of the most gruesome objects in England is merely a sheet of paper. It is affixed to the mantelpiece in one of the secretaries' rooms in the Home Office.

It is the list of names of men and women awaiting execution after sentence of death. After their names is the date fixed for their end.

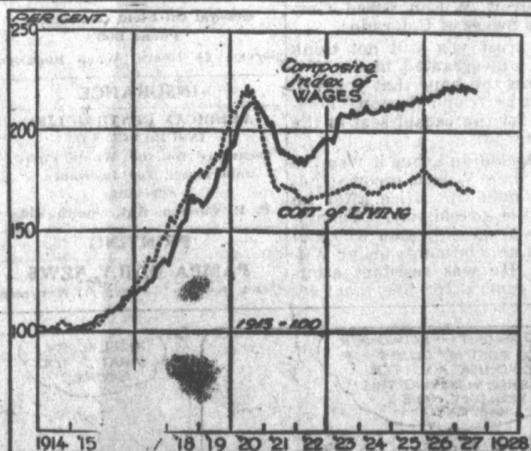

As other names are added at the bottom, names at the top are crossed out with red ink. They then become the names of persons who no longer exist.

The list stands in the Home Office because the Home Secretary, acting for the King, has the right of reprieve and commutation.

CHINESE CITY FALLS

PEKING, Oct. 3.—The important city of Kaigin, the largest commercial center in North Peking, has been captured by Shansi province troops from the Northerns, official foreign quarters advised today.

WAGE INDEX SHOWS GREATER GAIN THAN COST OF LIVING SINCE 1914

The relative positions of wages and the cost of living have been completely reversed since 1920, statistics of the Federal Reserve Bank of New York indicate, with the national wage index 121 per cent higher than the pre-war level and the cost-of-living index 71 per cent higher at the end of the first half of 1927. The bank estimates that the average purchasing power of wages has increased 29 percent since 1914,

the gain being made chiefly in the last six years. The composite wage index shown on the chart, which was prepared by the bank, includes per capita earnings of factory operatives, railroad employes, agricultural, building and unskilled labor, teachers' salaries and earnings of clerical help. Wages in general are above the previous high level of 1920. The rate for all groups excepting that of unskilled labor, rose slightly last year.

Street Car Men Study Comforts to Tempt Customers

CLEVELAND, Oct. 4.—Texas street and Interurban men here to attend the American Electric Railway association convention opening today have been gathering information on new styles in car and late methods of operating to be put into effect when they return to Texas. Several dozen Texans from Dallas, Ft. Worth, Houston, San Antonio and El Paso and other Lone Star cities are in attendance. They spend most of their time examining the exhibits which cover the largest display of electric railway equipment ever congregated in one place.

Two new cars, one purchased by the Northern Texas Traction System of Fort Worth and the other by the Houston Electric company, are among the interesting exhibits. They represent the last word in comfort and safety and are being studied by the railway men from other cities who wish to see the progress being made in Texas transportation.

Leaders of the business state the street car and electric Interurban have held their own the last year, having carried about 16 million passengers.

The bus problem has been settled by adoption. Almost 400 electric lines are operating in excess of 8,000 busses in connection with electric cars.

Electric railway men declare that the bus usefulness in coordinate service, and the practice is such cities as Dallas, Houston and San Antonio and Fort Worth, where busses are used by the car companies, is cited as the best method in this regard.

The outstanding problem before the industry is said by those attending the convention to be the private automobile. How to induce the car owner not to use his motor in competition with the public transportation system has given the industry many anxious hours. The industry is stressing in its sales efforts, which include expenditures of \$6,000,000 a year in advertising, the economy, speed, comfort of electric cars and busses.

The magnitude of the industry represented at the convention can best be appreciated by the following statistics: Capital invested \$6,000,000,000; passengers carried annually 16 billion; cars in service 95,000; miles of track 43,000; busses used 8,000; miles of bus routes 15,000; annual income \$1,000,000,000,000; employes 300,000.

Potatoes Profitable To Texas Man

BRYAN, Texas, Sept. 3.—Lynn Sample, farmer in the Taboc community, near here, is an example of a prosperous diversified farmer.

This year he planted one and one-half acres of Irish potatoes, which brought him \$512. Following the harvest of Irish potatoes, one acre of this land was planted in watermelons, and this netted him \$169. The remainder of this small plot, a half acre, was planted in sweet potatoes and he expects to sell \$100 worth of this product.

Mr. Sample also raises tomatoes, peas, beans and egg plants.

American Bankers To Meet In Houston

HOUSTON, Texas. (AP) — More than 3,500 bankers from many parts of the United States plan to attend the American Bankers' Association convention here October 24.

Roy Miller, Houston, says more than 1,900 reservations already have been made. Miller is chairman of the committee on arrangements.

Nine special trains will bring the bankers, three coming from New York, a like number from Chicago, and one each from Kansas City, Atlanta, and Cleveland. Another is in prospect from the Pacific coast.

The program for the business session is being worked out at the association's headquarters in New York. Among men of national prominence who have indicated they will attend the convention is J. W. McIntosh, comptroller of the currency.

Melvin A. Traylor, president of the First National Bank, Chicago, is head of the association. If preceded is followed, he will be succeeded as president of the Hamilton National Bank of Chattanooga, Tenn., who now is vice-president.

WANT MOVIES BACK

AUSTIN, Oct. 4.—Depressed over the number of Austin people who spend Sunday in San Antonio, allegedly because there are movies here on the sabbath—some of the local citizens have figured that San Antonio Sundays cost Austin more than \$250,000 in a year's time.

The figures were prepared, however, by a faction which wants to open the picture show here every day of the week, the other faction assert.

A. E. Gatlin and P. M. Bailey of Miami are here on business today.

A Striking Situation

but not an unusual one. In a home where there is but one single piece of furniture, a chilly atmosphere without a single stove could one expect peace and harmony when these conditions exist. Buy a stove and some comfortable furniture now. Remember always that THE HOME COMES FIRST!

Telephone 100, all departments.

PAY THAT TAX—Now is the time to pay your poll tax. Many Pampa citizens have not been able to vote this year on account of not having paid their poll taxes. Many important issues have come up without their having a voice in the matter. Only the state law exempting those who were out of the state on January 1, 1926 saved a vote for the newcomers.

By the time the present poll tax paying time becomes effective next year, most of those now living in Pampa will have been here a year and will have a vote providing they can show their poll tax receipt. There will be no excuses for the voters who neglect this patriotic duty.

There is little danger that the Sheriff will have to line up applicants for a block or two. But the steady paying of poll taxes should, during the next few weeks, mark the interest of Gray county citizens in their own affairs.

It is difficult to forecast all of the opportunities which may arise during the next year. In addition to the regular elections, there are apt to be others which will help or retard this community or county.

It is the suggestion of the Daily News that all women's clubs, civic clubs, lodges, schools, churches, and other agencies call attention to the importance of poll tax paying. The tax may not be paid after January 31.

THINK—"Success, as I see it," says Henry Ford in an Association Press dispatch, "is measured by experience. The more of the right kind of experience a man has, the more successful he is."

Ford has his faults, but he is something of a sage. He thinks in big terms of material success. "It pays to think big," he says, "and nothing is particularly hard if you subdivide it into small jobs."

Ford might have said that thinking big is thinking through the small phases which make up each big project. That is his method. It is a good way to think. Its application to ordinary life is direct.

In the slow task of building a great community, it takes big thinking on the smaller jobs to succeed. The interests of the average citizen are small. He gives his time in business to work that is closely related to small things—such as water mains, telephone service,

clean alleys, and the like. These are necessities, but so common that they may be overlooked. Another citizen will think in terms of amusements or recreation. Practically all are vitally interested in the schools. These individuals measure a city not by its great industries, but by the little things which most affect them.

A city needs big thinkers. It needs some who stress this interest, and others who see its opportunities in another. Its interests are often served well by someone with a hobby. Any man with a good civic hobby is an asset. There are plenty of hobbies—boys, girls, playgrounds, parks, alleys, music, sports. Pampa has been thinking big—big about large things, but she needs also to think well along some of the smaller needs.

APPEALS—Appeal to authority is one of the favorite American customs. This is clearly shown by the organization of the courts. In a democracy, constitutional government is much based upon a body of review.

The U. S. Supreme Court has begun the task of opening and considering a docket of more than 1,000 appeals.

That it was intended to be this absolute in the nation's affairs when the constitution was written is now believed by very few, but the development of jurisdiction and powers has been so gradual that there has been little concerted opposition.

As an individual power, it is almost without a peer, and he executive function is but little more important. But while the supreme justices have husbanded their strength from time to time, they have been liberal enough to interpret the statutes so as to prevent upheavals. They have thought it better to stretch a point than to surrender an accurate, though unreasonable judgement. Perhaps this was well, for it preserved respect for the original document, yet it has brought upon the court so much work that many doubt its wisdom in thus taking over so much legal reviewing of relatively minor cases.

WASHINGTON LETTER

By RODNEY DUTCHER, NEA Service Writer

WASHINGTON—If the Democrats actually are going to nominate a dry progressive, as many of them have threatened to do these last eight or ten years, Huston Thompson of Colorado stands as good a chance as anyone.

Thompson is quite a dry and he is very, very progressive. One hears that he may have the Colorado delegation at the convention.

The trouble is that, although they may nominate an accomplished straddler, the Democrats are not likely to nominate a dry progressive.

The anti-Smith leaders will have to have someone to rally around when the convention gets under way, but whoever that may be can promptly decide that he is definitely sunk. The dries will be looking for temporary parking space and not for a bandwagon. The eclipse of McAdoo left little hope that a man of the McAdoo stamp could be nominated.

The nominee now seems likely to be Smith or Reed. But if not, the honor can hardly go to a man like Glass, Owen, Meredith or Thompson, although any of these men may

be chosen for the job of holding the anti-Smith strength together. Under the circumstances, one of these men would do about as well as another. All of them are highgrade.

But there will be a great many good Democrats who won't believe all that and because they hold that this is the time to nominate a dry progressive you may hear a great deal from Thompson at the convention.

Nearly everyone has heard of Thompson as a chairman and member of the Federal Trade Commission, but he is not a popular, wide known figure. Thompson might remedy that almost single-handed if he were nominated however, for his Republican opponent would most certainly know that he had been in a fight.

First and foremost, Thompson is a trust-buster. In these days when "big business" is riding and is yet more popular than ever, the fact might not be much of an asset for Thompson, but the man is loaded with ammunition and he probably knows more about monopolies and the mysterious ways of the trusts than any other man in his party.

To the extent the Democrats are getting excited over "invisible government" and "Wall Street control" of the administration, Thompson benefits. It must also be remembered that he carries a strong appeal to the so-called Wilson faction of the party. On March 26, 1928 Woodrow Wilson wired Governor Sweet of Colorado:

"I trust you will not think it an unwarranted liberty if I express the hope that you will select by friend Huston Thompson for the vacant seat in the Senate."

Sweet didn't, but it was the only time Wilson recommended a man for office after he left the presidency. Thompson was the only man who had three appointments under Wilson. He was assistant attorney general for five years and

served eight years on the Federal Trade Commission, of which he was twice chairman. As assistant attorney general, he argued 70 cases before the supreme court and cleared up a docket of 22,300 cases before the court of claims in five years, bringing that court up to date for the first time.

PRESS FORUM

Such things used to be common enough, now it is really news to hear something about an Anti-Tobacco club. Several years ago, there was organized at Enid the Emerson no-tobacco club, with junior high school boys as members.

The members of the club signed a pledge to abstain from the use of tobacco in any form. The club now has 761 members, several of whom are in universities. And that is what may be called a really old fashioned club. From the days of little Robert Reed, who was credited with saying, "Tobacco is a filthy weed, and from the devil it does proceed," there was, for many years, conducted a more or less vigorous campaign against tobacco, the plan being to enlist boys in the movement by inducing them to "sign the pledge." It was argued that if boys did not begin the use of tobacco, men who were al-

ready using it would die off after a while, and tobacco would be a thing of the past. There was no disputing the logic in the case; the trouble came in its practical application. In those days, school boys were not asked to quit the use of tobacco, but not to begin using it, for the school boy who used tobacco was a rare thing, and no one thought of calling a boy or even young man, a "sissy" because he neither smoked or chewed tobacco. And as for the girls, no one even foresaw a time when girls would be as much eligible to membership in anti-tobacco clubs as boys. But times have changed; that is why the Enid No-Tobacco clubs for girls. A scientist announced the other day that eighty per cent of babies born to cigarette smoking mothers die before reaching the age of two years. That should form a right good argument in favor of No-Tobacco clubs for girls. None will be organized, however, not for a while, at least. General Cigarette has captured the world, and placed Milady Nicotine upon the throne. Maybe all that old fashioned campaigning against the use of tobacco, especially by growing boys—no one thought of including growing girls—was mistaken, but, on the other hand, maybe it wasn't.—Blackwell Tribune.

TWINKLES

While the United States hunt a man for president, Mexico is also getting ready to hunt down candidates—after the Mexican fashion.

Big railroads are cutting out the curves. Motorists try too often to do the same thing for the highways.

Well, it looks like most everybody has taken up the "defend the flapper" fad, and not even an ultra-modernist can get an ear with his analysis.

Anyhow, what's a flapper these days?

After looking at nice pictures from St. Louis lately, we wonder why they don't leave a block or so as it is for the benefit of the nuts who rave over ruins. Some people can see poetry in trash and nothing in nature at her best.

Pampa's Business, Professional and Commercial Directory

Mrs. Bell Gray Is Hostess to Ace High Club

The members of the Ace High Bridge club met Thursday with Mrs. Bell Gray as hostess. High score was won by Mrs. Watt Thomas and low score by Mrs. B. C. Davis. The Guest prize was awarded Mrs. Jimmy Ensign.

After several interesting games a delicious plate luncheon was served to the following guests: Mrs. Billie Lang, Mrs. Carl Taylor, Mrs. Watt Thomas, Mrs. Jimmie Ensign, Mrs. Carlock, Mrs. Ed Gober and Mrs. B. C. Davis.

The next meeting will be held Thursday at the home of Mrs. Watt Thomas.

Engagement of Miss Bernice Chapman Announced in Party

Miss Margaret Schmidt, Miss Mable Davis, and Miss Jewell Flanagan were joint hostesses in a delightful announcement party given in honor of Miss Bernice Chapman Monday night at eight o'clock.

The lovely dining room of the Schneider hotel was the scene of the dinner party. The table was attractively decorated in pink and white, with a dainty wishing well in the center, from mints were placed by each plate also.

At the close of a delicious three-course dinner the guests pulled the streamers from the tiny well and found a heart on the end of each, on which was written: 'Miss Bernice

Chapman and T. E. Simmons, October 8.'

The guest list included the honoree, Miss Bernice Chapman, and Miss Wilma Chapman, Mrs. George Gill, Mrs. Mack Graham, Mrs. DeLea Vickers, Mrs. J. E. Chapman, Mrs. Morton, Mrs. N. A. Helstead, Mrs. Paul Shepherd.

Miss Mary Hobart Is Honor Guest At Vicars Home

Miss Mary Hobart was honored at a party given at the home of Mrs. DeLea Vickers Monday afternoon.

The time was spent enjoying novel methods of entertainment, such as games and contests. After several enjoyable social hours, the hostess, assisted by Mrs. J. S. Wynne, served refreshments of cake and tea to the following guests: Miss Mary Hobart, Mrs. T. D. Hobart, Mrs. Clyde Fatheree, Mrs. Fred Hobart of Canadian, Mrs. Clinton Henry, Mrs. W. Purviance, Mrs. Claude Ledrick, Mrs. John Andrews, and Mrs. Mack Graham.

Miss Blanche Mullens And W. R. Hallmark Are Married Here

A wedding of much interest was that of Miss Blanche Mullens and W. R. Hallmark which occurred Sunday at 7:30 o'clock at the Methodist parsonage. The Rev. Tom Brabham performed the ceremony.

Mrs. Hallmark, formerly of El Paso, has been in Pampa for the last four months, and has made many friends.

Mr. Hallmark has been employed by the National Supply company for the last year, and is receiving the congratulations of his many friends. The young couple will make their home in Pampa.

Methodists Will Have Reception Tomorrow Evening

There will be a reception and get-acquainted meeting at the Methodist church Wednesday evening at 7:45 o'clock. Every person who has joined the church during the year is especially urged to be present, along with other members.

A special program has been arranged, and a splendid time is in store for all. Music, singing and speaking will feature the program for the evening, and some prominent out of town speakers will be on hand.

L. M. West of Pampa Marries El Paso Girl

Miss Louise Groves of El Paso and L. M. West were united in marriage at the home of the bride's aunt in Amarillo Sunday morning at 9 o'clock.

Mrs. West is the daughter of Mr. and Mrs. Gus Groves of Dennison, but has been living in El Paso for the last year. Mr. West is a popular employe of the Pampa Drug store.

Both Mr. and Mrs. West are the graduates of Austin college of Sherman. They will make their home in Pampa.

T. K. Underwood is leaving today for Oklahoma City, where he will be for a few days on business.

Mr. and Mrs. Jack Back visited in the home of Mr. Back's mother in McLean Sunday.

Social Calendar

Dollar Night and a carnival will be held Friday night at 8 o'clock at the Christian church annex.

A meeting of teachers, assistants, and officers of the Christian Sunday school will be held Tuesday evening at 7:30 o'clock.

The Ladies Auxiliary of the Presbyterian church will hold a meeting in the church Wednesday afternoon with Mrs. Tom Clayton as hostess, and Mrs. J. M. McDonald as leader of the Bible study.

The Autumn Bridge club will meet at the Schneider Hotel Tuesday afternoon with Mrs. Alex Schneider, Jr., as hostess.

A joint meeting of the P. T. A. and the Child Study club will be held Friday afternoon at the Central School building at 2:45 o'clock.

A meeting of the Coterie club will be held with Mrs. Chas. Mullen Thursday afternoon at 3 o'clock.

A regular meeting of the members of the Eastern Star will be held Friday night in the Masonic hall.

Circles One and Four of the W. M. U. of the Baptist church will meet Wednesday afternoon at the church, while Circle Three will meet at the home of Mrs. Pierce. There will be no meeting of the Circle Two.

The Methodist Missionary Society will hold its meeting Wednesday afternoon at the home of Mrs. Tom Brabham.

The Missionary Society of the Christian church will meet with Mrs. Frank Meers, Wednesday afternoon.

PERSONAL MENTION

Mr. and Mrs. W. A. Duerr of Breckenridge, are in the city for a few days. Mr. Duerr is connected with the Cabot Co. in Breckenridge.

H. R. Delaney is in the city while visiting his well in the Bowers pool.

Fred M. Bozo of Tulsa is here on business.

Alex Schneider, Jr., received a telegram from his father yesterday stating that the party arrived safely in New York, where they will take a boat for Europe to visit for several months.

Mr. and Mrs. J. E. Rea, who have been ill for the last week are very much improved.

L. M. Ballew and Mike Carlton are in Shamrock today on business.

W. J. Turpin was in Berger Monday in interest of the Eastman National bank of Oklahoma.

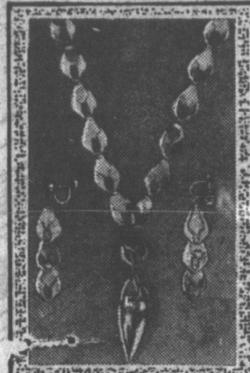

B. F. Thompson left today for Pyote, where he will continue his connection with the National Supply company.

Mr. and Mrs. A. D. Fish and Mr. and Mrs. Roy Hill left Monday to visit relatives at Follett.

Mr. and Mrs. Homer Lively are the proud parents of a new boy. The son was born Saturday morning and has been named Emery Eugene.

W. T. Hayter went to Panhandle Monday on business.

Jewelry

Paris' latest ensemble is the Roman gold set of necklace, earrings and bracelet. Hand-hammered, they are an exact reproduction of old Roman links and come in Roman gold finish.

Wife of Lord Mayor Has Full Time Job

LONDON—One of England's busiest women is Lady Margaret Blades, wife of the Lord Mayor of London.

While her husband, Sir Rowland Blades, is his time fully occupied with official functions she is seldom free from supervising her numerous charity organizations in addition to seconding her husband's work.

The Lady Mayoress is still at the task of writing 400 letters a day thanking people for gifts to her Christmas fund. She personally signs all of them.

When she is not opening bazaars and charity fetes she is entertaining her husband's friends, royalty and distinguished foreign visitors. Frequently she is asked by Englishmen in the colonies to find wives—right up to the enquirer's "specification."

College Paper Has First Girl Editor

(By The Associated Press.) GETTYSBURG, Pa.—For the first time in the 75 years that "The Gettysburgian" has been published, a girl takes her place on the editorial staff of the Gettysburg College paper this fall.

She is Miss Dorothy L. Henne of Lebanon, Pa. Besides the distinction accorded her as the first feminine member of the staff of this weekly, her friends claim for her the further honor of being one of the most attractive co-eds in college. Her wavy hair is unbobbed.

Defends Flapper

BERKLEY, Cal. (AP)—The flapper era has passed and her little sister is the new species over which an older generation must shake their heads, believes Joan London, daughter of Jack London.

"Little Sister," believes Miss London, is even more precocious than "The Flapper," who has grown to motherhood, and despite dire predictions, is proving to be a good mother.

"Born sophisticated, she is a trifle calculating, coolly critical and determines her future with both her head and her heart," she says. "She is candid in her thoughts and frank in her talk."

Miss London is following in her father's footsteps as a writer of fiction.

C. P. Woodward, who recently went to Crumb, Texas, to be with his mother who is ill, is now in Hico visiting his son, C. L. Woodward.

Menus for the Family

BY SISTER MARY
BREAKFAST—Honeydew melon with lemon juice, cereal, cream, broiled cottage ham, potatoes hashed in milk, graham muffins, milk, coffee.

LUNCHEON—Potatoes in peanut butter sauce, toasted graham muffins, carrot and celery salad, grape pudding, milk, tea.

DINNER—Broiled veal cutlets, scalloped okra and tomatoes, stuffed pepper salad, sliced peaches with boiled custard, two egg sponge cake, milk, coffee.

Grape Pudding
Two cups grape juice, 1-3 cup cornstarch, 1 tablespoon butter, 2 eggs, 1-2 cup sugar.

Add sugar to grape juice and bring to the boiling point. Stir in cornstarch diluted with enough cold water to pour easily. Cook, stirring constantly until mixture is clear. Add butter and a few grains of salt. Fold in whites of eggs beaten until stiff and dry. Turn into individual molds and let stand until firm and thoroughly chilled. Serve with soft custard made with yolks of eggs.

This is a nourishing simple pudding suitable for the small stay-at-homes as well as the children of school age.

BREAKFAST—Orange juice, cereal, cream, baked hash with tomato sauce, corn brea, milk, coffee.

LUNCHEON—Cream of celery soup, toasted crackers, pear and banana salad, bread pudding, grape juice.

DINNER—Filets of fish with spaghetti and mushroom sauce, steamed cauliflower, asparagus and lettuce salad, blueberry pie, milk, coffee.

Flounder or flake could be chosen for the dinner fish. Haddock cut in small filets might be used but if course is not as deliciously flavored as the other fish suggested.

Filets of Fish With Spaghetti
One-fourth pound spaghetti, 4 filets of fish, 1-2 cup grated cheese, 2 tablespoons cream, 1-2 pound mushrooms, 3 tablespoons butter, 1 1-2 tablespoons flour, 1 1-2 cups milk, salt and pepper.

Cook spaghetti in boiling salted water until tender, breaking the paste in two-inch lengths before cooking. Drain and arrange over the bottom of a hot deep platter or shallow serving dish. Pour over the mushroom sauce and place the prepared fish on top. Serve garnished with cress.

To make the sauce, melt butter and add mushroom peeled and broken in small pieces. Cover and saute five minutes. Sift over flour and stir with fork until flour is absorbed and blended. Slowly add milk, stirring constantly. Cook until thick and smooth. Season with 1-2 teaspoon salt and 1-8 teaspoon pepper.

To prepare fish, sprinkle filets with salt and pepper and saute in a hot frying pan until a delicate brown on both sides. Moisten cheese with cream and spread the top of each filet with the mixture. Slip the fish under a gas broiler flame and brown. Remove carefully to prepared platter and serve.

Mrs. J. H. Saunders of Dallas, Texas is the guest of Mr. and Mrs. I. B. Hughey.

Mr. and Mrs. G. E. Carpenter and little daughter, Florine Ann, of Amarillo are the guests of Mr. and Mrs. Tom Rose.

Indians Make Place for Selves In Films, Oust Painted Extras

Indians are scarcer in Hollywood than one would deduce from watching western pictures. Until lately there were only a handful outside of veteran actors like Mad Wolf (lower left) and Eagle Wing (lower right). But now White Wing (upper left) and her husband, Chief Yowlache (upper right), Indian singer, have organized the actors of their race and have a casting agency which is attracting them to the motion picture capital in larger numbers.

By WADE WERNER
(Motion Picture Feature Editor)
HOLLYWOOD, Cal. (AP) — For years it has been conceded among motion picture directors that to let a few dozen Indians gallop across the screen bent on massacre was about as sure a way as any to bring the nickelodeon customers cheering to their feet.

Yet Indians have scarcely begun to work in pictures here. As late as a year ago there were not half a dozen Indian extras registered in Hollywood. Practically all the so-called redskins were Mexican laborers, recruited off the streets of Los Angeles.

At rare intervals producers of big features made whole sequences of a picture on or near an Indian reservation in order to get enough full-blooded Indians for big scenes. For Indian extras, however, it was always easier to hire substitutes off the street and put them into Indian paint and costumes.

Many players earning big money today can recall when they filled in as "Indians." Even Mary Pickford had her share of wearing dark paint and blankets.

Here and there a real Indian gradually became known to casting directors and was regularly used. Eagle Wing, a Klamath, has worked in pictures for about 15 years, and Dove Eye Dark Cloud, widow of the late Chief Dark Cloud, has portrayed many Indian roles. There also are several stars and successful directors in whose veins run Indian blood, notably Red Mountain, better known to film fans as Monte Blue; and Edwin Carewe, whose Chickasaw name is "Chulla," meaning Fox.

But for White-Bird and the organization of the War-Paint Club, Indian affairs in Hollywood might have remained on this plane. When she came here two years ago with her husband, Chief Yowlache, Indian partone, she marveled that most of the Indians being used in pictures were imitation Indians. She was told the reason studios used so few Indians was that Indians were too hard to find in Hollywood. She wouldn't believe it, until she was asked to fill an order for six real Indians. When she tried to recruit them she found practically none had telephones and many had moved to other addresses. So the half dozen Indians were delivered on the set next day only after a strenuous hunt.

The discovery set White-Bird to work in earnest. She built up a list of active telephone numbers and a "scout" system for teaching those who had no telephones. Gradually the home of White-Bird and Yowlache became a sort of central casting bureau for Indians and later there was organized the War-Paint Club, which looks after the interests of Indians in films and furnishes Indian types and extras.

Now as many as 150 Indians can be obtained in a week at short notice, and the list is being augmented

ed by Indians migrating to Hollywood from various states. As compared with other "foreigners," the American Indian has been slow to invade Hollywood, but in another year or two there may be as many Indians in pictures as today there are Russians, Germans, Frenchmen or Hungarians.

CAR BREAKS WINDOWS
The change in the gear shift of the new Dodge car caused a new coupe to jump over a curb Sunday morning and run into the west window of Bonny's cafe on North-Cuyler street.

The driver, thinking he was backing his car from the curb, had it in the wrong gear. The car was not damaged, but the two large panes of plate glass in the window of the cafe were demolished and the frame work washed.

W. J. Miller of White Deer was a business visitor here this morning.

FEATURES FROM OTHER LANDS

MAYFAIR BOOSTS SALE OF "GOOD LUCK" CHARMS

LONDON (AP)—Mayfair society has taken to a good luck "magic spell" craze with a vengeance. The fad has been borrowed from the coal mining districts where potent charms have been in demand as tokens against misfortune for many generations, not only among children but by their fathers and mothers as well.

The public demand and faith in superstitious charms was condemned recently by Prof. A. G. Clark, of Edinburgh University, before the British Medical Association, but this has only stimulated the craze, it appears from reports from various parts of the country.

In 20 London districts, including Mayfair, Highgate and Hampstead and other residential parts of the metropolis, bead necklaces are looked upon as safeguards against colds and bronchitis, and are supposed to bring good luck, especially in bridge and other games of chance.

The beads in demand just now are blue, light or dark, but white, yellow and green beads are also used more or less. Beads of this kind may be bought for a few pennies, and are in particular demand among the poorer classes, and must be worn for all time. If taken off even for a moment, the superstitious believe, the charm vanishes in a jiffy.

PLUS-FOURS PLAMED FOR LAX CONDUCT

LONDON (AP)—Wives who have difficulty in making their husbands' eyes behave would do well to keep them out of golf knickerbockers, if President Weddell of the National of the National Federation of Merchant Tailors may be believed.

"A man in plus fours is more lax in conduct than a man in morning coat, and the wearing of a dress suit encourages gentler and more civilized conduct," says Mr. Weddell. But this great authority on male attire is all against the dinner coat. He says fat men like it because they do not look so ridiculous in it as they do in long-tailed evening coats, but he warns that it is almost negligence and is such an important sort of garment that no man can appear genteel when wearing it.

BROWN BREAD EATERS DEFEND FAD VIGOROUSLY

LONDON (AP)—Brownbreaders and whitebreaders are having a duel to the death in the British Isles.

Sir Arbuthnot Lane and his Health Society are the champions of whole wheat bread. The perpetually youthful Fannie Ward has also cast her lot with the anti-whites.

Fannie says she doesn't eat any

bread, but if she did it would certainly not be white.

The millers of the British Isles are furious about the brown bread campaign as charges have been made that the vitamins of Class B are bleached out of white flour.

Sir George Newman, the chief medical officer of the Ministry of Health, and a number of other prominent physicians have aligned themselves with the whitebreaders. Sir George says the extravagant claims put forth on behalf of brown bread are unconvincing and of trifling importance, as the all essential point is that each person get a proper allowance of vitamins in his entire diet. Sir Thomas Horder, a celebrated British physician, takes a similar ground.

BEE STINGS TAKE AWAY TASTE FOR HARD DRINK

LONDON (AP)—Bee stings are a sure cure for alcoholism and rheumatism, so J. Anderson, one of the judges at the National Bee Society's Show at Crystal Palace, told visitors.

"I know a man who went to a hospital where they cured him of rheumatism by means of bee stings. But when he came out he told me he would rather have rheumatism because the treatment had taken away his taste for whiskey," Mr. Anderson declared. "Most beer-drinkers are teetotallers, but I think that is because they eat lots of honey and that takes away the craving for alcohol."

"THE BOHEMIAN GIRL" PUT IN MODERN DRESS

LONDON (AP)—Like "Hamlet" "The Bohemian Girl" has appeared in London in modern dress. The book of the old opera has been entirely rewritten and brought up to date for the Carl Rosa Opera Company. But "Heart Bowed Down," "I Dreamt I Dwelt in Marble Halls" and other famous arias have been retained as they were in the original opera, written nearly a century ago by Balfe, the Irish composer.

Over 3,000,000 game fish were planted last year in the waters of the Glacier National Park.

Lumber-jacks of the north woods have adopted bathing suits for their

favorite sport of log rolling.

Six Baltimore men were arrested last Sunday for violating an old statute forbidding work on Sunday. The Democratic National Committee has been offered \$250,000 by Miami, Fla., for the 1928 convention.

ENGLISH HOTELS MOVE TO ABOLISH TIPPING

LONDON (AP)—Hotel keepers and restaurant owners in England are making another move to abolish tipping and charge 10 per cent for the "service" on all meal checks.

This system is working well in Italy and customers are freed from the worry of knowing how much and whom to tip. Mr. Clifford Whitely and Sir Francis Towle, two of England's hotel kings, are now in Italy studying the 10 per cent system at close quarters. They are impressed by it and on their return to England they intend to campaign for its introduction in the hotels and restaurants.

"Tipping is the curse of England" says Mr. Whitely. He is of the opinion that hotel staff and waiters are better off, prefer a fixed percentage to the bill and in Italy, at least, are more respectful to customers.

ENGLISH PAPERS PRAISE AMERICANS' CASUALNESS

LONDON (AP)—The simple apparatus and poor map carried by William Brock and Edward Schlee when they landed at Croydon on their airplane flight around the world aroused the adoration of newspaper writers, one of whom says "the casualness of the two latest American flyers to cross the Atlantic is delightful."

Incidentally their request to be informed "what country are we in" and the crude manner adopted of painting the name of the place on the paving stones has raised the question of all signs throughout the country, or rather the lack of them.

AMERICAN TOURISTS NOW TURN TO SHAKESPEARE

LONDON (AP)—Literary tourists are busily seeking links with Shakespeare.

There is little to be seen now of Shakespeare's London but there are a few places left upon which Shakespeare must have looked. One of them is the old brick gateway of Lincoln's Inn, in Chancery Lane. It was built by Sir Thomas Lovell in 1518.

That Shakespeare looked at it often may be regarded as a certainty, for his patron, the Earl of Southampton, lived at the end of Chancery Lane. The spot once occupied by his residence is now called Southampton Buildings, a large and well known block of offices. Shakespeare must have often walked thru the Lane on his visits to the Earl.

Young Orators Will Gather at Mexico City Soon

EDINBURG, Oct. 3.—Representatives of five foreign countries, young oratorical champions of their respective nations, will be guests of Edinburg October 4, while enroute from Washington to Mexico City. These five orators, with a sixth, the representative from the United States will stop over in the Valley on their way to Mexico City where they will be guests of President Calles prior to entering the International Oratorical contests which will be held in Washington October 14.

The stop in Edinburg, which will be followed by a tour of the Valley, will be the only one made by the visitors on the trip from the capital of the United States to the capital of Mexico.

The honor came to Edinburg through the efforts of a member of the faculty of the Edinburg College who is a former associate of Randolph Leigh, manager of the National Oratorical Contest.

France, Belgium, Mexico, Great Britain, Canada and the United States will be represented in the party.

All the students in Edinburg will meet the train bringing the guests. At 11 o'clock the visitors will deliver before the student body of the Edinburg College the same orations they are to deliver at the international meet in Washington. The subject will be "The Constitution of My Country." Each speech will be 10 minutes long and will be spoken in the native tongue of the respective contestants.

Governor Dan Moody, President H. Y. Benedict of the University of Texas, editors of the leading newspapers of Texas, newspapermen of the Valley and other leading Valley citizens will be invited to edinburg to hear the orations delivered.

C. I. A. Gets New Post Office and Big Pipe Organ

DENTON, Oct. 4.—A new post office, costing \$6100, is one of the newest improvements made on the campus of the College of Industrial Arts in accordance with plans for an extensive improvement and repairing program that has been inaugurated on the campus. It has 770 boxes and will accommodate every student's mail.

A white way, consisting of thirty-eight lights costing \$5959 is being installed on campus drives. These are to be of four hundred candlepower. The dairy has been abolished and a contract made with a local establishment to furnish the dormitories and the cafeteria with dairy products.

An addition costing \$10,000 has been made to the college laundry, including a rest room for employees and a students' laundry.

A \$20,000 pipe organ, four manual, will be installed in the C. I. A. auditorium and will be ready for use January 1.

Skelly Has Given Way to Skellytown

The town of Skelly is no more with the exception of a building across the main street. The entire town, including the water system, has been moved to the new Skellytown north of the old site and on the new branch of the Santa Fe railroad to Roxana.

Steel has been placed to within one mile of Roxana and ballast trains are running to Skellytown, which is steadily growing. A new depot under construction at Skellytown is a credit to a town twice its size.

Now that trains can run as far as Skellytown, the Cabot Co. will commence the erection of its huge Carbon Black plant on the Schafer ranch. The cellar has been completed and material is being placed on the ground.

National Pro Golf Entries

(By The Associated Press.)
 NEW YORK—Entries for the national championship of the Professional Golfers' Association must be made on or before September 25. Myan of the pros have already forwarded their bids. The championship will be played over the course of the Cedar Crest Country Club at Dallas, Texas, October 31 to November 5.

There are 24 sectional bodies identified with the national organization. In determining the number of qualifiers the ratio has been fixed as one in 20. In order to earn the right start in the main tournament all but Walter Hagen, who has won the title three times in succession, must qualify. There will be 67 pros eligible to enter the preliminary medal play stage at Dallas after the qualifying process throughout the country has been completed. At Dallas the field will be reduced to 32 for match play.

The number of nominations allowed by sections are: New England, 6; Tri-State, 2; Mid-Atlantic, 2; Kentucky, 1; Ohio, 4; Philadelphia, 4; Indiana, 2; Michigan, 3; Oklahoma, 1; Carolinas, 2; Pacific Northwest, 3; Texas, 2; Northern California, 2; Southern California, 3; Wisconsin, 1; Illinois, 7; Southwestern, 1; Minnesota, 2; Nebraska, 1; Northwestern, 1; Metropolitan, 11; Mid-West, 2 Central New York, 2.

The Tulsa citizen who accumulated eight red tags for violation of traffic ordinances in one-half day is believed to hold the record.—The Tulsa World.

Lengthy Convention on Radio And Telegraph Regulations Is Now in Session at Washington

WASHINGTON, Oct. 4.—Representatives of about 60 nations and delegates from 50 independent wireless operating concerns covering the world, convened in Washington today to amend and bring up to date the International Radiotelegraphic convention signed in London at the last congress in 1912.

It is the aim of the parley to standardize the administration of radio communications, the international supervision of international wireless communications between ships and shore stations, and shore stations both by radio telegraphy and radio telephony. Attempts will be made to allocate frequencies for international radio services so as to eliminate interference, keeping in mind the increased use of wireless for international communications since 1912.

The discussions will cover all radio services, including commercial, press, governmental, amateur, experimental, broadcasting, beacon, navigational and distress.

May Combine Conventions
 Attempts will be made by European powers at least, to combine the International Radiotelegraphic convention with the existing International Telegraphic convention, which, however, the United States is not a member, with a view to coordinating all international communication.

In the course of the conference, which will last until about November 17, the greatest difficulties foreseen are those relating to the method of approach of the various problems confronting the delegates and to the organization of the conference itself.

The United States is spokesman for a group of nations expected to be greatly in the minority, which desires to limit the scope of the convention strictly to subjects "which concern sovereign government as governments, and which are therefore suitable for inclusion in a formal covenant between sovereign states."

"Such subjects," the official American platform states, "deal with the government's concern for the protection of the public interest; for preventing discrimination among users; secrecy of messages; avoidance of interference; the government's obligation with respect to the safety of human life and to marine and aerial navigation; and related subjects."

On Government Operation
 But in most of the countries attending the conference, all wireless concerns are either actually operated by the governments or are subject to strict governmental control. The natural tendency in their case is towards inclusion in the proposed convention of clauses dealing with economic and technical principles and methods of operation. In such a field under the American principle

of allowing a maximum of competition and because of constitutional restrictions against interference in private institutions, the American government is powerless to interfere.

The principal struggle of the conference is therefore seen, by experts here, as likely to center about the inclusion in the convention of clauses affecting the technical running of the radio concerns.

The American delegation proposes that the countries participating conclude a convention binding upon the governments themselves merely in matters relating to national policies. Representatives of the various international radio companies reach among themselves an understanding regarding the actual management of international radio communications.

Under such a system, the Americans hold, it would be easier for the radio industry to keep abreast of improvements without being hampered by an international treaty, difficult to alter.

Debates Expected
 Real location of votes in the convention may also furnish lively debates. At London in 1912 the rule was established that countries would have, in addition to an initial vote, as many others as were the colonies or possessions they controlled, with a maximum of six votes for any one

nation. Accordingly the United States.

*Great Britain, France and Germany were allowed six votes each. Japan obtained two votes and Italy three.

The world war and subsequent upheavals have rearranged the world in such a fashion that the London voting strengths will have to be at least partially rearranged. Germany lost all her possessions, therefore apparently is entitled now only to one vote. She claims that this classification is obviously unfair since her world importance warrants greater voting strength than Portugal, for

instance, which has two votes or Albania, with one vote.

Japan asserts that she became recognized during and after the war as one of the great world powers and is reported as demanding six votes. Italy has put in a claim for two more votes for the colonies of Tripolitania and Cyrenata which she acquired since 1912.

Irish Demand Vote

The Irish Free State has been invited to the conference and is also understood to demand a vote. The other British dominions have votes included in the British six and the question facing the conference is whether to allow the Irish application and thereby constitute a possible British voting block of seven votes. It has been suggested that Great Britain relinquish the vote for India and substitute therefore of the Irish Free State.

The Russian votes will be absent owing to the fact that the Soviet Union was not invited to participate to the conference because its government has not been recognized by Washington. For the same reasons Ecuador will not be present.

Secretary Hoover of the Commerce department, as head of the American and home delegation, is expected to be elected chairman of the conference. Other American delegates are Stephen B. Davis of the National Utilities association; Senators Watson of Indiana and Smith of South Carolina; Representative White of Maine; Rear Admiral W. H. G. Bullard, Chairman of the federal radio commission; and William R. Castle, Jr., Assistant Secretary of State. Many experts from the army navy and commerce departments will be at hand to advise on technical matters.

American Representatives

The American independent radio concerns which so far have expressed their intention of sending representatives to the conference include the All America Cables; The American Radio Relay league; the American Railway association; the American Telephone and Telegraph company; and the Chamber of Commerce of the United States.

Among representatives of foreign concerns appointed to attend the conference is Senator Guglielmo Marconi, inventor of wireless, who has been delegated by the British

Marconi companies.

The procedure at the conference will be the usual one of appointment of committees to consider all questions before discussion by plenary sessions of the congress. Only national delegates will have voting power, but representatives of private concerns will be allowed to file projects and intervene in the discussions. French has always been so far the official language for these conferences, but efforts have been afoot to establish English as a second official language.

On the whole about 194 delegates are expected from contracting countries, making a total of some 400 visitors, counting about 150 technical experts and 90 representatives from independent commercial radio concerns.

The conference will have the help and counsel of Henri L. Etienne, director of the International Radiotelegraphic Bureau of Berne, the permanent clearing house for all radio information, with whom projects and amendments for this convention have been filed by all countries since 1912.

The German police dog of J. D. Sugg's that was stolen last Saturday has been recovered by W. J. Turpin of the I. P. A. Theft association.
