WOMAN, GIRL ARE BRUISED

Youth Is Run Over By Trailer—Shook Off Truck

Mrs. S. A. English, of Joplin, Mo., received severe facial injuries, a bruised arm, and fractured leg, and her grown daughter, Eva May, was cut about the face and severely bruised when their car turned over on the Miami road Monday afternoon about 8 miles from Pampa. They were brought to the Pampa hospital.

Mrs. English, her daughter, and 9-year old grandson were on their way to Pampa from Joplin when the car struck loose dirt on the road and the driver lost control. The child was not injured in the accident.

R. E. Leslie, a son of Mrs. English, is working for an oil company in the Pampa field.

J. W. Brannen, 22 years old, an employee of the Skelly Oil company, received severe abdominal injuries this week when he was run over by the trailer of a truck.

Brannen was riding on the truck when it passed over a pipe. The jar caused the young man to lose his balance. He fell off the truck and one of the wheels of the trailer passed over him. He was rushed to the hospital in an ambulance, and is expected to recover.

Paving Company To Move Soon Unless Given More Work

The Stackey Construction company expects to finish its contract in Pampa by June 30, and unless an extension of contract is made by the city for more paving the company will move its equipment to another job, which will probably be in Dalhart.

Center and Double Parking Will Be Stopped Hereafter

The city ordinance on parking is to be enforced by local officers on a motion by the city council. The motion reads that all center and double parking must be discontinued at once or a fine will be imposed. A sign has been placed in the center of the intersection of Cuyler street and Foster avenue, "No Center or Double Parking."

Center and Double Parking Will Be Stopped Hereafter

Several motorists report having fenders on their cars damaged by motorists backing out from the curb and center of the streets. The practice also held up traffic because when a car backed out all the cars on the street had to stop while the car maneuvered from the curb and started on the straight-away.

Criminal Docket of District Court Will Be Opened Monday

With about 90 civil suits on the docket for this week, district court is trying to settle as many cases as possible before the end of the week. A number of settlements have been made out of court, and a few others have been compromised before going to the jury. Most of the suits are on notes or titles.

Full-Time Fire Employees To Be Stationed At Hall

What to do with the new truck, and getting men to operate it in case of fires, are problems facing the city council.

George Latus was employed temporarily last night to take care of the truck. It is planned to employ a fireman and an assistant, the latter to sleep at the station at night. The fireman, it was suggested, might have light clerical duties in connection with his fire duties. However, this plan is not looked upon with favor by the state fire commission, and it might result in a higher key rate.

company at Amarillo, has been named local manager and is expected to arrive in Pampa today.

Mr. Hamnett states that he hopes to announce the location in the next day or two and that the store will open for business some time next week. The Maytag company is the largest manufacturer of electric washing machines in the world and according to Mr. Hamnett actually makes one-half of the machine manufactured in the United States, the other half being made by about 166 other companies. Aside from the inherent worth of the product, Mr. Hamnett says he believes that a great part of the success of the Maytag company is due to the fact that it is the seventh largest newspaper advertiser in the country.

Maytag Company To Open Shop In Pampa Soon

G. S. Hamnett, district manager of the Maytag Washing Machine Company, with headquarters at Dallas, arrived in Pampa Tuesday and is negotiating for a building in which to open an exclusive electric washing machine store here, to be known as the Maytag shop.

Travels 700 Miles To Meet Classmates

Miss Agnes Roberts, Pampa girl who is making a fine reputation in home demonstration work in Crockett county, recently made a trip of more than 700 miles to attend the reunion of her graduating class at the West Texas State Teachers college of Canyon. She spent a short time in Pampa before returning to her work.

Heavier Fines Are Suggested To City Officers

Heavier fines, and more discrimination in filing of charges was suggested to local officers Monday night at the city council.

Another, Special Session Will Be Called by Moody

AUSTIN, June 9. — Governor Moody expects to call the Legislature for another session in September 1, or shortly afterward, it was learned definitely today.

Heavier Fines Are Suggested To City Officers

Instead of making several charges and small fines, fewer charges and bigger fines were recommended by F. E. Saulsbury, police commissioner of the council. This procedure, it was pointed out, will bring more money into the city treasury.

It also suggested that "home brew" offenses should be charged according to prohibition laws, not "vaged" as has been done occasionally heretofore.

GOVERNMENT STANDARDS INSURE THAT NEW BROOMS SWEEP CLEAN

WICHITA, Kans. (AP)—"A new broom sweeps clean" was an adage which circulated widely and was accepted without question until the government began an investigation and found that some new brooms did not sweep clean. The result was the establishment of a system of grades for broom corn and after being in operation for a year, the system makes it possible for one to quote the adage with more assurance.

Seven grades were established by the government to fill a long felt need for standardization in the industry. Classification is based on the weight of seed and the color, the texture and length of the straw. Since the grading was begun thousands of car loads of broom corn have been inspected and graded.

Travels 700 Miles To Meet Classmates

Miss Agnes Roberts, Pampa girl who is making a fine reputation in home demonstration work in Crockett county, recently made a trip of more than 700 miles to attend the reunion of her graduating class at the West Texas State Teachers college of Canyon. She spent a short time in Pampa before returning to her work.

Lions To Sponsor Boys Work Here

Pampa Lions intend to take a very active part in boys work in the city, it was indicated at yesterday's luncheon.

Lion Curry made a talk on the possibilities here. The Rotary club has similar plans.

Congregationalists Asked to Meet Organizer Here

Lewis N. Tillson, a student at the Congregational college at Bangor, Maine, is in the city as a field worker of that denomination and may establish a church here.

CATTLEMAN DIES GREENVILLE, June 9. (AP)— Riley Green, widely known Hunt county cattleman, died in a Paris hospital today following a brief illness.

Individual Lions pledged their support to Pampa hospital, recognized as a distinct community asset. The hospital is in need of immediate funds to buy furniture.

Material for Gas Line Is Arriving Daily In Pampa

Several car loads of 20-inch pipe have arrived in Pampa and is now being hauled to the Empire Gas and Fuel company's location on the C. C. Dodd property, about two miles from Pampa on the LeFors road where a booster station is to be erected. More pipe is arriving daily on the Santa Fe.

Material is also being placed on the ground for the large booster station and residences to be erected immediately. This booster station will be the center of activity in the Pampa field for the company's gas line to run from here to Kansas.

WORLEY HOME IS DESTROYED

Lightning Strikes House During Heavy Rain In Vicinity

The home of Mrs. P. A. Worley on section 60, block 3, burned to the ground Sunday when struck by lightning.

Mrs. Worley heard the lightning strike, but thought it at some distance. When the rain ceased she went outside to see about her chickens, and noticed smoke rising from the roof.

People of Wilcox, who saw the flames before Mrs. Worley did, helped to save most of the furniture. There was no insurance. The house is being rebuilt.

A heavy downpour of rain Sunday morning brought the heaviest deluge of many weeks, flooding the streets and making travel difficult for motor vehicles for several hours.

The rainfall in Pampa was approximately two inches. This was near the average for a large part of the Panhandle, according to reports from many points.

Late wheat will be benefited as the grain fills out, it is believed, and row crops greatly needed the moisture.

Promising Wildcats Top Pay—Fishing Is Present Activity

Most of the casing dropped in the Riley-Heck No. 1 Mrs. J. M. Hopkins, section 68, block 3, has been removed by the drillers.

The well had a showing of oil at 3,020 feet. There the bradhead parted, dropping a long string of 6-inch casing. Drillers have been fishing for several weeks.

The Rensaul Petroleum company's No. 1 Mark Huselby, section 55, block 25 Gray county, has a fishing job at 2,470 feet with a showing of oil. It is expected the well will be drilled in sometime during the week.

MOORE FAMILY GATHERS FOR REUNION IN CITY

A reunion of several members of the family of Mr. and Mrs. D. C. Moore was held here this week.

Among those present were Morris Moore, who has returned from a four-year stay in Alaska gold fields; Mr. and Mrs. Zeb Moore of Memphis; and Mr. and Mrs. Horschler of Hedley.

ENGLAND AND WALES HAVE 6,000,000 CATTLE

LONDON (AP)—A new record was established in 1926 in the number of cattle in England and Wales, according to agricultural statistics issued by the ministry of agriculture and fisheries, which show a total of 6,252,000, an increase of 26,000 over 1917, the previous highest. This is the fifth year in succession to show an increase.

E. L. MASTERS IS BURNED AT EMPIRE WELL

Body Nearly Cremated
In Gas Explosion
Wednesday

BLAST ORIGIN YET UNKNOWN

Tex Thornton Closes Valve To Stop Flames

Earl Lee Masters, tool dresser, was burned to death about 2 o'clock Wednesday when the Empire No. 1 W. C. Archer, located about 5 1-2 miles northwest of Pampa, section 174, caught fire. The well is still burning, shooting flames about 25 feet high.

Masters had been agitating the well, and was changing the tools when the well exploded and burned the rig down. His body, at present time, is at a farm house. His father is said to live in Borger.

The Empire well came in about 10 days ago for 200 barrels, after being drilled deeper from 3,302 feet. It is in the southwest corner of the section.

Tex Thornton put out the fire in the evening.

The body of Earl Lee Masters, tool dresser who was burned to death Wednesday afternoon in an explosion of the Empire company's No. 1 W. C. Archer, lies at the G. C. Malone funeral home pending arrival of his parents, who, according to officials of the company, have been located and notified. The young man came here from Eureka, Kans.

Masters was perhaps instantly killed, being "thrown" outside the rig by the force of the blast. He was badly burned, and lay upon his back for several minutes while smoke and flames swept over the body as the rig house burned. Falling timber struck the body and turned it over before workmen could drag it away. The feet were burned off, and the corpse is virtually dismembered.

The accident has not been explained. Drillers said the boiler had been out for some time, and the method of ignition cannot be fathomed. Masters was known as a careful man, and the possibility that he might have matches in a pocket is discounted.

Tex Thornton, famous torpedo expert, believes, that static electricity may be responsible for the sparks which have fired several wells in the Panhandle recently. Static has been noticeably stronger in recent weeks, particularly around metal where there is motion. Masters had removed the tools and was closing the bradhead when the explosion occurred.

Hundreds of Pampa people rushed to the burning well after reading of the fire in the Daily News. There was nothing spectacular about the well, although the flames reached out 30 feet or more in the brisk wind. Thornton was delayed several hours when a pump failed. The well shooter made the trip from Amarillo in 55 minutes, making better than a mile a minute most of the way and leaving a pursuing traffic cop far in the rear. He understood that the body was still in the flames.

PAVING—WILL IT BE EXTENDED IMMEDIATELY?

Will Pampa's paving be extended now, through action of the city council upon the petitions already in, or will the paving equipment be moved and delays encountered at some later date, through the necessity of bringing in material and machinery?

This question is being asked many times daily by local people, who realize that with the paving crew and machines on the ground the work could be continued with little delay. Immediate calls for bids would rush the work by many weeks, since the present contractors, favored by being on the ground, would likely be able to bid low for the new work.

Warrants, which could be issued for the work, have been contracted for by bond brokers at a good price, and the paving could be extended now without difficulty. If the project is delayed to include it in a bond issue, a long delay will result through no absolute necessity.

Calling of a big bond issue to refund outstanding warrants, extend the water mains, and build new sewer lines and disposal plants will be a matter for study and debates, as, indeed, is already resulting. To tie Pampa's paving up with these more complex issues, it appears to the average person, will occasion needless delay.

With the people who expect to pay the major portion of the expense impatient for improved streets, it will be regrettable if several months pass without a continuation of this public improvement program.

TWINKLES

Life is getting to be so much on the installment plan that people get their scandals that way.

Night life is so popular that they are going to have the eclipses by moonlight this summer.

Some Pampa wives will resent competition in searching for hubby's pocket change.

Most Panhandle towns are wishing for water, in the form of rain, but Sweetwater has not moisture for more than eating and bathing, if press reports are true. That little city has a big reservoir, but it won't rain in it any more.

We note by the press that a lot of seniors graduated to become freshmen, in matrimony.

It seems like everyone but the drillers are too busy to go fishing.

WHAT MOVEMENTS ARE MOST TO BE WATCHED?

George Horace Lorimer, famous editor of the Saturday Evening Post, broke away from his usually serene attitude recently to point out 10 movements which he believes are not in line with the best interests of the United States.

These projects are backed by minorities, which are energetic, although small. Lorimer's 10 "ill-advised" movements are:

To abandon our citizens and permit the confiscation of their property in Mexico.

To withdraw from the Philippines and abandon our constructive program there.

To withdraw from Nicaragua and set up a government unfriendly to the United States.

To permit any of the southern republics to develop revolution and chaos regardless of our interest in the Panama Canal.

To get out of China and leave Americans to their fate.

To get into Russia and let down the bars of their propagandists.

To kill our immigration laws and give us a flood of undesirable immigrants.

To cancel the war debts.

To substitute pink tea socialism for American patriotism.

To hamstring our army and navy in the name of peace.

Advocates of the above doctrines cannot, however, be grouped together, for that would put the college professor with the alien and the anarchist, the unnaturalized radical with the foreign-born patriot, the Rotarian with Fascist, conservative pacifist with the Soviet destructionist. There are differences of opinion—differences which are derived from widely divergent sources. It takes a fine sense of discrimination to pick out those who adhere to one or more of the above beliefs and who have honest, patriotic intentions.

Martin W. Littleton, speaking before a group of patriotic

societies in New York recently, essayed to pick out certain brands of undesirable doctrines and their advocates. For advocating government ownership (Socialistic control) he condemned Senators Borah, Norris, Frazier, Howell and Congressman Huddleston. Closely bordering upon Sovietized beliefs are, he thinks, Senators Johnson, Harris, Norbeck Nye and Congressman Swing, in addition to Governor Pinchot. Abetting influence is represented by such "radicals" as head various Communist groups, Socialist organizations, Civil Liberties unions, and industrial fraternities.

Those who believe in leaving all things to take their own way may find something to think about in the above facts.

Why should Americans be so solicitous that freedom be granted to the Filipinos when they themselves hardly know what it means any more? Muskogee Times-Democrat.

PRESS FORUM

Opportunities, resources and possibilities in Texas—its laws, its industries, climatic conditions, transportation facilities and other details about which information may be lacking or impressions erroneous, are to be presented, first-hand and through personal contact to the people of the north and east United States late this month.

Texas is to run an all-special train, with some 150 representatives, on a two-weeks' tour of all the large cities north and east of Kansas City. It will be Texas' greatest publicity venture, and already the event is receiving notice in the newspapers and magazines of the east.

The Manufacturers Record, published in Baltimore and which is considered the largest and most reliable trade and general business journal in America, has a full-page story in its current issue about the plans of the Texans.

"It is asserted that the de-

sire on the part of the Texans is to demonstrate that the 1927 Lone Star State business man is a fellow who trades on the square, who talks as straight as his forebears shot, and who rides hard on business ethics as religiously as his grandfather rounded up the cattle on a thousand hills," says the Manufacturers Record.

Continuing, it observes: "Headed by Gov. Dan Moody, a party of 150 representatives, latter-day Texans, is to travel east and north in June, visiting

Baltimore on July 1: At each point a stop of one day or more will be made. Through previous arrangements with local commercial organizations interested groups in several cities are to be brought in contact with the Texans so they may learn what manner of man the latter-day Texan has become, and ascertain also whatever particular details as to the state may be desired."

Indications are that the east is awaiting with interest the visit of the Texans, and some of the residents of Baltimore and other cities may be surprised when the good-will representatives from the Lone Star state arrive, as the following paragraph from the Baltimore Journal hints:

"In the business curriculum of today's Texas, it is asserted, there is included all the activities with which the Texas of

old was associated, with many new lines of endeavor added. But from the garb of the modern native son of Texas, there has been eliminated the two-gallon hat, the high-heeled boots and the six-shooter, together with all the objectionable features that went with them.

"It is particularly stressed, that the tour shall not be anything in the way of a "hip-hip-hooray" affair, but strictly a good will visit, with the party made up of the most representative citizens of every section of Texas. The entire program is to be dignified and impressive, and in keeping with the serious objects of the trip.—Amarillo News.

The Mississippi river is the only influence that can make the south wet. — Bartlesville Enterprise.

Judge Baldwin Cites Records On Old Fort Elliott

A brief history of Fort Elliott, with a tribute to its founders, was given at the Mobeetie celebration by Judge Alexander Baldwin of Pampa.

This is the historic town of the Panhandle of Texas. It is the oldest town in this section. This is the fifty-second anniversary of the establishment of the Army post, known as Fort Elliott.

The records of the Adjutant General's office of the War Department shows that the selection of this site was made by Major Henry Bankhead, and his command, on the first day of June, 1875, and the fort was established on the 5th day of June, 1875, and named in honor of Major Joel H. Elliott, of the seventh cavalry, and that Major Henry Bankhead was the first commander of the Fort.

It was the site of war until 1890, when it was abandoned. Here rested the protection from the savage and marauding Indians, supposedly in numbers of 2,000 or 3,000, for the Texas Panhandle, Eastern New Mexico, and Western Oklahoma, and this area covered now the section comprising the twenty-six counties of the Panhandle country.

Here, around the camp fires, many imaginary battles were fought. Here the stories of the battle of Adobe Walls, just a year prior to the establishment of this Fort, wherein 28 men and one woman fought so valiantly, so bravely, and came out victors, against something like seven hundred Indian Warriors, making another "Alamo" of the Panhandle of Texas.

Here have been told the stories of the pioneers, settlers, speculators, soldiers and gamblers, who once came to this fort, and there are many others yet to be told.

Here no marble shaft marks the location of this historic post, bearing the names of the commanders and soldiers, who established it, but through the efforts of Mayor Reid of Pampa, and other good citizens of this county, and other counties of this section, an idea was conceived far greater than the erection of this monument to keep green the memories of the early history of this post, by securing and naming the highway, bearing the name of Fort Elliott, reaching from the beautiful little Elk City, in the great state of Oklahoma, through this great county on through the thriving city of Pampa, an through the metropolis of this Panhandle country; Amarillo, on across Texas to the City of El Paso, on the rolling Rio Grande, and clearing made to the beautiful city of the world, Old Mexico City.

So the passing tourists, as they drive over this great Highway, will keep in memory the founding of this, Fort Elliott.

There is a sad picture: though here today, we saw the faces to greet us who viewed the selection and establishment of this post. Major Elliott was killed in the battle of the Washita, Major Henry Bankhead has long since passed to his reward; General McKinzie, and the others all are gone, but while they are not here in person, they are here in spirit, their lives and actions, we tell to our children.

These men and women who came to this section in early days, as we said were settlers, promoters, pioneers and speculators, and to my mind no tribute can be paid than any he is a speculator, for you know, the meaning of words change, as we all know that the United States of America has been and still is the most stupendous speculation in all the world. Americans are natural born speculators.

At the time of the establishment of this post, this section of Texas was an unsettled country, except a few army posts, trading posts, straggling settlers and scattered communities, and today these twenty-six counties of the Panhandle make up an empire within themselves, and are yet only partially developed.

Such men as J. S. Winn, T. D. Hobart, Henry Lovett, Mark Huselby, W. L. Mathers, and so many others, too numerous to mention, came and dared the dangers of this frontier to drive cattle, to farm, ranch, build railroads, public highways, school buildings, and churches, and other things that develop this great state of ours.

At the time of building and maintaining this fort, this was a wilderness country, the things here then are here no more; the savage Indian who gloried in gore, and laughed his fiendish laugh as he killed and scalped his victims is no more; the great herds of cattle and horses which grazed the plains are no more, but in their stead have risen towns, villages and cities; hard surfaced highways that stretch ribbonlike across the country; great wheat fields, and low like the sea, great cot-

OUT OUR WAY

—By Williams

Western Heroes Leave Legends Amid Coolidge Vacation Scenes

(By The Associated Press.) DEADWOOD, S. D.—The lurid days when Deadwood was the wild west capital of the world and the Black Hills was its empire are still fresh and dear to natives of western South Dakota among whom President Coolidge spends his summer vacation.

Less than a half century ago, and within easy memory of many old-timers now living, Wild Bill Hickok reigned as sheriff, Deadwood Dick was a scout, pony express rider and dime novel hero, and Calamity Jane was the bolsterous sweetheart of the camp.

Today Wild Bill and Calamity Jane lie buried in a mountain-side cemetery near Deadwood, and Deadwood Dick, diverted to calmer pursuits since the winning of the west, is a rancher near the city under his Christian name of Richard Clarke.

Seventy-five miles north of the state game lodge, the president's summer white house, Deadwood is today a quiet town of some 5,000 inhabitants, with only a few of the old landmarks surviving to hint the wickedness of its heyday.

But when gold was found in the Black Hills in 1876 and when Deadwood was found to be the site of the richest ore-loads, it became overnight the habitat of all the gamblers and adventurers who followed the prospectors into the Hills. Saloons, gambling dens and dance halls became as numerous as trading posts along the crooked streets at the bottom of

Deadwood Gulch. Into this unrestrained Sodom came Wild Bill Hickok, native of northern Illinois, cowboy and gunman, as frontier sheriff. He taught the gospel of law and order but not until he had numbered by the dozens the notches on his gun, and when he finally met death it was at the hands of a foe who, despairing of beating him in a fair fight, shot him in the back.

Calamity Jane, orphan daughter of a soldier at Fort D. A. Russell in Wyoming, was an early comer to the Hills when gold was found. Uncouth and immoral, fond of riding and shooting, she became the toast of Deadwood. Scorning a woman's share in the life of the Hills, she often garbed herself as a man and drove one of the ox teams which plied between Deadwood and Pierre, S. D., the nearest railroad point. But a scarlet fever scourge called her feminine nature to the fore, and she conducted a pest house and cared for sufferers when no nurses could be found.

In one of his own appointments, President Coolidge has linked the present with this past. When last year he named E. L. Senn, as prohibition administrator of South Dakota, recognized a reformer who won his first spurs in Deadwood, as editor of a weekly paper there, Senn waged the fight which "cleaned up" Deadwood after the frontier days had waned.

Comet and Eclipse Will Give Scientists Plenty of Interest For Work During Month of June

By ISRAEL KLEIN, Science Editor, NEA Service. June will be an auspicious month for science and superstition.

The sun will be darkened, the moon will be obliterated, and a great ball of fire, with an enormous tail, will appear to threaten us in the sky.

Years ago special prayers went up, people shut themselves in and others even committed suicide under the awesome spell of any of these events. Now, we prepare differently for these as great spectacles of scientific significance.

The darkening of the sun and the obliteration of the moon are eclipses of these great bodies in space, and the great ball of fire we know now as a comet.

The first event of the three to occur this month is the eclipse of the moon. The earth will come between the sun and the moon, completely shutting off the direct sunlight from our satellite. This will occur in the night of June 14-15, and will be seen all over the western hemisphere.

First the moon will cut through the outer shadow, or penumbra, of the earth and will slowly cross into the umbra or dark shadow, which it will reach at 1:42 a. m. eastern time, June 15. For the next hour and a half the moon's eclipse will increase until it will be totally eclipsed at 3:12. The totality will last 21 minutes, after which the moon will move slowly out of the earth's shadow, only to be obstructed from our view by the coming of dawn.

Comet Comes Next. A week later the day becomes the longest of the year, with the beginning of summer, at 5:22 on the morning of June 22.

Almost at the same time, if we happen to be up and point a weak-lensed telescope toward the rising sun, we may be able to detect a stranger in the sky, coming toward us. It is the Pons-Winnecke comet, discovered in 1819 by a doorkeeper at Marseilles and since then noticed every six years.

Comets are a strange lot of heavenly bodies, each a collection of fiery meteors and dust particles grouped together by some sort of electric attraction and whirling around the sun at an enormous speed and over a huge ellipse, or flat circle. Some of them have tails of thin gas, so thin that we on earth don't feel their presence, even when we might be passing right through them.

The Pons-Winnecke comet is approaching us at the rate of 24 miles a second, faster than the earth is traveling, and on June 26 it will come nearest to us—a distance of 3,600,000 miles.

If we stay up until 3 in the morn-

ing of June 26, eastern time, we may see the comet perhaps without the aid of a telescope, but barely visible in the sky almost directly above us. It will be moving southeast almost as fast as the moon seems to move, but the presence of a waning moon at the same time may draw out the view of the comet.

Sun's Eclipse June 29. Of far more importance to science, although invisible in the United States, will be the sun's eclipse on the morning of June 29. As the sun rises earlier that morning, the moon will get between it and the earth so as to cast a circular shadow 30 miles in diameter, moving northeast across the earth.

This shadow will start a little west of the Bay of Biscay, cross the Atlantic and pass over the populous section of Lancashire in England.

It will proceed along the length of Norway, the north of Sweden and Lapland and over the desolate region of the Arctic ocean north of the Siberian coast. It will go on over the eastern end of Siberia and leave the earth at sunset at the tip of Alaska.

Scientists have been preparing for this event for a while year. Some American scientists are going to points in Norway to set up instruments by which they may study the sun's corona, the great prominences of fire that can be seen favorably only when the moon covers the disk of the sun. They want to know what materials form it and exactly how.

Why be a Tire nurse?

When a tire gets old and weak, there's a choice of two things for the wise motorist to do—

(1) Bring it in and let us see if our repair methods can put new vim and vigor into it

(2) Retire it on a pension and let us put on a sturdy new Goodrich Silver-town.

We'll save you money on either operation.

JACK GATTON'S SERVICE MAGNOLIA FILLING STATION

68—Phones—345

For this long preparation the scientists will have no longer than 50 seconds to study this phenomenon. That's the longest the eclipse will last in totality. In England, where British scientists will study the eclipse, it will last only 22 seconds. But enough material, it is hoped, will be gained to reward the scientists for their long preparations. Hoping that it's a clear day!

CITATION BY PUBLICATION
No. 110
Fray Pillard vs. Clara Pillard, in the District Court, Gray county, Texas.

THE STATE OF TEXAS,
To the Sheriff or any Constable of Gray County—Greeting:

You are hereby commanded, that by making publication of this Citation in some newspaper published in the County of Gray once in each week for four consecutive weeks previous to the return day hereof, you summon Clara Pillard, whose residence is unknown, to be and appear at the next regular term of the District Court of Gray County, to be holden at the Court House thereof, in the City of LeFors, on the first Monday in June, A. D., 1927, the same being the 6th day of June, A. D., 1927, then and there to answer a petition filed in said Court on the 18th day of May, A. D., 1927, in a suit, numbered on the Docket of said Court, No. 110, wherein Fray Pillard is plaintiff and Clara Pillard is defendant; the nature of plaintiff's demand being substantially, as follows, to-wit: suit for divorce, plaintiff alleges that plaintiff and defendant were legally married on the 15th day of Nov., 1915, that during the month of February, 1922, abandoned and deserted plaintiff without cause or provocation, and has ever since remained wholly away from plaintiff; plaintiff prays for judgment dissolving the marriage contract.

Herein fast not, but have you before said Court on the said day of next term thereof this writ with your return thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at office in the City of LeFors, Texas, this 17th day of May, A. D., 1927.

(WITNESS) CHARLIE THUT
Clerk of 84th District Court in and for Gray County, Texas. (W-7-4t)

THE STATE OF TEXAS
To the Sheriff or any Constable of Gray County—Greeting:

You are hereby commanded to cause the following notice to be published in a newspaper of general circulation, which has been continuously and regularly published for a period of not less than one

Urges Harness That Fits

A PROPER FIT FOR A HORSE'S COLLAR, THE HAND INDICATING THE SPACE ALLOWED AT THE BOTTOM

"Hand-me-downs" may be all right for the farmer's children, but his horses should have at least one non-transferable outfit a piece and tailored to fit.

This advice comes from federal biologists, who add that special care should be given the fitting of the horse's collar. To fit, they say, there should be barely room for the flat hand to pass between the collar and the windpipe and for the fingertips to pass between the shoulder on the side of the neck just above the shoulder points.

year preceding the date of this notice in the County of Gray, State of Texas, and you shall cause said notice to be printed at least once a week for the period of ten days, exclusive of the first day of publication, before the return day thereof.

STATE OF TEXAS,
COUNTY OF GRAY
To all Persons Interested in the Estate of D. H. McPeek, Deceased:

Mattie McPeek has filed in the County Court of Gray County, Texas, an application for the probate of the last will and testament of said D. H. McPeek, deceased, filed with said application, and for letters testamentary of the estate of D. H. McPeek, deceased, which will be heard at the next term of said court commencing on the 3rd Monday in May, A. D., 1927, the same being the 16th day of May, 1927, at the courthouse thereof, in LeFors, Texas, at which time all persons interested in said estate may appear and contest said application, should they desire to do so.

Herein fast not, but have you before said court on the said first day of the next term thereof this writ, with your return thereon, showing how you have executed the same.

Given under my hand and seal of said court at my office in LeFors, Texas, this 3rd day of May, A. D., 1927.

(SEAL) CHARLIE THUT,
County Clerk, Gray County, Texas. W-10-11

Narrow collars and wide ones press and rub the shoulders, it is claimed, and both should be avoided as should be the use of sweat pads. The latter, it is explained, are hot, wrinkle easily, have surfaces hard to keep clean, and are the frequent cause of sore shoulders.

Hames should be drawn snugly to the collar, the biologists say, and the point of draft should be about one-third of the distance above and between the points of the shoulders and the withers.

Teachers Employed For Most Places In Pampa Schools

With a few exceptions, the faculty members for the next term of Pampa high school have been employed.

Remaining positions, which include the principalship, teacher of commercial subjects, and a few grade instructors, will be employed soon after the return of Supt. R. C. Campbell, who is expected home in the next few days.

Fraser Taylor of Oklahoma City has been elected teacher of history. He is a University of Oklahoma man, has specialized in political science, and has written several pamphlets on his research at the university.

Addie Lee Smith, Canyon Teachers college graduate, has been made assistant in English. Among the new teachers for the grades are Julia Mae Barnhart and Wilma Chapman, Pampa girls who have had teacher training work at Canyon.

Never throw the carcasses of fowls that died of tuberculosis where chickens can pick at them. There is much greater danger of severe infection if chickens eat the tubercular organs of a dead fowl than from any other source. Neither should the carcasses be thrown to hogs, as they are susceptible to avian tuberculosis. Either burn or bury at a good depth all such diseased carcasses.

C. H. FISHER TO RETIRE JULY 1 UNDER PLANS

Declines to Accept \$150 Remuneration Per Month

CITY MARSHALL TO GET \$165

Engineer's Drawings For Improvements Are Discussed

Resignation of C. H. Fisher as city secretary followed immediately upon adoption of a new salary schedule for municipal employes Monday night.

The committee on salaries, after holding a separate session, brought in a schedule calling for \$150 per month for the secretary and \$100 for the assistant. Mr. Fisher immediately stated his unwillingness to serve at the salary suggested and adopted.

His resignation was accepted, upon agreement to remain in office until July 1 at the temporary salary of \$225 per month. He expressed a desire to help his successor learn the duties of the office. His services are much needed at this time because of the installation of a new bookkeeping system, entries in which are being made as of January 1.

Andrews to Get \$165
City Marshall John Andrews will be paid \$165 per month and allowed to keep the pound fees. Policemen will be paid \$125 per month. Mr. Andrews said that the pound is not self-supporting and intimated that while he did not wish to receive fees, the salary was low in proportion to the demands of the office, which make him subject to calls at all hours.

The water superintendent's salary already set, is \$200 per month, and his two assistants receive \$125 per month each. Salaries for the mayor and city attorney were not named. The council had previously adopted the salary plan, but the salary schedule was not returned until last night, when councilmen Murfee, Rose, Saulsbury, and Lewis retired to make up the list.

After the city hall session, the council adjourned to the office of the city engineer to study maps and drawings of proposed water and sewer extension. The discussion was informal, and opinions in regard to the advisability of calling a bond issue for improvements and to refund the outstanding warrants are at variance.

Mr. Fisher, the retiring secretary, is an Ada, Okla., man and came to Pampa January 1 to take over the work of M. A. Turner, who was employed during the boom days last fall. He has been in Texas for about fifteen years.

His activities have included those

RISKS HIS LIFE ON \$25,000 SPREE!

"Death Valley Scotty" Hits Pay Dirt and Hires Train To Go From Los Angeles to Chicago in 38 Hours

BY DAN THOMAS
NEA Service Writer.

LOS ANGELES, Cal., June 7. — "Death Valley Scotty" is coming down from the mountains once more, a wild gleam in his eyes and an unquenchable desire for an old-time bender in his breast.

"Death Valley Scotty," otherwise known as Walter Scott, is one of the last of the old school of prospectors.

He lives in the desolate crags up behind the famous Death Valley, where he has a modest ranch that serves as his base of operations. Civilization sees him only at very rare intervals; most of his time is spent on secret prospecting trips through the wilds of eastern California and southwestern Nevada, where, from time to time, he makes a fabulous strike.

Out for a Thrill.

At such times he shakes off his isolation and heads for the flesh pots of Egypt, while all the west marvels, agape. This is one of those times.

Scott proposes to travel from Los Angeles to Chicago on a special train in less time than any other train ever covered the distance. He has chartered a Santa Fe train, consisting of locomotive, baggage car, diner and Pullman and insists the trip be made in exactly 38 hours, 25 hours less than the fastest time on record.

The trip will start at 2 p. m. on July 4. At 4 in the morning of July 6 it will reach Chicago, providing that its unheard-of speed has not caused it to leave the rails and deposit its passengers in another and more distant destination.

Railroad officials didn't want to agree to a 38-hour schedule, but Scotty held out.

"They wanted me to make the trip as fast as is safe," Scotty explained. "There's no point in doing that. It wouldn't be any fun. Why,

"Death Valley" Walter Scott

if I wanted to ride as fast as it is safe I could ride like a gentleman in one of their regular trains for

\$150." This little trip will cost Scotty \$25,000. He will ride alone, unless,

as he says, "any newspaper reporters are crazy enough to travel with me."

The distance from Los Angeles to Chicago is 2,265 miles. To cover this in 38 hours the train must average 59.6 miles an hour, including stops. This means that most of the run must be made at a speed of 90 or 100 miles an hour—or higher. Considering that more than half of the route lies over mountains where the tracks twist and turn dizzily, such a speed is pretty nearly suicidal.

"I'm not promoting anything and I'm not trying to sell anything," he says. "I'm going to make this trip just for the fun of it. Living up in the desert as I do, I have to have a little excitement once in a while."

An Epic Trip.

Some 20 years ago Scotty did the same thing. That time he made the run in a little over 44 hours, clipping nearly 24 hours off the regular schedule. That trip has become an epic among old-timers on the Santa Fe, what with Scotty's penchant for giving \$10 tips and all.

Scotty is proud of the fact that during his career he has made and spent more than \$4,000,000. He is something of a mystery, this hard-bitten old prospector. His sources of wealth are more or less secret. At times he is flat broke; but sooner or later he makes another strike and comes down to Los Angeles with his pockets bulging with \$50 bills, which he spends as if they were too hot to hold.

Just now he is said to have a platinum mine somewhere. But whatever he has, he is making money out of it—money that he will toss away on a grand and glorious fling, after which he will disappear once more into the fastness behind Death Valley, to toil and struggle until the next time.

Pecan Growers To Hold Convention In Gonzales Soon

(By The Associated Press.)

GONZALES, June 9.—Here in the Guadalupe Valley where approximately 5,000,000 pounds of pecans were harvested last year, 400 members of the Texas Pecan Grower's association are to assemble the second week in July for their annual convention.

They will be shown thousands of acres of pecan trees, some cultivated, but for the most part growing wild, from which a revenue of about \$550,000 was derived in 1926. The figures are those of W. E. Donovan, secretary manager of the Gonzales Chamber of Commerce. A check on car 103 cars. Express and less than car 103 cars. Express and less than car load shipments he figures were about 11 cars and shipments by trucks to San Antonio and other nearby points added 12 car loads or a total of 126 car loads.

The statistics were tabulated as an outstanding pecan achievement and in support of the claim that Gonzales county is one of the world's greatest pecan shipping points. But Mr. Donovan checks the harvest still more minutely to substitute the claim of approximately 5,000,000 pounds. To the crop, he figures a total of 4,059,000 pounds to which, he thinks, should be added 450,000 stored and those kept for home consumption.

"Five million pounds of pecans," Mr. Donovan exclaimed, when he arrived at the result. "Sounds unreasonable for one county to produce, yet anyone interested in disputing the statement can easily check those figures."

These pecans sold for prices running from 9 1/2 cents to as high as 60 cents per pound. Taking 11 cents as a very modest estimate for an average price, makes the revenue to Gonzales county from pecans run to about \$550,000 for the year. This revenue placed in circulation is decidedly noticeable following the depressed price of cotton.

"It may be gathered from Mr. Donovan that if the pecan is not king in Gonzales county it nevertheless stands near the throne. Car lot buyers, he said are eager to purchase the crop and are willing to pay three or four cents a pound above the outside market because of the superior quality and flavor of the nuts."

"There are thousands and thousands and thousands of acres," he

says, "of native groves along the Guadalupe and San Marcos Rivers and several smaller streams traversing the county, lined on either side with native pecan timber. For the most part these groves have been sadly neglected and allowed to grow up with other timber and underbrush. An intelligent clearing and thinning of this native timber will easily double the present yield and there are great possibilities in top-working those of the trees which are shy bearers or which bear an inferior nut."

Mr. Donovan thinks, moreover, that a considerable opportunity exists in his neighborhood, for commercial pecan orchards. "The rich valleys of the San Marcos and Guadalupe rivers," he said, "extend back from those streams for a considerable distance. When these lands were first settled, little care was taken to protect the pecan trees, in fact a great deal of this timber was destroyed in clearing the land on account of the small value of the nut. Because of this destruction Gonzales county has thousands of acres of rich valley lands that have been used for field crops for many years which are the there need be no guess work or hesitatingly about the adaptability of these lands, for nature herself had established groves here a hundred years ago."

WALPOLE TO WRITE LAKE COUNTRY NOVEL

LONDON—Hugh Walpole intends to write a novel of the Lake country of England, which has heretofore been the inspiration almost solely of poets.

The idea came to him, Walpole said during a visit to America, while he was at his country home in that part of northern England where Wadsworth, De Quincy, Southey and Coleridge lived.

The farms and homesteads are much like they were a century or more ago, he said.

Walpole is now at his Cumberland home finishing work on two forthcoming novels, "Winter's Moon" and "Jeremy at Crale," in which his boy character "Jeremy" reaches school age.

The telephone service between England and the United States is not yet secret, according to report of the committee on trans-Atlantic telephony.

Secretary Kellogg sent a note to Canada on immigration promising to ask Congress to modify laws on border crossing if they tend to strain friendly relations.

"Lazy Acres" Are Big Cost, But Can Be Utilized to Make Profit

(By The Associated Press.)

HOUSTON, June 9.—H. M. Madison, agricultural agent for the Southern Pacific lines, likens what he terms "lazy acres" in East Texas farms to the man who embezzles a living from his wife.

"It is unfortunate," he said "that lazy acres are found on almost every farm and it is amazing that they are not looked upon with disfavor. The plain truth is that lazy acres are embezzlers. They filch from the production of the active ones and go on doing it year after year."

"In the well known county of Eastern Texas there are something over 300,000 lazy acres and about half that many productive ones. It took hard cash—in connection with good vendor's lien notes—to buy these lazy acres; and the interest on the investment in each of them is likely to be around \$1.75 yearly. Besides there is tax to be paid on each of them. Some of them have to be fenced and there may be other expenses. On an average each of these lazy acres is liable to cost the owner \$2 per year and not bring in more than 50 cents as rental, leaving \$1.50 as the average amount the lazy acres filch yearly from the active ones.

No Exact Figures.

"There is no way of finding out whether these figures represent an average. The sole reason for presenting them is to indicate some method that might be used to estimate how much lazy acres are embezzling from active ones."

"Schools, good roads and other public improvements present an interesting feature of the lazy acre problem. Lazy acres are not producers and must filch their contribution from those which are productive or be loaded with mortgages which they are powerless to meet, either as to interest or principal, and at due rates recourse may be taken on active acres as forced guardians."

Can Be Used.

"If lazy acres in this particular county were yielding like the active ones, the indications are the total farm production would be more than three times what it is now. It is hard to see what this would mean for schools, roads, public improvements, banking and other interests."

"Some one has suggested the farmer has all he can do. But at least two men in the county refer-

red to have found a way to make lazy acres productive without adding to farm labor. Winter clover, certain tame grasses and vetches have been sown. Reasonable open land does not have to be plowed and no hoeing or cultivating is needed. Good livestock do the harvesting.

"If nothing more were done than to stop the lazy acres embezzling from the active ones, the effort would be worth while. But with likelihood of some profit, there is a double incentive."

St. Luke's hospital, New York, will receive between four and five million under the will of Mrs. Mary Ann Fitzgerald.

Lieut. Reistad, Norwegian flier, set out with a mechanic and herdsman to find 300 reindeer, lost in a snow storm.

Amusements

Gloria Swanson gives the greatest performance of her successful career in "The Love of Sunya," the first picture she has produced as an owner-member of the United Artists. This remarkable cinema has been proclaimed by critics and thousands of moviegoers throughout the country.

Those who go to the Crescent theatre today will see Gloria in five intensely dramatic characterizations. Her dominant personality is more attractive than ever and the excellence of her portrayals in sufficient evidence of the fact that she was supported by an enthusiastic and competent cast and staff of technicians.

Gloria Swanson, in the incarnation of an Egyptian girl centuries ago, also.

Gloria Swanson, a modern American girl, sought by a reincarnate Yogi.

Gloria Swanson, the temperamental opera singer, who shocks sophisticated Paris.

Gloria Swanson, the "bought" wife of the millionaire.

Gloria Swanson, prematurely aged school teacher, battling to support her family.

These are her characterizations and so she moves triumphantly through a picture of conflictive love, duty, and ambition. "The Love of

Sunya" is replete with romance, passion, pathos and laughter, with the mysticism of ancient Egypt.

She gives her stirring performances before unusually effective scenic compositions. Photographic and title effects never before seen on the screen emphasize Sunya's vivid drama.

Great interest and freshness is added to the cinema through the introduction of several new faces to moviegoers. John Boels, son of a Texas banker, whom Miss Swanson selected, from a New York musical comedy success, plays the role of Paul Judson, Sunya's lover. Florella Fairbanks, niece of "Doug," plays the part of Miss Swanson's sister. In his first cinema role in America, Hugh Miller, who has been starred in English and German pictures, is the Yogi.

W. P. Masters and Leonard Seither left Wednesday for Colorado Springs and will be gone two weeks.

Clyde Buchanan, of Breckenridge, spent the first part of the week here visiting friends.

Miss Pauline McKein has returned to Canyon to attend summer school.

Dr. and Mrs. W. C. Mitchell have returned from Norman, Okla., where they attended the graduation of their daughter Miss Ruth Anne Mitchell. Miss Mitchell accompanied them home.

Mrs. L. D. Oden of Longview is here visiting her son M. D. Oden.

Mrs. Riley Strickland of Amarillo is here visiting friends and relatives.

Joe Vincent has gone to Wichita Falls for a few days on business.

Mr. and Mrs. Marion Howard and children have returned from a two weeks' trip in Oklahoma.

Mrs. F. O. Wilson, who has been visiting her daughter Mrs. J. M. Dodson, has returned to her home in Calude.

Mrs. Bradford Griffin has returned from a visit with friends in Amarillo.

Oras Shields was injured Wednesday when a block fell on his foot.

Mrs. Roby Johnson is in Amarillo today.

Mr. and Mrs. C. C. Stockstill and children drove to Amarillo today.

Mr. and Mrs. C. C. Stockstill and children drove to Amarillo today.

Miss Jessie Glynn Daugherty of Dumas is the guest of Miss Julia Mae Barnhart.

John G. Hamilton, of Los Angeles, Calif., is here visiting with friends.

W. L. Davis of Amarillo spent today in LeFors as a witness in court.

Hugh French, of the Republic Insurance company of Dallas, is in the city on business.

C. W. Stowell, who underwent a nasal operation some time ago, is doing nicely.

Mr. and Mrs. H. W. Johns have moved back to Pampa to make their home. They have been living in Amarillo for the past few months.

Miss Carol Vassar Amacker, of Amarillo, and Miss Irene Angel Hunt, of Wheeler, are here visiting their aunt and uncle Mr. and Mrs. P. O. Sanders.

Mrs. P. O. Sanders Entertains Friends

Mrs. P. O. Sanders entertained a few friends with bridge at her home Wednesday afternoon. Five games were played during the afternoon and Mrs. J. D. Sugg won high prize, which was a lovely embroidered guest towel. Mrs. Walter Coffee was awarded a novelty tape measure as consolation prize while Mrs. P. B. Carlson received the cut prize, a beautiful deck of cards.

Little Misses Carol Vassar Amacker and Irene Hunt assisted the hostess in serving tuna fish salad, cheese crackers, pickles, angel food cake topped with crushed pineapple

Bow, Wow!

A new whim in the sports mode is to pin a replica of your favorite dog in chenille on the crown of your hat—black and white felt hat; white grosgrain band, white dog.

and whipped cream and iced tea to the following guests: Mesdames P. B. Carlson, A. R. Pribble, J. D. Sugg, John Studer, Raymond Harrah, Walter Coffee, Wade Duncan, H. W. Johns and P. O. Sanders.

Foals may be taught to eat at the age of two months. Ground oats, wheat bran and corn meal are good feeds. This should be supplemented with good pasture and bright, clean legume hay. The foal may be taught to eat with its dam or by the use of a "creep." Weaning ordinarily is accomplished at the age of five or six months.

FRENCH TABLE D'HOTE DISCARDS "FREE WINE"
PARIS (AP)—Paris is gradually getting drier.

Economy and not morality is reforming the wets. The low-priced table d'hote or "prix fixe" lunch or dinner has had the customary quarter of a bottle of wine eliminated from the menu.

The organization of restaurateurs and wine-merchants interested in the moderate cost meal announced its members were losing too much money on wine. They had allowed ten per cent of the total price to cover the drink, but wine has nearly doubled since last year and now the dries can drink water with a clear conscience since they won't be wasting wine for which they have paid.

The higher-priced restaurants long ago discontinued the serving of wine as a part of meals.

Wade's Cut Rate Variety Store, formerly Wade's Store, has slashed the prices. 79-2tc

Longleaf pine is a particularly valuable tree for farm woodlands in many sections of the South because of its capacity to grow in the poorest and deepest sandy types of land. It will grow on the driest of soils as well as on the wet lands, and with its dual products of timber and turpentine, often may convert such lands from an economic liability into an asset.

Hopkins Well To Be Drilled Past String of Casing

Remaining joints of casing in the Riley-Heck No. 1 Mrs. J. M. Hopkins well, section 56, block 3, has been sidetracked and the company is ready to run the 6-inch casing.

At a depth of 3,020 feet, the well is spraying considerable oil and the men are working under difficulties. The casing should be placed sometime tomorrow and drilling around the lost casing is expected to commence immediately.

Wilcox Oil and Gas company No. 27 Mrs. Phoebe Worley, section 62, block 3, came in yesterday with a steady flow of 50 barrels an hour. Pay was reached at 2,989 feet in the usual formation of the Wilcox field which is a fine sandy lime.

The LeFors Petroleum company, with a location about five blocks east from the court house, is rigging up and expects to commence drilling operations within the week.

Honolulu, Here They Come!

Miss Mildred Doran, pretty 21 year-old school teacher of Flint, Mich., aims to be the first woman to take an airplane ride across the Pacific. With Pilot Augie Peddler, she plans to fly from Flint to San Francisco to Honolulu in a giant monoplane. Peddler and Lieut. Eyer Sloniger, a friend of Lindbergh's, flipped a coin to see who should make the hop, which is being backed by William Malloska, wealthy oil man. Miss Doran is learning to be a pilot and has had considerable flying experience.

TROUSERS ROBBED BY PROWLERS

Silent Intruders Enter Two Homes, Taking More Than \$35 And Two Good Watches

There is a good fisherman in Pampa, and pants, with the contents thereof, are his objectives.

The setting of this tale is beyond midnight. The principals are soundly sleeping individuals who leave their trousers, with contents therein, within easy reach of an open door or window. The fisherman is an angler of unknown identity but proven efficiency.

It all happened Wednesday night, and there are no clues.

Mr. and Mrs. Arthur Carrollson, formerly of Pampa but recently of Borger, last night visited at the Bob Morris home here, while enroute to Colorado for the benefit of Mrs. Carrollson's health. The visitors slept in the front room, with the door open and the screen latch not fastened.

Mrs. Carrollson is a daughter of J. E. Ward.

This morning Mr. Carrollson missed his trousers, and on investigating found them in the yard, emptied of \$32 in money and a gold watch. Either the thief was very quiet about his work or, it is suspected, he fished with a wire or hook.

The scene shifts to Gray street, and at daybreak finds C. M. Carlock also searching for missing trousers. This garment also is found in the yard outside, and has been emptied of small change and a good watch. A prowler entered sometime after midnight.

In neither case were noises heard, and the thefts were confined to the searching of pants. Officers are investigating.

Oilers Win Game In Defeating Boosters By Score of 16-14

The Oilers won their first ball game of the season yesterday when they defeated a team of Pampa Boosters by a 16 to 14 score. The victory was featured by the heavy hitting of "Chief" Hearndon, who had two singles and two homers to his credit, and Ray, with a homer and two doubles.

Bob Rose played a sensational game at third for the Boosters, making several plays on sure hit balls. He was also the life of the game. White pitched nice ball for the losers but errors and poor judgment lost the game for him. After a few practices the Boosters will take another crack at the Oilers, and figure the result will be different.

Ray started the game for the Oilers but was bombarded and retired in favor of Hearndon, who was treated the same way. Neal finished the game. The Oilers are holding regular practices now and will be in good condition for the trip to McLean Sunday.

Batteries for the game: Boosters—White and Roger; Oilers—Ray, Hearndon, Neal and Middleton. Umpires, Cahill and Hunter.

Moore County Has Pool Opener Well

Talk about the day "after the oil passes" is idle in the Panhandle.

With 1,400 feet of oil in the hole, the Morton No. 1 Reeder, in the southwest of the northwest of section 191, block 3T of Moore county, a new pool is in prospect, oil men say.

After having a 70,000,000-foot gas flow, the well was tamed and drilled to 3,375 feet.

The well is in a smooth country little presaging the strata which obviously lies beneath.

The Empire Gas and Fuel company's crew had a hard day yesterday casing off 70,000,000 cubic feet of gas in the firm's No. 1 J. F. Meers, located in the northeast corner of the southeast of section 107, block 3, Gray county.

Two clamps were applied, and the well stands today with 2,000 feet of oil in the hole. A good well is expected.

Direct offsets to the Empire's Archer well, which exploded yesterday, are the Magnolia on the south, Roxana on the southwest, and Southern Exploration company on the west.

Other wells in that vicinity, one much nearer Pampa, are expected to be spudded in soon.

YEGGMEN DIG THROUGH WALL 2 FEET THICK

Robbers Escape While Night Watchman Is After Help

MANY FINGER PRINTS TAKEN

Money Was Outside Safe, Which Was Not Opened

Another chapter in the history of Panhandle bank robberies was added early this morning when the Groom State National bank was the victim of yeggmen.

Approximately \$1,200 was obtained by persons who pried open a window with a pick and crow bar and dug their way into the vault.

Sheriffs from Pampa, Panhandle, and Amarillo made an investigation, and suspects were arrested in Panhandle this morning.

The Groom night watchman saw a light in the bank about 20 minutes before 4 o'clock this morning, and, on investigating saw men inside working on a big hole they were cutting or had already made into the vault. He aroused several persons and then went back to the bank. When he arrived no one was in sight. Many Groom citizens, armed with the weapons most quickly obtainable, joined the watchman and the bank was guarded until daylight in the belief that the robbers might be inside the vault.

Officers who went inside proved that the intruders had escaped while the watchman had gone for help. A finger-print expert of Amarillo took many prints today. The robbers obtained the haul after digging through a concrete wall 2 feet thick. They made the aperture near the door, and although they did not get into the safe, they found \$1,200 in coin trays, representing funds taken in after the safe was locked.

The yeggmens left a bar and a pick behind. They stole these from a railroad section house earlier in the evening.

According to I. C. Ensell, bank cashier, in a telephone conversation with the Pampa Daily News, suspicious characters are recalled to have been seen in Groom a few days ago.

No posess were formed, but officers in neighboring towns were notified. Groom is a small town about 30 miles south-west of Pampa.

Kills Self After Scaring Guests In Hotel Near Houston

HOUSTON, June 9.—J. J. Freeman, 33 years old, owner of a jewelry store at Baytown, near Houston, shot and killed himself today in a lobby of a hotel there after firing several shots at hotel guests and creating a near panic.

According to officials of the hotel, Freeman had brooded in his room for several days.

Send Lindbergh Air Mail Greeting

You may not be able to be present in person at the national reception for Captain Charles Lindbergh at Washington, but for 10 cents you may help make this reception the most impressive in history by sending him a personal expression of appreciation for his great exploit.

And of course the message would be sent by airplane, via the service in which he served for several years. Uncle Sam's post office department has arranged the details. Such mail should be addressed:

Capt. Charles A. Lindbergh, Care Postmaster-General, Washington, D. C. It should carry the air mail postage, which is 10 cents per half ounce. The envelopes, marked "Via Air Mail Only", may be placed in any postoffice box.

Former Pampa Man Marries In Claude

Chester Carr, former resident of Pampa, who has been residing in Claude for several years, was united in marriage Sunday to Miss Fay Rogers at her home in Claude. The ceremony was performed by Rev. Hitchcock of the Methodist church.

Mrs. Carr was a teacher of music in the College of Music at Amarillo. Mr. Carr has charge of the Pierce Oil company at Claude and has many friends in Pampa.

The young couple left for a honeymoon trip to Amarillo, Pampa, and other nearby places before returning to Claude to make their home.

Mr. and Mrs. E. S. Carr, Mr. and Mrs. Cliff Vincent of Pampa, and Mr. and Mrs. Robert Holt of Wheeler attended the wedding.

Prince Henry, third son of King George and Queen Mary, has been promoted to captain of the Tenth Hussars.
