NOTICE TO THE PUBLIC

Any erroneous reflection upon the character, standing, or reputation of any individual, firm, concern or corporation that may appear in the columns of the Pampa Daily News will be gladly corrected when called to the attention of the editor. It is not the intention of this newspaper to injure any individual, firm or corporation, and corrections will be made, when warranted, as prominently as was the wrongfully published reference or article.

Senior Collor, representative of the Brazilian revolutionists, yesterday criticised the United States for issuing a statement to the effect that this nation would permit the sale of ammunition to the federal government of Brazil. The statement is taken to mean that the rebels would not be allowed to purchase ammunition from this country.

Collor denied that the movement in the South American country was one brought on by Bolshevism or Communism and said that it was a movement to clean out the corrupt government which now exists in that country. He declared that the revolutionary government, if it succeeded, would fulfill all international obligations contracted by the republic before the outbreak of the revolt, but not since.

The policy of the United States, in reference to the western hemisphere, has been to play the godfather to these nations. It has kept European nations from making further conquests in North and South America and in the West Indies. In many instances, the United States has taken imperialistic moves.

By refusing to sell ammunition to the revolutionaries, the United States practically throws its support to the federal government of Brazil. If the revolt is just a political move to deject the present officials from office without justification, this nation is on the right side. However, if the rebels are sincere in their move, as Senior Collor has said, it is another matter.

If the government is corrupt, the officials running it should be removed from office. But bloodshed may be as bad as having corrupt government officials. The matter should be taken care of at the polls.

From reports of the revolution, we cannot gain a comprehensive view of the real situation in Brazil. At any rate, the United States should be very tactful in taking sides with either the federals or the revolutionists.

Winter Strikes Much Of Nation

KANSAS CITY, Oct. 17. (AP)—Winter's first threat which blanketed the Cascades and Rockies deep with snow, today had chilled the Great Plains, the Mississippi valley and was sending a brisk norther across the Texas prairies. Damage to late crops, danger to stock and even loss of human life was reported from various sections which felt the storm. A searching party yesterday discovered the body of Benedict Umhoefer, 42, Great Falls, Mont., who had perished in a snowstorm. Blizzards swept along the Judith valley of Montana early today where a minimum temperature of 7 above zero was reported. Temperatures

continued to fall in other parts of the state as the snow storm of yesterday abated. A heavy snowstorm swept the Wenatchee valley in Washington, said by residents to be the earliest snowfall since 1916. Low clouds over the Cascades threatened a renewal of the storm there. Snow was reported, too, throughout the Rocky mountain region, the Dakotas and Minnesota. Rapidly falling temperatures in Iowa, Nebraska and Missouri brought threats of early frost. Freezing temperature struck Western Kansas late yesterday. In Oklahoma the temperature had tumbled from 78 degrees at 3 a. m., yesterday to 44 at midnight with the drop continuing. A cold northerly winds was sweeping across Texas chilling the state which enjoyed temperatures well over 80 yesterday.

She's Back On The Stage

After two years in the movies, Lenore Ulric has returned to the footlights. Her comeback role is in a new play called "The Pagan Lady," which made its premiere recently in Washington, D. C.

ENGLISH HORSE SWEATS VICTORIOUS RACE AWAY

LONDON, Oct. 17. (AP)—Kettle, English racehorse, sweated himself out of first place in a race at Galwick.

Handicapped to carry 107 pounds, the horse won the race but when Jockey P. Herbert weighed in the weight was 111 pounds.

Because of a rule which prohibits a horse from carrying two pounds over the declared weight the horse was disqualified.

Jockey Herbert appealed to the stewards saying the horse had perspired the additional weight into the saddle blanket, but his plea was denied.

Oust City Officials

MEXICO CITY, Oct. 17. (AP)—A dispatch to Excelsior from Comitán, state of Chiapas, today said that a body of armed men headed by Leocadio Velasco had taken possession of that town, ousting municipal authorities and calling leading citizens to a conference to choose a new municipal council.

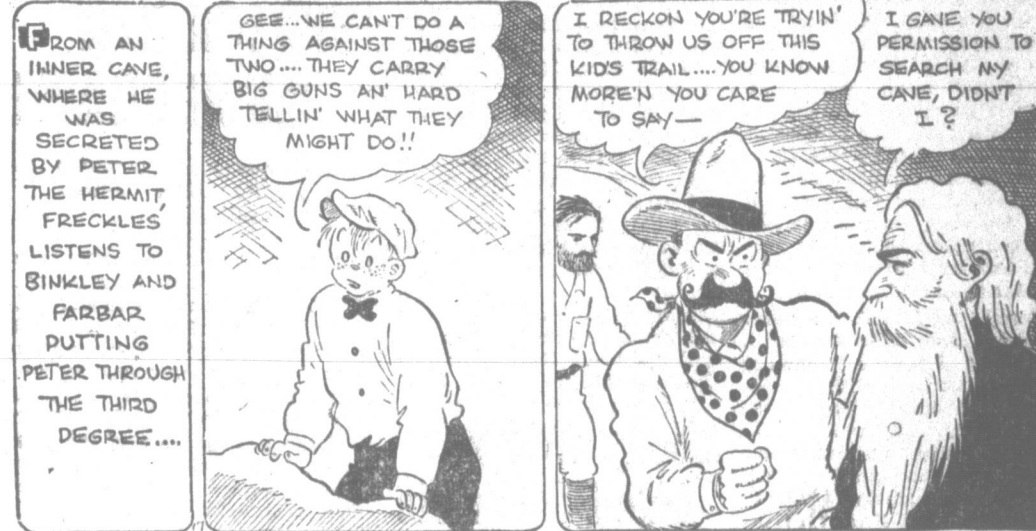

The correspondent said the movement apparently was against the state authorities. Federal officers in Comitán being unmolested. The city office continued to function and commercial establishments remained open. The city was described today as tranquil.

Comitán is the most important department in the state of Chiapas, and has about 60,000 inhabitants of whom one-sixth live in the city of Comitán, which is several miles from the Guatemalan frontier.

Negro Held After Opponent Dies

Mont., Oct. 17. (P)—Chicago negro, was held ay pending investigation during a boxing bout of his opponent, Nick J. eer Lodge middleweight and firemen worked in the boy's body after he the end of seven rounds killing. Pozega stepped an unusually frenzied and toppled over dead.

Former College Head Says Uncle Sam Is Tricky

EASTON, Pa., Oct. 17. (P)—Characterizing "Uncle Sam" as a "hardened, unfeeling trickster, about as keen for fair play as the original dealer in wooden nutmegs," Dr. John H. MacCracken, of New York City, former president at LaFayette college, today urged that undergraduates to develop a passion for justice.

thing else" is a passion for justice, and we have not got it," Dr. MacCracken said in his founders' day address at the college. "The average citizen would like to be able to feel that he can at least trust his 'Uncle Sam,' that when he is dealing with one of his officials he may expect due regard to be paid to his personal rights and interests and no unfair advantage taken of him. The federal machine does not operate today in an atmosphere of fair play. "We know how impossible it is in this imperfect world even to approximate full justice, we know that governments endure because the injustice they do is less than the pains of revolution, but, when re- volution comes it will have no

grounds for complaint, if you have condoned the little injustices you have seen if there has been in you no boiling passion for fair play.

ACCUSES GRAIN TRADE OF HARMFUL PROPAGANDA

WASHINGTON, Oct. 17. (P)—The Federal Trade Commission today ordered an investigation of farm board complaints that the grain trade was disseminating propaganda prejudicial to the board.

Commissioner Charles H. March said the inquiry, officially requested by the farm board, would be conducted under supervision of Herbert L. Anderson, chief examiner. Anderson said the start of the investigation might be delayed more than a month because of procedure calling first for citations and answers. Hearings then would be held.

Have No Information

WASHINGTON, Oct. 17. (P)—State department officials said today they had no information regarding an alleged important document reported from Mexico City to have been seized there and said to deal with communist plans in the United States.

No communication had been received either through the American embassy in Mexico City or the Mexican embassy here on the matter.

"We cannot ask, we cannot expect government without injustice. What we ask is a public conscience which will not tamely acquiesce, but which will not take steps to correct it, and for this passion for justice we look to you young men of the colleges, both because you are well informed, and because you are young."

Dude Bandit Is Apprehended And Finally Caught

CHICAGO, Oct. 17. (P)—The law has finally caught up with Harry Lee Watson, "gentleman bandit" whose success as a bank robber has worried operatives of banking associations in this and other states for some time.

Watson, who confessed to 15 different bank robberies and was suspected of many more, was sentenced in federal court yesterday to serve ten years in the government penitentiary at Leavenworth, Kans. The sentence was passed after he had admitted taking government funds from a postoffice operated in conjunction with a bank he robbed at Troy Grove Ill., last July 9.

He was called a "gentleman bandit" because he was always polite and studiously avoided the use of

profanity during his operations, bank officials said extended from Illinois and Indiana into Kansas, Missouri and Oklahoma.

Watson was captured by postal authorities early last August at a farm in the Ozark mountains, which he was reported to have purchased with the idea of settling down to enjoy a quiet domestic life with his wife, a circus performer.

Twice during his career he escaped from the Texas penitentiary, where he was sentenced for theft. On his second break for liberty he wounded two guards with firearms that had been smuggled in to him. Still in his thirties Watson, bank operatives said, had seen engaged in crime since 1923.

State Official Dies

AMARILLO, Oct. 17. (P)—A. G. Fenwick, assistant state auditor, died at Canyon of apoplexy last night after a brief illness.

Seek Assailant MILLSDALE, Mich., Oct. 17. (P)—State police and officers of three counties conducted a search today for Leonard Dacon, who killed under-Sheriff Harley Wood, 40, when Wood attempted to arrest him last night for forgery of a \$2 check. Wood was killed in the apartment of Dacon's wife, where officers learned he returned yesterday after being sought several months.

Police Have New Theory in Kidnaping Case

KANSAS CITY, Oct. 17. (AP)—Police today were attempting to connect Raymond Rizzo, 21, New York City, with the kidnaping of Mrs. Alma Wilson McKinley, heiress, abducted from her Greenfield, Mo., home and later released.

The prisoner, arrested here late last night, was said by police to answer in detail the description of the kidnaper who forced the 24-year-old expectant mother to drive him away in her car, but released her after they had spent the night lost in the woods.

Fingerprints on a toothbrush in a suitcase cast aside by the kidnaper were looked upon by police as a positive means of establishing whether Rizzo was the kidnaper.

Scars on his hands and face corresponded to those mentioned by Mrs. McKinley in describing the man.

Rizzo denied connection with the crime, said he had "been floating around" and had just arrived in Kansas City from Holington, Kans. He was arrested because of suspicious conduct, officers said.

Mrs. McKinley, daughter of an oil millionaire, was taken from her home while she and her mother were alone at night. Her mother was found and gagged.

May Burn Surplus

MERIDA, Yucatan, Oct. 17. (AP)—The governor of this state has under consideration a proposal of the regional economic committee to burn 100,000 bales of henequen, or sisal hemp which is one of Yucatan's principal crops in order to eliminate a surplus and relieve a crisis brought on by over production.

It is proposed to burn the supply in warehouses at Progreso, which would leave 200,000 bales on hand to supply demand.

Cold at Abilene

ABILENE, Oct. 17. (AP)—A minimum temperature of 44 degrees recorded here early this morning failed to bring frost, it was said by W. H. Green, government meteorologist. Even a light frost would have damaged late cotton and feed crops which have been "putting on" following recent rains, he said.

NEAR BEER FLAVORED BY MILK'S LACTIC ACID

NEW YORK, Oct. 17. (AP)—Near beer and milk are developing an affinity that once did not exist. Lactic acid, the substance in milk that sours it in due time, now is used to improve the flavor of near beer.

This development in the chemistry of near beer is reported to the American Chemical society by Dr. H. T. Herrick of the federal bureau of chemistry and sells in discussing new things ferments are doing for industry.

Columbia U. Students Have Riotous Evening

NEW YORK, Oct. 17. (AP)—Riotous demonstration by 1,500 Columbia University students was quelled by police reserves last night only after a threat to hurl tear gas bombs in their midst.

The demonstration started after a rally in south field, on the Columbia campus to cheer the departure of the football team for Hanover, N. H., for a game today with Dartmouth.

Several hundred students accompanied the team downtown on the sub-way and police said during the ride windows of the cars were broken and advertising cards torn down. Meanwhile, others who remained at the school tore down about 200 feet of the wooden fence surrounding the field and tipped over a number of automobiles. When an attempt was made to set fire to one of the cars a policeman interfered. He was unable to control the students, however, and a call was sent for reserves.

The policemen were pelted from dormitory windows with bottles and paper bags filled with water until the threat to use tear gas caused the students to disperse.

Will Coach Yanks

NEW YORK, Oct. 17. (AP)—Arthur Fletcher, former manager of the Philadelphia Nationals, again will act as a coach for the New York Yankees next season. Joe McCarthy, newly appointed Yankee manager, announced Fletcher had accepted terms for the 1931 season. Fletcher has been a Yankee coach since the 1927 season.

Mexico To Place Powerful Station at Reynosa

McALLEN, Oct. 17.—(P)—Mexico's most powerful radio transmitter will be on the air from Lower Rio Grande Valley after November 8, the date set for the opening of the station with 10,000 watts, located at Reynosa, just across the Rio Grande from McAllen.

Although located in Mexico and operating under Mexican license, the station is being built mostly by American capital, prominent McAllen and Reynosa business men being interested in it. The company formed has been named International Broadcasting Company and the station was located just across the border in order to take advantage of the cleared channel offered by the Mexican government.

The studio building is located less than a half mile from the banks of the Rio Grande on the Mexican side. One of the two 200-foot steel towers which holds the antennae, wiring is set in the yard at the rear of a popular saloon and dance hall, while the north windows of the building are opposite those of a gayly decorated cantina. The building consists of two studios, a reception room a control room and several offices.

L. D. Martinez recently moved here from Monterrey, Mexico, to be program director for the station, and he is at present arranging a program featuring prominent speakers and guest artists from many Texas radio stations.

Lumber Demand Much Smaller in State, Report Says

AUSTIN, Oct. 17.—(P)—Unfilled orders of lumber in Texas showed a marked decline for the four weeks ending October 4 as compared to a similar period ending September 6, according to a report from the Southern Pine Association to the Bureau of Business Research at the University of Texas. After making minor gains during August, production fell off slightly during September, while shipments maintained the small upward trend indicated during the previous month and exceeded production by a small margin. The increase in shipments was more than offset by the decline in unfilled orders, however.

Both production and shipments increased slightly for the entire southwestern group of mills, of which Texas is only a part. Production in this State was maintained at a higher level than the remainder

Colorful Metal Alloy Ware Has A Dozen Uses

By MARGARET TAYLOR
Interior Decoration Editor, McCall's Magazine. Written for the Pampa News.

Now tole is coming back. In its quaint and colorful variety it is making many delightful places for itself—and serving many useful purposes, too.

The designs now being revived are so diverse because tole has been made for centuries in such different countries with different inspirations as France, Russia and England.

It originally became popular after the French revolution, when decorative things had to be economical and artists had to live; and tole, made of an alloy of iron and lead or zinc, and painted, was just right for democratic luxury.

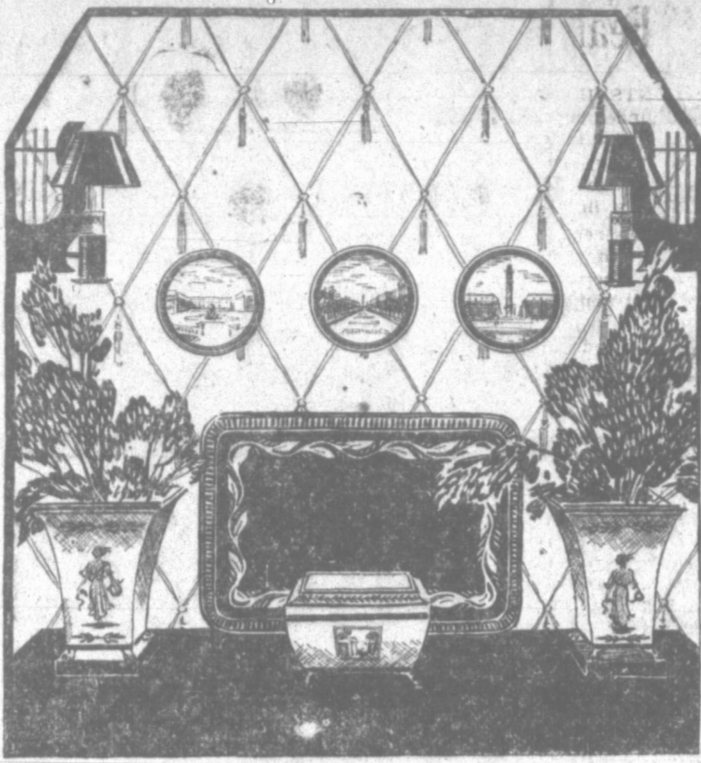

French in every line are the graceful pieces in Louis XV style, frequently decorated with those delicately sophisticated pastoral scenes which the painters of those times thought were back to nature and the soil.

Harmony with many color schemes of today may be achieved with the foundation colors of most of these pieces—light blue, dull gold and black.

Because tole was growing up in England about the time Chippendale was discovering the Chinese, much of the English ware was decorated to look like beautiful pieces of cloisonne or enamel.

Chinese black and red were the popular colors and these, too, fit into modern schemes. Royal blues and creams are also found in English pieces.

The most popular foundation

Tole is urged for accessories from flower holders to lamps.

of the southwestern territory during the early months of the year, but since July the Texas output has fallen below the average for the section.

Average production of southwestern mills was 1,312,000 feet during September as compared to 1,306,000 feet in August, while average shipments were 1,382,000 feet in September as compared with 1,316,000 feet in August.

Texas mills produced an average of 1,116,000 feet in September as compared to 1,206,000 feet in August. Average shipments from Texas mills were 1,158,000 feet as compared to 1,129,000 feet in August, while average unfilled orders fell from 564,000 feet in August to 471,000 feet in September. Average stocks amounted to 6,478,000 feet in September as compared to 6,830,000 feet in August.

Reduced Crude Oil Prices Are Now In Effect

HOUSTON, Oct. 17.—(P)—Reduced price offerings for crude oil in seven North Texas counties were in effect today, as announced yesterday by the Humble Oil and Refining company. The Texas company and the Prairie Oil and Gas company met the reduction.

In a statement, W. S. Farish, president of the Humble company, said, "we cannot afford to pay more for crude than others are paying. In view of the fact that crude oil from North Texas and Panhandle fields is being sold below our posted price, we have no alternative but to meet such lower price by posting in these two fields effective today the attached schedule."

In the new posted order, it was pointed out that in referring to the North Texas area, the price cut did not affect Ranger, Mexia, Powell, Boggy Creek, Richland, Worth-

an, Lyton Springs, Curry, Moran nor Nocona. These fields heretofore had been included in North Texas crude oil postings.

NEVADA HONORS ITS BURROS
RENO, Nev., Oct. 17.—(P)—At last the much mistreated burro is the subject of honor. Nevada has picked the little long-eared beast of burden as the animal performing the most outstanding service to mankind—and a representative burro will receive a Latham foundation medal during national "Humane week."

Man Disappears

CORPUS CHRISTI, Oct. 17.—(P)—Officers were aiding today in the search for Frank Csaes, 21, collector for a furniture company here, who disappeared yesterday. Friends

said he had on his person a considerable sum he had collected during the day. P. R. Sykes, his employer, declared he had no doubt of the young man's honesty and feared he may have been killed or robbed.

"Success"

"Success" has been the keynote of the News-Post Cooking School. Gold Medal has been given a thorough test and pronounced O. K. You, too, can get best results in your baking with Gold Medal Flour.

Use Gold Medal Cake Flour for your cakes, pies and pastries. Your whole family will enjoy the luxurious taste of the delicacies.

Prisoner Dies In Hall Blaze

LAMOTTE, Ia., Oct. 17. (AP)—The town hall of this village was the funeral pyre of Alfred Tenslow, 32, of Decorah, who was locked up on a disorderly conduct charge.

Last night fire razed the building, an adjoining barn and several sheds. Intense smoke withered the efforts of impromptu fire brigades and fire fighters from Dubuque to open the door of the room confining Tenslow. His body was later found in the ruins.

No evidence in the debris was found to substantiate a suspicion that Tenslow had started the fire.

Oklahoman Dies Without Telling of His Assault

ENID, Okla., Oct. 17. (AP)—Keeping the secret of his mysterious wounding on a highway near Garber, Okla., George E. Taft, prominent banker, oil man and political leader of Northwestern Oklahoma, died in an Enid hospital early today.

In a semi-conscious condition since he was found shot twice near the heart, in a roadside ditch beside his motor car Wednesday night Taft had been unable to explain why or how he was wounded.

It was known he had rushed from his Garber home, presumably in answer to a mysterious telephone message hours earlier. When the banker was taken from the ditch it was found he had been lying on a large calibre pistol which had been fired three times, the third shot apparently piercing only his clothing.

Sonora Banker Says Cattle Men Will Come Thru

SAN ANGELO, Oct. 17. (AP)—W. L. Aldwell, president of the First National bank of Sonora and a West Texas ranchman since 1881, says the West has had a good time and now it is up to the ranchmen to get out and make another stake. He thinks the West Texas ranchman will come through the period of depression right side up. Mr. Aldwell passed through here on his way home from Fort Worth where he had been in a hospital since he suffered a broken leg there in May.

Last year at the Ranch Experiment Station at Sonora Aldwell made an address telling the ranchmen that they had had seven years of prosperity, and that they had better lay up a little for a rainy day.

Nathan to Marry Mencken Is Sure

BALTIMORE, Oct. 17. (AP)—H. L. Mencken is sure George Jean Nathan, New York theater critic and his associate for years, likewise will desert bachelorhood before long. Here's what Mencken has to say:

"I have already offered to be baptized by the Baptist rite if Nathan is not married by February 14, 1932. I now go further.

"I offer to run for congress as a Socialist, to go to 10 movie shows on 10 successive nights, to raise a beard, and to read the complete works of Edgar A. Guest, E. Phillips Oppenheim and Christopher Morley."

Father, Daughter Free
WHITESBORO, Oct. 17. (AP)—Charged in connection with the slaying of Jim McMenamy, 48, who was found yesterday in the yard of their home, mortally wounded, O. B. Martin, 42, and his daughter, Velva Martin, 19 were at liberty today on \$250 bond each. Father and daughter were given a preliminary hearing yesterday before Justice A. F. Jones. Witnesses testified to statements Miss Martin made to them about McMenamy's conduct toward her.

Shepard, Self-Blinded Denies His Fear as He Goes Trembling to Chair

HUNTSVILLE, Oct. 17. (AP)—A self-blinded confessed murderer was electrocuted at the state prison here early today, denying even when he stood before the chair the fear his trembling lips revealed.

Joyce Shepard, killer of Sheriff Bob Smith of Fisher county and deputy Sheriff Jake Owens, in an affidavit admitted his guilt and his attempts to feign insanity and declared Lloyd Conatser, his alleged partner in the crimes, who is serving a 99-year sentence, had no connection with them.

Entering the death chamber Shepard shouted to his mates: "Goodbye to all the boys. I had good will toward them all."

He declared he had "no fear or sorrow."

He muttered a prayer as his last act, asking "forgiveness" for his executioners.

Two weeks ago, he destroyed the sight in both eyes, using a nail that had worked loose from a cell ventilator. The fact was not known until last night and was discovered by newspapermen when they were permitted to interview him. The prison general manager, Lee Simmons, said he had not announced the act because he considered it not a proper matter for publication.

Whether Governor Moody had been advised of it was not learned.

Shepard himself explained his act by answering Biblically: "If the eye offendeth thee, pluck it out." He said, too, that he wanted to "prove he was not trying to escape."

One other weapon, the sharpened bone of a T-bone steak, was found in his bedding.

For two years Shepard, alias Bill Smith, had fought to save himself. Two sanity trials were had, the first holding him unbalanced and the other, held after his incarceration for a time in a state asylum, finding him sane. For months he kept up a spectacular effort to convince others of his insanity. He lay on the concrete floor without clothing and shrieked meaningless phrases.

In Dixie Confectionery, 110 1/2 N. Cuyler
All Work Guaranteed

Finally, he concluded, or so he told other prisoners, that the dodge would "not work" and resumed intelligent action.

Shepard's affidavit described himself as the killer of the officers. He shot them both, he said, and Conatser was not involved. He insisted he was telling the whole truth, saying he realized he must die.

Monty Jackson, negro, convicted of murder, who had been scheduled to die immediately after Shepard, was granted a reprieve late yesterday by Governor Moody to allow the executive time to study a pardon board recommendation.

Drowns Accidentally
VERNON, Oct. 17. (AP)—The body of Homer Stephens, 48, was found in a small galvanized iron tank near his home, six miles from Vernon, last night. He had gone to water his team and a search was started when he failed to return. Coroner H. C. Justin held death was due to accidental drowning.

FORT WORTH, Oct. 17. (AP)—J. C. C. Evans, 78, of Cisco, Baptist missionary for 58 years, died here last night while visiting a daughter, Mrs. F. E. Bailey. He was the founder of the Second Baptist church at Cisco, where he had lived 30 years.

'Electrify Your Home'

Says Miss Bull
who today closes her Cooking School at the Methodist church basement. She attributes much of its success to the use of Electrical Appliances.

The change to electrical appliances in the modern home is not new for the American Home. However, many have not yet added the smaller items which make housekeeping a pleasure instead of drudgery. The cost, in most cases is small compared to the length of service and appliance gives. The operating cost is small and the convenience and cleanliness is highly appreciated by the particular housewife.

You have seen Frigidaire, and Hotpoint appliances demonstrated at the Cooking School. We will be glad to show you any of these items in our showroom, 110 East Foster, and explain any point about them which might not have been clear. Liberal terms are offered and long-time guarantees protect you against any possible defects.

We Congratulate

Land Lease Investigating Group Has Idea Its Work May Yet Be in Vain

By PAUL BOLTON
Associated Press Staff Writer

AUSTIN, Oct. 17.—(P)—The growing suspicion that the legislative committee investigating land leases of the University of Texas may have been working for naught has gripped members of the committee as hitherto unconsidered facts were brought to light.
By this agreement, titles were validated; and the oil companies paid the university \$1,500,000, representing one-eighth of the profits derived from the Humble contract, which still stands.
Then along came the present agitation for an investigation of the land leases, and the legislative committee ordered auditors to go into the situation. There the identical questions relating to the titles were again raised, and no one seemed to remember that they had been raised and settled before.

Old Charges To Be Revived In Chicago Soon

CHICAGO, Oct. 17.—(P)—Possibility that numerous old charges would be made over into new prosecutions presented a threat to the city's lawless today. Digging from its files the cases against racketeers and hoodlums who were never brought to trial the Chicago crime commission turned them over to the state's attorney along with plans to re-open by new indictments charges previously nolle prossed.
After studying the records which were provided by Col. Henry Chamberlain, operating director of the commission, assistant state's attorney Harry Ditchburne said he believed that they could be made the basis for successful prosecutions.
The Chicago Herald and Examiner said that among the records turned over to the state's attorney were some dealing with the case of William McGinn, assistant state's attorney who was slain in 1926. The paper pointed out that the name of Al Capone, who is No. 1 on the crime commission's "public enemies" list, has been mentioned in connection with this case.

POTATOES O'BRIEN
Dice cold boiled potatoes. Mix them with chopped raw bacon, onion and pimientos. Fry in Crisco in a frying pan as you would lashed brown potatoes. Stir occasionally until partly brown over the bottom, double over like an omelet and serve on the platter in omelet shape.
The secret of an omelet's rise
Here's an omelet that has a success hint wrapped up in it: It's browned on top of the stove and then popped into the oven to finish cooking, so that there's no chance of its falling. And, of course, the delicate, fresh-laid flavor of the eggs is preserved when you fry in Crisco—a cooking fat that tastes good just as it comes from its air-tight can.

Taste Crisco—then any other shortening. Crisco's sweet, fresh flavor will tell you why things made with Crisco taste so much better.
In its new airtight can—as fresh and sweet as the day it was made

ADKISSON & GUNN TO OPEN FINE NEW STATION TOMORROW

FAVORS WILL BE GIVEN TO CUSTOMERS

Residents of Pampa and community will have the opportunity all day Saturday of inspecting the fine new station of Adkisson & Gunn company on West Foster.

There will be free cigars for the men, candy for the ladies, and balloons for the children in connection with purchase of 5 gallons of gasoline or more.

Another milestone in the commercial development of Pampa will be established with the formal opening here of the new station at the corner of Gray and West Foster. The new station is six times as large as the former location of the company, which was one half block east of the new building.

Officials of the Adkisson and Gunn Tire Company and representatives of the Goodyear Tire and Rubber company are present for the formal opening that is to be held Saturday, October 18. Among the officials are P. D. Winnings, manager of the Oklahoma City branch of the Goodyear Tire and Rubber company, J. B. Shepherd, manager of the Amarillo Goodyear office, J. W. Christian and J. H. Pritchett of Amarillo, Goodyear salesman, and either W. B. Gunn or Frank Adkisson of Amarillo, are also expected to be present. With purchase of five or more gallons of gasoline, the local station is giving away boxes of candy to the ladies, cigars to the men, and balloons to the children.

The station was first opened in the new location on September 21. The new building contains a floor space of 7,000 square feet, being six times larger than the old station. At the former location, tire service was the only one offered. At the new location service is available in the following branches, tires, tubes, rims, gas, oils, accessories, washing, greasing, vacuum-cleaning of cars, tire vulcanizing and repairing. The new station has a stock of 1000 tubes and 550 tires. There are four gasoline pumps for the sale of Gulf, Magnolia and Wilcox gasoline.

Gulf, Magnolia, and Quaker State are the brands of oils sold. New equipment has been added including an air compressor, hydraulic lift for grease rack, and a new vulcanizing mold, and a new high pressure washing machine.

The local company has made good marks in the Zeppelin sales contests conducted by the Goodyear Tire and Rubber company. In 1929, the local Adkisson and Gunn Tire company won first place in the Class A division. Oklahoma City branch. More than 25 stations competed in the contest, including stations at Tulsa, Oklahoma City, Amarillo, and Seminole. The 1930 contest was organized in a different manner than the one for the preceding year, the nation being divided into five divisions. There were five winners in the southwestern division in which the local company entered. The Adkisson & Gunn Tire company lacked only one place of finishing with the five winners in this division, among the 126 dealers.

The Adkisson & Gunn Tire company began business in Pampa April 1, 1929, in the building on West Foster one-half block east of their present location, across alley from the Pampa Ice Manufacturing company. Its personnel was Jack Baker as manager, with the following employees: E. L. Emerson, F. J. Barnes, and W. J. Cupp. One of these, E. L. Emerson, is still employed by the company. The personnel of the new station: Jack Baker, manager; Frank Diaz, bookkeeper; E. L. Emerson, vulcanizer; J. D. Smith, E. J. Overall, and Tex Berry, service men, and Charles Mitchell, washing and greasing.

Teachers Loom Large in T. I. A. A.

SAN MARCOS, Oct. 17. (AP)—San Marcos Teachers, West Texas Teachers and East Texas Teachers were this week stacked at the top of the Texas Intercollegiate Athletic association as the leaders in the 1930 grid race.

San Marcos, uncrowned champs of 1929, seemed to have a slightly tighter hold on first than the newcomers, East and West Texas, if seniority rights are recognized in football races. West Texas replaced Abilene Christian college by taking a 16 to 7 game from the Wildcats and East Texas just shoved in and made its own notch at the top by downing the Stephen F. Austin Teachers college Lumberjacks, 13 to 0. Both came as upsets.

At Canyon a flashing young quarterback by the name of Powell who pushed over two touchdowns to make a Buffalo win possible was the shining light in the West Texas victory.

Two of the leaders, East and West Texas, are billed to meet Friday

night under the arcs at Canyon in what is expected to be one of the feature affairs of the conference schedule. It at least will unclog the top rung. San Marcos Teachers meet Abilene Christian college Saturday in Abilene.

North Texas of Denton, appearing under the lights Friday evening at Georgetown, failed to live up to advance notice and was held to a 13-13 draw by the Southwestern university Pirates, a team considered weaker than the 1929 Pirate eleven. Southwestern chalked up 17 first downs to the Eagles' four.

Daniel Baker college was badly beaten by Loyola of the South Saturday in New Orleans. Loyola plastered a 39 to 0 defeat on the Hillbillies.

Sul Ross continued to drop by one point its well played football games. St. Mary's university of San Antonio beat the Lobos to the finish, 19 to 18. Two weeks before Schroiner beat them out 7 and 6. The complete TIAA schedule for the week:

October 17
East Texas vs. West Texas at Canyon. (Night game.)
Trinity vs. North Texas at Denton.

Daniel Baker vs. Simmons at Abilene. (Night game.)

October 18
McMurry vs. Sul Ross at Big Spring.

San Marcos Teachers vs. A. C. C. at Abilene.

Oklahoma Teachers vs. Sam Houston at Huntsville.

Texas A. & M. vs. Rice Team B at Houston.

John Tarleton vs. Stephen F. Austin at Nacogdoches.

China Summons Yankee Expert To Stem Plague

BOSTON, Oct. 17. (AP)—In far-off Northern China, where the seeds of the "Black Death" lurk, the authorities are calling frantically for an American physician, Dr. Percy T. Watson.

The disease which has wiped out millions of lives in the past is beginning another grim march and this quiet, unassuming little doctor-general is needed to halt the advance.

Cabled reports from the provinces of Shensi and Shansi tell of alarming outbreaks of the bubonic

plague—otherwise known as the "Black Death"—the same disease that swept away a quarter of the earth's population a few hundred years ago.

Dr. Watson, a medical missionary for the American Board of Commissioners for Foreign Missions, has devoted his life to fighting the battle of humanity out in the lonely land where plagues are bred. Plagues must be fought, Dr. Watson says, at their sources before they sweep through the world.

He came back from China this summer for a brief respite—a breathing spell in his hard and dangerous task—and has been with his family in Northfield, Minn.

During his visit to America he came to the headquarters of the

American Board in Boston, where he described the warfare against plague that is constantly in progress in Northern China.

After a long period of quiescence, Dr. Watson said, the plague flared up in the remote province of Yunnan, China, in 1871. Attracting little attention, it grew until, in 1894, it broke out in the great city of Canton.

It spread to India and thence through the world until the death toll reached nearly 30,000,000. In India, alone, more than 10,000,000 succumbed.

Dr. Watson has made Fenchow

Since 1911 bubonic plague has appeared annually in the villages of Linhsien and Hsing Hsien four, to

six days on the trail from Fenchow. Every year Dr. Watson and his co-workers, largely educated Chinese trained by him or through his sponsorship, have triumphed.

The work is fraught with danger at every step. Plague workers must guard themselves with heavy aseptic gauze masks. Frequently they must don over-all "plague suits." These must be sterilized after each wearing. One slip in technique may mean infection and sudden death.

Dies of Burns

CORPUS CHRISTI, Oct. 17. (AP)—Leigh Park, 22, died last night of burns suffered when laboratory equipment at a refining plant at Ingleside ignited a tank car loaded with gasoline.

NEW BREATHING MACHINE 'FOOLPROOF' FOR INFANTS

WASHINGTON, Oct. 17. (AP)—An apparatus for resuscitation of the newly born has made its debut here with the record of successfully delivering oxygen to infants' lungs in 75 per cent of cases where such measures are necessary.

Simple to operate, the machine is described as foolproof containing safety devices which make it impossible to deliver oxygen to the lungs at excessive pressure.

Both oxygen and carbon dioxide have been employed in the instrument, with no apparent difference in results. Further research is being conducted in efforts to deter-

mine the comparative value of these two agents.

Japanese Killed
HOUSTON, Oct. 17. (AP)—Hitler hikers who were believed to have shot and robbed K. Sandow, Japanese produce seller of Houston, were sought today by officers. Sandow's body was found yesterday near Eagle Lake. His hands were bound behind him and he had been shot through the head.

AMARILLO, Oct. 17. (AP)—Eugene S. Blasdel, former mayor of Amarillo, died suddenly yesterday while with his family on a hunting trip in the Blue River canyon in Arizona. Death presumably was caused by a heart attack.

New Southern Air Mail Planes Are In Constant Communication

DALLAS, Oct. 17. (AP)—When the six tri-motored mail-passenger planes of American Airways, Southern Division, took the air Oct. 15 from their various starting points, inaugurating service over the new Southern transcontinental air mail and passenger route, Atlanta to Los Angeles, their crews were in constant conversational communication with all ground stations en route as well as the central control base by means of an elaborate two-way radio operations telephone system.

The radio telephone system will permit the crew of a ship in flight to have up-to-the minute data on weather conditions in the immediate vicinity and over the route ahead, and to receive instructions from the control base.

"This communicative system," declared C. C. Shangraw, supervisor of radio operations, "practically eliminates the weather hazard in flying, which has constituted quite a problem in past years, for at no time during the ships' scheduled runs will the crews be uninformed as to weather conditions."

Ground receiving and transmitting sets are being installed at 14 points along the route. Points at which these stations are being installed include Atlanta, Birmingham, Jackson, Shreveport, Dallas, Abilene, Big Spring, Guadalupe Pump Station, El Paso, Douglas, Tucson, Phoenix, Blythe (Cal.) and Los Angeles.

Augmenting the radio telephone system will be the radio telegraph

system, the primary function of which will be the collection of weather data at various stations along the route and interchange of this information among the stations. Radio telegraph stations will be in operation at Atlanta, Jackson, Dallas, Big Spring, El Paso, Douglas, Phoenix, Blythe and Los Angeles. The use of the radio telegraph system for collection and exchange of weather data will insure no disturbance for a like purpose of the radio telephone channels which must be left clear at all times for ground-to-ship and ship-to-ground communication.

A communication schedule is being worked out which will call for ship-ground station conversational communication at intervals of ten minutes. However, contact may be established at any time as the pilot will wear head phones during the flight of the plane and have the receiving switch on. He may talk to the ground station at any time by simply switching over from receiving to transmitting.

As an example of the efficiency and value of the system, Shangraw pointed out that a ship flying over Blythe, headed for the mountain pass near San Bernardino, might be unaware of a dense fog at 2000 feet, which would prevent the ship from clearing the pass. The Blythe station would have the information, telephone it to the ship's crew, and the pilot would turn back and land safely, to wait for the fog to lift.

ALABAMA DEMOCRATS SELL 'LOYALTY CERTIFICATES'
MONTGOMERY, Ala., Oct. 17.—(AP)—"Loyalty certificates" at a dollar a piece are being sold by the Alabama state democratic committee to finance its senatorial and gubernatorial campaigns.

The party faces a contest in November, John H. Bankhead, the senatorial nominee, being opposed by Sen. J. Thomas Heflin running as an independent after having been barred from the party primary, and

Judge B. M. Miller, democratic nominee for governor, opposed by Hugh A. Locke, Heflin's running mate as an independent.

The loyalty certificates bear likenesses of Thomas Jefferson, Andrew Jackson and Woodrow Wilson.

LOAN 34,000 SPECIMENS
WASHINGTON, Oct. 17.—(AP)—Nearly 34,000 specimens were loaned by Smithsonian Institution to workers outside Washington during last year.

Given Five Years
CAMERON, Oct. 17. (AP)—A five-year term in the penitentiary faced D. M. Jackson today. Jackson, water works superintendent at Thorndale, was convicted by a jury in district court here yesterday of killing Mrs. Louise Melde of Thorndale. She died after she had been struck on the head with a pistol. Testimony showed that Jackson struck Mrs. Melde after she slapped him, during an argument over a debt.

Accidentally Killed
IDAHO CITY, Idaho, Oct. 17. (AP)—Glade Fisher, 28, of Fruitland, was reported accidentally shot and killed while deer hunting late yesterday in the Deadwood mountains near Lowman.

Veteran Succumbs
FORT WORTH, Oct. 17. (AP)—Richard F. Poynor, 47, insurance man, overseas veteran and former commander of Bothwell Kane post here of the American Legion, died

last night of a wound suffered when a shot gun he was cleaning was discharged. He was preparing to go duck hunting.

FACTS YOU SHOULD KNOW ABOUT

GOODYEAR

- Q 1.** Millions more people ride on Goodyear Tires than on any other kind.
- Q 2.** Goodyear builds more than one-fourth of all automobile tires, the balance being divided among 40 other manufacturers.

By HERBERT PLUMMER

WASHINGTON.—It may be true Patrick Henry, that illustrious American patriot, regarded his kinship with Lord Brougham lightly, and that many today boast they are "self-made men."

Yet the practice of "climbing the family tree" is a favorite pastime among many American people.

One encounters them frequently in the capital. On the hill, in the quiet of the vast reading room of the Library of Congress, they are especially plentiful. Members of the library staff receive innumerable requests daily from these seekers of genealogical data.

Old and young, those dressed in finery and those shabbily clad—all gather around the large circular table desks in the busy reading room to pore over old and yellowed volumes which might give them some clue as to their ancestry.

Nor is the Library of Congress the only place in the capital where one encounters the "tree climbers."

MANY FAMILY HISTORIES
Down in the Mall, southwest of the White House, where stands that beautiful stone building which serves the Daughters of the American Revolution as national headquarters, they are found also.

Here in the library, ranged along the north wall in open shelves, are the histories of more than 1000 American families. From the hours of 9 a. m. to 5 p. m., these volumes are available to those interested in their ancestry.

Visitors are requested only to register in a large book upon entering. A corps of trained librarians is there to lend whatever assistance they can.

Another source of study of American families in the capital is the census records. Only the records of the first census—in 1790—have been published and made available to libraries throughout the country.

All the records since that time are filed in the census office in Washington in their original manuscript form. At present they are housed in one of those temporary buildings erected during the world war, but an archives building is to be erected to safeguard them.

Eventually these data, which goes back to 1800, will be printed and distributed to the libraries.

QUICK REACTION
The crash of the British dirigible

R-101, in France, cast a pall over the British colony in Washington as quickly as news of the tragedy was received.

On the morning of the disaster H. M. S. Danae proudly ploughed up the Potomac to dock at the navy yards in southeast Washington. Saturday night, Leander McCormick-Goodhart, commercial secretary of the British embassy, entertained officers of the Danae with a ball at one of the country clubs in the capital.

The affair was at its height when the fate of the R101 became known. The news broke up the evening. Dancing was not resumed after supper, and gloom descended on the brilliant gathering.

VARIETIES OF PUNISHMENT

By ALICE JUDSON PEALE
Most punishments which we commonly employ are safety valves for our own emotions and more or less harmful to the children against whom they are directed.

Punishment is always a last resort. Used frequently it is a clear confession of parental failure.

We generally think of the punishment of children as the infliction of physical pain, penalties, restrictions, or loss of privileges or pleasures. These are deliberate conscious punishments.

There are other punishments, however, which parents frequently employ without being aware of it. These are disapproval, and the withdrawal of confidence and love.

There is at least this much to be said for the punishment which is in the nature of a penalty or pain—it causes the child to feel that he has paid for wrong doing, that accounts are wiped out and he can start with a clean slate.

The withdrawal of love has no such refreshing effect. It simply causes the child to feel discouraged and inferior without permitting him to acquire a clean conscience through the expiation of his fault.

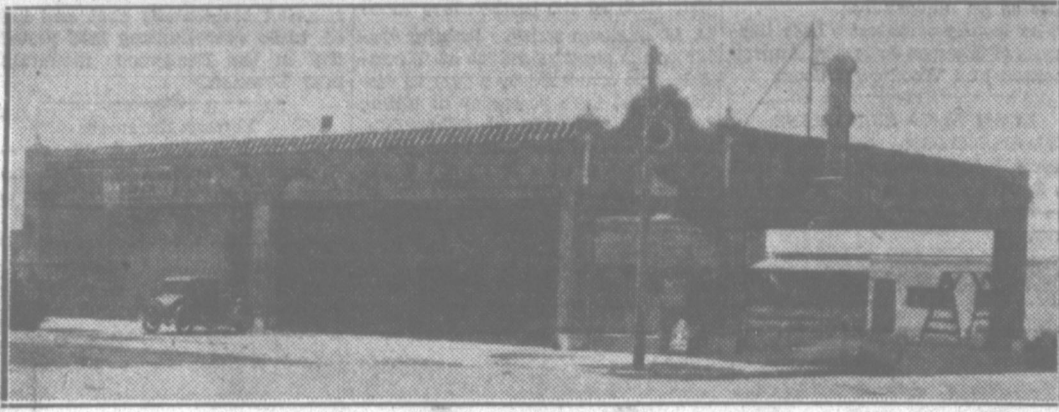

Thus this subtle psychological punishment is in some ways most cruel of all, for it injures the child in his self-esteem while it deprives him of that portion of his sense of security that is grounded in parental love.

It is furthermore especially destructive because it is apt to be prolonged over a period of several hours, even days or weeks. This is devastating to the child for whom each day should mean a fresh start.

The only punishment which is likely to be effective is that which is short, harsh enough to be unpleasant, and which yet in no way causes the child to doubt his parents' love.

Round-up Will Be Tradition At Texas University

AUSTIN, Oct. 17.—(P)—Establishment of the Texas Round-Up as a tradition and as an annual affair on the campus of the University of Texas is provided in resolutions passed by the executive council of the Ex-Students' Association, the organization which sponsored the first Round-Up in the spring of 1930.

Encouraged by the success of the first Round-Up and by "the enthusiastic cooperation and endorsement of ex-students, faculty, students, parents of students, and Austin citizens," the resolutions set out a general plan for Round-Ups of the future.

It is provided that the president and executive secretary of the Ex-Students' Association and one member of the executive council appointed by the president be constituted an executive committee for the Texas Round-Up, and that this committee request the president of the University, the president of the Dads and Mothers Association, and the president of the Students' Association each to name three individuals to serve as members of the Round-Up advisory committee, this committee to be formed and the definite organization of the Round-Up set up during the summer preceding the spring in which the Round-Up is to be held. This action of the Ex-Students' executive council further directs the executive committee of the Round-Up "to make every

effort in the direction of having the date, general program, and organization of the Round-Up determined by the fall of the year."

The resolutions provide "that it is the sense of the executive council that the Texas Round-Up should be held at an appropriate date in the spring of each year; that it should include the annual reunion of the ex-students and the annual

meeting of the Dads and Mothers Association of the University; that the reunion features should be emphasized, and that the entertainment offered be of such an elaborate nature as to continue to attract State-wide attention.
