**VICTIM RECEIVING EMERGENCY TREATMENT**--Twenty year old Ray Vinson sits on the back of his wrecked pickup receiving emergency treatment following an accident one mile north of Wilson Drilling just before 6 p.m. on Wednesday. He and the driver and passenger of a car were taken to West Plains Medical Center to receive additional treatment for lacerations and bruises. No serious injuries resulted from the open intersection collision. Emergency vehicles responding to the accident were impeded by sightseers who had roadways blocked.

Muleshoe ISD will sponsor Drug Education Week in all schools during the week of November 9-13.

Activities for the week will begin on Monday with a community-wide PTA meeting at 7

Sightseers Get  
Warning  
From Officers

Bailey County Sheriff Bob Henderson and Muleshoe Police Chief Wayne Holmes have joined together in an effort to try to express their concern about sightseers who are packing emergency sites.

In many instances, such as the Wednesday evening wreck northwest of Muleshoe on a county dirt road, so many sightseers packed the roads around the intersection crash, that emergency vehicles had a difficult time making their way to the wreck to remove the injured.

Fortunately, none of the three victims received serious injuries, but it would have been all the same if they had received critical injuries.

Both the sheriff and chief reminded that stiff penalties can be assessed persons who have no business being at an emergency site, whether it be wreck, fire or otherwise, showing up and impeding any legal emergency vehicle.

They said, "Please stay away from wreck or emergency sites. If this trend continues, law enforcement officers will be instructed to start handing out tickets, or take other measures."

Mules End '87 Football Season;  
Victory Over Dimmitt Bobcats

As the 1987 football season came to a close last Friday night, the senior football players were left with one last victory of their high school career.

Both the Muleshoe Mules and the Dimmitt Bobcats went into the game hoping for a district win, but as the final whistle blew, it was our Mules who came out on top.

The first minutes of the game proved the Bobcats were not

willing to hand over a victory without a fight.

No. 35, Kelly Howell, made the first of several touchdowns of the evening with 9:07 left to play in the first stanza. Their PAT was good, pulling them ahead 7-0.

The Mules were not to be counted out, though, when Daniel Olivas, No. 24, took the ball for his traditional long-yardage TD on the next play.

Olivas returned the ball 88 yards to give the Mules six points plus the PAT which tied the score 7-7. Dimmitt rebounded from the astounding run and scored again with 5:30 left in the quarter. Chad Davis went five yards for the TD and the extra point attempt failed.

Muleshoe showed their persistence and scored on their first possession of the second quarter. Armando Del Toro took the ball three yards to put the Mules ahead 14-13.

The second quarter was the scoring quarter, though, and the Bobcats scored again four minutes later. Dimmitt took the ball

The Old Corral  
Opens Wednesday  
By Pearsons

Welcome to 'The Old Corral,' and enjoy some down-home cooking by people you know!

Jim and Barbara Pearson, owners and operators of B&J Kountry Kitchen have purchased the former Hungry Mule Restaurant, and expect to have it open by Wednesday, as Muleshoe's finest steak house. However, Jim Pearson, who will be operating the steak house, said he will also feature a sandwich and ala carte menu, much the same as featured at B&J Kountry Kitchen right now.

Pearson said The Old Corral will be open 5 a.m.-10 p.m., seven days a week, and he will be featuring coffee for 35 cents, with his specialty, fresh, not frozen steaks.

He also says he will have a buffet at least six days a week, Sunday through Friday, and possibly on Saturday.

"Our goal is to satisfy the people," said Pearson. "If

Safety Program Lauded  
By Three Way Students

For approximately 10 years, Muleshoe City Police Chief Wayne Holmes has been involved with a safety program for youth through the National Child Safety Council.

With local businesses providing funds, Holmes purchases each year for distribution,

programs on Bicycle Safety, How To Talk To Strangers, Drugs, Tornado Safety, Home Safety, and other programs to be distributed to schools.

About the time schools start in Muleshoe and the area each fall, Chief Holmes visits the schools and distributes his materials. He also goes back to the schools and presents programs, at times.

Thursday morning, he received the following letters from one class at Three Way Elementary School, thanking him and the local sponsors for their programs:

Dear Muleshoe Sponsors,  
Thank you and the other sponsors for remembering Three Way Schools when you distributed your safety material. They were attractive, well written, and the children really enjoyed the activities and games. I know that at least some of my third graders have come words with their parents. They helped me develop classroom and playground rules. They had some practiced fire drills and planned alternate routes and family meeting places. They learned their addresses and phone numbers. We haven't done much on first

Community Thanksgiving  
To Feature Choir Effort

The Bailey County Ministerial Alliance says it is pleased to announce this year's Community Thanksgiving Service will be on November 22 at 7 p.m. (Pre-Service music begins at 6:40 p.m.).

Services will be hosted by the First United Methodist Church, and Paul Brigham, pastor of the Progress Baptist Church will bring the message.

There will be a reception for everyone attending following the service. The reception will be held in the fellowship hall of the church.

A change for this year is that the musical leaders of some area churches are working to form a community choir for the service. People interested in being a member of this choir should plan on rehearsing November 15, and again on November 22.

Child care will be provided. If you have questions concerning the community choir, please call the Methodist Church office at 272-5517.

The Bailey County Ministerial Alliance made the following statement: "We urge everyone in the community to take part in this worship service. We have much to be thankful for, so let's get together and express praise to our God as a community."

### Federal Truck Regulations To Be Explained

On Thursday, November 19, at 9:30 a.m., a meeting very vital to the trucking industry will be held at the Hereford Community Center at Hereford.

According to officials, the meeting concerns Federal Motor Carrier Safety Regulations, and how they will affect the trucking industry and local business.

Sponsors of the meeting are the Trucking Industry of Hereford and the Farm Related Industries of Hereford.

Representatives from the Department of Public Safety License and Weight Service from Lubbock will be explaining the regulations, and each person attending will need a copy of the Federal Motor Carrier Regulations. The copy may be obtained from Texas Motor Transportation Association, Austin, by calling 512/478-2541; or American Trucking Association, Washington, D.C. 1/800/ATA LINE.

Copies may also be obtained from the Hereford Chamber of Commerce by calling 806/364-3333.

The meeting is free to the interested public.

The sheriff and chief, along with the fire chief and director of the Bailey County Ambulance Service also asked that the public please refrain from calling any of the emergency agencies when they hear sirens.

All the agencies are very busy during an emergency, and do not have the time to answer questions to satisfy the curiosity of the general public.

Your telephone call may hinder any given emergency situation.

A good rule of thumb would be, if you hear sirens, or see flashing red or red and blue lights, pull to the far right side of the street or highway, and allow the emergency vehicle or vehicles to pass -- then DON'T follow them. Stay out of their way, they have an emergency function to perform, and are trained to do their job. You will only be in their way.

And, usually, if there is one emergency vehicle, police, ambulance, or fire, there will be others. Keep a watch for them -- it is also illegal to not give way to an emergency vehicle. You may save not only a life -- but keep dollars in your billfold that COULD be spent before the judge as a fine.

## BAILEY COUNTY ELECTRIC COOPERATIVE ASSOCIATION

Proceeding down a road or turnrow with a high-rising implement requires care.

Machinery that can be mechanically elevated must be used carefully to avoid danger.

### Use caution during harvest

Cotton harvest is here, and the Cooperative is urging everyone to use extreme care when operating harvest and other farm equipment near electric lines. Cotton module builders, for example, can easily contact an overhead electric line. The same hazard exists with the overhead baskets on cotton strippers.

So the Cooperative urges

— specifically and emphatically — that operators of module builders make sure the packer arm is lowered as far as it will go before moving the implement from one place to another. And the Cooperative further urges

stripper operators using an overhead basket to check for overhead lines before dumping the basket.

If some piece of equipment does contact a 7,200-volt overhead line, the operator should not try to back

away. The line could break, or if the line is already broken, it could tangle in the equipment and break again, compounding the problem and increasing the danger.

The thing to do when equipment contacts an over-

head line is to jump clear of the machine, being sure not to touch the ground and the machine at the same time. Once clear of the machine, the operator should move quickly away from it at a right angle to the power line. Then, whether the line is broken or not, he should call Bailey County Electric Cooperative at (806) 272-4504 just as soon as possible.

**Develop Partnership For Health**

A partnership in which patient and doctor share the responsibility for maintaining or restoring health can contribute to quality health care, according to a health education expert.

"Becoming an active partner in your health care starts by choosing a doctor you can communicate with," says Dr. Mary Ann Heussner. "Select a doctor who will listen, ask questions and thoroughly explain a diagnosis or treatment."

She emphasizes that patients have equal responsibilities to communicate by giving complete and accurate information to their doctors and asking questions when they don't understand.

"Since you're paying for expert medical advice, never hesitate to question your doctor about anything you don't understand," Heussner advises. "Don't be reluctant to ask the doctor to translate medical jargon into plain language or to take notes if you wish."

Heussner, who is a specialist with the Texas A&M University Agricultural Extension Service home economics program, notes that it may be especially important to ask questions about diagnostic tests, medications and the costs, risks and benefits of treatment alternatives.

To take a more active role in your health care, the specialist advises the following steps:

- Keep a record of your personal health history. It will be helpful in providing information the doctor may need for a diagnosis. A Family Health and Medical Record is available through county Extension offices.

- Prepare in advance for a doctor's visit. Be prepared to provide the doctor with specific information on your current problem, symptoms, family medical history, current medications and personal habits.

- Read labels on over-the-counter medicines and take prescribed medicine according to directions. Make sure you know how and when you should take the medicine and for how long. Ask about side effects, and if there are any foods, beverages, medicines or activities that should be avoided while taking the medication.

- If, by chance, you have any doubts about a treatment plan, get a second opinion. But once you and your doctor agree on a treatment plan, it's a waste of time and money if you fail to carry it out.

**Eternal Vigil...**

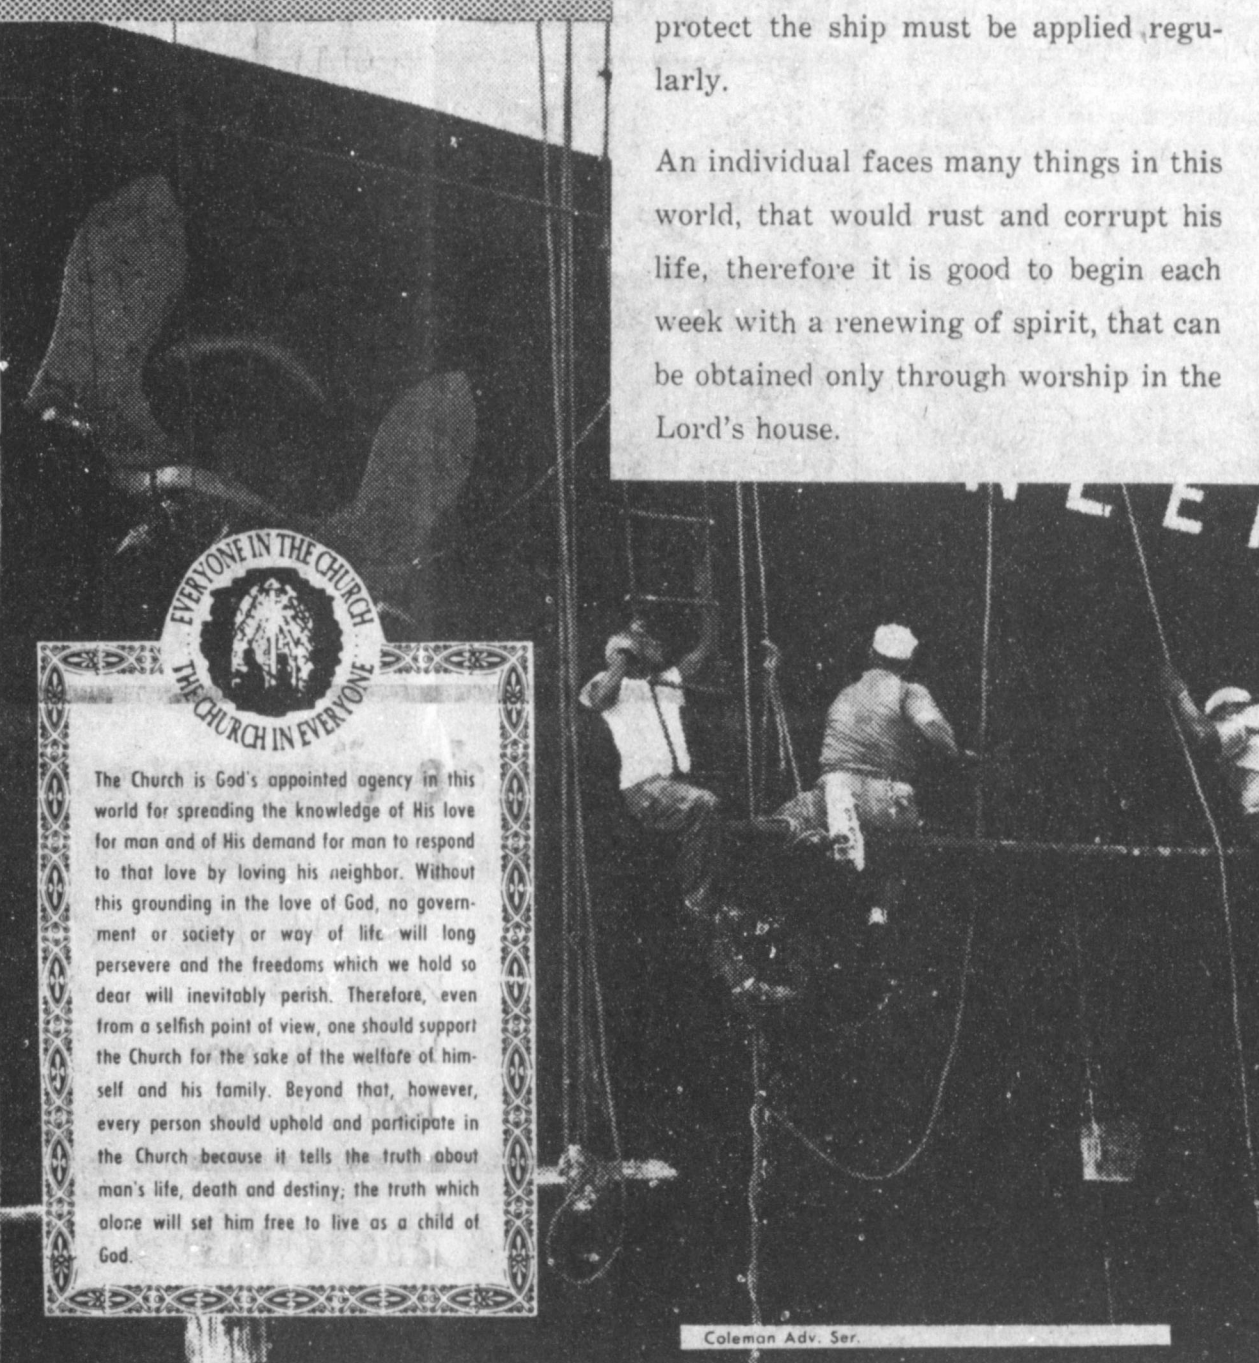

Salt air, the beating of heavy waves, and rains... these are just a few of the elements that a ship must face constantly. With all of these things, it is little wonder that the crew must be alert, looking for rust and other damage. New paint to protect the ship must be applied regularly.

An individual faces many things in this world, that would rust and corrupt his life, therefore it is good to begin each week with a renewing of spirit, that can be obtained only through worship in the Lord's house.

**EVERYONE IN THE CHURCH THE CHURCH IN EVERYONE**

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

### 'Horns, Mullettes In Scrimmage At Lazbuddie

Last Tuesday, the Lady Horns from Lazbuddie opened their 87-88 basketball program by taking on the Muleshoe Mullettes at Lazbuddie.

The JV played first with the Mullettes taking all four quarters, finally winning by one point.

This was followed by the Lady Horns taking on the varsity Mullettes.

In the scrimmage, the final score was Mullettes 37-Horns 35.

Both teams tried new plays and new defenses.

The Horns had a very respectable 84.2 percent from the free shot line with 28 percent from the field, with everyone finding a comfortable shooting range. McGehee of Lazbuddie shot the only three point shot made.

For Lazbuddie, the scoring was McGehee, seven; M. Jennings, 17; J. Jennings, 10; Jesko, four; Redwine, five and Daniel, two.

on a 26-yard run to give them an edge. They also ran the ball in for two extra points to widen the lead. Not to be outdone, Muleshoe's Del Toro again took the ball two yards home with 1:50 left in the half. The PAT was good and Muleshoe once again tied Dimmitt with a 21-21 score.

Dimmitt came back to life and scored again two plays later, leaving the Mules behind by seven. The Mules played their last trick of the half and sent Mark Underwood into the end zone with 0:09 left on the clock. The PAT attempt failed and made the score 28-27 at the half.

The third quarter brought Dimmitt out ready to do battle, but not ready enough. Muleshoe took the ball across the line in a one-yard touchdown run by Armando Del Toro again, with 4:45 left to play in the third. Both teams held each other scoreless for the remainder of the quarter.

The first team to break the stalemate was Dimmitt when Chad Davis took the ball one yard for the last of the Bobcat touchdowns.

The rest of the game was a fight for points by both sides. Most Muleshoe fans had given up hope of scoring again. Daniel Olivas proved what patience will grant, however, when he took the ball four yards across the line with 0:35 left in the game. The PAT failed, but Muleshoe came home with a 40-34 victory and a 5-5 record for the season.

The Muleshoe Mule team is to be congratulated for their never-say-die attitude and their enthusiasm.

This game closed the season for the Mules, but we look forward to next year to see what surprises are in store for our opponents. So.....until next time!

**KNOW THE WEATHER**  
In climbing up, or driving up, mountains, in the United States, is it important to allow for lessening oxygen?  
It is very important to understand the composition of the atmosphere in ascending mountains—as it is in flying. While most of the gas that surrounds the earth (the atmosphere) is not oxygen, the supply of this gas is vital to our breathing and health. As we ascend, the air gets thinner and we do not breathe in the normal supply of vital oxygen. If you reach an altitude of 10,000 or 11,000 feet, climbing or driving, you have reached a dangerous altitude. In a few places in this country our mountains rise this high. Even at 8,000 or 9,000 feet, the effects are considerable. Above 9,000, extra oxygen should be used. Vision at night is very poor at this altitude without additional oxygen. If in doubt whether you are suffering from anoxia, look at your fingernails. They should be pink, and if they are turning bluish, you are experiencing anoxia.
