

# Gov. Murray Threatens to Shut Down All But Strippers

# OCEAN FLIGHTS BEG

## ULTIMATUM IS GIVEN TO OIL INDUSTRY

Will Use Military Power to Enforce Order If It Stop Production.

## SEEKING DOLLAR

Stormy Executive Determined to Prevent Depletion of Resources and Losing of Tax Money.

OKLAHOMA CITY, July 28. (AP)—Governor Murray issued an ultimatum to the oil industry today that if oil prices are not increased to \$1 per barrel by Saturday night he will sign an executive order shutting down all but stripper wells in Oklahoma.

Murray said he would enforce the order if necessary by military authority.

"The oil should be more than \$1 a barrel," he said. "But we will give them a chance to raise to that figure. If they do not then I'll issue my executive order and shut down everything that is now under production."

## Schools Hard Hit

The state and schools are getting nothing in the way of taxes from oil at the present price—a top of 50 cents a barrel—the governor said. "We can't let this go on, depleting our resources and getting no taxes from them," he added.

Production at present low prices constitutes waste, the governor said. "The state won't try to raise the price," he said. "We'll simply shut them down due to economic waste and if their storage is depleted in six or eight months and prices go to \$2 a barrel because they need the oil, that's just a result we hope will be obtained."

Murray charged that not all oil production from the Oklahoma City field had been reported. He believes, he said, that "bootlegging" is going on and that probably five million barrels of oil has been taken from the field in the last month.

Cities Abuses Three large companies do not want to close their wells but are now draining other leases in the area, Murray said.

Replying to allegations that such a shutdown would be in effect in interference with interstate commerce the governor said that he had no intention of interfering with the interstate commerce of oil until the surface and he proposes to shut it off and not allow it to reach the surface.

"Week before last I told a group of oil men I would shut down the fields at the end of that week," he said. "Someone must have tipped the thing off because the oil buyers started raising their prices. Probably I should have gone ahead and issued the order then but I thought it best to wait until the Red river bridge was over."

## Lindberghs Are To Say Farewell to Augustus Jr.

WASHINGTON, July 28. (AP)—Col. and Mrs. Charles A. Lindbergh left today for North Haven, Maine, for family farewells before continuing their aerial vacation trip to Japan.

WASHINGTON, July 28. (AP)—Colonel Charles A. Lindbergh announced today that he and Mrs. Lindbergh would take off about noon for North Haven, Maine, en route to the Orient.

Completing necessary details at the state department and the Japanese embassy sooner than he had expected, Colonel Lindbergh and his wife came directly to the Anacostia naval station, where his plane was moored overnight and said they would depart as soon as he had tested his radio and refueled. He expected this to be about noon.

The Lindberghs arrived last night from New York on the first leg of their flight to the Orient.

While Lindbergh climbed in and out of the plane watching the refueling and shifting the radio test wires, his wife sat in the rear cockpit with the radio earphones clamped to her head. She is to do the radio operating on the long trip and occasionally relieve her husband as pilot.

ROCKLAND, Me., July 28. (AP)—Charles A. Lindbergh Jr., 13-month-old son of Colonel and Mrs. Lindbergh, arrived here today in charge of a nurse.

They went aboard the Lindbergh yacht Novette for the 12-mile trip to North Haven, where they will spend the season at the summer home of United States Senator and Mrs. Dwight W. Morrow of New Jersey, parents of Mrs. Lindbergh.

## ROBBER IDENTIFIED

MALLAS, July 28. (AP)—Mrs. E. L. Reed, of Waco, today identified M. E. Harper and Mike Monico as two of the four men who robbed her of her automobile, 50 gallons of kerosene, \$157 in cash and a \$500 bond last Friday night as she drove into a private garage here.

## They're Winging Toward Distant Moscow

Undaunted by the near-disaster which marked their first attempt to take off on a round-the-world air voyage, Major Clyde E. Pangborn and Hugh Herndon Jr., today made a second successful try and rapidly left land behind. Pangborn (right) and Herndon are shown here in the cockpit of their red Bellanca monoplane which has a cruising range of 5,500 miles.

## Three Robberies Reported

### Santa Fe Car Is Looted of Eight Big Cases of Camel Cigarettes.

Three costly burglaries committed last night are being investigated today by county and city officers.

The most daring of the three took place in the Santa Fe railway yards where a freight car was broken into and eight cases of Camel cigarettes, valued at \$548 were taken.

The cigarettes were billed to Hamlett-Mitchell company. The shipment included nine cases, one case being left in the car. Investigation of the theft is in charge of A. J. Davis, Santa Fe special officer.

C. A. Alexander reported the theft of 1,200 feet of two-inch tubing from a well owned by the Wetzel Oil company on the Morse lease near LeFors. Mr. Alexander was recently appointed receiver of the company. The sheriff's department is investigating.

A Ford truck was taken from the garage at Pampa Ice company's No. 1 plant during the night, according to a report made at police headquarters this morning.

## Highway Route Through Pampa Not Known Yet

The exact route of highway No. 33 through Pampa will not be surveyed until field notes for the road from the city limits to Miami have been completed. L. A. White, resident engineer for the state highway department, said this morning.

A party of surveyors is now laying out the route from Pampa to Miami. When they complete this work, surveying of highway No. 88 will be started. Route of the road through the city will be determined by the state highway department, county and city commissioners.

## Bilbo Suit Is First on Docket

Trial of International Supply company's suit against George W. Bilbo and others is scheduled to begin this afternoon before Judge Clifford Braly in 114th district court.

Some phase of the case, now famous throughout the Panhandle for its number of defendants, plaintiffs, intervenors, has been before the court in every session since 1929.

This morning, Judge Braly granted judgment to Mrs. Geneva Clark against Mrs. Lena E. McAuley and others for foreclosure of four vendors' lien notes; for foreclosure against lot 15, block 2, Alexander addition and for chattel mortgage on household goods.

The following cases were ordered removed to the federal court at Amarillo: J. R. White vs. Maryland Casualty company, A. C. Dale vs. Phillips Petroleum company, E. R. Carey vs. U. S. Fidelity and Guarantee company, Bert Franklin vs. Associated Indemnity company.

## Three Robberies Reported

### Graf Zeppelin Settles on Hooker Island Bay to Meet Russian Boat

FRIEDRICHSHAFEN, Germany, July 28. (AP)—Dr. Hugo Eckener, commanding the Graf Zeppelin on her Arctic cruise, notified the Zeppelin Works by radio today that the big dirigible had landed briefly in the bay of Hooker island, Franz Josef land.

For thirteen minutes she rested on the still waters of the bay near the Russian icebreaker Malign, which sailed into the north with a party of tourists and anchored off the island for the rendezvous.

Floating ice in the Arctic bay made it inadvisable for the Graf to remain on the water longer than she did.

## East Texas Producer Blazes Two Blocks Off Kilgore Main Street

KILGORE, July 28. (AP)—B. F. DeLong, veteran oil field firefighter, extinguished the flaming Thorpe No. 1 Butts well early today by closing the gate valve with a special pipe device.

KILGORE, July 28. (AP)—Two blocks from the main business section of this bustling oil town another East Texas field producer, the Butts well, was in flames today.

Following an explosion of the oil tanks near the rig last night the well caught fire. Clyde Erskin, 35, was killed in the blast. Two more workmen were burned though their injuries were not thought to be serious.

Firemen fought desperately to prevent the flames from reaching the well but lost after an hour and one-half battle. The well was drilled in late in the afternoon and was flowing by heads. No estimate of (See EAST TEXAS, Page 6)

## Science Fights Grasshopper Horde

Crops Are Denuded by Millions of Hopping Flying Insects.

MINNEAPOLIS, Minn., July 28. (AP)—Science, apparently with its back to the wall, was fighting today to stem the tide of hordes of creeping, hopping, and flying grasshoppers, which are playing havoc with the crops of Minnesota, Iowa, Nebraska, North and South Dakota.

At Des Moines, the Iowa capital, plans were being made for a meeting of entomologists and agricultural leaders to devise means of combating the hordes of insects which have moved relentlessly across the Missouri river eastward. At the same time Iowa state officials sought an appropriation of \$50,000 to fight the plague.

Meanwhile, militant farmers, armed with poison mixtures, returned to the fight. In some Minnesota counties the situation was so bad that other farm activities were suspended to leave the farmers free to war against the pests which have penetrated fields, pastures, and orchards, leaving them virtually bare of green vegetation and harvestable crops.

## Oil Testimony Varies

### INDEPENDENT AND OFFICIAL GIVE OPINIONS

Gulf's Mr. Nazro Says Bills on Conservation Intended to Affect Supply and Demand in Industry.

## "FARCE COMEDY"

Wichita Falls Operator Says Major Firms Make Life Hard for His Kind—Probe End Delayed.

AUSTIN, July 28. (AP)—The first representative of a major company to appear before the Texas legislature in opposition to proposed remedial oil regulations occupied the senate today, while the house heard the big companies further belabored. The legislature is investigating the industry's plight and considering ways to relieve it.

Underwood Nazro of Houston, vice-president of the Gulf Production company and the Gulf Pipeline company, testified before the senate that projected statutes were efforts to authorize the restriction of production to demand "in the guise of conservation."

E. H. Eddie, independent refiner from Wichita Falls, appearing in the house, testified the major companies were "grabbing up" most of the market outlets and making things extremely difficult for the independents.

Mr. Nazro said every effort to "artificially force balancing of supply and demand" had ended in failure and that "any attempt to circumvent economic laws merely delays the ultimate and inevitable adjustment."

He read a short prepared statement of the policy of his companies. The two, he explained, would support "true conservation," but were against "schemes to voluntarily or by compulsion restrict bargaining and competition."

He favored, he went on, laws to prevent physical waste in oil, but believed the legislature should exclude any "interference with the supply and demand made in the guise of preventing waste."

Any theory for common ownership of oil fields, said the executive, would result in "confusion and injustice" and would be opposed by the Gulf companies.

Though believing the railroad commission's statewide proration order of last year was "an effort to reduce production down to the so-called market demand," the companies obeyed the order, Nazro testified.

Ed Landreth of the central proration committee had asked him to give \$12,000 or \$12,500 to help pay the committee's bills.

"Ed asked me," said the witness, "Naz, when are you going to send me that money for the central proration committee?"

"I laughingly passed it off as a joke. Called on to explain why 'East Texas oil was selling at ten cents a barrel' whereas production elsewhere brought 'four or five times' that much, Nazro smiled and said he had found any buyer tried to buy as cheaply as possible, 'when there are a lot of men clamoring to sell.'"

Eddie's early testimony in the house was largely an effort to show the pipeline situation was unsatisfactory and unfair to the independents. He said the Wichita Falls section particularly had been injured.

Representative Dewey Young of Wellington introduced a bill to regulate connection and buy ratably from all producers.

The senate, before starting with Nazro, tabled subject to call, a resolution to end its inquiry tomorrow night, since one to that effect already had been passed. It heard, also a terse denunciation of its inquiry.

RAYMONDVILLE, July 28. (AP)—Officers of four valley counties, aided by rangers, border patrolmen and many civilians, today continued to beat the brush throughout the border section in search of the slayer of two Willy county officers, shot to death on the street here Sunday night.

## LONG TRIPS LAUNCHED AT EARLY HOUR

Herndon and Pangborn Flying to Moscow, While Polando and Broadman Are Seeking to Reach Turkey.

## POWERFUL SHIPS

Distance Record Likely Will Be Broken; Anxiety Felt for One Pair Who Seem Without Bearings.

NEW YORK, July 28. (AP)—Hours after Russell Boardman and John Polando took off for Turkey today officials at Floyd Bennett field were anxiously awaiting news of them, because when last seen they were going in the wrong direction.

There was a west wind blowing and so the fliers had to take off into the west. The heavily loaded plane, which last week they were unable to keep in the air, rose sluggishly and skimmed out over the bay. It was believed after gaining sufficient altitude the fliers would turn and pass again over the field, heading up the coast for Newfoundland. But the plane continued lumbering westward until it faded from sight.

It was generally supposed it had swung in a wide circle and so was invisible from the field as it struck its course for the east, but nevertheless word was awaited with some anxiety.

Eighteen minutes after Boardman and Polando took off Clyde Pangborn and Hugh Herndon started on their flight around the world. They had even more gasoline than the first plane but they had a stronger engine too and rose without difficulty, banking steeply around, passing back over the field, and heading straight for Newfoundland and the Atlantic.

NEW YORK, July 28. (AP)—Frank Dordbanc, Alaskan pilot and friend of Hugh Herndon, who flew a 60-companing plane for 35 miles, said on his return that Herndon and Pangborn were riding at 100 miles an hour at an altitude of 400 feet. He said Herndon took out his charts to map his route at that point.

## NO DISCORD DEVELOPS IN COUNTY TAX VALUATIONS

Basis for Producing Wells Is Reached; Sessions Will Last All Week.

Unmarred by the discord which sometimes prevails at tax hearings, the county commissioners, sitting as a board of equalization, achieved satisfactory progress in the fixing of oil and petroleum values in Gray county yesterday and today.

The county's oil tax assessor, Thos. Y. Pickett of Dallas, said that he was pleased with the hearings. Friendly jibes passed between the commissioners, oil company representatives, and Mr. Pickett and his employees, but harmony prevailed, and indications are that no serious disagreements will occur.

Yesterday, valuations for the Empire Gas and Fuel company, Pure Oil company, Sun Oil company, and Shell Petroleum company were fixed. The holdings of Magnolia Petroleum company were being evaluated this morning.

Wells producing below 10 barrels daily are valued for equipment only. Wells that made from 10 to 20 barrels daily on open flow are valued at \$100 per barrel, using the months of October, November and December, 1930, as a basis. Wells that made from 20 to 40 barrels daily are valued at \$150 per barrel. Wells that produced 40 barrels and above are valued at \$200 per barrel.

Prorated wells whose daily average was from 10 to 20 barrels are valued at \$240, and such wells whose daily average was 20 barrels and above are valued at \$325 per barrel.

The board is due to be in session throughout the week.

## SLAYER STILL SOUGHT

RAYMONDVILLE, July 28. (AP)—Officers of four valley counties, aided by rangers, border patrolmen and many civilians, today continued to beat the brush throughout the border section in search of the slayer of two Willy county officers, shot to death on the street here Sunday night.

## Lawn Fete on Friday Will Be Very Informal

Delightfully informal will be the lawn fete to be held Friday evening, commencing at 8:30 o'clock, on the lawn at the home of Dr. and Mrs. W. Purviance, 802 West Francis avenue.

The entertainment will include music, dancing, readings, and specialties arranged under the direction of Mrs. May Foreman Carr, chairman of the Music Week committee.

Dancing pupils of Miss Catherine Bincent, expression pupils of Mrs. Helen Turner, and the women's chorus directed by Mrs. C. S. Wortman will be featured. There also will be orchestral music by the Collegians, and numbers by an instrumental trio and a mixed quartet.

Chairs will be placed on the lighted lawn for the several hundred persons expected to attend. There will be no admission charge, but light refreshments and confections will be sold during the evening. The program will last for an hour and a half, with the audience free to come and go as desired.

## Charges to Be Filed in Elston Slaying Affair

AMARILLO, July 28. (AP)—District Attorney Edw. W. Thomerson said today that charges would be filed this afternoon in the shooting and perhaps fatal wounding of Bill Elston of Panhandle at a resort dance hall near here Sunday night. Thomerson did not name the person against whom he will prefer charges.

Elston, with a bullet wound thru his head, was gradually growing weaker at a local hospital, attendants said. He has been unconscious since the shooting.

Mystery has surrounded the shooting. Elston was fleeing from two city officers who sought to arrest him on a criminal assault charge. Both officers deny firing. One of the officers was so close to Elston that he stumbled over the wounded man.

WOMAN ON TRIAL DALLAS, July 28. (AP)—Nine jurors had been selected up to noon today to try Mrs. Ziona Mary Solvin on a charge of murder for the slaying of her estranged husband, John C. Sperry.

Elzy Vanderburg, son of E. F. Vanderburg, and Mrs. W. H. Potter underwent minor operations at Pampa hospital this morning.

Elzy Vanderburg, son of E. F. Vanderburg, and Mrs. W. H. Potter underwent minor operations at Pampa hospital this morning.

## THE WEATHER

WEST TEXAS: Generally fair to night and Wednesday, except unsettled in the Panhandle Wednesday.

OKLAHOMA: Fair and continues warm tonight and Wednesday, except scattered showers and slightly cooler in extreme north portion Wednesday.

AND A SMILE OKLAHOMA CITY (AP)—Seven boys who go swimming raw head about have a friend at court. Caught by Attorney Lewis R. Morris from six youthful bathers with the remark: "I didn't know what a bathing suit was until I was 20 years old."

### TESTIMONY NOT SO ENLIGHTENING

Just how clear is the oil situation after the testimony of Texas company's Mr. Holmes and Humble's Mr. Farish before the legislature?

The Texas WEEKLY says the testimony "has served to clear the atmosphere to a surprising degree and has resulted in refuting entirely certain charges with respect to 'big companies' in relation to the price debacle and the precipitation of the existing critical situation." With this we disagree. The spokesmen sought to prejudice the legislators against an oil tariff, using "free trade" arguments of another era. They found it easy to answer most of the questions asked by the legislators, largely because the average legislator knows little of the workings of the industry's competition.

Mr. Holmes is extolled by The WEEKLY for having brought out that the Texas company is owned by 80,000 stockholders, none of whom owns more than 2 per cent of the stock. Mr. Holmes could have added that most of these stockholders have absolutely nothing to do with the policies of the company and that a handful of executives make all the decisions. The railroads also are widely owned but narrowly controlled, and strict regulation of their policies has been necessary.

The appearances are that the legislature is going to end the investigation just as it arrives at a strong scent on the trail to the real problem. But there are a number of lawmakers who realize that prices are largely what a few companies make them, and that when East Texas

### FRECKLES AND HIS FRIENDS

By Blosser

is properly curtailed there will still be many ailments in the industry.

Constitutional restrictions prevent the state from making decisions for business men in the operation of their industries. The state can be an impartial referee and it can prevent physical waste, but if it is going to undertake to make the oil business conform to production in Oklahoma, in California, in Mexico, and in Venezuela, and stifle the initiative of the wildcatter and the small producer, it should adopt socialism and rewrite the constitution accordingly.

Control of physical waste and training of leases plus restriction of imports until the domestic supply is low enough to command a fair price, remain the best means of helping the industry. These, together with regulation of pipelines and purchasing, are within the proper scope of government, and should be carried out energetically.

### By RODNEY DUTCHER

WASHINGTON, July 27. (NEA)—"Hoover luck," which the president's friends have been demanding fervently almost since he took office, has prevented a presidential vacation for the third successive summer. Mr. Hoover has fondly anticipated the vacations, but important business has had a way of piling up at the wrong time to deny him such summer holidays as most other presidents have been able to take. President Coolidge stayed here one summer out of five.

The 1929 summer found Hoover with an extra session of congress crowding in. Last summer he planned a vacation to the west and its national parks, only to be thwarted by drought and depression. This year he hoped to get to California, but found himself swamped with work—agricultural situation, deficit situation, political situation and lots of routine. Then the European situation turned critical and it became obvious that he must be content with week-ends at the Rapidan camp. The president continues to be one of the hardest working ones we've had and his secretaries insist he works all the time when he isn't asleep.

ALBERT B. FALL is the only man who has gone to prison for his part in the famous oil scandals and the only Harding cabinet officer to be punished for misdeeds. This fact recalls the story of a veteran newspaper man who talked to Fall back in 1922 when Fall was under attack for the oil leases and his anti-conservation policies, but before anyone knew of his actual dealings with E. L. Doheny and Harry Sinclair.

Fall panned the administration hard, with especial reference to conservation and Attorney General Harry M. Daugherty. He told how he had "saved" the Navy's oil.

"This administration is going down," he concluded, "and I'm not going down with a sinking ship."

The correspondent asked if that meant he were about to resign and Fall said it did, but not for publication as coming from him. A couple of days later President Harding denied that Fall would resign, paying considerable tribute to his cabinet member. But within a week Fall had deserted the "sinking ship."

THE CORRESPONDENTS here seldom regard a high government official for being helpful to them, but they're doing that for Under-Secretary of State William R. Castle. Thanks to Castle they kept better informed during the debt moratorium negotiations than were newspaper men in European capitals. The under-secretary had a press conference for them after nearly every telephone call from Paris, Berlin or London, sometimes in the evening and including one at 8:30 p. m. July 4. There were about two conferences a day. Castle stood until the last question was answered in one way or another. The reporters got so enthusiastic about him that they are now taking up a subscription to buy him something nice.

IN 1922 THE CORRESPONDENTS bought a pair of shears for Chief Justice Hughes, then secretary of state, who had Washington Arms Conference. One correspondent memorized a handsome presentation speech and then, in delivery, punctuated nearly every high-sounding sentence like this: "—honor to present to you these scissors with which we hope you will cut the Gordian knots of diplomacy. Ain't that nice?" Hughes came back with an impromptu speech of acceptance and after each remark demanded: "How do ya like that?"

### Who Will Get the First Dances?

### STRANGE IDEAS

(From the Marshall MORNING NEWS)

This man Edy, the newly appointed city manager of Dallas, has some very new, but very salutary ideas about city government. He has a novel obsession that he was appointed to save the taxpayer's money. He looks into the health department of the city and finds that \$17,000 of the public funds are being squandered there on useless employees. He turns to the water department and finds that \$26,000 can be saved annually and at the same time improve the service. And thus he goes on in his efforts to save the taxpayer's money. His savings already amount to more than \$200,000 annually. Of course there is a howl from the political job holders, he is charged with being an autocrat, non-progressive and a dozen other things and all because he is introducing business methods into municipal affairs.

There isn't a city in the country scarcely that is not loaded down with unnecessary officials. On an average the cost of municipal government has increased 281 per cent since 1914. These figures are from the United States Commerce Department. No one would claim that any such an increase was necessary.

Just now the president has been looking into the governmental departments. He has found out that \$143,000,000 can be saved in six departments. Governor Sterling lopped off more than \$3,000,000 of appropriations made by the last legislature and we suppose no one will claim our national and state governments will not function efficiently with these reductions put into effect. With the national and state administrations leading the way in economy there is appearing a rift in the clouds. But that economy will not be very effective in relieving the tax burdens unless it extends all the way down the line.

### Many Divorce Suits Dropped by Stormy Couples

Out of 105 suits for divorce on the dockets of 114th and 31st district courts, about 40 will probably never go to trial, a reading of the docket yesterday by Judge Clifford Bray indicated.

For the last year, the number of divorce suits has equaled the number of marriages performed in Pampa. However, about one-fourth of the divorce suits are settled out of court. Participants of divorce suits filed from six months to a year ago are now living together, apparently happy.

### Kentucky Crude Is Raised Again

LOUISVILLE, Ky., July 28. (AP)—Kentucky crude oil prices today were back to the levels of three weeks ago, before 15-cent reductions per barrel were made in the Western Kentucky, Eastern Kentucky, and Southern Kentucky fields.

The latest increase was in the Legrande pool in Hart and Barron counties. The Stoll Oil Refining company announced yesterday it had raised the price back to 50 cents after a short term of 35-cent quotations that forced a temporary shutdown in that field.

The price in Eastern Kentucky was raised from 40 cents to 55 cents Saturday by the Ashland Refining company. Thursday the Western Kentucky price was boosted back to 50 cents from 55 cents. The increases followed higher quotations posted by refiners in the Oklahoma and Texas fields.

KERRVILLE, July 28. (AP)—Ervin Liesmann, 16, was fatally injured and five other persons were hurt when an automobile in which they were riding plunged over an eight-foot embankment near the Kerrville

### PROFESSOR IS MUCH PRAISED

#### Makes Bacteria Grow Until They Can Be Seen Under Microscope.

CHICAGO, July 28. (AP)—A shy pipe-smoking professor of bacteriology who has invaded germland and exposed its myriads of unseen armies to the scrutiny of science, was lauded today in a maelstrom of praise and inquiries from the scientific world.

Embarrassed by the limelight into which announcement of his theory of germ transformation had suddenly thrust him, D. Arthur Isaac Kendall of Northwestern university has steadfastly refused to answer questions but busied himself with perfection of the discovery to announce it to an eager world of science in a university publication two weeks hence.

A few additional facts were volunteered, however, by D. Irving S. Cutter, dean of the Northwestern school of medicine, who has cooperated closely with D. Kendall through-out years of experiments.

With medium K—food for germs composed essentially of small intestine of man, swine, dog or rabbit—Dr. Kendall has caused the germs to grow manifold from the invisible to the visible stages and he can also send them back into the unseen, Dr. Cutter said.

This simple process has been described by scientists who heard the announcement last week, as the greatest medical discovery since Louis Pasteur because, they said, it will place within the reach of laboratory workers elusive bacilli and make possible the discovery of the causes of many maladies, among them influenza, common colds, rheumatic fever, sleeping sickness, and even polio cancer.

The germs, fed on medium K grow to comparatively tremendous proportions within two or three weeks

and disintegrate into invisibility within 10 days.

The discovery, D. Cutter said, has lifted a veil of mystery surrounding the double life of germs for years. Scientists have suspected their existence but observed their manifestations but they remained outside the field of microscopical vision.

Hitherto the standard test of presence of germs was the Berkefeld filter, a stone so fine that no visible bacilli could pass through it. Dr. Kendall filtered substances and demonstrated that invisible germs existed where science could see none easily by nursing them along on medium K.

The experiments, too, have led to the discovery for the first time in the world's history of what science believes is the germ that causes influenza. Diplococcus, it is called and looks like a double-biscuit. Seven cases of the "flu" in as many sections of the city yielded the same germ.

And while medical men of the world look toward Northwestern to learn the exact constituents of the magic medium K-preparation of which Dr. Cutter said is so simple a 10-year-old boy could fix it—Dr. Kendall is working and yearning for his annual vacation deep in the big smokies of Tennessee.

### LEO GEORGE IMPROVES

LONDON, July 28. (AP)—David Lloyd George had a somewhat disturbed night but his general condition remains satisfactory, according to a statement issued from the central office of the Liberal party today.

The kidney ailment from which he is suffering is diminishing, the statement said, "but until this subsides there will be cause for some anxiety."

Miss Myrtle Smith of Elk City, Okla., former bookkeeper of the Harvester cafe here, is visiting Mr. and Mrs. Walter Sill and Miss Helen Hurn.

Miss Marie Bastin returned yesterday from Elk City where she spent the week-end visiting friends.

# GIRLS OF CHURCH ORGANIZATIONS ARE COMPLIMENTED

## GYPSY SLUMBER PARTY IS HELD FOR METHODIST CLASS; LOCAL BAPTIST GROUPS ALSO GATHER

A gypsy slumber party was given by the church class of the First Methodist church Monday night at the courtesy of the Little Loyal Ladies club. The event was held in the home of Mrs. J. G. Stroup, teacher of the hostess class.

A watermelon feast was held on the lawn and lemonade also was served during the evening of games and contests.

Breakfast was cooked over a camp fire this morning, at sunrise and an early morning radio program was enjoyed.

Those attending were Joyce Turner, Elizabeth Wood, Fay Young, Gladys and Elizabeth Heibert, Margaret Spangler, Lillian Rice, Willette Stark, Clarine Sciffon, Marie Catherine Busbee, Lois Parker, Mary Crocker, Ellen Horn, Catherine Horn, Mary Stein, DeLoris Stein, Betty Ann McTaggart, Margaret Carr, Dorothy Burton, Rose Mary Miller, and Bernice McDaniel.

Mrs. Ray N. Johnson, teacher of the first group, was present until midnight and assisted with the games.

### ANNA BAGBY CIRCLE HOSTESS TO GIRLS

The Anna Bagby circle of the Central Baptist Woman's Missionary society was hostess to the girls' auxiliary of the church Monday afternoon in the home of Mrs. G. D. Holmes, 711 North West street.

Following a short business session, Frances Coffey and members of her group presented a program on "Looking Into the Land of the Southern Cross."

Miss Mary Burks, young people's director of the church, led a group of games during the social hour, and refreshments of lemonade and cake were served.

Girls attending were Frances and Marjorie Coffey, Pauline Stewart, Monette Hatchitt, Ruby Scaler, Edith Beckham, Bertie Bell Turner, Herma Beckham, Edna Holmes, Lillie Mae Vaughn, Mable Perkins, Jessie Marie Gilbert, Arline Elliott.

Adults present were Miss Mary Burks, Mrs. G. D. Holmes, Mrs. D. L. Linsford, Mrs. Lloyd Satterly, Mrs. W. C. Brown, and the minister, Mrs. E. V. Davis.

The next program will be held at the church at 4 o'clock on the afternoon of Aug. 10.

### SUNBEAMS MAKE PLANS FOR SOCIAL MEETING

About eight members of the Sunbeams, said gathered at the Central Baptist church for a program Monday afternoon. The leader, Mrs. J. M. White, was in charge.

It was decided to hold a social meeting at the church Aug. 10 at 4 o'clock.

### Parcel Post Is Much Extended in Usefulness to User

Parcel post mail has been increased in size and weight, according to a bulletin received at the local post office yesterday from the postmaster general.

Effective Aug. 1, the limit of weight for fourth-class or parcel post mail for the fourth, fifth, sixth, seventh, and eighth zones will be increased from 50 pounds to 70 pounds, thus making the weight limit uniform for all zones; and the limit of size of parcels for all zones is increased from 84 inches to 100 inches in length and girth combined.

The minimum postage charge on a parcel measuring more than 84 inches but not more than 100 inches in length and girth combined is the same as the approximate zone charge for a 10-pound parcel. That is, parcels measuring more than 84 inches in length and girth combined but weighing less than 10 pounds will be subject to postage in the amount chargeable on a 10-pound parcel for the zone to which the particular parcel may be addressed.

On parcels weighing 10 pounds or more, which measure more than 84 inches but not more than 100 inches in length and girth combined, the regular zone pound rates apply.

This amendment to the postal regulations increases the usefulness and availability of the parcel post as a convenient means of transportation and delivery for merchandise, including farm and factory products, books and other mailable articles, weighing over 8 ounces, not embraced in mail of the first or second class.

This does not amount to a reduction in postage but does increase the opportunities of the public to use the mail.

### TO ASK DEATH PENALTY GAINESVILLE, July 28. (P)

Prosecutors will seek the death penalty for Frank Brockén, charged with firing the shot that killed Walter Clements, city fire marshal, here last week, County Attorney William Culp has announced.

James Vincent of Miami underwent an optical operation at Pampa hospital yesterday.

## LUSTROUS EVENING FABRICS ARE RICH IN HUE; FLUFFY RUFFLES FIND POPULARITY

By DIANA MERWIN Associated Press Fashion Editor. PARIS, July 28. (P)—New evening gowns are known by their skirt lines these days.

The latest after-nine-o'clock robes which Parisian couturiers exhibit have skirts with more intricate drapes and flounces than they have displayed in years. Even trains have been added to the night-time picture.

Fabrics are lustrous and luxurious, while colors reflect the rich hues of Rembrandt's palette, with wine and grape tones such as raspberry, ripe gooseberry, plum and prune prominent in fashion's picture.

One of the most striking of the new gowns is designed of raspberry moire with a tight hipline extending almost to the knees and three narrow flounces gathering the fullness to the front of the skirt.

A ruche of moire flowers in two shades of raspberry, draped about the neckline in a manner reminiscent of the old-fashioned featherboa, and long gloves of the same tint and tissue complete the frock.

Another smart new evening gown is designed of crimson and gold lame, with a wide flounce breaking from the neckline and swirling into a long train, while a third of prune colored chiffon has a knife-pleated skirt clearing the floor in front and sweeping it for 4 inches on either side.

Eggshell satins with skirts ending in a long flounce, embroidered in pearl and coral beads and pale blue and green satins ending in 18-inch trains are also taking their place in the evening mode.

If you want to help the unemployed, let them do these tasks and thus be relieved of the necessity of accepting alms or going hungry.

Remember, however, it is work, not charity, that is needed by the unemployed one who is unwilling to work. It is his duty to eat. Ask those worthy of their upkeep do not want to accept charity.

Autumn housecleaning is not far ahead. There will be curtains to be made and hung, windows to be washed, floors to be varnished, school frocks to be made for children, and scores of other duties to be performed.

You will not only be helping the other fellow by allowing him to help with household necessities, but if you can spare the money, you will also be helping yourself by being able to devote more time to self-improvement. There will be time to paint, to learn to play the piano, to take a correspondence course from college, to write, or to do any of those things you have always wanted to do but could not find the time. There will also be opportunity for golf, tennis, and other sports that make for health and happiness.

Or if you prefer an enterprise which is a little more unique, why not make an indoor garden? That is what a Stator man has done, and has patented an invention in connection therewith.

The garden is built within a room, one outside wall of the room forming the exterior wall of the garden. This is built a second or interior wall which separates the garden from the interior of the room proper.

The exterior wall and the second wall will be formed of glass windows or doors, which can be opened or closed at will. This arrangement gives control over temperature or atmospheric conditions in the garden regardless of what the season of the year may be. In winter, artificial heat, aided by warmth of the sun, furnishes necessary heat. Warm air is supplied from the lower part of the garden, usually from underneath it, and escape flues permit the exit of foul air. In warm months, by opening the windows of the outside wall, exterior conditions are created.

Alex Schelder has returned from Monroe, La., where he attended a state convention of the American Legion. His son, Paul, and Berton Doucette made the trip with him. Mr. Schelder's new hotel at Monroe was headquarters for the convention.

### Broadway Mourns For Chorus Girl

NEW YORK, July 28. (P)—Broadway today mourned Miss Helen Walsh, beautiful 21-year-old folkies girl who died at a hospital in Greenport, L. I., yesterday from burns received when an explosion destroyed Harry Richmond's yacht Sunday.

A few moments after she died, Richmond clowned and sang to a folkies audience, unaware that the girl, whom he risked his life to save, had succumbed. He was not told of it until after the show.

Virginia Biddle, of the folkies, also burned in the explosion, is still at the hospital and will recover, doctors said. The others injured in the blast, including Mark Hellinger, newspaper columnist, were discharged from the hospital yesterday.

Miss Walsh was a native of New York and had been on the stage for five years. She was in the chorus of "Simple Simon," and "Whoopie."

Mr. and Mrs. Howard and daughter, Betty, of Spearman, visited in the home of R. E. Showers Friday and Saturday.

# Pirates Going Nowhere But Whipping Bigger Teams

## NO DAMAGE REGULARLY IN LATE SEASON

Phillies Defeat Cubs, Moving Them 8 1/2 Contests From Cardinals.

By HERBERT W. BARKER  
Associated Press Sports Writer.

Going nowhere in particular themselves, Jewell Eads' Pittsburgh Pirates apparently have decided to assume their customary late-season role—trouble-makers for the rest of the National League.

Year after year the Pirates meekly submit to a general cuffing around for the first two or three months of the season. Then when they're so deeply submerged in the second division a pennant is next to impossible they turn on their tormentors, particularly those clubs that top them in the standings.

Just a month ago the Pirates had won 23 games and lost 38 for an average of .377. Since then they have so far forgotten themselves as to win 19 games out of 29 for the quite respectable percentage of .655. They won their fifth straight victory yesterday, walloping the third place New York Giants, 8 to 6, although out hit, 14 to 10.

The second place Chicago Cubs fell to a point eight and one-half games removed from the St. Louis Cardinals when they accepted a 7-6 beating from the Phillies. Home runs by Buzz Arlett and Pinky Whitney, each with a man on base, furnished the Phils with a lead the Cubs couldn't overcome.

Other National League clubs had a day off.

The American league situation remained unchanged as the Philadelphia Athletics nipped out the St. Louis Browns, 5 to 0 on Eric McNair's tenth inning home run. Babe Waberg chalked up his 16th victory of the year although he had little edge on George Blaholder, who struck out nine men.

The Washington Senators won a free-hitting game from Cleveland, 11-7. Joe Kuhel's two doubles and a single driving in three Senators runs.

Babe Ruth's 27th homer failed to save the New York Yankees from an 8-7 beating by the Chicago White Sox in the first game of a double-header but 17 ascerted singles, doubles and triples gave them the nightcap, 12-3.

The Boston Red Sox bunched seven hits for eight runs in the fourth inning to wallop Detroit, 13-4.

## King and Queen of Siam Soon to Take Departure

WHITE PLAINS, N. Y., July 28. (AP)—The three-month visit of the king and queen of Siam to the United States is near its end today as preparations were made at Ophir hall for their departure this afternoon.

Much rested, and happy at the successful operation for the removal of a cataract from his eye, King Prajadibok and Queen Rambabarni were to motor with their entourage to the Scarborough station of the New York Central. There under the protection of local and state police and secret service operatives, they will board a special train for Quebec, Canada, on the first leg of their journey homeward.

The democratic ruler, who said he enjoyed every minute of his stay in the United States, went for a seven-hour trip on the dirigible Los Angeles yesterday, accompanied by the queen. He termed the trip "the best time he's ever had."

Queen Rambabarni was the first woman ever to fly in a navy airplane, breaking down an old tradition of the service. Special permission for the flight had been obtained from Washington.

## Picture Booklet Is Much Praised

A dozen letters complimenting "Pictorial Pampa," a photographic story of the Gray county capital, have been received by Geo. W. Briggs at the chamber of commerce. Most of the letters received thus far have been from civic organizations of Texas cities.

The Tyler chamber of commerce noted that the pamphlet is a "very fine piece of publicity material," and wanted information regarding costs of publishing.

A letter from Breckenridge stated, "We consider such an issue about as high type advertising as your city could do."

### HOOPER BACK AT DESK

WASHINGTON, July 28. (AP)—President and Mrs. Hoover returned to the White House early today after spending the last three days and four nights at their Rapidan camp.

The week-end vacation is the longest rest the chief executive has had since his trip to Porto Rico in March.

The presidential party left the camp about sun-up and made a leisurely trip to the capital.

Mr. and Mrs. M. P. Wilson and children of San Angelo who have been visiting with Mr. and Mrs. C. M. Ford here, left yesterday for their home.

## Schaaf to Get Another "Shot"

NEW YORK, July 28. (AP)—Ernie Schaaf, "mystery man" of the heavy weight list, will get a "shot" at big game.

The Boston youngster has been matched by promoter Jimmy Johnson for a 15-round bout with the big Argentine clouter, Victorio Campolo, at Ebbets Field, Brooklyn, Aug. 26.

Schaaf, in whose contract Jack Glazier owns a half interest, has been coming along in the last few months at a pace alarming to the heavy weight contenders. He has run up a string of four successive knockout victories, two of them over the portly Bostonian, Jimmy Maloney.

## League Leaders

By The Associated Press.  
American League

Batting: Ruth, Yankees, .389; Simmons, Athletics, .379.

Pitching: Osborn, Pirates, won 5, lost 0; Lindsey, Cardinals, won 4, lost 1.

## Will Stimulate Feeding of Lambs

SAN ANGELO, July 28. (AP)—T. A. Kincaid, president of the Texas Sheep and Goat Raisers' association, today designated a committee to meet with county agents and Houston Harte, president of the West Texas Chamber of Commerce, here in the next few days for the purpose of stimulating the use of this section's beautiful feed crop in feeding lambs and ewes.

## Residents Flee Imperial Valley

LOS ANGELES, July 28. (AP)—Residents fled today from the heat-stricken Imperial valley and Arizona points as the toll from the southwest's most prolonged heat wave in years mounted to 63 deaths.

Along the roads at the base of majestic San Geronimo mountain, which lifts its snow-capped peak slightly more than two miles above the scorching great American desert, hundreds of automobiles moved to the cooler, coastal areas and mountain retreats so their occupants might find relief.

Party of the heat deaths occurred in Imperial valley, which is noted for the richness of its soil and, for the greater part, lies below sea level. The population had been reduced to those who of necessity must remain in the heat-ridden area.

### THEY TRAVELED FAR

When George W. Briggs, secretary of the chamber of commerce, and family take a short vacation trip as they did last week their automobile "goes places." They traveled 1,100 miles in northern New Mexico and southern Colorado, visiting Cimarron, Santa Fe, Taos, and Trinidad. The party included Mr. and Mrs. Briggs, their son, Burnham, and a friend of the latter, Dean Alexander of Canadian.

## CHAPMAN TAKES SPOTLIGHT FROM HOMER KINGS

NEW YORK. (AP)—Offhand, the New York Yankees would be the sixteenth club in the major leagues on which anyone would look for a super-base thief.

The club's siam-bang, hit 'em run, knock it over the fence attack, is too well known to lead to the belief that it doesn't cause any more reaction than an occasional "Oh, yeah!"

However, that's just what has happened. Ben Chapman, rightfielder, with more than 30 stolen bases not only is leading both leagues, but appears to be the best base thief the American league has seen since the heyday of Sam Rice, when the Washington rightfielder stole 62 bases in 1920.

Chapman's profuse base running this year is due in a large measure to the belief of Manager Joe McCarthy, that few catchers in the big leagues now-a-days have efficient throwing arms. McCarthy has encouraged Chapman to prey on these weak throws, until now fans go out to Yankee Stadium almost as much to see Bennie perform as to witness a Babe Ruth or Lou Gehrig home run.

Chapman was not known to be especially fast on base until this year. Last season he stole only 14 bases. He landed 26 in 1928 with St. Paul, and in 1928 with Asheville stole 30. Chapman's chief power on the bases lies in perfect timing of the pitch and a quick get-away. He uses the orthodox hook slide going into a base.

## King Alfonso In Denial of Quitting Throne for Son

LONDON, Aug. 28. (AP)—Lord Londonderry, speaking in behalf of former King Alfonso of Spain, today denied a report in the Daily Express, that he had abdicated his right to the Spanish throne in favor of his third son, Don Juan de Bourbon.

At the Spanish embassy the only statement issued said: "We know nothing officially."

The boy, who has been a cadet at the naval school at Dartmouth since the royal family left Spain, came to London today, traveling third class with a number of his schoolmates, and was met at Paddington station by his father.

## Residents Flee Imperial Valley

LOS ANGELES, July 28. (AP)—Residents fled today from the heat-stricken Imperial valley and Arizona points as the toll from the southwest's most prolonged heat wave in years mounted to 63 deaths.

Along the roads at the base of majestic San Geronimo mountain, which lifts its snow-capped peak slightly more than two miles above the scorching great American desert, hundreds of automobiles moved to the cooler, coastal areas and mountain retreats so their occupants might find relief.

Party of the heat deaths occurred in Imperial valley, which is noted for the richness of its soil and, for the greater part, lies below sea level. The population had been reduced to those who of necessity must remain in the heat-ridden area.

### TOWN IS SAVED

SAN ANTONIO, July 28. (AP)—The entire business district of Somerset, 18 miles from here, was threatened by fire early today when three small residences in the center of the town burned.

Quick action on the part of the San Antonio fire department in sending a pumper to aid the bucket brigade which was waging a futile battle against the flames probably prevented a heavy loss.

### McGraw Is Mad

Look out for those Giants now, McGraw is mad.

"I welcome the suspension," said John the other day after Clarke had chased him for protesting a decision at first base. "I welcome the fight. A few more breaks like this and the Giants will win the pennant. We have been too damned complacent but we're fighting from here in."

Umpire Clarke, according to press box observers, missed fire badly on his decision that Pullis was out at first. It was said that Chick had beaten the throw by a step and a half.

McGraw carried his fight to President Heydler after the three-day suspension was handed to him.

"We've had trouble with that Clarke for two years," said McGraw. "He stole a game from us in Pittsburgh. He robbed Pullis of a hit and the league president backed him up. Instead of trying to rid the league of umpires who are incompetent, the president pats them on the back but slaps me in the face with a three-day suspension."

And was Mr. McGraw's face red when he said it!

DID YOU KNOW THAT—

Everybody laughed when John McGraw, picking his all-star team last winter, put Lou Gehrig on first base. "It isn't quite so laughable now. . . . In a recent double-header against the Browns, Lou drove in nine runs. . . . he tripled three more. . . . singled another three home. . . . and homered again with a man on the bases. . . . as far as glory is concerned Lou hadn't had his share. . . . because the Bambino hit just ahead of him. . . . and begged the public applause."

Despite profuse homers, Babe Ruth and Lou Gehrig are being shoved from the center of the New York Yankee stage by Ben Chapman, leftfielder. Chapman is about the nearest base thief the majors have seen in 10 years. He's shown in action below.

E. B. Stephenson and son, Wallace, were removed from Pampa hospital to their homes this morning. They underwent operations for appendicitis 10 days ago.				

## Sun Beau Must Carry 128 Pounds

CHICAGO, July 28. (AP)—Sun Beau, Willis Sharpe Kilmer's handicapped star, must carry to weight of 128 pounds in the \$25,000 added Arlington handicap Saturday when he attempts to surpass the money-winning record of Gollant Fox.

The assignment of the big load to Sun Beau probably will cause owners of lesser stars to make a try for the big purse and it was indicated today that 15 might start. If that many face the barrier the mile and a quarter race will be worth \$28,350, with \$31,850 to the winner. A victory for Sun Beau would give the Kilmer 6-year-old a total of \$334,850, well beyond Gallant Fox's winnings of \$328,165.

Strikeouts: Dean, Houston, 187.  
Hits in consecutive games: Langford, Dallas, 20.

## Heavy Fighting in China Is Reported

SHANGHAI, July 28. (AP)—Conflicting war reports reaching Shanghai today agreed only that heavy fighting is progressing on the Peiping-Hankow railway south of Pao-tungfu.

Nanking asserted her Manchurian allies have assumed the offensive and checked the rebel Shih Yu-San's advance in the region of Siao. Authoritative non-Chinese sources, however, reported Shih Yu-San captured Wangtu and took 1,000 Manchurian prisoners, as well as rifles and artillery.

These sources asserted Shih Yu-San is pressing northward toward Peiping, vital point of the Manchurian defense.

Foreign military authorities expressed the opinion that should Peiping fall, Chang Hsueh-liang, Manchurian leader, probably would abandon Peiping and retreat without further fighting.

Meanwhile the government reported Liu Chin and his loyal Nanking forces, driving southward to attack Shih Yu-San from the rear, had captured Shano, Southern China.

Chiang Kai-Shek, president of China's Nationalist government and head of her armies, remained at Nanchang, directing what he chose to describe as his "mopping up" drive in his drive against Communists throughout Southern China.

## BOY'S BODY HUNTED

CORPUS CHRISTI, July 28. (AP)—Searching parties today were seeking the body of Claude Maurin, 17, drowned five and one-half miles east of here in Corpus Christi bay yesterday afternoon. Maurin fell from a pleasure yacht, and efforts of seven other members of the party to find the body were unsuccessful.

J. M. McDonald, deputy oil supervisor for this district, is transacting business in Borger today.

## PUBLIC LINKS BOSS DEFENDS TITLE IN ST. PAUL TOURNAMENT

JACKSONVILLE, Fla. (AP)—Robert E. "Bachelor Bob" Wingate will lead a six-man team to St. Paul when he goes there August 4-6 to defend his title as public links golf champion of the United States.

The 33-year-old insurance salesman is going to the tournament this year more than a week in advance to get in a few practice rounds before qualifying play begins.

Wingate last year dethroned Karl Kauffman, three-time champion from Pittsburgh, at the municipal course here. He is very much on his game this summer and expects to improve before the fourth of August.

A pair of 77s on greens just treated to a generous top-dressing, qualified Bachelor Bob for the local team which will participate in the national meet.

He was hitting them everywhere except with his putter—the club he won the title with last year—but then none of his mates could putt on the same course during the team qualifying rounds.

Beating out stocky little Joe Greene of Philadelphia, Wingate won the title in a spectacular match.

The Jacksonville bachelor went to the last 18 five up on Greene, and held his own through the 27th. Then the Philadelphia began to get onto his putter and Wingate faltered.

The match went to the 36th hole and Greene laid Wingate what appeared to be a dead stymie, which would have halved the match.

## HOUSTON TAKES SECOND OF PLAY-OFF SERIES, 14 TO 11

Two More Contests Scheduled to Take Place Aug. 12; 13 for Championship.

By BILL PARKER  
Associated Press Sports Writer.

In a wild scramble for runs and hits, the Houston Buffaloes went two up on the Beaumont Exporters Monday night in the first-half play-off with a 14 to 11 verdict. In the three games, Houston won the first, the second was a 14-inning tie and Houston won the third. The concluding chapter of the first-half pennant issue will get the spotlight on August 12 and 13 when the final two games will be played. The winner of three games will play the second-half leaders for the championship.

There was little fine playing in last night's game. It started as a free hitting rampage and continued that way with Beaumont collecting 19 hits off the pitching of George Washington Payne and Tex Carlenton, while Houston hammered Hamlin, Green, Hollister and Goldstein for fifteen hits. And not to be shadowed by runs and hits, old man miscue had his fling, the Exporters committing five errors against three for Houston.

Much Scoring

It was a game of big scoring innings. Houston scored four runs in the first and second, respectively, and five tallies in the fourth. Beaumont made a grand effort to overtake the Buffaloes with a four-run stampee in the first of the ninth.

Houston's three-run margin can be found in the big fourth. With the bases loaded, Tom Carey hit to Taylor, Beaumont shortstop, who threw home to catch Carey Selph, but Selph—a former football star, went tearing into the base with such force that he knocked Catter Larder loose from the ball, the pellet going one way and the catcher the other. Before the Exporters could locate the ball and get their bearings, Peel and Sturdy had scored along with Selph and it was these three runs that won the ball game.

The Dallas Sifers, who have been going great guns after the second half championship, hit a stumbling block at Fort Worth where the Cats won the series final 4 to 2. Leon Chagon turned in a steady pitching performance in the region of Siao, holding the Steers to five hits. Etcen Langford, Dallas left fielder, secured three of his team's five hits to run his consecutive game hitting streak to 20. Grady Adkins started for Hap Morse's battling second place crew, but was relieved in the seventh by Gerald Miller, a Beaumont cast-off. The Cats pecked eight hits off the two Dallas flingers, Baker leading the offense with two hits.

Youth Is Hero

In the only other league game, the Galveston Buccaneers stepped out of their cellar position long enough to give the San Antonio Indians a 2 to 1 jolt. McGhee, Galveston's new 19-year-old first sacker, established himself as a hero when he hit a Texas leaguer in the last of the ninth inning, scoring two runs for the Buccaneers' victory. Lefty Stein limited Galveston to five hits. Preacher Thurman gave San Antonio six hits.

Shreveport and Wichita Falls had an off day, having played a double-header Sunday.

### FIRST COTTON RECEIVED

CORPUS CHRISTI, July 28. (AP)—The first bale of the Nueces county cotton crop was to be auctioned here today. The bale came from the T. O. Kinney farm near Bishop.

## Says Hoover to Get Nomination

WASHINGTON, July 28. (AP)—Renomination of President Hoover by the republicans was predicted today by Senator McGee, republican of New Hampshire.

"It is not in the cards for anyone to take the nomination away from President Hoover," was the only comment the senator would make on the political situation upon his return to the capital.

## Amateurs Will Battle in Chicago

NEW YORK, July 28. (AP)—On 30 scattered links today 525 golfers will battle away for 150 places in the national amateur championship to be held at the Beverly Country club, Chicago, Aug. 31 to Sept. 5.

Thirty-six holes of medal play was today's program, the survivors to go to Chicago where another 98-hole medal play test will cut the field to 36 for the championship's match play rounds.

## Negro Electrocuted As Habitual Criminal

HUNTSVILLE, July 28. (AP)—First to pay the death penalty under the habitual criminal law in Texas was Will Jenkins, 46, negro, executed in the state prison here shortly after midnight.

Jenkins, entering the death chamber with a smile, told spectators he would meet them in the hereafter. To newspapermen he said, "You have been writing about my sinful 46 years. Now tell them how I died."

The negro was convicted in Houston last October for criminal assault on a negro. He had previously secured two pententiary sentences for burglary and one term for an assault.

## Hoch der Schmeling!

Max Schmeling used to be a fistcuffer without honor in his own country. Even the German experts doubted that the man who had won the heavyweight title on a foul was of anything like championship calibre. But public opinion was something else again after Herr Maxie triumphed so decisively over Young Stribling, and here you see some of the laurels that awaited the ring hero at his homecoming reception at Berlin. The champion's mother is shown at right with her sons.

Bob Wingate

# MOON OF DELIGHT

by Margaret Bell Houston

**SYNOPSIS:** Juanita Basara hides her past, selling cigars in Divitt's gambling place. The veil of her costume gives her security, and Divitt, his wife, Molly, Conchita and her son, Gabrean, treat her kindly. As for Umberto, Gabrean protects her from him. Eric LeCarter, at the resort with Adrian Fouché, Mrs. Belaise and Kirk Stannard, her grandson, tries to tear off Juanita's veil. She evades him, trembling because she has just seen Senor Basara of Mexico join the party. Through a thief's trick Divitt secures Mrs. Belaise's necklace and next day sends Juanita, introduced as Senorita Flores, to return it, saying she had found it. The elated Mrs. Belaise is disappointed when the girl refuses a reward. Kirk asks Juanita to allow him to call on her.

**CHAPTER 12**  
**KIRK RETURNS A CALL**  
"Looks like you didn't find out much," Divitt remarked, donning the modernistic pajamas Molly had directed for him. "Not very communicative, I take it."

Molly was in bed, her small face looking weary on the great pillow. "No, she don't talk much," said Molly.

"But she ought to know the geography of the house. Naturally, she's not expected to discover the location of the safe on one visit—but we ought to get something out of her. All we know is, they've asked her back. That's the biggest part of the business, but it's not all."

"Divvy, beautiful, what you want to do this thing for? What you want to go in with Umberto for? He'll get us all in trouble yet."

"Oh no he won't. Umberto's my right hand. How much reforming you want to go in one year? I've got rid of the hooch haven't I?"

"Divvy, you know Umberto's rum-runnin' this very night. Things are stricter now—you say yourself—and if you're mixed up with Umberto, ain't and abettin' him—you'll go when he goes—and what's your become of me and the baby?"

"So that's why you aren't more enterprising in pumping Juanita! You ought to know that people expecting a family are keener than ever to feather their nest. You didn't used to look at things this way."

"I've always hated your connection with Umberto. Oh, Divvy, I'm so afraid—"

"You're so afraid you're holding out on me where Juanita's concerned."

"Think what you please, Divvy. You know the girl don't talk much."

"I know well enough I can get on without her," Divitt answered. He got into his bath robe. Molly was looking at him hopefully.

"You mean you don't intend to use Juanita?"

"Use her, of course. But differently."

"Divvy, we've got money. Let's go somewhere and start all over in something that's not dangerous."

"Many things are dangerous," remarked Divitt. "Aviators take chances. So do miners and soldiers. A man must follow his bent. That's the first thing women have to learn." He went over and patted Molly's shoulders. "Go to sleep, kid. You're not going to have any more to do with this."

"I suppose you don't trust me." The thought wrung her heart.

"It's not that. Pick out the clothes for Juanita, and look after her dates. Let it go at that. As far as my getting into trouble is concerned—I won't. When it comes I'll be gone—you with me."

He opened a door beside the armoire, went up a narrow stair to his office. There he sat down at his disordered desk and wrote:

"Marquesa Carlota de Luiz y Cabrera.

"2 Michel Street.  
New Orleans.  
Dear Marquesa:  
"Will you kindly call at my office tomorrow—Thursday night—at nine o'clock?"

**JASON DIVITT**  
He opened the other door and dropped the letter down the mail chute of the Tignon hotel.

Kirk Stannard telephoned the Tignon on Thursday afternoon, desiring to call on Senorita Flores. In touch presently with an agreeable female voice—not the senorita's—he was told that Senorita Flores would see him that evening from 8 till 9 o'clock. She would be in the patio.

It was on an errand for Nelly that Kirk was calling, or he allowed himself to call it that. Mrs. Belaise told him that Senorita Flores looked like Delphine, his mother, and when Kirk confessed to the feeling of having seen the senorita before, she added, "That is it."

Kirk could not see Juanita's resemblance to his mother's picture, yet he would not disabuse Nelly's mind of a thing that seemed to fill it with such comfort. She was prattling about the senorita's refusal to choose something from the basket,

had in the end chosen something herself, a ring that had been Delphine's, bidding Kirk give it to Senorita Flores. "Not as a reward, tell her. Just to make her happy."

Kirk was glad of the mission. From 8 to 9. Rather limited, that. Yet he could not expect to find the senorita without engagements.

Night was settling when Kirk arrived. The Tignon patio was filled with dusk and a soft blossoming of lights. The tables were deserted except for a man and woman drinking from ice-filled glasses, close to the verandah. Ah, vander! Yonder at a far table, Kirk could not mistake the dim figure. He crossed the patio quickly.

"Senorita! I thought you had forgotten."

She smiled, all in white, diaphanous stuff that fell away from her arms and about her feet. Kirk saw her parted hair, drawn over her ears, knots on her neck.

"I never forget," she answered. Kirk sat down on the bench beside her.

He looked at her, white and lovely, wondered about her. Why was she here? Who was with her? What eyes were watching from the upper windows, even now? She had called alone yesterday—yet one sensed—particularly here—that she was invisibly guarded. He would meet her protectors, no doubt, before the evening was over.

"Do you like New Orleans, Senorita?"

"Very much. A little warm, but she was accustomed to that."

"Is it so warm in Spain?"

She turned slightly from him. "There is the music!" she said as the Mexican band began again. The dusk was full of La Paloma. The couple near the verandah began dancing.

Kirk thought suddenly of a white bird an old sailor had brought him once. "It has a song," the sailor said, "a song that will break your heart." But the bird did not sing. Surely no song could have been more heart-breaking than its silence, day after day. Kirk had wanted to set it free, but Nelly had said that it would only starve. Yet it had got free. Odd he should think of this now.

The music had stopped. The couple who had danced went out. Then almost at once the music began again. Over the Waves. The senorita's eyes met Kirk's. They rose and began to dance. She was fragrant and soft in his arms, moving lightly, at one with the music, at one with him.

"You dance beautifully, Senorita, and you speak English with such little accent—you just sort of kiss the words, I mean."

"I had an American tutor."

"And he taught you to kiss the words?"

She laughed. He had never heard her laugh before. A ripple of bright sound.

"If you could have known him! He didn't know the meaning of kisses."

The music had stopped. They went back to the bench.

"Senorita, I have something for you."

Kirk seemed to know her better now that they had danced together. "And you must take it, or else—"

"Or else what?" softly.

"Or else some one will be very sad. My grandmother has sent you this ring. It belonged to my mother. My grandmother thinks you look like her. She died when she was 21—when I was born."

Juanita was looking at him with dark soft eyes. Kirk felt that she was seeking words in which to re-

# GREAT BRITAIN IS OPPOSED TO BALANCE OF POWER IDEA

### Security by Cooperation Becomes National Policy, According to MacDonald.

BERLIN, July 28. (AP)—Great Britain is diametrically opposed to the balance of power theory. Prime Minister Ramsay MacDonald said today, because it is incompatible with disarmament.

So long as the nations try to maintain national security on the basis of a balance of power they will need big armaments, he told a delegation of German newspaper men, but Great Britain believes in establishing security by international cooperation, a policy in violent contradiction to that of the balance of power.

BERLIN, July 28. (AP)—Germany's economic difficulties are largely temporary, Prime Minister Ramsay MacDonald told correspondents today, and to a great extent are psychological.

The country's industrial position is fundamentally sound, he said, and as soon as the proper psychological foundation can be laid the nation may expect to overcome the present acute distress.

# Commission Is Shrewdly Probing Railroad Matters

### WASHINGTON, July 27. (AP)—The interstate commerce commission is taking full advantage of the specialized knowledge of its mem-

bers in studying the railroad situation as it affects the 15 per cent freight rate increase case.

Each of the five commissioners, who will preside during the series of hearings throughout August, are specialists in at least one line.

Besides this, the commission already has received reports from its statistical and valuation experts on matters that may be needed in deciding the case some time after the middle of September.

A special division of the commission known as number seven has been created to handle the situation. On it are commissioners having broad knowledge of finance, valuation, operations, safety methods, and railway wages.

Commissioner Meyer, chairman of the new division, and Commissioner Eastman, an expert on railroad finances, Meyer has been chairman of the finance division for years, during his 20 years with the commission he has studied the rail-

road situation until he is considered an outstanding authority. Commissioner Lewis has administrative charge of valuation. Commissioner Porter was in charge of the consolidation studies and Commissioner Lee has had charge of safety measures, operations and matters the commission studied.

**ROAD MEN TO ORGANIZE**  
CORPUS CHRISTI, July 28. (AP) Boosters of the proposed Corpus Christi-Winter Garden, hard-surfaced highway were to organize here tomorrow to work for the highway's designation. Nueces, Jim Wells, Duval, Zavalla, McMullen, La Salle, and Dimmitt counties were to be represented.

**PLYMOUTH, England, July 28. (AP)** Ambassador Charles G. Dawes arrived from New York today and proceeded immediately to London to consult with Secretary of State Stimson before the war debt holiday.

Mr. Dawes, who was met by members of the United States embassy staff, declined to be interviewed, remarking, "I am quite well and it is true I had to cut my holiday short but I cannot discuss political or financial affairs."

THAT GOOD CIGARETTE—THEY SATISFY

# FAVORITES IN CHILE TAKING OVER REINS

### Professor of Law in University is Assisting in Making Conditions Stable.

SANTIAGO, Chile, July 28. (AP) — That popular combination—Juan Esteban Montero and Pedro Blanquero—were again in charge of the government of Chile today, and foreign business interests indicated they had complete confidence in them.

Their first task was to straighten out the confused financial situation, with its problems of local banking, foreign exchange, and foreign debts.

A survey of foreign business interests showed unanimous opinion that Montero as acting president and Blanquero as finance minister were the best men to handle Chile's emergency.

Americans have a stake of slightly less than \$1,000,000,000 in the nation, and the British, with large interests, also are vitally concerned. Americans control the principal products, nitrate and copper, on which the government depends for a large part of its revenue.

Future is Secure  
A survey indicated that foreign interests were firm believers in the future of Chile, regardless of the temporary moratorium in the foreign debt. Montero and Blanquero probably will continue their moratorium, probably for the balance of this year and will deposit pesos in the Central Bank as guarantee of the payment of interest later.

Montero, professor of law at the University of Chile and a firm advocate of freedom for the people, took over the government from Pedro Opazo yesterday after Opazo had been acting president only a few hours, in succession to Carlos Ibanez, who fled the country after a three-days' public uprising.

Montero and Blanquero now popularly acclaimed by their program of economy, instituted when they were members of an Ibanez cabinet just before the overthrow of the former president. That program will again be put into effect.

As vice-president and acting president, Montero will serve at the head of the state for 60 days, and then elections will be held.

BUENOS AIRES, July 28. (AP) — Former Pres. Carlos Ibanez of Chile was on his way to Buenos Aires today from Mendoza, just over the border from Chile, where he stopped last night in his flight from Santiago.

The ex-president appeared in good health, revealed no depression, and conversed affably.

# EAST TEXAS

(Continued From Page 1)

production was available though oil men considered it a good well.

B. F. DeLong, fire fighter in charge of operations at the burning Vitek well in Overton, led the rescue work last night. Caid in an asbestos suit he was preparing to brave the flames at the oil tanks when the well began flowing and became ignited, bursting into a sheet of flames.

Despite the proximity of the well to the town, officials were not alarmed for the safety of shacks and buildings in the vicinity.

Thousands of people throughout the oil area gathered at the burning well soon after the explosion.

# Report Elston As Still Unconscious

AMARILLO, July 28. (AP) — Still unconscious, Bill Elston, 25, son of Judge Frank Elston of Carson county, today was unable to give his version of the shooting which followed his flight from an Amarillo dance hall Sunday night.

At the time of the shooting Elston was being pursued by two Amarillo officers, both of whom deny firing at him. They were E. R. Mur and Sid Harper. No arrests had been made in the case. Elston was hit in the head.

Mrs. R. M. Casaw was dismissed from Pampa hospital last night.

# STATE OF TEXAS, COUNTY OF GRAY

WHEREAS, the undersigned has for the past 210 days been in possession of certain personal property belonging to Pampa Buick company, and described as follows:

One 1928 Buick sedan, Engine No. 155550, License No. 470-535, and the undersigned holds warehouseman's lien on said property to secure his charges in the amount of \$110.00 due for more than 200 days past as per contract between said unknown parties which is reasonable and customary compensation for storage on such car.

WHEREAS, the said Pampa Buick company has been duly notified by publication as required by law to come forward and pay such charge and have failed and refused to do so.

NOW, THEREFORE, notice is hereby given that on the 11th day of August, 1931, the same being the second Tuesday in August, between the hours of 10 o'clock a. m. and 4 o'clock p. m. at Pampa, Texas, at Pampa Armature and Brake Service Garage in the town of Pampa, Texas, the place, owing to the nature of such property is the most convenient to exhibit same to the purchasers at said sale. I will sell this property at public sale, following the manner of sale under execution and apply the proceeds to the payment of such storage, any balance to be turned over to the persons entitled to same.

WITNESS MY HAND this 21st day of July, A. D. 1931.

PAMPA ARMATURE AND BRAKE SERVICE.

Per FRANK KEHN.

way and almost crashed into a hangar and telegraph poles. They were forced to dump half of their gasoline to gain altitude to save themselves from crashing.

Although their plane has a slower cruising speed than the "Winnie Mae," Herndon and Pangborn hope to beat the round-the-world record by flying longer distances. They have dual controls.

Their monoplane is orange-red hued and its number is "NR-786-W." It is Princeton Man.

Herndon was educated at Princeton and learned flying in France. He had been refused a license in this country because of color-blindness. He will act as navigator on the trip, having studied under Captain Lewis Yancey. Herndon's mother is Mrs. Dixon Boardman, society woman of Park avenue.

Herndon's secret marriage was revealed a week ago.

Pangborn, his flying mate, was the first aviator to fly a plane upside down. His record shows more than 1,200 hours in the air. He is from Wenatchee, Wash.

They have 17 small parachutes with which to drop messages as they pass over important points en route to Turkey.

# Death Claimed Invalids in These Beds

These masses of soggy blackened cloth and twisted steel are all that remained of the cots from which aged men and women tumbled, many of them to die in the disastrous fire at Pittsburgh. This picture was taken a short time after firemen quelled the blaze.

# Markets

CHICAGO, July 28. (AP) — Grain prices averaged lower early today, influenced by indications of a break-up of the heat wave that threatened hopes of bumper corn crop. Wheat established new low price records for the season.

Opening unchanged to 1-4 cent up, corn soon underwent a general sag. Wheat started unchanged to 5-8 off and later declined all around.

INCREASE STORAGE  
CHICAGO, July 28. (AP) — The Farmers National Grain corporation has announced that it has multiplied its storage facilities to keep from glutting congested grain markets in its coping with a surplus from other years and an incoming tide of new wheat.

The government sponsored cooperative said yesterday that additional elevators had been either bought or leased for the storage of 55,000,000 bushels. The total amount of wheat held was not made known by the corporation, but it said it had purchased 12,000,000 bushels of wheat since the grain had started to pile up from July harvests.

The corporation, George S. Milnor, general manager, said, controls space for 28,900,000 bushels in the St. Paul-Minneapolis-Duluth area, for 8,000,000 bushels in Kansas City, 5,000,000 bushels in Omaha, 2,000,000 bushels in Iowa and Nebraska interior points, 8,000,000 bushels on the Spokane-Portland-Seattle area of the Pacific northwest, 2,000,000 bushels in Colorado and Utah, 1,000,000 in Georgia, Ill., and 1,300,000 bushels in Nashville, Tenn.

COTTON IS QUIET  
NEW ORLEANS, July 28. (AP) — Cotton opened quiet and rather easier today as Liverpool cables were worse than due. First trades showed losses of 6 to 8 points and the

market continued to rule easy after the start. October trading down to 8.83 and December to 9.05, or 8 points below yesterday's close.

Later in the first hour the market was somewhat steadier and recovered five points on covering by shorts who feared the weekly weather summary due tomorrow would prove unfavorable owing to the excessive rains of the past week in most parts of the belt.

At the end of the first hour the market was steady and within a point of the highs.

The market became more active as the morning progressed and prices eased off steadily under pressure of selling induced by generally favorable crop accounts. There was also some hedge selling and short selling by ring traders.

October eased to 8.70 and December broke through the nine cent line to 8.93, down 20 to 21 points from yesterday's close.

Near mid-session the market was a shade steadier on a little covering by satisfied shorts, price rallying from four points from the lows.

F. H. Meskimen underwent a major operation at Pampa hospital this afternoon.

Alfred B. Fullington is spending a few days in Pampa.

Mrs. A. C. Husted is seriously ill at her home at 219 North West street.

PAINLESS MENSTRUATION  
Richards Drug Store is now selling a new preparation called do-Tell that does away with pains, cramps and headaches due to menstruation. It is guaranteed—adv-3

# LEGISLATURE

(Continued From Page 1)

investigation by Senator W. A. Williamson of San Antonio, who characterized it a "farce comedy."

Nazro summed up his position by saying he believed no new laws were necessary.

Sees Nothing New  
"There is nothing new," he said, "about this condition, so why get hysterical about it? We have had periods of over-supply and under-supply all through the years."

One senator wanted to know if some times it wasn't a question of the "survival of the fittest."

Nazro replied that was true of all life.

Elderlyman explained the operation of the "parent club" whereby major companies "swap" methods for refining gasoline, and charge refiners, not members of the club royalties. "The royalties," he said, "were excessive."

Strict proration and a law requiring ratable taking by pipelines

and ratable purchasing would aid the independent refiner because it would stabilize conditions and enable better business planning. It also would place the independent refiner on a more equal basis with the major operator because it would prevent the major from taking advantage of the low prices that follow high production in new fields.

Senator Williamson said the major with their large facilities being better able to reach the fields.
