ing carved wooden staffs bearing this odd image; a white man in old-fashioned dress, often carved with genuine skill, with minor details of costume faithfully rendered. Medicine men used such staffs extensively, believing that all manner of diseases could be cured with them.

Naturally, somebody got curious about it all, and a long-investigation has finally dug up the explanation. More than 200 years ago a Scotch colony was settled

on the coast of the Gulf of San Blas. A doctor, William Fatterson, was the leading spirit in the venture. He was evidently a skilled and conscientious physician, and he worked many cures among his barbaric native neighbors.

### As a result, the simple savages canonized him when he died-or, rather, they raised him to a position of godhood. Members of his own race long since forgot all about him, but he remains today a potent legend in the distant jungles. His likeness goes through the forests in the hands of painted priests; he has a secure place in a remote wilderness pantheon.
