

# Nixon To Name Woman Justice

WASHINGTON (UPI)—President Nixon may want to name a woman to the Supreme Court. But finding a relatively young Republican woman with a legal background and few family responsibilities may be another matter.

But here are some possibilities:

Mary Gardiner Jones, 48, member of the Federal Trade Commission, a lawyer and only Republican woman who is a member of a regulatory commission. She is single.

Rep. Margaret M. Heckler, R-Mass., 38, two-term congresswoman and a lawyer. She is married and the mother of three.

But if Nixon does appoint a woman, there is nothing that requires him to name a Republican (or a lawyer, for that matter). Waiving those two considerations the list gets much longer.

Here are some prominent Democratic women lawyers:

U.S. Circuit Court Judge Shirley M. Hufstader, 42, Los Angeles, the second woman ever to serve on a Court of Appeals.

Virginia Mae Brown, 45, chairman of the Interstate Commerce Commission and former West Virginia public service commissioner.

Reps. Patsy T. Mink, D-

## Iowa, Perryton Beef Firms Plan Merger

PERRYTON—American Beef Packers, Inc. of Oakland, Iowa, and Wheatheart Feeders, Inc. of Perryton have entered into merger negotiations, it was announced today by Frank R. West, American Beef chairman and president, and John O. Pitts Jr., Wheatheart president.

West also said that American Beef is planning to build a new plant in the Texas Panhandle and has looked at several

## Maddox Violently Opposes Federal Integration Plan

ATLANTA (UPI)—Standing red-faced before television cameras, Gov. Lester Maddox angrily told the Justice Department what it could do with its suggestion for immediate and complete integration of Georgia's public schools.

"So far as I'm concerned, they can take their ultimatum and ram it in their butts—or suitcases if they want to, and phooey on the whole crowd," Maddox said.

The governor said it would be better to close the schools than to submit to the "Communist demands" of the Justice Department.

If necessary, we should close our schools for a month or a year or two years. It would be better to do that and have free children than slave children," said Maddox who ran for president a year ago.

The Justice Department's suggestion that all Georgia's school districts end racial segregation swiftly and voluntarily was the first such edict to involve an entire state. The Nixon administration Wednesday gave the Georgia State Board of Education 15 days to submit an acceptable plan or face "remedies from the United States District Court."

A letter from Asst. Atty. Gen. Jerris Leonard, chief of the Justice Department's Civil Rights Division, to state School Superintendent Jack Nix placed the onus of the "suggestion" squarely on the back of the state Board of Education.

"Our investigation reveals that the state Board of Education has broad authority to regulate the public schools and has, in fact, adopted rules, regulations, policies and standards with respect to most phases of school administration," the letter said.

Leonard added that the board had failed to "meet its 14th Amendment obligations" and has acted in a manner which affirmatively perpetuates the unconstitutional dual (school) system.

Leonard said Atty. Gen. John N. Mitchell has ruled the complaints of several Georgia Negro parents' meritorious.

## House Agriculture Group To Visit Texas Panhandle

### Frank Borman Says Emotional Goodbye To Russia

MOSCOW (UPI)—Astronaut Frank Borman in an emotional farewell to his Soviet hosts promised today to ask U.S. officials to invite Soviet cosmonauts to America.

Borman indicated the invitation already had been agreed on in principle but that formal approval still had to be given in the United States.

The astronaut said he expected to speak with President Nixon about his 10-day Soviet tour when the President watches the Apollo 11 moonlift later this month.

NO RAIN IS EXPECTED when the Apollo 11 astronauts land on the moon, but they'll carry this umbrella anyway. It's a gold-plated wire mesh antenna which can be used to beam communications signals, including live television, from the moon to the earth. The antenna, seen in a dry run here with an RCA engineer, has more than 38 miles of gold-plated wire, thinner than human hair, in its 10-foot-diameter reflective surface. The astronauts will leave for the moon July 16.

Borman, his wife and sons, flew to London today after a final round of handshakes with the Soviet spacemen at Sheremetyevo Airport.

During an airport news conference Borman said "I fully intend to ask the people in NASA to extend an invitation and I am sure it will be done."

But he warned the invitation may not include a view of an American space launch. Borman said it was already too late for a Soviet cosmonaut to attend the Apollo 11 shot.

"The invitation we will give will be to visit the United States, not specifically to see a launch. If it happened the trip coincided with a launch I would be happy to be their host there," he said.

Borman toured widely in the Soviet Union during his stay and saw a number of space installations. But he was not taken to the Soviet Space Center and launch pad at Baikonur in Central Asia.

### Houston Bans Usage Of Water Outside Homes

HOUSTON (UPI)—The Houston City Council, faced with the city's most severe water shortage, banned the use by residents of all water outside the home.

The council passed the emergency ordinance 8-0 Wednesday and said it would remain in effect until the current drought ends. Penalties for disobeying the law were set from \$25 to \$200.

The ordinance prohibits all residents of the nation's sixth largest city from watering their lawns or washing automobiles, businesses, such as washer-driers, which depend on water for their income are not affected by the ordinance.

The council said it passed the emergency law because of an overwhelming number of complaints from residents of low water pressure.

"I wouldn't blame the people of Houston if they organized a march down here and took City Hall apart brick by brick until they find water," said City Councilman Lee McLemore, who represents Southwest Houston, the area hardest hit by the water shortage.

Broken water mains and pumps along with a lack of rain were blamed for the shortage.

Last week the council passed an ordinance to prohibit residents from using water outside their homes over the July 4th weekend. The ordinance then allowed water to be used for outside purposes only between 5 a.m. to 6 a.m. and 8 p.m. to midnight, beginning Monday.

### TEA Recommendations Being Met By Pampa School System

EDITOR'S NOTE: The following article is the first of a two-part story explaining changes in Pampa School District since the Texas Education Agency evaluated the district's accreditation in 1967. The second article will appear in Friday's edition of The News.

By WANDA MAE HUFF

After a two-year study, Pampa school administrators have prepared a reply to the Texas Education Agency's 1967 evaluation which stressed areas needing improvement to meet accreditation standards.

Supt. Dr. James F. Malone submitted his report to school trustees Thursday and explained the progress report was delayed, with TEA approval, due to the change in superintendents.

Dr. Malone stressed the district's \$900,000 bond issue which voters passed in April, will finance most of the physical

plant improvements TEA evaluators requested.

According to the TEA report, accreditation standards were not met because of several deficiencies in physical plant needs on elementary and secondary levels.

In listing the needs, the TEA team named improvement of administrative offices, improvement of physical facilities at Pampa Junior High School, Wilson, Houston, Mann and Baker Elementary Schools, lack of suitable science labs at Lee Junior High, lack of adequate facilities at Pampa Junior High School for physical education classes, shop classes, science storage and instruction, cafeteria, parking and playground.

At Pampa High School, TEA evaluators advised the trustees to provide more space for indoor activities and suitable dressing room space for boys' physical education classes, improve science facilities, move the library from the third floor and make it accessible to students after school hours.

Construction plans in the district's \$900,000 bond issue will include 13 projects which will

### Monkey Died Of Probable Heart Failure

HONOLULU (UPI)—A preliminary autopsy has revealed that Bonny, the space monkey probably died of heart failure resulting from a combination of weightlessness, immobility and a chilly space capsule.

The 14-pound ringtail monkey died Tuesday after he was brought back to earth in the ninth day of a planned 30-day orbiting mission to determine the physical effects of a long voyage in space.

The preliminary autopsy results announced Wednesday said Bonny suffered "minor injury to internal organs, probably due to re-entry forces."

However, "all organ systems indicated full function until the time of death. Death was probably due to cooling of the animal and consequent heart failure," the report said.

"Lack of heat due to immobilization, zero G (gravity) forces and a cool capsule (68-70 degrees) are felt to be the major contributors to the demise of the animal."

The autopsy was begun Tuesday afternoon at Hickam Air Force Base.

### Leak Discovered In Apollo II Booster

CAPE KENNEDY (UPI)—A leak was discovered in Apollo 11's pressurization system today but a space agency spokesman said it was not expected to delay the start of the lunar landing countdown tonight.

The problem was in Apollo 11's booster rocket. Technicians were ordered to climb into the rocket's huge fuel tanks to correct it.

A space agency spokesman reported that the leak was expected to prove minor and easily corrected, but he acknowledged, "It's the one matter of concern."

The countdown for next Wednesday's launch of Neil A. Armstrong, Michael Collins and Edwin E. Aldrin is scheduled to begin at 7 p.m. CDT and the spokesman said, "We're still planning to start the countdown on time."

He said the extent of the leak problem would not be known until later today. It involves a helium gas system used to pressurize the liquid oxygen in the first stage of the Saturn 5 rocket.

It was the first significant problem reported during the preparations to begin the countdown and a space agency spokesman said that Armstrong, Collins and Aldrin sharpened their flying skills in moonship trainers.

In a final pre-countdown staff meeting Wednesday night, Launch Director Rocco A. (See LEAK, Page 2)

### Committee To Stay Overnight In Pampa

Pampa will be one of the overnight stops for more than a score of members of the House Agriculture Committee, the assistant Secretary of Agriculture and other Washington officials when they come to the Texas Panhandle next weekend for an on-the-spot tour and visit with farmers, ranchers and businessmen.

Rep. Bob Price of Pampa, 18th Congressional District congressman and a member of the Agriculture Committee, said he had been working off and on for two years to get the committee to come to the Panhandle.

The party will leave Washington by air shortly after the House adjourns a week from today.

Headed by Price, Agriculture Committee chairman W. R. Poage of Texas, Clarence Palmby, assistant secretary of agriculture; James Smith, national director of the Farmers Home Administration, and a number of other agriculture department officials, the group is scheduled to arrive at Amarillo Airport late Thursday night, June 17.

Jim Campbell of Pampa, one of Congressman Price's aides in the 18th District, is in charge of arrangements for the tour which will begin after breakfast early Friday morning, June 18, when the party makes its first stop at the Randall County Feed Yards, south of Amarillo.

From there committee members and accompanying officials will move on to Tulia, Dimmitt, Hereford, Friona, and to the Halfway Research Center, west of Plainview.

After a stop at Plainview, the party then will fly to Pampa. Arrival at Perry Letors Airfield is scheduled around 8:15 p.m. Friday when they will be met by the Pampa Chamber of Commerce. Top O' Texan greeters for escort to the Coronado Inn and a late reception and dinner.

The committee en tourage will stay overnight in Pampa and leave here by air at 6:45 a.m. Saturday, June 19, for Memphis and a farmers and ranchers breakfast in Memphis City Park.

The second stop on Saturday will be at Perryton, then on to Stratford, Dalhart, Hartley, Sunray and Dumas. Departure from Dumas is set for 5:45 p.m. and from there to Canyon for a 7:30 p.m. western barbecue.

At 9 p.m. Saturday the approximately 60 persons in the party will attend the performance of "Texas" in the Palo Duro Canyon amphitheatre.

The Agriculture Committee will be joined at various points along the tour route by members of Congressman Price's Northwest, Southeast and Northern Agricultural Advisory (See GROUP, Page 2)

### School Board Lets Bid For Cafeteria Work

Pampa school trustees today accepted a low-bid of \$118,044 for construction of two new cafeterias. But they had not opened bids for construction of the new PHS athletic building at press time.

The low bidder on construction projects for Mann and Wilson Elementary Schools was Page and Wirtz Construction Co., Amarillo. Time allowed by the bidders for construction was 120 days after bids were let.

Other bidders and their base bids for cafeteria construction were: Wiley Hicks Jr., Amarillo, \$139,125; Raymond Jameson, Amarillo, \$138,878; and Edward P. Taylor, Amarillo, \$129,700.

The board was still discussing merits of gas and electrical equipment for the two cafeterias and had received bids from four companies. Bidders were: Golden Light Equipment Co., Amarillo, \$26,637, electric; and \$27,137, gas; West Texas Cable and Equipment Co., Abilene, \$31,023, electric; 28,394, gas; Food Service Equipment and Supply Co., Lubbock, \$25,899.30, electric; \$30,622.20, gas; and Formost McKesson Systems Division, Dallas, \$28,207, electric; 28,090, gas.

Herbert Brasher of Brasher Goyette and Rapier, Lubbock, the district's architect for its \$900,000, school improvement project met with the board today to discuss bids for the cafeterias and athletic building. Brasher stressed the need for underground electrical lines at Wilson School. If the board chooses to use electrical equipment,

### Bear Attacks Two Men In Park

YELLOWSTONE NATIONAL PARK, Wyo. (UPI)—Rangers at Yellowstone National Park cleared a camping area of tourists late Wednesday, then lay in wait for a lumbering bear that attacked two men earlier in the day.

Asst. Park Supt. Vern Hennessey said he doubted whether the trap would be successful. "We don't hold out too much hope of locating him," Hennessey said.

The attacks were the second and third this summer. Last June 10, Daphne Jax, 5, of St. Paul, Minn., was mauled by an aging grizzly in the fishing bridge camp ground, the same location as Wednesday's attacks.

The two latest victims, David Lou, 22, of Los Angeles, and Michael Rock, 23, of Carnegie, Pa. suffered only minor head wounds. They were taken to a park hospital.

Lou was sleeping in a tent about 3 a.m. when the bear walked in and attacked him. About 30 minutes later, Rock was attacked as he lay in his sleeping bag outside his car, about a quarter of a mile away from the first attack.

If it comes from a Hdwe. store, we have it. Lewis Hdwe. (adv.)

### Wall Street Chatter

NEW YORK (UPI)—Erosion of stock prices during the first half cooled the stock split fever, but there is nothing inherently bullish about a split and a stock split candidate rarely should be bought for that reason alone, Standard & Poor's said.

It is too early to conclude that a definite 1969 market bottom has been seen because there has been little change in the underlying factors that brought the market down in the first half, said Bache & Co. The firm cautioned against being carried away by upside moves or following bulges "because this market is not going to bail out those making poor tactical moves."

Thomson & McKinnon observes that "significant advances usually are preceded by a period of testing and base-building." It found the early July rise from the upper segment of a support area encouraging, but limited its recommendations to "high quality, technically strong issues."

The absence of excessive dynamism in the overall economic trend, notes International Statistical Bureau, Inc., will be reflected in conservative business operations. The firm said stocks are not in the early stage of a bear market, the economy is not in the early stages of runaway inflation, nor is it faced with the possibility of a major recession.

### DANTE ARRAIGNED

SANTA ANA, Calif. (UPI)—Ronald Dante, night club hypnotist and seventh husband of actress Lana Turner, was arraigned Tuesday on a grand theft charge. The case involved the alleged removal of seven boats from the yard of a manufacturer a year ago. Dante contends he had legally purchased the boats. Municipal Court Judge William W. Thomson ordered Dante to appear Aug. 5 for a preliminary hearing and a ruling on a defense motion to dismiss the charge.

### Free Election Challenge Given

PARIS (UPI)—Allied officials challenged the Communists again today to accept free elections in South Vietnam but said they need not necessarily be held under international supervision as President Nixon has proposed.

"Our policy amounts to a democratic challenge to the Communists," said an Allied delegate to the Paris peace talks. "We are offering free elections with adequate guarantees or international supervision."

The Communists have always rejected the idea of international supervision, a proposal which was part of President Nixon's May 14 peace plan.

An Allied spokesman said the United States and South Vietnam would be willing to consider an alternative means of ensuring the fairness of such elections.

A South Vietnamese spokesman said there was "common ground for negotiations between the two sides on the basis of peace plans put forth by President Nixon."

"We want them (the Communists) to discuss this common ground," the Saigon spokesman said. "But they refuse. That is why we say they have not shown good will. They want us to accept their preconditions first before they will even enter into discussions."

The Communists have demanded the unconditional withdrawal of U.S. and other Allied troops from South Vietnam and the removal of the present Saigon government as preconditions.

The Allies have refused both demands.

Allied and Communist negotiators will meet for the 25th time of the Paris peace talks Thursday in the former Hotel Majestic.

### ACTRESS COLLAPSES

SYDNEY, Australia (UPI)—Marianne Faithfull, 22, the actress-singer and girl friend of pop singer Mick Jagger, collapsed and was hospitalized with possible fatigue today.

Miss Faithfull and Jagger are in Australia to star in a movie on the life of Australian bandit Ned Kelly. Some of Kelly's fans have complained that Jagger, a member of the British Rolling Stones group, was not handsome enough for the leading role.

### The Crazy World That Is Washington

WASHINGTON (UPI)—The story is admittedly hard to grasp in printed words, but envision any old movie featuring Lauren Bacall and Humphrey Bogart, or Tallulah Bankhead, set in the tropics and far removed from civilization.

Then one may begin to get the idea of how it is on the Grand Cay of the Bahamas, which is becoming one of President Nixon's favorite resorts.

Last week he spent most of two days at the Grand Cay residence of Robert Abplanalp, a New York industrialist who has developed a deep interest in several projects involving this group of tiny, off-the-beat-path islands about 150 miles from the southeast Florida coast.

The Abplanalp residence is rather grand structure, for its area, overlooking a complex of tiny islands and lagoons. He is interested in the area for several reasons. One is the harvesting of rare tropical fish for sale to breeders and fanciers all over the world. Another interest is admittedly experimental but it involves so-called "fish farming"—raising food fish in vast quantities by providing natural foods and breeding areas in which these fish will breed and be harvested in the manner of a well-run wheat or corn farm.

About seven miles from Grand Cay is another relatively large island owned by Abplanalp, Walker Cay, on which stands what has to be one of the more colorful hotels in this part of the world. Known as the Walker Cay Club, it is a fascinating old structure.

The 20-room structure has four air-conditioned bedrooms for transients.

### Colleges Need Opportunity Equalization

United Press International Tax-supported state universities are intended, at least in part, to equalize opportunity. With student fees less than at private colleges lower income families should be getting a better break.

But does paying for higher education really work that equitably?

According to a study at Florida State University, the effect of Florida's state-financed system of higher education is quite the contrary. Proportionately, lower income groups shoulder more of the costs and received less of the

benefits than higher income groups.

Douglas M. Windham, who made the Florida study as a doctoral dissertation in economics, said a similar report from California showed that that state, which has a massive university-college system, was doing the same thing.

"Both studies reach the same conclusion: If the public has a desire to remove the inequities of the system, it will require substantial revision of the present tax structure and-or the eligibility base for public higher education," Windham said. He concluded the present system of state support for higher education "is having large and

unfortunate repercussions upon society's distribution of income."

Principally because of entrance requirements which result in a study body mainly from better high schools, Windham's study said, the universities obtain a large proportion of their students from families with better incomes.

Florida's six state universities' principal source of income is state support and the state's tax system is "regressive," much of the revenue coming from consumer taxes, Windham said.

Therefore, in terms of costs and benefits of the university

system, he said: Families with incomes under \$3,000 bore \$10,283,340 of the cost of the universities and received only \$6,374,330 of the benefits, according to one estimate. Families with incomes of \$3,000 to \$5,000 bore \$19,558,730 of the cost and received \$12,141,620 of the benefits; families earning \$5,000 to \$10,000 paid \$45,375,960 and received \$41,180,320.

In 1960 Russian Premier Nikita Khrushchey threatened the United States with Soviet rockets if Washington attempted to oust the Castro Communist regime in Cuba.

Your Horoscope

**JEANE DIXON**

**FRIDAY, JULY 11**  
**Your Birthday Friday:** Your motto for the coming year is "I'll do it myself." No one else to show the way. The year promises to be free of major events. Social, political activity generally declines. Friday's natives like to make their own rules, and some are noted for industriousness, scholarly genius.  
**ARIES (March 21-April 19):** Finish the weekend chores early; there are changes you must prepare to meet. Enjoy a sociable evening.  
**TAURUS (April 20-May 20):** Put your main effort into work unassisted, as co-operation is less fluent for the moment. Your feelings get in the way of your judgment on business (so let well enough alone).  
**GEMINI (May 21-June 20):** You will do better if you master your fretful mood Friday. Avoid comment on others' actions, as it will only be taken as criticism.  
**CANCER (June 21-July 22):** Make this a sorting-out day; throw away the useless. Take care, as you will not be able to retrieve anything cast away now.  
**LEO (July 23-Aug. 22):** Get everybody talking Friday while you listen and match up the stories. You'll learn something unusual and be in a better position to prevail later.  
**VIRGO (Aug. 23-Sept. 22):** Get the job done so you'll have the time to do what you want to do later. Take care of any

unfinished details, any backlog of correspondence.  
**LIBRA (Sept. 23-Oct. 22):** Your diplomatic skills must be exercised Friday with relatives; nothing to cause real tension. Study, self-improvement are strongly favored, while travel and purchasing are less productive.  
**SCORPIO (Oct. 23-Nov. 21):** Now you begin to see some point to recent events and the pattern of comment you have been hearing; this is not accidental.  
**SAGITTARIUS (Nov. 22-Dec. 21):** Your encouragement of your fellowmen Friday is beyond price. Reach out to help and to share in their goals. Home improvements (more space or better access) turn out well.  
**CAPRICORN (Dec. 22-Jan. 19):** Inside information, technical advice, good counsel is available if you will look. Credit offered. Friday is favored for later profit. Pamper yourself a bit.  
**AQUARIUS (Jan. 20-Feb. 18):** Expect people to be quite sensitive Friday. Put your emphasis on improving your own resources. Thrift is quite in order now.  
**PISCES (Feb. 19-March 20):** Get everybody involved in repairs and maintenance activity. Check your home for hazards, first aid supplies, and similar items, just to be sure. Then meditate in some other place for a while.

## War, Social Upheaval Contribute New Words For Lexicographers To Decode For Dictionaries

By PATRICIA McCORMACK  
 NEW YORK (UPI)—Tried an alphabetic lately?  
 Or have you seen a birdy-back, a carbecue or maybe an ego plate?  
 Well, then. At least, you must have chomped on a cabbish! If this sounds Greek to you, it's not. It's English—new words among strange-sounding ones that have worked their way into the language in certain circles.  
 And, who knows, they may worm their way into the dictionaries of tomorrow.  
 Lexicographers at G. & Co. in Springfield, Mass., have scores of such words on their list for

possible inclusion in new dictionaries.  
**Words From All Sources**  
 A full-time editorial staff, under the direction of Dr. Philip B. Gove, editor, plucks the words from all kinds of sources.  
 Anything printed comes under consideration — cereal boxes, restaurant menus, underground newspapers, scholarly journals, scientific reports.  
 "Most of the new words," says Dr. Gove, "get their greatest push into everyday language from the newspapers and television. War and social upheaval obviously have the

most dramatic impact on our language."  
 Birdyback is a word from the war in Vietnam. It means movement of a loaded truck by airplane.  
 Other words at the start of this story and their meanings:  
 —Alphabetic. A mathematical puzzle with letters substituted for numbers.  
 —A Large Oven  
 —Carbecue. A large oven for melting unsalvageable material from a junked car.  
 —Ego plate. An auto license plate bearing distinctive numbers or letters.  
 —Cabbish is a radish crossed

with cabbage. Also called radage.  
 "Youth also has contributed to new words," Dr. Gove says. "Many of its terms are getting into the language. One is acid rock, a psychedelic variant of rock 'n' roll in which there are references to drugs."  
 The leap for the moon has brought the word moonie—hotel on the lunar surface. A lunarnaut will describe an astronaut who has been to the moon.  
 If you are interested in unidentified flying objects, by the way, call yourself an ufologist.

Wanda Mae Huff, Women's Editor

### Wedding Slated For Area Couple

**GROOM (Spl)** — Mr. and Mrs. Foster Burgin announce the engagement and approaching marriage of their daughter, Evelyn Ann, to John Douglas Thompson, Dumas.  
 The bride-elect was graduated from West Texas State University where she held membership in Phi Gamma Nu; Future Secretaries Association, and Alpha Chi, and was selected to Who's Who in American Colleges and Universities.  
 Her fiancé is a senior student at WTSU where he is in ROTC and is a member of Scabbard and Blade. The wedding will be held in Groom United Methodist Church at 2 p.m. Aug. 30.  
**STEAMED CORN IN HUSK:** Soak ears of unhusked corn one hour in salted water to cover, using 1 tablespoon salt to one quart water. Just before cooking loosen husks only enough to remove silks. Pull husks back in place and cook over grill 20 to 25 minutes, turning to cook uniformly.

### Agent Discusses Uses For Sugar

Where has all the sugar gone? Sugar for home use has decreased from about 60 per cent of all sugar deliveries to 27 per cent in the past 30 years, reports Miss Jimmie Lou Wainwright, Gray County home demonstration agent.  
 "The sugar has gone to institutional and industrial use. This shift from home use is caused by homemakers buying more convenience foods," Miss Wainwright said.  
 Pre-sugared items and "ready to eat" products lower the needs of sugar in the home. Liquid sugar users by quantities show that over 50 per cent of all liquid sugar goes to the beverage industry, she said.  
 Next come the canning industry, ice cream and dairy products, confectionery and the baking industry. It is second only to the beverage industry in terms of total sugar usage, Miss Wainwright reported.  
**ROAST CORN WITH BACON:** Turn back husk only enough to remove silk. Wrap strips of bacon around ears, holding ends in place with toothpicks. Pull husks back in place. Cook over grill 20 to 25 minutes or until husks are dry and brown. When corn is almost done remove husks to crisp bacon.

### Area Church Class Hears Devotional

**GROOM (Spl)** — Esther Sunday School Class of First Baptist Church heard a devotional lesson based upon the 23rd Psalm at its recent meeting. Mrs. Marie Rogers was hostess with Mrs. Ellen Dickerson.  
 Attending were two guests, Mrs. Ruby Lee Jones and Mrs. Gladys Fields, and these members: Mrs. Thelma Pool, Mrs. Mertie Schaffer, Mrs. Mattie McAdams, Mrs. Corrine Wheeler, Mrs. Esta Byes, Mrs. Driskill, Mrs. Dickerson and Mrs. Rogers.

### Area WMU Meets

**GROOM (Spl)** — The Baptist WMU met in the church recently for Bible study. Mrs. Jeff Gray led the study on the book of Hebrews. Others present were Mmes. Frank Burgin, Donald Ritter, Eulice Monroe, Robert Milton, Viola Harrell, D. A. Watson, Alvin Hiltbrunner and Bill Burgin.

### FAT OVERWEIGHT

Available to you without a doctor's prescription, our product called Odrinex. You must lose ugly fat or your money back. Odrinex is a tiny tablet and easily swallowed. Get rid of excess fat and live longer. Odrinex costs \$2.00 and a new, large economy size for \$5.00. Both are sold with this guarantee: If not satisfied for any reason, just return the package to your druggist and get your full money back. No questions asked. Odrinex is sold with this guarantee by: Richard Drug Store, 111 N. Cuyler, Mail Orders Filled.

Dear Abby

By Abigail van Buren

**DEAR ABBY:** People think we are a happy pair with nice children and a lovely home. We have many interests and lots of friends. This is only on the surface. In reality, I am only the housekeeper. My husband has no time for me. He's so busy helping Tom, Dick, and Harry. I rarely see him. My love life is almost nonexistent.

Life is so short, it's a pity to "live like this," but I have made my bed. Despite our religion, I'd leave him if it were not for the children because I know he will never change. I am sure there are other unhappy wives here. Belfast men are so unloving.

**"UNHAPPY IN IRELAND"**  
**DEAR UNHAPPY:** Belfast men are no less "loving" than other men. Your complaint is universal, Madame. And the solution is so obvious. I'm surprised you have not thought of it yourself. Stop playing the role of the abused and married wife, and "kill" your man with kindness.

**DEAR ABBY:** My husband's brother (I'll call him Danny) and his wife have separated after many years of marriage. I invited Danny to my home for Sunday dinner and he accepted. Then he called my husband at the office and asked if he could bring a date. Without asking me, my husband said he could.

When I was told of this, I let my husband know that I didn't approve. In the first place Danny isn't divorced yet, and in the second place we have children at home, and I do not think it's right for them to see their uncle with a date while he is still married.

Well, my husband insisted, telling me how depressed Danny was, etc., so I gave in, but I made sure my children were not home that evening.

Now, my husband tells me that Danny is coming for Sunday dinner again, and he is bringing a girl. A different one! I'm furious with my husband for being so wishy washy. I think it is wrong to receive a married man's dates in my home. What is your opinion?

**OLD FASHIONED**  
**DEAR OLD:** I go along with you. And I also think it's inconsiderate of your husband to trap you into entertaining people you don't want in your home. It's YOUR home, too.

**DEAR ABBY:** My husband and I disagree on something I consider vital to a good marriage. I disapprove of a married man taking his secretary out to lunch, or dinner, or even for a drink after office hours.

My husband says it is a nice way to show his appreciation for extra work, or a job well done. What do you say?

The Women's Page

WANDA MAE HUFF, WOMEN'S EDITOR

POLLY'S POINTERS

Methods For Removing Stains On Enamel Pans

By POLLY CRAMER

**DEAR POLLY** — I want to help Lil get the stains out of her enamel pans and get her ballpoint pens to write. I use full-strength bleach in my enamel pans and let it stand for from five to 15 minutes or until the stains go away. If the sides are stained, just swish the solution around until the stains are moistened, or drop a piece of paper towel in it and then swab the sides. Wash with soapy water and rinse.

If you scribble hard on the leather sole of a shoe or slipper this normally will make a ballpoint pen write.

**DEAR POLLY** — The ink in some ballpoint pens tends to dry, especially if they aren't used frequently. The ink also tends to thicken in cold weather. Stick most of the pen under a water faucet for a few minutes with very warm water running over it, then dry with a rag or towel. This usually solves the problem and gets the ink to flow freely again when writing.

**DEAR POLLY** — Do tell Lil who can't remove the stains from her white enamel pan that I wet such a pan, sprinkle the stained area (enough to cover

Food Buying Guide

WASHINGTON (UPI)—The following guide to the nation's food buys for the weekend was prepared by the U.S. Department of Agriculture and Interior for United Press International.

USDA's Consumer and Marketing Service reports that food shoppers will find good supplies of meat and poultry and some choices in fresh vegetables and fruit in food storages and supermarkets for this second weekend in July.

Broiler-fryer chickens and turkeys continue to be the most abundant meats. Beef cuts in best supply are again roasts, steaks, and ground beef. Pork items in best supply are bacon and chops in most areas along with ham, roasts, and smoked picnic in some areas. Fish buys to consider are canned tuna, Maine sardines, and fish sticks and portions.

Fresh vegetables in best supply are cabbage, corn, onions, and potatoes. Some areas may add tomatoes. Watermelons and cantaloupes are abundant in most areas. Fresh fruit in best supply are bananas and limes, and peaches in some areas.

USDA's plentiful foods list for July features peaches, but marketing of this fruit continues to be slower than expected. Other foods on the plentiful list are rice and summer vegetables along with watermelons.

2 OES Officials Feted At Dinner-- By Area Chapter

MIAMI (SpI)—Mrs. Robbie Yates, Stratford, Worthy Grand Matron of the Grand Chapter of Texas Order of the Eastern Star, and her husband Floy Yates, chairman of the U.D. Committee of the Grand Chapter of Texas were honored with a salad supper by Miami Chapter No. 98 OES, recently in Masonic Hall. A hand made Eastern Star quilt was presented Mrs. Yates at the regular OES meeting.

Other grand officers introduced by Mrs. Kathy Scott, Worthy Matron of Miami Chapter were Mrs. Sudie Beth Hancock, Amarillo, Grand Martha; Victor Jones, Amarillo, Grand Sentinel; Mrs. Lillian Shaw, Canadian, Deputy Grand Matron for District 2, Section 1; Mrs. Florence Dodson, Miami, Grand Representative of the State of Florida to the Grand Chapter of Texas; Vernon Hancock, Amarillo, Masonic Ambassador; Mrs. Alice Hardin, Miami, Fraternal Visitation of the Grand Chapter of Texas, Order of the Eastern Star.

Man lost his claim to bodily adornment after the French Revolution when the simple black suit was adopted as the working man's clothes. Says Mike Howard, Beverly Hills film-television men's wear designer. Only in the past half dozen years is he beginning to win back that distinction.

## Annie Neel Finds Dispatching Easy

By DON TURNER

Mrs. A. I. (Annie) Neel is one of three full-time dispatchers employed by the Pampa police department.

Mrs. Neel joined the force

A. I. (ANNIE) NEEL

March 25, 1967, from a job as bookkeeper in a department store. She attributes her success at her present job to her experience in the department store and a grocery store owned by her and her husband.

"It wasn't bad for me," she said. "When we had the grocery store, we kept it open from 6 (a.m.) to 11 (p.m.). Any kind of shift didn't bother me."

"I was used to using the intercom at the department store. I didn't freeze and get scared of the mike."

Working at a grocery store check out stand had helped her to coordinate several processes at once.

"You have to monitor the

telephones, the street phones (calls from city departments such as water and sewage), the Celanese monitor, the state monitor and the monitor for surrounding towns at the same time," Mrs. Neel said.

"When I worked in the grocery store, I had to talk, add and give stamps at the same time. It didn't bother me."

The main requirements of the job are to "Keep calm, keep cool and you have to know your job." A two minute delay in dispatching an ambulance, for instance, might allow an accident victim to bleed to death, she said.

Sometimes keeping calm is hard, though.

"A feeling that makes you excited is when you hear reports of a tornado sited near White Deer or some place and coming into Pampa," Mrs. Neel said. "We have to monitor all the reports. If we knew it was going to blow us away, we'd have to stay here and 'man the guns.'"

When she isn't at the radios and telephones, Mrs. Neel is busy filling out reports on all incidents reported to the police department.

For obvious reasons there aren't too many people ready to tackle the job but it isn't as complicated as many people think, Mrs. Neel said.

"When you tell everything about the job it seems very complicated," she said. "The best way to break in someone new at the job is not to tell them all that it involves at the same time."

## Space Technology May Help Farmers

AUSTIN (UPI) — What the United States is learning in space technology could one day help farmers replace the old crops-in-soil method with the technique of hydroponics, growing plants in nutrient solutions, a University of Texas professor says.

Dr. Eugene B. Konecki examined food and technology trends in a "Working Paper" for the research center for management of technological and intellectual resources at the University of Texas.

The hydroponics approach grows plants in such things as fiberglass, washed gravel, or without a supporting medium. The nutrients, temperature, humidity and other conditions are controlled. The plants mature faster, have a greater yield and are protected from weather and pest damage.

"Environment and nutrient control are the keys to success in utilizing hydroponics as a mass production system for a variety of produce on an all-year-round scheduled basis," Konecki said.

Space developments in the field of life support and environment control help the process, he said.

"Like the U.S., the U.S.S.R. is deriving space program advanced technology in life support protective systems and environmental control, which is valuable in making hydroponics an economical venture."

Right now, the process is too expensive compared with the old farming techniques, he said, but its promise is great as the technique improves and the cost-to-yield ratio goes down.

"Hydroponically nurtured tomatoes are vine-ripened and taste so good that a gourmet label has been attached," Konecki said.

"Additional research and development of better environmental systems may yield 15 times as many tomatoes as would come down from the same amount of soil."

"The plants mature 30 per cent faster, crops are grown year-round since they are protected from floods, snow, hail, dust and the extremes of heat and cold. Temperatures and humidity can be regulated automatically to maintain conditions best for the plants being grown."

Farmers who have tried the technique find it works well with above-ground crops, but

ponics, he said, will include new products for low-cost coverings and containers, and development of cheap power sources for the environmental control that hydroponics requires.

some root crops do not do so well, he said.

Keys to the success of hydro-

Lions Elect International President

W. R. Bryan of Doylestown, Ohio, was elected President of Lions International at the Association's 52nd Annual Convention in Tokyo, Japan, July 2-5. Serving as the 53rd President of the world's largest humanitarian organization, Bryan leads some 910,000 members in 28,300 clubs located in 145 countries and geographic areas throughout the world.

Lions International is best known for its aid to the blind and sight conservation activities, international relations programs, and its many community service projects. "Unite Mankind Through Lionism" will be the primary theme during his 1969-1970 Presidential Year, with special emphasis on youth programs and the importance of young people in strengthening world understanding.

A thought for the day: Friedrich Wilhelm Nietzsche said—"Distrust all in whom the impulse to punish is powerful."

"I KNOW THE ANSWER" — Youngsters in the pre-school class of Miss Joy Shultz raise their hand to let

teacher know they are ready to answer her question. (Photo By Bob Kelly)

## Experimental Kindergarten In Pampa Pleases Parents, Children

By RON CROSS

Like almost everything kindergarten has changed quite a bit since 1945.

Oh, the kids still have fun since they are entering one of the most exciting times of their lives.

Put kindergarten, the first grade and almost all of the grade levels have been accelerated.

The youngsters are bigger, they learn quicker and they have more things to learn.

The teachers get prettier every year, too.

Texas Doesn't have a free kindergarten in the school system, although one is in the making for 1970-71.

It has been tried on an experimental basis here and Canyon and has been a complete success, drawing nothing but praise.

There have been 34 Pampa youngsters going to class at Lamar Grade School the past six weeks learning a variety of things that will prepare them to enter the first grade this fall. The youngsters are nothing special, except to their parents,

and were chosen at random to attend the pre-school session.

Lamar Principal Joe Page has done everything at the school from administration work to sweeping the floors.

The youngsters are nothing special, except to their parents, and were chosen at random to attend the pre-school session.

Lamar Principal Joe Page has done everything at the school from administration work to sweeping the floors.

The youngsters have had fun being taught by Joy Shultz, Mrs. Linda Crossland and teacher aides, Mrs. Esta Lee Brogdon and Mrs. Crystle Crow.

Mrs. Earlene Earp drives the bus, transporting Carver school youngsters to school and home.

Now that I think about it I guess my kindergarten class was pretty dull.

There were no field trips to never did get to visit the post office, library or fire station.

In the experimental pre-school classes at Lamar the bell rings at 8 a.m. and its time for breakfast.

The youngsters are served

scrambled eggs, toast and just about anything breakfast consists of.

Then it's time for class with half of the youths in Miss Shultz class and the other half in Mrs. Crossland's class.

You learn quite a bit, including free expression and art. I did notice one thing that hadn't changed, the teachers still ask questions I can't answer.

The youngsters are still taught that the old U. S. A. is the greatest country there is. They pledge allegiance to the flag and "America the Beautiful" is a popular song. They are even allowed to pray once in a while.

A questionnaire was sent to the youths parents asking if they thought the pre-school program had helped their sons and daughters and if it should be continued.

Everyone answered a resounding Yes! Friday school ends, for a while, for these 34 youngsters and all of them are pretty darn mad about it.

## Washington Window

By RAYMOND LAHR

WASHINGTON (UPI)—Many in Congress call it arm twisting. Senate Republican Leader Everett M. Dirksen calls it the oilcan.

Whatever term is used, it refers to pressure applied and the favors implied in a drive to win passage of a major administration bill without a comfortable majority in sight.

The President really wants this one. The President needs this one. That is the message passed by his own party leaders and administration agents at the Capitol.

The issue in the House last week was the administration's tax bill. Coming up in the Senate this week is a bill to authorize the administration's Safeguard IBM system, although two or three weeks may be consumed by debate before the Senate votes.

Before such votes, there are meetings at the White House and head counts at the Capitol. Democrats' muttered that Secretary Robert H. Finch had to sacrifice his choice, Dr. John H. Knowles, to be assistant secretary of health, education and welfare for medical affairs in order to win support for the tax bill.

Rep. William L. Scott, R-Va., said he had been threatened before the roll call by a fellow Republican on the Public Works Committee with loss of a project in his district if he did not vote for the bill. He didn't.

The House leadership of both parties overestimated the votes they could produce. GOP leaders had to fall back on reserve strength and got four opponents of the bill to switch their votes.

Although House Democratic leaders supported the bill and former President Lyndon B. Johnson recommended extension of the surtax in his January budget message, only 56 Democrats voted for the bill.

When the IBM test comes in the Senate, it should come as no surprise if one or two unhappy warriors emerge from the Republican cloakroom at the last minute to cast reluctant votes for the administration.

But if it is clear that the administration is going to lose, they can vote against the Safeguard, and Republican waverers who already have voted with the administration can switch against it before the result is announced.

### NO NEWS

LONDON (UPI)—When news time arrived on the BBC (British Broadcasting Corp) radio network Sunday night the newscaster startled listeners with this announcement: "No news is good news and there is no news." He said later the newscast was late in arriving from the newsroom.

## Television In Review

By RICK DU BROW

HOLLYWOOD (UPI)—Several highly provocative summer documentaries have been announced by the television seizure of the American ship Pueblo, the other concerning the 1968 presidential race.

"Pueblo: A Question of Intelligence" is the title of a one-hour program that will be broadcast on NBC-TV Aug. 25. The network describes it as a "closeup study of a traumatic military event in American life," and makes clear the hour will go well beyond a mere recapitulation of the well-known events.

The broadcast "will attempt to assess the implications (of the Pueblo case) on American society today," says NBC-TV.

The purpose of the program, says the network, is "to examine all factors concerning the seizure of an American ship in neutral waters by an enemy nation, the internment of her crew in that country, and the failure of the military and the intelligence community to foresee what might happen under the existing circumstances—and to act when it did happen." First, there will be a study of the mission itself. Next, the program will ask: "Who was to blame?... was the incident more than just a failure of a man, or a ship, or a service, or a government, or a national policy?"

Finally, the broadcast will

explore "the role of the intelligence community, and the methods of gathering of military information..."

Several weeks after "Pueblo: A Question of Intelligence" is broadcast, another provocative network documentary, "The Making of the President: 1968" will be presented for 90 minutes on CBS-TV. The air date is Sept. 9, it is the third in a series of programs that also covered the 1960 and 1964 presidential campaigns, and once again it reunites historian Theodore H. White with producer Mel Stuart of David Wolper productions.

Says an announcement from CBS News: "The production of the broadcast has been under way since January 1968, beginning with the primary in New Hampshire and running through President Richard M. Nixon's victory election night. There were three film crews in the field acting on directions from White as to what to cover."

### THOROUGH EXHIBITION

BAR MILLS, Maine (UPI)—The Springvale Fire Co. entry at a fireman's exhibition Saturday apparently thought the crowd of spectators needed a cooling off.

Without warning, they opened the hydrants and turned their hoses on the spectators—drenching hundreds.

### FROTHY WATER

ALDERSHOT, England (UPI)

—When residents of the Ahs Hill government housing estate turn on their kitchen taps out comes something that looks like beer.

Trouble is, they say, it not only doesn't taste like beer it tastes vile. Water Works officials say rust in the pipes may be causing the water to come out reddish-brown. But they can't explain the head of froth it produces.

Rep. William L. Scott, R-Va., said he had been threatened before the roll call by a fellow Republican on the Public Works Committee with loss of a project in his district if he did not vote for the bill. He didn't.
