What Happens If Bond Issue Fails?

By **TEX DEWESE**
Pampa News Staff
City commissioners expressed confidence today the \$300,000 bond issue to pay the city's share of Pampa's proposed \$1.4 million sewage treatment plant will be approved when voters go to the polls July 8.
But —
When they concluded action on routine items on a short agenda at today's semi-monthly meeting they discussed several things that might happen if the bond should unexpectedly be defeated.
Among the possibilities were these:

1. Reappraise the situation and call another bond election after two weeks had passed.
 2. Issue warrants for obligated future payments to contractor.
 3. Federal government could come in, take over and do the job and attach municipal revenues to pay city's share of the cost.
- So far there seems to be no precedent for any of these.
- Following today's city commission meeting the Pampa News talked by long distance telephone, with Milton Rose, chief of grant management for the Texas Water Quality Board in Austin.

Pampa currently is awaiting word on a 75 per cent federal aid grant. Plans and specifications for the local project have received final approval from the Environmental Protection Agency.
The amount of the grant is all that remains unknown at City Hall.
Rose said announcement of Pampa's grant could come before June 30, or it could come shortly after July 1 when a new priority list becomes effective.
Pampa still is No. 4 on that list, Rose said. And that No. 4 is among more than 400 Texas

communities seeking grants for sewage treatment facilities.
Incidentally, Rose said when the grant is issued by EPA it first will be given to Rep. Jack Hightower's office in Washington for announcement.
Within five days after that, he added, the grant will be mailed to the City of Pampa. The city then will have 30 to 45 days to get back with EPA to advise what has been done on advertising for bids and getting construction under way.
Rose said in event the bond issue failed general procedure would be for the TWQB and EPE to give the city permission to

consider what new approach should be taken to resolve the matter.
If definite action could not be reached within a reasonable time, Rose stated, the federal grant would be cancelled.
If that point arrived, the city still would be in violation of anti-pollution laws that caused the TWQB to issue the order for Pampa to bring its sewage treatment facilities up to state and federal standards.
At today's commission meeting, Mayor R.D. Wilkerson said he was not entertaining any thought that the bond issue would not be approved.

"Certainly Pampans are not going to turn down an opportunity to get \$1.2 million to bring about a new sewage treatment facility when all we have to raise is \$300,000," the mayor said.
The mayor and City Manager Mack Wofford said city speakers to explain the bond issue would be available to any organization wishing to have a speaker on the subject.
City Manager Wofford will speak to the downtown Kiwanis Club Friday noon.
In other business today commissioners:
Approved payment of \$87,227 to Lewis Construction Co. Dumas for seal-coating city streets, and \$3,489 to Merriam

and Barber of Pampa for engineering services in connection with the seal-coating program.
Continued a public hearing on proposed removal of an abandoned structure at 500 N. Zimmers until the next regular meeting.
Approved accounts payable for May in the amount of \$63,925.

Ford To Veto Housing Bill

WASHINGTON (UPI) — President Ford intends to veto the \$13 billion middle income housing bill a White House spokesman said today.
House Speaker Carl Albert

said today he did not think the Democratic-controlled Congress could override the veto.
White House Press Secretary Ron Nessen said the veto message would be sent to

Congress later today and Housing Secretary Carla A. Hills would explain Ford's reasons for taking the action at the same time.
Albert said a House vote to

override a veto still was scheduled for Wednesday, but it "cannot be overridden." House Republican Leader John Rhodes, Ariz., agreed, saying the veto would be sustained.

Rhodes said he understood Ford would propose his own program to stimulate housing by making more funds available to the Government National Mortgage Association to buy mortgages from savings and loan institutions, permitting them to make new mortgage loans.
Ford also will announce a plan under which the government would underwrite loans to homeowners facing foreclosure.

Internal Revenue Men Admit Collecting Gossip

WASHINGTON (UPI) — "Mere recitations of sex hangups are of no value to tax administration," the Internal Revenue Service has decided.
In a report made public Monday night, the IRS confirmed news accounts of how it once maintained computerized files of personal information about selected taxpayers, including gossip about sex and drinking habits.
The IRS report conceded the intelligence system had

"major" defects and said it was suspended Jan. 23 after less than two years in operation.
The report summarized an internal IRS investigation launched about the same time the system was abandoned after investigative reporters in Miami published stories about IRS snooping activities.
It was released by Rep. Al Ullman, D-Ore., chairman of the Congressional Joint Committee on Internal Revenue Taxation.
The bulky report, ponderously

written and at times contradictory, concentrated primarily on IRS intelligence-gathering activities in the Jacksonville, Fla., area and its investigations of possible tax cheaters in the Miami area under the code name "Operation Leprechaun."
The report said Operation Leprechaun was only one facet of its investigative system.
It said many of the targets were prominent citizens, including unnamed politicians and judges, identified to the IRS by Justice Department officials who believed "Miami was a watering hole for racketeers as well as a spawning ground for local corruption."
The report said nearly one-quarter of the data fed into the computer on the Miami-area targets dealt with their sex lives and drinking habits — information it defended as sometimes useful in establishing income levels.

"However, mere recitations of sex hangups or social activities unrelated to financial transactions are of no value to tax administration," the report said.
The report said the IRS began testing an Intelligence Gathering and Retrieval System in five of its districts in early 1972 and expanded it nationwide May 4, 1973.
It said the system was merely an index to show what information existed on various taxpayers and where it was located. It said the majority was gleaned from newspaper clippings.
But, it said, controls over what was indexed were so lax that even the names of former commissioners of IRS, senators and the IRS itself were included merely because they were mentioned in passing in news stories about a prime subject.

Committee Favors Gasoline Control

WASHINGTON (UPI) — The House Commerce Committee has reasserted its stand favoring mandatory controls on use of gasoline in the United States.
Working late Monday night, the committee turned down an attempt to give the President discretion in setting the controls during emergencies.
It left for today a final vote on the gasoline control section

of the proposed Energy conservation and Oil Policy Act.
It is a companion measure to the energy tax bill which the House has approved.
As drafted, the legislation would hold gasoline allocations down to the level of the 1973-74 base period. That would be done by limiting the amount refiners could make, and then the process would work down to the service station level.

Rains Continue, Wheat's All Wet

Foster Whaley, Gray County Agricultural Agent, said that wheat farmers are still suffering from a shortage of combines in the area and "there's a shortage of dry weather, too," he said.
The rain Monday night resulted in little damage to wheat in the Pampa area, but it did delay the harvest in many fields.
Whaley said that the rain was good for the milo that's up and the grass.
"It made a lot of ranchers happy," he said of the moisture.
The amounts of rain reported includes .58 of an inch in Pampa, an inch at Moody Farms, 12 miles east of Pampa, 1 1/2 inches at Laketon, 2.1 inches on the Charles Gatlin place east of the city, and 3 inches on the Dan Burger farm, 25 miles

southeast of Pampa on the Lake McLellan Road.
"We didn't need it," Burger said of the rain.
It wasn't needed at Lake McLellan, either. The Lake already is full from recent rains and has run over the spillway several times in the past month.
Two inches was reported at the lake and Don Wilson, concessionaire, said water was running over the spillway two feet deep early today. He reported that 4 inches of rain fell about five miles west of the lake on the watershed area.
Whaley said that while the Pampa area wheat was not damaged by the rains, the storm was more intense in the White Deer and Panhandle area and it "had to have done some severe damage to the wheat there that was ready to cut."

The Hughes Building — now Cabot Corporation property

Cabot Remodels Hughes; Some Tenants Relocate

By **ANNA BURCHELL**
Pampa News Staff
Extensive remodeling of the Hughes Building, on the corner of Somerville and Kingsmill, is scheduled for completion by Jan. 1, 1976, according to officials of Cabot Corporation — new owners of the seven-story facility.
Neil Quattlebaum, vice president of Pampa properties corporation, said today that the 225 Cabot employees already housed there will continue to occupy the entire building, with the exception of the second floor annex and exterior offices on the first floor.
Tenants, said Cabot spokesman, have an opportunity to remain in the building, however some have been requested to relocate within the facility in an equal amount or more floor space than they have now.
The King's Row Barber Shop, Quattlebaum said, is moving to another location because Cabot needed that space for an office.

The purchase of the Hughes building in Pampa, said Boyd Taylor, vice president and general manager of the oil and gas division, "is an indication that Cabot will be an important factor in Pampa economy for a long time in the future."
The building includes 93,000 square feet of office space. Cabot offices are housed in about 70,000 square feet.
"One of our considerations in buying the building is to provide more adequate and convenient space for Cabot operations," Quattlebaum said.
Asked if the name of the building will change, Cabot officials said they have made no decision in regard to the name.
The renovation calls for updated heating and air conditioning facilities throughout the building, roofing repairs, renovated elevators and extensive remodeling on several floors.
The work is being supervised by Cabot Engineering with a number of individual contractors involved in the work.
Remodeling also will extend to the building exterior.

Lake Releases Drowning Victim

By **THOM MARSHALL**
Pampa News Staff

The search for Johnny Tollison, 19, of 308 N. Christy, ended at about 8:50 a.m. today when his body surfaced at Lake McLellan.
Game wardens and others who had been searching for Tollison since about 6 p.m. Saturday when a skiing incident resulted in his drowning, retrieved the body and it was taken to Carmichael-Whitley Funeral Directors.
Searchers had been hindered by bad weather and muddy water that contains much brush and weeds.
Divers called in to search for the body Sunday were unable to see anything below the surface.
"They couldn't even see a compass to follow a straight line," said Don Wilson, concessionaire at the lake.
Tollison had been skiing Saturday with Rucky Lemons of 416 Texas and Patti Eickenhorst of 1506 Ripley. He climbed into the boat and removed his life jacket. The boat motor was started but did not function properly so Tollison reportedly jumped back into the lake to retrieve the skis.
Winds estimated at 40 miles per hour had hit the lake minutes earlier, according to Wilson, and the skis were blown away from Tollison at about the same rate he was swimming. He reportedly called back to the boat for help.
Lemons attempted to throw Tollison a life jacket, but again

the wind caused problems and the jacket fell short. Lemons jumped into the lake and attempted to swim with the jacket to Tollison but he could not reach him in time and reportedly became so exhausted in the effort that he had to be pulled from the water by another boat that had reached the area.
The excitement and the wind causing the boat to drift resulted in witnesses being unable to furnish an accurate description of the location for searchers. Those looking for Tollison were able to work only briefly Saturday before high winds and rain interrupted their efforts.
Tollison is the second person to drown at Lake McLellan this year. An Amarillo man drowned May 18. The News had previously reported that the lake claimed three lives last summer. That information is incorrect. There were no drownings at the lake last summer, according to Wilson.

Mr. Tollison was born Jan. 23, 1956, in Pampa. He was married to Dianna Kay Boughan on Aug. 12, 1974 at Panhandle.

Johnny Tollison

In addition to the widow, he is survived by his parents, Mr. and Mrs. F.E. Lamke, Pampa, three brothers, Staff Sgt. Lewis E. Tollison of Guam, Jessie E. Tollison of Pampa and Paul E. Tollison Jr. of Tacoma, Wash., a sister, Mrs. Bill Lynch of Skellytown, three step-sisters, Mrs. Ray Nutter of Waynoka, Okla., Mrs. Jerry Fuller of Oklahoma City and Mrs. Janice Lamke of Watonga, Okla., three stepbrothers, Verland Lamke of Oklahoma City, Floyd Lamke of Watonga and Walker Lamke of Waynoka.

25th Anniversary Of Korean War

WASHINGTON (UPI) — Historians say one reason North Korean troops invaded South Korea 25 years ago was that Harry Truman's secretary of state made a mistake — one Gerald Ford's administration says it will not make.
One indication of this is the announcement by Ford's defense secretary, James Schlesinger, that the United States has deployed tactical nuclear weapons in South Korea and is willing to use them.
In January of 1950, Truman's secretary of state, Dean Acheson, drew the U.S. defense line "south from the Aleutian Islands to Japan, to the Ryukyu Islands to the Philippines."
He did not include Taiwan or Korea.
On June 25, 1950, North Korean troops knifed across the 38th parallel and within two days had captured Seoul, the capital in the south. "Because of the time difference, it was June 24 in Washington."
A total of 33,629 Americans died fighting in Korea. In their memory, six members of the South Korean Assembly were to place a wreath today at the Tomb of the Unknown Soldier.
Korea today is an armed camp, on both sides.
In the north, 467,000 are under arms and there are 598 combat aircraft. Pyongyang spends about \$800 million on defense out of an estimated GNP of \$3.5 billion. The rhetoric of Premier Kim Il-Sung is escalating and there are reports of increased infiltration tunnels and the massing of armored divisions along the demarcation line.
In the south, President Park Chung-Hee's Republic of Korea is reportedly accelerating its mobilization. It has 625,000 in its armed forces and spends \$550 on defense out of a GNP of \$12.6 billion. The ROK is aided

by 42,000 U.S. troops, many in the Air Force.
"The ground forces balance in the Korean peninsula is not unsatisfactory," Schlesinger told his news conference Friday.
U.S. intelligence analysts say the societies are similar, both tightly controlled. The forces in the south are as committed to anticommunism as the northeners are to spreading the people's revolution.
The experts do not feel either China or the Soviet Union will help an invasion from the north. They point to Kim's recent visit to Peking, his bellicose stance, then at the communique issued afterwards in which the word "peaceful" was pointedly issued before reunification.
It's not like Vietnam, Schlesinger said. There is no ambiguity about civil wars and winning hearts and minds. It would be a case of outright aggression and as a result of that I think that one should recognize that the reactions in the United States might be considerably different from those that prevailed during the Vietnamese war."

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces can be develop to his utmost capability.

The News believes each and every person would get more satisfaction in the long run if he were permitted to spend what he earns on a volunteer basis rather than having part of it distributed involuntarily.

Congress and jobs

It is well that President Ford's veto of the jobs bill will stand.

The bill was loaded down with spending programs of doubtful value. It was a budget-busting bill that would have increased the federal deficit and added to inflation.

The President proposed \$2 billion for public service jobs and summer jobs for youth.

The Congress upped the ante to \$5 billion by adding such pork barrel items as \$440 million for construction and repair of public buildings, \$385 million for small business loans, \$325 million for public works projects, and money to buy the government 21,000 new automobiles.

The move to override the veto failed in a significant vote in the House of Representatives, 277-145, five short of the necessary two-thirds majority.

House Democratic leaders were downcast at the defeat. Now they should move quickly to

send the President the kind of stripped-down jobs bill he asked for March 5.

With unemployment at 9.2 per cent and probably still rising, with 9 per cent unemployment predicted for the next several months and with an average of 8.7 per cent predicted for the year, the nation cannot afford any more delay in funding public service jobs and summer jobs.

Many high school and college graduates will be entering the job market this month with their prospects of getting work bleaker than at any time since the great depression.

Optimistic economic forecasts don't help the unemployed much at this point. They don't buy the groceries.

There is no substitute for a permanent job in private industry or government. But a public service or summer job is better than welfare.

The atypical bureaucrat

The working conditions enjoyed by Jubal Hale in his federal job, unfortunately, are not unique.

Jubal Hale may be.

Hale is the agency employe who has recommended to Congress that the board which he serves be abolished. He is executive secretary of the Federal Metal and Nonmetallic Mine Safety Board of Review, established in 1971 to hear appeals on mine closures ordered under federal safety standards. The board has yet to consider its first case, he said, although "about

\$200,000" has been spent so far, mostly on salaries including his own of almost \$20,000 a year.

Hale told the Senate Government Operations Committee that he spends most of his time listening to Beethoven records and drinking coffee.

Hale's candor has spurred bills in both House and Senate to do away with his board. It should also stimulate a review of other shadow agencies whose supreme endeavor is to justify their own existence.

But a niche in government should be found for Jubal Hale.

We discover Hanno

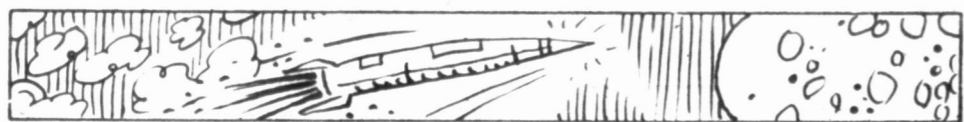

Columbus, the Italian navigator, discovered America in 1492. That we know.

The Norseman Leif Ericsson landed on some part of the North American coast around the year 1000. That is now generally accepted.

But Hanno the Phoenician stepped ashore on Cape Cod in the middle of the fifth century before Christ. That is the finding of a Harvard linguist who deciphered an ancient stone tablet by working all night in his study recently.

There will be doubters but we have a hunch the evidence is genuine and will stand up. Hanno lived around 450 B.C., explored the west coast of Africa in the service of Carthage, ruled a kingdom in southern Spain, and is believed to have made a voyage of discovery in the Atlantic, setting sail 2,000 years before Columbus.

His great discovery has been buried in time. It is remarkable that at this late date we should discover him.

The first rocket-lift-off countdown occurred in the 1920's. Fritz Lang, a motion-picture director made a science-fiction movie, *The Lady In The Moon* featuring a mammoth rocket, which looked uncannily like the ones we launch today. He decided that greater suspense could be obtained by switching from the conventional "one two three" to the reverse.

THE BUREAUCRATS

What campaign literature? I'm just communicating with my constituents.

Still out of reach

BARRY GOLDWATER He's Feather in Ford's Cap

By WILLIAM RUSHER
Moving to head off any conservative challenge from Ronald Reagan for the 1976 Republican presidential nomination, President Ford appears to have scored impressively (though not decisively) by nailing down the support of Barry Goldwater.

Ford's own public insistence that he will run for a full term next year is treated with some reserve among politicians and political observers, since that is what he would have to say anyway to avoid the disabilities of lame-duck status during the next twelve months. But prudence compels them to assume he really means it, and certainly the recent public actions of Ford and his key aides seem to point in that direction. For one thing, the Ford team is displaying a lively appreciation of the threat posed by former California Governor Ronald Reagan, and is taking early steps to reduce that threat if possible.

It is no secret that Reagan,

now busy with a successful radio program and newspaper column plus a heavy speaking schedule, is debating whether to run for the GOP presidential nomination next year. If Ford were to bow out, most observers believe a Reagan bid would be inevitable, and quite a few think he would make a grease-spot out of his likelihood major rival, Vice President Rockefeller.

But what if Ford is a candidate to succeed himself? Reagan is known to feel that Ford, having reached the White House by way of appointment to the vice presidency and Nixon's resignation, is not in the same position to claim automatic party endorsement as a president who won the office by defeating first his Republican rivals and then a Democratic opponent. And polls suggest that, incumbent or not, Ford's lead over Reagan in the affections of Republican voters is not insurmountable. If, therefore, either foreign or domestic problems make Ford seem vulnerable by (say) the

end of this year, you can expect Reagan to enter selected Republican primaries early in 1976, carrying the standard of uncompromising conservatism.

Evidently Ford and his political advisers expect exactly that, for in recent weeks they have been busy wooing the Republican right. Ford has named Barry Goldwater's former administrative assistant and chairman of the Republican National Committee, Dean Burch, to head the preliminary committee to plan Ford's own campaign, and Ford's longtime crony Melvin Laird has said publicly that, if plans mature, Burch will run the Ford campaign right through the Republican convention in August, 1976.

More significantly still, Barry Goldwater recently told television interviewers, in just so many words, that he favors the nomination and election of Jerry Ford. And while both Goldwater and Laird seemed to leave some room for negotiation over the vice presidential slot — implying that Nelson Rockefeller might be replaced, if necessary, by someone more palatable to the GOP's muscular right wing — not even this is assured. If Goldwater, Burch, Laird (and presumably Ford) have their way, the 1976 Republican ticket may very well be: Ford and Rockefeller.

The "odd man out" in this scenario — the designated loser in this game of musical chairs — is Reagan, hero of Republican conservatives. And while Ford and Laird may have no particular disposition to regret that, conservatives who fought successfully for Goldwater in the convention of 1964 may be forgiven for wondering what Goldwater and Burch are doing in such company.

The fact seems to be that Goldwater has never personally warmed toward Reagan, despite (or perhaps because of) Reagan's sensational success on behalf of Goldwater in October 1964. From 1965 to 1968, Goldwater worked hard and successfully to deliver the Republican nomination to Nixon — thereby denying it to California's popular new governor. It is, therefore, no sudden change of front for Goldwater to find himself opposing Reagan again — this time on behalf of Gerald Ford. Whether substantial members of conservative Republicans will follow Goldwater's lead, as so many did to their subsequent bitter regret in 1968, is one of the big unanswered questions of American politics.

Answer to yesterday's puzzle.

'Brain' Column Stirs Up Reader Response

By MAX RAFFERTY
Q — "I read your recent column entitled 'Russ Scientist Voices Ultimate Fear' (about the imminent breakdown of the human brain). You quote Dr. Ivan Khorol as saying 'the human brain has been brought to the brink of ruin.' Somehow you make it sound as though man is just one big brain! You say that man rules by brain and by brain alone. You neglected to mention that man has a conscience, a capacity for love as well as hate and a soul. Don't all these set us apart from the creatures which have become extinct, and to which you compare man?" — R.B., Anderson, Ind.

A — "I'll go along with conscience and soul 'setting us apart' from animals, but I draw the line at love. Dogs — to name but one species — are capable of just as much love as humans and maybe more.

But what's all this got to do with man ruling the planet, R.B.? He could have had all the love and conscience and soul in creation and they wouldn't have made him the dominant force on earth. I agree with you profoundly about their desirability, but man climbed to power through brain-power and you'd better believe it.

Q — "Both my mother and I agree 100 per cent with you (about the brain crisis) and just wish to say that the main reason for it all is the total lack of faith in the promise of everlasting happiness in heaven after death.

"Also, the children and young people have been left to do exactly as they pleased — hence all the horrors we are witnessing these days." — F.M.K., Hamilton, Ohio.

A — The behavioristic psychologists and the Freudian psychiatrists have been urging us for an entire generation to get rid of our inhibitions and do our own thing. Today, from sex to gutter speech to murder for thrills, the inhibitions are gone, or fast going, and as a result we are getting a good look into Hell-mouth itself. What we need very badly right now are a lot more inhibitions just as fast as we can acquire them.

Q — "May I respectfully

suggest that there is a way for you to know a human brain has illimitable possibilities for expansion of thought because of its creation for that very purpose 'in the beginning'? If man truly understands the Gospel, he will know this." — Mrs. J.C.E., Salt Lake City.

A — The Gospel, as I read it, is not concerned especially with the brain but rather with the soul. What I'm afraid of is the breakdown of a highly sensitive and complex organ due to a combination of increasing stress and overdevelopment.

Q — "In regard to your column on 'brain overloading' as a cause of mental breakdown: You discussed this idea in relation to the theory of evolution. Before you carry these analogies any further, I think you should know that the theory of evolution is in trouble these days. You will rarely hear about it from the scientific establishment, but the questions are piling up unanswered." — C.A., Louis, Mo.

A — No doubt. But evolution wasn't what my column was about. I mentioned the fact that the dinosaur became too big and the saber-tooth tiger's tusks too cumbersome. I know this happened because I've seen their fossils.

I also know that living Americans are a lot taller and heavier than their great-grandparents because I've examined the statistics. None of these easily ascertainable facts, however, has anything to do with evolution — the theory that species change over a long period of time into new species. The fact that an animal may get larger over the millennia or even over the centuries — as is the case with man — is no more an example of evolution than it is an example of black magic.

(Dr. Rafferty welcomes questions for use in this column once each week, but regrets he cannot answer all mail personally. Please send your questions to him in care of Dr. Max Rafferty, Los Angeles Times Syndicate, Times Mirror Square, Los Angeles, Calif. 90053.

Fanny Sick of Being Butt of Jokes

By Abigail Van Buren

© 1975 by Chicago Tribune-N.Y. News Synd., Inc.

DEAR ABBY: I am 20 and have been seeing a man who is in his early 40s. He is married and is very friendly with my parents. (They don't know what is going on.)

This man's wife lives in L.A., and he lives in the desert for health reasons.

His wife comes out to visit him for a weekend every three months or so. Sometimes he goes to visit her. They don't have much of a marriage.

This man has given me the only happiness I've ever known. He is kind, warm and loving, and has been very good to me. My girl friend says he's too old for me and that I should try to get interested in someone closer to my own age. I've tried and can't do it. Boys my age are too immature for me. All they want is sex. I want something more from a relationship, and I have it with this man. I'm not hurting anyone.

So what do you advise?

HAPPY

DEAR HAPPY: If you're "happy," why did you write? You are hurting yourself by continuing in a relationship that is going nowhere. Wives usually find out. And so do parents. Furthermore, eventually you'll want marriage, and this man already has a wife.

He is probably flattered to have a young girl interested in him, and you're flattered because a man his age is interested in you. If you don't want to be a loser, the advice from here is — lose HIM.

DEAR ABBY: Now that all the excitement has died down over all the Johns who resented the fact that their name is used as a synonym for "toilet," may I have my say? My parents christened me "Fanny." Now, how did my name ever become a synonym for the part of one's anatomy that one refers to in polite society as a "backside"? GRIPES MINE

DEAR GRIPES: There are several explanations, but the one that makes the most sense to me is this: During World War I, the members of the First Aid Nurses Yeomanry (or F.A.N.Y.), a British women's ambulance unit, were known as "FANNYS." And they were reputed to have been well-reared. Readers?

DEAR ABBY: No! No! No! I protest your answer to "Wisconsin Mother," whose third daughter was stillborn. She was asked, "How many children have you?" not "How many times have you been pregnant?" The response you suggest, "We have two little girls — our third daughter was stillborn," can only make the questioner uncomfortable and keep alive the feeling of sorrow and loss. C'mon, Abby, "We have two darling daughters," said with a big smile, is the healthiest, kindest and most positive answer for all involved.

Unless she wants sympathy, that mother should keep her medical history out of her conversation.

MOTHER OF THREE

DEAR MOTHER: You are right. I was wrong.

The New England folks have a saying that three Philadelphia lawyers are a match for the very Devil himself.

Bentsen Will Take State Committeewoman Says

By ANNA BURCHELL
Pampa News Staff

Major changes in the 1976 Delegate Selection Plan for the Democratic Party of Texas calls for the election of delegates to the national convention by public vote rather than by delegates to the state convention.

Mrs. Ruth Osborne, of Pampa, 31st District Committeewoman, said this plan, to be reviewed soon, probably will cut alternates in the 31st district.

She also believes that Sen. Lloyd Bentsen, announced presidential candidate for 1976, will emerge as the forerunner in

Texas — "if he carries the primary."

The 31st Senatorial District includes Gray County and 25 other counties in this region.

Mrs. Osborne said in the past this district has sent three delegates and two or three alternates.

"In all probability, we will have no alternates to the national convention unless we sway an awful lot of people," Mrs. Osborne said.

"If you want to be a delegate to the national convention, you must file and run like for any other public office," she said.

In the past delegates to the

national convention have been elected by delegates at the state convention.

In stressing the importance of the 1976 election, Mrs. Osborne said, "Everyone in this district needs to do more than just vote — they need to get involved."

Speaking of Sen. Bentsen, she said his support for rural communities and their needs will be in his favor. "We are rural," she added.

"He is also for the agricultural people," she said.

During a meeting recently in Amarillo, Mrs. Bentsen discussed the changing role of women in politics.

She said she recalled when her husband ran for county judge in Hidalgo County almost 30 years ago that women were amazed when she called and asked them to become involved in politics.

She said her husband felt that he would be so fortunate to have the support of women in his bid for the presidency.

Rules of the Texas Delegate Selection Plan for 1976 include:

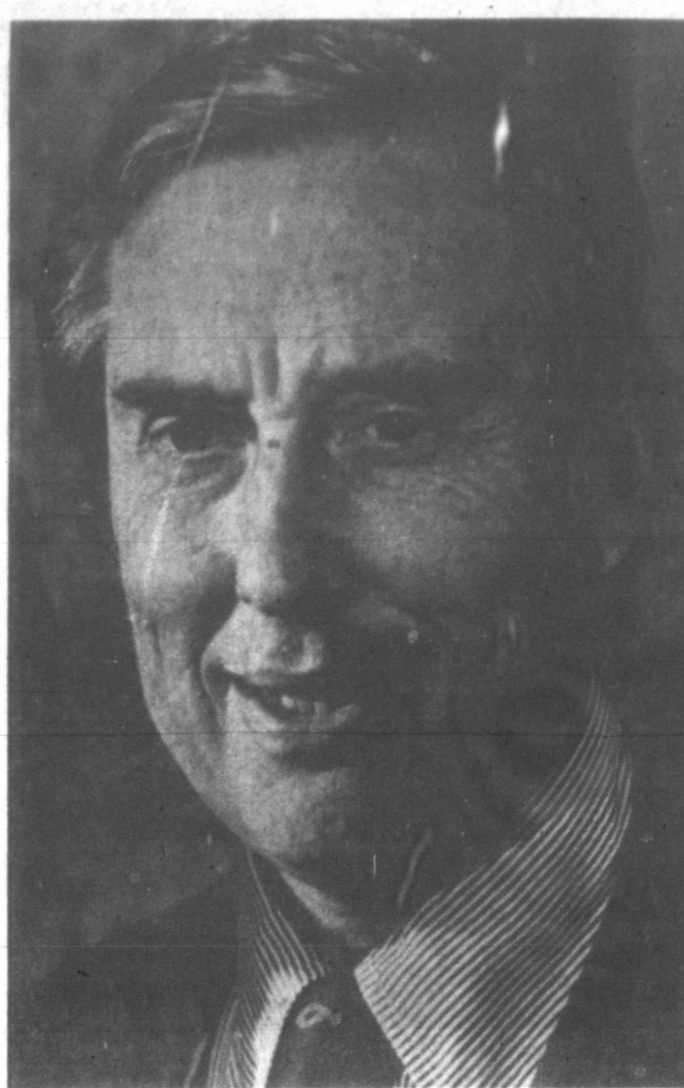

— Three-fourths of the delegates to the 1976 Democratic National Convention shall be apportioned among the 31 Senatorial Districts of the State of Texas as now constituted by a formula giving weight to the total population and the average of the vote for the Democratic candidates in the most recent presidential election.

— One fourth of the delegates and all of the alternate delegates to the 1976 National Convention shall be selected by the 1976 June Convention in a manner which is consistent with the election of "at-large" delegates and alternates under the existing rules of the Democratic party of the State of Texas.

National delegates and alternates elected by the state convention shall reasonably reflect the preferences of the state convention participants as indicated by a straw poll of the delegates.

A quorum at a senatorial district county or state convention shall consist of at least 40 per cent of the elected delegates or their acting alternates.

All public meetings at all levels of the Democratic party of Texas shall be open to all members of the Democratic party, regardless of race, sex, age, color, creed, national origin, religion, ethnic identity, economic status or philosophical persuasion.

Senator Lloyd Bentsen

Rain May Ruin Kansas Harvest

HUTCHINSON, Kan. (UPI) — If rains return today or Tuesday, farmers in the nation's most productive wheat state could lose one-third of the state's 1975 wheat crop, according to the chairman of the Kansas Wheat Commission.

Wet weather stopped the week-old harvest with cutting predicted to be delayed for the next two days because of muddy fields.

"It takes several days of drying before a field will hold up a combine," Commission Chairman Rex Cozad said Monday. "The sun is bright in Hutchinson now, with a little breeze. Another 48 hours of that and the combines could get into the fields."

However, he said, if the rains come again the farmers could lose one-third of the crop.

"If it would rain for another week like it has in the last week, that would be a possibility," Cozad said. "If we can get some hot, windy, dry weather, we should be all right. The loss so far hasn't been great."

Cozad said no more than 5 per cent of the crop has been lost so far in the week-old Kansas wheat harvest. He said the next two or three days would be the determining factor in the possible loss.

Cozad said 300 million bushels were produced in the state last year. He estimated a loss of 100 million bushels, at the current market rate of roughly \$3 per bushel, as a \$300 million blow to the state's farmers.

In addition, Cozad said every farm dollar generates between four and seven dollars in additional business in the state.

He said every rainfall after the wheat is ripe reduces the test weight of the grain. He said more rain could cut the test weight by five pounds per bushel.

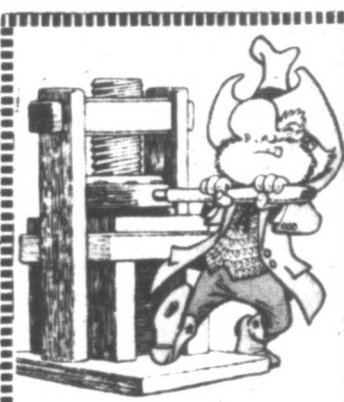

State Harvest Control Supervisor Jim Jay said total rainfall across the state during the weekend ranged from one-half inch at Hutchinson to 5 1/2 inches at Bucklin. He said excess moisture delayed cutting from two to four days and additional rain will cause further delays.

Jay said Sunday 2,300 bushels of wheat were delivered from Coldwater in Comanche County and 9,000 bushels came in from Kinsley in Edwards County. But the Great Bend supervisor said he expects no more deliveries until later in the week.

Mainly About People

The Top O' Texas Republican Womens Club will meet Thursday at 9:45 a.m. in the home of Mrs. Scott Nisbet, 1206 N. Russell. "A History and Orientation of Republicanism in Texas" will be presented by Mrs. Nisbet. Members and guests are invited to attend.

Governor Bond Restores Missouri Death Penalty

JEFFERSON CITY, Mo. (UPI) — No one can prove the death penalty is a deterrent to crime, according to Gov. Christopher S. Bond, but he said he signed legislation returning the death penalty to Missouri because he believes it can reduce the number of premeditated murders.

In signing the bill Monday Bond said it was worthwhile

even if it saved one life.

"I believe that a death penalty for a deliberate and premeditated killing of a human being can serve as a deterrent," the governor said. "For that reason I will sign the bill that has been passed by the Missouri General Assembly."

The death penalty measure provides for mandatory execution in the state's gas chamber for all premeditated first-degree murder convictions.

When asked if he expected any executions to take place during the remainder of his current term, Bond said he wouldn't have signed the bill if he did not intend for the state to begin executions again.

"The death penalty is not a cure-all for the perplexing problem of the rising crime rate, but there is overwhelming support for the restitution of the death penalty for premeditated murder," Bond said.

"I've tried to consider all the pro and con arguments and the arguments on both sides are emotional and leave something to be desired. I don't think anybody on either side can prove that the death penalty is a deterrent to crime."

But supporters of the legislation were positive Bond's signature on the bill would change the state's crime statistics.

Skelton predicted it will be one or two years before the state's double-chair gas chamber is used again.

One of the principal House sponsors, Harold L. Volkmer, D-Hannibal, commended the governor for signing the bill.

"No, I don't think his decisions was a personal conviction, it probably was a political decision," Volkmer said.

Heart Group Sets Meeting

The Gray County Division of the American Heart Association will meet at 6:45 a.m., Tuesday, in the conference room of Highland General Hospital.

Dick Nixon Quits Supreme Court Bar

WASHINGTON (UPI) — The Supreme Court, acting at the former President's request, today struck the name of Richard M. Nixon from its roll of attorneys admitted to practice there.

The court's brief order said "the motion of Richard M. Nixon of San Clemente, Calif., to resign as a member of the bar of this court is granted and it is ordered that his name be stricken from the roll of attorneys admitted to practice before the bar of this court."

In a letter dated June 10 to the court clerk from "La Casa

Pacific" in San Clemente, Nixon said: "Not having practiced law for several years, and not intending to practice law in the future, I desire to and hereby resign from the Bar of the Supreme Court of the United States, of which I am currently a member. Sincerely yours, Richard M. Nixon."

During the time he was practicing law in New York following his defeat for governor of California, Nixon argued in the high court a major privacy case involving Life magazine.

Area School Sets Meeting For Tonight

The Grandview - Hopkins Independent School Board of Trustees will meet at 8 p.m. today.

Business to be conducted at the meeting will include issuing teacher contracts and consideration of resignation of employees.

Also on the agenda are consideration of the proposed budget and a study of House Bill 1126. The Superintendent reports and consideration of current bills and invoices will be included.

Class Tours Paper

Six children in the fourth grade at the Vacation Bible School class at the First Baptist Church toured the Pampa Daily News office yesterday in preparation of printing their own paper.

Those touring the office were Darin Rice, Richard Van Klyve, Leslie Eddins, Teresa Glover, Kay McCain and Melissa Harpster, all 10. Cathy Cone is in charge of the newspaper group.

"We're putting out this paper

for the parents," Cone said. "The kids will do all the writing and the teachers will type it up for them."

The children plan to have editorials and cartoons in their paper in addition to stories on the Bible School.

The paper will be approximately four pages long and will be mimeographed.

The school ends Sunday with Parent's Night at 7 p.m. at the church.

Aging Alf Landon Says Ford Will Win If...

TOPEKA, Kan. (UPI) — Alfred M. Landon, the Republican Party's elder statesman, has watched a myriad of politicians rise and fall in his 87 years. If the economy continues to improve, he says, President Ford will be elected next year.

Choosing his words slowly and carefully in an interview, the GOP's 1936 presidential nominee said: "I ordinarily do not make any predictions about an election until the Saturday before. But Mr. Ford is gaining in strength all the time because of his stability under pressure. That's the first requirement of a leader, whether on the field of battle or in the council chamber."

Landon said economic considerations still could be a factor in Ford's election but that was his only qualifying statement.

"With the improving national economic situation and Ford's proven stability in decisions and actions, his chances of election are growing stronger all the time."

The former Kansas governor, now balding and wearing black framed glasses, sat at a small table in the center of his book lined study in his west Topeka home. He spoke slowly, his age-roughened voice sometimes faltering as he searched for words.

He declined to take any broad swipes at Democratic presidential hopefuls, merely saying none seemed strong enough to unite their party. He predicted busing to achieve racial balance would be one of the biggest issues in the 1976 campaign.

"I see little discussion of busing now," he said. "But I

think it will be a big issue, a factor in the 1976 campaign."

Although he would not name a specific candidate, he said the issue would have an impact on the Democrats, particularly after the unrest it created in Boston.

He said it is ironic that several main issues of 1975 parallel those on which he campaigned unsuccessfully against Franklin D. Roosevelt in 1936 — inflation; the fallacy of a planned economy; growing centralization of power in Washington and long range land use planning.

"These issues are still hot ones today," the GOP patriarch said. "Generally in 40 years, such issues are worked into legislation, or repealed or whatever is necessary to eliminate them."

Landon and his wife, Theo,

live in a white brick mansion on a 26-acre estate. A five-mile ride on his horse, Big Red, along the Kansas River has been a morning ritual since his loss to FDR and return to private business that includes four radio stations.

Although Landon prefers books of history and politics, he still keeps up with current newspapers and magazines.

As an independent oilman, Landon stays atop the energy crisis. He actively supervises his oil lease with 47 "stripper" wells in Greenwood County and is fond of recalling that his father, an oil field supervisor, built a porch for their Ohio home with timber from an old derrick.

"Forty-seven wells? Hell, that's not as good as it sounds," he said with mock gruffness. "All they produce are two or three barrels per day each."

He noted the increased attention given to stripper production since the price of oil advanced in the fuel crisis.

A lot of wells that were plugged and weren't being pumped before the price went up, are being pumped now," he said. "There isn't any question there is an enormous amount of oil available that is in place in both shale and in old oil fields."

So far, he said, the expense of recovering the remaining oil has been the obstructive factor.

Fishing for Members

Gary Stevens, left, finance director of the Chamber of Commerce, presents fishing rods to the members of the winning team in the recent chamber membership drive competition. Winners are Jerry Sims, Luther Robinson, Benny Kirksey and Floyd Watson who is not pictured. (Pampa News photo by Mike Higgins)

Meany Says Recession Over When People Work

Most economists say they believe the recession has ended. But said AFL-CIO President George Meany, when asked Monday if he agreed: "No, sir, it won't be over until people go back to work."

Using Meany's yardstick, the recession is going to continue for a long time.

Using the indicators of most economists, the recession bottomed out sometime in the last few weeks and the recovery either has begun or is about to begin.

Meany's perception of the economy is based on how many people are out of work. Most economists look at how many people are working.

The unemployment rate is rising and will continue to rise this summer, peaking at 9.5 per cent or higher—the highest jobless rate since the last days of the Great Depression.

How can the recession be over when 8.5 million to 9 million persons out of a job force of about 92 million cannot find work in any given month this year?

How can it be over when the jobless rate is twice what once was considered normal—4.5 per cent—and is expected to remain 2 or 3 percentage points above normal through 1977?

In this area, the recession has followed the pattern of past economic slumps. When busi-

ness begins to pick up, employment increases but at the same time unemployment rises.

There are several reasons:

—Businessmen, who were slow to layoff workers after the recession began, are slow to rehire after the recovery has begun. They find it cheaper to work employees overtime than to recall laid-off workers or hire new ones.

—Corporations which suffered profit slumps are anxious to

recoup by improving productivity.

—The labor force grows quickly when a recovery is under way. This is because hundreds of thousands of persons who gave up looking for work and were not counted in government unemployment statistics perceive better times ahead and return to the job market. In addition, there is the normal growth in the labor market from graduating students.

Private Reviews Set for Carrillo

AUSTIN, Tex. (UPI) — A House committee will meet privately to review the thousands of pages of testimony in the impeachment hearings against Duval County District Judge O.P. Carrillo.

The committee held four weeks of public hearings on the charges against Carrillo before deciding Monday to meet privately to judge the testimony and evidence.

"We cannot get a free discussion of the issues in the presence of the news media," Rep. DeWitt Hale, D-Corpus Christi, told the committee. "It's so easy to bandy names about in these kind of investigations and most of the people that have been involved here have been involved innocently."

Carrillo's family is aligned against a faction led by the Parr family in a battle for political control in Duval County.

Witnesses accused Carrillo of using his judgement for political and financial gain. The actual impeachment resolution cites only his indictment on federal charges of income tax evasion.

Carrillo is currently hearing a trial to decide if Archer Parr should be permanently removed as Duval County judge. Carrillo temporarily removed Parr from office in March.

Other witnesses testified Carrillo used county money to purchase groceries and used county employees and equipment for work on his ranch.

Correction

The News Monday incorrectly stated that Rex Caldwell of Panhandle won a \$2,000 scholarship in the Pythias speech contest. However, he won \$1.00 in the contest. The News regrets the error.

UT Says They'll Build Despite Veto

AUSTIN, Tex. (UPI) — Regents Chairman Allan Shivers says the University of Texas is going ahead with at least two building projects despite Gov. Dolph Briscoe's veto of college construction plans and a new law requiring prior approval by the State College Coordinating Board.

In my opinion this just doesn't apply to the University of Texas," Shivers said Monday.

Shivers, governor from 1949 until 1957, said Briscoe has no legal authority to veto riders House and Senate negotiators tacked onto a \$12.1 billion spending bill to authorize construction projects at college campuses across the state.

Briscoe Saturday crossed out 136 riders before signing the budget bill into law, saying the colleges need coordinating board approval for their construction plans under a new law he talked lawmakers into passing.

"University of Texas funds are constitutional funds and can't be regulated by statute," Shivers said Monday.

The former governor said two attorneys general have ruled the state's chief executive cannot veto riders from the appropriations bill.

"We'll just go on with our plans as we decided," Shivers said, referring to a June 5 vote by regents to spend \$150,000 to

develop preliminary plans and cost estimates for expansion of the UT Law School.

Shivers said regents already have approved expenditures from the Permanent University Fund bond money for the law school expansion and for a fine arts campus.

Because the fund is established and protected by the Texas Constitution, Shivers and other UT officials say statutory controls—such as the new law requiring prior approval by the coordinating board or legislature—cannot be imposed on use of the money.

Briscoe aides, however, said UT must seek authorization before proceeding.

DWIs Receive Jail Sentence

A penalty of a \$200 fine, 30 days in jail and six months probation was the punishment assessed Monday for each of three persons who pleaded no contest to charges of driving while intoxicated.

The pleas were entered in Gray County Court and Judge Don Cain set the punishment.

The three who pleaded no contest were Benjamin M. McCaskill of 937 S. Wells, Beverly Jean Bennett, 333 Anne, and Jackie Willard Edwards who gave a motel as his address.

World News Summary

Mozambique Gains Freedom

LOURENCO MARQUES, Mozambique (UPI) — "Power to the people," guerrilla leader Samora Machel shouted as he entered Lourenco Marques on the eve of Mozambique's independence.

"Machel! Machel! Machel!" yelled back a jubilant crowd of 100,000 awaiting the end of five centuries of Portuguese rule in the East African territory.

Delegates from 60 nations gathered today to see the lowering of Portugal's flag at midnight and the raising of the black, red, green and yellow colors of the new Peoples Republic of Mozambique.

Machel, president-designate of the new nation, returned to Mozambique's capital Monday after 13 years in exile as head of the Frelimo guerrilla movement.

The 42-year-old leader drove down the sunny, palm-lined streets from the Lourenco Marques Airport to the Palácio da Ponta overlooking the Indian Ocean.

Machel said the raising of the new flag over the palace, which had housed Portugal's governors, closes "500 years of bestiality" in the territory.

He described the five centuries of Portuguese rule as "a story of degradation, slavery, massacres, humiliation, exploitation and oppression."

Machel has pledged to remold his bankrupt land into Africa's "first truly Marxist state" with collective farming providing the population's principal livelihood.

Adm. Vitor Crespo, the departing Portuguese high commissioner, called on white settlers to remain in Mozambique and demonstrate "the fruit of their honest work."

Half of the 200,000 whites in Mozambique have fled since the armed forces toppled Portugal's right-wing regime in the spring of 1974 and began dismantling the country's African empire.

Despite his bitter criticism of Portugal's colonial rulers, Machel has promised to welcome persons of all colors and religions in the new nation.

Prime Minister Vasco Gonçalves, Socialist leader Mario Soares and Communist chief Alvaro Cunhal represented Portugal at the independence celebrations.

The United States was not invited.

Machel's arrival in the capital, to be renamed Cam Phumo after independence, climaxed a month-long tour of his new nation.

He set out from his guerrilla headquarters in neighboring Tanzania, addressing gatherings along the way as he traveled southward to the capital.

miles east of Matamoros.

"I've never seen anything like it," local newsman Rodolfo Guerrero told United Press International. "The two vehicles were just a mangled mess of metal."

Police said most of the victims died instantly.

The tanker driver fled. He was arrested three hours later.

"The people were on their way to Lauro Villar Beach on the Gulf of Mexico," the police spokesman said.

"Suddenly the tanker overtook another vehicle and the pickup and saloon coming the other way could not avoid crashing," he added.

Police said all the dead were Mexicans.

Billion Raised For Food

ROME (UPI) — The U.N.-sponsored World Food Council hopes to set up a \$1 billion-year fund by early next year to help hungry nations feed themselves.

John Hannah, head of the council, opened a five-day meeting on food aid Monday by saying both the United States and the oil-exporting nations have shown "strong support" for the fund.

Hannah, a former administrator of the U.S. Agency for International Development, said he expects "agreement will be reached so that the fund can come into operation in early 1976."

He told delegates from 36 nations that the council hopes to accelerate food production in developing countries through a billion-dollar fund for International Development.

The United States has called for contributions of at least \$1 billion-a-year for the fund while Saudi Arabia has suggested providing \$1.25 billion, he said.

The United States told the World Food Conference in Rome last November that it could no longer carry most of the aid burden alone and challenged oil nations to join in the effort.

Council aides said the creation of a \$1 billion-a-year fund would provide a 60 per cent increase in foreign investment for agriculture in developing countries.

But the aides said the money, combined with other available aid, would still provide only half of the \$5 billion-a-year food assistance target the conference set for 1980.

Hannah also called on food-exporting nations to step up pledged agricultural aid for 1975-76 from 9 million tons of grain to 10 million tons.

He said grain supplies are expected to rise substantially in 1975-76, but hungry nations must still import large amounts despite decreased funds from raw material exports.

"Considering the deteriorating financial condition of these countries, more food aid rather than less will be needed," he said.

of 30 days, 13 hours and 30 minutes in space at 7:28 a.m.

Soviet television reports late Monday said the space team was in good condition, keeping fit with a punishing two hours of calisthenics a day.

The reports said the cosmonauts had "completely adjusted" to their life of weightlessness, but gave no indication how long they would stay in the Salyut 4 space laboratory.

Cosmonauts Alexei Gubarev and Georgi Grechko set the previous Soviet endurance record in February during the Soyuz 7 rendezvous with the three-room space station.

Three American astronauts set the U.S. space endurance record last year with a marathon 84 days aboard the orbiting Skylab station.

Western experts said they expect the two cosmonauts to end their mission before the joint Soviet-American space flight begins July 15.

Klimuk, 33, the pilot, and Sevastiyanov, 40, the engineer, blasted off May 24 from the Soviet Union's Baikonur space center in central Asia.

Soviet news reports indicated business as usual aboard the 20-ton station, with Klimuk and Sevastiyanov carrying out medical experiments and studies of the earth.

The two men appeared on evening television programs Monday with another in a series of live broadcasts from space. The cosmonauts never seemed to tire of performing "weightless" tricks for viewers.

Although the two cosmonauts were kept busy aboard the craft, the government newspaper Izvestia indicated the spacemen may be troubled by boredom.

The newspaper said ground controllers have begun piping music to the cosmonauts during slack periods. A favorite was the score from the French movie "The Umbrellas of Cherbourg."

outside the court building when the ruling was announced.

Supreme Court Justice Krishna Iyer granted the 57-year-old prime minister a conditional stay of her June 12 lower court conviction, which had also ordered her barred from office for six years.

Supporters of Raj Narain, the Socialist leader who brought the charges against Mrs. Gandhi shortly after she swept back into office in 1971 national parliamentary balloting, danced jubilantly outside when Iyer's ruling was announced.

Senior cabinet ministers and leaders of Mrs. Gandhi's ruling Congress party drove to her residence for consultations after the ruling.

Iyer's order could have serious adverse political and psychological effects on Mrs. Gandhi's image, making her a national leader who is barred from exercising her right to vote in Parliament, political observers said.

Although today's court ruling could be considered a victory of sorts for Mrs. Gandhi, inasmuch as it did not order her to resign, Narain told a large crowd of supporters outside his home that the prime minister does not deserve her position and for her to stay on would be a violation of the judiciary and democracy.

Mrs. Gandhi was not present for Monday's appeal or today's order by Iyer.

His order, delivered in his chambers to Mrs. Gandhi's attorney, stipulated that "her right as prime minister so long as she fills that office... shall not be affected or detracted from on account of the conditions contained in this stay order."

The prime minister's attorney, N.A. Palkhivala, argued Monday that Mrs. Gandhi's conviction was "based on flimsy grounds, misconceived in law and was untenable for noncompliance with basic tenets of justice."

"I have a very strong case for appeal," said Palkhivala, one of the nation's leading constitutional lawyers.

Gandhi May Retain Post

NEW DELHI (UPI) — The Supreme Court ruled today that Indira Gandhi can remain as prime minister while she appeals her conviction for election law violations, but the mixed verdict could bring new pressure on her to resign as India's leader.

The decision stripped Mrs. Gandhi of her right to vote in Parliament and her supporters were glum, shocked looks

Knights Set Meet Tonight

Pampa Lodge No. 480 Knights of Pythias will meet at 8 p.m. today at the Pythian hall, 315 N. Nelson.

Don Thompson, vice chancellor, will preside at the meeting. He said the election of new officers will take place at the business meeting tonight.

Crash Kills 15 in Mexico

MATAMOROS, Mexico (UPI) — Fifteen persons on their way to the beach died Monday in the collision of a pickup and a saloon car that were trying to avoid a speeding, loaded oil tanker, police said.

A police spokesman in this northern Mexican city, near Brownsville, Tex., said nine others were injured, some critically.

The accident happened on a flat stretch of highway, about 10

Soviet Breaks Space Record

MOSCOW (UPI) — Two cosmonauts broke the Soviet Union's space endurance record today, but the new milestone was still far short of the American record.

The two-man Soyuz 18 crew—Lt. Col. Pyotr Klimuk and civilian Vitaly Sevastiyanov—surpassed the old Soviet record

Hints from Heloise

Dear Heloise:
I have six children and buy most of their clothes at the beginning of the school year. When school is out, I take the most worn-out slacks and jeans and cut them off for shorts. The children like their shorts fringed so I decided to try using my seam ripper. After cutting off the pants, go up on the shorts as far as you want them fringed — about one-half inch. Take the seam ripper and cut down on the material all the way around the leg opening. All you have to do is pull out the extra thread and they are even all the way around. Takes very little time this way.

Barbara Craven

Ferven's sakes! And to think of the times I struggled trying to make fringed cut-offs for my children!

Heloise

Dear Heloise:
Whenever I purchase a new plastic table cloth, I put it right on over the old one.

The old one sort of makes it safe, because the new does not slip so much. Also pads the table.

Florence

Dear Heloise:
Those small towels that come in a set, but don't seem to be big enough for anything, can be made useful. Simply cut a half circle in the

center top. Sew seam binding around the arc with six to nine inches left hanging at each end for ties, and you have a baby's bib. Make nice gifts, too.

R.L.T.

LETTER OF LAUGHTER

Dear Heloise:
Ask Ghost Jon why it is that when you go to the market, diet items are occasionally out of stock, but the deliciously fattening things are always there to tempt us!

Jan Pray

Dear Heloise:
Next to nylon net I find that masking tape is very handy around the house.

In the kitchen, I tape the boxes shut after opening. Masking tape is handy for taping packages I send by mail. I tape my pastry cloth to the counter top for rolling out pie dough or making bread.

In a pinch, I have used masking tape to tape a bandage. I have made many repairs and labeled many items with my favorite masking tape.

Ann Smosna

Dear Heloise:
For a delightful way to fix scrambled eggs, try this: mix your eggs with salt and pepper and a little milk as you always do.

Then add a teaspoonful of the new salad dressing that is made with buttermilk! Really tasty!

KARPIN ON BRIDGE

By FRED KARPIN

Playing strange and "impossible" contracts is a state of affairs that all veteran tournament players have experienced. In these trying circumstances, one does his best — and hopes that a miracle or two will occur.

Such was the situation in today's deal, which came up in the 1973 National Championships. North - South vulnerable. East deals.

NORTH
♦ A 2
♥ A
♦ AK 96
♦ AK J 984

WEST
♦ K 9 8 5 3
♥ K Q 10
♦ J 2
♦ Q 5 2

EAST
♦ Q 7 6
♥ 6 5
♦ 10 8 7 5 3
♦ 10 7 3

SOUTH
♦ J 10 4
♥ J 9 8 7 4 3 2
♦ Q 4
♦ 6

The bidding:
East South West North
Pass Pass 1 ♠ 2 ♣
Pass 4 ♥ Pass 4 ♠
Dbl. 5 ♥ Pass 6 ♣
Pass 6 ♦ Pass Pass
Pass

Opening lead: Five of ♠.

For a sunburnt look, dab creme blush on the bridge of your nose and on your forehead at the hairline. Add a dab on your chin to form a cleft or dimple.

Fashion designers may be expecting a colder than usual winter. Many fall collections showed deeper and bulkier turtle-necks than ever and close-fitting cloche hats.

The temperature in attics that lack a powered ventilator often rises to 135 to 150 degrees Fahrenheit on sunny days. A ventilator can keep it at about outdoor temperatures.

Garlic shoved into the ground around the trunks of fruit trees or other plants puts off most climbing insects.

The bidding requires some explanation (but not justification). North's cue-bid of two spades showed a cue-bid of two spades showed a tremendous game-going hand. South's leap to four hearts was sound, despite the fact that he had only four high-card points: His seven-card heart suit figured to produce heaps of tricks, since North, for his cue-bid, rated to have heart support.

When North next cue-bid spades again, South elected to rebid his hearts. When this was followed by North's six-club call, South assumed that North had a two-suited minor-suit hand; and that North's second cue-bid had asked South to name the latter's better minor suit. And so South, preferring diamonds to clubs, now bid six diamonds.

As can be observed, the contract was a very poor one. But South gave it the old college try, realizing that he needed a few miracles to bring it home safely.

After capturing the opening spade lead with dummy's ace,

declarer entered his own hand via the diamond queen. He then led his singleton club and finessed dummy's jack successfully. On the ace and king of clubs he discarded his two remaining spades, as both opponents followed suit in clubs. He now ruffed dummy's deuce of spades with his last trump, the four-spot.

He next led a heart to the board's ace, after which he cashed the ace and king of trumps. Had the seven adversely-held trumps been divided normally (4-3), the slam contract would now have been there for the taking, since but one trump would have been outstanding in the defenders' hands. Dummy's clubs would then be led, and all the defenders could make would be a trump trick.

But, as can be evidenced, East had two trumps winners; and when he ruffed the fourth club lead with his eight-spot, he cashed the trump ten, picking up dummy's last trump, the nine. Declarer made no more tricks — but he did earn a "A" for effort.

Senior Center

By GERTIE SHAW

A good time was enjoyed by 58 Seniors at Thursday's June 19 meeting.

Prizes went to Mrs. Dave Kendrick, Roy Holder, Lillie Reynolds and Mina Benham and Joe Shelton, Elmer Melton, W.R. Beard, Roy O. Holder and Leona Turner.

Leona Turner of Albuquerque, N.M. visited recently with her mother, Mrs. McClendon.

Roy Holder was back after an extended illness.

Mrs. Emmy Boyd is home from visiting her sister.

Mrs. C. Bean's sister visited from Delano, Calif. recently.

May Green is going to Dallas this weekend.

Ruby Stovall spent the weekend in Amarillo at her daughters' home.

Mr. and Mrs. E.O. Dibb entertained grandchildren, Sgt. and Mrs. D.A. Parson, Steve and

Lynne, who were enroute to Albuquerque to make their home.

The W.R. Emmons are unable to attend because of a death in their family.

Fairy Foster had as dinner guests on Father's Day, her daughter and family from Berger, Artis and Marg Sutterfield from Siloam Spring, Ark.

Edd and Bea Brouster, Elk City, Okla., were visitors in the home of Mattie Dixon.

Mr. and Mrs. J.H. Hon of Clovis visited Fern Hogsett recently. Leola Hon is Mrs. Hogsett's daughter.

Hostesses were Jaycee - Eltes, Azola Schlegel, chairman, Kerrick Horton, Ann Triplehorn, Jane Beck, Pat McKinney and Libby Seals.

Altrusans present were Louise Sewell, Lora Dunn, Olive Hills and Lillian Snow.

Florynce Kennedy Fights Opression

By DARLA WELLES
Copley News Service

If there's one thing Florynce Kennedy, the flamboyant founder of the Feminist Party, doesn't do, it's take herself too seriously.

At 59, Florynce Kennedy is a graduate of the Columbia University Law School and a former practicing attorney. She's shelved her law practice in favor of active participation in the civil rights and feminist movements.

She was one of the founders of the National Organization

for Women, as well as the Feminist Party.

She thinks of the latter as having parallel goals to those sought by NOW, but a more brassy approach to achieving them. She says the Feminists have more than 200 chapters.

If her views and manner of expressing them seem outrageous to those around her, she says "that tickles my grits." She knows she has people listening when she can tell she's shocked them.

Speaking in a peculiar blending of the King's English and street jive — ac-

cented with liberal doses of profanity — she presented herself as a caricature of the black matriarch with an answer ready for all questions.

So posed, she addressed herself with humor and sharp-tongued wit to a variety of issues which she does take seriously.

She took a roundhouse swing at government spending priorities:

"They always plead poverty when it comes to things that have to do with people, like day care centers

and food for schoolchildren. But they've always got plenty for weapons. And we've already got enough missiles to blow up this world and four more like it."

She teed off on anti-abortionists:

"What the abortion issue is, is a power struggle. It has to do with controlling women, keeping them under a pall of guilt about their own sexuality. It isn't an issue of fetuses and when life begins — it's an issue of control. They're playing women against each other, using the

women of the Catholic church against the others. Those women are bitter because they already have eight kids. And that bitterness is being used as a weapon against women who choose to avoid the 20-year-to-life sentence that goes along with having a baby."

Then she settled down to her pet subjects, racism and sexism, which she says are the bases for all forms of oppression of the minorities.

It Sims To Me...

By PAUL SIMS
Sports Editor

Billy Scripture, manager of the Southern League's Jacksonville Suns, is tough. In fact, he's so tough he eats baseballs.

Scripture tears the cover off baseballs with his teeth and he claims it keeps him from getting ulcers. "When you're managing in Class AA ball, you have to have some way to vent your frustrations," Scripture says.

"I've only lost one molar. That's a lot less expensive than an ulcer operation."

Once upon a time Scripture, 33, would bite off a corner of the dugout bench or take a chunk out of a baseball bat. He also used to chew rocks.

Scripture's mouth isn't the only tough part of his anatomy. He likes to impress rookies who have a tendency to back away from pitches by standing on home plate and allowing a mechanical pitching machine to fire baseballs 60 miles an hour at his chest.

As the balls bounce off his chest, Scripture shouts, "Men, there's no way the ball can hurt you."

That's not all. Scripture often warms up the team's fastest pitcher — barehanded.

When he played in the minors, managers would put up a \$50 pool, which would go to the first player who could hit Scripture hard enough with a pitch to make him rub the spot.

And you thought Marines were tough!

It seems Texas A&M University would rather have a plane crash occur over the school than to have anything to do with the University of Texas.

After several prior warnings, A&M has been ordered by the Federal Communications Commission to change the paint job on its 377-foot television tower from the school colors, maroon and white, to orange and white, the colors of arch-rival Texas.

It is a federal regulation for such towers to be painted orange and white as a safety measure.

The FCC said, "As a result of the licensee's (A&M's) failure, the tower stood for over 17 months without high-visibility markings, constituting a serious hazard to air navigation. This condition was in flagrant violation of the rules and specific terms of the station's construction permit and license."

Reader's Digest told the following. Midway through a performance of Beethoven's Ninth Symphony, the basses had a long rest. They were thirsty, so they slipped out and went to the friendly neighborhood bar. They timed their stay very carefully, yet each managed to down several drinks. Then they hurried back to the music hall in time for the big finish.

They weren't too worried that they might miss their opening cue because they had wrapped strings around the closing pages of the opus with a note asking the conductor not to open them until their return.

You can imagine the feeling of the conductor when the musicians breezed in and he realized it was the bottom of the ninth, the basses were loaded and the score was tied.

Papa Berra Tells Boy Facts of Life

NEW YORK (UPI) — There comes a time when every father feels he has to have one of those heart-to-heart talks with his son, and in the case of Papa Yogi Berra, what better time could there possibly be than right now?

Dale Berra was having his breakfast. This would be his last one in the family kitchen at Montclair, N.J., before he'd be off to seek fame, fortune and whatever else there was waiting for him out there in the cold, cold world.

Eighteen-year-old Dale Berra was preparing to do the same thing his father did when he was 18. He was getting ready to leave home for the first time so he could play professional baseball with the Niagara Falls Pirates in the Class A New York-Penn League.

His father, Yogi, 50-year-old manager of the New York Mets and a Hall of Famer, watched his youngest son make a few tentative stabs at the eggs his mother, Carmen, had set in front of him. Dale Berra wasn't very hungry Friday morning. He was thinking about what lies ahead of him, about how much different playing pro ball would be from playing in high school where he had just finished hitting .520.

"This isn't gonna be at all like what you've been used to in high school," Yogi told his youngest son. "You only played once or twice a week there, but now you're gonna have to play every day. Don't press, don't worry. Don't get the red-neck if you go on-for-four one day. You always have the next day to redeem yourself. Make sure you get your rest. You can't play if you're tired. And if you need help, go to the manager. Don't wait for him to come to you."

That was it. Yogi had finished his heart-to-heart talk with his son.

Listening, Carmen Berra began to cry. "How come you didn't cry when I went away?" kidded another son, 23-year-old Timmy, getting ready himself to go to camp with the Baltimore Colts.

A third Berra boy, Larry, 25, played two years in the Mets' organization and then was forced to quit because of knee surgery.

Yogi Berra has some firm ideas about parents interfering with their children. He doesn't believe in it. He never tried to persuade any of his three sons to pursue a professional career in sports, yet he's pleased all did. Especially Dale.

"I only saw him play two games in high school, and I didn't even let him know I was there," said Yogi later at his desk in the Mets' office. "He hit a home run in one of the games."

"When he found out you'd seen him, did he ask you how he looked?" a newsman asked Yogi. "Don't they all?" he laughed. "He's all right, a good boy. One thing about him, he doesn't have a steady girl friend yet. That's good."

The Pittsburgh Pirates made Dale Berra their first draft choice, paying him somewhere around \$45,000 to sign with them. Howie Haak, the Pirates' head scout who has discovered so many of their stars, and Gene Baker, another of their scouts, both call Berra "the best high school player in the country." He is bigger than his father, standing six feet even and weighing 175. A right-handed hitter, he plays third base and runs well enough so that there were some questions why the Mets hadn't drafted him instead of the Pirates.

"We liked him very much and Yogi understood we did, but when it came our turn, we had to go for the player our scouts felt had the most ability," explains Mets' general manager Joe McDonald. "That player was Butch Benton, a catcher from Tallahassee, Florida. We had Dale in our top 24. We didn't have Nolan Ryan that high. Ryan was picked 290th in the draft. That means 289 players in the country were considered better than he was. Sometimes you're right; sometimes you're wrong. The percentage of draftees who make it to the big leagues is less than 50 per cent."

professional contest with Norfolk of the Piedmont League, but that he personally lost the ball game. Unaccustomed to catching under the lights because he had always played the outfield, he let a pop-up fall between him and the pitcher in the ninth inning and two runs scored.

The Mets' manager was anxious to know how his boy did in his first game Saturday night

playing in Niagara Falls' season opener against Batavia, but he resisted the impulse to call. Again, he didn't want to seem like a mother hen.

For Yogi's information, his son had two singles in four trips. He also made a diving stop of an eighth inning smash at third base, jumped right back on his feet and threw the runner out in perfect Brooks Robinson style. Niagara Falls won the ball game, 4-0, and beat Batavia Sunday night also. 3-1. Dale Berra was one-for-three in that one. He handled eight chances in the field, one of which was on the spectacular side, but let a ball go through his legs for an error. Oh, well, nobody's perfect.

Hal White, the former Detroit pitcher who manages Batavia, is among those impressed by Yogi's son.

Graham Wins Open Playoff

MEDINAH, Ill. (UPI) — The way Lou Graham sees it, he achieved two dreams — he won the 75th U.S. Open and he kept Jack Nicklaus on the pro golf tour as a regular.

"When I heard that Jack Nicklaus would play in only

eight tournaments a year if he won the grand slam, I thought to myself that I'd like to be the one who stopped him from winning the grand slam," the 37-year-old Nashville, Tenn., golfer said.

"I told myself that I'd like to be the one to make him continue playing because it would be a shame if he cut his schedule down to eight tournaments. He would deny people seeing the world's greatest golfer."

Graham won the U.S. Open title Monday, shooting a steady, even-par 71, to beat John Mahaffey in an 18-hole playoff by two strokes. Graham set up the playoff by missing a putt on the last hole Sunday and finishing in a tie with Mahaffey at 287, three strokes over par at the tough Medinah No. 3 course.

Nicklaus, who earlier won the Masters, first of the four grand slam tournaments, finished the Open at 289 in a tie for fourth place.

Graham has been playing professional golf since 1962 and he had an important advantage over Mahaffey — he had been in two playoffs to none for the 27-year-old Houston pro.

The lesson, he said, he learned from winning one playoff and losing the other was that the other players "aren't going to give it to me." So, when he stepped out on the first tee, "I knew John was not going to give it to me. I knew I was going to have to get it. I knew I had to go out there thinking smart and not making mistakes."

Graham, a slender six-footer, never trailed. He took a one stroke lead when Mahaffey missed a short putt on the par-three, 187 yard second hole, was even when he missed a 10 foot putt for a bogey on the

third hole and then took a two stroke lead with birdies on the fourth and fifth holes.

At the turn, Graham still had his two stroke lead. On the 452 yard, parfour 18th, Mahaffey missed a six foot putt by an inch and took a bogey, moving Graham three strokes ahead.

That should have done it, but as a national television audience watched, Graham punched

his three iron shot just over the green on the 220 yard, par-three 17th hole while Mahaffey landed on the green. It took three putts for Graham to get down and Mahaffey just missed a birdie but settled for a par, cutting a stroke from Graham's lead.

On the 18th, Graham's two iron drive hooked left, into the crowd and stopped in the trees

on the left hand side of the fairway. A television commentator said the ball hit a spectator and that kept it from going out of bounds.

Graham heard what the commentator said and it had a profound effect on him.

"When I heard it had hit a spectator, I said to myself, 'Well, this tournament must belong to Lou Graham.'"

Wade said, speaking from sad experience.

But a hometown crowd hungry for a victory is not the only handicap Miss Wade faces — there are others named Chris Evert, Martina Navratilova, Billie Jean King, Evonne Goolagong and Margaret Court. And these tough campaigners in the tennis wars hope to give the spectators more to groan about than cheer at.

Miss Wade has a bye in today's program, but Miss Evert, the top seed and defending champion, and most of the other seeds are playing. All are heavy favorites to advance in the odds set by the controversial betting shop permitted to open this year inside the grounds.

Players have been warned they risk expulsion if they bet. But one better heard that Miss Evert has fully recovered from the indisposition that kept her from practice last week and Connors has emerged from an attack of hay fever and promptly put \$9,200 on them to retain their crowns — at 5-1.

Jr. Olympics Set Saturday

Pampa will send several tracksters, ages 17 and younger, to Borger Saturday for the West Texas AAU Junior Olympics.

A preliminary meet was held Saturday in Hereford, in that meet, some Pampanas had solid performances.

Connors Stops Lloyd In Wimbledon Starter

WIMBLEDON, England (UPI) — John Lloyd, ranked only fourth in Britain, put away a placement and the solid wall of sound sweeping across Center Court drew from his opponent Jimmy Connors an expression of envy.

Connors is ranked the world's No. 1 tennis player, the top seed at the Wimbledon championships, but he could not remember such unstinted support from a crowd in his own country as the 15,000 in Center Court were giving Lloyd in his unequal battle.

Connors won in straight sets, of course, 6-2, 6-3, 6-1 to begin the defense of his singles crown, but sometimes it seems winning isn't all.

"I wish the crowds in America would be to me like

the English are to their own players in England," he said, somewhat wistfully for a young man generally not given to exposing inner emotions.

Not all the British agree with the delegate from Belleville, Ill., particularly the articulate Virginia Wade, sixth seed in the women's singles which open today.

Miss Wade says that if Jimmy were British, the sighs of dismay or thunderclaps of applause that attend every point and are magnified in the bowl to deafening decibels would be as much a mental hazard to him as they are to the native players.

"You can't concentrate for worrying that they are expecting too much from you," Miss

Dixie, Glo-Valve Tangle Tonight

Dixie Paris, winner of the second half, takes on first-half champion Glo-Valve starting at 6 p.m. today in Optimist Park for the National Little League championship.

Winner of the game will capture the National League championship, which went to Glo-Valve a year ago.

Glo-Valve won the first half this season with a 7-0 record, which included a 2-1 win over Dixie. In that game, Glo-Valve catcher Mike Warner knocked in the tying and winning runs in the seventh inning with a towering double.

Dixie finished 6-1 in the half. However, in the second half things were reversed.

Dixie went 7-0 and Glo-Valve 6-1, thanks to a 10-7 Dixie win over the previously unbeaten defending champs. In that game, Curtice Morris hit a grand slam homerun in the bottom of the seventh to propel Dixie to the win.

Probable starting pitchers for tonight's game are Steve McDougall for Glo-Valve and Andy Richardson for Dixie.

Richardson is his team's leading hitter with a .513 average, including seven homers, five doubles, 25 runs

and 19 runs batted in. Morris is hitting .512 and has two homers, six doubles, 17 runs and 19 RBIs.

Other Dixie averages include James Braxton .405, Don Braswell .371, Mark Radcliff .361 and David Burns .307.

Glo-Valve is led by Brad Thames with a .459 average. Both McDougall and Mike Warner are hitting .414. Dick Hughes is next at .392.

The manager of the winning team will choose the all stars for upcoming post-season play.

Thursday, there will be a special Little League exhibition, involving the top eight teams, at Optimist Park.

The winner of the Dixie-Glo-Valve game will take on American League champ Motor Inn at 8 p.m. Thursday in the National League park. At 6 p.m., the No. 2 teams, either Dixie or Glo-Valve of the NL, and Citizen's Bank of the AL, will meet at 6 p.m. in the National League park.

At 6 p.m. in the American League park, the No. 3 teams, OCAW of the NL and Gate Valve of the AL, will play. At 8 p.m., the No. 4 teams, Celanese of the NL and Cameron Iron Works of the AL, will tangle.

Your Horoscope

By Jeane Dixon

WEDNESDAY, JUNE 25
Virgo [Aug. 23-Sept. 22]: Your experience today is more a rehearsal than a finished production, but you won't get a chance to perfect it. Expect surprises this evening; be ready to change plans quickly.
Libra [Sept. 23-Oct. 22]: You can't keep up with everyone all the time under all conditions, so get out of the scramble. Set your own pace, rethink your goals, then organize something for yourself.
Scorpio [Oct. 23-Nov. 21]: There's more to do than you can manage at once. Set priorities and get routines out of the way. Be alert for intuition while you line up larger projects for the near future.
Sagittarius [Nov. 22-Dec. 21]: You've got a strong urge to rush into get-rich-quick schemes. Advice is based on misunderstanding of your actual situation. Check facts and figures; uncover unexpected errors.
Aries [March 21-April 19]: Ordinary work encounters confusion and lack of information. Take nothing too seriously and make no fixed decisions. Travel is subject to delays; bring things with you to occupy yourself.
Taurus [April 20-May 20]: You're surprised to find someone opposed to your ideas when you'd assumed neutrality at least. Today's moves will be canceled or changed later, so the less finalized the better.
Gemini [May 21-June 20]: Take friend's advice and you take the consequences when it turns out to be unrealistic and too costly. Think for yourself. Keep matters visible so mysteries don't make for future mixups.
Cancer [June 21-July 22]: The slightest move causes endless talk, and you can't get your way about anything important. Don't sulk; your turn will come. Insight on the situation comes abruptly late tonight.
Leo [July 23-Aug. 22]: Troubleshot, but don't do anything specific yet. Go to the source rather than patch up conditions. Avoid extremes and protect your health despite complex circumstances.
